It pleased the Lord to call me into a path much untrodden, in my early travels as a messenger of the Gospel; having to go into markets, and to declare the truth in the streets. This sore exercise began in Cork, Ireland; but it was only in one instance required of me in that nation: in England, however, many, very many such sacrifices I had to make in pursuit of peace: and in pure obedience to the will of my Heavenly Father I gave up. No one knows the depth of my sufferings, and the mortifying, yea, crucifying of my own will, which I had to endure in this service; yet I have to acknowledge to the sufficiency of Divine grace herein. Many times I had brave opportunities on these occasions, to invite the people to the Lord Jesus Christ, who manifests Himself in the conscience as a light, and who would discover the evil of covetousness and of all unrighteousness; leading and teaching "to do justly, to love mercy, and to walk humbly with God." Hundreds, possibly thousands, who would not, even though requested, come to meet us in a house, or place of worship, have thus felt the power of the living God, in hearing tell that he rewardeth every man according to his ways, and according to the fruit of his doings. In some instances we were rudely treated. Once in a great town (Leicester) while I was speaking in the market, there came two men who looked really furious. They said the mayor ordered me down; coming toward me through the crowd that stood round, evidently intending to pull me down from where I stood; but I observed them, and looking at them, their countenances fell, and they appeared to have no power to touch me: however, as they came with an order from the mayor of the town, I told the people how it was, and commended them to their inward Teacher—Christ. When we obeyed the order, and were leaving the place, some said, had it been a mountebank who stood in my place, he would have been suffered to proceed; but that which drew their attention to God was prohibited. Others who were light and wicked, reviled us. I had, as usual, some dear and tender friends among the brethren, who accompanied and stood by me in such great exercise. These partook of the insults offered—the people throwing at them: indeed somebody was unfeeling enough to bring hot melted lead and cast at us; some of which was found on some part of the clothing of one dear friend. I retired to my chamber at a friend's house, after this bustle; and oh the sweet tranquillity that filled my mind! I thought it a foretaste of that glorious rest prepared for the children of God in His eternal kingdom.

At Durham a clergyman came in a rage, while I was preaching in a market place, wanting some of the people to hale me away; but they took little or no notice of him, and he passed

on. Next day we appointed a meeting for First-day morning, in a hired room in this dark town; and, as was usual, posted up notices. These were torn down, and we were informed, that if we held the meeting, we should be heavily fined. The meeting was nevertheless held, and owned by the great Head of His own Church. At the close another was appointed for the evening of the same day, and a large heavenly meeting it was. We tarried there all that night, but heard no more of the threatened fine. This was but one of divers visits to Durham. It is not my intention, in writing a narrative, to enter much into detail of my journeyings from place to place, but to leave my dear children some testimony to the sufficiency of that Name in which we are called to confide, and to encourage to come up in faithfulness to all truth's requirements.

Once, when young in the ministry, being at an inn with the family with whom I lived, I heard one of them say she had placed a handkerchief in one of the chambers; and on going to fetch it, could not find it. Immediately my mind was impressed with a sense that a young girl whom I had seen in the house, had stolen the handkerchief. I was astonished at my conviction of this fact, for I had by no means a disposition to suspect any one of evil. It was not, however, to be suppressed; for I saw with clearness she had committed the theft: what showed it me was the light of the Lord, which came like lightning into my mind. I ran to enquire for the girl, who came, not knowing my business with her. I looked at her, and in the fear of the Lord told her she had stolen the handkerchief, which she dared not deny, and it was produced. Then I spoke to her; the power of the Lord accompanying what I said, in a wonderful manner, the girl turned very pale, almost like a corpse. I continued to declare of the exceeding sinfulness of sin, and to warn the young creature for perhaps twenty minutes. While the Lord's word was passing through me, a servant was cleaning the floor of the room where we stood; one apparently of the very lowest of her class. She felt so struck by the authority with which the communication was attended, that she raised her hands with astonishment. The mother of the young girl came to me before we left the inn, and asked me how I could tell that her daughter had taken and concealed the handkerchief; to which I replied, that I was made acquainted with it from a sense given me by the Spirit of truth in my own mind—the anointing which could not only give me to be without doubt in this thing, but also did influence all that take heed to it, so as to lead them out of sin, and bring them to live godly lives. I told her she had this gift of God in herself; that all the children of men had it, or a measure of it; and

warned her to take heed to it. I understood they were all Papists who heard me speak. After this was over, and we passed away from the place, I was so overcome with what had occurred, that I could not refrain from many tears.

Another time in my life have I been *alike* filled with the mighty power of the Lord in the sacred work of the ministry. These two instances were extraordinary. The second was in the case of a member of our Society, a high professor, but who was of a contentious spirit. It came upon me to set before him his corrupt and dark state, and to warn him of the day of the Lord who searcheth all hearts; that if he did not speedily repent, and humble himself as in the dust, this day would overtake him, bring him down, and he would come to nothing. I was engaged to keep my eye upon him, while thus addressing him in the dread of the Most High: he attempted to look at me once or twice in defiance, but he could not hold up his head, nor oppose the power: he grew quite pale, and was some time silent, as we sat together after. When, however, we were about to separate, he began to rail against me for what I had said. His words seemed but as chaff before the wind. After this also, my bodily powers seemed so shaken, that I was quite weak, and obliged to lie down for a while. Thus did it please Infinite Wisdom to show forth His own mighty power through a mere nothing

(To be continued.)

Never neglect one duty under pretence of attending to another: you honor God as much in attending to your calling in a right spirit, as you do when upon your knees.

ELIAS HICKS.

BY RACHEL HICKS.

Having been favored from early life frequently to hear Elias Hicks in his public ministry and in conversation on religious subjects, in which he bore abundant testimony to the all sufficiency of the "Spirit of Truth," to teach and qualify for every good word and work, I feel constrained to unite with those who have testified, that his daily walk in life was consistent with the doctrine he preached, which he sometimes said was the hardest task he had to perform, because the divine principle Friends profess to be guided by, and that he invited the attention of others to, requires great watchfulness, prayer and the daily cross, so as to live righteous, holy and godly lives among men. His testimony was strong and clear that this was the only means of bringing about that reformation in the human family so much desired by those who sincerely love mankind. He believed that "Friends were de-

signed to be a peculiar people, called to hold forth to the world peculiar testimonies," among which are plainness of speech, behaviour and apparel, industry and economy, benevolence to the needy, kindness, justice and mercy to all. The Scriptures of Truth and a pure Gospel ministry he viewed as secondary means of instruction; but, above all, the Divine Spirit in man he believed to be the only means of preservation from sin and iniquity. Therefore, when he heard of members of our Society mixing in associations with other people, in their governments and politics, Bible and missionary societies, and charitable associations, he was grieved, because he thought familiarity with those who did not rely on the Divine light to call and qualify for good work, tended to lead to a dependence upon other means of instruction. The politician generally depends upon his reasoning powers; the missionary receives a salary, studies to qualify himself for the ministry, teaches that the Bible is the word of God and our only rule of faith and practice. Even in benevolent associations there is a danger of being led off from a reliance on that Wisdom, which is profitable to direct in all things, and which enables us to take up the daily cross, and also from a strict regard to that sobriety of conduct that Truth requires of all its professors. An important part of E. H.'s mission undoubtedly was to warn Friends of this danger, the revival of which may be even now as a watchword to those who in sincerity join associations for benevolent purposes.

Elias Hicks was a strong man and often made use of strong expressions, and was not always so minute in his explanations of his subject as some desired. One of his travelling companions made some remarks to him respecting it, when he replied, the view of the subject treated on was so plain to his mind that it seemed to him all could understand it.

When he labored with his fellow members, to stand alone and not mingle with the nations or people around them in associations, it was in love to all of every class, believing that we as a Society would be more useful in giving evidence of the sufficiency of the Grace of God, to lead into all truth, by practicing that pure morality which Jesus Christ taught by example and precept in meekness and quietness of spirit.

His consistency in daily life has been testified of by members of other religious societies who knew him well and understood the doctrine he taught. One instance now occurs. A young man, about the year 1828, after hearing an individual speaking to the passengers on board a steamboat of the—as the speaker supposed—unsound and dangerous principles held forth by Elias Hicks. The young man, a Presbyterian, stepped up to him and said, "I will tell you my views of Elias Hicks. I am not a member

of his Society, but I have known him from my childhood up to the present time; his moral character is and has been without a spot or blemish, and he will stand, and his doctrine will stand, when you, his opposers, will be scattered to the four winds."

And of latter time an Episcopalian minister said to a Friend, after some wise remarks relative to our Society, "If you had lived up to your principles and Elias Hicks' doctrine, slavery would have been abolished without the shedding of blood; if you had, as he recommended, abstained from the use of and trading in articles raised by slave labor, others would have seen the consistency of it, and many would have followed your example; so that the slaveholder would have seen the market for his goods was passing away, while those who had no slaves, had a ready and profitable sale for theirs. Therefore, for his own benefit, he would have been induced to set his slaves free; thus gradually, safely, and in a peaceable manner would slavery have been abolished, and we would not have had this desolating war;" and then added, "The time will come when the historian will set down Elias Hicks' name as the greatest man of his age."

Upham says, "Some Christians remain in the condition of *servants*, followed and scourged by an inward condemnation, and do not cheerfully and boldly take that of sons. They wander about, oftentimes led captive by Satan, in the low grounds of the gospel life, amid marshes and tangled forests; and do not ascend into the pleasant hills and land of Beulah, where are the spicy breezes and perpetual sunshine."

From Janney's History of Friends.

BARBARA BLAUGDON.

Barbara Blaugdon was from her youth religiously inclined. She had received a good education and was much esteemed in her profession as a teacher of youth. On being convinced of the principles of Friends, believing it her duty to take up the cross, she adopted the simplicity of manners peculiar to this Society in dress and address, in consequence of which her pupils were withdrawn, and she lost her employment.

She even carried her self-denial so far as to abstain from all flesh, wine and beer during the space of a year. In the meanwhile, she continued to advance in spiritual knowledge, and being faithful to her religious convictions, she went forth as a messenger of the gospel of Christ.

Being moved by a sense of duty, she sometimes went into parish houses of worship, in order to exhort the people to the fear of the Lord and amendment of life, for which she was several times committed to prison. For no

other offence than this, she was, in one instance, whipped until the blood ran down her back; but she did not flinch from suffering; on the contrary, she sang aloud, and was made to rejoice that she was accounted worthy to suffer for the name of the Lord. In some instances, even her persecutors were touched with a feeling of compassion for her, and convinced of the truth of her testimony. She was repeatedly engaged in interceding for her persecuted friends, and not without success.

"On the same day that Edward Burrough and Francis Howgill left Dublin, Barbara Blaugdon arrived there. She came from England in a vessel bound for Cork, but which was, by foul weather, carried to Dublin. When the storm was raging with violence, the seamen imputed the cause of it to her, because she was a Quaker, and were conspiring to throw her overboard; but she overheard their conversation, and told the captain that if he did not prevent them, her blood would be required at his hands. He interposed his authority, and frustrated their wicked purpose. The storm continuing, and it being the first day of the week, she went on deck, being moved by a sense of duty to exhort the seamen and to pray for them. They were very quiet and sedate; acknowledging that they were obliged to her for her prayers, at a time when the chaplain of the ship was silenced through fear.

On landing at Dublin, she went directly to the Deputy's house; but was told that she could not speak with him, and that he had just banished two others of her persuasion. She applied to the secretary, and at length got permission to see the Deputy.

When she came into the withdrawing room, a person came out of the Deputy's chamber covered, while those who attended him stood bareheaded; for they, knowing she had never seen the Deputy, designed to impose on her by substituting another person in his stead. The room being nearly full of people, some of them asked her "Why she did not speak to their lord." But she, having a sense that a deception was intended, answered, "When I see your lord, I shall deliver my message to him." Soon afterwards, the Deputy himself came forth, and sat down on a couch. She then stood up and spoke to him; cautioning him to beware that he was not found fighting against God, in opposing the truth and persecuting the innocent, but, like wise Gamaliel, to let them alone; for, if it was of God, it would stand, but, if of man, it would fall." She added, that the enmity did not lie so much in himself as in the magistrates and priests by whom he was instigated to persecute the people of God. After she had thus spoken, she returned to her lodging at the house of Captain Rich, who, coming home, told her the Deputy was so much troubled, and so mel-

anchoy, that he could not go to bowls, nor engage in any other pastime.

Barbara having performed her service in Dublin, went to Cork, where she had some relatives; but feeling a religious engagement to appear at places of public resort, and to preach repentance and amendment of life, she met with much abuse, and was subjected to imprisonment. It was remarked, however, that in almost every place where she published the principles of truth, some of the audience embraced her doctrines.

After her release from prison, in 1656, she embarked for England; but did not remain long at her home in Bristol, until she again returned to Ireland in the service of the gospel. The vessel in which she came foundered near the Irish coast; but her life was providentially saved, and, after landing, she pursued the same course as before, preaching with zeal and success; but her sufferings for conscience sake were even greater than on her former visit. She was imprisoned both at Dublin and at Limerick, and on her passage homeward she was robbed by a privateer of all the property she had with her."

The intellectual and spiritual treasures of the past should indeed be reverently preserved and used; but they should be used as seed. Instead of indolently living on the stores which our fathers left, we should cast them into the ground, and get the product fresh every season—old, and yet ever new. The intellectual and spiritual life of an age will wither, if it has nothing to sustain itself but the food which grew in an earlier era: it must live on the fruits that grow in its own time, and under its own eye.

For Friends' Intelligencer.

EXTRACTS FROM THE WRITINGS OF
F. W. ROBERTSON.

"Not as I will, but as Thou wilt."

All that saintly experience ever had to teach resolves itself into this, the lesson how to say affectionately, "Not as I will, but as Thou wilt." Slowly and stubbornly our hearts acquiesce in that. The holiest, so far as he has mastered the lesson, will acknowledge that many a sore and angry feeling had to be subdued, many a dream of earthly brightness broken, and many a burning throb stilled in a proud heart before he was willing to suffer God to be sovereign in His own world, and do with him and his as seemed Him best. The earliest record that we have of this struggle in the human bosom is found in the book of Job.

It is the most ancient statement we have of the perplexities and mysteries of life, so graphic, so true to nature, that it proclaims at once that what we are reading is drawn not from romance, but life. It has been said that religious experience is but the fictitious creation of a pol-

ished age, when fanciful feelings are called into existence by hearts bent back, in reflex action and morbid, on themselves. We have an answer to that in this book. Religion is no morbid fancy. In the rough rude ages when Job lived, when men did not dwell on their feelings as in later centuries, the heart-work of religion was manifestly the same earnest, passionate thing that it is now.

The heart's misgivings were the same beneath the tent of an Arabian Emir as they are beneath the roof of a modern Christian. Blow after blow fell on the Oriental chieftain:—One day he was a father, a prince, the lord of many vassals, and many flocks, and buoyant in one of the best of blessings, health; the next he was a childless, blighted, ruined man. And then it was that there came from Job's lips those yearnings for the quiet of the grave, which are so touching, so real, and, considering that some of the strongest of the elect of God have yielded to them, we might almost say, so pardonable: "I should have been at rest, where the wicked cease from troubling, and the weary are at rest. There the prisoners rest together: they hear not the voice of the oppressor. Wherefore is light given unto him that is in misery, and life unto the bitter soul, which longs for death but it cometh not, and dig for it more than for hid treasures—which rejoice exceedingly and are glad when they can find the grave?" What is the book of Job but the record of an earnest soul's perplexities?

"Afflictions," said the tried man, "cometh not out of the dust, neither doth trouble spring out of the ground—superintending all this I know that my Redeemer liveth."

And here there is one word full of meaning, from which we collect the truth of sympathy. It is that little word of appropriation, "My" Redeemer. Power is shown by God's attention to the vast; sympathy, by His condescension to the small. It is not the thought of heaven's sympathy by which we are impressed, when we gaze through the telescope on the mighty world of space, and gain an idea of what is meant by infinite.

Majesty and power are there; but the very vastness excludes the thought of sympathy. It is when we look into the world of insignificance, which the microscope reveals, and find that God has gorgeously painted the atoms of creation, and exquisitely furnished forth all that belongs to minutest life, that we feel that God sympathizes and individualizes. When we are told that God is the Redeemer of the world, we know that love dwells in the bosom of the most High; but if we want to know that He feels for us individually and separately, we must learn by heart this syllable of endearment, "My Redeemer." Child of God! if you would have your thought of Him something

beyond a cold feeling of His presence, let faith appropriate Christ. You are as much the object of God's solicitude as if none lived but yourself. He has counted the hairs of your head. In Old Testament language, "He has put your tears into His bottle." He has numbered your sighs and your smiles. He has interpreted the desires for which you have not found a name nor an utterance yourself. If you have not learned to say, "My Redeemer," then, just so far as there is anything tender or affectionate in your disposition, you will tread the path of your pilgrimage with a darkened and a lonely heart; and when the day of trouble comes, there will be none of that triumphant elasticity which enabled Job to look down, as from a rock, upon the surges which were curling their crests of fury at his feet, but could only reach his bosom with their spent spray.

THE HIGH PREROGATIVE OF SUFFERING.

Men commonly look upon protracted suffering only as an evil and bitter thing. It seems to them like an interruption, an *interference* with the real purpose and business of life. They chafe and fret beneath its heavy hand, wondering why they are thus laid aside and their work hindered, and perhaps complain, "To what purpose is this waste?" They bear it because they cannot escape from it, and it may be that years pass away before they learn that in the very suffering which has so disappointed all their plans and hopes they are fulfilling the vocation to which the Lord has called them. For suffering is, and ever ought to be considered, a *vocation*; not indeed a calling which one would choose for himself, but which his Father has chosen for him. Jesus said to Peter, "Verily, verily, I say unto thee, when thou wast young, thou girdest thyself and walkedst whither thou wouldest; but when thou shalt be old, thou shalt stretch forth thy hands, and another shall gird thee and carry thee whither thou wouldest not. This spake he, signifying by what death he should glorify God. And when he had spoken thus, he said unto him, *Follow me.*" So in later times, all down through the history of the church, many a disciple has been called to glorify God, not in the manner of his death only, but through intervening years of privation and pain. Looking at suffering in this light, how is its whole aspect changed. No longer a fearful weight of unmixed misery, crushing body and spirit, and seeming to defeat entirely the original intention of one's being, it becomes an ennobled, sacred, fruitful *calling*. For outward acts, however praiseworthy and useful they may seem, do not constitute religion. What we *are* is of far more consequence in God's sight than what we *do*. How often, in the course of the Saviour's earthly ministry, he taught men that the external

life might seem fair and good, while yet the heart was full of all uncleanness. How little he said about *doing*—how much about *being*. The beatitudes do not refer to public ordinances, alms-deeds, toil, and busy care. Rather, "blessed" are the *poor in spirit*, the *pure in heart*, the *mourners*, the *meek*, the *humble souls who hunger and thirst after righteousness*. So Paul wrote to the Corinthians that, though they should speak with angels' tongues, and give all their possessions to the poor, and even withhold not their bodies from the fires of martyrdom, yet would they be nothing without *love*. And the same apostle taught the Galatians that the fruit of the Spirit is "love, joy, peace, long-suffering, gentleness, goodness, faith, meekness, temperance." This is personal religion, to be attained by the most helpless and obscure; without it the most active life is a failure. Oh, fellow sufferer, believe that this blessed religion, this true piety, may be developed in the endurance of your sick-room, as truly as amid all the activities of the most busy life. The end of your being is not frustrated; your usefulness has not come to an untimely end; your life of pain and seclusion is not a failure. God, who is wise and perfect and kind in his every plan, says to you, "I have chosen thee in the furnace of affliction." Do you think that he forgot his own glory when he made the choice? His honor is dearer to himself than to you; and you may be sure that he has placed you where you can best promote that honor. Though eternity alone can reveal what this suffering shall have wrought out for you, yet you suffer not for yourself alone, but *for his sake*. From his calm all-seeing infinity the great master builder surveys the spiritual temple of his grace. He fits each stone to its one appropriate place, cutting and polishing it more or less according to its nature and preciousness and the position it is to occupy. Is it not an honor to be such a stone, in such hands?

Besides a suffering life is not of necessity useless to one's fellows. How many have learned the beauty of patience and gentleness, of meekness and self-abnegation and perfect trust, at the bedside of the Lord's "hidden ones." How many have been led to the cross of Christ from seeing the power of his grace to sustain and cheer through long and fearful anguish, and to take away all fear of the last enemy. How much sympathy and love flow out from a chastened spirit to comfort and encourage others. What clouds of incense ("which are the prayers of saints") have gone up from couches of sleeplessness and pain, descending again in blessing upon the church and the world. Who can say that Chloe Lankton, strong and well, would have been more useful in these thirty years than Chloe Lankton, the "example of suffering, affliction, and of

patience?" But the crowning glory of suffering is that it allies the soul to Christ. It makes the servant as his Master, the disciple as his Lord. I know that nature shrinks from pain, and that mere pain is not the severest part of the protracted trial. I know the fierceness of the struggle, the helplessness, the disappointment, the anguish that cries out, "If it be possible, let this cup pass from me." So Jesus himself prayed, but the cup was not removed.

—*Boston Transcript.*

L. E. C.

Love is not duty; but duty cannot be performed without love. It is love that gives vitality and power to all forms of duty. And if you look at religious life, that which you look at from the inside as speculation may seem vague; but there is no person that has ever had the inbreathing of the Spirit of God, and the awakening of a true religious life, who is not conscious that his religious life has been dependent upon the element of love, that he is free and happy just in proportion as this element is developed, and that he is burdened just in proportion as it is absent.

FRIENDS' INTELLIGENCER.

PHILADELPHIA, EIGHTH MONTH 18, 1886.

DIED, at his residence in Loudoun County, Virginia, on the 19th of Fourth mo., 1886, LEVI T. SHORMAKER, in the 34th year of his age.

He was an exemplary member of Goose Creek Monthly Meeting of Friends, and during the long illness that preceded his decease, gave evidence that he was prepared to enter into the joys of eternal life.

—, at her residence in Milton, Wayne County, Indiana, after a painful illness of 4 months, HULDAH H. WARD, aged 30 years, daughter of Allen and Sarah Griffith.

The Secretary of "Friends' Association of Philadelphia for the Aid and Elevation of the Freedmen," would call the attention of Clerks and other Friends to whom the Annual Report has recently been sent, and earnestly request them to make collections in the different neighborhoods. It is desired to place an increased number of teachers in the field, and to sustain these, money and clothing are required.

HENRY M. LAING, *Secretary*,
No. 30 N. Third street.

Christ sometimes comes to the redeemed soul as rain upon the fleece, in calm and sweet serenity. Their hearts are too full for analyzing their feelings; but there is a sense of silent unutterable happiness—an absorbing overflow of tranquil joy—which disdains the feeble expression of the tongue. There hope seems to seize upon His strengthening hand, and faith to gaze upon His inspiring eye, and love to bury its face in His bosom, and humble sorrow to sit at His feet and weep. True, the vision soon dies away, and leaves us to the drearier duties of the day,

its burthen and heat; but the dew of the morning will lie upon that Christian's soul long after the bright cloud that dropt it hath faded away.

For the Children.

THE BRAIN AND NERVES IN ANIMALS.

I have told you how your mind learns about the world around you, and how it makes use of its knowledge by means of the machinery of your body—the muscles, bones, &c. Your mind is in the brain, and uses the brain to think with; and from the brain branch out all the nerves by which it works all the various machinery of the body. Your brain, then, may be considered the central workshop of your mind; or it is like an engine-room of a factory, where the engine is, that keeps the machinery in other parts of the building in motion.

The different animals have a brain and nerves just as you do, and their minds in their brains learn about things around them. They do not learn so much as your mind does, it is true, but they really do learn. If you look at a kitten when it is just born, it is very much like a baby. It does not know anything. But, like the baby, it knows more and more every day, and when it gets to be a cat it knows a good deal; and all that it knows has come to its mind in the same way that what you know has come into your mind. It has come in through its senses. All its knowledge came in at its eyes and ears, &c., and got to its brain by the nerves.

The mind in animals, too, uses the muscles in the same way that your mind does. See a kitten at play; the muscles that move her paws are directed by her mind in the brain, by means of the nerves. As she pokes at the thing that you hold out to her, the nerves of her eyes are telling the mind in the brain all the time about the string, and then the mind is telling the muscles of the paws what to do. See her as she springs to catch the string that you draw along on the floor. As she watches it, messages are going from those bright eyes to her mind in the brain; and then, as she springs, messages are sent from her brain to a great many muscles in different parts of her body. The mind tells the muscles just when and how to act; and they all do exactly as the mind tells them. A great deal of machinery the mind of a cat sets to work when she makes a spring to catch any thing.

What I have told you about some animals is true of all. The little insect that flies out of the way when you strike at him, has a little brain, and there his mind thinks about what it sees, and hears and feels, &c., just as your mind does; and when he flies away so quickly from the blow that his eyes see coming, his mind

tells the muscles to make the wings go. There are nerves that carry messages from his senses to the mind in his brain, and there are nerves that carry messages from his brain to his muscles, as there are in you. The brain is very small and the nerves are very fine, but they do their work well. They make a little telegraph, but it is a good one.

What a quantity of thinking there is done in the brains of all the animals in the world! How busy their minds are receiving reports from their senses, and working all the machinery of their bodies. Go out into the garden and see the birds, the butterflies, the bees, the flies, the ants, the frogs, the toads and the worms; they are all busy thinking. They cannot move without thinking. It is their thinking that makes their muscles move them. And they think about what they move for.

Some of them think more than others. The bird thinks more than the worm. Some think faster than others. The humming-bird, that darts so quickly from flower to flower, thinks as fast as he works. But the lazy toad is a slow thinker. His mind does not work the machinery of his muscles much, and so does but little thinking. But even he once and a while thinks quickly. Let a fly walk along pretty near him, and he will catch it with his tongue so quickly that you cannot see just how he does it. He watches the fly intently, keeping very still all the while, and when it gets near enough, he thrusts out his tongue, and the fly is gone. You would hardly think that so lazy a looking animal could do any thing so quickly. But very nimble is he as a fly-catcher if he is not nimble at any thing else; and very quickly must the mind in his brain think when it is working its fly-catching machinery.

The more an animal thinks, the larger is the brain, as compared with the rest of the body. Man thinks more than any other animal, and so he has a larger brain. But the oyster has hardly any thing that can be called a brain, for in his still life, shut up as he is in his shell, he thinks but little. But such animals as horses, dogs, cats, birds, monkeys, &c., have quite large brains, for they think a good deal. Their brains, however, are not by any means as large as the brain of man is, in proportion to the size of the body.

This is as we should suppose it would be. The brain is the machinery with which the mind thinks. Now, whenever we see a great deal of machinery together at work we know it is because there is much to be done by it; and when we see a small machine, that has not many different parts, we know that it is not intended to do much. So it is with the mind's thinking machinery. The brain of an animal that thinks but little is small and simple; but the brain of one that thinks much is large and

has many parts. Though animals do their thinking with their brains as we do with ours, there is some thinking that we do that they cannot. There are some things about which they know nothing; but this I shall tell you about in another chapter.

WORTHINGTON HOOKER.

THE BROOK AND THE POND.—AN ALLEGORY FOR THE BENEVOLENT.

BY A. A. WILLITS.

"Sweet brooklet, ever gliding,
Now high the mountain riding,
The lone vale now dividing,
Whither away?"—*Sir Robt. Grant.*

In the cool and shadowy clough of a distant mountain, hard by a mossy spring, a little brooklet had its birth; and with a pure heart, a generous nature, and a lively and cheerful spirit, it started upon its course through the world, bent on a life of activity and usefulness.

One day after it had reached the plain, and was hurrying on with tinkling feet to bear its tribute to the river, it chanced to pass near by a stagnant pond. The pond hailed it—

Pond.—"Whither away, Master Streamlet?"

Brook.—"I am bearing to the river this 'cup of cold water,' which God has given to me."

Pond.—"You are very foolish to do that; you will need it yourself before the summer is over; we have had a very backward spring, and we shall have a hot summer to pay for it, and then you will dry up."

Brook.—"Well, if there be danger of my drying so soon, I had better work while the day lasts; and if I am likely to lose this water from the heat, I had better do good with it while I have it."

And so on it went, singing and sparkling upon its useful way.

The pond smiled contemptuously upon the folly of the "babbler," as it styled the brook, and settled down very complacently into the conviction of the superior wisdom of its own covetousness; and so husbanding all its resources against the imagined day of need, it suffered not a drop to leak away.

Soon the midsummer days came round, and very hot days they were, indeed. But what was the effect of the heat? Did the little brook dry up? Nothing of the kind. Why how did it escape? Well, the trees crowded to its brink, and throw their sheltering branches over it, for it had brought life and refreshment to them; and the sun, peeping through the branches, only smiled pleasantly upon its dimpled face, as if it said, "Who could harm you, pure and beautiful brooklet?" Indeed, all things seemed inspired by similar sentiment toward it. The birds of the air, after sipping its

sweet water and laving their wings in its silver tide, sang its praises in the overhanging branches. The flowers sprang up along its border, and reflected their brightest tints from its mirror-like surface and breathed their sweetest fragrance upon its bosom. The poet came to hear the music of its warbling voice, and the artist to behold the beauty of its winding way. The husbandman's eye always sparkled with joy as he looked upon the line of verdant beauty that so plainly marked its course through his fields and meadows. Even the beasts of the field love to linger by its banks, or to stand and drink the pure water from its quiet eddies. And so on it went, blessing and blessed of all.

But giving so freely and so constantly, did it not exhaust its resources? did it not *run dry*? Not at all; God saw to that. It carried its full cup to the river, and emptied it freely in; the river bore it on to the sea, and the sea welcomed it with uplifted hands; the sun smiled warmly upon the sea, and the sea sent up its vapory incense to greet the sun; the clouds, like great censer cups, caught the tribute in their capacious bosoms, and the winds, like waiting angels of God, took the clouds in their strong arms and bore them swiftly away—away to the very mountain that gave the little brooklet birth, and there, over that cool ravine, they tipped the brimming cup, and poured it all *back again*; and so God saw to it that the little brook, so active, so generous, so useful, should never run dry.

But how fared the pond? Ah, very different indeed was its fate. In its mistaken prudence and selfish idleness, it grew sickly in itself and pestilential in its influence, so that all beheld it but to dislike it. The farmer sighed and shook his head whenever he looked upon it. The citizen who came to seek a country-seat, declined to purchase as soon as he discovered it. The artist and the poet saw no charm in it, and hastened past it. The beasts of the field wet their lips, but withdrew them without drinking, and turned away toward the brook. The evening zephyr stooped and kissed it—in the twilight, by mistake—and caught its malarious breath, and carried it unconsciously into all the homes around. The people of the region soon grew sad and sorrowful, and began to shake with ague and to burn with fever; and at last, with constitutions well-nigh shattered, they were compelled to move away from its neighborhood. And finally Heaven, in mercy to man and to nature, smote it with the hottest breath of the sun and dried it up forever.

And the wise pondered the history of the pond and the brook, and saw how the book of nature confirmed and illustrated the book of revelation, and how true a saying of the latter it was: "There is that scattereth, and yet in-

creaseth: and there is that withholdeth more than is meet, but it tendeth to poverty. The liberal soul shall be made fat, and he that watereth, shall be watered also himself." (Prov. 11: 24, 25.)

ALL LIFE IS BEAUTIFUL.

BY BELLE BUSH.

All life is beautiful, the humblest flower
That cheers the dusty highway with its smiles,
Has something in it of a heavenly power
That oft my heart of weariness beguiles.

The blue-eyed violet of the glen and grove,
Spring's sweetest offering, is a thought of God,—
A tiny poem whispering of his love,
And making eloquent the soulless clod.

A shivering pebble in the river's bed
That scarcely makes a ripple where it lays,
May teach a lesson worthy to be read
By all who murmur at the world's dull ways.

The soft green moss we tread beneath our feet,
The waving grass that carpets hill and plain,
Take to their generous hearts the dew or sleet,
And, uncomplaining, greet the Autumnal rain.

They do not question of its use or power,
But meekly they receive whatever is given,
Thankful alike for sunshine or for shower,
As we should be for all the gifts of heaven.

There's nothing comes within our scope of vision,
From flower to star, from insect up to man,
But seems to say to us, I have my mission,
And fill my place in the Creator's plan.

The world is filled with elements of power
Which only want the chemistry of Thought
To make them known, and fill each passing hour
With wonders mightier than the past ere wrought.

Earth, air, and ocean, teem with life unseen—
Undreamed of by the Sages of our time;
Its subtle links pass not before the screen
On which are shadowed all our hopes sublime.

We need not wander far in quest of Truth;
She has her habitation everywhere:
The rose is one, and the warm heart of youth
Receives, whenever it seeks, her jewels rare.

We might see more, if we were not so blinded
By lusts of earth, its pomps and fleeting shows;
And richer grow in soul, were we so minded
To read the lessons Nature's works disclose.

We walk with faltering feet and downcast eyes
Through God's vast treasure-house of truth and love,
And feel not half the heavenly harmonies
That float around us from the realms above.

We think too meanly of the world without,
Too little of the wondrous world within,
O'er canopied in each, and wrapped about
By the dear love that knows no storms or sin.

Like moles or bats men grope their way through life,
Dazed by the *light their lamps* of wisdom give,
Or all absorbed in petty cares and strife,
Heart-starved, in poverty of Soul they live.

Why is it thus? since God such bounteous stores
Has spread before us, why not use it all?
Why sit like beggars starving at the door
Where plenty smiles, nor heed his generous call?

Oh! could our souls but rise above the din
Of the world's discord, and lose its greed of gain,
Then might we turn to the great world within
And dwell where order, peace and beauty reign.

Then should we trace in every thing we see
The love that gives us what so e'er we need,
And feel our souls grow large in liberty,
The liberty that makes us free indeed.

The liberty of love *fraternal, deep*,
The conqueror of envy, *fear* and scorn,
The love that feels with sorrow's child to weep,
And in God's Kingdom knows no *lowly* born.

Such love would bring to us the fruits of peace,
The golden harvest waited for so long,
When *war* and *rumors* of them *all* shall cease,
And Freedom be our universal song.

Ah! holy love, God speed the blessed day,
When thou shalt reign o'er all the realms of earth,
And hold o'er human hearts thy gentle sway,
Till they look up and own their heavenly birth.

Then will they go as angels do, to trace
The mysteries of life in all things here,
And wear its beauty and the nameless grace
Of the high soul that knows no doubt or fear.
BELVIDERE SEMINARY, June 8th.

VENTILATION.

(Concluded from page 362.)

The ventilation of private dwellings in this country is such as might be expected from that entire indifference to the laws of health, manifested in public establishments. Let a person travel in private conveyance up through the valley of the Connecticut, and stop for a night at the taverns which he will usually find at the end of each day's stage. The bed-chamber into which he will be ushered will be the concentration of all forms of bad air. The house is redolent of the vegetables in the cellar,—cabbages, turnips and potatoes; and this fragrance is confined and retained by the custom of closing the window-blinds, and dropping the inside curtains, so that neither air nor sunshine enters in to purify. Add to this the strong odor of a new feather-bed and pillows, and you have a combination of perfumes most appalling to a delicate sense. Yet travellers take possession of these rooms, sleep in them all night without raising the window or opening the blinds, and leave them to be shut up for other travellers.

The spare chamber of many dwellings seems to be an hermetically closed box, opened only twice a year, for spring and fall cleaning; but for the rest of the time closed to the sun and the air of heaven. Thrifty country house-keepers often adopt the custom of making their beds on the instant after they are left, without airing the sheets and mattresses; and a bed so made gradually becomes permeated with the insensible emanations of the human body, so as to be a steady corrupter of the atmosphere.

In the winter, the windows are caked and lusted, the throat of the chimney built up with a tight brick wall, and a close stove is introduced to help burn out the vitality of the air. In a sitting-room like this, from five to ten persons will spend about eight months of the year, with no other ventilation than that gained by the casual opening and shutting of doors. Is it any wonder that consumption every year sweeps away its thousands?—that people are suffering constant chronic ailments,—neuralgia, nervous dyspepsia, and all the host of indefinite bad feelings that rob life of sweetness and flower and bloom?

A recent writer raises the inquiry, whether the community would not gain in health by the demolition of all dwelling-houses. That is, he suggests the question, whether the evils from foul air are not so great and so constant, that they countervail the advantages of shelter. Consumptive patients far-gone have been known to be cured by long journeys, which have required them to be day and night in the open air. Sleep under the open heaven, even though the person be exposed to the various accidents of weather, has often proved a miraculous restorer after everything else had failed. But surely if simple fresh air is so healing and preserving a thing, some means might be found to keep the air in the house just as pure and vigorous as it is outside.

An article in the May number of "Harper's Magazine" presents drawings of a very simple arrangement by which any house can be made thoroughly self-ventilating. Ventilation, as this article shows, consists in two things,—a perfect and certain expulsion from the dwelling of all foul air breathed from the lungs or arising from any other cause, and the constant supply of pure air.

One source of foul air cannot be too much guarded against,—we mean imperfect gas-pipes. A want of thoroughness in execution is the sin of our American artisans, and very few gas-fixtures are so thoroughly made that more or less gas does not escape and mingle with the air of the dwelling. There are parlors where plants cannot be made to live, because the gas kills them; and yet their occupants do not seem to reflect that an air in which a plant cannot live must be dangerous for a human being. The very clemency and long suffering of Nature to those who persistently violate her laws is one great cause why men are, physically speaking, such sinners as they are. If foul air poisoned at once and completely, we should have well-ventilated houses, whatever else we failed to have. But because people can go on for weeks, months, and years, breathing poisons, and slowly and imperceptibly lowering the tone of their vital powers, and yet be what they call "pretty well, I thank you," sermons on

ventilation and fresh air go by them as an idle song. "I don't see but we are well enough, and we never took much pains about these things. There's air enough gets into houses, of course. What with doors opening and windows occasionally lifted, the air of houses is generally good enough;"—and so the matter is dismissed.

One of Heaven's great hygienic teachers is now abroad in the world, giving lessons on health to the children of men. The cholera is like the angel whom God threatened to send as leader to the rebellious Israelites. "Beware of him, obey his voice, and provoke him not; for he will not pardon your transgressions." The advent of this fearful messenger seems really to be made necessary by the contempt with which men treat the physical laws of their being. What else could have purified the dark places of New York? What a wiping-up and reforming and cleansing is going before him through the country? At last we find that nature is in earnest, and that her laws cannot be always ignored with impunity. Poisoned air is recognized at last as an evil,—even though the poison cannot be weighed, measured, or tasted; and if all the precautions that men are now willing to take could be made perpetual, the alarm would be a blessing to the world.

THE ANTIQUITIES OF THE SHETLAND ISLES.

At the Anthropological Society, a paper was read "On the Archaic Anthropology of the Zetland Islands," by Dr. Hunt. The author of the paper gave an account of a recent visit made by him to the Zetland Islands, with the object of investigating the antiquarian relics reported to exist in those Islands. He first visited Unst, the most northerly of the group, but found that the chief objects of interest had been previously explored. He proceeded to examine the other islands, and described various points of antiquarian interest in several of them. He gave a detailed account of the discovery of an underground structure of considerable dimensions, from which were dug a large number of rough stone implements, resembling in form and size those that have been found in Persigny-le-Grand, in France, and the objects of which have occasioned considerable discussion. These implements (which are not of flint, as are those of Persigny) were exhibited to the Society, and the author mentioned the various theories current as to the uses of these and similar stone implements, stating at the same time his opinion that any definite conclusion as to the purposes or age of these objects could not be decided from the present data. He considered the subject as one of great importance, and deserving of further investigation by the society. The author of the paper mentioned, in conclu-

sion, the various gentlemen to whom he had been indebted for acts of courtesy whilst prosecuting his investigations, and mentioned especially the liberal donation of the Earl of Zetland to assist in carrying out the researches which had been made under the auspices of the Anthropological Society. Mr. Tate, who accompanied Dr. Hunt to the Shetland Islands and assisted in his explorations, made a separate report respecting the antiquities and human remains found in Unst, the most northern island, where he pursued his investigations while Dr. Hunt proceeded further south. He described particularly the remains of two ancient burial places enclosed within circular walls on a hill 100 feet high, also an underground chamber about 30 feet long that had contained urns, some of which were large enough to hold four or five quarts of liquid. He mentioned that these and similar places of burial had been generally constructed on the highest hills, some of them having been found at a height of 1500 feet. At Ness five cairns had been discovered in the hollow of a sandbank, where the sand had been blown away by the wind. Skeletons were found within, and two of them were lying on a bed of fish bones two feet thick.—*Exchange Paper.*

From the N. Y. Evening Post.

THE EFFECTS OF TREES UPON CLIMATE.

In concluding what we have to say in regard to the effects of trees upon the various phenomena of the seasons, we have to consider their influence in preventing freshets, and the drying up of our ponds and streams by evaporation and other methods. We have before referred to the action of the wind in blowing both cold and hot, causing rapid freezing in the one case, and a rapid thawing in the other; and that the only barriers on the large scale which we can erect to control its effects must be those which nature herself offers to our hands, and "only asks us but to spare," that is, the forests. As we have before remarked, the unobstructed blowing of the wind causes the rapid abstraction of caloric in those cases where it is colder than the objects with which it comes in contact, and as rapidly imparts heat when the reverse is true—that is, when the wind is warmer than those objects. Evaporation also goes on in a greater or less degree when the air is not saturated with moisture under all degrees of temperature. We can easily convince ourselves of this by exposing a piece of wet cloth to a current of air when the temperature is very low even, and we shall find that notwithstanding it freezes at once under these conditions, it very rapidly becomes dry. From this we can understand how snow and ice waste in very cold weather. In addition to the waste caused by evaporation from water surfaces exposed to the action of the winds, the

land surfaces of course are also subjected to the same action, and by this means one of the great sources of supply by which the streams, which under other conditions are kept in a steady flow, is cut off. Freshets, as they are called, are also one of the principal causes of the extreme low stages of water in our ponds and streams, which are now so much complained of. They are produced by the rapid concentration of water in the streams, and in this country this result is brought about in most cases by the sudden thawing of snow and ice, sometimes assisted by rain, but mainly dependent upon the blowing of warm winds. In the woods, as every one is aware, the snow remains much longer than in the open country, and as of course it lies level there, the ground protected by it, and also by a coating of fallen leaves, is but little, if any, frozen in our most severe winters. When a thaw begins the porous nature of the soil and the obstructions presented by a mass of leaves, together with the hollows between the trees, and many other obstacles which are only found in the forests, retain the water until it sinks into the earth, when it slowly trickles through its pores to the small streams and ponds which supply the rivers, which by this process are kept in an equal state of flow. But in the open country the surface of the ground is more regular and the soil more compact, while in winter it is often frozen to a great depth, and as the snow is usually blown into heaps, the frost penetrates irregularly, so that in the bare spots a long time is required before it is thawed. Under these circumstances, when the weather becomes warm or rain falls, the water at once concentrates in the ponds and small streams. These in their turn pour out their overflowing contents, and thus cause those floods which every year do so much mischief in portions of our country. It is quite easy for any one to verify, by a simple experiment, how much more rapidly snow and ice is dissolved when exposed to air in motion than when at the same temperature it is subjected to the action of the atmosphere where no lateral current exists. Take, for the experiment, equal parts, by weight, of snow, and as nearly as possible of the same density. Place each portion in separate vessels, (earthenware bowls of the same size will answer the purpose well); then place the bowls on tables of the same height in different parts of the room, where the temperature is very nearly equal, and subject the one to air put in motion by the process of fanning, while the other is left undisturbed. As the result of this experiment it will be found that snow which is left in quiet to the action of the warm air will be many times longer in thawing than the other, which is subjected to the air in motion. If we cover the one bowl with a piece of paper or any slight covering the effect will be still

more striking. This we are aware does not agree with the evidence of our senses in regard to the use of a fan when suffering from heat; but we must remember that if we should chance to be placed in an atmosphere much warmer than our bodies we should come to a very different conclusion. We should then understand what is meant by the "wind feeling like the hot blast from a furnace."

In writing a series of articles upon subjects of such widespread and varied importance as those under consideration, we are compelled by the very nature of the case to leave unnoticed a vast number of facts of much interest to our readers, and our endeavor has been to discuss those points which seem to us to be of the most practical value: that is, to give such facts as may furnish a reason for action in certain directions, and over which we have control to some extent, and for which we are therefore more or less responsible.

VOLCANOES.

In a letter addressed to the French Academy of Sciences, M. Fouqué, who visited Santorino at the time of the great volcanic eruptions, gives an account of various other places in Greece where similar disturbances occur. One of the most important is the crater of Methuna, mentioned by Strabo, and which had hitherto escaped the investigation of geologists. This place is rich in mineral springs, and one of them, M. Fouqué says, is extremely rich in bicarbonate of potash, and evolves a considerable quantity of carbonic acid. Moreover, at the Solfatara of Sousaki, he has discovered a grotto of the same nature as the Grotta del Cane, at Naples, where dogs are suffocated by the carbonic acid which occupies the lower stratum of the atmosphere, in accordance with the laws of gravity, while men, in consequence of their erect posture, escape its influence. The grotto of Sousaki is richer in carbonic acid than the Neapolitan one, and its evolution is owing to an old eruption of serpentine, the geological age of which our author thinks he can determine. In the island of Milo, he has found emanations of carbonic acid, in some instances mixed with hydrosulphuric acid. There are ten different points of the island where such emanations occur. One of them is accompanied with all the circumstances attending those of the Salinellas of Sicily. At four other points there is no evolution of gas, notwithstanding the high temperature he has ascertained in the air. All the various eruptions of Milo are not of the same geological period. The western region of the island is almost entirely volcanic, and there are much fewer rocks of ancient date than had been hitherto supposed. M. Fouqué has also measured the principal summits of the island, which will enable him to make a better

map of the island than the existing ones. At Santorino the volcanic action continues; the detonations continue, and new points of activity have manifested themselves. Professor Silvestri has also written to the academy to describe an earthquake which was felt throughout the eastern part of Sicily. There were two shocks, one lasting three seconds, and another five. All this confirms what had been said regarding the general volcanic activity at that time all over the northern regions of the Mediterranean.—*Manchester Weekly Times.*

From the London Review.

THE SOURCE OF THE NILE.*

Mr. Baker's work is full of interest—in parts, profoundly exciting; the pictures suggested, rather than described, are often wild in the extreme, while the narrative of personal suffering has been very seldom paralleled in the annals of travel. It must be observed, moreover, that Mr. Baker has not labored and endured in vain, since he has discovered one of the most extraordinary lakes hitherto known to exist in Africa. Having stated thus much, which we do with the greatest pleasure, we feel bound to add that, in imagining he has solved the problem of the Nile—that is, found the spot at which its mysterious head emerges from the earth—he is cherishing a mere delusion. The source of the Nile is at this moment as little known as it was in the time of Julius Cæsar, and it almost surpasses our comprehension how a traveller so intelligent and so well informed as Mr. Baker should fail to be conscious of this. To make use of a common expression, Mr. Baker and all other travellers in Central Africa have been simply beating about the wrong bush, while the bird they are in search of lies hidden far off in another. Yet Mr. Baker, Captain Speke, and Captain Burton, may be almost said to have touched the great river with their finger, and to have looked wistfully in the direction from which, through utterly unknown lands, it comes rolling towards the Victoria Nyanza, into which it flows in a deep flood two hundred and forty feet in breadth, and with a current of four miles an hour. This is the Nile whose source it is necessary to discover—a thing which no one has yet done or even attempted; but, until this shall be done, it will be wrong to take credit among civilized nations for having thrown light upon a subject which philosophers and conquerors have desired to illuminate in vain. Bruce, Burton, Speke, Grant, Baker, have deserved well of the public, by exploring new regions, and adding largely to our geographical knowledge; but, in spite of

their efforts, old Nile keeps his secret still, his source being a virgin spring, of whose waters no civilized man has yet tasted. The Kitangulè rises far away towards the south-west, and its course is known to the natives for eighteen days' journey before it reaches the lake. How much farther its stream must be followed ere the lake or tarn is reached in the Blue Mountains, whose lofty summits, from the shores of the Nyanza, may be dimly discerned by the telescope in the south-west, no one can decide; but wherever this turn may be, that is the source of the Nile. We say this under the impression that the accounts which former travellers have given are correct. There may, however, be other rivers, still larger than the Kitangulè, falling into the Victoria Nyanza, both from the east and west, and it will be necessary to trace every one of these to its well-spring before we can be said to have cleared up the mystery which for three thousand years has defied the learning, the enterprise, and the energy of man. To return, however, to the Kitangulè; after pursuing a north-easterly course for thirty-five or forty days, it falls into the Victoria Nyanza, which it traverses in part, as the Rhone does the Lake of Geneva; it then, through a gap in the rocks, breaks forth from the lake, and pushes its way through a channel honestly marked in parts with dots in the maps, to intimate that no one has followed its current the whole way. It may be assumed to be the same river which is again fallen in with farther on, and which flows into the Albert Nyanza; but beyond this the uncertainty increases. No doubt Mr. Baker was told of a stream which issued from the lake, and this stream he fairly enough infers to be the White Nile; but before anything is positively stated about that river, much research and investigation will be needed. If Great Britain should think it worth while, the only plan for ensuring success would be to appoint a commission of travellers—ethnologists, geographers, geologists, botanists, photographers—who should survey the whole lake region of Central Africa, and be accompanied by a military escort sufficiently strong to remove from the explorers all idea of danger. A small screw steamer should be taken, and put together on the lakes one after another, so that the whole of their shores might be examined and described. On the return of these commissioners, after completing their labors, we might truly be said to have discovered the sources of the Nile—but not till then.

One practice of our travellers we cannot sufficiently condemn—we mean that of imposing English names on African rivers, lakes, mountains and falls. Why should the White Nile forfeit its ancient appellation, and be lost to geography by being transformed into the Somerset? What had Lord Ripon or Sir Roderick Marchison to do with the Nilotic cataracts, that

* The Albert N'Yanza, Great Basin of the Nile, and Explorations of the Nile Sources. By Samuel White Baker, M. A., F. R. G. S. With Maps, Illustrations and Portraits. Two vols. London: Macmillan & Co.

we should find their names associated with that of Mumbo Jumbo in the Mountains of the Moon? What has the Queen of these realms to do with one of the great lakes, or her lamented consort with the other? Our courtier travellers forget themselves when they revolutionize geography after this fashion. If we had conquered the country and converted it into a colony, such a practice might be tolerable; but, as the case now stands, it is altogether absurd, and we trust that, through reverence for science, geographers will firmly set their faces against so incongruous a mixture of names. Should foreign travellers follow the example set them by our countrymen, what a strange aspect would the surface of Africa soon present, studded with Danish, Swedish, French, German, Italian, Spanish, Portuguese and Greek names, jumbled up with negro appellations, unpronounceable by the European tongue, and with the grand nomenclature of the Koran! Having made these remarks—which apply to the proceedings of nearly all recent travellers, who, considering their strong propensity to transform everything, may deserve our gratitude for not obliterating Cairo and Damascus from the map of the world, and calling one Hutchison and the other Murchison towns—we go on to observe that, viewed merely as a book of travels, Mr. Baker's work is entitled to high praise. It would be difficult to exaggerate the intrepidity displayed both by him and his wife, who may truly be regarded as one of the most unflinching and devoted of her sex. It is impossible to contemplate without strong sympathy, not the perils she encountered, which we estimate as nothing, but the miseries from fever, from ague, from hunger, from thirst—above all, from the effects of a sunstroke which nearly put a period to her existence in the most odious solitudes on the surface of this globe.

From the N. Y. Evening Post.

EGYPTIAN HIEROGLYPHICS.

IMPORTANT DISCOVERIES BY LEPSIUS.

The London *Athenæum* publishes the following extract from a letter written by M. Lepsius, under date of 21st of April, 1866, giving an account of the discoveries he has recently made in Egypt:

"On leaving Port Said one of the engineers of the Isthmus told me that he had seen a short time before a Greek inscription in San, which I very soon found out. It was the corner only of an inscription, the body of which was still covered with masses of old rubbish. A part of this, as well as the rubbish, had by accident fallen down twelve or fourteen days before we arrived there, and had revealed the corner of the inscription. I employed some boys to clear the rest of the stone from the rubbish which lay above, and had the good

fortune to discover it to be a great bilingual inscription, in a perfect state of preservation. The hieroglyphical inscription has thirty-seven, the Greek no less than seventy-six, lines of considerable length in small letters, containing much more text than the inscription of Rosetta.

"It is also found that the demotic inscription on this monument was ordered to be added by the priests, 'on a stone or brass stele, in the sacred writing of the Egyptians and in Greek characters.' This is unfortunately wanting; but it is evident how precious the other two texts, every word of which is perfectly legible, from the beginning to the end, must be for hieroglyphical studies. The contents of the inscription are not less interesting. It is dated the 9th year the 7th Apellæus—17 Tybi, of the reign of Euergetes 1. The priests of Egypt came together in Canopus to celebrate the birthday of Euergetes 1. on the 5th Dios, and his assumption of the royal power on the 25th of the same month, when they passed the decree here published. They enumerate all the good deeds of the king, amongst them the merit of having recovered in a military expedition the sacred images carried off in former times by the Persians, and order great honors to be paid in reward for his services.

"One of these rewards is a feast to be celebrated in honor of the king and queen on the day of the rising (or coming forth *perr*) of the *shaa* (or crowns) of Isis, which the priests call the first day of the year; and another honor is a second feast of the same gods, introduced every fourth year between the Epigomena and the first Thoth, in order as it is clearly stated, to avoid henceforth the inconvenience that some of the great feasts relating to the summer were, by the wandering of the civil year, celebrated in the winter and others in the summer which belonged originally to the winter.

"Thus we have the whole theory of the two years—one in use amongst the people, the other known by the priests, as I had stated in my Chronology, and against which a new theory had been started by M. Brugsch in his nevertheless interesting 'Materiaux.' As the stone was not excavated by M. Mariette, whose kind reception and whose full permission to study and to work in the Museum at Bulaq I have to acknowledge, I am sure that it is entirely with his consent that I shall publish this important inscription as soon as possible after my return to Berlin.

"At the Isthmus I found a series of Persian monuments of the time of Darius to commemorate his work of the canal between the Red Sea and the Nile; two of them were hitherto called Serapis and Cambysea, the third was only lately removed by the engineer of the Isthmus. It is remarkable that on one of the blocks near Shatuff

made known by M. de Roxière, of the French expedition, the name of Darius is written in cuneiform characters, but in a cartouche of entirely Egyptian form. M. Mariette, at whose order, on the request of M. de Lesseps, the blocks were laid open, will publish these fragments in the July number of the *Revue Archéologique*.

"Lastly, I have to tell you that I believe we found the ruins of Hauris (Avaris) on the spot where we pitched our tents for a night in the neighborhood of Pelusium, and where it had been always expected to be found."

ITEMS.

The Peace Conference is to be held at Prague. The preliminaries thereto, as agreed upon, are as follows:

Austria is to withdraw from the German Confederation, and is to lose Venetia and her part of Schleswig Holstein. Austria is also to pay ten million dollars to her adversaries for the expenses of the war. The German States north of the Maine are to form a union under the guidance of Prussia. The German States south of the Maine are to form an independent union.

THE FREEDMEN.—Superintendent Alford reports that in the Southern States there are 1,002 Freedmen's schools, 1,409 teachers and 91,413 scholars. South Carolina and Virginia has the largest number of scholars reported, being respectively 12,017 and 11,784. In North Carolina the number of colored pupils daily attending school averages 9,034. The District of Columbia has 74 schools, 132 teachers and 6,552 scholars. Reuben Tomlinson, Superintendent in schools in South Carolina, reports that "the educational efforts of the past term have had another result not less satisfactory than the progress of the colored children—a growing conviction among the white residents favorable to their education. In many districts the bitterness that was openly manifested toward Yankee teachers is abating, and, in some cases, requests have been made for northern teachers to be sent to their neighborhoods." In several localities in that State the colored people have interested themselves in the erection of school-houses, and have defrayed an equitable proportion of the expenses.

The Assistant Commissioner of the Freedmen's Bureau in Georgetown has made application for authority to place Stewart county, Georgia, under martial law, on account of the indisposition of the civil authorities to do justice to the freedmen.

It is fearful to read the accounts of wrong and violence done to the blacks at the South. In Delaware, Maryland, Virginia, Tennessee, Arkansas and Louisiana, great outrages have been committed, and there appears little prospect of a cessation of these wrongs.

The teachers of "Friends' Association of Philadelphia for the Aid and Elevation of the Freedmen" located at South Carolina, five in number, have come North, on account of the sickly season. They desire to return to their duties as early as practicable. In order to keep them in the field, it will be necessary to increase the funds of the Association. There is urgent need that the labors of these faithful and earnest teachers should not terminate, and we trust that the many whose hearts are in this cause will not weary, but continue to do what they can to aid the grateful and long-suffering freedmen in the efforts for education.

R. G. Gardiner, presiding elder of the colored district of the Kentucky Conference of M. E. Church, was brutally mobbed on the 24th inst., in Georgetown, Scott county, Kentucky.

A SELECTION FROM THE LETTERS OF SARAH (LYNES) GRUBB.

*An address to her children, written at several different
periods.*

(Continued from page 372.)

Another remarkable exercise I had, which lay as a perpetual burden on my mind for one whole year. It was to go, on the day called Christmas Day, into the great cathedral called St. Paul's, in London. Shortly before the time arrived, I acquainted some friends with my concern. They did, I believe, tenderly sympathize with me; and having been engaged, for some time previously, visiting in the City, both Friends and others, in company with two friends, they both felt much for me, and one offered to accompany me. About the time the people were to assemble, we two women went into the worship house; taking our places in a gallery not far from the pulpit. The Bishop preached. There did not appear to be a large congregation: they gave marked attention while this man repeated something called a sermon: it was not long. He then immediately kneeled, and uttered words in the form of prayer; but I may acknowledge I was not prepared to witness anything so dry and formal as his communications were altogether. It seemed to me like nothing more than the mere repetition of words, devoid of all that could render them impressive to the hearers. No sooner had the bishop risen from his knees, than he retired without sitting down, or looking at the people:

his attendants seemed to be in waiting at the door of the vestry room, as I supposed.

Now while the bishop was withdrawing, I asked, in a loud voice, if the service was over. This I repeated, expecting an answer; but two of the officers of the place came and led me away (my companion following) toward the large entrance, where the people rushed after us to gratify their curiosity, while the men told us we must depart, and not speak there: however, I turned from the great door, and addressed the audience for a short time, to the relief of my own mind: indeed, for this act of dedication in giving up to so singular a thing, I was favored with the time of the flowings of sweet peace in my own soul—that which the world can neither give nor take away. When we met my endeared friend J. G. Bevan, who was anxiously waiting for us outside, I felt inexpressible joy, in which I believe he partook. My heavy burden was laid down, and I was like another person. At least for twelve months had this matter occasioned me to go bowed down, although I was mostly engaged travelling in the work of the ministry. I did not consider that in this instance of obedience, the way opened for enlargement in preaching the true Teacher, Christ Jesus—the everlasting Bishop of souls; but then I was favored with a belief that the acceptance stood in the obedience, and my soul blessed and praised the Lord.

Divers have been the *peculiar* calls to religious duty, of which my mind from time to

time has been made sensible; once having to walk through Worcester streets, and to speak in the markets there. As I passed along I was drawn to address a recruiting sergeant who was near me: I spoke to him in the dread of the Most High, and had to allude to his employ. At first he seemed ready to be scornful, but as I proceeded, he changed countenance; looking pale, and held down his head, not answering a word. The like has occurred with others. At another town in particular, I recollect seeing a young woman under a gateway; I think it was at Carlisle. She was conversing with a man who stood by. My mind was arrested with a belief that I ought to warn her of the awful consequences of sin, and to turn her to that of her Saviour in her own heart, that would lead from, and redeem out of all iniquity. She listened without any reply; looking as if she would have fainted: the man also waiting to hear me out. Children and young lads who would follow us from place to place in a town, had often been overawed in my turning to them, and charging them to love and fear their God.

At Bath I had to go to the Pump Room, and declare the truth to the gay people who resorted there. This was a time very relieving to my sorely exercised mind. In these days and years of my life, I was seldom from under some heavy burden; so that I went greatly bowed down; sometimes ready to say, "If it be thus with me, O Thou who hast given me a being, I pray Thee take away my life from me." At length I saw to the end of this trying dispensation. I saw clearly that it was fulfilled, like other dispensations that had been allotted me in inscrutable wisdom, and which all have had a tendency to "crucify the flesh, with the affections and lusts;" even bringing into a disposition to "bear about in the body the dying of the Lord Jesus, that the life also of Jesus might be made manifest in our body." Oh! it is good to say Amen to the whole will of God concerning us: to be patient when brought to a low estate, and "make not haste in time of trouble."

In the year 1801 I wrote thus:—"Oh! my heavenly Father, Thou hast seen me in the depth of tribulation, in my many journeyings and travails. When, in obedience to the holy leadings of thy Spirit, I went forth, Thou didst take cognizance of me: when I felt the woes of the wicked, when I passed by the gates of death. It was thy power which supported me when no flesh could help; when man could not comprehend the depth of mine exercise. Without Thee I could not have gone, bearing my cross into the public streets, into the hurrying markets; warning the people of thy justice in "rewarding every man according to his works, and according to the fruit of his doings;" inviting all to love and fear thy great, thy holy Name. By Thee have my feet entered the

prison-houses, and my tongue declared of thy goodness: holding forth the invitation to be acquainted with Thee in thy Christ, and be set free from the bondage of corruption: to come from under the law of sin and death, into the glorious liberty of thy Gospel. Thou hast many, many times led me into the sick ward, unto the bed of languishing, and unto the rolling pillow. Thou hast given me to minister of thy word to the afflicted, and to put my soul in their soul's stead, in some degree. Thou hast enabled me to lift up my voice as a trumpet, not only to thy gathered Church, but as it were to Jews and Gentiles. Without Thee, O Thou fulness of strength, I am less than the worm of the dust. Be Thou only, and forever exalted in, by, and through thy poor child; and let nothing be able to pluck me out of thy hand. Amen."

I am far from acknowledging myself to have been without unwatchfulness, even while preaching to others. Often, very often, have I mourned over my frail erring nature; and bitter anguish hath at times taken hold upon me, in a sight and sense of my wretchedness without my Saviour. Yea, to this day do I find shame and confusion cover me, because of my want of strict adherence to the all-preserving principle of Divine grace. In it lies our sufficiency; as certainly as was the case with any, in any age; for it is the manifestation of Christ Jesus the Lord, who came in the flesh, and is come in the spirit, to save us from our sins. There have been seasons mercifully afforded me, notwithstanding all that I deplore, when an evidence has been granted that my past sins were remitted, and that He who had brought my soul through tribulation, had also washed me with the water of regeneration, and purged me from mine iniquities in His own blood, of His own free mercy; to whom be ascribed salvation and glory, now and for ever, Amen. And oh that I may be vigilant—that I may be kept low in the fear of the Most High; "lest, when I have preached to others, I myself should be a cast-away."

In the year 1803 I was united in marriage to your dear father. After leaving Anner Mills, and while on board ship, crossing to England, a secret caution seemed given me, to beware how I listened to any proposals of this kind. And although it was my lot to be tried therewith in more than one instance, in this my native country, I was kept from encouraging the thing (there being a want of clearness in my mind respecting it) until the fulness of time came, that your beloved father and myself were to enter into the solemn covenant with each other, to share the toils and joys of life together. Oh, I have no doubt, not the least, that Divine Wisdom pointed out the suitability and propriety of our becoming each other's;

and He has been with us from time to time, through all the vicissitudes experienced. Yea, in blessing He has blessed us, and rendered us a blessing to each other. He hath enabled us to go, as it were, hand in hand, while pursuing the path east up for us. He has been graciously pleased to sustain us in many trials; evidencing that He knew our souls in adversity, and, in His own time, hath brought deliverance. May His works praise Him still, even by and through His unworthy children!

The tribulations attendant on illness, and twice that of death, have been heavy. In one of my long fits of illness, and while several of our household were visited with indisposition, my dear husband and I held certificates for travelling. Great, truly great, was the trial of my faith; and much did I seek to commit all into the Divine hand, again and again. At length, while yet confined (I think) wholly to bed, my soul distinctly heard the voice of its Well beloved, saying, in the very language of Scripture, "Rise up, my love, my fair one, and come away. For, lo, the winter is past, the rain is over and gone; the flowers appear on the earth; and the time of the singing of birds is come, and the voice of the turtle is heard in our land." Oh! my mind was prepared to understand and receive the gracious answer to all my prayers, my sighs, and my groans. I saw indeed that of myself I was vile; but He who, to me, was the chief of ten thousand, had again and again washed me in His own blood; and I found my spirit united to Him in the covenant of His own life, in which I bowed my heart and gave thanks. From this time I rapidly mended in health; and before long, we left home to accomplish the service of the Gospel before us.

We have seldom been easy to stay at home more than a few months at a time, even since it has pleased the Almighty to vouchsafe to us our precious offspring. When nursing you I was led to engagements in the ministry around our dwelling; and when my love babe, my first-born, was but eight months old, I left her for five months, to travel in Ireland, Scotland and England; my dear husband accompanying me. This, and many such sacrifices, have cost my nature much suffering; but I have apprehended them called for, as the first-fruits of all bestowed upon us by our bountiful Creator.

In 1818 I wrote as follows:—

"*Clonmel, 25th of 6th month.*—Having for some years believed that the Lord, who hath a right to dispose of us as He sees meet, was drawing my mind to a residence in England; and being aware of the very great importance of such a step, many and deep have been my conflicts, and great the searching of heart to know that the call was indeed in that which

cannot err. I acquainted my dear companion in life from time to time with my views; and knowing that I was much pressed down by the weight of this concern, and being himself truly desirous of following the leadings of truth, he surmounted the great difficulty of bringing his mind to consent to go out from his native country, and from his kindred, and to leave also his business and property, and to live away from it, where he possessed nothing, but must draw his outward support, from time, for himself and family, from his own land; being resigned to all this, and to the very great reluctance of friends to part with us. We acquainted our Monthly Select Meeting with what lay upon our minds, in the 3d month last. From them we met with much discouragement, and continue to meet with it from all but a very few, who, in this thing, are enabled to look beyond 'things that are seen, and are temporal, to those that are not seen, and are eternal.' My beloved husband is favored with a sense that it is right to go; and there seems no reason for us to be greatly moved, or to draw back. We are not likely, in removing, to promote our worldly interest, but are brought to a willingness to give up all to the Lord. He can bless the little, or cause a blast to come upon that which is more. The opposition we meet with is like a host; our friends find it hard to let us go, and many reason strongly against it; which if we had done, we should not have mentioned it to them. I see plainly, that should we be led forth from this place, it must indeed be by a patient reliance on the strong hand, and the outstretched arm of Him who is mighty, and hath already done for us great things. My beloved J. G. had, some weeks back, to supplicate the Great Name in a remarkable line, and with great solemnity, that He would make our way, and enable us to erect an altar to His wonderful and excellent Name, where He might appoint.

"*28th of 6th month.*—Many times of late have I thought on the dear Redeemer's condescending goodness and mercy, in enduring temptation for our sakes. It is an unspeakable consolation that we have Him, the great High Priest, to look to in all our trials; who being Himself 'touched with a feeling of our infirmities,' knows how to succor us in our greatest temptations. Oh Lord keep me, I beseech Thee, low in thy fear.

"*5th of 7th month.*—Some amongst us have given me plainly to understand, that they believe me to be under a delusion with respect to the prospect of removing with our family from this place to England. How then is it, that while this concern was ripening, it pleased the Lord to be with me; to send me forth in His name through this nation; to grant the living and blessed authority of His Spirit in declaring the truth? Yea, even just before disclosing my

views, how did I go in His fear, and visit the meetings in this province of Munster: the humbling, baptizing power of truth being, from place to place, in blessed dominion; so that divers felt it like a farewell visit, and some say they believe the Great Master was about to remove me, at least for a while, from this Quarterly Meeting. I was truly of their opinion, and strengthened in my views as to leaving Ireland. After a painful interview with some friends on this subject, my dear husband had it from the Lord, to encourage me to attend to the pure openings of truth; saying, 'Thy God whom thou servest continually, He will deliver thee.' Even now, under all I have to bear, I find that the name of the Lord is a strong tower, where my soul finds refuge. Were it not so, how could I adopt the language as I do, 'Cast down, but not destroyed,' &c.? Indeed I have lately felt, that were it not for the invincible fortress which is open to the oppressed and bowed down, I must have been destroyed by that which is without. Blessed be Jehovah, the Lord of Hosts; and blessed be my Rock and my Redeemer! Ah! He knows the simplicity with which He enabled me to look to Him in this great exercise; and to Him I appeal, who knows that I have no motive in wishing to remove from this land, but to follow His holy leadings, to act in His counsel, and to prosecute my day's work in His fear."

(To be continued.)

EARLY MORNING.—Who has not felt the calm influence of that peaceful hour? To a thoughtful mind, it inspires the heart to holy contemplation, and bows the spirit in adoration before the throne of the great Ruler of nature. It is then, obedient to his mandate, darkness retires, and the young day springs into existence. What time so fitted to crave the blessing of our Heavenly Parent and ask his protecting care.

For Friends' Intelligencer.

A Testimony of Nine Partners Monthly Meeting concerning our esteemed Friend, ELEAZOR HAVILAND, deceased.

For the strength and encouragement of the living, we think it right to preserve the memory of the faithful laborers in the Church, and those whose example through life have been worthy of imitation. Such has been the case with our dear departed friend.

He was born in the town of Patterson, then in Dutchess county, State of New York, the 22d of Fifth month, 1777. His parents, Isaac and Anne Haviland, were worthy members of Society, and concerned to train up their children in the nurture and admonition of the Lord. This, their son, by accounts, in his early years, did not give way to the excesses of vivacity, to which youth is too often prone, but his conduct

through that period was marked with steadiness and gravity. After his marriage, he settled within the verge of this Meeting, where he continued to the end of his days. He was a worthy member of Society, and received a gift in the ministry, which was acknowledged about the year 1812, though it was not in the eloquence of man's wisdom, yet sound and edifying, to that of dividing the word aright. He was many times engaged in the weighty service of visiting families, for which he was well qualified, not only those in his own Monthly Meeting, but those of others.

At one time he performed an extensive visit to the families of Friends and friendly people on the Island of Nantucket, at the close of which, a worthy elder, who had accompanied him from house to house, remarked to his companion, that he never had attended a Friend on such a mission whose gift was so remarkable to speak to their several states and conditions as he himself knew, being his neighbors and intimate friends. He was a man of sound judgment, both in matters of spiritual and important nature, and remarkable for his moderation and discretion, especially in times of excitement. He was diligent in the attendance of meetings, and once in a severe storm in winter, on the first day of the week, when to all probability none would attempt to attend, he thought it right to open the house and perhaps sit alone; but a neighbor, a man of dissolute habits, seeing the indications of a meeting in such inclement weather, was induced by motives of curiosity to come in and take a seat. After a time of silence, Eleazor imparted a few words of counsel and admonition, which so reached him, that from thenceforth he forsook the evil of his ways.

He always manifested a lively concern for the welfare of Society, and that Friends, both by example and precept, should live consistent with their profession. Among his papers was found he had penned an exercise respecting their taking a part in the affairs of government, of which the following is an extract:—

"I have my doubts of the propriety of Friends exercising their right of suffrage in common with others, even under our Federal Government, which seems best suited to the present state of the people; yet it is sustained by physical and coercive measures. Friends, as a religious Society, have declared to the world that they profess an acquaintance with a knowledge of the dispensation of the Gospel, and Christ the Saviour of men testified, that His kingdom was not of this world, else would his servants fight; therefore, dear friends, I would most affectionately and tenderly query, if we were a well organized and united body, we should not be more likely to be instrumental in hastening the coming and establishing the

Redeemer's Government, than by a participation in the commotion and excitement of politics;" and these views were demonstrated by his example.

This our dear friend was much devoted to the cause of truth, travelling in the ministry, not only in his own Yearly Meeting, but performed, several times, extensive visits in all the Yearly Meetings on this continent, and by testimonials on his returning minutes it appears that his gospel labors were very acceptable to Friends.

In all his movements he had a particular regard to the good order of society; never going from home on a religious account, without the concurrence of his friends and obtaining a minute, except to two or three adjacent Quarterly Meetings; and often expressed the strength their unity and sympathy afforded him when far from home, under trials and deep baptism.

When ministers came amongst us, he was careful not to stand in their way, evincing a thoughtfulness that his labors in his own meeting could be performed at a more appropriate time.

He frequently expressed a wish that he might be preserved from committing any act tending to the dishonor of truth.

By accounts, he had attended his own Yearly Meeting for more than fifty years in succession, and at the last one, after a few sittings, his attendance was interrupted by the rupture of a bloodvessel, but in a few weeks recovered so as to attend steadily his own meeting for eighteen months after, till within about two weeks of his death. His communications continued to be in the life to the last, and also his social intercourse agreeable and instructive; verifying the declaration of the Psalmist, "Those that be planted in the house of the Lord shall flourish in the courts of our God. They shall still bring forth fruit in old age."

He was confined to his bed but a few days, during which time he was patient, cheerful and affectionate, remarking to a Friend that nothing stood in his way, and he felt nothing but love towards the whole human family; at another time, to one who called to see him he said, "I feel unable to converse much, but love to have my friends come in and sit with me in silence." About half an hour before his departure, his nephew perceiving his laborious breathing, asked him why it was the good should suffer? After a little pause he replied, "Our good Lord and Master suffered." Soon after, being assisted to lie down, remarked, "I think you will not assist me again;" and, turning himself over in bed, expired without a struggle, the 27th of Twelfth month, 1863, aged 86 years and 7 months. His remains were interred on the 31st, from Friends' Meeting-house, after a large and solemn meeting.

Signed by direction and on behalf of Nine Partners Monthly Meeting, held 20th of Tenth month, 1864.

JUSTUS C. HAVILAND,
MARY BARROW,

Clerks.

At Nine Partners Quarterly Meeting, held 8th of Eleventh month, 1864.

The foregoing memorial of our friend, Eleazor Haviland, was read and approved, and directed to be forwarded to the Meeting for Sufferings.

Extracted from the Minutes by

CLARK C. BARMORE,
MARY BARROW,

Clerks.

At a Meeting for Sufferings held in New York on the 29th of Fifth month, 1865.

Nine Partners Quarterly Meeting forwarded a memorial from Nine Partners Monthly Meeting, concerning our friend Eleazor Haviland, deceased, which was read, approved and directed to the Yearly Meeting.

SAMUEL WILLETS,
Clerk.

"The law of Truth is, that it cannot be shut up without becoming a dead thing, and mortifying the whole nature. Not the truth which a man knows, but that which he says and lives becomes the soul's life.

Truth cannot bless except when it is lived for, proclaimed and suffered for.

For Friends' Intelligencer.

She looketh well to the ways of her household, and eateth not the bread of idleness.—PROVERBS.

Thus to conduct the "ways of her household" is, indeed, the fulfilment of a high trust; but I have felt that the text may have, also, a deeper significance. A "virtuous woman" (or man, for they are one in Christ) is engaged to look well to her household—to the temple of her own heart,—that all may be rightly ordered there, every faculty and gift in its proper place, and subservient to the design of the great Architect. He or she who is thus vigilant, and concerned that the work of each successive day may be done in its season,—nothing suffered to accumulate in corners or by-places, submitting all to the light which makes manifest, endeavoring to bring every thought to the obedience of Christ—*these* will not eat the bread of idleness, but when the bridegroom cometh, will be prepared to open unto him immediately; and if he come in the second watch, or in the third watch, and find them so, "blessed are those servants."

"Her candle goeth not out by night."

Much of the instruction contained in Scripture is conveyed in metaphor. In Revelation the Church is represented "as a woman clothed

with the sun,"—as a bride. Again, she is described as coming out of the wilderness, leaning on her beloved! A beautiful and glorious figure, the union of human and divine—human weakness sustained by omnipotent strength—joined in an everlasting covenant.

When outward prospects are most gloomy, her faith and confidence endure. Her candle goeth not out by night, but shines brighter in surrounding darkness. As with the church collectively, so with the individual, we must each account for the talent committed to our trust. The candle is placed in the heart, and if not obscured by the defilements of sin, would shine more and more, not only directing our individual steps, but as a guide to others in their journey through the labyrinth of time.

R. HILL.

It is a grand idea of St Augustine, to designate the whole Church of all time, "The city of God,"—the building made without hands, which grows up through all the centuries, to stand when time shall be no more. At present we live in its *narrow streets*, and we cannot command a view of the whole; but when our standpoint is in *Heaven*, we shall be able to trace its vast circumference and progressive architecture.—*S. R. Pattison.*

The cure of an evil tongue must be done at the heart. The weights and wheels are there, and the clock strikes according to their motion. A guileful heart makes a guileful tongue and lips. It is the work-house where is the forge of deceits and slanders; and the tongue is only the outer shop where they are vended, and the door of it. Such ware as is made within, such and no other, can come out.—*Leighton.*

From Home Life.

THE SUNDAY AT HOME.

BY J. G. WARR.

There is not a gift of God to man which has been so universally misunderstood and abused as the gift of the Sabbath day—misunderstood and abused quite as much by the religious as by the irreligious.

Handed from generation to generation—always found in our homes and accepted there,—we have gone up thinking that woe remained for those who should depart by one jot or one tittle from the accustomed method of keeping it.

The sanction of years has had with us the weight of authority, and wherever the New Englander has gone, has gone with him, as a peculiar institution, the New England Sunday. I would not speak lightly of a day about which clusters so much that is sacred. I would not deny influences of good that have gone out from it. Stern, harsh, repulsive, exacting, we owe to it much of that which distinguishes New England character, and wins

for it confidence and respect. I honour the day. I believe in its capacity for good. I respect the memory of those old men who fashioned and transmitted it to us, while I long to see a more thoroughly Christian spirit pervading it.

Ours has been too long rather the Jew's Sabbath, than the Christian's Sunday. I would still wish to remember the Sabbath to keep it holy; but it should be with the holiness of the spirit of the religion of Jesus, not with that of the letter of Moses.

Nothing can be clearer than the abrogation of the Jewish Sabbath.

The Saviour more than once showed that its ceremonies and forms, and its idea of rest, had no place under his religion.

He said that "the Sabbath was made for man, and not man for the Sabbath." Man was not to conform to it, but it was to conform to man, changing its methods and modes as the changing circumstances of man required. He was not to be the slave, but the lord of the Sabbath. It may have been all very well that the Jew should keep the day as he did. It was, perhaps, the best way for him. It may be that the Puritan kept it in the best way for himself and his age; but that Puritan strictness and narrowness are desirable, or can be efficacious, in our day, were it not for the power of education and prejudice, no one would allow, and the persistent attempts to force an observance upon a generation every way unlike those going before, is producing pernicious and lasting, if not fatal results. Many, both of the older and younger, are repelled from the day, or observe it only in form, to whom it would be holiest and welcomest if it came in the broad and liberal spirit of the gospel; while others, frowned upon by those who take to themselves the exclusive spirit of sanctity, are using it to truest advantage. Another generation will not pass without a radical change in the keeping of holy time. There are signs which make that sure.

How shall I best spend the Sunday? is the anxious question of many, and the patent answer—less and less suffices. Not the indifferent and the scoffer, but the man with serious faith and devout life, begins to doubt of so much church-going, of such exclusive religious and public use of the day. I am free to confess that I believe the Sunday will only be safely and sacredly used when it shall be made to minister to a man's domestic and social needs quite as much as his religious.

If the Sabbath was made for man, it was made for man in the home, just as surely as for man in the church; and he who, through devotedness to his church, leaves the home to itself, does not remember the Sabbath day to keep it holy.

The Jewish day was reckoned from sunset to

sunset. The Jewish Sabbath, consequently, began with the setting sun of the day previous,—if such an expression be allowable. The Puritans, who were rather Jewish than Christian in their faith and in their forms, imitated this custom, and, as it was called, “kept” Saturday night as a sort of preparation. There was an element of truth and value in that, though carried by them to an extreme.

It chanced that part of my boyhood was passed upon the Connecticut River, where then lingered, in all its force, the old Puritan vigor of faith and conduct and form. The sinking of the Saturday's sun was a thing of dread to us children, for it ushered in the long, weary, monotonous Sabbath, born, as we thought, out of due time. In the short winter days, how soon that setting came; and then woe to that luckless youngster whom the desire for one coast more, or one more skate over the pond, prevented from reaching home before the stars came out. My own was a harder case than most, for those under whose charge I was had brought with them from their home the habit of observing the Sunday evening, while the community in which they resided demanded as scrupulous observance of Saturday evening; so that I, instead of escaping both, as I ought, was compelled to keep both. I can see now those Sunday suns sinking in the west.

Anxious eyes, through the village and at the farm-house windows, wait for the last ray, and then, as the cautious father decides that Sunday is really past, the doors fly open, the boys and girls rush out to play, and upon the still evening air resound the blows of the farmer's axe as he prepares the wood for the Monday washing. All of this I saw,—I, too, longed to be free,—but alas! the inexorable Sabbath held me till the morrow.

This was the extreme, and it is thus that in the end all extremes caricature the truth. The idea of preparing for Sunday was a good one, but the loosening of all restraint upon the Sunday evening—a virtual compensation for the thrall of the evening previous—was an inconsistency unworthy of the day, ludicrous in many respects at the time, and injurious in its influence. At school, in other places, I encountered, in a mitigated form, the use of the Saturday evening as a preparation for the ensuing day, and I have seen something of it in homes, and I pronounce it good. Many a little household duty may just as well be attended to on Saturday evening as left to worry and harass a morning, the most pressed and anxious of all the week—if the truth were told—in many a home.

It would be great wisdom in the head of the home to insist that a certain class of Sunday necessities should be attended to on Saturday, and a greater wisdom still if a later por-

tion of the evening should be used for such reading and thought as will gradually bring the mind away from its world life, and prepare it to enter upon the higher duties and privileges of the morrow. Largely the Sunday fails of accomplishing what it should, because it finds us unprepared. We break sharply and reluctantly and but half away from the routine of ordinary life, rather at the compulsions of a regular hour than from the impellings of the heart. We need a gradual *toning down* of thought and life. We cannot really enjoy and improve Sunday without it. The great gulf we fix between our work days and our Sundays, between our world-life and our soul-life, we cannot jump or bridge, but must pass quietly and deliberately over.

Saturday evening should be for the subsiding of the things of the world, that the dawn of the morrow may be the right dawning for the first day of the week. It should be as the porch to the temple of the Sabbath.

I have brought with me from childhood a reminiscence of Saturday afternoons, which I enjoy vastly as a reminiscence, but in vain strive to produce again as a fact. I cannot make Saturday afternoon seem as Saturday afternoon used to. All things about them were a peculiar aspect. All sounds and silence even were unlike what they were at other times. It was as if Nature were preparing for the Sabbath,—as if her unpolled ear caught from far the first signal of the approaching of one of the days of the Son of man, and reverently prepared to meet it.

Other nights shut down around us as calm and still. Just as sweet and cheerful were the evening songs of the birds, just as content the loitering cows coming from pasture, just as long and silent the shadows upon the fields and away off upon the hills each night as then; but there was something ineffable of peace, content, rest, that no other evening had,—a foreshadowing of the Sabbath,—which must have been caught unconsciously from those preparatory duties always associated with the last evening of the week. It was a feeling of childhood, perhaps, and, like childhood, has passed away forever; but as David longed for the water of the well by the gate of Bethlehem, so have I longed to feel as I once did on the evening of the day preceding the Sabbath.

(To be continued.)

“A lighted lamp,” writes M'Cheyne, “is a very small thing; it burns calmly and without noise, yet it giveth light to all who are in the house.” And so there is a quiet influence which, like the flame of a scented lamp, fills many a home with light and fragrance.

“Let your light so shine before men that they may see your good works and glorify your Father which is in heaven.”

TEMPTATION.

One end that God has in permitting his people to be tempted is, for the prevention of greater evils, that they may not grow proud or careless, or be ensnared by the corrupt customs of the world. The light carriage, vain confidence, and inconsistent conduct of many professed Christians, might have been, in some measure, prevented, had they been more acquainted with this spiritual welfare, and had they drank of the cup of temptation, which but few of those who walk humbly and uprightly are exempted from tasting the bitterness of, though not all in the same degree.—*John Newton.*

FRIENDS' INTELLIGENCER.

PHILADELPHIA, EIGHTH MONTH 25, 1866.

THE SUNDAY AT HOME.—An essay bearing this title contains so much that is suggestive, and by which many may profit, that we are disposed to give it a place. We do not adopt all the views of the writer, and wish that he could in his pleasant style have brought out more forcibly the great truth, that each day of the week is alike holy in the sight of Heaven; yet we fully approve the practice of abstaining from secular labor one day in seven. It is, we believe, not only conducive to the health of mind and body, but mercy to the animals by which man is so faithfully served, demands that they should also be considered and permitted a season of rest; and we have been pleased to find the subject treated in so attractive a manner.

The rigor with which the so-called Orthodox Christians have enforced their peculiar faith in relation to the "Sabbath," has occasioned, no doubt, many to adopt the opposite extreme. But the rational tone of the article in question is calculated to disabuse the mind of the errors into which these religionists may have fallen, and lead into a serious investigation as to what this day, set apart for religious and physical benefit, requires of us, so that we may prove good exemplars in a community which we are solicitous may be found fearing, or, in other words, *loving* God and keeping his commandments, which the Bible tells us "is the whole duty of man."

To the allusion to home-teaching, we would especially call attention, as we have long felt there exists a lack of familiar intercourse be-

tween parents and children in relation to the which most nearly affects our present and future well-being. From the feeling of a want of qualification for it, or through fear of improperly biasing the tender mind, have not opportunities been neglected wherein spiritual instruction might have been given, which would have strengthened the love for "the beautiful and the true," even in early childhood.

In no way, perhaps, are parents made more fully to realize the importance of having themselves *sought* and *obtained* than when, in the development of its mental powers, the object of their tenderest affection and care turns towards them with the fullest confidence in paternal ability for an answer to every query which is suggested to its active and inquiring mind.

The author of "Sunday at Home" tells us that "above and before all others, the parent ought to be the religious teacher of the child;" that "through all discouragement, defeat and failure, we are to toil at it, till, by experiment and the blessing of God, we have arrived at the ability to meet and discharge our obligation."

The Seventh-day afternoon relaxations brought pleasantly to mind the days of yore, when, the business of the week having been accomplished, we were at liberty, in holiday attire, to indulge our childish inclination to read, ramble or visit our friends—precious privileges in the estimation of children! And now that we have grown older, let us not forget to sympathize with their *needs* in the spring-time of life, that so happily we may gain their confidence and love, and thereby make it easy for them to fulfil the commandment to "Honor thy father and mother in the days of thy youth," and to become subjects of the higher law engraven by the Divine finger upon the tablet of the heart.

The time of holding Nottingham Quarterly Meeting has been changed from the sixth day after the third Second-day, to the sixth day after the fourth Second-day in the Second, Fifth, Eighth and Eleventh months.

DISCIPLINARY ACTION TOWARDS THOSE WHO HAVE VIOLATED OUR TESTIMONY AGAINST WAR.—Our Society has, since its rise, through trial and persecution, maintained inviolate the

belief that the Spirit of the Gospel breathes "peace on earth, good will to men." It has ever been its earnest concern to adhere faithfully to "our ancient testimony against wars and fightings, avoiding to unite with any in warlike measures, either offensive or defensive; that by the innocence of our conduct we may convincingly demonstrate ourselves to be real subjects of the Messiah's peaceful reign, and be instrumental in the promotion thereof."

This holy and beautiful principle of peace has come to be recognized as one of the badges of our profession, and that we cannot consistently enter into war, or under any circumstances perform military services, is now generally acknowledged by the governments of the world. For the establishment of this fact we can scarcely feel sufficiently grateful. Our fathers labored, and we are entered into their labors.

That all have not seen this principle so clearly as to enable them to manifest it fully before the world, need not cause undue discouragement. On the contrary, when we consider that Christian humility is the only soil in which no germ of enmity can flourish, and remember how difficult it is to dwell in that state in which the passions indulge in war no more, instead of feeling discomfited that all had not attained unto that measure of faith which would enable them to rely upon Divine power, should we not rather rejoice and take courage that so many gave evidence that their trust is not in chariots, nor in horses, but in the name of the Lord our God.

The Discipline or Constitution of our Society emphatically declares that "the kingdom we seek is not of this world, but a kingdom whose subjects are redeemed from those captivating lusts from which wars and fightings proceed;" and it enjoins upon us to "seek peace and pursue it, remembering that we are called to love one another." Could this condition be maintained, it would establish us in that humble, watchful spirit, in which, through close attention, to the monitions of Divine grace, we should be preserved in a conduct consistent with our holy profession. But as we are liable to deviate from the path of rectitude and to fall under temptation, it is the province of religious association to strengthen the weak and build up one

another in that faith which works by love to the purifying of the heart.

When individual members go counter to the principle of peace and violate any of the specifications of the Discipline, they become amenable thereto, and subjects of the concern and care of their respective meetings. But while there is one spirit, the revelation of it varies in different minds and different conditions of the same mind; so there are many points growing out of our testimony in relation to war and connected with it, as the payment of duties, taxes, investing in government bonds, and using government money, that have been wisely left to individual feelings. But so far as Friends have felt themselves, as a body of Christians, called upon to bear to the world their principles and testimonies, they have incorporated them in their Discipline and have maintained them as a Society. To the Discipline all are amenable; and unless a member has violated some expressed point, he is not a subject for disciplinary action, and should not, either publicly or privately, be charged with unfaithfulness or inconsistency: though we all should ever feel willing to receive counsel or the manifestation of concern for our welfare and progress in the truth, whether we have become amenable to the Discipline or not.

The duty of Society toward those of its members who, during the late time of trial, violated our testimony in relation to war, has claimed the deep and solemn consideration of many of the Monthly Meetings in this and other Yearly Meetings. As far as we have heard, the course usually pursued has been to appoint a committee of solid Friends to confer with Overseers, and report their united judgment for the action of their respective meetings. As many of these cases of violation arose from inexperience and under excitement, time was given for due reflection and examination, before disciplinary action, and tender care was taken, in order for their preservation and restoration. They were encouraged to examine carefully the importance and necessity there is for all who are members to maintain inviolate our righteous principles and testimonies. "The law maketh not the comers thereunto perfect, but the bringing in of a better hope does."

This extension of Christian tenderness and

love, has, in many instances, had the effect to attach those who had deviated, more closely to the Society of Friends, and some of these have acknowledged they have been led to see the peace testimony in a light they never did before. We annex the addresses of two of our Monthly Meetings to such of their members as were delinquents on this account.

To the Members of the Monthly Meeting of Friends of Philadelphia, who have violated our Discipline by bearing arms, or otherwise participating in warlike measures.

Dear Friends: During the progress of the late war, our Monthly Meeting followed with affectionate interest and solicitude such of its members as went forth to the field of slaughter, with earnest desires that they might be preserved and restored again to their families and friends. While the strife was raging, and the voice of mourning and lamentation was heard over the land, we could only offer our prayers that these ravages might be stayed, and that our country might again be favored with the blessing of peace.

Our spirits are clothed with thankfulness that harmony is now measurably restored, and in that love which would gather all, we would affectionately invite you to a consideration of those peaceable principles which you were led to disregard. No argument is necessary to prove the value of the Christian testimony to peace, and we may safely assert, that as we advance in the spiritual life, we shall be led out of the disposition which leads to war and strife. We confidently appeal to each one of you, whether the teachings of the blessed Saviour, if faithfully followed, would not only lead out of wars and fightings, but would enable all to place their dependence for preservation upon that Almighty arm, which, in the hour of trial, has never failed those who have trusted in it.

The advent of the Messiah was ushered in by the angelic anthem, "Glory to God in the highest—and on earth peace,—good will toward men." When brought before Pilate, he emphatically declared, "My kingdom is not of this world; else would my servants fight, that I should not be delivered unto the Jews." And when he sealed this testimony with his blood, he meekly submitted, and breathed forth the sublime prayer, "Father, forgive them—they know not what they do."

We believe the testimonies of Friends are in accordance with the teaching and example of our Divine Master, as recorded in the New Testament, and the Discipline of our Society enjoins upon its members "in no way to unite with any in warlike measures, either offensive

or defensive, that by the inoffensiveness of our conduct we may convincingly demonstrate ourselves to be real subjects of the Messiah's peaceful reign, and be instrumental in the promotion thereof towards its desired completion, when, according to ancient prophecy, "the earth shall be full of the knowledge of the Lord, as the waters cover the sea," and its inhabitants "shall learn war no more."

We are sensible, dear friends, that the peculiar circumstances by which we have been surrounded during this great struggle, has involved most Friends in a greater or less complicity with warlike measures, and while we feel our deficiencies in this respect, our Monthly Meeting is concerned that all its members may unite in more faithfully upholding the peaceable testimony, by which our Society has been distinguished since its rise.

With this view we have been appointed to confer with you, and we propose to forward this communication through members of our committee, when practicable, in the hope that by personal intercourse your interest in the concerns of the Society may be increased, and that you may unite with us in the endeavor to advance the testimony to the peaceable nature of Christ's kingdom.

PHILADELPHIA, 12th mo. 22d, 1865.

To the Members of the Monthly Meeting of Friends held at Green Street, Philadelphia, who have violated our Discipline by bearing arms, or otherwise participating in warlike measures.

Dear Friends: We address you in the spirit of Christian love, with the view of calling your attention to the fact, that having been engaged in bearing arms, or otherwise participating in warlike measures, you have made yourselves amenable to the Discipline of the religious Society of which you are members.

It must be patent to all of you, that no organized body, whether civil, political or religious, can exist and properly exercise its functions, unless its members do conform to its rules and requirements.

The religious Society of Friends is not an exception to this rule; and, while we are disposed to extend widely the mantle of charity, yet we feel it our duty, as a society, faithfully to uphold our discipline and testimony against all wars and fightings.

We censure and condemn none who, from honest motives, differ from us in religious sentiment, and who have pursued a course we cannot approve; yet we greatly desire that our beloved youth, and all those of our members who entered into the strife of war from whatever motives, may become willing to enlist under the banner of the "Prince of Peace," be subjects of His kingdom and follow his teachings, which will lead out of all strife and contention, qualify for the enjoyment of this life, and prepare for that which is to come.

We know there are different growths in religious knowledge and experience, and that to be able fully to understand and appreciate the Discipline and Testimonies of the Society of Friends, its members must have made considerable advancement therein.

There may be many who have not yet come into that condition, and, as the religious Society of Friends holds the same comparative relation to its members as that of parent to child, it is the duty of each to respect and observe its Discipline with that trustful confidence that an obedient child reveres the counsels and restraints of a godly parent; and, as a tender father is ever ready to restore into his confidence and love a child who may have gone counter to his commands, even so we are ready to receive back again into full religious fellowship such of our members who manifest by word and deed a desire for that restoration. We therefore kindly, but earnestly, ask you to seriously to consider the subject, and endeavor to seek that qualification by which you may see the matter in its true light, and be enabled to make such an offering as will be acceptable to the Monthly Meeting.

We affectionately invite you to the more frequent attendance of our religious meetings, in the hope that your interest in the Society of Friends and in one another may thereby be increased, and that we may all be strengthened in upholding the peaceable doctrines of Christ and the testimonies professed by us as a people.

At a Monthly Meeting of Friends held at Green street, Philadelphia, on the nineteenth day of the Seventh month, A. D. 1866, the above Address was read and adopted, and the Clerk was directed to sign it on behalf of the meeting.

JACOB M. ELLIS, *Clerk*.

PHILADELPHIA, 7th mo. 19th, 1866.

MARRIED, on the 16th of 11th mo., 1865, according to the order of the religious society of Friends, CHARLES E., son of Charles Swain, to MARGARET, daughter of Elwood Brown, all of Fall Creek Meeting, Ind.

—, on the 17th of 5th mo., 1866, according to the order of the religious Society of Friends, ISAAC T., son of Richard M. Lukens, to EDITH, daughter of Joseph M. Satterthwait, all of Fall Creek Meeting, Ind.

DIED, EDWARD D. COWGILL, son of Henry and Angelica S. Cowgill, at their residence near Willow Grove, Kent County, Delaware, Seventh month 23d, 1866, in his twenty-sixth year.

—, on 6th of Eighth month, 1866, of typhoid pneumonia, SARAH J. BONSALL, daughter of Thomas and Susan P. Bonsall, the latter deceased, in the fortieth year of her age, a member of Bradford Monthly Meeting.

—, on the 1st of Ninth month, 1864, L. TAYLOR, son of Enoch and Ann T. Heacock, of Mahoning Co., Ohio, aged nearly ten years.

—, on the 11th of Seventh month, 1866, EMMA A., daughter of Uriah and Sarah B. Heacock, of Mahoning Co., Ohio, in the twelfth year of her age.

—, on the 31st of Seventh month, 1866, WILSON, son of Nathan L. and Maria L. Heacock, of the same County and State, aged eighteen months.

—, on the 24th of Seventh month, 1866, J. COMLY LAMBORN, aged 3 years, 3 months and 6 days, only son of George S. and Sarah W. Lamborn.

—, on Seventh-day, 11th of Eighth month, at the residence of his brother, John Lancaster, near Fallston, Md., JOSEPH LANCASTER, in the 69th year of his age, a member of Little Falls Monthly Meeting.

For more than 32 years it was the lot of this Friend to be afflicted with an incurable disease of the spine, which rendered him almost helpless throughout those long and wearisome years. Having been in moderate circumstances at the commencement of this afflictive dispensation, he felt very keenly, for some years, the sense of his helpless and dependent condition, under an apprehension of being burdensome to his friends; but for the last sixteen years of his confinement he appeared to be entirely reconciled to his situation.

He was possessed of a cheerful and social disposition, and enjoyed the company and conversation of the Friends who visited him. His waking hours, when not suffering extremely with his complaint, were mostly spent in reading or knitting; or when not thus engaged, in innocent amusements, to gratify the children of his brother's family, to whom he became an object of strong attachment.

Many a frolicsome hour of childish glee was spent in "Uncle Josey's room;" for, though he was unable to walk, he could sit up on the bed, or on his chair, and shuffle himself about, and many were the diversions he would contrive for their entertainment. Throughout his long and tedious confinement, he was an object of careful solicitude to his brother and sister-in-law; on the latter the special care of the invalid brother chiefly devolved, and her kind attentions inspired him with feelings of deep gratitude and affection.

About two weeks previous to his decease he was taken ill, and his complaint not yielding to the usual remedies, he became sensible that the time of his departure was at hand, and expressed to the Friends who visited him his entire resignation, the serenity of his countenance fully confirming the assurances that he gave of an abiding hope, that when the earthly house of his tabernacle should be dissolved, he would have a building of God—a house not made with hands, eternal in the heavens. In the life and in the peaceful departure of this afflicted friend, we have a memorable evidence that it is not to the blessing of health, the acquisition of wealth, of position, or worldly advantages alone that we are to look for our highest and purest enjoyment; but to a full and entire surrender of the human to the Divine will; hoping, believing, and trusting that the Judge of the whole earth will do what is right.

Fallston, Md., 8 mo. 15th, 1866.

For Friends' Intelligencer.

FRAGMENTS OF BARK FROM OUR CLUB.

NO. III.

8th month.

In our studies among the water plants last month, we saw much that was curious and beautiful. We brought home, for leisure inspection, several floral beauties of the stream; more especially for the curious little animals which we guessed had built their frail homes among their branches, or kept happy play-grounds beneath their grateful shade. We propose, therefore, in this paper, to gather up a few fragments for our Club from the invisible world of animal life; from the curious little inhabitants of our streams; who see, but not with eyes; who breathe, but not with lungs; and who feel impulses a million times too delicate for our rose-tipped fingers.

Nor are such studies without rich remuneration. The surpassing skill of a Creator is seen, as plainly in an atom, as it is in man; and a drop of water may be richer than a mine. The inhabitants of our glass jar will equal in number and outmatch in beauty all the living forms spread over the broad landscape of our beautiful State of Pennsylvania. We spread out before us, for illustration, a wet leaf of the lotus, an old one, that has dozed on the sleepy stream through all these long summer days. Under the microscope, we see hills and mountains moss-fringed and tree-clad, bounding meadows and valleys, and happy hunting grounds. Trees, higher in comparison with the soil they grow on than the "Sentinels" of California, spring up in forests, and up their frizzled trunks, and along their branches, creep animals more curious and beautiful than man's fancy has ever pictured. Near the edge of a quiet lake, a large stem rises; its summit is crowned with branches, about one hundred in number, all radiating like an umbel, from one common centre. On all these branches, multitudes of little crystal bells are hung. A thousand visible currents of water, carrying food to as many mouths always open, flow towards this curious structure. It is beautiful to look at. But now, quicker than the eye can follow, every branch and bell contracts into a shapeless speck at the top of the trunk, as though an invisible bolt had descended upon it. Does death come so quickly, then, to these frail but unsinning people of our streams? Wait but a moment. Its branches cautiously grow out again; its little bells all unfold precisely as they were before, and the currents of water flow once more towards its thousand open mouths. And this contraction and expansion go on repeatedly as necessary acts of life—possibly, the creature, after all, has only closed its mouths in order to swallow its breakfast, even as we are unable to perform the same act with open mouths. We have been describing hastily the little Carcinium, probably one of the least curious of

these creatures; for in these studies surprising richness of material, and startling eccentricities of form, keep the mind alert with agreeable and healthful excitement; and, at the same time, increase our capacity for comprehending the infinity of that Power,

"With whom 'tis one,

To guide a sun beam, or create a sun;

To rule ten thousand, thousand worlds, or none."

What need is there, then, to travel all over the land, seeking the beautiful or that which is novel, in these long summer days, when the sun joins hands with the dog star, and walks with him through a sky of fire?

Do we crave variety—a new series of mental pictures which we may frame in happy and healthful thoughts? We may enjoy them in comfort, at our own homes, surrounded by loved and familiar faces, and by little hearts accustomed to beat in harmony with our own.

We will remove from our glass jar two or three members of the class Rhizopoda, so called by M. Dujardin, to express the chief peculiarity of their organisation, viz: that of protruding root-like processes, by which they move or acquire nourishment.

And first, we observe a little atom, possessing no definite shape, for it is always changing and resembling a minute drop of jelly. It moves. Five hundred placed in a line, touching each other, might measure an inch; and to travel across one printed line of this page, would consume an hour. Like ourselves, it squanders time generously. Let us look somewhat carefully at this singular creature, because learned men tell us it lies at the very base of the great pyramid of animal life. But some facts, which we shall mention presently, render it doubtful that the all-wise Creator should have placed this mere speck of jelly—this Amœba—in such a precarious position. Without a mouth or digestive canal, our Amœba is nourished; as it travels along, fragments of matter lying in its path are enveloped by its body, digested perhaps, and left lying in its track; leaving no mark where they entered or emerged. Progression is accomplished by protruding one or more parts of its body in finger-like processes, and then rolling or pouring the remainder of itself into these advanced portions. It may increase by cell division, each part forming a new Amœba. Now, is this creature animal or vegetable? Until very recently all naturalists agreed in calling it animal. But Dr. Du Barry has found, in his investigations of a species of white rust (*Cystopus*) growing on the shepherd's purse (*Capsella*), that this very Amœba form occurs as an invariable link in the life-history or development of that fungus. Now Du Barry is very high authority, and this discovery is, therefore, the more remarkable. It removes from the animal series one of its accepted members, and if these ob-

servations shall be verified by other observers, the Amoeba will join company with the toadstool and its allies :

"Those dark green rings where fairies sit and sup,
Crushing the violet dew in the acorn cup."

Another interesting animal belonging to this class, and found like the Amoeba in our jar, is the Diffugia. Its body is exceedingly minute and jelly-like, too; without a trace of separate organ; but has the ability to cover itself with a beautiful little house, in shape like a Florence flask, but spangled all over, except one orifice, with brilliant points and reflecting surfaces. Through that orifice its finger-like processes are protruded, either as means of locomotion or in quest of food. We have observed no difference between this animal and the Amoeba, except one is permitted to live in a house ornamented with beautiful designs and cunning tracery, while the other is a homeless wanderer, groping about among the obscure shadows lying between animal and plant life. The Arcella, found with the two others of this class, just described, is also a singular creature. Like the Diffugia it inhabits a little box; but here we meet with geometrical uniformity. Little plates are arranged in perfect order, like a hexagonal truncated pyramid, and from apertures in its minute base, the animal protrudes its fingers while in the act of feeding. The material of the Arcella cases, resembles that which envelops most insects, being peculiar in character, not apparently mineral, but more like horn in structure. Nothing whatever is known in regard to the development or reproduction of these creatures. We see them in perfect beauty as they live and move in our glass jars; they are classed with animals, but in view of the remarkable facts being discovered in regard to this class of creatures, we feel uncertain about their true position.

The Polycystina and Foraminifera are marine members of this class, and their numbers are truly prodigious. Their fossil houses—empty now—drift over hundreds of square miles of the ocean floor; and in some localities, are piled almost mountain high by the currents. On a needle's point we may pick up several; and yet each one of these countless millions is perfect in beauty and wonderful in architecture. Language alone cannot adequately describe them. Their walls are polished crystal, without joint or seam, little windows of endless shapes, singly or in rows, open into bed chambers or sparkling halls, once the abodes of little fairies. In many, star-like corridors and snow-white colonnades, lead off at regular intervals from the central chamber. They are very beautiful. Here may man see, perhaps, all his architecture prefigured and excelled, both in beauty of design and durability of form. Before the Pyramids were, these frail houses gemmed the bottom of the sea; and their fossil remains, still perfect

in beauty, form great masses of our sedimentary rocks.

Has the Creator brought into existence this obscure class of creatures, that they may, simply, sport for a time through their brief period of exquisite life? No! They are being employed as the building material of our world—the march of time's unsparing foot is grinding them to powder, while our plants and trees strike down into them, their hungry roots for the lime, and iron, and silica they contain; and thus the great circle goes round—all for our good. And while we learn the lesson, not to despise little things, we perceive decay, all over the earth, leading to a higher and a fresher life:

"The night is mother to the day,
The winter to the spring;
And ever upon old decay
The greenest mosses cling.

Behind the cloud, the starlight lurks,
Through shadows sunbeams fall;
For God, who loveth all his works,
Hath left his hope with all."

ONE OF THE CLUB.

THE SHEPHERD'S VOICE.

BY JANE CREWDSON.

"My sheep hear my voice."—JOHN x. 27.

Oh! for a friendly tuned ear,
The Shepherd's voice to hear and know,
Both when it speaks, distinct and clear,
And when it whispers, soft and low!

Oh! for an ear to list its call,
When sounds it in the stormy hour,
And when its accents gently fall
Like dew upon the fainting flower.

An ear to hear each warning word,
To hearken for each gracious tone,
And when the stranger's voice is heard,
To know it from the Shepherd's own.

But oh! when doubts and fears shall dim
The pathway of the Shepherd's choice,
'Tis they who walk most close to Him
Who best can hear his guiding voice.

'Tis they whose path is safe from harm;
'Tis they who know the good from ill,
And strengthened by His mighty arm,
Are strong to do His holy will.

Then grant me, Lord, the list'ning ear;
And grant the Heaven-directed eye;
The faith that waits Thy voice to hear;
The love that keeps me ever nigh.

THE CHRISTIAN MARINER.

And so he bringeth them to the haven whereto they would be.

Yes, billow after billow—see, they come
Faster and rougher, as yon little boat
Nears the desired haven. Oftentimes
It seems to sink and fall adown the wave,
As if borne backward by the struggling tide;
Yet mounting billow after billow, wave
On wave o'er-riding, tempest-tossed and shattered,
Still it nears the haven evermore.

"Poor Mariner! art not thou sadly weary?"

Dear brother, rest is sweeter after toil.

"Grows not thine eye confused and dim with sight
Of nothing but the wintry waters?" True;

But then my pole-star, constant and serene,
 Above the changing waters, changes not.
 "But what if clouds as often veil the sky?"
 Oh, then an unseen band hath ever ta'en
 The rudder from my feeble hands the while,
 And I cling to it. "Answer me once more,
 Mariner: what think'st thou when the waters beat
 Thy frail boat backward from the longed-for harbor?"
 Oh, brother, though innumerable waves
 Still seem to rise betwixt me and my home,
I know that they are numbered; not one less
 Should bear me homeward, if I had my will;
 For One who knows what tempests are to weather,
 O'er whom there broke the wildest billows once,
He bids these waters swell. In His good time
 The last rough wave shall bear me on its bosom
 Into the haven of eternal peace.
 No billows after! *They are numbered, brother*.
 "Oh, gentle Mariner, steer on, steer on:
 My tears still flow for thee, but they are tears
 In which faith strives with grief, and overcomes."

From the Evening Post.

PROFESSOR AGASSIZ'S DISCOVERIES.

EIGHTEEN HUNDRED NEW SPECIES OF FISH FOUND IN
 BRAZIL.

At one of the meetings of the National Academy of Science in Northampton, Mass., Prof. Agassiz spoke of the geographical distribution of the fishes in the waters of the Amazon. He found, when he went there, that about one hundred and fifty species had been described, and there was trustworthy information that the greatest number seen was not over two hundred and thirty. He, himself, had collected specimens of over eighteen hundred species, and he was convinced that the whole number of species was at least three thousand.

The Professor spoke warmly of the facilities extended to him by the government of Brazil, the Amazonian Steamship Company, and by every one whom he met, without which he could have accomplished little. Even the fishermen were ordered by the mayors or presidents of the provinces to go fishing for him. Often five or six boats would be about his ship, bringing fish which had been speared, shot with arrows, caught in nets or with hooks, or poisoned. He thought, therefore, that such a collection of fishes as he had brought home would not soon be seen again. The Emperor of Brazil, returning from the army on the Paraguay, sent for him to talk with him of the Amazon. Imagine his delight (he said) at finding the table covered with dishes filled with the fishes of the Uruguay, which the Emperor himself had gathered, and which he then gave him for comparison.

The known fishes of the Amazon are more than the known fishes of the Atlantic, while the number of aquatic birds is amazing. He then spoke of the characteristics of our fishes and those of the Amazonian fishes in comparison. The most characteristic class is that of the goniodonks, which corresponds to our hornpouts, but much more nearly to our sturgeons. There is a kind of sturgeon in the Mississippi river which is very

closely allied to them. It is a family of tropical distribution. It may be said, is it not possible that these fishes migrate? so that nothing could be inferred from their presence in certain localities only. He had foreseen this difficulty, and had divided his party, making collections on different parts of the river for many months at the same time; so that he felt that his conclusions were not based on insufficient knowledge.

Another family, which is quite numerous, is that of the Siluroids. He knew of no lake or small river in this country which furnished more than sixty-two species. But in a very small lake in Brazil, he obtained three hundred species, and from larger lakes and rivers, he procured still larger numbers. The next family is that of the Chromids. It is almost exclusively South American, with a few species in Africa. He believed the number of these known to exist in the Amazon was eleven. He, himself, had added nineteen. Where the boundaries of transition in geographical distribution of these fishes were, and what were the causes of this distribution, he could not say. He had spread his assistants about so that he was sure of the fact, but he could not yet go beyond it. Every prominent type of the ocean had its type among these same Chromids. He might speak of the habits of these fishes. Many species carry their eggs in the sides of the mouth like food, or tobacco, if you please, others bury them in holes. There are others in which the eggs become attached to the lower part of the abdomen, others sit upon their eggs like a bird, one class covering them with the mouth; the aerated water thus helps to hatch them. Another family is the Carasids, corresponding to our minnows and herring. But there are some kinds of fish which range all along the Amazon and its tributaries. We cannot tell why they should have a general distribution any more than we can at present explain the local distribution of the swordfish, &c.

He finally spent three weeks at the mouth of the Amazon, receiving every facility from the President of the province of Para, to see what fishes went into the ocean from the river, or the other way. He did not know a single codfish-like fish on the coasts of Brazil, nor anything like the sculpins. He added that the artist of his expedition had prepared paintings of eight hundred fresh-water fish, and of three hundred species from the ocean. If Professor Henry could let him fill ten volumes of the Smithsonian publications, he had the material wherewith to do it.

It has been finely said by Dr Smith, "that of all the arts to which a man can apply himself, the most excellent and important is the right ordering of his own life."

From the Ledger.

SUMMER EATING AND DRINKING.

Marvellous is the capacity of the human stomach for receiving and retaining such a quantity and variety of substances to gratify, in the first place, hunger and thirst, and, afterwards, the palate, made capricious and exacting by long indulgence. A history of the dietetic usages of the different races and tribes now spread over the face of the earth would almost deter us from laying down rules for selecting the kinds of food best adapted to the attainment of health and bodily vigor. Passing over as decidedly exceptional the cases of those poor wretches who, with a stomach equal to that of an ostrich, have swallowed and partially digested jack-knives, rusty nails and the like, we come to the people of the extreme north, such as the Greenlanders and Esquimaux, who luxuriate on the grossest animal food—blubber, bear's flesh, &c.—and contrast them with the inhabitants of the extreme south, such as the Hindoos and people of Central Africa and the islands of the Pacific, whose food is almost entirely vegetable. The aborigines of Australia are mainly carnivorous; they enjoy very much as relishes grubs and ants, with their eggs. We must go beyond the animal and vegetable kingdoms to look to the mineral, if we would learn the entire range of substances used by man for his food. Humboldt tells us that the Ottonaguas, upon the banks of the Orinoco, feed on a fat, unctuous earth, a species of pipe clay, tinged with a little oxide of iron. They collect this clay very carefully, distinguishing it by the taste, and kneading it into balls of four or five inches in diameter, which they bake slightly before a slow fire. These balls are soaked in water when about to be used, and each individual eats about a pound of the material every day. The only addition which they make to this unnatural fare consists of small fish, lizards and fern roots.

These apparent vagaries of appetite—and the list might be easily enlarged—are really the result of the necessities of the people, who are unable to procure more abundant and nutritive food. The actual difference in the proportional consumption of animal and vegetable substances must be sought for in geographical causes, climate and soil. The inhabitants of high northern latitudes require a much larger supply of animal food, and that of a gross quality, than those in temperate climates; while the latter, again, are more carnivorous than the inhabitants of the equatorial regions, whose food is chiefly vegetable. In a climate like that of the United States, in which our seasons assimilate us to the extremes of almost arctic cold and tropical heat, we ought to obey correspondingly varied rules of hygiene. In our manner of living during the summer months, we ought to copy from the people of Southern Europe, if not from those of

India and Southern China. Our meals should be light, and in large proportion of vegetable substances and fruits; but in saying this we do not mean to include damaged or badly cooked vegetables, sour bread or unripe fruit. A little improvement in the culinary art—a thing, by the way, sadly needed—would furnish, with the addition of milk and eggs, a great variety of dishes, both nutritive and palatable. At this season flesh meat is not required, and, except to the hard-laboring man, is not wholesome more than once a day, and then in the earlier part of it. The heavy suppers enjoyed in winter are now distasteful, and, if taken, they are apt to disorder the digestion and prepare the way for serious disease. We know that fatal results have followed a hearty supper of lobster and other shellfish. Next in importance to the question of the relative digestibility and wholesomeness of the several articles of food, is that of the time of the day or the meal at which they are taken. The Spaniards have a saying about the use of pine-apples—or, as some allege, oranges—which is applicable to the use of our own fruits: "Gold in the morning, silver at noon, lead at night." We laid stress on this point when speaking of the *Prevention of Cholera*. This lesson cannot be too often repeated. If a trial is to be made of a new article of food, or one of doubtful digestibility, let it be at breakfast, but never in the evening.

ITEMS.

THE OLD CABLE.—The Great Eastern left Heart's Content on the 9th instant, accompanied by the Medway, the Terrible and the Albany, for the purpose of picking up the Cable of 1865. Great hopes of the success of the fleet are entertained by the engineers, electricians and all on board. Captain Anderson hopes to return in twelve or fourteen days with the old cable recovered and the balance safely laid, thus connecting Europe and America by two magnetic bridges. The Great Eastern carries eight thousand tons of coal and six months' provisions, and Field says the attempt will not be abandoned while the coal and provisions last.

The English Government has consented to submit the right to hold public meetings in the parks to legal decision. The Reform League in the meantime will hold its meetings elsewhere than Hyde Park.

One of the first acts of the new ministry has been to continue the suspension of the *habeas corpus* in Ireland.

In the House of Lords, the Jamaica affair had been debated, and the conduct of the officials denounced; but it was held that Gov. Eyre could not be indicted or accused of murder.

There was great excitement in London on the 9th, at a supposed attempt to blow up the two Houses of Parliament. Ten packages of gunpowder, with a fuse partially burned, were found near the entrance to the Lord Chamberlain's office in the House of Lords.

The session of the English Parliament has closed. The Queen's speech thanks the United States Government for the action taken in the Fenian trouble.

Advices have been received from the Continent indicating a probable renewal of war between the Prussians and Bavarians upon the territory of the latter Power. Great fears are entertained of such an event.

Prussia has informed Austria that she will maintain the right of Italy to Venetia.

An armistice between Austria and Italy has been signed for four weeks, and to continue after the expiration of that time, unless notice is given by either side. A line of demarcation has been agreed upon.

The French Government has receded from its demand made upon Prussia for an extension of the frontier of France to the Rhine.

THE FREEDMEN.—The Steadman-Fullerton Report has been given to the public. It is a vehement special pleading against help or protection for the Freedmen.

According to reports from South Carolina, the freed-people on Edisto are in a prosperous condition. All who are able to work will earn sufficient to feed and clothe them comfortably during the present year, until they can make contracts for the ensuing year. Many of them will make from four to eight hundred dollars, if no accident happens to the crops, and about one-half of them will, in addition to their cotton crop, raise sufficient provisions to support their families during the next year. Two plantations on Edisto and one on James Island are held by freedmen under possessory titles, and are worked on their own account. They have large crops in good condition. As a general rule, on these islands, the freed people are working for one-half the cotton crop, though in some instances on more advantageous terms than these. There are about seven thousand freed people on Edisto, and yet during the last four months a dozen cases of petty larceny and trifling assault and battery are the only crimes that have occurred. On Edisto, Wadmelow, Johns, and James Islands are about three hundred freed-people who are unable to support themselves, and who should be cared for by the communities where they live. They are the old, cripples, and orphan children.

DESTITUTION AT THE SOUTH.—The Commissioner of the Freedmen's Bureau has received an elaborate report from a special inspector, who was charged with the duty of investigating the reports of destitution received from Alabama and Georgia. This officer visited, in the course of his inspection, Northern Alabama and Georgia, and travelled incognito in order the better to reach the truth amongst all classes. After giving a detailed report in reference to each county visited, he says his observations have convinced him that there has not been a single case of starvation in either State. That the amount of destitution has been largely exaggerated, and the officers of the Bureau, few, scattered, and so located as to be, in many cases, unable to visit the interior, grossly deceived in reference thereto.—That although some destitution exists, and has existed, it is not absolute, but consists mainly in confinement to some one or a few articles of food, of which, in nearly all cases, there has been a sufficiency; and that it has been ascribable in great part to the idleness of the people. That the issue of rations as at present conducted, is producing great demoralization and idleness among the people, and that, so long as it is continued, the apparent necessity for it will exist. That the crops, though small, are amply sufficient, with economy, to supply the people with the necessities of life till another crop is harvested.

ORANGE GREEN BOARDING SCHOOL FOR GIRLS.—Situated at Kennett Square, Chester Co., Pa., will commence its next session, of 22 weeks, with a Spring Term of 16 weeks,—on Second day, 9th mo. 21th. Terms \$4 per week. No extras for Latin, Greek, or French. Apply to SWITHIN C. SHORTLIDGE and SIDNEY PUSEY, Kennett Square, or EMMA BOWMAN, Hyberry Pa. amvttiml

CONCORDVILLE SEMINARY.—The Fall and Winter Term of Concordville Seminary, commences Tenth month 1st, 1866. In addition to the regular course, a Commercial Department has been instituted. For circulars address, JOS. SHORTLIDGE, A. M., Principal, Concordville, Delaware Co., or MARGIE B. JACKSON, Kennett Square, Pa. amvttiml

EDATON FEMALE INSTITUTE.—A Friends' Boarding School, situated on the Phila. & Balt. C. R. R. Next Term will commence on the 1st of Tenth month next. For Circulars, giving full information, inquire of

EVAN T. SWAYNE, Principal and Proprietor,
8 mo. 15, 1866—awa at p 106 Kennett Square, Chester Co., Pa.

DACON ACADEMY.—The Friends' School, Woodstown, N. J. This Institution will be open for Boarders, Ninth month 24th, 1866. Terms, \$4.25 per week. For Circulars, address

AUGUSTUS C. AORIS, Principal,
818. 4th. 98. Woodstown, N. J.

CHESTER VALLEY ACADEMY.—The next term of this Institution commences 9th mo. 3d., 1866. Whole number of pupils last year, 107;—60 Boarders, 47 day pupils. Send for a Catalogue.
J. K. TAYLOR, Principal,
84 1st 106. Coatesville, Chester Co., Pa.

KENNETT SQUARE ACADEMY.—A Boarding School for Young Men and Boys will open the 1st of Tenth month, 1866, and continue in session twenty four weeks. For Circulars, &c. address the Principal,
SWITHIN C. SHORTLIDGE, A. B.,
725 t 929. Kennett Square, Chester Co., Pa.

BELLEVECH FEMALE INSTITUTE.—The Fall and Winter Term of this healthfully and beautifully located BOARDING-SCHOOL FOR GIRLS will commence 10th mo. 1st, 1866, and close 4th mo. 12, 1867. For further information apply for a Circular to

ISAAC J. GRAHAM, } Principals.
JAMES P. GRAHAM, }
72 t. Attleboro' P. O. Bucks county, Pa.

A YOUNG WOMAN of experience wants a situation in a private school, or as Governess in a family. Address
721 t. E. W. C. Hockessin, Delaware.

WANTED, by a Female, a situation as Teacher; qualified to instruct in the usual branches, having had several years' experience. Good recommendations given. Address or apply to smw 6t dws p81. EMMON COMLY, 144 N. Seventh St., Phila.

CHESTERFIELD BOARDING SCHOOL FOR BOYS, situated on the Crosswicks Road, three miles from Bordentown, N. J. The Fifty-Third session of this Institution will commence on the 19th of 11th mo., 1866, and continue twenty weeks. Terms, \$24. For further particulars address HENRY W. RUDWAY, 4766 825t 8867 pmuzz ps in. Crosswicks P.O., Burlington Co., N. J.

FRUIT CANS AND JARS.—Fisher's Self Sealing Cans, considered the best and most convenient now in use, a variety of Fruit Jars, and a general assortment of House Furnishing Goods, such as Cutlery, Tin, Iron, Wooden and Willow Ware, Clothes-Wringers, Carpet-Sweepers, &c. For sale by B. A. WILDMAN, 825 4t 915. No. 925 Spring Garden St.

SAMUEL TOWNSEND & SON, Produce Commission Merchants, No. 62 Light Street, Baltimore, respectfully solicit consignments of Grain, Flour, Seeds, Butter, Eggs, Beans, Poultry, &c. Constantly in store and for sale, Clover, Timothy, Orchard Grass, and other Field Seeds. Also Bone Dust and other Fertilizers. Dried Fruits bought and sold. 721 t. fa. fn.

LESSONS ON OUR COMMON SONG BOOKS.—Tickets for a course of Eight Lessons, \$3 00 each. Liberal reduction to Schools and Classes of over fifty persons.

Address GRACE ANNA LEWIS,
Care of EDWARD HARRIS,
66 3m. 800 Arch St., Philada.

CHEERRY STONERS,—(seed 2 bushels an hour.) Pea and Bean Shellers, (shell 50 qts an hour.) Carpet Sweepers, Wire Dish Covers, Champion Cog-Wheel Clothes-Wringers, (we consider them the best yet invented for durability and convenience); and a variety of other new articles of Hardware, Cutlery and Tools. For sale by TRUMAN & SHAW, 810a630 No. 835 (Eight Thirty Five) Market St., below Ninth.

W. M. HEACOCK, General Furnishing Undertaker, No. 18 North Ninth Street.—A general assortment of ready-made Coffins, and every requisite for Funerals furnished.

Being entrusted with the oversight of "Fair Hill" Burial Ground,—Funerals, and all other business connected with the ground, will be promptly attended to. 811. 1y. was m p.

A SELECTION FROM THE LETTERS OF SARAH (LYNES) GRUBB.

*An address to her children, written at several different
periods.*

(Continued from page 375.)

"1818, 9th of 7th month.—I assuredly believe, that as I look to Him who is almighty, He will yet raise me up out of my present depressed condition; that He will give me to see that all things work together for good to those who love Him with the whole heart; for in my measure 'I am persuaded that neither death, nor life, nor angels, nor principalities, nor powers, nor things present, nor things to come, nor height, nor depth, nor any other creature, shall be able to separate' His dedicated children from His love 'in Christ Jesus our Lord'; who encouraged His disciples in the language of, 'Be of good cheer, I have overcome the world.' It is certainly trying to be suspected of having self-gratification in view, by professing a call to England; but I am made willing to suffer reproach, and to pass through evil report for the sake of a good conscience. Had I anything in pursuit but the will of my Heavenly Father, how could I hope to be supported, or look for the divine blessing, which is only to be found in our right allotment? How could I again expect the protection of the Good Shepherd for myself and my dear family? I should surely be most ungrateful, were I to presume to take us all from the situation in which Divine Providence placed me fifteen years ago; which is

as in a 'south land'; and where I have found also 'springs of pure water:' where I have been every way prosperous; the Great Disposer of events bringing about that which I long foresaw to be His gracious design; even uniting me, in the most endearing earthly bond, with one who has ever been a man of clean hands, and among the faithful has stood with singular uprightness.

"16th of 7th month.—Again and again have we looked toward complying with the earnest desire of our friends to remain where we are; but finding no light upon it, nor feeling any rest therein, we have concluded to give up all, and obey our Divine Master; and forthwith intend to prepare ourselves and our family for the journey. We are not without the unity and tender sympathy of a few unbiassed minds, which proves strengthening and consoling.

"6th of 9th month, 1818.—We had a heart-contriting farewell meeting on the First-day, consisting of Friends of our Monthly Meeting, including Clonmel and Garryroan particular meetings. All opposition appeared to me to give way in the minds of those present, who before were much against our leaving them; but truly the Lord's everlasting power was in dominion."

We left Clonmel the 9th of Ninth month, 1818, for Bury, in Suffolk; for to this place my inward eye was directed, although I knew not why. It was only while pursuing our journey that we either heard of, or had liberty

to make much inquiry for a habitation. We arrived there on the 10th of Tenth month, with peaceful feelings. Our habitation was very inferior to that which my husband had built for us in Ireland, and which we had just left; but I may gratefully acknowledge that I believe this quiet spot, with the fine bracing air of the place, had a great use in strengthening the constitution, both of my beloved husband and our children. The meeting was small to which we now came to belong; we were, however, but little at home; that is, my husband and I—still it was our lot to travel in the work of the Gospel.

I wish to narrate an illness I had some years ago, which was attended with great bodily suffering; and it being tedious, brought me very low. The pain I endured was excruciating. Tedious days and wearisome nights were appointed me for weeks together; and for a season I thought that my sufferings would terminate in death. I earnestly waited upon the Lord, and it was frequently the language of my heart, "Oh! my Heavenly Father, when wilt Thou be pleased to send forth thy word and say, 'It is enough?'" Being under a great weight of illness, and looking toward dissolution, I was opened into a view of the love of my gracious Saviour toward my soul; feeling assured that nothing stood in my way of acceptance with the Judge of quick and dead. I saw clearly that my transgressions were forgiven; that all defilement was purged away in that living, blessed "fountain, opened to the house of David, and to the inhabitants of Jerusalem." I had a degree of foretaste of eternal glory: I saw the light of heaven: I beheld, as "through a glass darkly," something of His majesty who sitteth upon the throne, and the ineffable brightness of those garments worn by the redeemed. I had no doubt of being admitted to their blessed company, should it please Divine Wisdom to cut the thread of my life. I relate this with reverent humility, and in the unreserved acknowledgment that I felt assured, if presented faultless before the throne of my Saviour's glory, it would all be of His free mercy and infinite loving-kindness to one of the least of His family. I think it was given me to say, "Not my will, but Thine be done." As to the restoration of the poor afflicted frame, I did, however, find myself much exercised about my loved family; and one morning I was engaged to petition that I might be spared to them, when I became sensible of receiving the earnest of my prayer; these words being heard in my soul, "I will spare thee;" and that Scripture occurred to remembrance which tells us, that when Jacob had made an end of blessing or commanding his children, he gathered up his feet in the bed, and gave up the ghost. I believed that I might yet be of use to my beloved

family in the Divine ordering. Immediately I wished to call you and say, "Your mother lives; the Lord will raise me up again:" but such was my weakness, I could not request to see you. I was worse after this time than before, yet never wholly lost sight of recovery. (This illness occurred at Bury in 1820.)

At Bury we resided five years, when it seemed right to remove nearer to the Quarterly Meeting of London. Our way opening to take a house at Chelmsford, in Essex, we settled down there for the space of six years; often going up to London and travelling to other parts.

For some time while at Chelmsford, I had to believe that our lot would one day be cast still nearer to the great metropolis; and after having Chelmsford for our home as long as we were sensible of its being our right place, we removed to Stoke Newington, near London, where we have resided three years. There seems to be much wisdom in the leadings and instructions of the Great Shepherd us-ward. We have not dared to guide ourselves, nor to conclude, because we have felt at home for a season, where Divine Providence has set the bounds of our habitation, that it was to be our "certain dwelling place" to the end of our day, but have again been made willing, from time to time, to have our rest in this respect broken up; which is no pleasant thing to that part that would like to be able to say, "take thine ease."

Now in this place our dear children know that we have no tie but that of religious duty. One is settled in life in Suffolk, the county where we were first led from Ireland; two are in Essex; so that we can still adopt the language, "Lo! we have left all and followed Thee." Oh! our morning light, be pleased to be our evening song.

You are aware, my dear children, that all we have we owe to the Lord. He was pleased to take back the precious gift of your lovely infant brother, many years ago. Your father and I dared not murmur, but pursued diligently the path of duty still. You are spared to us; yet, for the sake of the answer of a good conscience, our place of abode is many miles from you all; not one of us repining that so it is, nor you wishing to hinder us from pursuing the Divine will. May Almighty kindness be with you; giving you also to know the voice of the true Shepherd, even Christ; who doth lead His own forth, doth go before them, and giveth unto them life eternal: proving, in the blessed experience of His sheep, that none are able to pluck them out of His holy hand.

In this place, so near the city, we find our exercises and religious duties to fill up; and it has often appeared remarkable to us, that it was not until, from the infirmities of age, we

became unlikely to travel much, that our lot was cast in so wide a field of labor as is found here within the circuit of a few miles; where we have many meetings of Friends quite within a ride of a morning: besides which, we have again and again to hold religious meetings with other people.

In this work we are now engaged. Many very deep baptisms of spirit does it occasion me, yet if I may but be found in the Divine will, it is enough. What signify the "light afflictions which are but for a moment," seeing they are not worthy to be compared with the "glory" that shall be revealed?

I may here remark, that from youth to this last stage of life, I have had but a few intimates; and in some of those few I have been disappointed. Friendship, true friendship, is indeed a precious thing—a rare gem—hard to find. It is, however, to be met with here below. It is unchangeable as the source from which it springs. Its value is equally known and appreciated in prosperity and in adversity.

Concluded these lines, 10th of First month, 1833. S. G.

Seventh month, 1834.—For a number of years past it has been my lot to warn Friends, and particularly in the Yearly Meeting in London, against a spirit of subtlety that would draw us from an attention to the inward manifestation of our blessed Saviour, the Lord Jesus Christ; for I have long seen that some of those most prominent and influential characters among us, never have been altogether of the Lord's own forming, either as Friends, or as ministers of Christ: and now many, very many, have embraced something short of Him who remains to be the fulness, and are settling on the surface of things—building on the sand; highly extolling in words, the "One Offering," which, indeed, is to be appreciated with feelings of adoration and heart-felt gratitude; but these know not of what they speak, while they preach up the literal faith in Christ crucified, and endeavor to bring people from a pure dependence on the leadings and unfoldings of the Spirit of Christ, or the inward and heart-felt power and coming of Christ within, the hope of glory. Divers ministers of our Society are sliding, and others are already gone from that which first called them to the preparation, and then did really bring them into the sacred office: much of this is to be traced to their adopting the views and sentiments of those mentioned above, who never wholly left their own works, but have sought to bring all things to a test of *reason*, instead of to that "Spirit which searcheth all things, even the deep things of God."

Oh that my dear children may walk in humility and fear before the Lord in this evil day; that they may be sheltered from all that is airy

and notional in religion, being covered with the Almighty wing; for it is written, "He shall cover thee with His feathers."

During the Yearly Meeting this spring, great was the exercise and travail of my soul, which produced the following effusions in my pocket-book.

"1834.—After the third sitting of the Yearly Meeting. The appearance of things amongst us is very specious; an exact resemblance of what should be known, felt, and evidenced in the Church of Christ, through His own power, who is the second Adam, the Lord from heaven—the quickening Spirit; but the absence of this quickening Spirit is, in my apprehension, mournfully and oppressively felt, while 'Mystery Babylon' mimics it in various ways—in language, in orthodox sermons, in dissimulation of love, in solemn silence, not the solemnity of the Lord's own power. We have a zeal among us which draws from the influence and motion of the inward anointing into creaturely activity; and we are so blind, in many instances, as to mistake Babylon's streams, where go the 'gallant ships, and the galleys with oars,' for the 'place of broad rivers and streams,' where none of these are found. Our predecessors suffered much in avowing the leadings of the Spirit of truth, which brought them away from all will-worship; shall we, with impunity, trample upon the testimonies of the everlasting Gospel, which they embraced at the risk of the loss of property, personal liberty, and life itself; and which they maintained through the hottest persecution? Our Society has thus stood on higher ground than any of those around; shall we descend to the level of things in the religious world (at large)? Or shall we profess more full light on the truths of the Gospel than was their experience, and so deceive ourselves? Surely *they* did come to the meridian brightness of this last and most glorious day and dispensation, and to the summit of that 'holy mountain, where nothing shall hurt nor destroy;' and unto which 'all nations' of the earth 'shall flow.' With all the prying wisdom of this present age, we shall find nothing beyond what these dear servants of the Lord were privileged to obtain. Oh that, by full dedication of heart to the Most High, we may be found in their footsteps; even in the narrow way that leadeth to 'life everlasting.' Amen."

19th of 11th month, 1833.—My dear children will be aware, that since the date of the foregoing, great have been the shaking and sifting that have come upon us as a Society: every foundation has been tried, yet that which cannot be shaken still evidences itself to be the invincible, eternal Rock on which Christ Jesus builds "His Church, and the gates of hell shall not prevail against it." For years past the mourn-

ers in Zion have had to wear sackcloth, and sit on the ground, with ashes on their heads, except when the Lord has lifted them up and clothed them in the beautiful garments, to show forth his mighty power in and through them. Some has He made very skilful in lamentation in these days: He has also given them to be mighty to suffer in His cause, and He will take the "cup of trembling" out of their hand, placing it in the "hand of them that afflict them." The Most High is able to put the harp of victory into the hands of His dear servants and children, with the song also in their hearts and mouths, "Great and marvelous are thy works, Lord God Almighty; just and true are thy ways, thou King of saints." It may be confessed that we are made very desolate as a people because we changed our glory for that which hath not profited us; and in a Society capacity, have turned judgment backward; sanctioning publications and ministry which are not in accordance with the true doctrines of the unchangeable Gospel of our Lord Jesus Christ; and which, therefore, the few among us who have stood fast in the Lord cannot own: the heavenly anointing and blessed harmony of truth not being in these things, but wisdom of words substituted and held up.

Thus have we been in a worse condition, as I apprehend, than in former trials; because the *body* did not then become responsible, by its acts, for that which is out of the true unity, and the wisdom from above. And now it seems to me that the Lord's power and the Lord's wisdom have so far prevailed, as to lay low the Philistine nature—prostrating it on the ground in great measure, and scattering that which sought to lay waste the inheritance of the Mighty One of Israel: yea, and that head will soon be cut off, that reared itself on high; but we must come clean out from all that opposeth itself to the simplicity, the purity, the wisdom, and the power which is for ever and ever. I believe the great Head of the Church will purify His people—not cut them off in anger; and that the "remnant of Jacob shall be as a dew" from Him, "in the midst of many people." Blessed be His adorable name!

S. G.

THE WAY TO AVOID CALUMNY.

"If any one speaks ill of thee," said Epictetus, "consider whether he bath truth on his side; and if so, reform thyself, that his censures may not affect thee." When Anaximander was told that the very boys laughed at his singing, "Ah," said he, "then I must learn to sing better." Plato being told that he had many enemies who spoke ill of him, said: "It is no matter; I shall live so that none shall believe them." Hearing at another time that an intimate friend of his had spoken disparagingly

of him, he said: "I am sure he would not do it if he had not some reason for it." This is the surest as well as the noblest way of drawing the sting out of a reproach, and the true method of preparing a man for that great and only relief against the pains of calumny—a *good conscience*.

From the British Friend.

THE ONLY TRUE TEACHER.

"Who will show us any good: Lord, lift up thou the light of thy countenance upon us."

This supplication of the royal Psalmist, as it directs to the only true Teacher, inspires a sense of the insufficiency of man's teaching. It is not for man to prescribe the means used by Omnipotence in the salvation of his creatures; but it is a vain hope that man is designed to become more than a beacon in the hand of his God, and his sphere of action ceases in directing the sinner to the Rock of ages. Paul may plant, and Apollos water, the increase is with God—to lift up the light of his countenance, to manifest his divine attributes, and to reveal, by the inshining of his Holy Spirit, our true and individual condition before him. When the eyes have been opened, it matters not in what sect or denomination, the saving grace of God will work the same, bear the same fruit, and tend to the same end; it will be equally realized that the awakened and seeking soul cannot serve God and Mammon; that we must pass the *refiner's fire*; the cross, the crucifixion of nature, must be endured in order to win the crown. "Marvel not that I say unto you, Ye must be born again;" born after the Spirit; after the Spirit which was in Christ, the begotten of the Father. The words of Jesus may not be overlooked nor mollified, or we shall, when the day of visitation has closed, be like unto him who built his house upon the sand; the bed will be too short; the covering too narrow. Moral virtue, however excellent, possesses no saving power; not what we are by nature, but what we are by grace, is the momentous inquiry. Jehovah, the mighty One of Israel, the Alpha and the Omega, must be our God, if we would become his people. "Thou shalt love the Lord thy God with all thy heart, and with all thy soul," is the command of the Supreme.

When, in obedience to the divine injunction, the affections have been set on things above, the things of time are held in subordination: we can reciprocate to the language, "As the heart panteth after the water-brooks, so panteth my soul after thee." The path will have proved equally straight and equally narrow. Scripture extends no more latitude to one than to another; our strength, our safety is in obedience to manifested duty. Keep in the light, and thou shalt not grope in darkness. "Thy light and thy truth let them guide me."

If such a state of things were maintained; if the glory of God and the salvation of the soul were the impulse of action, there would be less division in the church; but these divisions appear to arise from two prevailing evils: a mistaken indulgence in the activity of the creature, not satisfied that the government should be laid upon His shoulder; or the desire to widen the path prescribed by Christ our Teacher.

WITNEY.

S. C. W.

"THE KINGDOM OF GOD IS NOT IN WORD, BUT IN POWER."

We are less and less disposed to measure the piety of others by peculiarities of faith.

Men's characters are determined, not by the opinions which they profess, but by those on which their thoughts habitually fasten, which recur to them most forcibly, and which color their ordinary views of God and duty. The creed of habits, imitation, or fear, may be defended stoutly, and yet have little practical influence. The mind, when compelled by education or other circumstances to receive irrational doctrines, has yet a power of keeping them, as it were, on its surface, of excluding them from its depths, of refusing to incorporate them with its own being; and when burdened with a mixed, incongruous system, it often discovers a sagacity, which reminds us of the instinct of inferior animals, in selecting the healthful and nutritious portions, and in making them its daily food. Accordingly the real faith often corresponds little with that which is professed. It often happens, that through the progress of the mind in light and virtue, opinions, once central, are gradually thrown outward, lose their vitality, and cease to be principles of action, whilst through habit they are defended as articles of faith. The words of the creed survive, but its advocates sympathise with it little more than its foes.—*Channing.*

Never maintain an argument with heat and clamor, though you are confident of being in the right; but give an opinion coolly and modestly, which is the best way to convince. And if that does not do, try to change the conversation in a gentle, easy way; for truth often suffers more by the heat of its defenders than from the arguments of its opposers. If you would convince others, stand open to conviction yourselves; and if you would please others, do as you would be done by. To acknowledge a mistake when convinced of it, indicates an ingenuous mind; but obstinately to adhere to our sentiments when convinced of an error, bespeaks stubbornness, pride, and self-importance.

He who cheerfully commits the universe to God, has nothing in the universe to fear!

LIGHT OF CHRIST.

BY JOB SCOTT.

"He that keeps a single eye to the light of Christ in his own heart, will find himself gradually filled, till he becomes full of divine light, which will open and unfold to him 'the deep things of God;'" give him to see many of the errors and false doctrines of mystery Babylon; raise him up into the strength, victory, and dominion of the divine life, and most sweetly lead the soul along through all the several stages and gradations of reconciliation, till God becomes *all in all*. This is something substantially experimental. All other schemes of salvation by Christ are but so many dreams of man's imagination; which, under high pretences of magnifying the merits of Christ, divert the soul from the only possible way of being benefited by them, or rightly understanding and magnifying them.

But man will choose to remain in the mist, and generally would rather trust to any *imaginary* means of salvation, than submit to the *real* means; because this is only and always through *death*, real total death to all corrupt selfishness, all gratification and enjoyment out of the love and life of God. Indeed, no soul is thoroughly saved till God is all its consolation. For, till then, God is not become its *all in all*; so death must still have place in order that God may thereby put down and destroy all its enemies. This is the true reason why so few find the "narrow way" to life, because they will not submit to perfect death. They can easily be dipped in water, and call that, being *buried with Christ*; which is, at best, but a mere shadow of the thing itself, and brings no soul to arise with him in the newness of life. But in the newness of life, *all* must arise with him, even *here*, and here know him to be to them, and in them, "the resurrection and the life," that will ever be able to say, because he lives we live also. None will ever live with him, who do not really die with him; nor reign with him without suffering with him; drinking of the cup which he drank of, and being baptized with the baptism he was baptized with; which is strictly and truly the baptism of sufferings, and into *real death*: thus filling up what remains behind of the "sufferings of Christ." They are, indeed, *truly his* sufferings, not metaphorically, or transferredly, or imputatively, but absolutely. Hence, "forasmuch as ye have done it unto *one of these*, ye have done it unto me." These are *bone of his bone and flesh of his flesh*; these *little ones*, these births of divine life that can truly cry, Abba, Father. God being in the strictest sense their *Father*, they are absolutely heirs of God, yea, *joint-heirs* with Christ; he in them and they in him, as himself says, and that as really and truly as he is in the Father, and the Father in him. So he calls them brethren: he is and

must be unavoidably with them, not now and then only, but "always, even unto the end of the world." They are his very members, the real branches of him, the vine. Now, the vine is not one thing, and the branch another in nature and kind, but one in absolute union; the same sap of life circulates through both, and all the fruit is in the real union and oneness.

THE SUNDAY AT HOME.

(Continued from page 361.)

The Sabbath comes. How perfect and how grateful is its silence! Dumb is labor, and hushed all tumult and care. Even the great marts of trade are deserted, and cities rest. The very birds sing a new song, and a certain delicious soothing greets you at your waking, and murmurs to you gratefully: "This is the day the Lord has made." Dull and dead must he be, beyond the dulness and deadness of the mere sluggard, who does not feel some awakening of the better man within him at the hallowed advent of the sabbath morning.

At the very threshold of the day, we meet with that which has much to do with the character of our home Sundays. I mean that general habit of self-indulgence which permits two or three extra hours of sleep on Sunday.

I do not believe there is any one thing introduces so much trouble and vexation into the home, tends to so much Sabbath-breaking, and gives rise to more and more various disturbance, than this habit, which ought to be honored only in the breach. What a record would the Sunday morning at home of a village or city be, and what varied unhappiness should we find beginning there, and dragging its troubled trail through the live-long day, "from morn till dewy eve."

The day has not started right, and it cannot go on right. Something is lost that cannot be found; something escaped that cannot be recaptured. Squandered at the drowsy importunacy of the body is time that was not yours to squander. Your home had a claim upon it,—made a direct demand of it. Your selfishness clogged or stopped the domestic wheels. The day long it suffers because of you. Something is omitted, or is imperfect, or postponed. I grant that there are sometimes those upon whom labor lays so heavy a hand that the Sunday demands some longer indulgence in sleep; but in the vast majority of cases the plea for the necessity is simply the plea of our indolence. It is the sluggard's plea. You do not take special interest in Sunday. You have got nothing to do. Sunday is a day of rest, and so you turn again to slumber. Is there not something of self-reproach when at last you fairly rouse yourself, and feel that it is late,—when you hurry yourself and hurry others and are hurried by them, and when all your hurrying will not bring

things as they ought to be? Your domestics have taken their cue from you, and they are late. Your breakfast is late. Things that ought to have been done yesterday,—shoes that ought to have been blacked, hats and gloves that ought to have been found, buttons that ought to have been sewed on, all come at the last impossible moment to be done,—all importunate,—making of the Sunday morning at home, clatter and confusion and worry,—destroying its peace, unsettling the mind, unstringing the nerves, and the second bell calls perturbed and every way illy-prepared spirits to the sacred solemnities of worship, hurries you late into church, or keeps you in vexation at home. Ah! the wretchedness every week entailed upon homes, every week repeated, because of the needless extra sleep of the Sunday morning!

It is a wretched mistake men make, when they take it for granted that the prime purpose of the Sabbath is physical rest, and that so they have a right to use its hours in a dull animal torpor. Inordinate lying in bed is not the sort of rest that even the animal economy demands. Idleness does not rest the mind, laziness cannot rest the body. No good comes of it.

The truest rest is that which comes, not of lethargy, but of simple change of work; and the father, mother, son, daughter, who will rise as early on Sunday as on any other day, and set about the Sunday's duties, will find themselves as truly refreshed when Monday comes as those who have loitered long in bed, while they will have gained a day in which every thing had its proper place and time.

It is a grave mistake of the home to allow the earlier hours of its Sundays to be spent in sleep.

To consecrate and complete the home, there must be religion in it; and, as the world and life are, Sunday must be looked to mainly for the giving that consecration and completeness.*

In itself the home is a sacred place. Its founder is God. Its gifts, its possibilities are His. The things sacred to the soul and life are of it. It is the place of birth, of growth, of death,—and these three great mysteries, these processes in being, sanctify it unto us. Distinctively religious then should the home be made by us, and every father and mother be known as the priest and priestess of the domestic altar. The old Levitical law should be revived among us, and every man "sanctify his house to be holy unto the Lord."

But here we are in the midst of difficulties

* Not necessarily; we would not thus separate religion from the daily avocations of life; we would rather enforce the apostles' exhortation—"Whether ye eat or drink, or whatsoever ye do, do all to the glory of God."—Eos.

various and great,—which many seem to think they escape by avoiding altogether,—which are only to be escaped by being met. What is to be the religion of home, and by what means is it to be established?

The religion of home should be broad and genial as religion in itself is, not confined to seasons and to tasks, not to catechisms and articles of faith, not to set acts and forms, not to the Bible and devotion, but liberal and complete, enfolding and touching every thing, every body, every position, relation, act,—joys as well as sorrows,—the least, the common as well as the greatest and the exceptional. It should have all the reverence of the first commandment, and all the scope of the second; and this secured by word and work, by precept, by influence direct and indirect,—not by causing to know and do, but by leading the way in knowing and doing. The thing most to be apprehended, most to guard against, is disgusting the members of the home with the subject of religion,—a thing many well-meaning homes have done.

I presume that nearly every child in what would commonly be called a Christian home has been taught to pray. That is, in its early childhood it was taught the Lord's Prayer, or some simple petition which it nightly repeated to its mother. But this habit would seem to be put away with other childish things, and the parent really knows nothing about the devotional habits of the growing boys and girls, who probably have long ago discontinued a practice, the spiritual meaning and importance of which they never knew any thing about. Of the religious habits of their parents, children are left very much in the dark, save as a suspicion may grow in their minds that they talk of, and perhaps demand of them, that of which in themselves they give no evidence. A child will sometimes be so simple as to turn upon a parent and ask him if he prays, or believes, or does this or that, to the parental confusion, perhaps, though scarcely to his reformation. This is wrong. No child should ever be left to doubt or suspect a parent's faith. There should be a free and true communion on this first and greatest of subjects,—an interchange of thought and feeling, purpose and hope.

Home was made for the soul, and the parent is parent of it, as well as of the body,—and he has but skimmed the surface of his duty, who has fed and fashioned the body, stored and disciplined the mind, but done nothing for the soul.

I do not believe in talking about one's inner life for talk's sake, but how it would hallow the relation of parent and child, help them both, if the interior of each heart were laid bare, as it many times may be in the confidential intercourse of home,—and how it would speed a child onward in its work could it but know that

through just these experiences and struggles father and mother have passed before.

(To be continued.)

THE RELIGIOUS.

BY F. W. R.

To be religious is to feel that God is the ever near. He is to go through life with this thought coming instinctively and unbidden: Thou God seest me.

A life of religion is a life of faith; and faith is that strange faculty by which man feels the presence of the invisible, exactly as some animals have the power of seeing in the dark. That is the difference between the Christian and the world. Most men know nothing beyond what they see. This lovely world is all is all to them; its outer beauty, not its hidden loneliness.

Prosperity—struggle—sadness—it is all the same. They struggle through it all alone, and when old age comes, and the companions of early days are gone, they feel that they are solitary. In all this strange deep world, they never meet, or but for a moment, the Spirit of it all, who stands at their very side. And it is exactly the opposite of this that makes a Christian. Move where he will, there is a thought and a Presence which he cannot put aside. God looks out upon him from the clear sky, and through the thick darkness,—is present in the rain-drop that trickles down the branches, and in the tempest that crushes down the forest.

A living Redeemer stands beside him, goes with him, talks with him, as a man talks to his friend. The emphatic description of a life of spirituality is, "Enoch walked with God."

"IT'S VERY HARD."

"It's very hard to have nothing to eat but bread and milk, when others have every sort of nice things," muttered Charley, as he sat with his wooden bowl before him. "It's very hard to have to get up so early on these cold mornings, and work all day, when others can enjoy themselves without an hour of labor. It's very hard to have to trudge along through the mud, while others roll about in their coaches."

"It is a great blessing," said his grandmother, as she sat at her knitting—"it's a great blessing to have a roof over one's head, when so many are homeless. It's a great blessing to have sight, and hearing, and strength for daily labor, when so many are blind, deaf, or suffering."

"Why, grandmother, you seem to think that nothing is hard," said the boy, still in a grumbling tone.

"No, Charley, there is one thing that I think very hard."

"What's that?" cried Charles, who thought

that at last his grandmother had found some cause of complaint.

"Why, boy, I think that heart is very hard that is not thankful to God for present blessings."

FRIENDS' INTELLIGENCER.

PHILADELPHIA, NINTH MONTH 1, 1866.

FRIENDS TRAVELLING IN THE MINISTRY.—

James and Lucretia Mott have obtained a minute from Philadelphia Monthly Meeting to attend Easton and Duaneburg Quarterly Meetings, in the State of New York, and to appoint some meetings within their limits.

Benjamin Tomlinson, a minister from Byberry Monthly Meeting, Pa., has obtained a minute to visit the Yearly Meetings of Ohio and Indiana, and some meetings composing Ohio Yearly Meeting.

Samuel Levick, of Richland Monthly Meeting, Pa., has obtained a minute to visit Ohio and Indiana Yearly Meetings; also, Prairie Grove Meeting, Iowa, and the meetings of Friends through the above Yearly Meetings, as way opens.

Charles Teas, an Elder from Horsham, a minute to visit Ohio Yearly Meeting.

PARTY POLITICS UNFAVORABLE TO RELIGIOUS FEELING.—As a time of great political excitement is probably approaching, it may be well, in advance of the occasion of temptation which may be presented to the minds of some, to review the excellent caution on this account embodied in our discipline. Perhaps few will deny that active participation or interest in party politics, tends to create and foster feelings adverse to that Christian love and good will which it is our duty to cultivate and practice towards all men. The irritating discussions and perpetual strifes to which the spirit of party subjects those who indulge in them, either by joining with political associations, or cherishing at home a feeling of contention, by assiduously reading distracting newspaper animadversions, stir up the passions to an unholy purpose, and occupy the thoughts to the exclusion of better things. The heart, under such circumstances, is filled with other guests, and there is no room for the birth or entertainment of the babe immortal.

As civil governments are established for the

greater security of peace and prosperity in the community, many friends feel it incumbent upon them to unite with other citizens in placing in office those whom they consider best qualified to promote the object designed. Others, upon equally conscientious grounds, refrain from any participation in government affairs. The discipline wisely leaves these points to the scruples of individual members, only prohibiting such words and actions as are "inconsistent with our religious principles," or calculated "to lay waste our Christian testimony." It fervently recommends to our members, "that they be religiously guarded against approving or showing the least connivance at war, either by attending at, or viewing military operations, or, in any wise, encouraging the unstable, deceitful spirit of party, by joining with political devices or associations, however speciously disguised, under the ensnaring subtleties commonly attendant thereon; but that they sincerely labor to experience a settlement on the alone sure foundation of the pure, unchangeable truth." Again, it declares "that the principle of truth calls us out of contention; it even seeks not its own ends by means productive of animosity; much less, therefore, should its professors indulge themselves in strife, for objects of a perishable nature."

This advice is not an obsolete, valueless caution, applicable only to the time when it was issued, but it remains as true now as in any former state of society. The spirit of the Gospel leads its followers away from that which would "divide in Jacob and scatter in Israel," and brings them into that peaceable condition in which they can pray the Father of the universe for blessings upon all, even upon their enemies. The latitude given in political discussions to personal censure, tale-bearing and detraction, is subversive of true religious feeling; and, if indulged, destroys the ability to exercise the God-like qualities of justice, mercy and truth, which it is incumbent upon us to practice. "If any among you seemeth to be religious," says the Apostle James, "and brideth not his tongue, but deceiveth his own heart, that man's religion is vain."

We earnestly ask such of our members as, from a desire that the right may prevail, or from any other motive, have been induced to unite in political organization with those who make no pro-

session of relying upon Divine guidance, seriously to examine whether their spiritual life has not languished, and their strength and usefulness been impaired by such association; and, if this has been the case, we would affectionately encourage them to avoid, in future, such occasions of stumbling.

MARRIED, on the 30th of Sixth month, 1866, in accordance with the order of the religious Society of Friends, **HARRISON VANSYOC** and **ANGELINA G.** daughter of Nathan and Asenath Thomas, all of **Prairie Grove Monthly Meeting**, Henry County, Iowa.

DIED, on the morning of the 20th of Eighth month, 1866, at Burlington, N. J., **JAMES MARTIN**, in the 41st year of his age.

—, on the 22d of Eighth month, 1866, at her residence in Still Pond, Kent Co., Md., **MARY ANN ALLSTON**, wife of the late John C. Norris, in the 65th year of her age; a member of Cecil Monthly Meeting.

—, on the 17th of Fourth month, 1866, of cancer, **ANGEL T. FLITCRAFT**, in the 71st year of her age; an exemplary member of Wilmington Monthly Meeting, Del.

—, on the 11th of Eighth month, 1866, of typhoid fever, **CAROLINE E.**, youngest daughter of Theodosia T. and the late William Marriott, in her 18th year; a member of the Monthly Meeting of Friends of Philadelphia.

—, on the 14th of Eighth month, 1866, **THOMAS B. ELLIS**, in his 56th year; a member of Green St. Monthly Meeting, Philadelphia.

—, on the 15th of Eighth month, 1866, **MARY M.**, wife of J. Foster Sheppard.

—, on the 18th of Eighth month, 1866, at the residence of her daughter, Sarah P. Leedom, Norristown, Pa., **TACY**, widow of Samuel Parker Garrigues, in her 72d year, formerly of Radnor, Pa.

—, on Second-day, the 20th of Eighth month, 1866, at her residence near Hatboro, Pa., **SIDNEA**, wife of John Lloyd, aged 64 years.

—, on Fifth-day, the 23d of Eighth month, 1866, **BENJAMIN SEERILL**.

—, on the 17th of Eighth month, 1866, at her residence in Springboro, Ohio, **MARY**, widow of Jonathan Wright, in the 80th year of her age.

A Meeting of Friends' Association for the Aid and Elevation of the Freedmen will be held at Race St. Meeting House, Fourth-day evening, the 5th inst., at half past seven.

9th mo. 1st. **WILLIAM C. BIDDLE,** } *Clerks.*
MARGARET A. GRISCOM, }

"MY MASTER IS ALWAYS IN."

"Johnnie," said a man, winking slyly at a dry-goods clerk of his acquaintance, "you must give me good measure. Your master is not in."

Johnnie looked solemnly into the man's face, and replied:

"My Master is always in."

Johnnie's master was the all-seeing God. Let every tempted child, ay, and adult, too, adopt Johnnie's motto, "My Master is always

in." It will save him from falling into many sins.

For the Children.

THE VARIETY OF MACHINERY IN ANIMALS.

BY WORTHINGTON HOOKER.

(Continued from page 377.)

You have seen what a variety of curious machinery there is in our bodies for our minds to work, besides that which is needed to keep the body in repair. But I have told you some things about other animals as I have gone along. There is in them, also, a great deal of machinery, and it is different in each. The variety of it is wonderful. You see that the world is every where full of many kinds of animals, making it a very busy world. I do not believe that you have even thought how different they are from each other. I will therefore tell you a little about this.

See what a difference there is between man and some animals. Look at the oyster. He lives in the water, shut up in his rough shell. He is no traveller. He has no eyes to see sights with. He has no smell. He has taste for his food, and no doubt enjoys it. He has the sense of touch; this he needs, both to manage his food and to guard himself against harm. As he does not move about, and has no feet nor hands, he has but few muscles. He has one to shut up his shell tight, which he does when he is alarmed. His brain and nerves are very small affairs, for he has no great use for such things.

There is little machinery, then, in an oyster, as you compare it with the machinery in your body; and it is simply because he does not need as much as you do. If he had needed more, God would have given it to him. But there is, after all, considerable machinery even in the oyster. He has machinery for digesting his food. He has circulating machinery—a heart with its arteries and veins. And he has gills like fishes, by which his blood is aired by the air in the water. Then he has a few muscles, some nerves, and a sort of brain.

The variety in the contrivances in animals is so great, that when one undertakes to study them, he finds continually something new. And one thing is always true of the machinery in animals—it is perfect. It is always exactly fitted to do just what it is made for. No machinery that man ever made is equal to it.

Animals are suited in their shapes and arrangements to the way in which they live. Some are made to fly. These have wings; and the wings exhibit great variety, as you see if you look at the birds and insects that are so busy in the air. Some animals are made to live in the water; most of these have a broad tail and fins to swim with, but some crawl, as the crab. Some float about, like the hydra, and some lie still, like the oyster.

Some animals walk about on the ground. Man is the only animal that walks erect upon two feet. The beasts, you know, are four-footed. The monkey is one of the most singular of beasts; he has neither feet nor hands, but some things which are like both. With these he is more of a climber than a walker. There are many small animals that walk on many feet. And the snakes, without any feet, crawl upon the ground. Some animals hop as the frog and toad. Some go by a long jump, as the grasshopper and the troublesome little flea. Very strong muscles must this little animal have to enable it to make such leaps with its long, crooked legs.

Some animals are much more like man than others. The bones, and muscles, and nerves, and heart, and brain of some are very much like the same things in our bodies. This is true of many of the four-footed animals. You can therefore know how the parts of the machinery inside of you look by observing the different parts of animals at the meat market. In a calf's head you can see how your brain looks. Its lungs, or lights, as they are commonly called, are very much like yours, and its heart is quite like your heart. And so of other parts.

The more an animal moves, the more muscles he has to make his motions with. Man has more variety of motion than any other animal, and so has more muscles. God gives to each animal just the machinery that it needs. Some have machinery that others do not have at all. Some have very little, while others have a great deal. In our bodies there is a great variety of machinery, for our busy minds want to know and to do very many things.

The mind of man does more things with the hand, than with any other part of its machinery. I shall therefore now go on to tell you about the hand, and then about those things that in different animals answer somewhat in place of hands.

(To be continued.)

For Friends' Intelligence.

TO YOUNG MEN WHO ARE MEMBERS OF THE RELIGIOUS SOCIETY OF FRIENDS.

Dear Friends: The blessed Jesus emphatically advocated the principles of peace when he declared, "My kingdom is not of this world, else would my servants fight." Pure Christianity and true Quakerism are identical. They are neither based upon nor upheld by the sword. Under this belief I think it my duty to call your attention to a little incident which recently occurred, and which illustrates the view that a faithful adherence to the peaceable principles professed by our religious Society will more effectually preserve us from the wrathful attacks of our fellow men, and at the same

time afford us more real satisfaction than any resort to deadly weapons for defence.

From a clear impression of duty, in the fall of 1864, I left my Pennsylvania home to teach the freedmen of Stevenson, Ala., and to do what I could toward elevating their condition in life in every respect. Although I received many violent threats at various times from the white population, yet I was never physically injured by them until the seventh day of last Fifth month. A short time previous to that, finding the white citizens were proudly boastful and exultant in having, through the encouragement they had received from the change in political affairs, succeeded in carrying out their various plans, some of them offensive to the best interests of the colored people, I deemed it prudent to assemble that class, and give them some advice in regard to the proper course for them to pursue in case of an event similar to the disgraceful affair at Memphis.

Near the close of the meetings the colored people passed a *unanimous* resolution, that if such an emergency as that above referred to should arise, they would take no active part in it without first consulting me about it.

On the 7th of Fifth month, through the influence of certain parties, a partly intoxicated young man of low character (an entire stranger to me) was induced to boldly enter the room where I was, and after some fruitless attempts to provoke me to anger, by making use of very abusive language, at a sign given him by the crowd outside, he drew back and struck me a severe blow with his clenched fist upon my right temple, which knocked me over against the wall and stunned me severely. He quietly walked away and concealed himself, fearing the colored people might hear of it and attack him. In a few minutes I was accosted by a number of stout, active colored men, who heard of the affair, and immediately rushed to my protection. After vainly attempting to get my consent to pursue the young man, they quietly resumed their daily labor in accordance with my wishes. It was then nearly night. Soon after dark, a large crowd of colored men, women and children (some of them gray-haired men and women from several miles distant in the country) convened at the school-house, sent guards to watch the movements of my assailant, and appointed a committee to wait upon me and beg me to allow them to inflict capital punishment upon the offender.

Hearing of the meeting, and fearing their excitement might induce them to commit some rash act, I went up there (though scarcely able to do so, and entered just after the appointment of said committee. After making some remarks in the meeting, I earnestly requested all present to return quietly to their respective homes, and told them I firmly believed that He

who carefully and continually watches over all the workmanship of his holy hand, will mercifully protect us in our earnest and sincere efforts to do right far more effectually than we can protect ourselves by means of swords, bullets, &c. After a short silence the meeting dispersed in a quiet, orderly manner, which quite disappointed some white spies stationed outside.

During the following evening I wrote a long letter addressed to the white citizens in and around Stevenson; and afterwards invited them to meet me in their Town Hall the next First-day afternoon. We met according to appointment—the colored people all keeping away, as I had requested them to do. After reading my letter to them, I made some remarks, the substance of which was nearly as follows: “My friends, I belong to a religious denomination the members of which profess to be guided in their daily lives by a Divine light placed within them, which enables them to see what is right and what is wrong for them as they move along, and to depend upon a higher and more reliable source of protection than all the carnal weapons which man can invent. Although I acknowledge myself to be a very unworthy member of that Society, yet I am glad to be able to say that I have never in my life carried any deadly weapons for defence, and I do not intend ever to do so. From the appearance of your pistols and other weapons, I suppose you may have come here to day for the purpose of carrying out the threats you have repeatedly made of taking my life. Now, my friends, I left my Pennsylvania home nearly two years since, believing it to be my duty to do what I could to improve the condition of these poor, ignorant colored people, whom you and your neighbors and antecedents have been keeping in bondage and degradation for centuries past. Although we may honestly differ in opinion as to the comparative merits and mental faculties of the two races, yet I cannot see how any of you, after due reflection, can regard it as a crime for me to come here and do what I can to exercise and improve the God-given talents (whether great or small) which these colored people possess. I cannot think it wrong for any person to do all in his power for any portion of the human family created by Divine wisdom, in order that they may become wiser, better and happier than they have heretofore been. If you think, as some of you say, that these people are not susceptible of intellectual culture, even then you can only look upon it as a waste of time—not as an actual sin—for me to make an effort toward cultivating their moral and mental faculties. But there is one thing I want you all distinctly to understand, and that is, I am not troubled with any fear of you, either individually or collectively; you may knock me down, as your agent did the other day, or you

may murder me, as you have threatened; but that is all you can do; and so long as I feel as I now do, that I am merely performing my simple duty toward these sadly abused and greatly neglected people, all the individual or combined threats that you can utter against me will not induce me to leave here one day before the time fixed upon for closing our schools. If my life is spared until that time I expect to leave in a quiet and peaceable manner. Whatever you may think of the propriety of educating these colored people, you must acknowledge that in doing so, I am acting in accordance with the laws of our general government. I now ask you, my friends, to be manly enough to stand up before me, and plainly state in my hearing your real reasons for making these threats against me; and I appeal to every man, woman and child now present, boldly to state upon this occasion every thing you have known me to do or say during the nearly two years that I have been in your midst that was contrary to law or tending to interfere with your just rights and privileges in any way, or that was intended to excite your prejudices; and, in short, every thing that you considered really wrong.”

After a pause of several minutes, waiting for a reply, but receiving none, I proceeded as follows:—

“Now, my friends, you have virtually acknowledged by your silence that I am not guilty of any of the items which I have just specified; and I will say in conclusion, that if there is a man in this assembly who seriously thinks it would be an honorable transaction to take the life of an unarmed man under all these existing circumstances, or if there is one who thinks he will feel any better or any happier, either here or hereafter, for murdering me upon this occasion, let him come forward now and commit the deed, and I will abide by the consequences, offering no physical resistance to him.”

In looking over the assembly I observed that every head was bent down in apparent shame; and after remaining a short time in that silent, thoughtful mood, I dismissed them. Most of the company then arose, except two noted “bushwackers,” who quietly remained in their seats, apparently engaged in serious reflection. One of them soon broke the silence, and I happened to overhear the following conversation between them:

“Well, Mr. ———, wot did you think of dat ar enna way?”

“Wall, sir, I’s been a studdyin dis yer thing over and over, an I declar I bleeve we-uns cant find enna fault wid wot Mr. Walton’s been a sayen yer to-day, and I do bleeve we-uns ’l jist have to let him stay on yer arter all, and not pester him no more.”

“Wall, I bleeve so too.”

Several of the citizens present, who had never

spoken to me before, then came forward and spoke to me in a pleasant, friendly style; and the people dispersed, apparently with the best feelings. I was not molested by any of them, either by word or deed, from that time forward. I continued my school until the time fixed upon for adjournment, (Sixth month 1st), and then peaceably left for my northern home. Although I feel that my labors are ended at that point, yet I should have no fear of returning, provided duty should call me there again; and I now believe that the time spent in that wretched place has proven of quite as much benefit to me as to any of the pupils under my care. It has at least increased my faith that the divine Being stands ever ready to help those who try to help themselves *in the right way*.

I will just add that I have received by mail an interesting letter from one of my colored pupils, in which the writer states that although it was very hard at the time for them, the colored people, to refrain from striking the fatal blow to the white man who attacked me, yet they are now satisfied that the proper course was pursued in the case; for the very arm with which he struck me has since been so nearly shot off accidentally, that it has to be amputated at the shoulder; and they regard this as a just retribution for his deed.

Sincerely hoping that every member of our Society will examine well the non-resistant principles professed by Friends, before shouldering the musket to engage in either offensive or defensive warfare with his fellow-men, designing to deprive a human being of that life which God alone can give, and which God alone has the right to take away, I will now leave the subject with you, and subscribe myself your well-wishing friend,

WILMER WALTON.

New Brighton, PA., 8th mo., 1866.

ONLY BELIEVE.

"This is an hard saying—who can bear it?"
Is the saying too hard to believe?
Doth reason stand baffled and dumb?
Is the doctrine too deep to receive?
Then wait till the Master shall come.
Till the light of His presence is poured,
We may search through the problem in vain;
The Master who gave us the Word,
Himself must its meaning explain.
Himself gives the faith to adore
The truths that are hidden from sight;
For their depth I would love them the more,
And revere them but more for their height.
Up the measureless heights of His love,
Down the fathomless depths of His grace,
I would gaze till all doubts shall remove,
And faith all misgivings displace.
Oh, sweet is the blessing for those
Who see not, and yet have believed,
And safe is their place of repose,
Who rest on the promise received.

J. CRAWFORDSON.

ONE STEP MORE.

What though before me it is dark,
Too dark for one to see?
I ask but light for one step more;
'Tis quite enough for me.
Each little humble step I take,
The gloom clears from the next;
So, though 'tis very dark beyond,
I never am perplexed.
And if sometimes the mist hangs close—
So close, I fear to stray,—
Patient I wait a little while,
And soon it clears away.
I would not see my farther path,
For mercy veils it so;
My present steps might harder be
Did I the future know.
It may be that my path is rough,
Thorny and hard and steep;
And knowing this, my strength might fail,
Through fear and terror deep.
It may be that it winds along
A smooth and flowery way;
But, seeing this, I might despise
The journey of to-day.
Perhaps my path is very short,
My journey nearly done;
And I might tremble at the thought
Of ending it so soon.
Or, if I saw a weary length
Of road that I must wend,
Fainting, I'd think, "My feeble powers
Will fail me ere the end."
And so I do not wish to see
My journey, or its length;
Assured that, through my Father's love,
Each step will bring its strength.
Thus step by step I onward go,
Not looking far before;
Trusting that I shall always have
Light for just "one step more."

—Christian Treasury.

NO BABY IN THE HOUSE.

No baby in the house, I know—
'Tis far too nice and clean;
No tops by careless fingers strewn
Upon the floor are seen;
No finger marks are on the panes,
No scratches on the chairs,
No wooden men set up in rows,
Or marshaled off in pairs;
No little stockings to be darned,
All ragged at the toes;
No pile of mending to be done,
Made up of baby-clothes;
No little troubles to be soothed,
No little hands to fold;
No grimy fingers to be washed,
No stories to be told;
No tender kisses to be given,
No nicknames, "Love" and "Mouse;"
No merry frolics after tea—
No baby in the house.

Let us to-day, therefore, hear His voice, and not harden our hearts who speaks to us many ways: in the Scriptures, in our hearts, by His servants and providences; and the sum of all His holiness, and charity.—Penn.

HOW TO MAKE CHILDREN HAPPY.

Give your children a love for nature. It was our favored lot to be brought up by a loving, intelligent, Christian mother, and never shall we cease to feel gratitude to her memory for the many pleasant hours her early lessons have insured us. From childhood we were trained to admire and love natural objects. What an ovation was performed in honor of the first violet, and what a joyous discovery it was to spy the first pale primrose of the season! Even after long years of sorrow and trial, a thrill of happiness returns at the recollection of these innocent pleasures; of the approval she never omitted to manifest at indications of a desire to solve any of the many wonders of leaf, and bud, and flower; of the pleasure with which she would survey our collections of variegated snail shells, or the arrangement of all the varieties of grasses we could collect. She also allowed us to feed caterpillars, (always, however, being most scrupulous as to the kindness with which they were treated), and no words could describe our delight as we watched the wondrous change into chrysalis and butterfly, while she would take advantage of it to lead our thoughts to the still more wondrous transformation of the human body. The evening hours of an intelligent child might be profitably employed in arranging the shells, grasses, flowers, etc., collected during the summer, placing them carefully on paper or card, and writing the description of their classes, orders, or parts beneath. Live pets, also, deserve notice here, since tending, feeding, and nursing them, afford great delight to children, and foster their kindly feelings.

By all means encourage brothers and sisters to love the same amusements. Of course those of an intelligent kind are meant, since we have no desire to transform our boys into women, or to make our girls romps. But in the study of botany, or natural history, one may materially aid the other. The boy will exhibit more courage and dexterity in securing the prizes, which the "neat-handed Phillis" can more deliberately manipulate and examine; or the girl may make a very pretty drawing of the various butterflies, beetles, etc., which the boy may color; while the neatest writer may add the description. A charming little volume might thus be commenced at a comparatively early age, which both would enjoy to review as they progress, and mark the improvement they have made. Or, again, a boy who was clever as a carpenter might be directed how to form very pretty baskets and vases, to hold the flower pots in the drawing-room or garden, while the girl could cleverly decorate them with pine cones (split down the centre in order to be more easily glued), which, if wished, could afterwards be varnished; or bouquets of flowers might be skeletonised and bleached at the sole expense of time and trouble, and thus a charm-

ing ornament for the parlor would be produced. Hundreds of these little employments will suggest themselves to the mind of any intelligent mother, and she will then be spared the annoyance of a listless, "What *shall* I do? I have nothing to do!" that too often degenerates into ill-humor and peevishness. Never mind how trivial the occupation, so that it be but useful, and trains your child to an abhorrence of idleness.

Never think it too much trouble to answer your children's questions. How often do we hear the tart reply, "I am sure I don't know, child; pray don't tease me when you see I'm busy!" This is the surest way to stunt the growth of your child's mind. It is the most cruel and ruthless conduct possible, thus to deny a child the information for which he craves, and allow him to feel all the awkwardness and pain to which ignorance exposes him. Rather hail with joy these indications of a growing mind, and make the little inquirer happy by drawing him to you with a kiss, and as full and patient an elucidation as he may require.

Make your children happy in each other, encouraging them to feel that a pleasure enjoyed alone is only half enjoyed. If one of them buy only a farthing sugar-stick, teach him to feel a delight in offering a taste to the rest. As far as possible, let their presents to each other be of their own manufacture—not purchases. Let the boys carve silk-winders, or make bone crochet hooks, or copy in their best style some favorite poem, transcribing it into a neat manuscript volume, perhaps adorned with original illustrations. Let the girls make bookmarks, satchels for school books, or a leathern cover for some favorite volume. Cherish the little outbursts of affection natural to them. Do not chide your boys for a few irrepressible tears at leaving home for boarding school, nor encourage "manliness" at the expense of brotherly affection, and do not grudge an hour bestowed upon a little painstaking letter-writer or juvenile composer, who is anxious to give an account of various home details to the absent one. Let him write two or three sentences of his epistle each night, overlooked by an elder sister; the one will feel happy at being able to instruct, the other will be grateful at the sight of the letters that grow beneath his pen. By any means, at any expense of trouble to yourself, make home happy to your children; let it always remain in their memories as a type of all that is peaceful, loving and attractive; let them constantly revert to it, as a soothing remembrance in the hours of pain, sorrow or privation, and let its associations be so hallowed and precious as to restrain them in temptation and strengthen them in trial. Yours is a noble mission; oh, parents, see that ye fulfil it with that wisdom and gentleness which shall prove you worthy of the dignity and honor it confers!—*The Leisure Hour.*

THE USEFULNESS OF BIRDS.

Dr. Trimble, of Newark, N. J., one of the leading entomologists of this country, recently addressed the Essex County (New Jersey) Sportsmen Club upon the importance of protecting the insect-eating birds. A report appears in the Newark Advertiser, from which we extract the following :

THE BALTIMORE ORIOLE.

He first spoke of the Baltimore oriole, showing different specimens, illustrating how much the female and the males of different ages differ from each other. They are becoming quite numerous ; large elms suiting them. This family is chiefly insectivorous. When it first arrives, it feeds upon leaf-curling caterpillars, so injurious to our fruit and shade trees. Now it is feeding upon the canker worm, that terrible pest in New England. Later in the season, it is found eating the drop worms. The lecturer stated that by the aid of the microscope he had been able to prove positively that the oriole feeds upon that terrible enemy of the fruit-grower, the curculio ; that a small portion of the head of what was supposed to be a curculio was found amongst the comminuted contents of the stomach of one of these birds, and the microscope enabled him to count the one hundred and forty-seven lenses in one of the eyes.

THE DOWNY WOODPECKER.

This is the most valuable of all the birds of our country. It knows where to find and is busy in searching out the apple-worm—the second in importance of the insect enemies of fruit, which, with the curculio, are the chief cause of the ruin of the fruit business, especially in our State. The little chick-a-dee also feeds upon the apple-worm, but finds it accidentally, and not by boring for it, as the downy woodpecker does.

THE CEDAR BIRD.

Of the cedar bird, or cherry bird, the Doctor spoke at some length, wishing to rescue it from its bad reputation as a thief of cherries. It is a gross feeder, and consumes immense numbers of canker worms, span worms and other injurious insects of that class. This bird and the yellow bird, or finch, resemble each other in one respect, both remaining in flocks till midsummer, and are thus on hand in great numbers when their services are most required, while most other birds are at home attending to their domestic duties. You find the cedar birds in New York and Philadelphia in large flocks in June, after the "worms," and if they could be properly protected by closing the parks so that they should not be frightened away by the people, they would do much towards ridding those cities of these pests. The yellow birds, in immense flocks, will be found in those wheat fields where the midge is so destructive. They

are in pursuit of the larvae of these flies in the heads of the wheat while the grain is in its milky state, and farmers have supposed these birds were the cause of the trouble, not knowing that they were their best friends.

THE WARBLERS.

The family of warblers includes some thirty or forty species. They are all small, but exclusively insectivorous—most of them are very beautiful, and some are charming songsters. Many are with us all summer, but others breed further north. They sometimes remain with us a few days, both going and coming. In the spring they will be feeding on plant lice, as found in the orchards ; in the fall they stop and feed on the late brood of Palmer worms, that so infest our elm and maple trees, becoming exceedingly fat.

THE WHIPPOORWILL.

Individual insects are as wonderfully made as any of the rest of creation. Moths fly only at night, yet "Solomon in all his glory was not arrayed like one of these." Ten thousand lenses to form the eyes ; one hundred thousand feathers to complete the wings ; yet the whippoorwill will snap up dozens of them in a single night. The whippoorwill is a nocturnal bird, and his beak is so formed that it takes in moths as a net takes in fish. The eyes of flies enable them to see all around them, and the muscular force of their wings is so quick that they can dodge the rain drops in a shower, yet the swallow is so formed that it lives exclusively on insects taken on the wing.

THE BEAKS OF BIRDS.

The beaks of all species of birds differ from each other, but the beak of each is formed exactly for taking the insects its instinct teaches it to choose as its food. Many of the birds live exclusively on insects—as the warblers, bluebirds and creepers. Some, again, that are classed as insectivorous, will occasionally take berries, cherries or grapes—as the orioles, mocking-birds, cat-birds, and thrushes. Some seem omnivorous, and eat almost anything, as robins and cedar-birds, and are gross feeders. A large class, as the bob-o'-links, blackbirds, finches and some of the sparrows, will live on insects in summer and seeds in winter ; or mix them when the can find both. Others again have a still wider range, as jays, crows and butcher-birds.

THE IGNEUMON.

But the most important agent in the regulation of the insect world is an order peculiar to insects. We have nothing corresponding to it in the other departments of animated creation. They are sometimes called parasites, but not correctly. Parasites are everywhere ; even vegetables have them. The mistletoe is a parasite. But these are not necessarily destructive to the

life of the victim. The ichneumon is. I allude to those peculiar flies—wasp-shaped and with four wings—that deposit their eggs in the bodies of other insects—the young feeding upon the living flesh of these victims, and upon which they grow to maturity. This seems a strange Providence, and hard to comprehend—but still it is so. Without such an agent the Hessian fly would have destroyed the wheat crops of this country, but with it, the Hessian fly was controlled in a single season, and has been kept in check for fifty years. Thousands of other insects that would soon be troublesome are controlled in the same way, and so quietly that we hardly know how.—*Boston Transcript*.

REVIEW OF THE WEATHER FOR SEVENTH MONTH.

(Continued from page 367.)

Want of room crowded out the following information when the statistical portion of the Review was furnished, viz:

It will be seen by deducting from the monthly account of deaths in 1865, one-fifth for the extra week, it gives an *excess* for this year of 268, which may fairly be attributed to the excessive heat. For the week ending the 21st of the month, the whole number of interments reported was 739. Of these, 50 were reported as from the "effects of heat," 44 from "coup de soleil," 31 from "congestion of the brain," 21 from "inflammation of the brain," and 17 from "debility;" making 163 deaths that were probably caused or hastened directly by the heat. The deaths from choleraic diseases, which are always aggravated by hot weather, were very numerous. There were 10 reported of cholera, 168 of cholera infantum, 21 of cholera morbus, 14 of diarrhoea and 25 of dysentery; in all 238. So that fully four hundred of the interments of the week may be ascribed to the peculiar atmospheric condition, leaving a little over three hundred from ordinary diseases. The whole number of deaths reported during the "heated term," of three weeks, from coup de soleil, were as follows:

From the 7th to the 14th,	-	-	10
" 14th " 21st,	-	-	44
" 21st " 28th,	-	-	5
Total,	-	-	59

Other large cities suffered equally with, if not still more severely than Philadelphia—New York particularly. The account being for one day (precise date not known.)

"The number of burial permits granted during the twenty-four hours ending at one o'clock yesterday was 235, a number unusually large.

"There were sixty cases of sun-stroke and prostration by the heat yesterday in the city, forty-three of them proving fatal. Thirty cases were reported in Brooklyn, seven being fatal, and in Jersey City there were five deaths from the same cause. Two hundred and fifty-eight cases of sun-stroke have been reported during the summer, of which one hundred and thirty-five proved fatal."

While referring to deaths, it may be well to correct an error that occurred in our review of last month. The number for the *last week* in the month was carelessly omitted by us. It should have read; For four weeks of 1865, 1296; and for *five* weeks of 1866, 1419.

In making a record of the extreme heat we scarcely know where to begin or where to end. In fact, the public has been so thoroughly posted up, it is almost unnecessary to recapitulate, except in a condensed form for future reference of such as are in the practice of preserving these reviews.

In the first place we find (according to *Pierce*) it has never been equalled except in the years 1793 and 1838, while during the many years of the accurate record kept at the Pennsylvania Hospital *it has not been equalled*. As thermometers vary in different localities at the same hour more than the trifling difference in the above exhibit, it is fair to infer that during the long period of *seventy-seven* years of which we have records in our possession (some *thirty-three* of which are our own), Philadelphia and its vicinity *has never before experienced such a term of intense heat*. J. M. E.

FRIENDS' SCHOOLS,

Located at the Southeast corner of Fourth and Green streets, under the care of a Committee of Green Street Preparative Meeting, will open on the first Second-day in Ninth month next. Primary School for Boys and Girls. Secondary School for same. Grammar School, for Girls only. These schools are free for the children of Friends belonging to Green Street Preparative Meeting. For particulars apply to

SPENCER ROBERTS, 421 N. Sixth St.
BEULAH A. ALLEN, 721 Green St.
EMILY H. ATKINSON, 543 N. Eleventh St.
SARAH T. RODGERS, 321 N. Eleventh St.
JOHN S. WRIGHT, 735 Green St.
GEORGE B. LIPPINCOTT, 455 Coates St.
MARGARET DECOU, 538 Marshall St.
ELIZABETH W. LIPPINCOTT, 538 N. Sixth St.
WILLIAM J. GILLINGHAM, 929 Randolph St.
LOUISA J. ROBERTS, 421 N. Sixth St.
SAMUEL GILLINGHAM, 616 Poplar St.
ELI DILLIN, 1218 Green St.

ITEMS.

THE PARIS EXHIBITION.—The exhibition building in the Camp de Mars in Paris, which covers about forty-eight acres, is more than half finished, and the laying out of the gardens around, which will comprise an extent of seventy-five acres, is already begun.

The terms of a treaty of peace between Prussia and Austria have been arranged.

The King of Italy has proclaimed a general amnesty to political exiles, which includes Mazzini, as well as others of lesser note. Napoleon is to cede Venetia direct to Italy. Prussia makes large territorial gains both from Bavaria and Darmstadt.

THE INDIANS.—Reports from Forts Sedgwick and Laramie confirm the burning of seven trains north of Fort Reno, and two between Laramie and Bridger's Ferry, besides other depredations by the Indians. Officers report their commands insufficient. Indian guides also report a battle at Fort Reno, in which from thirty-five to forty soldiers were killed. The 18th United States Infantry has been repulsed north of Fort Reno, and a whole train of emigrants are fleeing from the mountain valleys for safety. The Commissioner of Indian affairs has received a despatch from E. N. Wynkoop, who was sent from the Indian country for the purpose of investigating the outrages reported to have been committed by the Cheyennes in the Smoky Hill section. The chiefs stated that the dissatisfaction was principally caused by the proposed building of the Union Pacific Railroad through the Smoky Hill country, which formed their principal hunting grounds, though the failure

of the Government to furnish the annuities and goods promptly was another cause of dissatisfaction.

THE FREEDMEN.—The Secretary of the Treasury has received through the Department of State, within the last six months, contributions from citizens of Birmingham, England, amounting in the aggregate to over 9,000 in gold, which has been presented by them for the relief of the free race of this country. Besides these money contributions, a large amount of wearing apparel has been received from the same source, and used for the object designated. From the report of the Assistant Commissioner of the Freedmen's Bureau in the State of Kentucky, it appears that there are thirty schools for colored children in the State, with an average attendance of 2,328 scholars. The average pay of laborers is \$12 per month, with rations; in the tobacco district it averages from \$20 to \$30 per month. Crops, with the exception of wheat, will be greater than ever before.

"The Tennessee Colored State Convention met and organized in Nashville on the 6th inst., and was in session till the following Saturday, when it adjourned to reassemble at Knoxville on the first Monday in September. The subjects for discussion were agriculture, mining, manufactures and education. The proceedings were highly creditable to the members, and the presentation of statistics relating to the several counties was, if not complete, very satisfactory and business-like. It appears that the freedmen throughout the State are generally working the land for shares of the crop—from a half to two-thirds; comparatively few for wages. Mechanics make a good living. Considerable real estate is owned, but almost wholly in the cities.

Resolutions were passed—to send a memorial to the Legislature, asking such annual appropriation of public school funds as will secure the colored children of the State the advantage of a common school education; appointing a committee of statistics on this subject; rejoicing that nearly 300 colored persons are already in the State normal schools and in Northern colleges, fitting themselves for teachers; urging their right to vote, and be enrolled in the militia; asking Congress to grant Tennessee a republican form of government.

Just before the adjournment, General Fisk delivered a speech full of plain good sense and good advice to the convention. He exhorted them especially to build up their schools, and he would look after those who burnt them down.

The following is the estimate of rations for September for the States of Arkansas, Missouri and the Indian Territory: Whites (refugees), 35,000 rations; freed-people, 5,000 rations.

The last monthly report from Arkansas shows the number of persons to whom rations had been issued, as follows: Whites, 11,287; colored, 1,490. A large portion of the wheat crop in Arkansas has been destroyed by rust. In some districts, equal rights are accorded to colored and white, whilst in others the old state of things remain. Indications are favorable for a large cotton and corn crop.

General Fisk reports, for the quarter ending June 30, 1866, that there are 77 schools in Tennessee, directed by 183 teachers, and having an average attendance of 18,328 scholars, less than 2,000 of whom, have not got beyond the alphabet. A first-class graded high school is to be opened in Memphis next month."—*The Nation*.

A YOUNG WOMAN of experience wants a situation in a private school, or as Governess in a family. Address
J. M. W. C., Hockessin, Delaware.

FRIENDS SCHOOL, High St., West Chester, Pa.—This school, for both sexes, will reopen on 3d of Ninth month, 1866. For Circulars address

A Testimony From Grace Church St. Monthly Meeting of Friends, concerning JOHN BARCLAY, who died on the 11th of Fifth month, 1838, and his remains were interred at Winchmore Hill, Middlesex, on the 18th of the same.

Blessed are the pure in heart, for they shall see God.—MATT. v. 8.

This, our dear friend, was the son of Robert and Ann Barclay, and was born at Clapham, in Surrey, in the year 1797. His parents were members of our religious Society; his mother died whilst he was very young.

From his own memorandums we find that he was early visited with the convictions of divine grace; but becoming exposed to the influence of bad example at a public school, the sinful propensities of the natural mind were strengthened: yet the strivings of the Holy Spirit were graciously continued, and he was often brought into deep humiliation and sorrow on account of his transgressions; and his tears of repentance and his prayers for preservation were poured forth in secret places. In reference to the state of his mind at this time, he says,—“As the evil tree cannot but bring forth evil fruit, as long as it is suffered to live and and thrive in the heart; so this being the case with me, the fruits did show themselves abundantly indeed. Oh! that all who have been injured by my evil example could be shown a fiftieth part of the remorse and repentance, sorrow and trouble, which has been, through

unutterable mercy, experienced by me.” He was made willing to abide under the judgments of the Lord, and was favored to know, that these chastisements from his heavenly Father's hand were administered in love; in a sense of which, his heart was often made to overflow with thankfulness; and he was brought into a state of submission to the Lord's will, and humble dedication to his requiring. Alluding, some years afterwards, to the circumstances of this eventful period of his life, he writes thus: “This I may say and leave upon record, that though many almost indescribable temptations and presentations of evil have been permitted to come about me, sometimes like a mighty flood, so that in hours of extreme weakness I have been many and many a time ready to give up the ‘fight of faith;’ yet to this day the Lord, strong and mighty, has been pleased in his abundant compassion, to encamp around me, and to give me songs of deliverance, songs of triumph and of praise. In His name will I set up my banner; who is a rock of defence, and sure refuge to my poor weary soul. O! young man or young woman, to whom this may come,—my friend, my brother, my sister,—who art seeking the better country, and Him who is the way and the guide;—oh! though thou art weary and heavy laden,—take courage:—there is a staff, a stay, and strength and succor with Him and in Him, who hath gone before, and who leadeth on his little ones gently and sweetly, as they are able to follow. Take this as the counsel of one who

writes from a sure and living experience, and who hath indubitably known His name (which is above every name) to be a strong tower indeed. He will be with *His*, even to the end of the world."

His mind for several years after his father's decease, was brought under much concern on the subject of business; and he felt it to be his duty to give up an offer, which was considered to be very advantageous. In a retrospective view of this step, he says, in a letter, "I know not that I have taken any measure, that now in seasons of calmness seems to afford the like peace to me." Alluding to this subject again he adds, "The ground upon which I think it best for me to be not much engrossed with the things of this life is, that having experienced no small share of the forbearance and mercy of the Lord,—having been delivered from the pit of destruction,—having sincere, hearty, and very fervent desires for my own preservation and salvation, as well as for that of my poor fellow-creatures everywhere,—I have inclined towards the belief, that the Lord will make use of me, if I am faithful to his requirements, in the way, time, and for the purposes which he sees best: under this impression it is, and not to encourage or give way to any apathy, or want of energy or exertion, that I believe it right for me to sit loose to this world and the anxieties thereof; lest I should be incapacitated for performing that service, which may be shown to be my duty. I believe it safest for me, if in any business, that it should be one of moderate profit, and not involving much attention."

He believed himself required to observe much simplicity and moderation in providing the needful accommodations of life; and in reference to this subject, he says, "I am clearly of the belief, that it is my duty to live in such a humble, plain, homely, simple manner, as that neither in the furniture, food, or clothing used, any misapplication of the gifts of Divine Providence be admitted or encouraged."

About this time, which was in the twenty-second year of his age, he writes thus: "O! the love that the Lord hath shed abroad in my heart!—O! the divine joy, the unspeakable peace, the blessed presence of the Most High,—how it seems to flow through me, making up for all trials, and tears of disquietude and distress!—O! may this feeble testimony speak out His adorable mercy, when this poor frail flesh shall be laid low in the dust; may it induce others to fear Him that made the heavens and the earth, and to trust in Him for ever! praises to the Lamb that liveth yet was slain!—Amen."

Early in the year 1820, he believed it right for him to remove from the family circle, and to reside for a time at Poole in Dorsetshire;

and about the end of the same year, he was married to Georgina Hill. Their union was short, for in less than three years his dear companion was taken from him by death, at Marazion in Cornwall; whither they had removed for the benefit of her health.

His mind had for several years been impressed with an apprehension that he should be called to the work of the ministry; and in the prospect of it, he was preserved in a waiting, dependent state; and fervent was his concern to be entirely given up to serve the Lord in the way of His holy requirements. At the interment of his beloved wife, in the Sixth month, 1823, he was engaged in vocal supplication; and the autumn of that year he spoke as a minister. In allusion to this solemn and important work, after describing the fear and caution with which he had entered upon it, he says, "The weight and sweetness that dwelt on my mind after this surrender, cannot be set forth. O! how it rested on my spirit all the day in an unutterable manner! and yet such freedom of spirit,—so that nothing seemed a trial, or that to which I was unequal. I shall not easily forget how comfortable and at ease in my mind I felt. O! it was a heavenly feeling, and nothing short of Him that is in heaven could give it."

He was acknowledged a minister by his Friends in Cornwall in 1825, and in the following year was married to Mary Moates, and removed to Alton. After a residence of three years at that place, he settled at Croydon; and in 1835 he removed to Stoke Newington, within the compass of this Monthly Meeting, where he resided during the remainder of his life. In the course of the before-mentioned period, he paid several religious visits, with the unity of his Friends; and in one of these journeys he travelled into Scotland as far as Aberdeen.

He had been from his youth of a tender constitution, and for the last few years of his life he had suffered much from a disease in his knee, which rendered walking or other active exertion difficult to him. He was, however, very exemplary in his efforts to attend our religious meetings; in which the exercise of his dedicated spirit was strengthening to many. His engagements in the line of ministry amongst us were not frequent; but he was at times led to address his Friends in a weighty and feeling manner: endeavoring to turn their attention from a dependence on man, and from all that is superficial in religion, to a single reliance on the great Head of the Church, "the Minister of the sanctuary and of the true tabernacle, which the Lord pitched, and not man."

Our dear Friend was remarkable for integrity and uprightness of heart; and in the private walks of life his conduct was strikingly circumspect, and his conversation, whilst innocently

cheerful, was instructive, being seasoned with grace.

Notwithstanding he was, in the ordering of ussuring Wisdom, much confined at home from bodily infirmity, yet his concern for the prosperity of our Society remained unabated; and his mind was actively employed in endeavoring to promote the spiritual welfare of its members. With this object, his time was much occupied in editing a series of publications, selected from the writings of our honored predecessors in the religious profession.

In the Eleventh month, 1836, he paid an acceptable visit, in the love of the Gospel, to the families of Friends at Brighton; and in the Eleventh month, 1837, he felt attracted by the same precious influence, to a similar engagement in his own particular meeting of Stoke Newington. After going through nearly half the families, wherein his service was much to the comfort of his friends, finding his constitution increasingly enfeebled, he returned to the Monthly Meeting its minute granted him for that purpose, accompanying it with a letter, replete with the expression of religious concern, from which the following is extracted: 'On proceeding in the weighty engagement before me, I may acknowledge that although no wonderful outpouring of Divine Power was my portion, I was mercifully favored, during the few days that I entered upon the work, with such a sense that the Lord preserveth the simple and the upright, that it was as my meat and drink to be thus among my friends; hard things were made very easy, and bitter things full of sweetness; a gently flowing stream of heavenly goodness being extended in every hour of need, though in a way humiliating to the creature, and so as nothing of the flesh could glory.

His health continuing to decline, he went to Brighton; but there his indisposition increased, and on the 8th of the Fifth month; he was, by medical advice, removed to Tunbridge Wells; after which he survived but a few days.

On the evening of the 9th, when about to retire to rest, on rising from his chair, and leaning on the couch, and on the arm of his beloved wife, he supplicated thus; "O! gracious Father! if it please Thee, spare us to each other a little longer, and make us more entirely devoted to Thee, and thy precious cause of Truth in the earth; nevertheless not our will, O Lord! but thine be done."

On the next day, which was the one immediately preceeding his decease, he uttered many weighty expressions; amongst which were the following; "The Truth shall prevail.—Truth shall reign over all.—None that trust in the Lord shall be confounded; but they shall be as Mount Zion, which cannot be moved. Yea all know my desire to be preserved near the Lord—to be strengthened and

upheld by the Lord;—to be found in Him;—this is the way of peace.—I trust we shall be strengthened and animated to go through our day's work; then we shall find mercy at the hands of the Lord,—Let us look to the Lord for strength, at all times, and under all circumstances."

In the latter part of this day, his voice was lifted up in a constant melody, and for many hours together, like a song of praise; during which, these words were clearly distinguished "O Lord!—dear Lord!—come.—I bless the Lord.—I am the Lord's for ever.—Cleave to Him, O! cleave to Him,—love Him with all your heart." The name of Jesus was often to be heard, and the word Hallelujah was frequently repeated.

About four o'clock in the afternoon of the 11th of Fifth month, 1838, he peacefully passed away, aged forty-one years, a minister about fifteen years; and is, we reverently trust, united to the redeemed before the throne, who sing the new song, "Worthy is the Lamb, that was slain to receive power, and wisdom and riches, and strength, and honor, and glory, and blessing."

Given forth by our Monthly Meeting, held at White Hart Court, Gracechurch Street, the 10th of Tenth month, 1838, and signed by—

[Here follow the signatures of men and women Friends.]

Read and approved in our Quarterly Meeting for London and Middlesex, held in London, this 25th day of the Twelfth month, 1838, and in and on behalf thereof signed by

GEORGE STACEY, Clerk.

Signed in and on behalf of the Women's Quarterly Meeting, by

MARY FORSTER, Clerk.

THE TESTIMONY OF THE LORD'S PRIESTS.

My covenant was with him of life and peace; and I gave them to him for the fear wherewith he feared me, and was afraid before my name. The law of truth was in his mouth, and iniquity was not found in his lips; he walked with me in peace and equity, and did turn many away from iniquity. For the priest's lips should keep knowledge, and they should seek the law at his mouth; for he is the messenger of the Lord of Hosts.—Malachi ii. 5, 6, 7.

Extract.

THE POWER OF FAITH.

BY F. W. E.

Men tremble at new theories, new views, the spread of infidelity; and they think to fortify themselves against these by multiplying the sanctities which they reverence. But all this will not do. Superstition cannot do the work of faith, and give repose or peace. It is not by

multiplying ceremonies,—it is not by speaking of holy things low, with bated breath,—it is not by intrenching the soul behind the infallibility of the church, or the infallibility of the words and sentences of a book,—it is not by shutting out inquiry, and resenting every investigation as profane, that you can arrest the progress of infidelity. Faith, not superstition, is the remedy. There is a grand fearlessness in Faith. He who in his heart of hearts reverences the Good, the True, the Holy—that is, reverences God, does not tremble at the apparent success of attacks upon the outworks of his faith. They may shake those who rested on those outworks; they do not move him whose soul reposes on the Truth itself. He needs no props or crutches to support his faith. He does not need to multiply the objects of his awe, in order to keep dreadful doubt away. Founded on a rock, Faith can afford to gaze undismayed at the approaches of Infidelity.

EXTRACT FROM A PRIVATE LETTER.

S.S., Md., 8th mo. 25th, 1866.

—, I am so much pleased with the two communications in the "Intelligencer" of this date, in relation to the administration of discipline with "those of our members who have borne arms, or otherwise participated in warlike measures," that I am induced to send thee the report of a committee of our Monthly Meeting upon the same subject, showing a similarity of concern and mode of proceeding, in the different parts of our Zion, on this most interesting and important Testimony of our religious Society. If, on reading it, thou shalt think *any good* would arise therefrom, thou art at liberty to have it published in the Intelligencer. The effect of the proceedings of the committee has been very salutary in our meetings; not one feeling was estranged, and the Testimony appears to be held in higher appreciation by many, who had not previously, as they stated, had the subject so fully presented to their consideration.

B. H.

TO THE MALE MEMBERS OF SANDY SPRING MONTHLY MEETING.

The committee appointed by our last Monthly Meeting, in accordance with the directions of the late Yearly Meeting, in relation to our testimonies against war and military services have embodied what they desired to communicate to you upon the subject in the following address, to which they affectionately invite your careful attention and deliberate consideration:

When the early Friends—those bright suns of the morning—were gathered to form a religious association, the great fundamental principle from which their various important religious Testimonies sprung, was the Divine Life or Spirit of God in their souls, flowing out

into love, kindness and charity to the whole family of man. This holy Spirit, which is the wisdom of God and the power of God, both illuminated their understandings to discern Truth, and imparted to them ability to fulfil all its requirements. It led them into the strictest observance of moderation, temperance, justice, patience, resignation to the Divine will, fortitude, mercy, love, kindness, charity, truth, purity and holiness; and consequently preserved them from talebearing, detraction, war, strife, contention, slavery, as its evils became manifest, and all kinds of oppression, and whatever could hurt or destroy.

Joined into a religious Association by the bond of these precious and noble Christian principles and testimonies, with a consequent concern to extend mutual care over each other, and to help bear one another's burdens, certain rights and privileges became attached to the individual members, *such as*, that the poor should have all needed attention and assistance; their children be freely educated and properly cared for; any members in difficulty should receive all necessary aid; and those who remove from one branch of the organization to another, should be furnished with certificates, which entitled them to the care, kindness and attention, as well as all the rights and privileges, of those among whom their lots might be cast.

In a travail of concern for their offspring, these outward benefits of religious association were extended to *them*; and the *children of Friends* were admitted to the rights and privileges of membership, which were called "birth-rights," and included a claim and demand on society for every thing they needed which the parent was unable to bestow; *so that*, in case the parents were deceased or pecuniarily unable, the children, at the expense of the Society, were to be carefully and liberally provided for, be educated; taught a trade, or some occupation by which they could earn an honest livelihood; and all Friends' children to have the mantle of the Society thrown around them for their help, preservation and protection, bodily and spiritually, with all the rights and privileges of older members.

While all the members of the Association were actuated by the precious influence which first drew them together—the overflowing of the love of God in their hearts, and the light and power of the Holy Spirit, obeyed in humility and meekness—nothing further was needed for the health, government and support of the organization. They felt that "one was their Master, even Christ, and all they were brethren," dwelling in obedience to His manifested will, in harmony, peace and love.

But all "birth-right members" could not be expected to have experienced a re-generation of heart; and some others might not have known

this great work to be *fully* accomplished in themselves, or might have experienced a subsequent falling away therefrom, in consequence of which a code of discipline was deemed necessary as an outward law, to the rules of which the members who are admitted to the rights and privileges of the Society were expected to conform, in the hope and belief that it would be a protecting hedge about them, and ultimately prove as a school-master leading to Christ. Among the most important testimonies to which practical conformity was expected to be observed was that *against war*, which, in its very nature, and in every feature, is directly opposed to the great fundamental principle of the profession, which breathes "Glory to God in the highest: on earth, peace: good will to men." Every thing, therefore, which, in any manner tended to promote, encourage or uphold war, has, from the very origin of the Society, been earnestly and affectionately remonstrated against as being detrimental to the highest spiritual interests of the members, and in direct opposition to the precepts and commands of the holy Jesus.

Now, we are the inheritors of the labors, the sacrifices, and the purchases made by the blood of many of our worthy and faithful ancestors and predecessors. And we trust the same views and feelings that animated our early Friends upon this most interesting and important subject, are still the concern of Society, if not fully participated in by all the members. In evidence of this, we make the following extracts from an address, to its members, issued by the Meeting for Sufferings, which represents Baltimore Yearly Meeting, under a deep religious concern upon the subject, in the Ninth month, 1861.

"Let all [our members] be vigilant in the maintenance of our peaceable principles, not only by avoiding any practical participation in whatever is contrary thereto, but by preserving *our hearts, in the spirit of peace and love to the whole family of men*. All are our brethren, the children of one common Parent, whom we are allowed the great privilege of addressing as Father; and if we truly love *Him*, as we are commanded to do, 'with all our heart, with all soul, and with all our might,' we will necessarily love *all His children*, and be able to ascribe 'Glory to Him in the highest, peace on earth, and good will to men.'

"Let us keep ever in mind that the *practical ground-work* of our profession—the *speciality* in the operation of our religious principles, is *love*, universal love, love to God, and love to all men. With this as the foundation principle, if it is only preserved in healthful activity, as we greatly desire it may be in all, (our members), there can be no party feeling, no strife, no contention, no cruelty, no oppression, no unkind-

ness of any kind, 'nothing that can hurt or destroy.'

"In accordance with this principle, it is our duty to be good, quiet, peaceable citizens, under whatever civil government is established over us; obeying, cheerfully and faithfully all laws with which we can conscientiously comply; and when we cannot, consistently with what we sincerely believe to be our duty to our God, obey any laws that may be passed, never, in any way, clandestinely evade or actively oppose them, but meekly and patiently submit to whatever penalty may be imposed for non compliance therewith, even unto death—the laws of God being fearlessly held paramount to the laws of man.

"This state of willingness to suffer all things patiently, for Christ's sake, which is the highest Christian attainment, cannot be gained in our own wills and maintained in our own strength, but must be the work of deep prostration of soul and dedication of heart to God, who, in his adorable love and mercy, will then empower the heart in strict sincerity to say, 'Not my will, but thine, O God! in all things, be done.' To this happy and elevated condition of mind, we greatly desire all our members to attain. Then shall we be enabled to stand firm in our innocence and Christian dignity, feeling no fear of what man can do to us, but fully assured that He that is with us, is greater than he that is in the world.'

"Our religious testimony, upon which is based our unwillingness to take up arms against the lives of our fellow-creatures, arises from no disposition to be disobedient or disloyal to those in authority, nor from any fear of death or personal suffering—far from it; but from a fear of offending our God, whose express commands we feel that we should thereby break. 'God is love,' and we believe it is His express command and will that all his rational children should continually dwell in love; and so far from doing any thing that might injure, maim or kill a fellow-creature, that we should love even our enemies, and, if need be, pour in the oil and wine to soothe and heal those whose feelings might be hostile to us. The command of Christ, which, as His followers, we should feel it incumbent upon us to obey, is 'Love your enemies; bless them that curse you; do good to them that hate you; and pray for them that despitefully use you and persecute you.'

"Whilst, for fear of offending the great Author of our being, we thus cannot take up arms against our fellow-creatures, let us be mild, meek and patient towards any who may urge us thereto; and, if they should even abuse us and induce personal suffering, still, in the conscious innocence of our hearts, and integrity of purpose, let our prayers be, 'Father, forgive them, they do not what they do.'

"The testimony of our religious Society

against war, and every thing connected therewith is co-eval with its existence as a religious association, and has been steadily maintained at all times and under all governments wherever the Society has existed; and, although in periods of excitement some of our members have occasionally forsaken our peaceable principles and engaged in military strife, such conduct has invariably been testified against by the Society, and its authors regarded as not in religious fellowship with us. And we therefore most earnestly and affectionately caution all our members, and especially the precious young men, to take no part whatever on either side in the deplorable strife which now so unhappily exists, nor be drawn away into a violation of this, our ancient and important Christian testimony, by any appearance and pretext, however plausible; but endeavor to abide firmly and constantly under the feeling of universal love, and at peace with all men; so shall the blessing of the Most High rest upon us, and we shall be accounted worthy when done with time here, be this sooner or later—be it in the natural course of things or as martyrs for Christ's sake, to have our names written in the Lamb's Book of Life and to be received with the faithful of all ages, 'the general assembly and Church of the First-Born,' into the mansions of eternal rest and peace."

Now, a religious organization, in return for the rights and privileges it confers, has a claim on its members for their observance of its disciplinary requirements. In the year 1862, our Yearly Meeting issued the following Minute, which seems particularly appropriate to the present occasion, both in this respect and in relation to the mode of treating with those who fail to conform thereto:

"A renewed and deep concern was felt, that, in the administration of our Discipline, Monthly Meetings and their officers, may humbly and diligently seek for Divine direction and aid, and to be clothed with the spirit of charity, and restoring love, in their proceedings towards those who deviate from our order, remembering that it is the *healthful condition of the heart* and the *eternal interests of the soul* which are the great objects of labor and care of a religious organization over its constituent members. Also, while we feel this tender care and concern, that the Discipline may be administered in the Spirit of the Gospel of Christ, the nature of which is to produce peace on earth, good will to men, and to seek the restoration and true welfare of any who may unhappily stray from the path of rectitude, it is most *affectionately* and *earnestly* urged upon all our members, that they exercise continued vigilance, particularly in this time of unusual temptation and trial, to give no cause of uneasiness or complaint; but to be good examples of uprightness

and integrity, and to observe a most scrupulous watchfulness to avoid every infraction of the clear provisions of our Discipline. By this means, and this alone, can Friends, as an organized body, remain a harmonious, consistent and united people. Even in a case where a member might not clearly see the propriety of some provision of our Discipline, the observance of it would still be a small sacrifice in return for the many rights and privileges he enjoys from his membership. The exemption from taking oaths, to those who regard this as against the command of the Divine Master—the having of a place, *as of right*, at which to assemble with others for Divine worship and to bury his dead—in case of his removal to another neighborhood, his immediate admission to equal privileges with the resident members at any meeting to which he takes a certificate—the *home* he has in any Friend's family, wherever his lot may be cast; and in case he should unhappily be overtaken with helplessness and poverty, the security he possesses of all needed assistance and affectionate care, as well as the education of his children by the Society of which he is a member, are *rights and privileges*, for which the sacrifice of a little convenience and individual opinion, where no principle (against it) is involved, may well and justly be made to the religious organization which confers them."

Still, under a deep religious exercise and concern for the tender care, protection and welfare of its members, our last Yearly Meeting, upon the recommendation of an unusually large committee, issued the following Minute and directions for the observance of its constituent Monthly Meetings:

"During the dreadful civil war through which the nation has just passed, the members of our Society have been subjected to a severe test of their peaceable principles, and some, we fear, have forgotten their allegiance to that higher Power, to whom we owe unreserved obedience.

"In consideration of the extraordinary circumstances in which Friends (of this Yearly Meeting) have been placed, we recommend, that in regard to past offences in the violation of our testimonies against war and military services, a lenient course should be pursued." The Yearly Meeting therefore directs "Monthly Meetings to appoint committees of judicious Friends, to whom voluntary acknowledgments may be made; and when such verbal acknowledgments are satisfactory to the committee, they may be accepted, without recording the names of the individuals to the Monthly Meeting.

"Voluntary acknowledgments may also be made in the Monthly Meeting, and accepted, if satisfactory, without recording the names of the parties.

"In cases where the labors of the committee are ineffectual, the names of the individuals should be reported to the Monthly Meetings.

"In regard to the purchase and holding of government bonds, and the payment of certain taxes, by some called war taxes, there appears to be a difference of sentiment among Friends, and we recommend that each individual be left, in these matters, to follow his own religious convictions, trusting that the dictates of an enlightened conscience may be observed, and that Friends will be charitable in judging of the conduct of others.

"The bearing of arms, the practice of military exercises, and the paying of money in lieu of personal services, we regard as violations of our testimony against war; and those of our members who deviate in either of these particulars are to be tenderly dealt with, and, if they cannot be brought to a sense of their error they are to be disowned."

Now, in pursuance of the foregoing directions of the Yearly Meeting, our Monthly Meeting has appointed us to endeavor to carry out these views of the Yearly Meeting, and particularly where it further earnestly encourages Monthly Meetings, while they give "evidence of a desire to be tender towards all who have been drawn to violate our testimonies against war, to be [still] faithful in the maintenance of our sublime principles and testimonies in favor of universal peace and love."

It is not in harmony with the views and feelings of the committee to make search or inquiry in regard to the conduct of the members of our Monthly Meeting in the particulars alluded to; and we have not the information in our possession. At the same time it is our earnest desire to perform faithfully the duty placed upon us by the Monthly Meeting. After mature and deep deliberation, we have come to the conclusion, that this could best be done, by having a personal interview, as far as practicable, with all the male members of our Monthly Meeting, who are of sufficient age, in a feeling of kindness and affection, and presenting the foregoing views and facts to them. Then, if they can feel and acknowledge a unity with their general import; a regard for the characteristic and important testimony of our religious Society against war, with a desire to conform their future lives thereto and to uphold the principles of peace and love, and a regret for the circumstances that have led to any infringement or violation of our Discipline, so far as these may have occurred with any; all of which, we hope and trust, our members can conscientiously and willingly do, it appears to be the extent to which the labors of the Committee are required and the accomplishment of the objects contemplated by the Monthly and Yearly Meetings.

It is not pretended, that the Committee lay

claim to any superiority over their fellow members. We trust we are brethren, and disposed, you as well as we, to fulfil the offices of brethren, by watching over one another for good, strengthening and lending a helping hand to the weak, and endeavoring to uphold the organization of our beloved Society. It was with no small reluctance we accepted our present appointment. We foresaw it would impose upon us arduous and unprecedented duties. But, in obedience to the instructions of the Yearly Meeting, the labor had to be performed by some of our members, and, as we were selected, we did not feel at liberty to decline the service. And it is our abiding desire and concern, that through Divine favor, we may be led to do no harm in our present engagement, but, in true Gospel love, to invite all to come under the influence of the Divine Spirit, which will gather and preserve from all war, strife, and contention, and every other evil, and into love, kindness and charity, in which all will labor "to maintain the unity of the Spirit, in the Bond of Peace."

Signed,

BENJ'N HALLOWELL,	} Committee of the Monthly Meeting.
EDWARD THOMAS,	
HENRY STABLER,	

SANDY SPRING, MD., 1 mo. 14th, 1866.

The Committee reported to the Monthly Meeting in the Second month, last, that they believed they had been enabled to accomplish, satisfactorily, all that was contemplated by their appointment, having had a personal interview with all the male members who were of sufficient age, except, perhaps, some three or four of the oldest, in regard to whom there appeared to be no occasion, during which the preceding address was deliberately read, which was favorably received, and its import united with in all cases, so that no feeling was estranged, but all our members seemed drawn closer together in the kindness and affection of a common brotherhood by the care and concern of the Meeting for their welfare.

For Friends' Intelligencer.

TO PARENTS AND OTHERS.

I feel willing to ease my mind of a burden that has long rested upon it, on the subject of the guarded education of the youth. I desire that when the solemn inquiry is made, "What has become of those tender lambs committed to thy care;" we may each answer, I have done the best in my power to keep them from harm.

I feel it my duty to say, that if mothers would take but half the time in teaching their young children themselves, that they now take to dress and fit them for school, they would improve nearly as fast as they do in the present manner. The children would thus be under the care of one of the tenderest of teachers—a pious mother. Who can estimate the blessing

of a religious father and mother? Surely, of earthly blessings, it is the greatest.

The aspirations of my soul are, that we may so live that in the end we may receive the joyful welcome, enter into the mansions of bliss in the presence of thy Lord; and that the tender lambs may be preserved from the contaminating influence of the vain and fleeting things of time. I believe, if there is not more zeal for the cause of Truth manifested, this nation will be flooded with, and ruled over by wickedness, and the just judgments of the Lord will come upon us for disobedience. Oh may these things be laid to heart, for great is the responsibility of those of the present generation.

That we may close in with redeeming love, whilst our day of visitation lasts, is the sincere prayer of your friend,
FERRIS POWELL,
 Bernhards Bay, O. age Co., 8 mo. 3d, 1866.

FRIENDS' INTELLIGENCER.

PHILADELPHIA, NINTH MONTH 8, 1866.

SOCIETY FOR THE PREVENTION OF CRUELTY TO ANIMALS.—The New York Daily *Tribune* of Eighth month 8d, gives a lengthy and interesting account of the establishment, in that city, of the "American Society for the prevention of cruelty to animals." It appears from the account, that a similar society has, for nearly fifty years, been in existence in England, and that great success has attended its action, resulting in the enactment of statutes by the British Legislature, relative to the treatment of animals. The influence of this association has gradually extended over other portions of the globe, and similar societies have been formed in France, Prussia, Russia, all over Germany, in Africa and Asia, and we can readily believe that wherever such a remonstrance against cruelty and oppression is raised, the effect will be beneficial.

As we are so greatly indebted to the brute creation, it might reasonably be inferred that self-interest alone would induce us to treat them with kindness and consideration; but facts do not always sustain this inference. Some even, who are benevolently inclined, are less thoughtful and careful of the dumb, patient creatures, who labor and suffer, for their advantage, than the principles of justice and mercy would enforce. There are so many ways in which they may be oppressed and needlessly made to suffer, that, until the attention is turned to the subject, and the mind comes to regard them as a part of

the economy of Providence, placed by circumstances under our control, and for whose comfort and happiness we are responsible, we cannot exercise proper consideration. Not only by flagrant acts of cruelty, which receive the condemnation of all humane persons, are these dumb creatures made to suffer, but often those who are kindly disposed toward them, from thoughtlessness, or a desire to accommodate their human friends, impose grievous burdens upon them, by loading vehicles to their full capacity, and making one horse do the duty of two, forgetful that such generosity is exercised at the expense of a poor brute, who, if he could speak for himself, would surely remonstrate.

"When we love the Lord with all our hearts, and his creatures in his love, we are then preserved in tenderness, both toward mankind and the animal creation," said the meek and exemplary John Woolman. Again he records the same idea in the following language: "He, whose tender mercies are over all his works, hath placed a principle in every mind, which incites to exercise goodness towards every living creature; and this being singly attended to, people become tender-hearted and sympathizing; but being frequently and totally rejected, the mind becomes shut up in a contrary disposition. We are told in Scripture that 'a righteous man regardeth the life of his beast,' and the Holy Jesus, when enumerating the different states which would receive the Divine approval, impressively declares, 'Blessed are the merciful, for they shall obtain mercy.'"

The society, to which we have alluded above, was established in the early part of the present year, and the amount of good already achieved has proved the necessity for its existence. The mode of operation is that pursued in England; to circulate tracts and circulars among persons intrusted with the care and handling of animals; the introduction into schools, by books or otherwise, of principles of humanity, calculated to impress the rising generation, frequent appeals to the public through the press, and the vigorous co-operation of the police department.

It was probably, owing to the efforts of this society, that the New York Legislature, at its session of 1866, passed several acts for the prevention of cruelty to animals, of which the following are some of the leading features:

"Every person who shall, by his act or neglect, maliciously kill, maim, wound, injure, torture or cruelly beat, any horse, mule, ox, cattle, sheep or other animal belonging to himself, or another, shall be adjudged guilty of a misdemeanor, and upon conviction, punished by fine or imprisonment, or both."

The "Act for the preservation of the health of animals for human food," provides, "No railroad company shall, in transporting cattle, sheep or swine, confine them in cars for a longer period than twenty-four consecutive hours, without unloading for rest, water and food, and for a period of at least ten consecutive hours, and shall not receive or re-load any such animals from another railroad, that have not been rested at least ten consecutive hours preceding such loading, and been watered and fed within the time. The penalty for every violation is \$100." The board of health has issued regulations, "That no cattle shall be placed or carried while bound or tied by their legs, or bound down by their neck, in any vehicle, in any city or village of said district; but shall be allowed freely to stand in such vehicle when transported, or while being therein." In regard to the labors of this association, the *Tribune* says:

"Many opportunities for the exercise of our benevolent society's authority are still to be found in our markets, although the evil has already been mitigated in a great measure. Butcher's carts are still to be seen crammed with numbers of hot, steaming, live calves and sheep, tied by the feet and tumbled carelessly in, one on top of another, their large, sweet eyes and docile countenances written over with that expression of patient agony which painfully haunts the benevolent witness for hours afterward. One would think that if we must have the lives of these innocent and beautiful creatures for our sustenance, we should take them as painlessly as possible, and in some measure disguise to the poor brutes the shambles where they must die, instead of leading them wretched and reeking to the block. The chickens and other poultry have also, in another respect, a claim upon the sympathy of the benevolent. The customary manner of carrying them from market—grasping the legs, with the heads hanging down—is thoughtlessly cruel. In this position, they, of course, experience the same rush

of blood in the head which would happen to a human being, under similar circumstances; but far more protracted suffering, inasmuch as the fowls, from their length and flexibility of neck, are enabled to partially lift their heads, and thus prolong their own pain."

The humane oversight of this society is exercised on behalf of dogs, rabbits, squirrels, birds, fishes, lobsters and every animal with which man comes in contact.

In looking over an old volume of the *Intelligencer*, we find part of the testimony of Grace Church Street Meeting, in reference to John Barclay. From some cause, not remembered, the latter part, equally interesting, appears to have been omitted. We, therefore, as an introduction to future extracts, which we propose making, give the whole as the leading article in the number of this week.

The extract from a private letter will introduce to our readers an address of Sandy Spring Monthly Meeting, and we trust that the writer will excuse our using it without first asking the liberty.—EDS.

PHILA., 8th mo. 31st, 1866.

"When the Divine Judge shall summon us to appear before our conscience at the end of our brief journey here below, our modesty, our weakness, will not be an excuse for our inaction. It will be of no avail to reply, 'we were nothing, we could do nothing, we were but as a grain of sand.' He will say, 'I placed before you, in your day, the two scales of a beam, by which the destiny of the human race was weighed; in the one was good, and in the other was evil. You were but a grain of sand, no doubt; but who told you that that grain of sand would not have caused the balance to incline on my side? You have intelligence to see, a conscience to decide, and you should have placed this grain of sand in one or the other. You did neither. Let the wind drift it away; it has not been of

any use to you or your brethern.'"—*Lamar-tine.*

REFLECTIONS ON EXODUS III: 14.

BY BISHOP BEVERIDGE.

When the Lord speaks of himself with regard to His people, He saith—I AM. He doth not say I am their Light, their Life, their Guide, their Strength, their Tower; but only, I AM. He sets His hand, as it were, to a blank, that His people may write under it what they please, that is for their good. As if He should say, are they weak? I am Strength. Are they in trouble? I am comfort. Are they poor? I am riches. Are they sick? I am health. Are they dying? I am life. Have they nothing? I am all things. I am Justice and Mercy; I am Grace and Goodness; I am Glory, Beauty, Holiness, Perfection, All-Sufficiency, Eternity, JEHOVAH—I am whatsoever is suitable to their nature, or convenient for them in their several conditions. Whatsoever is good and needful to make them happy, that I am. So that, in short, God here represents Himself unto us as one universal Good, and leaves us to make the application to ourselves, according to our several wants, capacities and desires, by saying only in general, I AM.—*Leaflets for letters, (Miscellaneous, No. 46) Dublin Tract Repository.*

THE SUNDAY AT HOME.

(Continued from page 407.)

Much as I think the Sunday School capable of accomplishing, there grows in me the conviction that it has had a direct and largely injurious effect upon religious training in our homes, and, from being a supplement, has ended in supplanting the teaching of home.

The home should be the Sunday school of the child. It used to be so; but no one can doubt that, since the prevalence of this institution, there has been a marked decay in the religious instruction of home,—even very conscientious and careful parents delegating this task. I think it is a pity that the Sunday school ever departed from its original mission to the poor, the ignorant and degraded. It has a work and a place among them; it supplies what they could not otherwise obtain. It is not so with us. We are capable of teaching our children—any one of us. That is one of the things we ought not to allow any other to do for us; that is one of the things for which Sunday was given to the home; virtually, that is one of the things we engaged to do when God intrusted to our keeping the immortal spirits of our children; and through all discouragement, defeat and failure, we are to toil at it, till, by experiment and the blessing of God, we have arrived at the ability to meet and discharge our obligation.

Above and before all others ought the parent to be the religious teacher of the child. In the days before the Sunday school it was so. There was a general catechizing now and then by the minister, but the work was done in the home, and any one who knows anything about it, knows that we of the present generation are much better versed in Scripture, in doctrine and duty, than are they of the rising generation. And yet we had no advantage of Sunday schools,—no teachers, no libraries, no general lessons,—but only the humble efforts, often of humble parents, teaching from the one book, and enforcing, by example, what they taught.

The best, the truest, the deepest lessons we have learned have been from the simple, but earnest teachings of our homes. The fault of to-day's degeneracy lies with our homes; not that they have deliberately and of set purpose given up their duty; but, finding the Sunday school recognized, and the custom of sending children established, unconsciously they have surrendered a duty they ought sacredly to have kept. Go through the Sunday schools and question the classes, and you will be amazed at the universal ignorance of things which ought to have been taught by mothers in the nursery. Go into homes, and you will find parents satisfied with seeing that the lessons are got,—not all doing even that,—while about the lesson or about any serious topic there is no conversation and no interest. The Bible is a sealed book in our homes,—a *show* book merely, sometimes,—and all the religious knowledge the child receives comes from the Sunday school, from a teacher oftentimes wholly inadequate to the task; or, however adequate to the mere work of instruction, never able to take the place or discharge the duties of a parent. I know there is a semblance of treason in this; but while I own all the Sunday school has done, and see more that it may do, I believe it has, unwittingly, inflicted an injury upon our homes; nor do I see any good reason for supposing they will return to their duty so long as the Sunday school shall occupy the position, and offer to do the work that it does. If I should carry out my idea, instead of the Sunday school as it is, I would have a children service, and leave the direct teaching of the day to the homes. Perhaps this will be when homes are what they should be.

The instruction of the home should not be merely formal, from the book, nor of the character of a school task, but every way genial. There is no fear that in making the subject interesting you shall destroy its vitality, as some seem to think, while "you do a very dangerous thing when you make that wearisome which you wish to be most loved." I can recall the days when I had no home,—when the Sabbath was long, monotonous, wearisome, and I used to be

shut up by myself through the long summer morning, with Watt's hymns in my hand, and the craving for outdoors in my heart. I can hear now the very buzzing of the flies in that, my Sunday prison. I am afraid I profited poorly by those weekly incarcerations, for I never could master Watt's hymns. When I went home it was early summer, and my father's house was just beneath the old Christ Church, in Boston, and our Sunday lessons were with our mother, on the grass plot in the yard, less a lesson of books than of talk.

That is the way home should teach—so as to leave a joy behind,—not so much by the book as from what the book has already taught the parent heart,—not from the Bible merely, but from the page of that other revelation nature makes,—not from these only, but from history, from your and your children's experience, from all the myriad suggestions that come from time to time, and that flow from you in the confidence of Sunday intercourse.

This will not be easy. Nothing of real benefit is. No item of parental responsibility is to be met off-hand. This is a thing for thought, for prayer, for preparation, for experiment. Yet it is a thing that every father and every mother can do and ought to do. Deliberately should the Sunday teaching of the children be prepared for. It should have some plan and be thoroughly done. How you shall best reach your children, patience and time and your parent tact will show. All have not the same gift, but all have some gift. Some will succeed best in one way, some in another. One parent has this gift and another has that; one child has this want, and the other that. Never weary with the sameness of your teaching, or the length of your exercise, but consult the limits and the laws of the child-nature in all things.

Do you say that this is demanding too much, that which is possible only to the few of leisure, of ability, or of wealth? I reply, that the facts, as they may be gathered from many a New England home, are against you. I ask only what every parent may do, has the time and means, and ought to have the ability and the willingness to do.

If you do not know anything about religion, and do not care anything about it, or if you care so little as to be unwilling to make the sacrifice and the exertion necessary, that is one thing; but you never heard of a poor, simple-minded man or woman, whose heart was right, and who followed the simple leadings of nature, who failed to make truth pleasant, and palatable, and profitable.

There is not, in all the range of all the libraries, such a series of narratives as crowds the pages of the Bible, and narrative is the craving of the young-at child, and no narratives so much interest children as those of the Old and New

Testament. You may not succeed the first time, or the second, nor do you in anything; but you will soon find your children come to you, saying, "Tell us something more from the Bible;" and you will find that the *telling* is better for them than the *reading*, relieving the narrative of its antiquated forms of speech, and giving a certain air of reality to the circumstances, as well as a feeling of greater liberty to question. This is for the younger a fertile and inexhaustible field, opening up treasures of wisdom and wonder. Advancing years may require other culture; but for that your own advancing experience qualifies. Keeping step with your children's progress, you may always be companion and fellow pupil at least; indeed, the wisest of us always finds himself these; and so these home talks with the children react upon ourselves, and redound to our own good.

There are, beside, a multitude of topics for the home Sunday. There are matters of outside interest and benevolence; no dearth at all, but a myriad subjects and a myriad helps, starting up always about those in earnest, unknown, unguessed by the indifferent; a Divine hand ever leading the way and pointing to the parent heart the manner of leading the tender spirit on. Never fear but God will show you how, when you earnestly undertake.

(To be continued.)

EXTRACTS FROM "SELF-HELP."

It was scarcely to have been expected, that one of the most difficult and apparently impossible of things, the reclamation of criminals, should have been not only attempted, but accomplished, by a man working for weekly wages in a foundry! Yet this work was done by Thomas Wright when employed with the Messrs Ormerod, at Manchester. Accident first directed his attention to the difficulty encountered by liberated convicts in returning to habits of honest industry. His mind was possessed by the subject; and to remedy the evil became the purpose of his life. He did not neglect his work, for he honorably performed his duties as a foundry-man, and his working and business qualities were so highly prized by his employers that he was gradually raised to the post of foreman of his shop. Nor did he neglect his family, for, upon comparatively small means, he respectably brought up a large family. Though he worked from "six in the morning till six at night, still there were leisure minutes that he could call his own,—more especially his Sundays,—and these he employed in the service of convicted criminals; a class then far more neglected than they are now. But a few minutes a day, well employed, can effect a great deal; and it will scarcely be credited, that in ten years this working man, by steadfastly holding to his purpose, succeeded in rescuing not fewer

than three hundred felons from continuance in a life of villainy ! He came to be regarded as the moral physician of the Manchester Old Bailey ; and when the Chaplain and all others failed, Thomas Wright often succeeded. Children he thus restored, healed, to their parents ; sons and daughters otherwise lost to their homes ; and many a returned convict did he contrive to settle down to honest and industrious pursuits. The task was by no means easy. It required money, time, prudence, and above all, character, and the confidence which character invariably inspires. The most remarkable circumstance of all is, that Wright relieved many of these poor outcasts out of the comparatively small wages earned by him at foundry work. He did all this on an income which did not average, during his working career, 100*l.* per annum ; and yet while he was able to bestow substantial aid on criminals, to whom he owed no more than the service of kindness which every human being owes to another, he also maintained his own family in comfort, and was, by frugality and carefulness, enabled to lay by a store of savings against his approaching old age. Every week he apportioned his income with deliberate care ; so much for the indispensable necessities of food and clothing, so much for the landlord, so much for the schoolmaster, so much for the poor and needy ; and the lines of distribution were resolutely observed. By such means did this humble workman pursue his great work, with the results we have so briefly described. His career affords one of the most remarkable and striking illustrations of the force of purpose in a man, of the might of small means carefully and sedulously applied, and, above all, of the power which an energetic and upright character invariably exercises upon the lives and conduct of others.

There is no discredit, but honor, in every right walk of industry, whether it be in tilling the ground, making tools, weaving fabrics, or selling the products behind a counter. A youth may handle a yard-stick, or measure a piece of ribbon ; and there will be no discredit in doing so unless he allows his mind to have no higher range than the stick and ribbon ; to be as short as the one, and as narrow as the other. " Let not those blush who *have*," said Fuller, " but those who *have not* a lawful calling." And Bishop Hall said, " Sweet is the destiny of all trades whether of the brow or of the mind." Men who have raised themselves from a humble calling, need not be ashamed, but rather ought to be proud of the difficulties they have surmounted. The laborer on his feet stands higher than the nobleman on his knees. An American President, when asked what was his coat of arms, remembering that he had been a hewer of wood in his youth, replied, " A pair of shirt-

sleeves." Lord Tenderden was proud to point out to his son the shop in which his father had shaved for a penny. A French doctor once taunted Flechier, Bishop of Nismes, who had been a tallow-chandler in his youth, with the meanness of his origin, to which Flechier replied, " If you had been born in the same condition that I was, you would still have been but a maker of candles." Some small spirits, ashamed of their origin are always striving to conceal it, and by the efforts they make to do so, betray themselves ; like that worthy but stupid Yorkshire dyer, who, having gained his money by honest chimney sweeping, and feeling ashamed of chimneys, built his house without one, sending all his smoke into the shaft of his dye works. The benevolent Sir Thomas Bernard, one of the best practical philanthropists of his day, in his " Tracts for bettering the condition of the poor," makes honorable mention of " a very intelligent and valuable man, David Porter, a master chimney-sweep in Welbeck Street, who is another good illustration of the force of diligence and well-doing. In early boyhood Porter was kidnapped for a sweep ; the condition of climbing boys at the time being one almost of slavery. The boy, however, had energy of body and mind, and survived the privations of his unfortunate class. At eighteen years of age he commenced business as a sweep on his own account. When employment was slack in his trade, he sought and found it in others ; in summer and harvest time he went into Lincolnshire and worked at farm labor, always bringing home a little store of savings. But he did not neglect his mind ; above all, he did not forget the hardships endured by the poor little climbing-boys ; all of which he had himself passed through. He therefore devoted his leisure,—snatched from a busy life,—to write a treatise on the subject, which he printed and distributed amongst influential persons, thereby initiating, as Granville Sharp had done, the movement which issued in the amelioration of the sufferings of this class. David Porter, by his frugality, industry, and application to business, eventually realized a large fortune, at the same time promoting the comforts of his boys and workmen in a manner altogether unknown and unusual at the time. On Sir Thomas Bernard asking David Porter how he succeeded in his business, and accumulated so large a fortune, he answered, " By never having an idle hour or an idle guinea." This was his whole secret.

Nothing, however, is more common than energy in money-making, quite independent of any higher object than its accumulation. A man who devotes himself to this pursuit, body and soul, can scarcely fail to become rich ; very little brains will do ; spend less than you earn ; add guinea to guinea ; scrape and save ; and

the pile of gold will gradually rise. John Forster quoted a striking illustration of what this kind of determination will do in money-making. A young man who ran through his patrimony, spending it in profligacy, was at length reduced to utter want and despair. He rushed out of his house intending to put an end to his life, and stopped on arriving at an eminence overlooking what were once his estates. He sat down, ruminated for a time, and rose with the determination that he would recover them. He returned to the streets, saw a load of coals which had been shot out of a cart on to the pavement before a house, offered to carry them in, and was employed. He thus earned a few pence, requested some meat and drink as a gratuity, which was given him, and the pennies were laid by. Pursuing this menial labor, he earned and saved more pennies; accumulated sufficient to enable him to purchase some cattle, the value of which he understood, and these he sold to advantage. He now pursued money with a step as steady as time, and an appetite as keen as death; advancing by degrees into larger and larger transactions, until at length he became rich. The result was, that he more than recovered his possessions, and died an inveterate miser. When he was buried mere earth went to earth. With a nobler spirit, the same determination might have enabled such a man to be a benefactor to others as well as himself. But the life and its end in this was alike sordid.

The saving of money for the mere sake of it, is but a mean thing, even though earned by honest work; but where earned by dice-throwing, or speculation, and without labor, it is still worse. To provide for others and for our own comfort and independence in old age is honorable, and greatly to be commended; but to hoard for mere wealth's sake is the characteristic of the narrow-souled and the miserly. It is against the growth of this habit of inordinate saving, that the wise man needs most carefully to guard himself; else, what in youth was simple economy, may in old age grow into avarice, and what was a duty in the one, may become a vice in the other. It is the *love* of money—not money itself—which is “the root of evil,”—a love which narrows and contracts the soul, and closes it against generous life and action. Hence, Sir Walter Scott makes one of his characters declare that “the penny siller slew mair souls than the naked sword slew bodies.” It is one of the defects of business, too exclusively followed, that it insensibly tends to a mechanism of character. The business man gets into a rut, and often does not look beyond it. If he lives for himself only, he becomes apt to regard other human beings only in so far as they minister to his ends. Take a leaf from such men's ledger, and you have their life. It is said of

one of our most eminent modern men of business—withal a scrupulously honorable man—who spent his life mainly in money-making, and succeeded, that when upon his death-bed, he turned to his favorite daughter, and said solemnly to her, “Hasn't it been a mistake, —?” He had been thinking of the good which other men of his race had done, and which he might have done, had he not unhappily found exclusive money-making to be a mistake when it was too late to remedy it; and when he must leave behind him his huge pile of gold, the accumulation of which had been almost the sole object of his life.

TO THE MEER.

How much that Genius boasts as hers,
And fancies hers alone,
On you, meek spirits, *Faith* confers!
The proud have further gone,
Perhaps through life's dull maze: but you
Alone possess the labyrinth's clue!

To you the costliest spoils of Thought,
Wisdom unclaimed yield up:
To you her far-sought pearl is brought,
And melted in your cup;
To you her nard and myrrh she brings,
Like Orient gifts to infant kings.

The “single eye” alone can see
All truth around us throw,
In their eternal unity:
The humble ear alone
Has room to hold and time to prize
The sweetness of Life's harmonies.

Notions to thought made visible,
Are but the smallest part,
Of those immortal Truths which dwell
Self-radiant in man's heart.
With outward beams are others bright,
But God has made you “full of light.”

One science well ye know: the will
Of God—to man laid bare:
One art have mastered: to fulfil
The part assigned you there.
If other, meaner lore ye sought,
This first ye learned—to need it not!

Aubrey De Vere.

SEED-TIME AND HARVEST.

As o'er his furrowed fields, which lie
Beneath a coldly dropping sky,
Yet chill with winter's melted snow,
The husbandman goes forth to sow.

Thus, Freedom, in the bitter blast,
The ventures of thy seed are cast,
And trust to warmer sun and rain,
To swell the germ, and fill the grain.

Who calls thy glorious service hard?
Who deems it not its own reward?
Who, for its trials, counts it less
A cause of praise and thankfulness?

It may not be our lot to wield
The sickle in the ripened field;
Nor ours to hear, on summer eves,
The reaper's song among the sheaves;

Yet where our duty's task is wrought
In unison with God's great thought,
The near and future blend in one,
And whatsoever is willed is done!

And ours the grateful service whence
Comes, day by day, the recompense—
The hope, the trust, the purpose staid,
The fountain, and the noonday shade.

And were this life the utmost span,
The only end and aim of man,
Better the toil of fields like these,
Than waking dream and slothful ease.

Our life, though falling like our grain,
Like that revives and springs again;
And early called, how blest are they
Who wait in heaven their harvest day.

J. G. Whittier.

A REMINISCENCE OF INFANT SCHOOL DAYS.

The Newport, R. I., correspondent of the Providence Journal tells the following curious and interesting story:

A gentleman who was born in Newport, and passed a few of his earlier years here, has just related me the following anecdote, which I am sure he will pardon me for repeating. The facts are as he gave them, (the names alone being withheld) and the occurrence took place but a few years ago, whilst on a short visit to the place of his birth. He remembered that he was sent to school to Marm Jones, when but two years of age, and that he, and another child of about the same age, were frequently, during school hours, placed in a cradle and rocked by Becky Jones, Marm Jones's daughter, who assisted her mother in the school. The impression of the school-room has remained fresh on his mind. There was a small fire-place across the angle of the room, with tiles on the jambs, and the heavy beams on the sides of the room were met at the ceiling by other heavy beams running overhead. This impression he sometimes supposed, later in life, was a creation of the mind and had no foundation in reality; but he clung to it tenaciously, and at last had it confirmed, and in this way:

Passing up Thames street, he came upon an old building that he felt confident was the scene of his early school days. Pausing to survey it, he asked an old man in the neighborhood if Marm Jones kept a school there forty years ago. "Yes," was the reply, "and she keeps there now." "She had a daughter Becky, who assisted her in the school; is she still living?" "Yes," said the old man. "and in the same house; she is the widow Smith, now." This was enough for the inquirer, who at once knocked at the low door. The rap was answered by a woman past the prime of life, and he asked, "Are you Mrs. Smith, formerly Miss Becky Jones, who kept school here forty years ago with Marm Jones?" "Yes, sir," she replied. "Well," said he, I came to school here at that

time, and was then but two years old." "If that is so," said the woman, looking intently at him, "your name must be either Benjamin Long or George Short, for we had two children of that age, and we used to rock them in a cradle when they were tired." "My name is Benjamin Long," said the gentleman. I remember the rocking, and am anxious to see your mother and the school room."

On entering a chamber above, to which he was conducted, he said at once, "this is the school room; there is the fire-place in the angle, with its tiles, and there are the great beams overhead and down the sides of the room." Then the old lady, Marm Jones, a woman of ninety, came in, who, when asked the same questions that had been put to her daughter, said, "we had at that time two children placed under our care, and they were each about two years of age, and to keep them quiet we used to rock them in a cradle. Their names were Benjamin Long and George Short." "This is Benjamin Long," said Becky. The old lady looked incredulous for a moment and then exclaimed, "Why, Benjamin, how thou hast changed; for thou hadst then soft flaxen hair and thy complexion was fair! there must be something in the air of New York that has changed its color and made thee so brown." The babe she remembered, but she could not recognize in the strong and active man the child she had cared for in its infancy. Where will you find another instance of a school kept for forty years in one place and by the same school marm?

POWER OF SUBSTANCES TO THROW OFF HEAT.

The different power in substances to throw off heat is turned to very effectual use in the economy of nature, and it must be viewed as an evidence of an all-wise, designing mind, that those things which need moisture most are the best radiators of heat, and therefore the best contractors of dew. Leaves, grass, and plants all have their special powers of radiating heat, so as to obtain their adequate supply of dew, and this simple function is of the greatest importance in the just maintenance of vegetable life: and its benefit is such that, in the words of Chaucer—

"The earth waxeth proud withal
For sweet dews that on it fall."

But this property does not belong only to plants; in the instance of different soils, the dew is found to collect more abundantly on light, porous, cultivated lands, than on the hard, dry barren rocks which bring forth no produce. This difference may be seen in our gardens any clear starlight night, when the grass will be found covered with moisture, and the walks dry. Chemistry tells us the reason of this dif-

ference—that gravel is a bad radiator, and keeps its heat; but chemistry does not explain how all these simple laws of nature have been made each to fulfil the part that best conduces to the happiness and comfort of the created. It must be remembered that the texture of a surface has a great deal to do with its power of radiation. Close-grained substances—such as metals, are admirable conductors of heat, but they are bad radiators. The fact of their particles being close together assists their power of propagating heat from one part to another; but coarse, loose textures—such as down, cloth, wool, cotton, etc.—give out heat quickly; and, as they do not possess the power of receiving it as rapidly, become cold. Thus they are best adapted for clothing, because they do not conduct the heat of the body away from itself, but it remains collected under their substance, while the outer surface is cold. A very slight shade will prevent radiation. This we see in the contrivance of gardeners, who use bass, canvass, or even muslin, to keep off the frost from their plants; and all these materials have sufficiently loose textures to prevent the heat, given out by the plant, passing off into the outer air. “I had often,” says Dr. Wells, “in the pride of half knowledge, smiled at the means frequently employed by gardeners to protect tender plants from the cold, as it appeared to me impossible that a thin mat, or any such flimsy substance could prevent their attaining the temperature of the atmosphere. But when I learned that bodies on the surface of the earth become, during a still and serene night, colder than the atmosphere, by radiating their heat to the heavens, I perceived immediately a just reason for the practice which I had before deemed useless.” The accomplishment of the desired end, without a knowledge of scientific principles having led to it, is interesting and very creditable to the observant faculty of the uneducated. There is a custom among the natives of India which also illustrates the same principle of radiation, as the night-coverings of the gardeners. Artificial ice is commonly produced in India by placing water in flat, shallow vessels, exposed to the influence of the night-air. The pans are placed in an unsheltered spot on straw, which, being a bad conductor, prevents any absorption of heat from the ground; and the porous texture of the earthenware vessel admit of a portion of the latent heat of the water passing off beneath. Of course, the surface is also radiating heat; and as no equivalent is received, the water gradually diminishes in temperature until the freezing-point is reached. The ice thus formed is covered with straw, to prevent absorption of heat, and is stowed away in caves, where it is kept for use during the hottest seasons.—*Chambers' Journal.*

He whose soul has anchored itself to rest on the deep calm sea of Truth, does not spend his strength in raving against those who are still tossed by the winds of error. When shall we learn, that loyalty to Christ is tested far more by the strength of our sympathy with Truth, than by the intensity of our hatred of error?

A discovery of an important character is said to have been made in France. In the bark of the tree? a fine textile substance exists, and M. Brunet has succeeded in reducing this to the fineness, durability and general appearance of silk. He is buying up bark for the purpose of producing large quantities of this new kind of silk.

A quarry of variegated marble, reported to sustain a higher polish than that of East Tennessee, has been discovered in Alabama, near the Chattanooga Railroad.

The *Scientific American* says that ice may be kept a surprisingly long time by stretching several inches of cotton batting on a pasteboard, or a half dozen thicknesses of newspaper, broader than the pitcher; sew the longitudinal ends together, so as to receive the pitcher; let it stand on a cushion of the same material, and put a pillow over the top. This receipt may be easily tested, and if found of value will be useful in times of sickness.

A National Labor Congress was held in Baltimore during the past month. At its close resolutions were adopted to use all honorable means to promote the eight-hour labor plan, as it was necessary to the moral, intellectual, and social welfare of workingmen; also to obtain for convicts the same rate of pay as paid to honest workmen, and to vote for no one who was not pledged to the support of the eight-hour movement.

THE INDIANS.—No advices have been received at the Department of Indian Affairs tending to confirm any of the reported Indian outbreaks on the plains. The last intelligence was afforded about a week ago by Superintendent Taylor, of Nebraska, who is inclined to treat the disturbances as coming from small detachments of Indians not connected in any way with the tribes who are said to be friendly in their dispositions towards the Government, but on the contrary are regarded and treated by the Indians themselves as outlaws of bad character.

THE FREEDMEN.—The following circular was issued by Gen Howard on the 22d inst:

“In accordance with the instructions of the Secretary of War, it is ordered that on and after the 1st day of October next the issue of rations be discontinued, except to the sick in regularly organized hospitals, and to the orphan asylums for refugees and freedmen already existing, and that the State officials who may be responsible for the care of the poor be carefully notified of this order, so that they may assume the charge of such indigent refugees and

freedmen as are not embraced in the above exceptions."

The New Orleans *Tribune*, a loyal paper, owned and edited by colored men, has been compelled to suspend publication, owing to the withdrawal of the military guard which alone saved it from destruction in the late excitement.

Thomas J. Wood, commanding the Department of the Mississippi, says, that "in various localities in that State parties engaged in planting since the termination of the active work of making the crops, are discharging the freed-people whom they had hired for the year, without settling fully with them for their previous labor. But if full remuneration were paid to the freed-people for their previous labor, it would be gross injustice to drive them away from the plantations after they had made their arrangements for the year, and when they must be necessarily subjected to much privation and suffering by being thus suddenly deprived of home and support. The majority of the cases in which this outrage is being committed is where the freed-people have been employed to work on shares for a stipulated part of the crop, to discharge them from service and drive them from their homes on the plantations, is simply robbery.

It is believed that only a comparatively small portion of the community can be guilty of practising such an enormity, and the honest and fair-dealing men are invoked to frown down and suppress the perpetration of it.

It requires little foresight to predict, that if the freed-people are treated in this way and robbed of the fruits of their labor, they can no longer be depended on to supply the physical force necessary to cultivate the soil—a result whose direful effects cannot be overestimated. The commission of such outrages on the rights of the freed-people will not be permitted in this department."

John Ely, chief superintendent and inspector of bureau affairs in the State of Kentucky, says in his report for the Seventh month, that the feeling of the whites toward the freedmen in some portions of the State is intensely hostile. This hostility extends to the Bureau officers and agents, particularly in the counties comprising the Southern and Northwestern sub-districts and in some of the counties of the Lexington sub-district. In the above localities, a portion of people seem determined to have their own way in the treatment of the negroes, and the only restraint upon them, in the exercise of their claimed prerogative, is the authority of the Bureau and the presence of the military. Many cases have come to the notice of the Bureau officers, showing that people, who, under the old system of slavery, had been in the habit of flogging and otherwise maltreating their slaves, seemed to regard the right to continue such abuses as indisputable. I believe that time, with the proper exercise of the authority of the laws of the United States, will eradicate this idea, or at least afford the freedmen protection from the practical demonstration of it.

A colored meeting was recently held in Choctaw county, Alabama. About seven thousand freedmen were present. Resolutions were passed with regard to the emigration scheme, and it was determined to send a committee to Washington, to confer with the authorities for free transportation. The meeting was repeatedly disturbed by ill-disposed white persons, but no casualties occurred.

A YOUNG WOMAN of experience wants a situation in a private school, or as Governess in a family. Address
731 St. K. W. C., Hockessin, Delaware.

SELECTIONS FROM THE WRITINGS OF JOHN BARCLAY.

"We will not hide them from their children, shewing to the generation to come the praises of the Lord, and His strength, and His wonderful works that He hath done."—PSALM lxxviii. 4.

"This shall be written for the generation to come; and the people which shall be created, shall praise the Lord."—PSALM cii. 18.

I have been long settled in the persuasion, that it may be well for many of those who desire the promotion of truth and righteousness, whether they may have moved in a private or in a public sphere, to leave behind them, when they go hence to be seen no more here on earth, some written testimony, however slight it may be, to the blessed cause. As an individual, I confess that I have derived much instruction, comfort and strength, from the living memorials left us by many Christian brethren and sisters now removed from works to rewards; not only from their Journals and from Memoirs of them, but even from testimonies of Monthly Meetings. But especially I have to notice, that the expressions of those who have arrived near the confines of the invisible world, have sunk deep in my remembrance; nor do I know any other instrumental means, that have proved to me so searching, softening, effectual and abiding, as that last mentioned description of memorial. I believe that the profitable impressions which are made, particularly on the minds of well disposed children and young persons, remain with them for the most part through life; so that many,

amongst us, now grown up, can testify, that incidents and sayings, which, in childhood, they had heard or read, of truly excellent characters, do even at this day continue to have a beneficial effect on their minds; and even in cases where young people have wandered far from the line of duty, these things not unfrequently arise in their remembrance. I speak from some degree of experience, however small it may be, compared with that of some others; for I have been a wanderer in my time, yet can testify that even when most widely separated by wickedness from the Author of all good, the recurrence of the wisdom of the wise, and of the sayings of the dying, to my thoughtless heart, has not been either unfrequent or unseasonable. But the advantages which my soul has received in recent times, are still more decided. Many may think themselves unfit to tell of the Lord's goodness to them in their early youth, as well as under trials and troubles, and great variety of circumstances, even to their old age; but such humble-hearted ones are the very persons who are perhaps most fit, or most called upon, to make mention, in some form or other, of the providences and mercies and many deliverances which they have met with. Often when I hear of the death of eminent servants of the Lord, I long that their wisdom and the weight of their long experience may not die with them; but that some memorial may have been left by them, for the instruction of those who are still travelling on their wearisome way. And surely, the very

least of those who strive to follow the Lord, have had something happen, or have made some reflection worth leaving behind, for the encouragement and benefit of such as survive them. I indeed feel this practice of which I am speaking, to have been, and still to be, the source of a renewed feast to me; and I seldom recur to some of the manuscripts and scraps which I have written, without precious feelings of gratitude, and desires after a patient continuance in well doing unto the end. Some of these which have been written in the very depth of affliction, seem to stir up my faith in the Almighty power, and animate me with fresh courage to endure all things, and to suffer, even unto the death of all that wishin, which would have its own way and will, and not the Lord's blessed will. Indeed I have been so aware of the instruction to be derived, both from writing such small pieces, and from reading the productions of others in this way, that I dare not refuse, however little I desire it, to allow of these little scraps, the feeble tokens of Divine favor, being made as public as any prudent person, after I surrender them up and go hence, may see right.

1814, *May*.—Some of the following reflections and remarks are taken from little books called "Accounts of Time," in which the hours of every day were accounted for, and the occupation which filled every individual hour of each day was put down. This was, at all events, an *original design*, if nothing better; but, indeed, it was of use, and no doubt was the means of bringing me into active and industrious habits, at a time when no sterling inward principle seemed to have full rule, and when I was left very much to my own direction, and at my own disposal as to my pursuits. I have often felt that it was a preservative at the time, and a stimulus to exertion. I think I may add, of this little contrivance for self-government, as well as of many others which occupied my attention about the same period, that they had their use, in awakening my mind to see the importance of bringing self and sense into subjection; and however insufficient they were of themselves to effect the same, they nevertheless urged me forward to press after the knowledge and attainment of *that*, which is now, (blessed be the Lord, who hath shewed this to me,) experimentally found to be the only sure guide and leader. As far as these little relics show, how the wrestling seed struggled within me, and how tender and gradual were the leadings of the Shepherd of Israel, how the good seed seemed at times almost crushed, and every desire after such things as were truly desirable, was, at seasons, very feeble and faint; so far they are, indeed, interesting to me, and excite feelings of gratitude as often as they are examined. These "Accounts of Time" were begun in the Fourth month, 1814, (*in the 17th year*

of his age), and were left off about the Eighth or Ninth month, 1816. The reasons for preserving them, apply equally, I think, to those weekly reports which I was in the habit of drawing up; from which extracts will also be inserted in this book.

1814, *August 8th*.—I think I may say, that in proportion, as I endeavor to do well, I feel that I am enabled to do so; that there is something within me that stimulates to good, that encourages me to persevere in what is good, and which even tells me what is good. O! may I ever listen to its silent but most important intimations,—may I, indeed, follow that secret monitor within me, and both desire and walk worthy of its reproofs and persuasions.

1814, *November 20th*.—I could wish to be able to discover those symptoms of religious habits within me, which appear where religion exists. I could wish that, as "out of the abundance of the heart the mouth speaketh," so those outward signs could be observed, which inevitably follow a devotional spirit within: O! that those evidences of true religion were produced,—a sincere desire to promote the glory of God and the good of man,—a stimulating and energetic propensity to discourage vice and folly, though ever so disguised;—and (that) my dispositions, affections, actions, words and thoughts, might more nearly conform to the pattern which is set before me, even to Jesus Christ!

1814, *December 18th*.—Be anxious and ever ardent in the work before you, even your own eternal happiness, and that of your fellow-creatures, to the glory of God. There is such danger, such liability, whilst in these frail bodies and in this wicked world, even to those seemingly the most confirmed among us, to slacken and decline, that on this head I cannot forbear suggesting a hint to myself, who am but just setting out on the arduous journey to Zion. I cannot help urging myself to beware of that destructive indifference and lethargy, which are and have been the ruin of thousands, in a religious sense; which would palliate the guilt and error of others, and excuse our own, which damp and chill any appearance of zeal in our neighbors, whilst they effectually, though gradually, quench any like disposition in ourselves.

No date.—Domestic life presents many opportunities for the exercise of virtue, as well as the more exalted stations of honor and ambition. For though its sphere is more humble, and its transactions are less splendid, yet the duties peculiarly incumbent on it, constitute the basis of all public character. Perfection in private life is, by far, the more arduous attainment of the two; since it involves a higher degree of virtue, to acquire the cool and silent admiration of constant and close observers, than to catch the undistinguishing applause of the vulgar.

Men, accustomed to the business of the world, may think it a mean occupation to be engaged in the duties of a family. It is, however, only by comparison that they are rendered to a superficial eye, petty and insignificant. View them apart, and their necessity, their importance immediately rises. How many daily occasions there are for the exercise of patience, forbearance, benevolence, good humor, cheerfulness, candor, sincerity, compassion, self-denial! How many instances occur of satirical hints, of ill-natured witticisms, of fretfulness, impatience, strife and envyings; besides, those of disrespect, discontent, sloth, and very many other seeds of evil, the magnitude of which is perhaps small, but for the guilt of which we shall most assuredly be judged. When we consider that private life, also, has its trials, temptations and troubles, it ought surely to make us vigilant, when around our own fire-side, lest we should quiet our apprehensions, and cease from our daily watchfulness.

Prove your love and affection for your family, and your friendship and attachment for all your connexions, by using, not partial, hypocritical, momentary acts of kindness, but, one universal, constant, animated effort,—one sincere desire of rendering others happy, united with compassion for their sufferings, charity and candor for their errors, and forgiveness for their injuries.

Especially cultivate a benevolent disposition, an inclination rather to think and speak well than ill of those around, accompanied with that candor which exposes not the errors, but rather the virtues of others to view; and which brings to light, with regret, their failings, for no other end than their suppression.

1815, *January*.—Business, in its proper sphere, is useful and beneficial, as well as absolutely necessary; but the abuse of it, or an excess in it, is pernicious in many points of view; I cannot approve, in very many respects, of the intense degree of application and attention, which seems often to be required of those that are in business.

There is one danger to which the man of business is particularly exposed, and the more alarming, because it is concealed,—I mean the danger of gaining a worldly spirit, and of losing that tenderness of conscience, that love of religion, which is the ground of all virtuous conduct. The person who is engaged in worldly affairs, whether the sphere of his engagements be large or small, should be most anxiously attentive to his eternal interests, that they also may be kept in a flourishing, profitable condition; if this be not the case, the saying of W. Penn is true in regard to such a one—"He that loses by getting, had better lose than gain." He should also be very jealous of his scanty leisure, that he may not omit to employ some of

it in his daily duties to his Maker, and in the constant cultivation of that holy frame of mind, which it is the slow though sure tendency of the spirit of the world silently to counteract. For I own I tremble at the very idea of any man's mainly pursuing his perishable interests, when perhaps in one short moment he is gone. How inconceivably terrible and exquisite must be that man's anguish, whilst on the very brink of going, he knows not whither, to think that he has given up an eternity of bliss, for the empty grasp of that which is not.

(To be continued.)

Everybody's lot in this world hath some crook in it. Complainers are apt to make odious comparisons; they look about, and, taking a distant view of the condition of others, can discern nothing in it but what is straight, and just to one's wish; so they pronounce their neighbor's lot wholly straight. But all that is a false verdict; there is no perfection here; no lot out of heaven without a crook.

For Friends' Intelligence.

ATTENDANCE OF RELIGIOUS MEETINGS.

Seated lately in an unusually small mid week meeting, and reflecting what a privilege it was thus to withdraw from the cares and employments connected with our mere physical comfort, and turn the mind uninterruptedly toward God and heavenly things, the query arose in my mind, why it was that so few availed themselves of this privilege. Perhaps the chief cause of this neglect is to be found in the habitual absorption of the mind in necessary business and household cares; a habit which is often continued after what was regarded as a necessity for it has ceased. If no other reason existed for the setting apart a portion of time for religious thought and communion, the importance of breaking in upon and preventing this absorption of the mind in material things, would be sufficient to recommend it as a salutary provision for our spiritual nature.

It is sometimes urged by those who are remiss in the attendance of religious meetings that spiritual strength is better found in the retirement of their own closets; but do they always thus seek it? And would it not be generally found that communion in the closet leads to a desire for religious communion with others? "This ought ye to have done, and not have left the other undone." It does not seem absolutely necessary to physical health, that we should assemble at stated times in the day to partake of food in company with our families; the animal system would be supported by each one taking his morsel alone; yet the social meal, at stated times, has always been a step in the progress from barbarism to refinement.

Another cause of remissness, and among those too who really desire to avail themselves of every

means of strengthening the spiritual life, is discouragement at finding themselves, as they express it, no better for going to meeting. But are they better for staying away? Do they know that they are no better? Is not this very longing for something higher and better than they have yet known an evidence of spiritual life? Do not these mistake when they look for a sensible evidence of good each time that they assemble with their friends for religious meditation. This frequent assembling is but one among the many influences that slowly and imperceptibly build up the spiritual life. In seasons of affliction and trial, or when under the influence of special divine visitation, we are often sensible that progress has been made, in heavenly things; but not less important are those influences that, like the atmosphere which surrounds us, are imperceptible, but without which there could be neither life nor growth.

As an important outward means of good, the regular attendance of a place of worship should be included in the household arrangements of those who are just commencing the business of life for themselves. When it is once decided that this must not be dispensed with, other duties will fall into their right places, and will be better performed when there are interposed seasons of quiet recollection, in which the mind may recover itself, and gather up its scattered energies.

I have called the attendance of religious meetings a duty, but it should rather be called a privilege. It is certainly a duty to avail ourselves of every means for promoting our spiritual growth; but if we regard the mere attendance of religious meetings as an observance by which God is to be honored, we shall fail of experiencing its true benefit.

As a means of promoting love and kind interest in each other, social worship stands pre-eminent. Who has not observed the flow of affectionate feeling evinced by the tearful eye, the warm grasp of the hand extended even to strangers, at the close of a favored meeting, not only when some gifted instrument has aroused the spiritual life, but sometimes after a solemnly silent one?

It is not easy to conceive how a religious society can be held together without these stated assemblings; it may be called a form, but it is the simplest of forms. When the multitude were to be fed, they were first to sit down; and in looking toward the coming ages, when the growing light of truth shall cause those less simple forms which once expressed an imperfect truth to pass away, this, founded as it is in man's social nature, we must suppose will continue, while that nature remains unchanged. This very simplicity, this reducing of Divine worship into its simple elements, is perhaps one cause why many of the young and inexperienced have

sought in other religious sects for more imposing and tangible forms. The desire to do some good thing, to have the religious feelings excited, and the corresponding idea that Friends' do nothing but sit still, and know not what they believe, have led many to the abandonment of the religious society in which they were educated. We may cherish the hope that under these forms and observances, the sincere-hearted may receive spiritual good, and that some of the simple views early imbibed may, through their agency, leaven other sects; but the eye of faith cannot but look forward to the time when these forms and ceremonies will be regarded as the things of the child that must be put away; and this may ere long be the experience of some who feel that they now derive benefit from them.

In the meantime, it is for those who have known the efficacy of silent waiting upon God,—who are convinced that the offering of the whole heart is the only acceptable worship, that without it, forms are unavailing, and with it useless,—it is for these to put on fresh strength and hope, to press through every discouragement, and by their loving, cheerful, and consistent walk, allure the young into that spiritual simple path, in which so many of the fathers and mothers of our Society have walked safely, and who have left behind them testimonies to the efficacy of the One Power, which redeemed them not only from the corruptions of the world, but out of the forms and observances they had been taught to believe essential, and gave them an evidence that they were God's children. S.

PHILADELPHIA, 9th mo., 1866.

To be satisfied with a little is the greatest wisdom; and he that increaseth his riches increaseth his cares; but a contented mind is a hidden treasure, and trouble findeth it not.—*Economy of Human Life.*

RATIONALISM.

The term *Rationalism* in connection with religion is somewhat startling, and when the following extract from *The Contemporary Review* was offered for insertion, we had nearly suffered our prejudice to reject it unexamined, but a careful perusal has quite changed the tone of feeling in relation to it.—EDS.

The term rationalism is in itself so entirely vague and indeterminate, that previous to definition it is impossible to say what it denotes, relative to theology. It is one of the greatest misfortunes both of theological and philosophical discussion, that words frequently come to be used with such complex and even contradictory meanings, as to obscure altogether the real points at issue, and to keep controversialists

fighting for years in the dark. Many instances might be given of this abusive employment of words, but there is none more noted or more influential in the confusion which it is constantly breeding, than the word rationalism. It is used at least in two distinct and nearly opposite senses. In its current use, with a large class of theologians it denotes a certain exercise of the natural intellect, always opposed to Christianity. It means the deliberate rejection of Divine revelation, as inconsistent with the dictates of the natural reason. It is the same, in short, as irreligion. It is the spirit of the world, the spirit of undevout science, of undevout philosophy, as opposed to Christ and the spirit of the Divine, which in Him is seeking to bless the world. In this sense rationalism is aggressively hostile, not merely to certain truths of religion, but to the very foundation of religion in human nature,—the spiritual instincts and principles which separate man from other creatures, and make him, in contradistinction to them, a religious being.

Perhaps it may be questioned whether there is any form of thought thus deliberately opposed to religion in our day, as there is certainly no special philosophy which makes it its business to proclaim such an opposition. But no one who knows anything of the subject can doubt that there are forms of thought, and even a prevailing school of thought, which, according to its fundamental principles, leaves no room for religion as a valid element of human existence. It may not directly oppose it, but it leaves it out of sight; nay, it asserts as its basis, principles inconsistent with any idea of special Divine revelation. The great school of thought known as Positivism restricts the sources of our knowledge to the senses, and if not explicitly, yet implicitly, denies the reality of a Divine constitution in man, separating him from other animals, and making him, in a true and not merely an accidental or superstitious sense, a subject of religion. It is not necessary for us to say whether the name of Rationalism is or is not rightly applied to such a school of thought as this. There is no doubt that it is largely applied by theologians in a sense in which it is applicable to no other system,—in which, in short, it is identical with anti-Christian philosophy.

But the expression is also applied often, by the same theologians, to describe a mode of thought which has no connection with the preceding, but which, on the contrary, is its most active and enlightened opponent. It is applied to the exercise of reason within the sphere of religion, with a view to the enlargement and purification of religious ideas in consistency with the necessities of an advancing spiritual culture. In the former case, thought takes its stand outside the circle of spiritual truth al-

together, and it never comes within the circle. It lays the foundations and tries to build the structure of Truth outside of the Church, and the special principles which lie at the root of the Church. In the present case, thought is born within the Church; it starts from spiritual principles; it is essentially Christian in its fundamental ideas; but it does not hold to these ideas merely as they have been elaborated and dogmatically expressed by the Christian intelligence of former ages. On the contrary, it recognises a living movement in Christian knowledge, no less than in every other department of knowledge. There is, "through the ages," a growth of religious intelligence and comprehension, just as there is a growth of philosophical intelligence and comprehension; and the labors of past generations of Christian thinkers, while claiming all honor and respect, are no more infallible than the labors of past generations of philosophers. According to this view, the increase of general knowledge, and of humane and enlightened principles in society, inevitably carries with it an increase of spiritual illumination. Higher, juster apprehensions are developed, not only of the relations of man to man,—a fact admitted on all hands,—but moreover of the relations of man to God, and of the Divine intentions for man's good. If man, in the course of the Christian centuries, has come to understand better his own position and rights in relation to the position and rights of others, and to find in the Christian revelation the warrant of this higher knowledge, which for long he failed to see, or at least to realize, there seems every ground for concluding that he will also come to understand better from the same source his relations to God, and God's thoughts towards him. Why should not the Christian reason grow and become more full of light, as well as the scientific intellect? It is no satisfactory answer to say, as has been so often said, that the sum of Christian knowledge is contained once for all within the books of the New Testament, from which nothing is to be taken, and nothing added. The question is not one as to the original completeness of the Christian revelation, but one solely as to the interpretation of this revelation. Allowing all that can be said as to the perfection of Holy Scripture, even on the untenable supposition of verbal inspiration, this settles nothing as to the validity of past interpretations of Scripture. Least of all does it settle anything as to the validity of the dogmatic opinions which have grown up within the Church at successive periods, and which have frequently owed their rise far more to the changing currents of human feeling and thinking than to any direct result of scriptural study. These opinions must stand or fall on their own merits. They cannot, on any ground of reason, be considered beyond re-examination, and hence

of possible expansion or correction. The mere fact that they are stamped with the authority of the Church, or in other words of the highest Christian intelligence of the past, is enough to secure for them respect, but by no means enough to place them beyond criticism. The Christian intelligence of to-day possesses every right that the Christian intelligence of the fourth century, or the twelfth century, or the sixteenth century, possessed. And not only has it the same rights, but there can be no doubt that, upon the whole, it possesses a higher capacity of exercising these rights. In many respects it has both more insight into spiritual truth, and more freedom from spiritual prejudice. And it claims, therefore, not only in one church, but in all living churches, to reabsorb, as it were, the great spiritual ideas of the past, and review them in the light of Scripture; to take them up from the dogmatic moulds in which they are apt to lie dead in an uninquiring age, and to bring them face to face once more with the living Word and with all true knowledge. This process of constant inquest regarding religious ideas, and consequent purification of them from the admixtures of error and false philosophy, which mark human progress in all its relations, is, according to this school, the necessary condition of all real thought about religion. Theology ceases to be a living science when it ceases to move, when it imposes itself as a mere mass of dogma upon the conscience, instead of soliciting the continual criticism and purification of the spiritual reason. Nor is such a process of movement necessarily of an unsettling character in theology any more than in other sciences. Whatever true principles theology has reached in the past remain true principles. Truth has nothing to fear anywhere from the most rigorous inquiry. But whatever is not of the truth, whatever has been imported into theology from the darkness of human error or the misconception of human reason, or, in other words, from the misreading of Divine revelation, this is no doubt liable to be unsettled and exploded. Unsettling of this kind is the very purpose of the movement, but only that in the end the truths of Divine revelation, the great thoughts of God towards us in Christ, may be seen more clearly and understood more comprehensively.

It must be plain that the application of the term rationalism to two such distinct modes of thought as we have now described is absurd. And yet this absurdity is constantly practised.

Why, when all is bright and happy, should a gloom
Be spread around us. O, blind and thoughtless soul!
'Tis the same power that reigns, and the same love
Is traced alike in sunshine and in shade;
The cloud that bears the thunder in its folds
Comes on the errand of good will to man!
O, we would cling too close to earth, and love

Too well its pleasures and delights,
Were there no shadows on its scenes of light,
No sorrow mingled with its cup of joy.
If sweet fulfilment followed all our hopes,
Like the unfoldings of a spring-flower bud,
We should not seek a better world than this;
Where then would be the reachings of the soul
For higher pleasures, and those purer joys,
That have no higher dwelling-place but heaven.
—Offering of Sympathy.

THE SUNDAY AT HOME.

(Concluded from page 427.)

The home Sunday, however, is not to be spent exclusively in religious employments, nor ever to the extent of wearying. It must have relaxing. Why must every toy be put away, every pleasant book be shut, every expression of glee repressed, and the whole child subdued to an uneasy quietude, simply because it is Sunday? Does not God let the birds sing their week-day songs, the waters wear their week-day sparkle, the flowers exhale their week-day perfume, shall the child be rudely kept from all week-day exuberance, and fretted or crushed into obedience by the perpetual reminder that it is Sunday? What wonder that the Sunday grows to be a thing of horror and of hate? I believe it is well to teach and establish some difference,—that some things should be put aside till Monday,—but I more than pity the unhappy ones tortured into a silence as unnatural as it is absolute. The houses that the week long resound with all the various revelry of childhood, but on Sunday are pervaded as with the hush of death,—in which you long painfully for some outbreak of hearty, honest noise,—are not truly homes, and do not leave on the mind the holiest and happiest impression of home. How many there are to whom the memory of the home Sunday comes up as the one dark and unpleasant shadow on a fair vision; how many owe to it their aversion to the day, and their present neglect of its duties and opportunities; and how many homes are growing up now without wholesome restraint,—the one extreme the inevitable consequence of the other! The Sabbath was made for the child as well as for the man. It must not override the nature of the one or the other. The child is greater than the Sabbath, not to be tyrannized over by it, but to be ministered unto. Its duty is to serve and not to reign; and our duty is that it be taught to serve wisely.

There is one thing which comes under the head of home Sunday, which requires a moment's thought. I mean Sunday recreation. Many of us probably recollect that all our homes allowed to us was a short walk after sunset, and many of us could probably say that the going down of the Sabbath sun was the most welcome fact of the week. "Of all the painful inflictions of boyhood, I know hardly any worse than that of wading through the slough of Sun-

day." This was another injustice the ingenuity of our fathers contrived for us. I do not want to see the Sunday made into a holiday. I do not want to see riot and noise taking the place of its proper decorum, but I should like to see that it is considered no violation of the day for a family either to walk or to ride together quietly, as it draws toward the evening. "Let it have the duty of our devotions; but when that is satisfied, let it also have the gratitude of our gladness." I welcome it as one of the pleasantest harbingers of spring when by my house the family groups come strolling leisurely, enjoying the evening of the day God made, and seeking that refreshing body and spirit need,—to many the only opportunity absorbed life allows for this wholesome recreation. Welcome the baby's wagon, and the children's voices, and the manly stride, and the matronly serenity, and a blessing on each home group as it passes. The day is the better day for their walk. They have seen God's evening, and God's trees and flowers. Nature has spoken to them, and they will go home happier and sleep more sweetly. For them the flowers blossom; for them the elm trees bend; for them the evening clouds are painted; for them the stars are lighted, and from all, it may be unconsciously, they and theirs, are receiving impressions to hallow and lighten a week of toil. Alas, that the street should be the only place for these Sunday walks! Wisely has an English writer said, "An open space near a town is one of nature's churches, and it is an imperative duty to provide such things." What a blessing is Boston Common,—not an ornament, not the city's lungs, not the place for holidays, not a play-ground in the week, nor a promenade for the Sabbath, but one of "Nature's churches;" and if you can see that well-ordered host of families there of a Sunday afternoon, while the western clouds and the green leaves, and the murmuring fountain *preach*, and not feel that there is some better, sanctifying influence from it all, I pity your blindness or your bigotry. God speaks not from pulpits only, or from places of man's consecrating, but he hath put a tongue in every living thing, and a spirit in all nature, to which he gives no Sabbath rest.

Not as a sanitary measure should public grounds be opened in every crowded town, but as a great education of the soul in humanity and virtue, as affording to those of narrow means and narrow homes and over-busy lives, a Sunday opportunity of seeing and enjoying with their children, the sun and air and works of God.

The crowning of the Sunday at home is the repeating and singing of hymns. One has grave questions and perplexities about what is commonly called domestic worship, and I sin-

cerely sympathize with the man who honestly and frankly says he does not know what to do. Such a service should be less for the adults than the children, and the prayer that shall engage the attention, enlist the sympathy, instruct the heart, and express the wants of childhood, is the rarest of all utterances. Many a man may be able to pray for himself and for others who wholly fails in his attempts with children. Candidly I think that many of our domestic services are only a weariness to our households, and leave any but the best impression. But about a hymn, that has become a sort of household word, there is something different. It is a rhymed prayer, and the child loves and comprehends it. It is the thing never forgotten. Years, distance, change, death, do not separate us from it. You may have forgotten every maternal precept, the tones of the voice you first loved, the very features of your mother may have become effaced, but with you, still and fresh as at first, is the hymn she taught or sung to you in the evening twilight of the dear old home, a presence and an influence forever. . . . With the home lies the religious shaping of the young soul, and from all the week this day is separate for that special work. A mistaken piety demands a rigid and exclusive observance, impossible, in reality, to most men and to all children; indolent self-indulgence leaves it to run wholly waste. In some homes, it is all restraint, in some, all license. What we want is the safe and wise middle ground which shall make it pleasant and profitable, neither a gloom for the heart nor a weariness to the body. Then most truly the Sabbath day shall be kept, and holy, when, disregarding the limitations of the past, we seek to make it minister to the largest good of all, mindful of nature's laws and limits, and not expecting of the young, or striving for in ourselves, that which we shall only possess by outraging Divine decrees. To this end have I written, adopting for myself the sentiments of an English writer of the seventeenth century: "I hate superstition on the one side, and looseness on the other; but I find it hard to offend in too much devotion, easy in profaneness. The whole week is sanctified by this day, and according to my care of this is my blessing on the rest. I commit my desires to the imitation of the weak, my actions to the censure of the wise and holy, my weakness to the pardon and redress of my merciful God.

WANTS SUPPLIED.

A good man shall have what he needs, not always what he thinks he needs. Providence intends the supply of our necessities, not of our desires. He will satisfy our wants, but not our wantonness. When a thing is not needful, a

man cannot properly be said to want it; when it is needful, a good man shall not be without it. What is not bestowed upon us may not be so beautiful at that time wherein we desire it, for everything is beautiful in its season. He that did not want God's kindness to renew him, shall never want God's kindness to supply him. His hand shall not be wanting to give, where his heart hath been so large in working.—*Char-nock.*

FRIENDS' INTELLIGENCER.

PHILADELPHIA, NINTH MONTH 15, 1866.

SOCIAL EQUALITY AMONG FRIENDS.—The religious and social equality which to a great extent prevail throughout the Society of Friends may be considered a distinguishing feature in our organization. "I call you not servants," said Jesus to his disciples, "for the servant knoweth not what his Lord doeth; but I have called you friends; for all things that I have heard of my Father I have made known unto you." In accordance with this example, the Society which George Fox was instrumental in gathering, has been denominated Friends, a term not only indicating spiritual fellowship, but social equality; and in early times so great were their manifestations of interest in each other that it became a proverb, "See how the Quakers love one another."

If in this respect we have in some degree deteriorated, yet we believe a strong fraternal feeling is still cherished throughout our borders. The opportunities for religious intercourse afforded by our frequently recurring Yearly and Quarterly Meetings, and the gathering together at such times at each others houses, tend to strengthen this feeling and to bring us into more intimate fellowship one with another.

Social distinctions exist to a far less extent among us than in most other religious societies. In many neighborhoods they are scarcely recognized, for we find that those blessed with large worldly possessions, and those who have them not, the ten talented and the one, all meet on the same social platform.

The children of parents of all trades and professions receive their education at the same school, and not only during childhood, but often through life, associate upon terms of entire equality. We are so accustomed to this arrangement, that it is only when the attention

is directed to it that we can fully estimate its advantages; but we think no one can contemplate them without feeling convinced that such a course is in accordance with the Divine intention, and contributes very materially to the good of all classes.

Through it, the habits of indulgence which the affluent sometimes acquire, may be tempered by the example of the necessarily industrious, the rude and unlearned be stimulated to improvement by association with the educated and refined, while those of superior mental gifts and attainments may be instructed by perceiving that they are ignorant of a kind of knowledge which the less gifted may possess.

Such intercourse is calculated to promote the good of all, and as we practice it, brotherly love will continue in us and abound.

DIED, suddenly, on the 1st of Ninth month, 1866, ANN MORRIS, widow of Wm. C. Hancock, aged 74 years; a member of Philadelphia Monthly Meeting.

—, on the 2d of Ninth month, 1866, at the residence of her grandmother, Elizabeth Warner, Bristol, Pa., ANNA W., daughter of Rebecca F. and the late Dr. David J. Johnson, aged 16 years.

A Meeting of Friends' Association for the Aid and Elevation of the Freedmen will be held at Green St. Meeting House, Fourth-day evening, the 19th inst., at 7½ o'clock.

MARRIAGE CERTIFICATES FOR THE FREEDMEN.

EDITORS:—I spent the First-day of the week, 26th of Eighth month, at Goose Creek, Loudoun Co., Va. In the morning I attended public worship with the Friends. The lower part of their large brick house was full. During a season of devotional silence, many seemed to realize the precious truth of these expressive lines of Isaac Watts:

"In sweet silence of the mind,
My God, and there my heaven, I find."

Samuel M. Janney gave an excellent testimony, his mind being much impressed with the ancient expression—"would to God *all* the Lord's people were prophets." A stranger made a few remarks on the importance of being prepared, by the influences of the Divine Spirit, for the duties, conflicts, afflictions, tests and exigencies, which "Our Father" knows that we must meet. He applied this thought to the demands of our beloved country, in regard to our vast and augmenting responsibilities as citizens.

At 3 o'clock, P. M., by the timely and much

appreciated assistance of Friend Janney, I gave 25 "certificates of marriage" to Freedmen.

JOSEPH R. JOHNSON,
Supt. of Marriages.

FRAGMENTS OF BARK FROM OUR CLUB.

NO. IV.

9th month.

A long cherished desire to botanize a little in the pines, found an opportunity of fulfillment, quite unexpectedly, since our last date. With a pair of nimble-footed horses to our carriage, we entered that wide-spreading and ever-green region known as the Pines, about two miles east of Pemberton, New Jersey. The unimportant village of Turkey Town, with its four solitary houses stretching along the road for about two miles, we left a short distance to our right. A flock of quails, possibly on guard, between civilization on one side and their boundless wild homes on the other, permitted us to cross their track.

The breath of the pines! how delicious it was on that cool and cloudless summer morning; how different from the second-hand atmosphere of the city! A shower had fallen the evening before; the sandy roads, like life's road generally, were all beaten and hard; a fresh and sparkling life adorned alike the broad leaves of the oak and the needles of the pines. We were entering a fresher and a novel world; nature was taking us into her broadly-belted, woody, voluptuous arms; we felt old loves awakening within us, and old fancies being stirred; every thing was beautiful and alive; and beauty is for us what sunshine is for flowers, we turn towards it irresistibly; "for not a flower but gave some touch or freckle, streak or stain of His unrivalled pencil."

Our course bore in the general direction of south-east; and where all the roads are as much alike as the tracks of two boats in the river, it seemed to be only this idea of general direction that guided us through these interminable piney paths. But the eye accustomed to forest navigation becomes very skillful, so we soon came to an opening in the woods where a gang of men were at work preparing the ground for cranberry culture. With long, sharp hoes and broad glittering axes they cut the turf into slices, through roots and twisted fibres a foot in depth. This turf is then tossed into heaps and burned, or carted off and piled up into fences for these forest farms. It is rural work, hard indeed, but picturesque, and might tax the muscles of Hercules. The sand beneath the turf is then levelled off, and the plants are brought from their native swamps and set out in rows about one foot apart. By the third year they cover the ground and generally bear fruit in abundance. We saw many acres nearly

covered with large ripening fruit, reflecting the morning's sun in red and scarlet light. Two distinct plants grow in the bogs, each producing the cranberry; but the *true* plant for cultivation is the *Vaccinium macrocarpon*; its fruit is much the larger and the yield far more abundant. To bring this graceful and beautiful vine from its native mossy bed, and plant it all naked in the track of the plow or the harrow seems a wanton violation of its natural privacy and modesty, and we can forgive the act only when we remember the delicious pies, all steaming hot, such as our grandmothers use to make.

A very curious grass comes up in these bogs after the turf has been removed. It has tufted, flat, lanceolate leaves clothed with bristly hairs. It flowers both above and under the ground. Botanists call it millet-grass, or *Amphicarpum Purshii*. The aerial flower is borne on a loose, branching panicle, with fruit rarely ripening. Below the soil, subterranean peduncles branch off from the roots, bearing on their ends perfect, solitary flowers, which are followed by mature fruit. Thus a double life seems given to this humble grass, and for a weary time, like patience herself, it has been waiting and flowering beneath the turf, planting its unseen and unsunned seeds, till man should come and bid it cover the sod to feed his flocks. How wonderfully are the bogs of this life too, prepared for a higher culture by the little seeds of truth and love which have lain subterranean for so long a time, till turfed and drained by the Divine husbandman.

We now plunged still deeper into the boundless woods, and for miles the carriage rolled along without striking a stone. Along the road-side but few plants in bloom rewarded our keen search. The showy flowers of the large St. Peter's wort, (*Ascyrum stans*), like yellow lamps burning in nature's vast cathedral, enlivened these woodland aisles. We saw the *Liatris* looking so like an Aster, though not numbered with these starry plants; and some Asters themselves had opened their blue eyes, as if looking for the departing steps of summer. The Golden-rods too reminded us that summer was over, and that Bryant's "melancholy days" had come. By the language of the leaves we have learned to tell when summer is over. In June they *whisper* a soothing language; they sing of love and of hope for the fruit which is promised; in autumn they *rattle* with a harsher rattle, like the human voice in life's afternoon.

A belt of cedar crossing the road, and a rustic bridge seen before us, told that a stream flowed there. In a few minutes our thirsty horses were drinking the clear, cold water. Here, indeed, was a fairy spot for the botanist. On that dark, wine-colored stream

"The water-lily to the light
Her chalice reared, of silver bright."

The curious *Sarracenia*, now in fruit, filled its purple pitchers from the stream, and its lips veined with carmine, shone like flowers. But more singular still were the little fly-catchers, the *Droseras*, two species of which we found in abundance. The *D. longifolia* grew sometimes in the water, but elevated on its prolonged caudex, from which its curious leaves grow out, in shape, like little spoons, each one covered at the end, but only on the inner side with purple, glandular hairs. Little drops of a clear, adhesive liquid exude from these hairs, and glitter in the sunshine like morning dew. But woe to the insect that creeps into *Drosera's* fairy spoons! these glandular hairs close all around him, making escape hopeless. In a fine specimen we brought home, and now growing in the window, a little night-walking ant has been captured; his dead body is fixed right in the centre of one of the leaves. The *D. filiformis* is a much larger plant, of the same glandular, purple aspect, but its leaves arise from a bulb, and unroll at the ends like the ferns, thus resembling many little shepherd's crooks. They are as slender as knitting-needles and often ten inches long, terminating in points. On specimens we have growing numbers of mosquitoes have been caught. Who mourns their fate?

Minerva sat her servant to catch flies for her owls, but the servant fell asleep and neglected the birds of wisdom. As a punishment Minerva transformed him into these fly-catchers, and ever afterwards, whether he slept or woke, he has remorsefully followed his occupation.

The pipe-worts (*Eriocaulon*) raised their compact white heads out of the water, and as the current stirred their long stems, nodded gaily at the gorgeous tufts of *Batrachospermum*, emerald green, that floated from branches in the stream. This last plant, half of whose name only we have ventured to write, is among the prettiest of our fresh-water alga. Its central axis is surrounded by whorls of bead-like cells in linear series, and so slippery is it that a nimble hand is required to lift it from its watery home; and when the beautiful object is raised above the surface, ashamed of the rude treatment, it falls into a shapeless mass of jelly in the hand. But return it to its native element, and it springs out again rejoicingly in all its former beauty.

Fine specimens of *Sabbatia lanceolata* grew among the dark cedars, looking, by contrast, so pure in their large, white petals. But we cannot write all we saw nor half we felt in this wild, solitary and strange spot, where the shadows fell darkly on the brown water; and without superstition we shall think of it in the language of another as a

"Brook-bounded pine spinnie, where spirits flit,
And cold, wet ghosts, sit ringing jingling bells."

Just in time for dinner—a pastime never to be forgotten in the woods—we arrived at Shamong, a station on the Delaware and Raritan Bay railroad; but finding little to observe here from our point of view, we took a last look at Apple Pie Mountain, bounding the horizon in front of the hotel, and hurried on towards our destination. The same interminable oaks and pines, or pines and oaks, it is indifferent which, with an occasional Golden-rod or Aster in blossom, lined the roadsides, until we came to Pappoose river—river indeed—we could leap over it and have land to spare on either side. The botanical treasures here were abundant, though differing little from those just described. The *Batrachospermæ* especially surpassed all we had previously seen; great, long, streaming masses waved like Naiad's tresses in the stream, looking in that colored water suggestive and surpassingly beautiful. Oh! why are such exquisite objects hidden away so cunningly in the deep solitudes of these piney streams, if not to teach us to walk more thoughtfully along life's rushing river? We live too impetuously. Only the valleys deep, or mountains high and stony, strike against us in speeding thus along our orbit; we seldom rest on the green and level plains—flower spotted—where joy and happiness select to pitch their tent.

It was hard to say good-bye to Pappoose river, for we may never see it again; but night was coming, and on we drove, through high walls of cedar, over ancient corduroy roads—refreshing exercise—through bogs smiling all round with orchids (*Gymnadenia flava*) and *Polygala lutea*, and *Droseras* in profusion.

But our ride was shortening with the day, and the path we had been following for five and twenty miles came to an end at last in the unfenced yard of a house and stable, welcome promises of shelter for man and horse. An active, aged woman, a grandmother, I believe, received us hospitably, and her energetic step and general expression of capacity refreshed us wonderfully. There, on a patch of ground, elevated but little above the round-sweeping swamp, she rules her household, we doubt not, prosperously.

From her door the eye travels over a wide primeval landscape, which man's hand has neither made nor marred. Supper had been thankfully eaten, and now we had room and leisure to see the day die. Golden clouds lay in the west like pillows for the declining sun; and as the evening star shook out her long tresses over the grave of the God of day, the on-marching night brought out the other stars, like "sorrow brings out truth."

"Oh! we could weep to see the day die thus!
The death-bed of a day, how beautiful!
Linger ye clouds one moment, linger there;
Fan it to slumber with your golden wings;
Like pious prayers, ye seem to soothe its end."

Before the next morning's dew had left the pines—for grass there was none—we had ridden several miles on our journey homeward. The new road we had chosen led us gradually out from the thicker woods, until the white path lay out before us in one straight line, like a ribbon, unwound against the sky. We followed it leisurely, though sensible we were entering a region extreme in its barrenness and striking in its desolation. All that we could call trees receded slowly behind us, and when we came in the centre of this immense plain, probably forty miles square, the eye searched in vain for one solitary trunk rising above the level. Aged pines and oaks, only two feet high, fruit-laden, covered the landscape, and grew so closely and uniformly that beyond half a mile in distance their tops resembled a smooth, green lawn. To look up into trees is a common experience, but here we gazed down upon them, and were compelled to stoop in order to pluck an acorn or to gather a cone. In this desolate region not a sign of human life was seen, except the straight, white road—no cleared patch to tell where man's abode had been; no curling smoke from collier's cabin; and the only sound that broke the silence was the sharp grating of insect wings. One solitary hawk rose before us, and flew rapidly away into more promising hunting-grounds; and a few swallows on rapid wings, following their happy dreams to southern homes, were the only moving things we saw.

Silence and desolation! never before had we come in such close contact with these stern ministers. Yesterday we saw nature clothed in more than common loveliness; now we felt the sterner aspects of her countenance. Such contrasts are common enough all over the earth. The pines and oaks here are the same species that grow up into trees in other localities. Why then are they so dwarfed on these plains?

Fire occasionally sweeps over all this region, and the remorseless east wind, fresh from the Atlantic, dashes its rattling wings across the budding tops of its vegetation. The soil is like that in other places. No stream of water runs through the plains, and when the rain falls the desert drinks it without wetting its lips. Our horses seemed glad to enter once more among trees that did cast a shade, for they sped along quite nimbly, revealing nothing new, however, in plants or trees. A roof and chimney, not unwelcome tokens of civilization, glimmered through the opening in the woods, and a train of cars approaching in the distance, convinced us we were near the station we had hoped to reach. Here we exchanged the sandy track for the iron road, and were quickly whirled again into the old routine of city life.

Nothing can be very ill with us when all is well within.

For Friends' Intelligencer.

WILDWOOD LEAVES FROM NIAGARA.

The day was fast departing, when a little band of way-worn travellers reached the eagerly longed-for goal, and heard for the first time the thunders of Niagara. But all weariness was forgotten, as we gazed with unspeakable awe upon this mighty "sovereign of the world of floods," as he sat throned in glorious majesty, wearing a diadem of emerald and pearl.

I had heard and read much of these wondrous falls; summer after summer I had looked towards them with wistful longing, and imagination had painted the scene in such vivid colors that I feared fancy had outstripped the reality. But as I stood spell-bound at the foot of the great American Fall, I was constrained to confess with the mighty Queen of old that the "half had not been told me." It was an evening never to be forgotten. From early morning till the noontide the rain had steadily, though gently fallen; but as the day waned the shadows fled away, and not a cloud dimmed the brightness of the azure sky, save where the glorious king of day had veiled his face with a mantle of crimson and gold; summer clouds, seen only at the sud-setting, and which, see them where I may, always carry my thoughts far away, recalling to my mind by some strange law of association, the great law-giver of old, who veiled his face when he came down from dread Sinai, ere he stood in the presence of his people, because they feared to look upon its exceeding brightness.

Standing thus at the foot of this wondrous cataract, at the solemn hour of the dying day, our brows bathed with the spray of the falling waters, the eye weary with gazing, the mind perplexed and lost in wonder as we tried in vain to realize the immensity of the great volume of water that is ceaselessly pouring over this great wall of rock, the deep silence broken only by the noise of the falling waters, methought a voice from their midst was continually sounding in my ears, "The Lord is in his holy temple, let all the earth keep silence before him."

But the morrow showed me that scenes still more awfully sublime awaited me. Not till I had peered into the dread recesses of the Cave of the Winds, not till I had passed under Table Rock, and stood behind the mighty sheet of water that foaming and tossing pours headlong over the great wall of adamant at the Horse-Shoe Fall, did I fully realize all their grandeur and sublimity. The changing hue of the waters—their terrific roar as they dashed into the abyss below—the clouds of spray that are swept into our faces, almost taking away the breath—the fleecy clouds of rising mist, a spotless robe in which this mighty monarch of the waters delights to clothe himself, as in kingly array—the sunbeams sporting with the falling

waters—the glittering rainbow that comes rejoicing and “lays its gorgeous gems, a royal tribute,” at the feet of its master—all conspire to fill the mind with unspeakable awe and wonder. We scarcely dare to break the deep silence by a word. Oppressed by the solemnity of the scene, we long to bow the knee and worship in this holy temple—a temple hewn by no mortal hand—holier by far than the tabernacle set up in the wilderness on the gorgeous edifice that was erected at Jerusalem, into the inner court of which the High Priest alone might enter. Upon those altars the morning and evening sacrifices, the peace-offerings and sin-offerings, were offered. But here, in this glorious temple of the Almighty, incense is continually offered day and night—incense more precious by far than that of “Araby the blest.” No need of the chanting of the priests, of the sweet singers of old with their golden harps, for here the falling waters are ever singing an anthem to Him who “holds the waters in the hollow of his hand,” and acknowledge Him their Master, whose voice like unto the “sound of many waters,” the beloved disciple heard, when he beheld the glorious vision of one like unto the Son of Man, as he abode in the lonely Isle of Patmos, an exile for the work of God.

Niagara! Niagara! How often when far away, amidst the bustle and stern conflict of life, when wearied with the burden and with the heat of the day, when my soul is crying, “Oh! for rest, a little rest! Oh, but to lay my oars by and slumber for a season;” how often will my thoughts revert to thee, while I learn again the solemn lesson thou hast taught me. No obstacle hinders thy course, nothing impedes thy onward progress; onward, onward, ever onward—tending ever to the goal, as one who seeks the prize, thou speedest on unresting until thy work be done! And then after all the turmoil, all the struggle, all the ceaseless activity, how unbroken the rest, how deep the repose, as, the great work accomplished, thou glidest peacefully, noiselessly on towards the great sea.

A. R. P.

THE ATLANTIC TELEGRAPH.

Path of the lightning! more sublime
Than when its wrath the rocks have rent;
Surpassing space, outspeeding time,
Linking each severed continent!
Last wonder of a wondrous age!
Where thou hast touched, 'tis holy ground;
For there, as once by Israel's sage,
The presence of the Lord is found.
He saw it in the flame that played,
Yet injured not the desert's tree;
We trace it in the flame conveyed,
Harmless and quenchless through the sea.
Speak not of man's achievement now;
Speak but of Him who spread the main,
And taught His child its might to bow
Submissive to this thread-like chain.

He says to boastful pride, “Be still!”
This mightiest work of human hands
Does but his great design fulfil,
To bind in love earth's scattered lands.

Nerve of the world's gigantic form,
Quivering with thy mysterious life,
Speed only feelings pure and warm,
Nor thrill with pain, nor swell with strife.

SUNBEAM LOVE.

A darling little infant
Was playing on the floor,
When suddenly a sunbeam
Came through the open door;
And striking on the carpet,
It made a golden dot;
The darling baby saw it,
And crept up to the spot.

His little face was beaming
With a smile of perfect joy,
As if an angel's presence
Had filled the little boy;
And with his tiny finger,
As in a fairy dream,
He touched the dot of sunshine,
And followed up the beam.

He looked up to his mother,
To share his infant bliss;
Then stooped and gave the sunbeam
A pure, sweet baby kiss.
O Lord, our heavenly father,
In the fulness of my joy,
I pray that childlike feeling
May never leave the boy.

But in the days of trial,
When sin allures the youth,
“Send out the Light” to guide him,—
The sunbeams of Thy Truth.
And may this heart be ever
To Thee an open door,
Through which Thy truths, as sunbeams,
Make joy upon life's floor.

From “Self Help.”

CHEERFUL WORK.

One of the most valuable, and one of the most infectious examples which can be set before the young, is that of cheerful working. Cheerfulness gives elasticity to the spirit. Spectres fly before it; difficulties cause no despair, for they are encountered with hope, and the mind acquires that happy disposition to improve opportunities which rarely fails of success. The fervent spirit is always a healthy and happy spirit; working cheerfully itself and stimulating others to work. It confers a dignity on even the most ordinary occupations. The most effective work, also, is always the full hearted work—that which passes through the hands or the head of him whose heart is glad.

Dr. Arnold was a noble and a cheerful worker, throwing himself into the great business of his life, the training and teaching of young men, with his whole heart and soul. It is stated in his admirable biography, that “the most remarkable thing in the Laleham circle was the

wonderful healthiness of tone which prevailed there. It was a place where a new-comer at once felt that a great and earnest work was going forward. Every pupil was made to feel that there was a work for him to do; that his happiness, as well as his duty, lay in doing that work well. Hence an indescribable zest was communicated to a young man's feelings about life; a strange joy came over him on discerning that he had the means of being useful, and thus of being happy; and a deep respect and ardent attachment sprang up towards him who had taught him thus to value life and his own self, and his work and mission in the world. All this was founded on the breadth and comprehensiveness of Arnold's character, as well as its striking truth and reality; on the unfeigned regard he had for work of all kinds, and the sense he had of its value, both for the complex aggregate of society and the growth and protection of the individual. In all this, there was no excitement; no predilection for one class of work above another; no enthusiasm for any one-sided object; but a humble, profound, and most religious consciousness that work is the appointed calling of man on earth; the end for which his various faculties were given; the element in which his nature is ordained to develop itself, and in which his progressive advance towards heaven is to lie."

The useful influence which a right-hearted man of energy and industry may exercise amongst his neighbors and dependants, and accomplish for his country, cannot, perhaps, be better illustrated than by the career of Sir John Sinclair, characterized by the Abbe Greville as "the most indefatigable man in Europe." He was originally a country laird, born to a considerable estate situated near John o' Groat's house, almost beyond the beat of civilization, in a bare wild country fronting the stormy North Sea. His father dying while he was a youth of sixteen, the management of the family property thus early devolved upon him; and at eighteen he began a course of vigorous improvement in the county of Caithness, which eventually spread all over Scotland. Agriculture then was in a most backward state; fields were uninclosed, the lands undrained; the small farmers of Caithness were so poor that they could scarcely afford to keep a horse or sheltie; the hard work was chiefly done, and the burdens borne by the women; and if a cottier lost a horse, it was not unusual for him to marry a wife as the cheapest substitute. The country was without roads or bridges; and drovers driving their cattle south, had to swim the rivers along with their beasts. The chief track leading into Caithness lay along a high shelf on a mountain side, the road being some hundred feet of clear perpendicular height above the sea which dashed below. Sir John,

though a mere youth, determined to make a new road over the hill of Ben Cheilt; the old let-alone proprietors, however, regarding his scheme with incredulity and derision. But he himself laid out the new road, assembled some twelve hundred laborers early one summer's morning, set them simultaneously to work, watching over their labors, and stimulating them by his presence and example; and before night, what had been a dangerous sheep-track, six miles in length, hardly passable for led horses, was made practicable for wheel carriages, as if by the powers of magic. It was an admirable example of energy and well-directed labor, which could not fail to have a most salutary influence upon the surrounding population. He then proceeded to make more roads, to erect mills, to build bridges, and to inclose and cultivate his waste lands. He introduced improved methods of culture, and regular rotation of crops, distributing small premiums to encourage industry; and he thus soon quickened the whole frame of society within reach of his influence, and infused an entirely new life into the cultivators of the soil. From being one of the most inaccessible districts of the north,—the very *ultima Thule* of civilization,—Caithness became a pattern county for its roads, its agriculture, and its fisheries. In Sinclair's youth, the post was carried by a runner only once a week, and the young baronet then declared that he would never rest till a coach drove daily to Thurso. The people of the neighborhood could not believe in any such thing, and it became a proverb in the county to say of any utterly impossible scheme, "Ou ay, that will come to pass when Sir John sees the daily mail at Thurso." But Sir John lived to see his dream realized, and the daily mail established to Thurso.

The circle of his benevolent operations gradually widened. Observing the serious deterioration which had taken place in the quality of British wool,—one of the staple commodities of the country,—he forthwith, though but a private and little-known country gentleman, devoted himself to its improvement. By his personal exertions he established the British Wool Society for the purpose, and himself led the way to practical improvement by importing 800 sheep from all countries, at his own expense. The result was the introduction into Scotland of the celebrated Cheviot breed. Sheep farmers scouted the idea of south country flocks being able to thrive in the far north. But Sir John persevered; and in a few years there were not fewer than near 300,000 Cheviots diffused over the four northern counties alone. The value of all grazing land was thus enormously increased; and Scotch estates, which before were comparatively worthless, began to yield large rentals.

Returned by Caithness to Parliament, in which he remained for thirty years, rarely missing a division, his position gave him further opportunities of usefulness, which he did not neglect to employ. Pitt, observing his persevering energy in all useful public projects, sent for him to Downing Street, and voluntarily proposed his assistance in any object he might have in view. Another man might have thought of himself and his own promotion; but Sir John characteristically replied that he desired no favor for himself, but intimated that the reward most gratifying to his feelings would be Pitt's assistance in the establishment of a National Board of Agriculture. Arthur Young laid a bet with the baronet that his scheme would never be established, adding, "Your Board of Agriculture will be in the Moon!" But vigorously setting to work, he roused public attention to the subject, enlisted a majority of Parliament on his side, and eventually established the Board of which he was appointed President. The result of its action need not be described, but the stimulus which it gave to agriculture and stock-raising was shortly felt throughout the whole United Kingdom, and tens of thousands of acres were redeemed from barrenness by its operation. He was equally indefatigable in encouraging the establishment of fisheries; and the successful founding of these great branches of British industry at Thurso and Wick was mainly due to his exertions. He urged for long years, and at length succeeded in obtaining, the inclosure of a harbor for the latter place, which is perhaps the greatest and most prosperous fishing town in the world.

For the Children.

THE HAND.

BY WORTHINGTON HOOKER.

Man is the only animal that has a hand. The monkey has something like a hand; but, if you watch him as he takes things, you will see that it is a very bungling thing, compared with your hand.

The hand is often said to be a wonderful instrument. I would rather say, it is a wonderful *set of machinery*. An instrument or tool is commonly fitted to do but one thing, as a chisel, a spade, a saw, &c. But how many different things can be done with the hand!

Let us look at some things that the hand can do. See the blacksmith wielding the heavy hammer; how strongly his hand grasps the handle! See how it is done. The fingers and thumb are bent by those large muscles that are up in the arm. Now, these same fingers, that grasp the hammer so strongly, and do this heavy work, can be trained to do work of the lightest and finest kind. They can take hold of the pen and write. They can move the tools of the

engraver, making those fine lines that you sometimes see.

In the machines that man makes, there is no such changing from coarse, heavy work to that which is fine and delicate. A machine that does heavy work, does that alone, and one that does fine work, does that alone. No man ever made a machine that would pull a large rope one moment, and the next, pull a fine thread, and do the one just as well as the other. But that wonderful machine—the hand—can do this. It can grasp the rope firmly, and yet can take between its thumb and finger a thread so fine that you can hardly see it.

But the difference in the work of the hand is not merely in coarseness and fineness. It can do a great many different kinds of coarse work and a great many different kinds of fine work. The hand works very differently with different things. See how differently it manages a rope, a hammer, a spade, a hoe, a knife and fork, &c. It takes hold of them in different ways to work them. And then, as to fine work, how differently it manages a pen, an engraver's tool, a thread, a needle, &c.

If you watch people as they do different things, you can get some idea of the variety of the work that the hand can perform. See how differently the fingers are placed continually. You can see very well what a variety of shapes the hand can be put into, if you observe a deaf and dumb person talking with his fingers.

The most common things that we do with our hands are really wonderful! Watch one as he is buttoning up his coat; how easily his fingers do it, and yet it is a wonderful performance. Suppose a man should try to make a machine, shaped like the hand, that should do the same thing, do you think he would succeed? It would be very strange if he did. Suppose, however, that, after working a long time, he did really succeed, and that you saw his machine, with its fingers and thumbs, put a button through a button-hole, in the same way as you do it with your fingers; do you think that it could manage buttons of all sizes, large, middle-sized and small? No! it could only button those that are of one size. The different sized buttons would require different machines; and, besides, a machine that could button, could not unbutton. But your hand is a machine, that, besides buttoning and unbuttoning buttons of various sizes, is doing, continually, a great variety of things that machines cannot do. No machine can take up a pen and write, or even move a stick about, as your hand can. When some ingenious man makes a machine that can do any one thing like what the hand does, it excites our wonder, and we say, "how curious! how wonderful! how much like a hand it works!"

But the hand is not merely a machine that

performs a great many motions; it is, also, an instrument with which the mind feels things. And what a delicate instrument it is for this purpose! How small are the things which you sometimes feel with the point of the finger! As you pass it over a smooth surface, the slightest roughness is felt. A great deal of knowledge gets into your minds through the tips of your fingers. Messages are going from them continually by the nerves to the mind in the brain. The blind read with their fingers. They pass them over raised letters, and the nerves of the fingers tell the mind what the letters are, just as the nerves of your eyes are now telling your mind what the letters are in this book.

Now, while the hand is performing its different motions as a machine, it is generally very much guided by this sense of touch. If your hand had no feeling in it, it would make awkward business, even in such a simple operation as buttoning; and it could not do it at all, if you did not look on all the time it was doing it. Your eye-nerves would have to take the place of your finger-nerves, as in the reading of the blind the finger-nerves take the place of the eye-nerves. As it is, you need not look at your fingers while they are buttoning, for they are guided by the feeling that is in them.

There was once a woman who lost the use of one arm, and, at the same time, lost all the feeling in the other. She had a baby to take care of. She could hold it with the arm that had no feeling, because, she could work the muscles in that arm, but she could not do it safely, without looking at it all the time. If she looked away, the arm would stop holding the baby, and let it fall, for it could not feel that it was there. In her case, the eye-nerves had to keep watch, in place of the arm-nerves that could not feel.

You see that the hand is different from the machines that man makes, in two things—in the variety of things that it can do, and in the connection which it has with the mind by the nerves. While the mind by the nerves makes it do things, it knows, by other nerves, all the time, whether it is doing them right.

See now, what are the facts of this wonderful set of machinery. There are, in the hand and arm, thirty bones. There are about fifty muscles, and all these are connected with the brain by nerves. It is by them that the mind makes the muscles perform all the various motions of the hand and fingers, and then there are other nerves that tell the mind what is felt in any part of this machinery.

I have mentioned, in this chapter, a few of the things that are done by the hand, but there is no end to the things that can be done by this set of machinery. You can get some idea of this in two ways—by moving your hands and fingers about in all sorts of ways, and by think-

ing of as many as you can, of the different things that people, in work or in play, do with their hands. And observe in how many more ways the hand is useful than the foot is. The foot has but a few things to do, compared with the multitude of things done by the hand.

"SHE ALWAYS MADE HOME HAPPY."

Such was the brief but impressive sentiment which a friend wished us to add to an obituary notice of "one who had gone before." What better tribute could be offered to the memory of the loved and lost? Eloquence, with her loftiest eulogy, poetry, with her most thrilling dirge, could afford nothing so sweet, so touching, so suggestive of the virtues of the dead, as those simple words:—"She always made home happy."

WANTED TO PURCHASE.

Fourth volume, "Friends' Miscellany," (Edited by John and Isaac Comly,) @ \$1.00.

"Job Scott's Works," two volumes, (published by John Comly, 1831,) @ \$3 00 the copy.

TWO ATLANTIC CABLES.—The recovery of the old Atlantic Cable by the Great Eastern is a triumph of scientific skill, fully equal to that of the successful laying of the line now in use. To seek for a slender wire lost in a depth of two miles of water, was an undertaking of even greater magnitude than to lay a new line across the ocean, for the chances of success were exceedingly small, and the difficulty of lifting the cable to the surface after its recovery, proved to be as great as that of grappling it at the bottom.

The old cable parted on the 2d of 8th month, 1865, in latitude 51° 40' north, longitude 38° west, when thirteen hundred and twelve miles had been paid out. It was recovered on the 2d of Ninth month, after a diligent search for eighteen days, in latitude 51° 52' north, longitude 36° 03'—a considerable distance from the point where it had been lost just a year and a month before. The Great Eastern left Heart's Content on the 9th ult., to undertake the search, and the work of grappling began on the 12th. Four times the wire was brought to the surface, only to slip off the grappling irons and again disappear, but the persons engaged in the work persevered until the twenty-second day, when the broken end was finally secured, a splice made with the new line on board the Great Eastern, the work of laying begun, communications opened with Valentia, and the Great Eastern headed towards Trinity Bay. The admirable preservation of the broken cable is illustrated by the fact that Newfoundland is talking with the Great Eastern through Ireland.

The first official conference for the establishment of peace between Italy and Austria, was held at Vienna on the 3d inst.

The draft of some of the articles of the treaty was signed, and the arrangements for the transfer of Venetia, between Austria and France, to Italy, and the evacuation of the Quadrilateral by the Austrians, are in progress.

Austria has paid Prussia the stipulated indemnity,

and has begun to reduce her army to a peace footing.

Bavaria has ratified the peace, but rejected union with Prussia.

John Pierpont, the poet, died suddenly at Medford, Mass., on the morning of the 27th ult., aged 81 years.

A company has been formed in California for the purpose of digging a tunnel in the Sierra Nevada mountains, and through it conveying the waters of Lake Tahoe to the channel of a stream, and so across the valleys to San Francisco. It is designed also to supply a dozen interior towns, as well as the larger city, with water of great purity, the miners with water for carrying on their work during the dry season, and irrigate thousands of acres of land that are now unproductive.

THE INDIANS.—The Ottawas, a tribe of partially civilized Indians, are erecting a University for the education of Indians in Kansas. Their Chief, John Jones, is a thoroughly educated man, and is the leader in the enterprise, and associated with him are several other gentlemen, including the Government Indian agent for the Ottawas. By a treaty consummated two or three years since, the Ottawas gave twenty thousand acres of land from the centre of their rich reservation for the establishment of this University.

THE FREEDMEN.—The Commissioner of the Freedmen's Bureau in Fairfax county, Va., reports that the affairs of the freedmen are progressing favorably in the country, and that eight schools have been established, which are well attended, and which cannot but be instrumentalities of great benefit to the children of the freedmen. These schools are all under the care and are supported by Friends' Association of Philadelphia for the Aid and Elevation of the Freedmen. The feeling between the whites and blacks is reported as amicable, and no obstacles in the way of the operation of the bureau have been presented.

The Legislature of Kentucky, at its last session, passed a law taxing every male negro or mulatto over eighteen years of age the sum of one dollar for the education of colored children, but no provision has yet been made for this purpose by the State authorities.

Superintendent Wheelock reports for Sixth month, from Texas, one hundred freedmen's schools, of which 47 are day-schools, 24 night-schools, and 29 First-day schools, with an enrolled attendance of 4,447. The teachers number 65, and were mostly natives of Louisiana, or regularly acclimated, and so have been peculiarly exempt from disease. "These schools have been organized and sustained without aid from Northern charity, and without cost to government, the entire expense being defrayed by a monthly tuition fee of one dollar and a half paid to the teacher by each scholar. This is paid with general promptness, and suffices to support the teacher."

Reports from Alabama show that the crops in that State are likely to be short, from the ravages of the boll-worm and caterpillar.

A YOUNG WOMAN of experience wants a situation in a private school, or as Governess in a family. Address 721 tf. E. W. C., Hockessin, Delaware.

DOMESTIC DRY GOODS.—Always on hand, a large assortment of Domestic Dry Goods: Muslins of all kinds and of the best makes, both Bleached and Unbleached; Flannels of all grades, White and Colored, Twilled and Plain; Calicoes, Ginghams, Checks, Shirtings and Drillings, Bleached and Brown Table Linens, Towelings by the piece and by the yard. Men's and Boys' wear, a well assorted stock. 721 tfaxn. EKKIEL TYSON, 1638 Market St., Philada.

WALL PAPER!—Prices reduced to 12½, 18 and 20 cts. Gold and Glazed Paper Hangings reduced. Linen Window Shades and Fixtures, of neat designs and all sizes. My prices are moderate. Work done in the country. Call at E. E. JOHNSON'S "UNION SQUARE" DEPOT, No. 1033 Spring Garden St. below 11th, Phila. 26 aft.

THOS. M. SEEDS, HATTER, 41 N. 2d St. Always on hand, and made to order, a large assortment of Friends' Hats, as he makes a specialty of that part of the Hatter's business. 428, 55, 51200.

ORANGE GREEN BOARDING SCHOOL FOR GIRLS.—Situated at Kennett Square, Chester Co., Pa., will commence its next session, of 22 weeks, with a Spring Term of 16 weeks, on Second day, 9th mo. 24th. Terms \$4 per week. No extras for Latin, Greek, or French. Apply to SWITHIN C. SHORTLIDGE and SIDNEY FUSSEY, Kennett Square, or EMMA BOWMAN, Byberry Pa. amvtime

CONCORDVILLE SEMINARY.—The Fall and Winter Term of Concordville Seminary, commences Tenth month 1st, 1866. In addition to the regular course, a Commercial Department has been instituted. For circulars address, JOS. SHORTLIDGE, A. M., Principal, Concordville, Delaware Co., or MARGIE B. JACKSON, Kennett Square, Pa. amvtime

ELTON FEMALE INSTITUTE.—A Friends' Boarding School, situated on the Phila. & Balt. C. R. R. Next Term will commence on the 1st of Tenth month next. For Circulars, giving full information, inquire of EVAN T. SWAYNE, Principal and Proprietor, Smo. 15, 1866—awa at p 106. Kennett Square, Chester Co., Pa.

CHESTER VALLEY ACADEMY.—The next term of this Institution commences 9th mo. 3d, 1866. Whole number of pupils last year, 107,—60 boarders, 47 day pupils. Send for a Catalogue. J. K. TAYLOR, Principal. 84 101. 106. Catoctonville, Chester Co., Pa.

KENNETT SQUARE ACADEMY.—A Boarding School for Young Men and Boys will open the 1st of Tenth month, 1866, and continue in session twenty-four weeks. For Circulars, &c., address the Principal, SWITHIN C. SHORTLIDGE, A.B., 728 1929. Kennett Square, Chester Co., Pa.

DELMVUE FEMALE INSTITUTE.—The Fall and Winter Term of this healthfully and beautifully located BOARDING-SCHOOL FOR GIRLS will commence 10th mo. 1st, 1866, and close 4th mo. 12, 1867. For further information apply for a Circular to ISRAEL J. GRAHAM, } Principals. JANE P. GRAHAM, } Attleboro' P. O., Bucks county, Pa. 73 tf

CHESTERFIELD BOARDING SCHOOL FOR BOYS, situated on the Crosswicks Road, three miles from Bordentown, N. J. The Fifty-Third session of this Institution will commence on the 19th of 11th mo., 1866, and continue twenty weeks. Terms, \$85. For further particulars address HENRY W. RIDGEWAY, 4766 825t 3367 pmnxx pa in. Crosswicks P.O., Burlington Co., N. J.

FRUIT CANS AND JARS.—Fisher's Self-Sealing Cans, considered the best and most convenient now in use, a variety of Fruit Jars, and a general assortment of House Furnishing Goods, such as Cutlery, Tin, Iron, Wooden and Willow Ware, Clothes-Wringers, Carpet-Sweepers, &c. For sale by B. A. WILDMAN, 825 4t 915. No. 925 Spring Garden St.

SAMUEL TOWNSEND & SON, Produce Commission Merchants, No. 52 Light Street, Baltimore, respectfully solicit consignments of Grain, Flour, Seeds, Butter, Eggs, Beans, Poultry, &c. Constantly in store and for sale, Clover, Timothy, Orchard Grass, and other Field Seeds. Also Bone Dust and other Fertilizers. Dried Fruits bought and sold. 721 tfa. n.

LESSONS ON OUR COMMON SONG BIRDS.—Tickets for a course of Eight Lessons, \$3 00 each. Liberal reduction to Schools and Classes of over fifty persons. Address GRACE ANNA LEWIS, Care of EDWARD FARRISE, 800 Arch St., Philada. 66 3m.

CHERRY STONERS.—(seed 2 bushels an hour.) Pea and Bean Shellers, (shell 60 qts an hour.) Carpet Sweepers, Wire Dish Covers, Champion Cog-Wheel Clothes-Wringers, (we consider them the best yet invented for durability and convenience;) and a variety of other new articles of Hardware, Cutlery and Tools. For sale by TRUMAN & SHAW, 310a 636 No. 885 (Eight Thirty Five) Market St., below Ninth.

WM. H. MACOCK, General Furnishing Undertaker, No. 18 North Ninth Street.—A general assortment of ready-made Coffins, and every requisite for Funerals furnished. Being entrusted with the oversight of "Fair Hill" Burial Ground,—Funerals, and all other business connected with the ground, will be promptly attended to. 811. ly. was m p.

SELECTIONS FROM THE WRITINGS OF JOHN BARCLAY.

(Continued from page 435.)

1815, *January 15th.*—The following reflection is taken from a "weekly report," and was penned just previous to my attendance (by way of initiation into business) at my father's banking-house:—

What an eventful period is this, what an epoch in my life! When I look back upon the past, when I review the calm and sequestered hours which have been so graciously granted me, and which I have so happily enjoyed, I cannot help concluding, that the same Almighty hand, which has hitherto upheld me, will be "stretched out still." And when I cast my eye forward to the future, to that dark and dreary scene, that chaos of troubles and perplexities, which human life, for the most part, discloses, I remember, with consolation, the expressions of the apostle, "We know that if our earthly house of this tabernacle were dissolved, we have a building of God, an house not made with hands, eternal in the heavens." The time that has already elapsed, seems to be a season of preparation, mercifully allotted to me, in order to qualify me for the part which I am henceforth to act; and those principles, which I have stored, must now, with assiduity, be put in practice. The greatest discretion employed at this first setting out in life, will not be sufficient to direct and keep me in the right path, unless ac-

companied with distrust in myself, and a corresponding confidence in Divine assistance.

1815, *January 29th.*—The very great benefit which may be (and which I trust is) derived from the system of self-examination that I have adopted, is more and more apparent to me every week. Every week have I to reprove, to exhort, to encourage, and to recommend; as it were to call in my accounts, and to ascertain the real state of my heart; whilst every week—yes, every day—give me abundant cause for contrition and abasement. I am thus led to a more intimate knowledge of the state of my internal affairs, and of the filth which still lurks within; whilst I am rendered less confident in my own unassisted efforts, and more desirous to be strengthened in obedience.

Same date.—Though I feel myself but a novice in serious subjects, yet further experience gives me fresh ardor and eagerness to seek after and attain to that knowledge, which alone "maketh wise unto salvation." The more I study religion, and the more time and attention I devote to it, the more I feel persuaded of its unspeakable importance. There is no pursuit in life, whether of a philosophical, literary, commercial, or worldly nature, which can be compared with the pursuit of religion, in respect to the peace and joy, the profit and the pleasure, which it yields to the willing student. The immediate good effects of it, are only exceeded by its ultimate consequences. In prosperity, the true Christian is taught to be watchful and

humble, and to consider that "the Lord hath given, and the Lord can take away." In adversity, how happy he is, if he do but remember, that "this, also, is the Lord's doing." In all that he does, his design is ever to do good,—his motive the glory of his Maker.

Same date.—O! Lord, thou hast been pleased to bruise me with a sense of my own iniquity; thou hast, in some degree, opened to me my own heart; deliver me, in thine own time and way, from under the burden of my transgressions; still continue to show me thy loving kindness, and to direct me onward in the path that leads to salvation. I know not, and it is better, O Lord! that I know not, in what condition or situation to-morrow's light may find me; nor can I see before me;—yet I pray thee, if I do forget or forsake thee, O! forsake me not utterly, for thy mercy's sake.

1815, *February 5th.*—O! may I not neglect or delay to take such effectual measures, as may certainly lead me to the attainment of a firm belief in the salvation brought about by the Saviour of men. May I not be satisfied with an historical acquaintance with these things, nor be content with what others may say, write, bear witness of, or believe in, respecting a Redeemer; but may I be encouraged, like Thomas the Apostle, to see, and feel for myself; and may I make an availing use of every opportunity, every appointed means to gain the excellency of the knowledge of Christ Jesus, and him crucified,—that intimate knowledge and inward experience, compared with which, Paul counted all things else but as "loss" and dross. Surely, such as are "kept by the power of God through faith unto salvation," are none but those, who have submitted themselves to the government and dominion of Christ, by his Spirit in their hearts; and these truly know Him to be their Redeemer.

1815, *February 12th.*—O! for that prevailing seriousness, that habitual state of dependence, humility and gratitude, as in the sight of the Supreme Being;—that disposition of mind which inclines to "pray without ceasing," "in every thing to give thanks," and to "avoid every appearance of evil." These symptoms of a soul that "walks with God," have been, indeed, greatly wanting. Although the outward tokens of a religious life, may have continued much the same as before; yet have I to acknowledge and lament a general tendency to indifference and coolness, with respect to religious matters, as well as a neglect and forgetfulness of Him, whose right it is supremely to reign in the hearts of His people. How often is this half and half—this lukewarm temper, which loves the Lord with divided affection, the beginning of more flagrant transgression. But may I not be discouraged,—rather may I remember that He, who, by his reproving witness, has discov-

ered to me this evil, has done so that I should, through His assistance, subdue it; and that he will, by no means, withhold that strength which will enable me to do so.

When I look back at the long course and succession of blessings which have been experienced by me,—when I review the opportunities which I have enjoyed of making the attainment of vital Christianity my constant study; and then see how very small has been my advance in religious principle and practice, I cannot help feeling extremely sensible of the long suffering and compassion of that Being, who has not merely heaped upon me, day after day, and year after year, innumerable outward blessings, but has, in much mercy, been pleased to rescue me from a state of hardened forgetfulness and abandonment of Himself. He has opened a way to me, whereby I might escape that bondage to sin, (which did, at one time, nearly overwhelm me,) and that punishment which would otherwise have inevitably overtaken me. He still continues his forbearance and His tender mercies, though I so often decline from the path which He has plainly pointed out. How long, then, O! my soul, wilt thou despise the riches of His grace, and reject his offered and extended salvation? How long wilt thou, in words, acknowledge, and, in very deed, deny Him? How long wilt thou, in praises and in prayers, draw nigh unto Him, whilst, in the particular conduct of every day, thou dost abuse His gifts, forget and forsake the Giver?

1815, *February 19th.*—O! how transient is that momentary glimmer—that faint and feeble spark, which, at intervals, seems to rekindle and revive in this poor, frail tenement of mine! How soon is it quenched and smothered,—how quickly does it disappear and leave me cold and cheerless! What apathy, what indisposition and insensibility to the beauty of eternal things, does the absence of this glorious light leave in the soul, which longs for the arising of the Sun of righteousness—for the appearance of that "which shineth more and more unto the perfect day!"*

1815, *February 26th.*—Blessed be the Lord! I think that I am, in some small degree, enabled to trust and believe, that there has been some little growth and advancement in lowliness and meekness, which are the groundwork of true wisdom. How shall I sufficiently express what I feel, when I look upon myself, when I consider what and where I have been, and who He is, that has lifted me out of the mire, and rescued my soul from destruction.

1815, *June.*—I have attended the Yearly Meeting for the first time this year through all the sittings, and have had very much satisfac-

* February 23d was the first Monthly Meeting I attended; it was at Wandsworth.

tion therein; especially, in observing the consistency which seems to run through the conduct of the business coming under the care of Friends. This was to me a very favored time, and my soul was reached wonderfully by the visitations of the dayspring from on high. Though I have but little to remark, either on the subject of Friends, or their discipline, I cannot help expressing how grateful I feel, for the blessing of being, in some degree, alive to serious impressions, and thirsting after a knowledge of truth.

1815, *June 2d*.—How many are there who live in a state of sin, of blindness as to their best interests, or of drowsy indifference! The more I seek to know the Lord, and to remember his mercies, the more plainly and clearly does he graciously manifest himself; and the longer I meditate on his attributes, the more firm is my conviction, that the ardent and heavenly desires with which he has favored me, will not sleep in death, but will pass uninjured by the wreck of nature to those hallowed and happy regions, where nothing will interrupt their enjoyment for ever!

1815, *September 5th*.—Surely one would think the bitter cup, of which so many, so very many, of our fellow creatures have to drink, ought to be enough to stop the dissipation of the gay, to check the extravagance and the avarice of the rich, to make the heedless pause, and the wicked consider. For my own part, when I hear and see everywhere around me the affliction of the destitute, the cry of penury, the groan of sickness, and every extremity of anguish and trouble, both of body and mind, I cannot but exclaim—"What am I, that I should be blessed so abundantly above others in every sense? and what ought I not to be, who am so eminently favored with almost every variety of earthly comfort? How shall I dare to encourage or give way to pride, envy, passion, intemperance of joy, or levity of heart, when, in one short day, I may be deprived of every thing in which I have outward comfort and confidence, and, in one poor moment, may be levelled in the dust from whence I came?"

1815, *September 22d*.—There is that to be met with and felt, in the company of and intimacy with Friends, which is better experienced than described—a happy, serene and calm temper, full of forbearance and love, and affection to all, and well seasoned with sober humility—such as elsewhere I have never been able to find.

1815, *November*.—"Simon, sleepest thou? Couldst not thou watch one hour? Watch ye and pray, lest ye enter into temptation?" I have been more than once strongly reminded of this short but very impressive exhortation of our Lord to his slumbering disciple, and of the salutary exhortation that follows it. I have

thought how much need there is for every one of us, often to apply the same language to ourselves. O! how very few of us ever watch even one hour! and although I am willing to believe many do remember Him, on whose extended mercy they every moment depend; yet, this season is, I fear, but short, and the impression but transient. I cannot, therefore, help expressing my desire that every one of us may be enabled to stand continually in the fear of the Lord, to bear in mind our exceeding great liability to evil, and to depend not upon our strength, but upon the power of Him, through whose strength alone we can do valiantly.

No date; probably late in 1815.—The first thing that I would recommend to any one seriously inclined, is, that he should not quench or stifle, in any manner, the precious spark, which the Lord, in infinite compassion, has kindled within him. O! let such an one do nothing which is likely to impede the growth of this divine seed of grace within. Let not any deny, to his own soul, the nourishment which is to support it; for though the world esteem him very lightly, and even ridicule him, yet "if his own heart condemn him not, then has he confidence towards God."

No date.—I am much displeased when I see a person accommodating his character and turn of mind to those among whom he is cast, changing his appearance according to the situation he is placed in. I see little apology for such persons in that saying of the Apostle, "I am made all things to all men, that I might, by all means, save some;" because such persons omit the latter part of that text,—“and this I do for the gospel's sake.” In those of whom I speak, there is no intention by this variable conduct to serve others, but rather to save and deliver themselves from the scandal, odium and reproof, likely to be cast, by serious people, upon levity, folly or sin, and by the less sober upon any thing like sobriety. There is a consistency of character, which, whilst it does not bring on religion the charge of moroseness and unyielding severity, yet does not deny its Great Master; and which, though it does not obtrude its opinions or practices upon the notice of others, is not backward to show decidedly to which standard it belongs, and under whose banner it ranks.

No date.—The more I am among Friends, and see the principles and nature of the religion which they profess, the more I feel convinced that true prayer is not that of the lips, or of the mere unrenewed understanding, but of the heart; that it neither consists in, nor depends upon, a peculiar dress, an appointed form of words, a particular posture of body, or what is termed a consecrated place. But this is what it does essentially and unequivocally require,—that the soul put on the garment of faith,—

that the expressions used (if there be any) be those of the heart—that the inward posture of the mind be humble,—and that the heart be the sanctified temple, out of which prayer comes.

(To be continued.)

AN INCIDENT.

A member of the Society of Friends (Susannah Corder) was travelling with three other passengers, one an elderly man, who proved to be a minister of the Anglican establishment; the others, collegians from Oxford. The latter engaged earnestly in conversation on the attempt which they alleged was making to introduce popery into the university. After some time the clergyman remarked—"Oh, young man, I believe if it had not been for the Society of Friends, the church would have been in popery long since." "How, sir! what can you mean?" "Why, I mean that I believe the fact of a society maintaining the principle of the uselessness and undesirability of all forms in the worship of the Almighty, has prevented us from going the lengths to which we might otherwise have gone; and I further believe the day is coming when our altars, and our crosiers, and our robes, and our surplices, and much more of our paraphernalia, will go to Babylon whence they came."

The collegians were much surprised, and one of them said—"Sir, if your bishop knew what you have said to us, you would in all probability be ungodly." "Ah, young man," replied the clergyman, "my bishop knows much more than I have told you: he knows, for one thing, that it is long since I have dared to administer baptism as required by our church." Then turning to S. C., he said—"Madam, I can easily see the way from us to you, but I cannot see the way that some of you are finding from you to us.—*The British Friend.*"

PRAYING EVERYWHERE.

We are not like children that must go out from our Father's house in the morning, to spend the working-day away from him, and only to come back to him at evening. No, we are with him, and he with us, all the day through. We never leave his presence; he is beside us through all our work, our weariness, our perplexity, our worry all the day. And we may tell him what we want, and how we are feeling—not stiffly and formally twice a day, at morning and evening—but as often as we please. He will not weary of listening to us, if we do not weary of speaking to him. We need not limit ourselves to morning and evening prayer. Twenty times, and far more than that, as you go through your day's work, the eye may look up for a moment, the heart may be lifted; the brief word may carry up to God's ear the story of your need, and of your trust in Him.

From Friends' Miscellany.

TESTIMONY CONCERNING RICHARD COOPER.

On the Third-day of Tenth month, 1820, our esteemed friend Richard Cooper departed this life, at about the age of one hundred years. He was a descendant of the greatly oppressed Africans, a native of the Island of Barbadoes, and by birth a slave. At the age of twelve or fourteen years, he was brought to this country, and sold; having frequently changed owners, he at length became the property of a member of the Society of Friends; and at the time of the total emancipation, by the Society, of its slaves, he was liberated from an unmerited and unjust bondage. About this time he became convinced of the efficacy of the religious principles of Friends, which he ascribed to the tender care and frequent admonitions of his mistress, in directing his mind to the principle of Divine Grace and truth in the heart. He was a frequent attendant of Friends' meetings, and in advanced life, requested to be admitted a member of the Society, and was received. His conduct and conversation corresponding in good degree with his profession, he became generally respected and beloved.

By the people of color in his neighborhood, he was consulted in most matters of controversy in which they were interested, and his good counsel always tended to, and often effected, an amicable adjustment of differences. He appeared generally concerned to promote friendship and brotherly love; and in his friendly visits, he mostly had a word of religious exhortation. Having no school learning, and being desirous for advancement in the knowledge of best things, he would, when opportunities offered, request the Scriptures of truth and other good books to be read for him; esteeming them valuable in directing the mind to that source from whence all true wisdom comes. In his last sickness he expressed a thankfulness that Friends had received him into membership, and that he had been so favored as not to have been burdensome, and hoped that his conduct had brought no reproach upon the Society. It was truly comfortable to visit him; not murmuring or complaining, he appeared thankful and resigned, numbering the many mercies and blessings which had been bestowed upon him, having a word of consolation or encouragement to all. He expressed a desire for the prosperity of the Society, and particularly for the rising generation, that they might be willing to take the yoke of Christ upon them, and so become strengtheners to their elder brethren, and fitted to stand firm in the cause of truth, of which he said they never would have cause to repent.

Upon taking leave of those who visited him, he generally expressed something to them by way of blessing. His last advice to his children was, that they should not fall out about

the little stuff he had to leave behind him. Through the gradual decay of nature, his long and useful life was brought to a close, and the belief is entertained that he has entered into the rest prepared for the righteous.

To record the Christian virtues of the deceased, that we may imitate their example, is sanctioned by that voice which spake from heaven, saying, "Write, blessed are the dead which die in the Lord from henceforth: yea, saith the Spirit, that they may rest from their labors, and their works do follow them."

Signed by order of Little Creek Preparative Meeting, in Delaware, held Fourth month 5th, 1821, by

SAMUEL PRICE,
Clerk to the meeting this time.
REBECCA HANSON,

For Friends' Intelligencer.

PRINCIPLE AND TESTIMONY.

The early founders of our Society recognized the Divine will, or "inner light," and its operations and effects on the soul as the "Truth," and they were led out of the errors of the times, and testified against them. This was the *sole origin* of our testimonies. The communicated will of the Deity to their minds was their only rule of life, and they forsook the practices and ideas that were at variance with this law, and with those who upheld these practices, they held no religious fellowship. Principles, and the laws which are the operations of principles, never change. The outward world is ever undergoing change. The things of to-day are not those of the past, neither is society nor the human mind destined to immobility. As the state of individuals changes, society changes; and the rules once indispensable, are not adapted to a future and changed state.

We may see this in the progress of our Society. We all admit that early Friends were faithful to the light manifested to their understanding, but, strange as it may seem to us, the practice of enslaving their fellow men did not, for a long time, appear to them to be wrong. Even George Fox left no record that bore directly against holding slaves. But as Friends lived in and under the all-regulating principle, they, in process of time, had a testimony against it. Their testimonies against War, Oaths, and a Hireling Ministry, were very positive, but those against the use of intoxicating liquors and dealing in lotteries were feeble. As new customs and modes of life are introduced, old ones often pass away; thus our former rules and testimonies becoming measurably obsolete, fresh testimonies must be borne, and new rules of church government enacted for our protection.

The sooner we come to believe in this truth, the better it will be for us, as a people; as there

is no standing still in nature, so there is none in the human soul. Our only hope, our only law, our only salvation, is in the one universal Power or principle, call it by what name we will, or let it appear in whatever manifestation it may. Testimonies never built up our society, and can never sustain it. It is possible for a person to maintain all our testimonies, as the young man did, that came for instruction to Jesus, and not possess the one thing needful for an entrance into the Kingdom of Heaven, obedience and faith in God. All may be done in obedience to the rules of the Society of which we may be a member, in the same spirit as we conform to the rules of outward or business associations. All may be done to appear well before men, and for the sake of a good reputation, while every motive of the heart may be selfish, and of course alien to the spirit of God.

Whether we do little or much in the religious world, make much or little profession, maintain many or few testimonies, if the soul immortal is centred in God our Saviour, we are safe in the present and in eternity.

ISAAC HICKS.

WESTBURY, L.I., 8th mo., 1866.

LITTLE SINS.

There is a tendency to fear great sins, and a tendency to be indifferent to little ones. There are certain great sins that, being committed, may give such a moral shock to a man's constitution as to be fatal in their effects; but these are not usually fallen into. Men are not very much in danger of great sins. They are ten thousand times more in danger of little ones. Men are not in danger of committing perjury half as much as they are of telling "white lies," as they are called. Men are not so much in danger of counterfeiting as they are of putting on little minute false appearances. Men are not so much in danger of committing burglary as they are of committing the myriad infinitesimal injustices with which life is filled. Any particular act, to be sure, such as I have alluded to, which of itself is simply as a particle of dust, is not so culpable as a great sin; but what is the effect on the constitution of a series of these offences that are so small as to be almost imperceptible? It is these little sins, continued and multiplied, that by friction take off the enamel of a man's conscience. It is these numberless petty wrongs that men do not fear, persisted in, that are the most damaging. I should dread the incursion into my garden, in the night time, of rooting swine, or trampling ox, or browsing buffalo; but, after all, aphides are worse than these big brutes. I could kill any one, or half a dozen, or a score of them, if they came in such limited numbers; but when they swarm by the billion, I cannot kill one in ten thousand of them—and what can I do?

Myriads of these insignificant little insects will eat faster than I can work, and they are the pest and danger of the garden, as often my poor asters and roses testify. There is many and many a flower that I would work hard to save, but the fecundity of insect life will quite match and overmatch any man's industry. Weakness multiplied is stronger than strength.

Now, that which does the mischief is these aphides, these myriad infinitesimal worms, these pestiferous little sins, every one of which is called *white*, and is a mere nothing, a small point, a mote, a speck of dust. Why, many a caravan has been overtaken, smothered, and destroyed by clouds of dust, the separate particles of which were so minute as to be almost invisible.

Many men are afraid that they will be left to some great sin—and they ought to fear that; but they have not the slightest fear of that which is a great deal more likely to bring them to condemnation—the series of petty violations of conscience, and truth, and duty, with which human experience is filled. Here is where every man should most seriously ponder his condition, and ask himself, “What is the effect of the conduct that I am day by day evolving? Am I educating myself toward moral sensibility, or away from moral sensibility? Am I going toward higher and higher conceptions of duty, or going toward lower and lower ones? Do I rebound from conscious wrong with more and more aversion of moral constitution, or do I go through conscious wrong with less and less aversion of moral constitution? Which way am I travelling?” It is a momentous question.

Every man should take heed to the way in which he treats his conscience. If the light in him be darkness, how great is that darkness! When we put a lighthouse on the coast, that in the night mariners may explore the dark and terrible way of the sea, we not only swing glass around about it to protect it, but we enclose that glass itself in a network of iron wire, that birds may not dash it in, that summer winds may not sweep it out, and that swarms of insects may not destroy themselves and the light. For if the light in the lighthouse be put out, how great a darkness falls upon the land and upon the sea! And the mariner, waiting for the light, or seeing it not, miscalculates and perishes.

A man's conscience ought to be protected from those influences that would diminish its light, or that would put it out; but there are thousands of men who are every day doing their utmost to destroy this light. When they do wrong, their conscience rebukes them, and they instantly attempt to suppress it and put it down. They undertake to excuse themselves and palliate the wrong. The next day, when they do wrong, the same process goes on, and

they make a deliberate war against their conscience; for it is a very painful thing for a man to do wrong and carry the hurt, and he feels that he must overcome this tormenter if he would have any peace. The next day, when he does wrong, the same process is again repeated, and he says, “My interest, my business, and my social position require that I should go along this way, and I will not obey the voice within me that cries out against it, but will swallow it down and cover it up.” And he declares war against the light of God in the soul—the very point from which is to flow luminous guidance. He attempts to suppress the best thing in him—the foundation of the kingdom of God; for if the kingdom of God is to be built in a man, it is to be built on the foundation of conscience and love.—*H. W. Beecher.* -

THE TEACHINGS OF SORROW.

BY F. W. R.

If ever that superficial covering of conventionalities falls from the soul, which gathers round it as the cuticle does upon the body, and the rust upon the metal, it is when men are suffering. There are many things which nothing but sorrow can teach us. Sorrow is the great teacher. Sorrow is the realizer. It is a strange and touching thing to hear the young speak truths which are not yet within the limits of their experience; to listen while they say that life is sorrowful, that friends are treacherous, that there is quiet in the grave. When we are boys, we adopt the phrases that we hear. In a kind of prodigal excess of happiness we say that the world is a dream, and life as nothing—that eternity lasts forever, and that all here is disappointment. But there comes a day of sharpness, when we find, to our surprise, that what we said had a meaning in it; and we are startled. That is the sentimentalism of youth passing into reality. In the lips of the young such phrases are only sentimentalities. What we mean by sentimentalism, is that state in which a man speaks things deep and true, not because he feels them strongly, but because he perceives they are beautiful, and that it is touching and fine to say them—things which he *fain would* feel, and fancies that he *does* feel. Therefore, when all is well, when friends abound, and health is strong, and the comforts of life are around us, religion becomes faint and shadowy. Religious phraseology passes into cant—the gay and light and trifling, use the same words as the holiest; till the earnest man, who *feels* what the world is sentimentalizing about, shuts up his heart, and either coins other phrases, or else keeps silent.

And then it is that, if God would rescue a man from that unreal world of names and mere knowledge, He does what He did with Job,—He strips him of his flocks, and his herds, and

his wealth; or else, what is the equivalent, of the power of enjoying them—the desire of his eyes falls from him at a stroke. Things become real then.

Trial brings man face to face with God; the flinty veil of bright cloud that hung between him and the sky is blown away; he feels that he is standing outside the earth, with nothing between him and the Eternal Infinite. O! there is something in the sick-bed, and the aching heart, and the restlessness, and the languor of shattered health, and the sorrow of affections withered, and the cold, lonely feeling of the heart, which is felt when God strikes home in earnest, that forces a man to feel what is real and what is not. This is the blessing of affliction to those who will lie still.

It was no fortuitous concurrence of atoms which massed themselves into a world of beauty. It was no accidental train of circumstances which have brought the human race to their present state. It was a living God. And it is just so far as this is the conviction of every day, every hour, every minute, my Redeemer *liveth*, that one man deserves to be called more religious than another.

The present moment is, in a special sense, the important moment, the divine moment, the moment which we cannot safely pass, without having the divine blessing upon it.—*Upham.*

For Friends' Intelligencer.

In No. 18 of Friends' Intelligencer, there was published an Extract from Elias Hicks' journal, describing his exercises in a meeting at Pearl Street, in New York, on account of members of our Society mixing in with the associations of other people in their governments and politics, their Bible and Missionary Societies, and pretended charity associations, which had a very hurtful tendency for reasons there given.

At the conclusion of this extract, he says, "I was led to communicate largely on those subjects in a close searching testimony; and the Lord's power was felt to prevail, and the meeting brought under a solemn covering."

Such a statement of such an exercise, attended with such power, and with such a solemnizing result, and left as a legacy for our edification by an experienced faithful servant of his Divine Master, should be suffered to have its due weight; and though it may be felt to be a sharp reproof to some high in profession with us, it is better meekly to receive it, though it may not coincide with our opinions, than to indulge in a spirit of criticism. I was therefore sorry to see the editorial remarks on the subject in the same number which says, "While there may have been occasions for the exercise at the time it was delivered, we are not prepared to counsel our members indiscrimi-

nately to refrain from co-operation with others, for objects promotive of good, but believe it is more our province to encourage them to 'mind the Light,' individually."

Might we not say the same of our discipline. If we would all "mind the Light," what need would there be of any hedge of preservation, as our code of laws are sometimes called? And may we not as justly charge our select meetings, and our peculiar dress and address, with being sectarian, as to put such a construction on the counsel of this dignified apostle, delivered on such a solemn occasion, from a concern that members of his religious Society might be preserved from the many temptations that are presented, by mingling too familiarly with those who do not feel bound to support those principles and testimonies which we think important?

Elias Hicks did not desire that our members "should be taken out of the world," but that "they should be preserved in it." He did not recommend exclusion from friendly intercourse or necessary business transactions with others than his own sect; and I consider it calculated improperly to divert the mind of the reader from his true meaning, to enumerate all those benevolent and literary institutions named in the editorial alluded to as being objectionable to him, as I perceive nothing in the Pearl Street sermon to justify it. Again, the criticism says, "We believe approval or condemnation will not be in accordance with whether we have or have not kept within the bounds of sect." We profess, I suppose, to be a sect, and as a sect, we have some peculiar rules and views; and if we believe them right, approval or condemnation will be meted to us according to our faithfulness or unfaithfulness in carrying out those rules and views, although they may be sectarian in character; and surely we shall be condemned if we have not endeavored to guard every avenue to evil.

The Society of Friends, although fully believing in the all-sufficiency of the Spirit of Truth, to preserve us in every emergency if faithfully obeyed, have nevertheless not presumed to think we are so strong as to expose ourselves to temptations when they can be avoided; and hence rules of discipline have been adopted from time to time, and much cautionary advice has been handed forth, designed as a hedge of preservation, and as warnings to avoid temptations, that often present in passing through this probationary scene.

T. W.

NEW BRIGHTON, PA.

[The strictures of T. W. may speak for themselves, but we have carefully reconsidered the Editorial referred to, and believe our correspondent has taken an extreme view of our

comments. We were far from desiring to censure E. Hicks or any other Friend who may be called upon to advocate exclusiveness of action in our members; but we do honestly offer the view as consistent with the liberality of Christianity, that we are to leave individuals to their own convictions in relation to all matters in which there is no compromise of the testimonies held by our Society. "*Mind the Light,*" was the imperative injunction of one who, through that blessed medium, had arrived at the knowledge of the Truth as professed by Friends, and it is of equal importance now for all to heed this salutary counsel.]—Eds.

FRIENDS' INTELLIGENCER.

PHILADELPHIA, NINTH MONTH 22, 1866.

FRIENDS TRAVELLING IN THE MINISTRY.

—John Parrish has obtained a Minute from Woodbury Monthly and Salem Quarterly Meetings, to attend the meetings composing New York Yearly Meeting, and to appoint some within its limits as way may open.

DIED, on the 29th of Sixth month last, in Clarke Co., Ohio, at the residence of her daughter, Cornelia J. Pierce, HANNAH HOWELL, in the 73th year of her age. Her work being finished, her spirit departed without apparent bodily suffering.

—, on the 3d of Fifth month 1866, at the residence of her daughter, near Vermont, Fulton county, Illinois, LYDIA WILDMAN, aged 69 years.

—, on the 25th of Fifth month, 1866, in Spava, Fulton county, Ill., JOSIAH WOOD, aged 49 years, after a long illness, which he bore without a murmur.

—, on the 12th of Ninth month, 1866, in Philadelphia, EDITH, only child of John L. and Emily P. Shoemaker, aged 11 months.

—, on the 15th of Ninth month, 1866, in Philadelphia, THOMAS SHOEMAKER, in the 49th year of his age.

The Greek and Latin Languages—Extract from an Address delivered recently at Harvard College. By F. W. HEDGE.

The literary argument for enforced study of Greek and Latin in our day has not much weight. What I call the glossological argument has more. Every well educated person should have a thorough understanding of his own language, and no one can thoroughly understand the English without some knowledge of languages which touch it so nearly as the Latin and the Greek. Some knowledge of those languages should constitute, I think, a condition of matriculation. But the further prosecution of them should not be obligatory on the student once matriculated, though every encouragement be given and every facility afforded

to those whose genius leans in that direction. The College should make ample provision for the study of ancient languages, and also for the study of the mathematics, but should not enforce those studies on minds that have no vocation for such pursuits. There is now and then a born philologist, one who studies language for its own sake,—studies it perhaps in the spirit of "the scholar who regretted that he had not concentrated his life on the dative case." There are also exceptional natures that delight in mathematics, minds whose young affections run to angles and logarithms, and with whom the computation of values is itself the chief value in life. The College should accommodate either bias, to the top of its bent, but should not enforce either with compulsory twist. It should not insist on making every alumnus a linguist or a mathematician. If mastery of dead languages is not an indispensable part of polite education, mathematical learning is still less so. Excessive requirements in that department have not even the excuse of intellectual discipline. More important than mathematics to the general scholar is the knowledge of history, in which American scholars are so commonly deficient. More important is the knowledge of modern languages and of English literature. More important the knowledge of Nature and Art. May the science of sciences never want representatives as able as the learned gentlemen who now preside over that department in the mathematical and presidential chairs. Happy will it be for the University if they can inspire a love for the science in the pupils committed to their charge. But where inspiration fails, coercion can never supply its place. If the mathematics shall continue to reign at Harvard, may their empire become a law of liberty. —*Atlantic Monthly.*

HUMAN LOVE.

Consciousness of being loved gives comfort and strength and makes trust in God a real living feeling that influences the daily life. If there is no love above us, if all men turn glances of dislike upon us and close their hand upon us, then our hearts grow hard and we find it difficult to rise at once, without the aid of human steps, above earthly pain and desolation, to love and confidence in God; all has a tendency to become dark above, as it is around; whereas love and kindness keep our hearts open; dear, loving people are to us witnesses of the love and tenderness of God—are his angels whom he sends to show us that he has not forgotten us.

If we are loved by those around us, we can bear the hostility of all the rest of the world; just as if we were before a warm fire, we need not care for all the ice in the Polar regions.

For the Children.

THE GOLDEN GATE.

We all know how some particular recollection at times takes possession of us. Even during the busy day it will creep through the crevices of occupied time, and make itself a place in our mind.

A glance at the blue river meandering through the landscape, as you sit at your open window, of which for weeks and weeks you have taken no particular notice, suddenly becomes invested with the remembrance of some scene of long ago; memory awakes from her slumber, and you live the past over again under her influence.

This has been the case with me. There was a soft light in the sky, a peculiar purple streak on the river, which carried back my recollection over a short journey of years ago to a pleasant valley in France; and so I sat at the window thinking, till I brought the whole scene of my earlier life before me.

I must say that visit to France was a great era in my life-history. From that time I seem to have been walking on a higher and broader road; life has not seemed to me so purposeless, so dull and prosy. But I must tell you about it.

Laura was my half sister, some few years younger than myself. At first it was quite a triumph to me that I was the eldest. I used to call her silly little thing whenever her views of amusement did not exactly accord with mine; and this state of things lasted till my step mother interfered, and required that I should act with more consideration towards her child.

It was a great grievance to me that I had a step mother; I used to weary Laura with my grumblings on this subject. I am persuaded that, considering what that relationship sometimes is, I was well off; yet I have a recollection that I tried not to think so; it was in my nature to grumble. I was continually getting into scrapes and unhappiness; but it was more through my domineering and impatient temper, than through any fault of my step-mother. To a certain extent she was hasty and petulant; but Laura came in for her scoldings too. She would droop under anything like harshness for a little while, and then rise up out of the waters looking all the brighter for the plunge beneath them.

However, we were both equally delighted when it was arranged that mamma was to take us for a tour on the Continent during the bright and pleasant month of July. I forgot all about the "step," and if there were any difference in my mother's manner towards her children, it consisted in her treating me with more womanly attention than her own younger child, for Laura was only thirteen, and four years my junior.

So I sat at my window looking out on the broad landscape, and the little French village seemed to spread out before me.

Our tour was through the provinces, and when we came to any part of the country that my step-mother particularly admired, we would remain there for a day or two while she sketched.

The village which memory has brought out of the mist of years, stood with its spires at a far-off turn of the river. Immediately before us was a fine group of chestnut trees, among which stood a noble oak. Almost at our feet a tiny brook of clear blue water ran along, making its way to the broader stream. It never loitered. If sunshine sparkled on it, it seemed to ripple out its answer in a smile; if clouds sighed over it, no matter, it never tarried on its way; and a young woman who was busy with her washing-tub at its side, told me it was on this account—this perpetually moving on to something greater and better—that its waters were so pure and clear. "Were it stagnant," she said, "we should scarcely be able to remain in the neighborhood."

Had there been anything uncouth in the appearance of this young woman, it would have destroyed the charm of the landscape before me.

It was towards evening. The lowing cattle were going slowly home along their accustomed path by the river-side, and the young woman's husband, with a glow of a healthy and simple life on his cheeks, was sitting under the tree, and looking towards his wife with something of anxiety on his countenance. This was all that kept my picture from being perfect; for I thought the expression of contentment that rested on the young *paysanne's* face perfectly charming.

"She has no annoyances, I dare say," I said to myself. "Instead of being shut up in a dull London square from one month to another, with the same piping, shrieking canary in the middle window worrying you out of your life, she can live in God's free world among birds, whose songs are soft, and sweet, and varied, where the changing seasons keep off all monotony, and where life must be untroubled as the waters at her feet."

While thus reasoning with myself, I never thought of the superior pleasures open to me from the cultivation of mind that had been my portion. It would not have suited my discontented mind to meditate on anything of this sort.

"How happy you must be!" I exclaimed to the young wife; "your daily labors are carried on in a perfect paradise."

"There is no paradise on earth, *mam'selle*," she replied, gravely. "Sorrow and care, poverty, hunger and thirst make their way, I can assure

you, into this beautiful world. There are sighs and tears, though the sun shines brightly on the dewy grass, though the flowers give their fragrance to the whispering breezes."

"Then how do you manage to look so peaceful and happy?" I exclaimed.

"I was not happy till I knew my Saviour," she replied: and, as she spoke, a lovely humility enwrapped her like a shadowy but beautiful garment.

"It is not for me," she said, meekly, "to talk to a young lady like you, who knows all these things."

I did not tell her that I never more thoroughly felt my ignorance than while she was speaking.

"You are looking on the fair side of the picture," she continued. "If I were to show you our half broken down, low dwelling, you would not think it picturesque. Madame, there, would not care to sketch it."

For my step-mother, seated on her camp-stool, was making a memorandum in pencil of the lovely scene before her.

"Poverty, and rags, and dirt, are there," said the *paysanne*, "and sometimes wailing children"—there was an expression of pain on her face as she said this—"for I have not time to attend to my home duties as I ought."

"But an old gentleman came to these parts some few years back, and he told me wonderful things of the Man of Sorrows, who for our sakes became poor, that we through his poverty might be rich. I was a young thing then, not married, and he said, 'Lisette, whatever you do, wherever you go, mind and keep in sight of the Golden Gate.' I did not understand him at first, and then he said, 'Never lose sight of things above; as long as the gleaming of the gate's bright shining rests upon you, the spirit of love and gratitude will not die away within you; and this is a state of mind that invests life with a wonderful contentment.' I do try hard, *mam'selle*," she said, "to keep within the light of the gate."

By this time the sun was setting, and a flood of glorious amber light poured itself out on the western sky.

"Look there," the young peasant said, turning suddenly round towards the Gothic framework of boughs through which the light was pouring. "Look! there is the Golden Gate."

If I could not trace it in the clouds, I could see its light shining on her face. And this was all that passed between us.

The lesson I had learned sank down into my heart, and I prayed God to let me see the Golden Gate as I journeyed on.

Perhaps, reader, you will think it strange that the whole tenor of my life should be altered through the mere fancy of a golden shin-

ing in the clouds; but you must remember it was the thing signified which thus impressed my heart.

From that day I seemed to make a fresh start in life. To those around there seemed no marvellous metamorphosis, though my step-mother once said that I had come out of the dismal lane, and was walking in the sunny highway.

I have had many difficulties to contend with. Sometimes, when I am within sight of the Golden Gate, a crowd of discontented thoughts push me back for awhile, but, through prayer, I regain my place again; and though I have never got quite so near it as the poor woman did who, when day after day her dinner was a crust of bread and a glass of water, used to say, "What, all this, and Jesus Christ too!" yet I am different from what I once was.

Often, when I am weighed down by care, I think of the French peasant and the glorious summer sunset, and I feel that godliness with contentment is indeed great gain, and I pray earnestly that my life may pass within the shining of the Golden Gate.—*Exchange*.

The capacity for *ennui* is one of the signatures of man's immortality. It is his very greatness which makes inaction misery. If God had made us only to be insects, with no nobler care incumbent on us than the preservation of our lives, or the pursuit of happiness, we might be content to flutter from sweetness to sweetness, and from bud to flower. But if men with souls live only to eat and drink and be amused, is it any wonder if life be darkened by despondency?

JOY COMETH IN THE MORNING.

BY WM. CULLEN BRYANT.

Oh, deem not they are best alone
Whose lives a peaceful tenor keep;
For God, who pities men, hath shown
A blessing for the eyes that weep.
The light of smiles shall fill again
The lids that overflow with tears,
And weary hours of woe and pain
Are promises of happier years.
There is a day of sunny rest
For every dark and troubled night,
And grief may hide an evening guest,
But joy shall come with early light.
Nor let the good man's trust depart,
Though life its common gifts deny;
Though with a pierced and broken heart,
And spurned of men, he goes to die.
For God hath marked each sorrowing day,
And numbered every secret tear,
And Heaven's long age of bliss shall pay
For all His children suffer here.

When the Indians hear us call any of our family by the name of servants, they cry out, "What! call brethren servants! We call our dogs servants, but never men."—*Penn.*

TO A ROBIN.*

BY HOWARD WORCESTER GILBERT.

Basking thyself on the naked spray,
Aloft in the latest evening ray,
Gentle Robin, simply clad
In homely suit of bodden grey,
My inmost heart thou makest glad
With thy liquid evening lay.

Like notes of a rural, oaten reed,
Or rain-drop, into a limpid pool
Falling from some wandering cloud,
Silver-clear to those waters cool,
Or the tinkling of sweet rills
Deep in the hollows of the hills,
From ledge to ledge as they leap and run,
Forever hid-den from the sun,

Thy love-ditty thou channtest still,
Warbling, warbling the evening long
Ever thy fresh and liquid song,
And singing till thou hast sung thy fill.

When the silken threads of the spider's wheel
Are strong with diamonds, all ablaze
With rose and emeralds, sapphire and gold,
Out in the morning's arrowy rays,
And the sky is mottled with filmy pearl,
And in still waters the eddies whirl,
Whether thou pourest thy matin note
Under the dawn's pale azure coping,
Or tuneest thy rich and ready throat

At eve, from thy knoll to the westward sloping,
Where far away, o'er the meadow's fair,
A golden dust in the silent air
Shimmers in beams that flood thy nest,
Ruddier showing thy ruddy breast,
For these fields and meadows meet
Thy clear roundelay I deem,
For 'tis wild, and fresh, and sweet,—
Unpaid and free as the breeze and stream.
Thus ever, at will, thy own free song
Thou under the dome of blue art singing,
With echoes that all the summer long,
And through the autumnal hush are ringing.

At morn and eve by thy clay-built cot,
Warbling to thy brooding mate,
Gentle Robin, there is not
In the halls of pride and state
Half as happy a heart as thine
That doth with care nor envy pine.

When to these brown and billowy fells,
And to these purple oaken dells
The gauzy veil of the hazy mist
Lendeth a tinge of the amethyst,
Far away over sea and land,
Thou wingest thy way with a kindred band,
To some isle in a sunny sea;
Would, when the bud on the maple swells,
And the fountain, loosed from the hill-side wells,
I again might welcome thee!

In the depth of the sea the waters are still;
the heaviest grief is that borne in silence; the
deepest love flows through the eye and touch;
the purest joy is unspeakable; the most im-
pressive prayer is silent, and the most solemn
preacher at a funeral is the silent one whose lips
are cold.

* The *Turdus migratorius* of the ornithologists.
Its song is deprecated only by those who undervalue
things merely because they are common.

MINING UNDER THE SEA.

Mining can hardly be a pleasant occupation. The absence of sun and natural light, the dripping sides of the shaft, and danger of explosion from the fire damp, of jutting rocks and numerous other perils, invest it with vague terrors to active imaginations. But when the shafts run under the sea, and the swell of the ocean is distinctly audible, it must suggest many fears to the diligent miners. The following graphic description is taken from an English paper:

"We are now four hundred yards out under the bottom of the sea, and twenty feet below the sea level. Coast-trade vessels are sailing over our heads. Two hundred and forty feet below us men are at work, and there are galleries below that. The extraordinary position, down the face of the cliff, of the engines and other works on the surface, at Botallie, is now explained. The mine is not excavated like other mines, under the earth, but under the sea. Having communicated these particulars, the miner tells us to keep silence and listen. We obey him, sitting speechless and motionless. If the reader could only have beheld us now, dressed in our copper-colored garments, huddled close together in a mere cleft of subterranean rock, with a flame burning on our heads, and darkness enveloping our limbs, he must certainly have imagined, without any violent stretch of fancy, that he was looking down upon a conclave of gnomes.

"After listening a few minutes, a distant and unearthly sound becomes faintly audible—a long, low, mysterious moaning that never changes, that is full on the ear as well as heard by it, a sound that might proceed from incalculable distance—from some far invisible height—a sound unlike anything that is heard on the upper ground, in the free air of heaven—a sound so sublimely mournful, and still so ghostly and impressive when listened to in the subterranean recesses of the earth, that we continue instinctively to hold our peace as if enchanted by it, and think not of communicating to each other the strange awe and astonishment which it has inspired in us from the very first.

"At last the miner speaks again, and tells us that what we hear is the sound of the surf lashing the rocks a hundred and twenty feet above us, and of the waves that are breaking on the beach beyond. The tide is now at the flow, and the sea is in no extraordinary state of agitation, so the sound is low and distant just at this period. But when storms are at their height, when the ocean hurls mountain after mountain of water on the cliff, then the noise is terrific; the roaring sounds down here in the mine is so inexpressibly fierce and awful, that the boldest men at work are afraid to

continue their labor; all ascend to the surface to breathe the upper air, and stand on firm earth, dreading—though no catastrophe has ever happened yet—that the sea will break in upon them if they remain in the cavern below.

"Hearing this, we got up to look at the rock above us. We are able to stand upright in the position we now occupy; and flaring our candles hither and thither in the darkness, can see the bright, pure copper, streaming through the gallery in every direction. Lumps of ooze, of the most lustrous green color, traversed by a natural net-work of thin, red veins of iron, appear here and there in large irregular patches, over which water is dripping slowly and incessantly in several places. This is the salt water percolating through invisible cranioes in the rock. On stormy days it spurts out furiously in thin continuous streams. Just over our heads we observed a wooden plug, of the thickness of a man's leg; there is a hole there, and that plug is all we have to keep out the sea.

"Immense wealth of metal is contained in the roofs of this gallery throughout its entire length, but it will always remain untouched; the miners dare not take it, for it is a part (and a great part) of the rock which is their only protection against the sea, and which has so far been worked away here that its thickness is limited to an average of three feet only between the water and the gallery in which we now stand. No one knows what might be the consequence of another day's labor with the pickaxe on any part of it."

AGASSIZ IN BRAZIL.

The discovery by Agassiz of clear traces of a glacial period under the tropics, has been, to some extent, already made known in published letters from his friends and himself. He seems to think it will excite almost as much opposition as his theory of glaciers over Northern Europe did thirty years ago. But what Humboldt did half a century ago in opening up to the world the Valley of the Amazon, has been carried on by Agassiz with a wonderful enlargement of knowledge and resources. He treads in the footsteps of that noble student, carrying out his researches to an extent that even Humboldt never dreamed of.

From Rio de Janeiro, through the whole valley of the Amazon, he found the glacial drift, a sort of reddish, as in some other places of yellowish, clay; a homogeneous, unstratified paste, and containing loose material of all sorts and sizes, covering the country. It is of very uneven thickness, sometimes washed entirely away, leaving the bare rock, scratched by the great ice-plough. The fertility of the land is one of the best guides to the presence of this drift. Where it lies thickest, there are the most flour-

ishing coffee plantations. This fertility of soil arises from the great variety of chemical elements contained in the drift, and the kneading process it has undergone by the glacial action grinding it up so finely.

We all know that water expands in freezing, and where, for ages, immense bodies of fresh snow fall on masses of ice, and thaw in the sun, and freeze up again in winter, and, in the shade, this expansion of freezing produces a constant motion of the whole body, very slowly, from a few inches to a few feet in the year, pressing in the north toward the south, grinding up the soil with an immense pressure, removing huge boulders, and grooving the rocks with deep furrows. A sheet of snow, ten thousand feet thick, extending all over the northern and southern portions of the globe, must, necessarily, lead to a northern and southern cap of ice, moving toward the equator. Prof. Agassiz says, "I have, in Maine, followed, compass in hand, the same set of furrows, running from north to south, in one unvarying line, over a surface of one hundred and thirty miles."

This sort of ice movement is now proved to have extended, in its turn, to the regions lying under the equator—the whole valley of the Amazon. Humboldt had referred the Amazonian deposits of unstratified red clay to the Devonian, and Martius to the Triassic period; and all travellers had considered it at least as old as the Tertiaries. "But," says Prof. Agassiz, "I found, in these very beds, a considerable amount of well preserved leaves, the character of which proves their recent origin. These leaves do not even indicate as ancient a period as the Tertiaries, but resemble so closely the vegetation of to-day, that I have no doubt, when examined by competent authority, they will be identified with living plants. The presence of such an extensive clay formation, stretching over a surface of more than three thousand miles in length, and about seven hundred in breadth, is not easily explained. But since those leaves grew and settled quietly in the laminated mud at the bottom of quiet waters, the whole valley must have been subjected to a polar climate for ages, so sunk down that huge icebergs or glaciers must have grooved the rocks and kneaded the clay all over its surface.

When we consider that it was not so much the changes in the surface of the earth, but rather the undescribed fishes that now populate the waters of the Amazon, that Agassiz went to Brazil to examine, we may well feel gratified in contemplating the important geological facts that a citizen of our own country has revealed to the world in a single year of travel in Brazil. He has now returned to Rio and presented the Emperor with magnificent collections in natural history, and will bring home with him, to the United States, other equally valuable results of

his researches in that interesting country.—
Christian Recorder.

THE USE OF SUNSHINE.

By the use of this term we do not mean merely sunlight, but the direct rays or shine of the sun. Mankind are dying for want of it. We build our houses, to be sure, with a world of windows, but they are chiefly put in to make a handsome display outside. We are careful to curtain them inside, and blind them outside, so as to shut out the rays of the sun. It is a good argument in favor of curtains and blinds, that if the light be let in too strongly, it will fade the carpet. So far as the carpets are concerned this is true, as they are generally made, but, can we have no colors in the carpets which the light will not seriously affect? If carpets fade by letting the light in, there is another thing that fades by keeping the light out, viz., the human being. On the shady side of the street, the hospital and prison, cholera, scrofula, bilious complaints and nervous diseases are more frequent and fatal than on the sunny side.

We advise every body to live on the sunny-side of their houses. The room in which the family spends most of its time should be on the side on which the sun can find its way into it. Let the parlor, if it be seldom used, be on the shady side. We observe that there is not a cottager so ignorant that will not set her plants, if she has taste enough to grow them, in the east window in the morning, and at noon carry them to a south window, and in the afternoon put them in a west window. But perhaps she is careful to keep her children in the shade, and her precious self, so far as possible, out of the rays of the sun. The plants, in obedience to natural law, are kept healthy, while the children and mother, being kept in the shade suffer in consequence.

Light is beginning to be considered a great curative agent, and we apprehend that the time is not far distant when there will be sun baths. Corridors with glass roofs will be so adjusted that persons can properly remove their clothing and take a bath in the sun for an hour or two, much to the improvement of their health. The chief advantage in going to the country is to get into the sunshine, and to be in the pure breezes. If we desire merely to keep cool, we should stay in the shady city. People talk of "hot walls" and "burning pavements;" it is much hotter in the country, for the breezes that play there in mid-day only bring heated air in from out doors. But in the city the breeze brings air in from the shady side of the street, and the lower rooms of a city house are much cooler in mid day, than the exposed houses of the country.

Our soldiers, who were able to bear the labor

and fatigue of war, are invigorated by the outdoor life they lived. We knew a young man in New York who came back from the war and resumed his former occupation of book-keeping, and lost thirty pounds weight in six weeks. It would do him good to be a farmer.

Parents can do nothing better for their puny sick boys than to put them on a farm for two or three summers, and let the sun bathe them the live-long day. They will, by such a life, grow rapidly, and become tough, brawny and broad. We have seen this tried to the highest advantage in more than one instance under our advice.—*N. Y. Presb.*

CARE AND CURE.

The tensely-strung bow must be unstrung, or break; the burdened spirit must shake off its load or faint. The burdens of every occupation increase as we advance. Even success only gives us more weight to carry, and poverty fatigues and crushes by sheer emptiness. It is hard to say whether the rich man or the poor man has the greater care. The rich man wins in the laborious game of life, his fields bring forth plentifully, his business yields golden returns, but his barn, his store, his factory, his dwelling-house grow larger with his increase of wealth; his workmen, his clerks, his house-servants more numerous, and the demands of fashion and of luxury more imperious. His children rush out into the gay, seductive world, like moths into the flame of a lamp. His business connections become extended and complicated, and must be watched even at the most remote points, lest some of the many streams of wealth that pour into his coffers, should be choked or dry up, or lest the mishaps of some great pecuniary crisis should blot out his fortune like the palace of Aladdin or the gourd of Jonah, in a night. Indeed, when we consider the importance usually attached to wealth by its worshipping owners; when we reflect what strained and long-supported efforts it has cost to acquire it, it is not wonderful that rich men frequently grow morbid in regard to the safety of their estates, and come to fear poverty. After all their work, and all its success, there lies their treasure, liable to all the chances of fire, insolvency, or fraud. It is fenced in only by the frail network of the law, which ingenuity may unravel or violence may rend. And they are maddened to think that, after all, their goods may be stolen.

The poor man has the advantage of light pockets. In the race of life his weights are negative. But he feels that pockets were made to be filled, that the shoulders were constructed for generous burdens, that both ballast and cargo become the ship, and that to go through the world empty is to carry the shameful and mortifying burden of failure. Still, if he be

young and virtuous, he may be cheerful and hopeful. A hundred forms of fortune will picture themselves against the distant sky, calling him forth to daily toil, and starting his young blood in rapider currents through a stalwart frame. But hope deferred makes the heart sick. Unrequited toil becomes a burden in the rear ever to be dragged along, and the hopes of the future bank up before him into mountains of leaden darkness. Meantime, cares have multiplied at home. A buoyant young couple have become a dozen; grown-up children, with accumulating loves, have brought wants and aspirations impossible to be met, and destined only to be mocked.

The perpetual whirl of industry required by these circumstances will perhaps keep the mind from rusting, but will be likely prematurely to wear into its very nerve and centre. And the care of unsuccessful labor grows into an inward frown; the incitements of life fade away like the glory from the clouds after sunset, and nothing is left for the benumbed spirit but to wait sullenly for the last sad scene.

As the circumstances of wealth and poverty are both impotent for the removal of care, so are those of public and private position, of city and country. The public man pants beneath his own affairs, and droops still lower under the added weight of public business. He has thousands of masters besides his own wants and his own passions, each of whom would drive him in a different road, and cause him to envy the lowest menial in private life, while the man of private station chafes and frets against the bars of his obscure allotment, and envies those who attract public attention. The man in the country feels that woods, and fields, and sky, with all their glory of verdure, and azure, and variegated blossom, are but a poor compensation for loneliness and seclusion, and not for a moment to be weighed against the crowded and gay life of the city or its rapid methods of making money; and the man of the city fancies that the quiet of the country would be like a delicious dream in which, if he only had opportunity, he could disentangle himself from the meshes of care and relax into blissful rest.

But, alas, the plough and the counter, the field and the pavement, the crowd and the solitude, each has a care unknown to the other. It is not the outer world, but the inner that produces and perpetuates corroding care. Indeed, it does not pertain to mortal lot to be entirely freed from it; in the best case it can only be mitigated and soothed by a wise and pious life—by a spirit superior to it. As care is the cloudy and dusky offspring of the mere earthly life, we must antagonize it by another force. With better views than those of the world, with a soul susceptible to the touch and sense of the invisible, with an eye for the divine in nature,

the landscape becomes a refreshment, especially to the man from the crowded city, tired and dusty. He is disinfected of care through eye and ear and nostril. Allow us to appeal to the thoughtful Christian tourist, and probe his experience with respect to the power of country sights. To his hungry eye—devouring field and forest, and mountain and vale and stream—the landscape seems another paradise; it appears to come, as if by an actual movement, into the soul; the little picture on the retina is as green, as cool, as living and as large as the landscape itself; it is his for a healing draught of light, of vivacity, of bubbling joy. The song of the bird and the bee, of the breeze and the brook, are sung in his soul, and as these new tenants enter, his cares for the time vacate, or at least, fall asleep. To a susceptible spirit from the heat of a city, in midsummer, the power of a beautiful landscape in chasing away care and restoring genuine buoyancy, is incalculable.

But even everywhere, in the artificial life of the city, surrounded by human puppets and butterflies, by the broker's golden clink, the newsboy's cry and the creak of hand organs, care may be held in abeyance. The noble Christian soul may convert for itself the dry and crowded scene into a garden in which he shall see the bloom of his own planting. And the toiling plodder in the dales and mountains of the country, with the rude implements of the field may dig up the Lord's secret, the cure of care.—*The Methodist.*

From the N. Y. Evening Post.

THE FIFTH QUARTER OF THE GLOBE.

The government of New Zealand has subsidized a line of steam packets, to connect with the monthly mail from Southampton by way of the Isthmus of Panama. This official announcement is followed by a notice of a submarine telegraph line to be completed in 1867, as a branch of the great Anglo-Indian line, to connect Australia with Asia and Europe.

How oddly such announcements strike those of us who were taught in our geographies that these countries were inhabited only by tattooed cannibals! They are growing up into empires with marvellous swiftness. The name of New Britain is proposed for New Zealand, as the three islands are, in fact, old England at the Antipodes, with a little greater area. New Zealand has everything in her favor: an insular situation, a fine climate, magnificent harbors, and great mineral wealth—to which we may add a steady, and recently a large, influx of Anglo-Saxon population.

Let the following statistics tell the rest of her promise: the white population was, in 1840, 2,050; in 1850, 22,000; in 1860, 83,000; and in 1861, 101,000. The value of imports was, in 1853, £597,000; in 1860, £1,500,000.

In sixteen months from the discovery of gold in the island, the amount exported was £2,065,000. In 1851 the colonies of Victoria, Queensland and Tasmania had scarcely an existence. Within a radius of forty miles the population did not exceed 500 persons. In 1861 the same area held 106,000. One thousand miles of telegraph are now in operation.

For Friends' Intelligencer.

REVIEW OF THE WEATHER, &c.
EIGHTH MONTH.

Circumstances beyond the control of the compiler have delayed the preparation of the following review of the weather, &c.:

	1865.	1866.
Rain during some portion of the 24 hours,	8 days.	11 days.
Rain all or nearly all day,...	0 "	2 "
Cloudy, without storms,.....	9 "	2 "
Clear, in the ordinary acceptance of the term,.....	14 "	16 "
	31 "	31 "
TEMPERATURE, RAIN, DEATHS, &c.	1865.	1866.
Mean temperature of 8th month per Penna. Hospital,	74.75 deg.	72.50 deg.
Highest do. during month,	91.00 "	88.50 "
Lowest do. do. do.	66.00 "	56.50 "
Rain during the month,.....	3.75 in.	2.18 in.
Deaths during the month, being for 4 current weeks for each year.....	1466	1930
Average of the mean temperature of 8th month for the past seventy-seven years		72.96 deg.
Highest mean of do. during that entire period, 1863.....		79.50 "
Lowest do. do. do. do. 1816.....		66.00 "
SUMMER TEMPERATURES.		
Mean temperature of the three summer months of 1865,.....		76.42 deg.
Mean do do do do		75.27 "
Average of the summer temperatures for the past seventy-seven years,.....		73.40 "
Highest summer mean occurring during that entire period, 1828-38.....		77.66 "
Lowest do. do. do. do. 1816.....		66.00 "
COMPARISON OF RAIN.	1865.	1866.
First month	3.61 inch.	3.14 inch.
Second month.....	5.83 "	6.61 "
Third month.....	4.71 "	2.16 "
Fourth month.....	2.83 "	2.93 "
Fifth month.....	7.21 "	4.68 "
Sixth month.....	4.75 "	2.96 "
Seventh month.....	2.97 "	2.52 "
Eighth month.....	3.75 "	2.18 "
Totals.....	35.66	27.17

The temperature of the month under review did not quite reach the average for the past seventy-seven years, and while the summer was progressing through

its second month, although it was supposed by many we should have an unprecedented record for the entire summer, the closing month included so much of decidedly cool weather that the mean temperature fell behind that of last year, and reached only about one and three-quarters degrees above the general average.

During the entire year thus far there has been but one month in which the quantity of rain has equalled that of last year, while the aggregate, it will be seen, is eight and one half inches less, and yet nothing has suffered very materially from drought.

PHILADA., Ninth mo. 17, 1866.

J. M. E.

FRENCH HONESTY.

M. Legouv , of the French Academy, tells this story of his body servant in Paris. "Some years ago, he let it be known to his baker that he wanted a body servant. He received fifty applications a day, none of which suited. One morning, while hard at work in his study (it was about five o'clock in the winter), somebody knocked at the door. He opened it. 'I am told that you want a confidential servant, sir.' 'Yes, and you think you are the one I want; you have first rate recommendations, and lived, I dare say, ten years in your last place.' 'No, sir; I am just out of jail! You may imagine the astonishment of Legouv . 'Just out of jail!' 'Yes, sir; I loved a woman who required money. She pressed me every day to give her more money. I gave her all I earned honestly—'twas not enough. I thieved to gratify her covetousness. I was arrested, tried, convicted, and sent to the penitentiary for three years, which expired last Saturday.' 'Do you think that a recommendation to a place of confidential servant?' Yes, sir. A man that loses his character in an hour of folly, will be on his guard against temptation, and will strive to regain his reputation. Besides, I know that, at heart, I am an honest man.' There was in the fellow's tone such an honest accent, that Legouv  took him at once, and has never since repented it. The released convict has now the keys of the house, pays all the bills, and does all the marketing."—*N. Y. Home Journal*.

ITEMS.

IMPROVED DWELLINGS FOR WORKINGMEN.—There are now in London twenty-five blocks of improved dwellings for the working classes, capable of accommodating three thousand persons. The rents of apartments vary from five to seven shillings a week. Last month, three blocks of these buildings, named in honor of Lord Palmerston, were opened in City Garden Row. The *Daily News* says that within three years about eighty thousand pounds sterling have been spent in these model dwelling-houses by the Improved Dwellings Company. The blocks just opened are side by side, six stories high, and will afford dwelling room to a colony of seventy families, who may, if they choose, live in the strictest privacy. The rooms are nicely papered and painted, and nothing that health demands or comfort suggests seems to be lacking in the fittings.

Recent letters from Russia state that two hundred

thousand copies of the New Testament in Russ have been sold during the last two years. The writer visited the New Agricultural Institution which has been lately established. The Russian government are paying considerable attention to agricultural education; it is to be hoped something may be done for this in India. The Russian government have a flourishing school near St. Petersburg, which trains boys for the forest department. They learn the duties of agricultural stewards and the keeping up those magnificent forests which are of such value to Russia.

An institution for the training of Russian deaconesses has been founded by a certain princess, who has made over all her property for this object. She was living in St. Petersburg in two rooms in one of the back slums, and for several years had given up her entire time in endeavors to reclaim abandoned women; she had devoted herself to that object, living in one of the Lock Hospitals. There are various ladies like her, both in St. Petersburg and Moscow, who employ their time in female education, hospitals, and in reclaiming the fallen."

The armistice between Prussia and Saxony has not ended in peace; and the probabilities are that Saxony will either receive a new sovereign, more submissive to Prussia, or be annexed to that monarchy. Hanover, Hesse, Hassen, Frankfurt, and portions of Bavaria and Darmstadt have already been annexed; Darmstadt paying 3,000,000 florins as indemnity.

The Roman question is likely to be settled by a treaty between the Pope and Victor Emmanuel.

A war of resistance to the Russians has broken out with increased animosity in Circassia.

Both Atlantic cables are working. Returns of the Atlantic Cable Company show the receipts from messages to be at the rate of £900,000 per annum, (about \$4,500,000.)

THE FREEDMEN.—A report received at the Freedmen's Bureau, from North Carolina, represents that the condition of the freedmen is generally favorable, and that there are at present but about 2,500 dependents, notwithstanding that there is a colored population of nearly 300,000. A majority of those who are dependent upon the authorities for support are unable to labor by reason of disease, infirmities, or advanced age. The civil authorities have been informed of the action of the commissioner in discontinuing the issue of rations, and several communications have been received from county commissioners, stating that it will be almost impossible to provide subsistence and shelter in consequence of a scarcity of funds. Several cases of outrages against freedmen have been reported to the Bureau officers, who have called the attention of the civil authorities to the matter. The offenders were arrested and placed under bonds for their appearance at court to answer to the charges, and the authorities generally manifested a disposition to treat the freedmen with justice and kindness.

The Governor of South Carolina, in his message of the 5th inst. to the Legislature, meeting in extra session, urges the modification of the negro code so as to extend the jurisdiction of the civil courts over all classes of citizens. He also recommended the admission of negro evidence in all cases, as being both just and prudent. He declared the present stay-law to be unwise and unconstitutional, and advised the abolition of imprisonment for debt, together with an extension of the bankruptcy law.

We learn from the *Nation* that, in York County, Virginia, there are about 6,000 freedmen located on farms originally established by Government, but to be delivered over in First mo., 1867, to their former owners.

THE CHILDREN'S FRIEND.—A Friends' Illustrated Monthly Journal, devoted to the instruction of the Young. It presents a variety of reading matter in a pleasing and attractive style, and is designed to supply a want long felt in our Society for juvenile reading, of a purely moral and scientific character, that will aid in the growth of virtuous principles. The Sixth No. (Tenth month) will contain a Steel Engraving of Wm. Penn, the only original picture of his youth. The closing number of present volume will present his portrait when a Friend, taken in advanced years. Terms \$1.50 per annum, in advance. Back numbers supplied to new subscribers. 922 St.

A YOUNG WOMAN of experience wants a situation in a private school, or as Governess in a family. Address
721 St. E. W. C. Hockessin, Delaware.

DOMESTIC DRY GOODS.—Always on hand, a large assortment of Domestic Dry Goods; Muslins of all kinds and of the best makes, both Bleached and Unbleached; Flannels of all grades White and Colored, Twilled and Plain; Calicoes, Gingham, Check, Shirtings and Drillings, Bleached and Brown Table Linens, Towelings by the piece and by the yard. Men's and Boys' wear, a well assorted stock. **ESSEX TRON,**
721 St. 1638 Mark St., Philada.

ORANGE GREEN BOARDING SCHOOL FOR GIRLS.—Situated at Kennett Square Chester Co., Pa. will commence its next session, of 22 weeks, with a Spring Term of 16 weeks, on Second day, 9th mo. 31st. Terms \$4 per week. No extras for Latin, Greek, or French. Apply to **SWITHIN C. SHORTLIFF** and **SIBBY FOUNT**, Kennett Square, or **EMMA BOWMAN**, Byberry Pa. anvtiml

CONCORDVILLE SEMINARY.—The Fall and Winter Term of Concordville Seminary, commences Tenth month 1st, 1866. In addition to the regular course, a Commercial Department has been instituted. For circulars address, **JOS. SHORTLIFF**, A. M., Principal, Concordville, Delaware Co., or **MAGGIE B. JACKSON**, Kennett Square, Pa. anvtiml

EATON FEMALE INSTITUTE.—A Friends' Boarding School, situated on the Phila. & Balt. C. R. R. Next Term will commence on the 1st of Tenth month next. For Circulars, giving full information, inquire of
EVAN T. SWANEY, Principal and Proprietor,
Smo. 15, 1866—awa at p 106. Kennett Square, Chester Co., Pa.

CHESTER VALLEY ACADEMY.—The next term of this Institution commences 9th mo. 3d., 1866. Whole number of pupils last year, 107,—60 boarders, 47 day pupils. Send for a Catalogue. **J. K. TAYLOR**, Principal,
84 10th 106. Catesville, Chester Co., Pa.

KENNETT SQUARE ACADEMY.—A Boarding School for Young Men and Boys will open the 1st of Tenth month, 1866, and continue in session twenty four weeks. For Circulars, &c. address the Principal, **SWITHIN C. SHORTLIFF**, A.B., 721 St. 929. Kennett Square, Chester Co., Pa.

BELLEVEUE FEMALE INSTITUTE.—The Fall and Winter Term of this healthfully and beautifully located Boarding-School for Girls will commence 10th mo. 1st, 1866, and close 4th mo. 12, 1867. For further information apply for a Circular to
ISRAEL J. GRABAREK, } Principals.
JANE P. GRABAREK,
72 St. Attleboro' P. O., Bucks county, Pa.

CHESTERFIELD BOARDING SCHOOL FOR BOYS, situated on the Crosswicks Road, three miles from Bordentown, N. J. The Fifty-Third session of this Institution will commence on the 10th of 11th mo., 1866, and continue twenty weeks. Terms \$85. For further particulars address **HENRY W. RIDGWAY**, 4766 825t 5367 pmez pa in. Crosswicks P. O., Burlington Co., N. J.

SAMUEL TOWNSEND & SON, Produce Commission Merchants, No. 52 Light Street, Baltimore, respectfully solicit consignments of Grain, Flour, Seeds, Butter, Eggs, Beans, Poultry, &c. Constantly in store and for sale, Clover, Timothy, Orchard Grass, and other Field Seeds. Also Bone Dust and other Fertilizers. Dried Fruits bought and sold. 731 tin. fu.

LESSONS ON OUR COMMON SONG BOOKS.—Tickets for a course of Eight Lessons, \$3.00 each. Liberal reduction to Schools and Classes of over fifty persons.
Address **GRACE ANNA LEWIS,**
Care of **EDWARD FARRISE,**
800 Arch St., Philada.
66 3m.

CHERRY STONERS.—(seed 2 bushels an hour.) Peas and Bean Shellers, (shell 50 qts an hour.) Carpet Sweepers, Wire Dish Covers, Champion Cog-Wheel Clothes-Wringers, (we consider them the best yet invented for durability and convenience;) and a variety of other new articles of Hardware, Cutlery and Tools. For sale by **TRUMAN & SHAW**,
810a830 No. 836 (Eight Thirty-Six) Market St., below Ninth.

W. M. HINCOCK, General Furnishing Undertaker, No. 18 North Ninth Street.—A general assortment of ready-made Coffins, and every requisite for Funerals furnished. Being entrusted with the oversight of "Fair Hill" Burial Ground,—Funerals, and all other business connected with the ground, will be promptly attended to. 351. 3y. was m p.

SELECTIONS FROM THE WRITINGS OF JOHN BARCLAY.

(Continued from page 462.)

1816, *January*.—I am unexpectedly led at this time into much inward exercise of mind, being earnestly desirous that I may lay hold and keep hold of those things which pertain to life and salvation,—to run daily that race which is set before me. Those who seek the Lord to serve him, shall, indeed, find him and the knowledge of his will; where the desire is, there is a favorable evidence; seeing that every good gift and every perfect gift cometh down from the Author of all good. Divine grace, which begets this desire, though smothered in many hearts, has freely been given, without respect of persons, to all; and is sufficient, if obeyed, to work out the salvation of all, to lead them in the way they should go, and to give them strength to walk in it; how then should we cherish this precious desire after holiness, and that little seed, which, if preserved and fostered, will grow up and become a large tree, bringing forth fruit abundantly; and what injuries, what nips the tender bud in its springing forth, but those things that are evil, or that tend to encourage evil. O! how would this little spark, this divine fire, if not quenched in its arising, burn up every piece of straw and stubble within us, every thing that is not durable; and even such things as silver and gold would not escape the influence, but would be melted down, refined, and seven times purified.

Now, this light within may not, at all times, be equally discernible,—we may be deprived of the sense of it for a season; but when this is the case, we ought especially to be very vigilant and sober; for it is in these intervals that the enemy most generally finds the door open, and the sentinel not at his post. Let us beware lest we forget ourselves during this time of trial, when we do not sensibly experience within us the presence of Him, in whose presence there is fulness of joy. Let us then seek unto the Lord still more earnestly, and patiently wait his coming, in silent subjection of soul, desiring not our own will, way and time, but His. Surely there is cause for thankfulness in the midst of the driest season, and even when to our own apprehension we are forgotten and forsaken by Him whom our soul desires; for we know that it is the same Lord who gave to us the gift of his grace, that has himself permitted the sensible feeling of it to be taken away, and all for our good, though we may not think so. Let us then learn, in whatsoever state it may please infinite wisdom and goodness to place us, therewith to be content.

On the 24th of First month, 1816, my dear father, (who had been long an invalid,) got rapidly worse. I attended him nearly all the day, and but little thought of the event that followed. I sat up with him till between two and three o'clock the next morning. He died in much composure, at about a quarter past ten on Thursday morning, the 25th of January,

1816. I continued with the rest of our afflicted family to mourn, and I trust humbly to submit to this severe dispensation, lifting up my soul unto Him, who alone is able to sanctify our troubles to us, day and night, with tears and sighs, until the day of the burial, when we accompanied the remains of the endeared object of our gratitude, affection and respect, to its resting place.

1816, *February 4th.*—I have been led to think that the only substantial source of consolation in times of trouble, is a firm and an abiding faith in our Maker and Redeemer. Whatever anguish a sincere Christian may groan under, whatever wretchedness is permitted to come upon him, yet "let him trust in the name of the Lord, and stay upon his God." David seemed to trust with great energy, when he says, "God is our refuge and strength, a very present help in trouble; therefore, will we not fear, though the earth be removed," &c.; "the Lord of hosts is with us, the God of Jacob is our refuge. Though man is born to trouble, and every one of us must sooner or later suffer, yet a simple and implicit reliance on him in whom we have believed, will be found sufficient for our consolation and support. We are allowed to mourn;—a blessing is attached to mourning;—the effect of godly sorrow is said to be repentance; Jesus himself wept; and it is said of him, that "he was a man of sorrows, and acquainted with grief." But we are reminded not to "sorrow, as those who have no hope." Let us then, in the midst of the most acute and poignant grief, never despair; but rather with upright Job, let us endeavor to attain to that lowly, submissive frame of soul, which leads us to commit ourselves to the disposal of an Almighty Creator and merciful Father.

1816, *February 8th.*—The deepest affliction which is caused by the privation of outward objects and things, (however near and dear those objects may have been to us,) cannot be compared to that utter distress and anguish of spirit, which the pilgrim is permitted at times to undergo on his journey towards Zion. Who can have an idea of it, without having experienced this trying situation? When man, who is by himself a poor, weak, helpless creature, dependent upon his Maker, for strength, encouragement, consolation and ability to do and to think any thing aright, is thus left apparently, and exposed to the attacks of a relentless enemy, without guide or guardian, naked, hungry, blind, diseased,—where shall poor man find shelter in this stormy season of life? O! "let him trust in the Lord, and stay upon his God." In this time of desertion, when, after "toiling in the midst of the sea," being "tossed with the waves," and "the wind contrary," he seems well nigh spent, and apparently no nearer "his

desired haven;" then, if he cry unto the Lord in his trouble, He will bring him out of his distresses; He will make the storm a calm, so that the waves thereof will be still; and the troubled disciple shall see Jesus coming unto him walking on the waves, and shall hear him distinctly to say, "Be of good cheer, it is I, be not afraid."

1816, *February 18th.*—The Lord in his infinite mercy has been pleased to strike me to the earth, like Saul, with a sense of my sins, and to enable me sincerely and fervently to inquire of him, "What wilt thou have me to do." I can, indeed, testify that his forbearance and long suffering towards me have been wonderful; and I have great cause for daily thanksgiving, that I have been taught, in some small degree, the knowledge of myself, and in much mercy shown the abominations and gross evils in which my heart was enveloped; the coverings of self and sense that disguised the real state of my mind from me, have been in part removed; and I have been permitted to discover a glimpse of what I ought to be. My ardent desire, therefore, is, that He who has helped me thus far, would be pleased to continue to extend his paternal care over me; that he would preserve in me an invariable desire to do and abide by his will, at all times and in all things; that he would teach me the knowledge of the truth; and that I might be so strengthened therein as to be enabled to say in sincerity, "I am thine, do with me what thou wilt."

1816, *March 16th.*—O! how exceedingly ought we to praise and to bless the name of the Lord for all his dispensations and gifts; my soul is at this time very much impressed with a sense of the bounty of that great Giver, who, in mercy, educes blessings from those things which, least of all, appear such. But of what avail is such a sense of the goodness of the Almighty—such a conviction that "the Lord is good to all, and that his tender mercies are over all his works,"—unless this conviction leads us to put our whole trust and reliance on Him in every circumstance and situation,—unless we are induced with still greater firmness, faith and "patience, to run the race that is set before us," to endure our appointed trials; in short, to take up our daily cross and deny ourselves, out of pure love, to Him who first loved us, and still doth love us.

1816, *March 31st.*—I have thought that my state of mind much resembled the luxurious growth of some stripling plant, which springs up quickly, but requires much pruning and cutting back, sometimes even to the ground, in order that its strength may be proportioned to its height, and that it may be brought into a bearing state. Why should I not then submit to the management of the great Husbandman at all times? Though, like the skilful vine-dress-

er, he rub off every bud that does not show fruit, though he bind me to the wall, though he cut out the canker in the bark, and pierce to the very pith; yet do I most certainly know, that he careth for me, and intends my purging unto fruitfulness and perfection.

1816, *April 8d.*—I can scarcely refrain from writing a few lines, on the occasion of ———'s bearing open testimony to those principles which I believe he very sincerely has espoused. It must, indeed, be a trying time with him, not only just now, but perhaps henceforth through life. The change of dress and address, though a simple small thing in itself, must doubtless be a pretty constant source of ridicule and contempt, both in his presence and behind his back. I could say much in favor of his sincerity, and I think his exercises have not been few or slight, even as far as I have seen. Though I have had but little direct communication with him on religious subjects, yet, in his deportment and conduct, in general so reasonable and upright, there has been much instruction for me. I have seen many evils and errors in him, evidently brought under correction and government, and the chords of his practice and daily conduct drawn tighter and tighter into tune; and, in witnessing this process, my admiration has been not a little excited, in the full belief, that it evinces a power greater than his frailty, under the influence of which he endeavors to live; he has proved and does prove a living lesson and example to me, and I think to others. On looking again at the matter which gave me occasion for writing this, I am inclined to add, that the following considerations seem of too much importance long to defer examining: First, whether I am satisfied to continue as I am, in respect of outward profession; second, if not, when is the right time to make any alteration; third, what precise change is to take place, in what particulars, and on what grounds. And may He, who alone can preserve my soul from evil, be with me; that so I may not err on the right hand, or on the left.

1816, *April 11th.*—Having a short reprieve of a week, before entering into a business which is marked out for me, (at a Solicitor's office,) I avail myself gladly of it to record my heartfelt and sincere expressions of gratitude, that amidst all my backslidings and omissions, during the period of retirement which I have had of late, there remain to me yet some small bright spots and points, at which I can, with satisfaction, look back. For though there have been many and great errors and failings, and at times an almost total forgetfulness of that Being whose wisdom made me, and whose mercy is still over me; yet am I encouraged in the belief that at many seasons there has been a desire after, a searching for the living God, and for the knowledge of his will, whom to know is life. I have,

indeed, learnt by reiterated and painful experience, the constant liability to which poor man is exposed, of forgetting or forsaking the fountain of living waters, the Father of infinite mercy, who is daily striving with his self-willed creature, man. O! I have learnt, and may the lesson be indelibly impressed on my soul, that it is good for a man to watch—to watch and be sober,—to fear always,—to abide in His love who loved us.

1816, *April 14th.*—Uncertainty as to the time and manner of our departure hence, and certainty as to the fact itself, seems to be the limit of our knowledge in regard to this awful subject. We know, indeed, neither the day nor the hour when we shall be summoned, by an all-righteous Judge, to render an account. Seeing then that such is our case, may we yet more and more earnestly strive after a state of preparation,—having "our loins girded about and our lights burning;" that, so whenever the awful call shall go forth, whether at midnight, in the morning, or at noonday, we may be found amongst the trusty servants, "whom the Lord, when he cometh, shall find watching."

1816, *April.*—O! how ardent at this moment is my desire and prayer to the inexhaustible Fountain of transcendent love and mercy, that it may please Him, according to his marvellous compassion, so to dwell in the hearts of his poor dependent creatures, that through His sanctifying presence and power they may be preserved from evil; and not only this, but that the minds of men may be more and more opened, enlivened and enabled to discover the beauty and the bliss inherent in the truth.

O! how largely I could dwell upon the wonderful goodness of that Being, whose daily communication and connexion with his creatures, by his providence and by his more immediate influence, most clearly manifests Him to be the all-seeing God. How do I long for that period, when loosed from all earthly impediments, as well from the necessities as from the frailties of the body, I may be enabled to offer pure and acceptable adoration and hallelujahs to the infinitely glorious source of love and mercy.

(To be continued.)

TEACHING OF THE SPIRIT.

I doubt not there is for those who abide closest under the shadow of the Almighty, a minute and secret teaching, regarded by many as a delusion, which, like the name on the white stone, no man knows save he that receives it; but he knows that his judgment is sometimes cleared, his will inclined, and his way directed, after a manner different from that in which his own will or wisdom would probably have led him.—*Sewall.*

For Friends' Intelligencer.

A MITE FROM THE MINT.

When from the changes incident to this life sorrows multiply, and cast a shade over the beautiful things of earth, and sadness encircles the mind, as do the shades of evening the outward universe, then may comfort be found in looking beyond men and things "to the City of the Saints' solemnity, whose walls are salvation, and her gates praise." There the wicked cease from troubling, and the weary are at rest. Nought that would burden and press down the pure life can enter there, nor can the enemies of the eternal truth vex the soul that has laid off the outer garment, and obtained admission within this enclosure. Turn your minds, ye disconsolate and heartstricken, to this all inspiring law of hope, that at the end of the turmoils of everyday life you may here find rest. Under this consideration the burdens lighten, for in a little while the spirit will reach its goal, and be set free from all its perturbations, and loosed from shackles of every kind. "There the prisoners rest together; they hear not the voice of the oppressor; the Lord is their everlasting light, their God, their glory." "The small and the great are there; a most beautiful assemblage." The servant is free from his master; free from all that has overtaxed the powers; free from the enslavement of every evil passion. No barrier can ever come in between the immortal part and the infinite, all-wise and loving Father, who is now the sun and shield. "One day is as a thousand years, and a thousand years as one day,"—numbers are lost in the immeasurable. S. HUNT.

True prayer is the breathing of the soul. Without it there is no spiritual life. It is the constant aspiration of the "inner man" to be continually renewed in knowledge and holiness, "after the image of Him that created him." Nothing is prayer but the sincere desire of the heart, "uttered or unexpressed." Exercises of domestic, social and public prayer are doubtless very useful, when conducted in a right spirit. But the prayer meeting or the church assembly is not the place to which we go to satisfy ourselves whether men are truly religious. The mere decorum of the occasion would keep most persons there "seeming to be religious." We would go rather to the places of men's business and pleasure. We would observe them in their intercourses with their fellow men and women. We would know on what principles they act in trade, in politics, in places of amusement; how they deport themselves towards their superiors and their inferiors, those they are dependent on, and those who are dependent on them. We would see them in their hours of recreation, when unwithheld, and consider how far their love of pleasure carries

them. Still more must we be informed of their conduct in their domestic relations, whether they fulfil well the paramount duties there—the conjugal, parental, filial and fraternal.

David says, "Morning and evening and at noon will I pray and cry aloud; and at midnight I will rise and give thanks unto Thee, because of Thy righteous judgments." Never wait for a more convenient or favorable period; go to Him immediately, in the midnight gloom of thy experience or condition. He can turn the shadow of death into the morning.—*Jay.*

PURE AND UNDEFILED RELIGION.

BY JOHN JACKSON.

"Pure religion and undefiled before God and the Father is this, to visit the fatherless and widows in their affliction, and to keep ourselves unpotted from the world." This was the religion of our great example, and it should become ours. He was no respecter of persons. His mission of Gospel love was not to a few, but to all. He embraced within his holy mission the very ends of the earth. "Come unto me all ye that are weary and heavy laden and I will give you rest; and take my yoke upon you, and learn of me, and ye shall find rest to your souls." What is comprehended in the command, "Take my yoke upon you?" Is it not our daily obedience to that "law of the spirit of life in Christ Jesus," which Paul declared "made him free from the law of sin and death."

If we are to be preserved from falling into temptation and a snare, we must watch unto prayer; if we are to be set free from sin and death, it must be by our obedience to this "law of the spirit of life in Christ Jesus." Now there is no mystery in this doctrine, for there is as certainly a manifestation of the Divine will to mankind now as there ever was since the first period of human existence. And this will is manifested to us in the same manner that it has ever been revealed to man, *through a spiritual medium*. The same voice which addressed to Adam the language, "Where art thou," discovered to him the state and condition of his soul; pointed out the cause and consequences of his alienation from God, and that the only hope of his return consisted in obedience to the quickening operation of the Spirit, which is represented under the figure of a "flaming sword turning every way to guard the way of the tree of life." This voice speaks to us in precisely the same manner. We are not to be so outward as to suppose that the Almighty Jehovah was ever seen with mortal eye, or his voice heard with mortal ear. Jesus declared, "No man hath seen God at any time, the only begotten of the Father he hath revealed him." When we read of the voice of the Lord being heard in the cool of the

day, or accompanied by the thunders and lightnings of Sinai—speaking to patriarchs, prophets and apostles; when we read of Moses speaking with the Almighty, face to face, and other similar expressions, we must look beyond the figurative style of the record, to the operation of *Divine power* upon the *minds* of men. Divine revelation is a plain and simple thing. It is not, as some suppose, limited in its operation, or confined to any single portion of mankind. It did not cease, as some assert, when the last Scripture-writer laid down his pen, but it continues to be manifested to us. We are the objects of our Heavenly Father's regard. He has not only given us the light of the sun to illuminate the outward world, but he makes it to shine upon the evil and the good, the just and the unjust. And in the spiritual world there is the same universal diffusion of light that constitutes in the outward a monument of the benevolence of its Author. This light makes manifest to man the duties that are required of him, thus making the declaration of Paul true: "The grace of God that bringeth salvation hath appeared unto all men, teaching us that denying ungodliness and worldly lusts, we should live soberly, righteously, and godly in this present world." If we are prepared to subscribe to the doctrine that Divine grace hath appeared unto all men, and that it teaches them to deny all ungodliness, and live righteously in this present world, then we can understand to what Jesus directed the attention of the people, and to what the ministry of the Gospel should still direct them—*obedience to this light*. For just in proportion as we are obedient to it, we increase in the knowledge of the truth as it is in Jesus, "and go on adding to our faith virtue, to virtue knowledge, to knowledge patience, to patience temperance, to temperance godliness, to godliness brotherly kindness, to brotherly kindness charity."—When we have gained all these then we are Christ like; and the apostle says, if we continue to do these things we shall never fall, our knowledge of Christ will be saving, and an entrance gained into his "everlasting kingdom." Now, if the attention of the people was turned to the operation of Divine grace, implanted in their hearts, it would lead them step by step unto a knowledge of those things which pertain to the kingdom of heaven. It was because the Jews were not willing to rely upon the teaching of Divine grace, that Christ was rejected by them. Hence they persecuted and crucified Him who had been sent amongst them with the message of salvation. They were more attached to the traditions of men than the commandment of God. The simple truths of the Gospel could meet with no favor while their reliance was upon a ceremonial and outward religion. The precepts of their law

allowed "an eye for an eye, and a tooth for a tooth"—permitted them to "hate their enemies," and to return "evil for evil." They could practice their religion and still indulge the spirit of revenge and retaliation. But the precepts of the Gospel inculcated directly the opposite doctrine—the axe was to be laid at the root of the tree of evil; and a religious life was to consist in obedience to the Divine spirit and in love to man."

"There is therefore now no condemnation to them which are in Christ Jesus, who walk not after the flesh, but after the Spirit." What is this walking after the Spirit? We have an animal and a spiritual life, and as "one star differeth from another star in glory," so doth the greatness of the spiritual exceed the glory of the natural. The spiritual nature is that life which is "breathed into man and makes him a living soul." These tabernacles that compose the "terrestrial body" shall return again to dust. The spiritual nature, constituting the "celestial body," is designed to live for ever. The great end of life can only be answered as this spiritual nature is prepared to enjoy the fountain from which it sprang. The beautiful design of the Gospel is to elevate us above the earthly unto the heavenly nature—to give us the victory over the world, and prepare us for the society of sanctified spirits, not only now, but when time to us shall be no more. The Gospel brings immortality to light, by putting us in possession of those treasures which "moth and rust cannot corrupt, or thieves break through and steal."

Let us then walk after the Spirit, in the light of this Gospel, that when we are required to render an account of our stewardship we may be prepared to do it with the assurance of eternal union and communion with our Father in Heaven. Let us examine the ground upon which we stand, and in what our religion consists. Let us examine our own minds, and see how far we have witnessed the Christ-like nature to govern us—to regulate our conduct—to preserve and save us from evil. Have we guarded "the avenues of the heart against the admission of evil?" Has the sin that doth so easily beset us been overcome and subdued? Are we conforming our lives to the example of Jesus? These are subjects that have an important bearing upon our present and future well-being. Let us seriously consider them. If we imitate the example of Jesus, our religion will be practical.

It is well for us to know ourselves; we may often derive encouragement and strength, by looking at the sources of good within our own minds. It is there the silent voice of truth is heard and known and felt. And often this voice will be as a ministering spirit—an angel of light that will instruct and comfort us when

all other sources of encouragement and comfort have failed. We need spiritual as well as physical strength, and as the latter is promoted by exercise, so will the former be increased by the proper employment of the gifts and talents we possess. It is thus that we shall become qualified to perform our mission of the Gospel of Christ. What is this mission? If a brother or sister be overtaken with a fault, we should endeavor to restore such a one in the spirit of meekness and love, remembering ourselves lest we also be tempted. Our Christian duties often consist in little things, and it is a wise declaration, that "he that is faithful in a little shall be made ruler over more." By our obedience in little things we shall find that the field of duty and usefulness will enlarge, and we shall discover that there is no time for us to stand idle in the market-place, saying, "no man hath hired us." When we look around us we see the harvest is plenteous, while the laborers are few. In every work of religion, benevolence, and humanity, the call has gone forth, "enter into my vineyard and labor, and whatsoever is right ye shall receive." Time is swiftly drawing to a close, and it will soon be lost forever in the darkness of that night in which no man can work, and we are as fully convinced of this truth, that life must be followed by death, as we are of the change from day to night in the outward world. Some of us have reached the sixth, some the ninth, and some the eleventh hour; and it becomes a question of the greatest importance to us to know that we are so laboring in the Lord's vineyard as to realize our penny.

I feel the magnitude of the subject when I consider my own latter end. I am conscious that the present probation has its limits and they will soon be reached. I feel the necessity of faithfulness to truth and duty, and I desire above all things, for myself and fellow-creatures, that we may make our "calling and election sure." I am satisfied, my friends, that if we live up to the knowledge that is received, the end of our being will be answered; we shall glorify God upon earth, enjoy his presence here and for ever. Oh, my friends, let us not be idle, but enter into the garden of our own minds and labor. There is a work there that is needful for us to perform—"man know thyself, enough for man to know." If we turn within ourselves we shall discover that the fountain of truth—of love—of light—is not far from any one of us. God is that fountain, and in him "we live and move, and have our being." Oh! blessed privilege, that we should have access to the source of all good, and have no more need that any man should instruct us in Divine things, than we have of trusting to others the salvation of our souls. The work of salvation belongs to us as individual heirs of immortality

and eternal life, and it must be begun, carried on, and completed by our faithfulness and obedience to God. No man or woman ever performed an act of duty in accordance with the convictions of truth, who did not feel the reward of "well done, good and faithful servant." If we have been rewarded for faithfulness in little things, it should stimulate us to press forward towards the "mark for the prize of the high calling of God in Christ Jesus," and lead us to extend the invitation to others, to come and see how good the Lord is.

To be anxiously fearful what will become of us, and discontented and perplexed under the apprehension of future evils, whilst we are under the care of our Father in heaven, is not to act like *children*.—*Mason's Self-Knowledge*.

Extraordinary quickenings and strengthenings being often followed by peculiar temptations, conflicts and sufferings, require a particular watchfulness, if we would be earnest not to provoke the Lord to visit us with sore punishments for our carelessness.

Fear, therefore; rejoice with trembling; and, as a needful means to secure thyself from falling, temper thy joy with true humility and gentleness towards the faults of others. Be never so high-minded, O man, at the miscarriages of others, as to think thou wouldst not do so, should it happen to be thy case; for if God does not hold thee up himself, thou wilt surely make great mistakes. Therefore, thou hadst better not look upon others, but upon thyself; and, for fear of falling, be continually watchful in prayer. A great many would not have fallen so deep, had they been truly humble, and more charitable in judging of others. He who exalteth himself above others, and does not bear with the weak, is sometimes humbled and debased under the very weakest of all. Bear, therefore, since God bears with thee; and he that bears most with others shows the greatest strength.

That which renders the first assaults of temptation peculiarly severe and dangerous, is the instability of our own minds, arising from the want of faith in God; and as a ship, without a steersman, is driven about by the force of contrary winds, so an unstable man, that has no faith in God, is tossed and borne away upon the wave of every temptation.

Whenever there is an occasion, we should make an *effort* to do good—let that effort promise results ever so small. God can crown the most unpromising labor with success. And in the final day, if we "have done what we could," we shall hear the blessed word of the Master, "Well done, good and faithful servants, enter ye into the joy of your Lord."—*Asa Bullard*.

For Friends' Intelligence.

Report of the Education Committee of Friends Association of Philadelphia for the Aid and Elevation of the Freedmen.

The Committee have continued to hold regular Monthly Meetings during the Seventh, Eighth and Ninth months.

The school at Woodlawn, Fairfax Co., Va., was opened by Sarah E. Lloyd, on the 25th of Sixth month, with 13 pupils; at last report it had increased to 40, and might be larger, if the room in which it is held could accommodate a larger number. During the vacation the colored people expected to put up a house for church and school purposes, that will comfortably accommodate all who desire to attend.

The school at Leesburg, Loudon Co., Va., was assigned to Caroline Thomas, who commenced her labors on the 29th of Sixth month, with 13 pupils. The school has increased to 36.

All the South Carolina schools were vacated about the middle of Seventh month, to re-open near the middle of Tenth month, except the one located at Walnut Grove Plantation, and taught by Eliza E. Way. The place is so unhealthy that this committee do not feel that it would be right for them to encourage any young woman from the North to go there.

The schools in Virginia were mostly vacated about the same time, with the prospect of re-opening the first Second day in Ninth month. Sarah A. Steer and Caroline Thomas having so lately commenced, it was thought best for them to keep open through the summer. A late report received from the former gives 42 pupils in the Waterford school for Eighth month.

Captain Ross, of the Freedmen's Bureau, having applied to this committee for four more teachers in Fairfax County, and the application being favorably considered, it was decided to select from the numerous applicants on our list such as, in our judgment, were suitable to fill three of the vacancies; and we have offered the remaining one, at Falls Church, to Eliza E. Way, who is left without a situation by the closing of the Walnut Grove school.

At the time of closing our schools for the summer vacation we had 585 pupils under instruction in 11 schools, taught by 12 teachers. We now have 16 teachers on our pay-roll, —names and locations as follows, viz. :—

Mary K. Brosius,	Vienna,	Fairfax Co.
Mary McBride,	Fairfax, C. H.,	"
Martha Wright,	Lewensville,	"
Sarah A. Steer,	Waterford,	Loudon Co.
Caroline Thomas,	Leesburg,	"
Sarah E. Lloyd,	Woodlawn,	Fairfax Co.
Hannah Shortledge,	Big Falls,	"
Catharine Hall,	Andrews Chapel	"
Fanny E. Gause,	Herndon Station,	"

All of whom are at their respective posts.

The South Carolina schools will be opened by the same teachers who conducted them last season, viz. :—

Mount Pleasant, three schools, taught by Cornelia Hancock, Mary Taylor and Caroline Taylor. St. Helena school, by Philena Heald and Sarah M. Ely. To these we add the name of Alice Sutton, of Fairfax Court House, a member of the Society of Friends, who has been highly recommended as a well qualified teacher, and whom we have engaged as an assistant to Mary M'Bride, her school being so large that she cannot conduct it without help.

Sarah M. Ely laid before the committee a proposition to open a school at a location known as Trip's Point, one mile from the place occupied by herself and Philena Heald; she to take charge of the new school, and Philena H. to conduct the one already established. The colored men have engaged to take her in a boat to and from the school, so that they will continue to board together.

The committee feared this would be too great an undertaking, but the cause being earnestly pleaded, they have consented. There will be a small outlay for fixing up the school-room, which it is agreed to advance.

For the current year, beginning with Ninth month, this committee have agreed to adopt the rules and regulations of the Pennsylvania Freedmen's Association, respecting the pay of teachers and their transportation.

This committee think it would be advisable for the Association to address a circular letter to the colored people of each locality where our schools are established. They also recommend to the favorable consideration of this Association, Charles H. Pierce, of Florida, a colored missionary stationed at Tallahassee, who desires to obtain aid to enable him to defray the travelling expenses of two young colored women, who are well educated, and are anxious to go to Tallahassee to open schools, but have not the means, being poor and fatherless. Both the applicants have been for some time engaged in teaching, and have testimonials satisfactory to the committee.

The committee feel that the magnitude of the work before us demands a clear and plain statement at the beginning of our labors for the year, which will be so eventful to us, and which opens so full of promise to the thirsty souls, from whose parched lips the cup of instruction has been so long withheld. Every teacher who has gone back has felt *more deeply* the call to labor. Those who are waiting impatiently the clear, cool, bracing autumn days, that they may start on their longer and more dangerous journey, will bear to the sunny shores of the Palmetto State, hearts swelling with gratitude for the privilege of again meeting the upturned faces of their swarthy charges. This commit-

tee have heard from these teachers words that have stirred every feeling of sympathy, and have felt that the members of this Association have reason to take fresh courage and renew their zeal, that these brave hearts, who, nothing daunted, go forth, thankful that they are accounted worthy to be the dispensers of its charities, may be sustained. It is, after all, the smallest part that is required of us, while they make all the sacrifice.

L. J. ROBERTS, *Sec'y.*

Ninth mo. 19th, 1866.

FRIENDS' INTELLIGENCER.

PHILADELPHIA, NINTH MONTH 29, 1866.

FRIENDS TRAVELLING IN THE MINISTRY.—Wm. Dorsey has obtained from the Monthly Meeting of Friends of Philadelphia (Race St.) a minute, to pay a religious visit to the families and members of his own Monthly Meeting.

Ann A. Townsend has obtained from Green St. Monthly Meeting, Philadelphia, a minute, to attend Baltimore Yearly Meeting. She expects to visit the Meetings of Nottingham and Warrington Quarter, and to appoint meetings as duty may require.

Sunderland P. Gardner, a Minister from Farmington Monthly Meeting, N. Y., has obtained a minute to visit Duaneburg and Scipio Quarterly Meetings in the State of New York and Canada Half-Year Meeting, and to appoint some meetings within their limits if way opens.

Friends' First-day School at Green St. Meeting-House will reopen on the 7th of Tenth month, at 2½ P. M.

We are requested to state that William C. Biddle, late Treasurer of Swarthmore College, has resigned the trust on account of ill health. Henry M. Laing, No. 80 N. Third St., has been appointed to fill the vacancy.

ARE WE A PROGRESSIVE PEOPLE?—Are we advancing step by step in obedience to the unfoldings of Truth, or are we losing sight of the necessity of keeping the eye single to the shinings of the Divine Light, whereby *present* duty is made manifest?

Our forefathers have left us a goodly heritage, and we have need to take heed that we do not rest satisfied with enjoying the fruits of their labor, but prove equally earnest to fulfil

our mission, as they were to faithfully perform the work of their day.

We read of their firm integrity through years of suffering and severe persecution, and shall we relax our hold upon *the principle*, so dear not only to them, but to many who have, in more modern time, proved its value by the consistency of their lives and the crowning glory of their death.

There is no more certain truth than that inculcated by the *true* "Friend," that the mind of man is the recipient of truth immediately *revealed* by the Spirit of Christ, the Comforter alluded to by Jesus, when, in the hour of their sore distress, He told His disciples it was *expedient* for them that he should go away, but that he would "pray the Father, and He would send another Comforter, the Spirit of Truth, that should lead and guide into all truth."

These devoted followers, who had been privileged to be eye-witnesses of the miracles wrought by the power of the Father through the blessed Jesus, were wont, notwithstanding his endeavors to turn their attention to the spirituality of his mission, to look upon Him as an outward Saviour and Redeemer. Therefore, in order that they might know the *True Comforter*, he was separated from them, going, as he testified, "to his Father and their Father, to his God and their God." What was true of the disciples in that day is equally true now. So long as there is a dependence upon any thing short of the "Spirit of Truth," there is a halting by the way, a confusion of language which the childlike condition cannot understand.

We are interested in observing the advance of others, not called by our name, in the frequent acknowledgment of the necessity of being "led by the Spirit," and in making it the prominent rule of action. We rejoice in this evidence of the growth of the good seed, sown broadcast by the Husbandman, and trust it may bring forth fruit yet more abundantly to His great name. And while others are being brought gradually to acknowledge the doctrine of the inward teachings of the Divine Spirit, we desire that those who have a birthright in the Society of Friends, may not forfeit it without duly considering what they are relinquishing, and whether their disaffection has not arisen

from an impatience of the restraints imposed, which they may have looked upon as sectarian prejudices, and without having sufficiently taken into view the privileges connected with a membership in a Society holding a pure and simple faith, which has led to the adoption of the noble testimonies that form the characteristics of our religious association.

DIED, on the 29th of Eighth month, 1866, HENRY W. TROT, aged 17 months and 23 days, son of Jacob M. and Ann W. Troth, of Accotink, Va.

—, on the evening of the 17th of Ninth month, 1866, MARY M., wife of Robert Wiltbank, and daughter of George Miller, of Philadelphia.

—, on First-day, the 23d of Ninth month, 1866, MEROY WILSON, in the 80th year of her age.

The Association of Friends for the Aid and Elevation of the Freedmen will meet at Race St. Meeting-House, (Monthly Meeting Room,) Fourth-day evening, Tenth month 3d, at 7½ o'clock. The general attendance of Friends is particularly requested.

SUMMER IN SWITZERLAND; OR, PEAKS, PASSES AND GLACIERS.

LA PRIERE, OR CHAMOUVY, August, 1866.

It was my intention to describe to your readers peaks, passes and glaciers in the order I have named them, but the illness of one of my party having defeated, for the present, certain ascents which I had projected to the Buet, the Torrenthorn and the Gönnergrat, where the best views of the Mont Blanc, Monte Rosa and Oberland chains respectively are to be had, I shall be compelled to reverse the order, and begin my descriptions with the glaciers. First of all, however, a few words as to the manner of getting about here, and the various difficulties and dangers by which Alpine travel is attended.

The Mountain Equipment.—For mountain expeditions there is a dress *de rigueur*. It may be called the fashionable dress of Switzerland—that is, in the warm season. In the first place, a broad brimmed felt hat, because it is light and cool, shades the face, and endures an unlimited amount of soaking as well as of hard usage. Around it is wound a blue gauze veil, to protect the eyes from the dazzle of the snow. In the second place, a canvas knapsack, with straps to go over the shoulders and round the chest, and capable of containing one change of underclothes, two clean shirts, a few articles of the toilet, and your pipe, with its ammunition. In

the third place, a long, smooth, round ashen or oaken stick, named *Alpenstock*, with a knob or hook of chamois horn at one end, and a sharp spike at the other, which answers the double purpose of a cane and a calendar—a cane that assists you in climbing over difficult rocks or ice-passes, and a calendar whereon you record in paint, or by burning irons, the places you have visited. Lastly, strong but soft-leathered shoes, with gaiters that run up the legs, and big hob-nails screwed upon the soles and heels—the gaiters to defend the ankles from briars, and the nails to keep the feet from slipping. Your coat and trousers may be of any good, warm woollen material, but a blouse and loose pantaloons of flannel are commended as the best wear for all weathers. With this equipment, and two, three, four, six guides, according to the nature of the ascent you mean to undertake—who furnish themselves with rope, with pick-axes, with ladders, and a bag or two of provisions—you are prepared to scale the loftiest and most inaccessible peaks. You are prepared, I mean, externally, but a more essential preparation still, is the strong, steady head, the firm nerve, the sure foot, which no height looking off into infinite depths can intimidate, much less craze. Perhaps I should add that an absolute confidence in your guide—a confidence that would trust body and soul almost to his practised skill and knowledge—is quite as essential as any other requisite.

Modes of Travel.—There are three methods of reaching the higher Alps, that may be resorted to under different circumstances. For a part of the way up a charroad commonly runs, which is a sort of rough country lane, that winds through the woods and the declivities, and is practicable for one horse vehicles, that often heave and totter to a considerable elevation. It ends commonly in a mule path, which is a second sork, still narrower, still rougher and still steeper, but over which the contemplative sure-footed donkey will pick his way, with wearisome pains and slowness, but with more or less security. Sometimes the patient creature stumbles on his knees; sometimes, when more refractory, he will persist in pulling back, in spite of the precipice behind or beside him; but trust to him, nevertheless, for he will be certain to recover a sense of his situation in time, while to get off him is to run the risk of landing one or two thousand feet further down than you originally reckoned. It is marvellous, indeed, how these quadrupeds will plod on, through forests and jungles, and over sharp ledges of flinty rock, intent only on doing it safely, and satisfied with a tuft of coarse grass for a reward. Next to the goats and the native mountaineers, they are the best climbers. But, thirdly, the mule path is a Boulevard, a Broadway, a "primrose path of dalliance," compared

with what is denominated the foot path, that you are finally compelled to take to reach your ambitious ends. In some sort it is a path; it is a discernible track worn in the hill sides or across the meadow grass, which you follow without much difficulty if not with ease; but in other regards it is no more a path than a vessel's furrow over the ocean, or the bird's flight through the air. It is a series of stones that project a few inches from the brow of a cliff, on which you may step if you dare; it is the crest of a mound of hard snow, over which you crawl on all fours, looking down on either side with a most uncomfortable sense of the consequences of the slightest waver; it is a staircase cut in the flanks of a pyramid of ice (cut by yourself or your guide), and which you go up step by step till you reach a rock or stump, or thin sliver of root, whereon to hang and rest; it is a long, cold, dreary walk over miles of glacier, which has none of the smoothness of a frozen lake, as you might naturally suppose, but all the rifted, fissured, turreted irregularity of an ocean arrested and frozen in one of its maddest moments; in short, the footpath is often a path where human foot never went before, but where the human foot may go when the human mind is utterly reckless of the fate of the human neck and cranium. Yet, why do I say this; thousands of persons pass over these invisible and airy lines every summer without accident, and almost without a feeling of the danger.

Alpine Guides.—Guides, I have said, are indispensable; and let me add a word of them. They are a style of man peculiar to the country, born of its soil, fashioned by its circumstances, and with a physiognomy and a morale exclusively their own. What the sailor is to the sea, what the western trapper used to be to the prairie, these guides are to the Alps. Most of them are peasants, who have learned the secrets of the hills in conducting the cattle annually to their lofty pasturages, and who have been thus enured to fatigue, exposure, long marches, solitude and even privation. To this peaceful calling they have generally added the more exciting and adventurous avocation of the chamois hunter. They have learned from boyhood to pursue their bounding game from slope to slope, from snow-peak to snow-peak, until they have become as expert as it in leaping remorseless gulfs and scaling the abrupt far-off toppling walls. In and about Chamouny not a few of them spend their off-season—that is, the season when no company comes—in the dangerous practice of crystal hunting. The precious stones of this region are hidden far away among the crevices of the Aiguilles that prop Mont Blanc—thousands of feet toward their sharp, needle-like summits; and there it is that the Chamouniard climbs to find his agates, and amethysts, and sapphires, and beautiful crystals.

Like the sailor and the trapper, the guide bears the impress of his occupation upon his face and form. He is sun-burnt, stalwart, firmly knit and vigorous, but he is also thoughtful and silent. All men who have to do with vast spaces like the ocean, the prairie, the mountain—who grapple with nature in her magnitudes—who brave her grander violences, contract a resolute and concentrated habit, but quite as universally they contract a brooding habit. They can be jovial as sailors are, or as scouts are at times; their long pent-up feelings effervesce in moments of relaxation, when they get on shore, when they reach civilization, when they descend to the plains, in other words, when their peculiar task is done; but, habitually, they are meditative, reticent, intent upon their work, faithful and fertile in expedients. Many of these guides, besides, are men of not a little education and refinement of thought. They have often been associated with intrepid scientific men like De Saussure, Agassiz, Forbes, Tyndall, Charpentier, in toilsome expeditions over the ice; have camped out with them in starry or tempestuous nights, when there was no society but their own; have shared with them the perils and privations of great enterprises; have caught some of their geological or botanical enthusiasm; have imbibed some of their spirit of research and observation, and thus have brought away from the contact other sensibilities, other tastes, other knowledge than that of the rude and hardy mountaineer. The Bulmuts, the Laueners, the Coutats, the Bohrens, the Cachats, and others, have a reputation almost as wide as that of the eminent men whom they have so coolly and efficiently served in researches that would have been impossible without them. But, of course, among guides, as among others whose services are in much demand, there are a great many pretenders, a great many useless fellows, and my remarks apply only to the real and worthy members of the profession.

The Terrors of the Alps.—The greatest dangers of Alpine travel are not the real dangers, but the imaginary, or those which arise from the irritability of the imagination. A person, in fact, who is liable at all to giddiness or nervousness, or who is capable of losing his presence of mind for a single instant, ought never to undertake a journey in the higher regions. It implies no want of courage to be influenced by this kind of sensibility. A young English officer confessed to a friend of mine, that though he had often stood the brunt of battle in India, had stood up calmly and coolly to be shot at by a thousand guns, he could not make the passage of so simple an ice-ridge as *Les Ponts* of the *Mer de Glace*, where hundreds of ladies cross every summer. His fancy actually excited him into a tremor of fear whenever he approached any place of the sort. A man will

walk a rail or fence with the utmost indifference; when it is only a few feet from the ground; raise it as high as the roof of a house, with an incline upon each side, like that of a roof, and he will become exceedingly cautious in crossing it; but raise it to the height of a thousand feet, with profound abysses on each side of it, and he shrinks aghast at the very idea of crossing it. Yet, in the three cases supposed, the thing to be done is the same; but the circumstances under which it is done make a vast difference. These Swiss haymakers, men and women, will rake and toss hay, and run about in sport on the sides of hills where I have found it impossible to stand without clinging to a tree or some other support.

Yet there are real dangers in the Alps, which are hidden crevasses or fissures in the ice, covered by a recent fall of snow; steep slopes of ice, on which the foot finds it impossible to rest, and avalanches of mud, stone and ice. All these dangers, however, may be effectually guarded against by a little precaution and a perfect reliance upon the skill, judgment and presence of mind of the guides. "They have an instinct," said a gentleman, an old cragsman, "where to put their feet, what paths to take, what overhanging cliffs to avoid. With their ropes, that tie all the members of a party together, so that a fall of any one of them is instantly checked by the resistance of the others; with their pickaxes and ladders for cutting deep steps; and with their sagacity and complete knowledge of all the twistings and turnings of the hills, and all the habits of the snow, they have reduced the dangers to a minimum. But without these faithful and indispensable companions, no amateur mountaineer—not the oldest member of the Alpine—is safe for a day."

Letter from one of the Teachers of "Friends' Association for the Aid and Elevation of the Freedmen" to the Secretary of the Education Committee.

LEESBURG, Eighth month 26th, 1866.

Dear Friend:—I think I can truthfully say my work is prospering. My school now numbers 42 scholars. There are several who are very irregular in attendance; they are the larger ones,—those who have to support themselves; of course they cannot come every day. I try to encourage them to give me all the time they can spare from other duties. I have had considerable difficulty to impress upon these children the importance of punctuality, and thought for the first few weeks I never should be able to accomplish it; but by dint of perseverance in encouraging those who came early, and in showing my displeasure to those who were late, the habit of promptness is being gradually established. I will give thee an in-

stance of my manner of treating those who are late. When such scholar makes his appearance inside the door, I instantly stop whatever I may be doing, and say "Children, tell (calling the delinquent by name) at what hour school commences;" at this they will *sing* out, "School commences at 8 o'clock in the morning. This seems to mortify them, and I think is having a good effect; in some cases it has acted like a charm. I often find it in my heart to excuse them for not being on the spot at just the right time; many of them have not the means within their reach of knowing anything about it.* I am becoming very much attached to my children. Who could help it? As I approach my school-house of a morning, and meet the eager, loving faces turned to me,—each with a word of greeting,—and as I take my place behind my desk, previous to commencing my morning labors, and look around me, all faces are turned towards me with looks of confidence, respect and love. Is it to be wondered at? I like to visit the homes of my children, and do so as often as my time admits of. I am always sure of a welcome; and for one filling the position I do, to be made to feel welcome in any home in Leesburg, surely the days of miracles are not ended! Yes, I love to visit these people in their homes, squalid and miserable as most of them are; and I would not exchange the privilege of intercourse with them for the same with the owners of the most luxurious homes in Leesburg.

I fear there will be much suffering amongst them this winter, notwithstanding their efforts to provide for themselves. There is one old woman living not far from where I board, who has now, depending on her for support, one daughter, a helpless cripple, and three little grand-children, whose parents were sold from them when they were but infants,—children of three daughters,—leaving them to their grandmother. One of them comes to school to me; the others are too small to come. I fear they will suffer for the common necessities of life this coming winter: and what a life of trials and suffering her's has been! She has not merely tasted of the cup of slavery, but she has drained its bitterest dregs; still she does not complain. In speaking to me the other day, she said, "It 'pears like, miss, we should *live* on our knees, for this great blessed freedom we now have." And this is only one instance.

I had very pleasant calls a few weeks ago from S. A. Steer and Eliza Janney, and have

* I would like to mention, in reference to progress, one special case. A boy about twelve years old, who did not know his letters when he first came to school to me, neither did he know how to make a figure, or hold a pencil, is now reading *well* in Wilson's Primer, writing his name very well, on slate, doing short examples in addition, and answering simple questions in mental arithmetic promptly.

met with them since. Not long since I received an invitation from S. M. Janney to attend their Quarterly Meeting, and make them a visit at the same time, which invitation I most gladly accepted. I left Leesburg on Sixth-day afternoon, in stage, which took me to within one and a half miles of their place, where they met me with the carriage. I staid until Third-day morning, and had a very pleasant visit indeed. They are *true Friends*. I attended meeting on First-day, and enjoyed it much. It was the first I had attended since I left home.

Thy attached friend, C. THOMAS.

For Friends' Intelligencer.
THE GOLDEN-ROD.

BY A. H. G.

Sweet thing! Thou speak'st of summer and of summer days gone by;
O whence thy power to bring that radiant smile from out the sky?

Would that thy beauty could endure, but that, alas! must die.

It even now begins to fade, as all earth's beauty must,
E'en as my heart begins to lose its strength of earthly trust;

O that my treasures were laid up where treasures cannot rust!

Thou makes me think of childhood, when the world seemed pure and bright,

And every thing that God had made seemed clothed in heavenly light,

And I saw no sin—I saw no curse—I saw no sign of blight.

I dreamed that all around were good—that every one was true;

I trusted all—respected all—nor dark deception knew,

And wished to live that I might be thus good and perfect too.

But oh! the painful, bitter days, when power dawned on me—

The power of sight, by which I might my fellow-beings see;

Those days, alas! they taught me well of human frailty.

But let me look on thee again, sweet flower, before we part;

Thou hast a something in thy glow that reaches to the heart—

Something that soothes the heavy pain, though it may not heal the smart.

'Tis He, the God of all the earth, that makes thy glow so bright;

And has He not a care for me, to fill me with His light,

And will He not give strength to me for the battle I must fight?

"Trust Him!" thy golden smile hath said, "trust Him, for He is true;

Draw nigh to Him with all thy heart, thy watchfulness renew;

What He hath promised unto thee He will not fail to do."

Thy pride—thy will—they may be strong, but thou must lay them down;

The way is rough—perhaps 'tis long, and oft with briars strown;

But I must bear a heavy cross, if I would wear the crown.

Farewell, sweet flower—my heart is faint, I cannot bear it now;

'Tis He alone can give me strength, and teach my head to bow,

If He would place the piercing thorns upon my shrinking brow.

"Not yet—not yet, I'll hold thee still, if thou wilt longer stay;

Yea, wait, blind mortal, wait, my smile hath something more to say;

Briars can never grow *within* the straight and narrow way.

"Why must thou bear a heavy cross, if thou the crown would win?

What is the cross, but to deny thyself some favorite sin—

In wise obedience to the voice that speaketh from within!

"Is it so hard to leave the foes of righteousness and rest,

So hard to follow Him by whom thou ever hast been blest,

To bow to Him who beckons thee to lean upon His breast?

"O mortal, when thou look'st upon the smile God gave to me,

Know thou that all things from His hand came beautiful and free,

But thou hast fallen from thy place—hence thy despondency!

"Take up thy cross and follow Christ, as He may lead the way,

Easy and light His burden is to those who but obey—

Nor *thorns* nor *briers* can be found *within the narrow way*!"

For the Children.

WHAT ANIMALS USE FOR HANDS.

BY WORTHINGTON HOOKER.

Though animals do not have hands, they have different parts which they use to do some of the same things that we do with our hands. I will tell you about some of these in this chapter.

The dog makes his teeth answer in place of hands. Dogs always do this when they carry things. They cannot carry them in any other way. You carry a basket along in your hand, but the dog takes it between his teeth, because he has no hand as you have.

I have told you, in another chapter, how the cow and the horse crop the grass. They do it, you know, with their front teeth. They take up almost any kind of food—a potato—an apple—with these teeth. These teeth, then, answer for hands to the cow and horse. Their lips answer also the same purpose in many cases. The horse gathers his oats into his mouth with his lips. The lips are for hands to such animals in another respect. They feel things with their lips, just as we do with the tips of our fingers.

My horse once, in cropping some grass, took hold of some that was so stout and so loose in the earth that he pulled it up by the roots. As he ate it the dirt troubled him; he therefore knocked the grass several times against the

fence, holding it firmly in his teeth, and thus got the dirt out, just as the people do out of a mat, when they strike it against any thing.

I once knew a horse that would lift a latch or shove a bolt with his front teeth as readily as you would with your hand. He would get out of the barn-yard in this way. But this was at length prevented by a very simple contrivance. A piece of iron was fixed in such a manner at the end of the bolt, that you could not shove the bolt unless you raised the iron at the same time. Probably this puzzled the horse's brain. Even if he understood it, he could not manage the two things together. I have heard about a horse that would take hold of a pump-handle with his teeth and pump water into a trough, when he wanted to drink. This was in a pasture where there were several horses, and, what is very curious, the other horses, when they wanted to drink, would, if they found the trough empty, tease this horse that knew how to pump; they would get around him, and bite and kick him till he would pump some water for them.

Monkeys have four things like hands. They are half way between hands and feet. With these they are very skilful at climbing. There are some kinds of monkeys that use their tails in climbing, as a sort of fifth hand.

The cat uses for hands sometimes her paws, with their sharp claws, sometimes her teeth, and sometimes both together. She climbs with her claws. She catches things with them—mice, rats, or any thing that you hold out for her to run after. She strikes with her paws, just as angry children and men sometimes do with their hands. When the cat moves her kittens from one place to another, she takes them up with her teeth by the nape of the neck. There is no other way by which she can do it. She cannot walk on her hind feet and carry them with her fore paws. It seems as if it would hurt a kitten to carry it in the way that she does, but it does not.

When a squirrel nibbles a nut to make a hole in it, he holds it between his two fore paws like hands. So also does the dormouse.

The bill of a bird is used as its hand. It gathers with it its food to put into its crop. When you throw corn out to the hens, how fast they pick it up and send it down into their crops to be well soaked. The humming-bird has a very long bill, and in it lies a long, slender and very delicate tongue. As he poises himself in the air before a flower, his wings fluttering so quickly you can scarcely see them, he runs his bill into the bottom of the flower where the honey is, and puts his little long tongue into it.

The bill of the duck is made in a peculiar way. You know it gets its food under water in the mud. It cannot see, therefore, what it gets.

It has to work altogether by feeling, and it has nerves in its bill for this purpose. It has also a row of pointed things all round the edge of its bill. They look like teeth, but they are not. They are used by the duck in finding its food. It manages in this way: it thrusts its bill down, and as it takes it up it is full of mud. Now, mixed with the mud are things which the duck lives on. The nerves tell the duck what is good, and it lets all the rest go out between the prickles. It is a sort of sifting operation, the nerves in the sieve taking good care that nothing good shall pass out.

One of the most remarkable things used in place of a hand, is the trunk of an elephant. The variety of uses to which the elephant puts this organ is very wonderful. It can strike very heavy blows with it. It can wrench off branches of trees, or even pull up trees by the roots, by winding its trunk around them. It is its arm with which it carries its young. It is amusing to see an old elephant carefully wind its trunk around a new-born elephant and carry it gently along.

But the elephant can also do some very little things with his trunk. He has at the end of the trunk a sort of finger. It is a very nimble finger, and with it this monstrous animal can do a great variety of little things. He will take with it little bits of bread, and other kinds of food that you hand to him, and put them into his mouth. He will take up a piece of money from the ground as easily as you can with your fingers. I once saw an elephant take a whip with this fingered end of his trunk, and use it as handily as a teamster, very much to the amusement of the spectators.

The elephant can reach a considerable distance with his trunk; and this is necessary, because he has so very short a neck. He could not get at his food without his long trunk. He can turn this trunk about in almost every direction, and twist it about in almost every way. It is really a wonderful piece of machinery. Cuvier, the great French anatomist, says there are over thirty thousand little muscles in it. All this army of muscles receive their orders by nerves from the mind in the brain, and how well they obey them.

There are two holes in the end of the trunk. Into these he can suck water, and thus fill his trunk with it. Then he can turn the end of his trunk into his mouth and let the water run down his throat. But sometimes he uses the water in his trunk another way; he blows it out through his trunk with great force. He does this when he wants to wash himself, directing his trunk in such a way that the water will pour over him. He sometimes blows the water out in play, for even such great animals have sports like children. Sometimes, too, he blows water on people he does not like. You perhaps have

read the story of the tailor, who pricked the trunk of an elephant with his needle. The elephant, as he was passing, put his trunk into the shop window, perhaps wanting something to eat. He was angry at being pricked, and was determined to make the man sorry for doing such an unkind act. As his keeper led him back past the same window, he poured upon the tailor his trunk full of dirty water, which he had taken from a puddle for this purpose.

From the Nonconformist.

ACROSS THE OCEAN.

A very interesting paper might be written, we do not doubt, on the statistics of emigration. The difficulty—we suppose it is insuperable—would be to collect authentic returns of all the information requisite for getting at the more curious phenomena of the subject. Even now—bare and comparatively scanty as are the facts within reach—we can easily conceive of their being so assorted by a competent mind as to bring out a number of very unexpected and highly significant results. They would touch, however, only the outside of the matter. Emigration, in every instance, is connected with a considerable, sometimes a vast, amount of what we may call heart exercise. Take the emigrants from Europe at half-a-million annually or thereabouts; then select any one family, or individual, from the vast aggregate, and think of the causes which have operated to overbear the natural reluctance of people to expatriate themselves, of the rending of ties which the decision involves, of the deep emotions which the last farewell excites, of the stern anxieties which every glance into the future awakens, of the tender and tearful reminiscences which steal homewards, and of the dreary sense of vacancy which the departure has left there—and then multiply all this by the number of emigrants, and you will get at some glimmering notion of the measureless proportion of life-history which falls under the chapter of emigration.

"Across the ocean." There are very few of our readers, we dare say, who do not know by experience what it is to have one or more of those dear to them settled, apparently for life, across the ocean. We are not about to look at the pathetic side of the subject, for we are not aware that it would answer any useful purpose to do so. People for whom sharp discipline has been appointed, and who have already passed through the most painful stage of it, derive very little benefit, if any, from being reminded of what or how they may have suffered. It would but minister to morbid feelings to recall scenes which have photographed themselves upon the memory for all future time, and the briefest recurrence to which stirs deep emotions. We have no such purpose in view. Our object in touching upon this theme is

simply to point out that the discipline to which we have alluded has its uses—not merely of a general kind, as all discipline has, but of a special kind, growing out of its own speciality. We are or we may be the better for being able to look "across the ocean" in the daily exercise of our home affections. We may and we should gain from it valuable results which might not be otherwise so well secured. The process is one which, while it contributes to ripen, tends at the same time to impart a peculiarity of flavor to the character, and they who have in any measure realized the effects, and traced them up to their cause, would not willingly part with the experience which has nevertheless put them sorely to the test.

The more intense our home affections are, the more liable they also are to become narrow and exclusive. As a man who seldom sees any but the members of his own family, grows more and more disinclined every year to pass the boundaries of his own little circle, so the sympathies which allow themselves to be absorbed by objects lying within a very limited sphere, cease after a while to be attracted by anything beyond it. The haunts of daily life, its occupations, its solitudes, its troubles, its joys, gradually come to stand in the presence of these affections and sympathies, as if they contained the whole world in themselves, and active interest hardly cares to travel beyond it. Whenever such is the case, we are sure to forget the relations we sustain to our neighborhood, our country, and our race, and to pace our mill-horse round of duties, not merely as if no such relations connect us with the world outside of it, but as if there were no such world with which to be connected. The lines from the heart to its objects are so direct, so immediate, so short, and the action and reaction of each upon each is so little interrupted by interposing circumstances, that there is an almost irresistible tendency in the inner man to dwindle rather than expand. It may seem at first sight absurdly fanciful to suppose that mere material distance can operate to correct the tendency to which we have alluded—but we think it will be admitted, on careful reflection, that it does so. Any one who looks "across the ocean" for a beloved one, relative or friend, has a marvelously strengthened appreciation of the reality of intervening things and of the human interests which lie beyond his customary horizon.

The experience to which we refer produces effects very similar to those of travel—similar in kind, although fainter in degree. Imagination, in the one instance, does for us what the bodily senses do in the other—receives a vivid impression of the fact that there are, far away in the distance, scenes, and people, and interests, and activities, and joys, and sorrows, as

real as any of those that immediately surround us. Nothing, it may be, is hereby added to our knowledge, but much to our incorporation of that knowledge with our own life. To the feelings, if not to the apprehension, the world is a wider place to us than ever it was before, and has a vastly increased breadth of actuality, when any one dear to us has gone to dwell at the antipodes. Not the mind, perhaps, but the heart, is enlarged by the fact.

But there is a further good resulting from this width of separation. It brings about in our minds a vivid consciousness that things are managed for us far more than by us. As it regards those who are at home with us the case seems, but only seems, to be otherwise. We think for them, we are consulted by them, we act with them day by day, or at any rate we feel that we can do so whenever the necessity for it arises. If we cannot reasonably believe that the control of their affairs is in our own hands, we still please ourselves with the idea that we can at any moment bring powerful influences to bear upon their course and destiny. But "across the ocean" they are utterly beyond our reach. We can never fully realize to ourselves their precise position. The letter, which arrived but yesterday to gladden our hearts, informs us only of matters as they stood, it may be, weeks ago, and the reply we make to it may have become useless for any purpose of practical direction before it arrives. A sense of helplessness is permanently present with us, and we are compelled to resign ourselves to it. Well, but if we are in a morally healthy state, the trust which we once had in ourselves we are schooled to transfer to other hands. Things do not forthwith go to pieces because we have no part in the ordering of them. The laws which govern human life do not cease to operate because we are unable to watch over the process of their action. Another will than ours—a higher one—presides over, shapes and determines interests which appeared once to be subject, in part at least, to our domination. We can credit ourselves with none of the agency by means of which have come results in which we rejoice. We can only be passive and patient under sorrows and calamities which we can do nothing to avert, to alleviate, or to remove. Not only is the world a wider one than we had been wont to imagine, but it is under the government of an all-persuasive authority. And so we learn to shift the basis of our confidence, and gradually become familiar with the fact that while duties belong to us, events everywhere, at home as well as abroad, belong to One infinitely more competent to manage them.

Then, again, no circumstance, save death, has a more direct tendency than distance to dispose us to idealize the objects of our affection. "Across the ocean," we see them through a

haze which conceals from us very much of the grosser and inferior elements of their being, but which, in an appreciable degree, sheds a halo of light round all that we most value in them. Our love goes out towards them with all the fondness which is associated with the feeling that it will be satisfied, and in all the simplicity and genuineness of an unselfish affection. And this, be it remembered, is a highly salutary kind of training. It helps mightily to develop the spiritual part of us. It exercises just those powers and susceptibilities which have to be exercised about true religion. It accustoms us to walk by faith instead of by sight—to look upon things not seen with an interest we have too commonly reserved for things that we see—to go out of ourselves, far, far away, for some of our choicest pleasures—and to realize the wonderfully profound truth, so much more widely applicable than we have suspected, that "man does not live by bread alone, but by every word that proceedeth out of the mouth of God." And, then, to reconcile us to the discipline which is accomplishing these ends, we are bidden to look forward to a future in which there will be "no more sea"—no barrier to close and familiar intercourse—nothing to interpose between our intensest love, and its worthiest, its all-comprehending object. So it is that our bitterest trials deepen and purify our sources of enjoyment—

And darkness shows us worlds of light,
We never saw by day.

ITEMS.

A disastrous flood, caused by heavy rains, recently occurred in the West. The great corn fields along the bottoms of the Big Miami are reported to have suffered considerably, the water being over the tops of the highest corn-stalks. It is estimated that twenty million bushels of corn were destroyed by the freshet. Scores of miles of fences were carried off. The Scioto, at Columbus, overflowed its banks, inundating the whole valley west of the river and north of the national road. Many families were driven from their homes or compelled to seek shelter in the upper part of their dwellings. Railroads were seriously damaged, and on many of them travelling was interrupted for several days. Cincinnati, Indianapolis, Dayton, Columbus, McPhersonville and other places suffered severely.

The latest telegrams from the continent represent the political skies as again overclouded. Austria, in negotiating with Italy, made unreasonable demands, to which Italy will not submit. Austria has overcharged the debt of Venetia, and withholds Venetian property which she was bound to transfer. The remonstrances of Italy failing, the King of Prussia has notified the court of Vienna that unless it recede from its position war would instantly be resumed.

LAYING THE LINE ACROSS THE GULF OF ST. LAWRENCE.—*Despatch from Cyrus W. Field.*—*Port-au-Basque*, Sept. 15.—The Medway completed coaling at midnight on Tuesday, and left in company with the Terrible at daylight on Wednesday morning.

We arrived at St. Pierre early on Thursday morn-

ing, but were prevented from entering the harbor by thick weather until next day.

We have found a suitable landing place for our cable from Placencia to St. Pierre.

We arrived here at three o'clock this afternoon, and shall proceed to lay the cable across the Gulf of St. Lawrence as soon as the weather will permit.

It has been blowing a gale all day, preventing us from landing before. We arrived off this place early this morning.

CYRUS W. FIELD.

THE FREEDMEN.—From the semi annual report (July, 1866) of the schools and finances of the freedmen, by Rev. J. W. Alvord, Inspector, we extract the following table:—

States.	Schools.	Teachers.	Scholars.
Virginia,.....	123	200	11,784
North Carolina,.....	119	135	9,084
South Carolina,.....	75	148	9,017
Georgia,.....	79	113	7,792
Florida,.....	38	51	2,663
Alabama,.....	8*	31	3,338
Mississippi,.....	50	80	5,407
Louisiana,.....	73	90	3,389
Texas,.....	90	43	4,590
Arkansas,.....	30	28	1,584
Kansas,.....	15	24	1,500
Missouri,.....	38	46	2,698
Kentucky,.....	35	58	4,123
Tennessee,.....	42	125	9,114
Maryland,.....	86	101	5,144
District of Columbia,.....	74	132	6,552

Total.....975 1,405 90,778

In these figures are embraced only the schools regularly established and duly reported. In every State there are numbers of private schools of all description, spontaneous and self-sustaining, of which it is difficult to obtain statistics. It is estimated that 150,000 freedmen and their children were scholars on the 1st of July, against 125,000 on the 1st of January. There is observable everywhere increased interest in these schools on the part of the better class of the white population; but outrages are still common among the ignorant and degraded, especially in Georgia, Mississippi, and, as is well known, in Tennessee. Religious conventions in Virginia have acknowledged the duty of educating the blacks. In North Carolina titles to real estate for school-houses have been obtained in several instances, and efforts are making by the colored people of South Carolina to increase the number of those already held by them, and improved chiefly at their own expense. Fifty of the regular teachers in the latter State are colored, as are most of the teachers of day schools in Florida and in Kentucky; at Wetumpka, Alabama, is a colored teacher of whom particular mention is made. The cost of tuition is paid by the freedmen to a greater or less extent—in Texas altogether. Florida is the only Southern State which has provided by law for the education of the blacks, who are taxed for the necessary funds to establish schools in every county in the State, and to pay the salaries of a superintendent and assistants. The condition of schools in Louisiana is thoroughly disorganized, owing to the suspension of the school-tax levied by Gen. Banks. Kentucky has received least assistance from benevolent associations. The instruction of colored children was not tolerated till after the formal abolition of slavery by constitutional amendment. The only statement of the cost of schools is furnished by South Carolina, being based on the expenses of seventy-five schools whose teachers were supported mainly by Northern

associations. These were, in the gross, \$72,000; at about \$8 for each pupil, and about \$40 monthly for every teacher. Mr. Alvord suggests that industrial and normal schools be established, with reform schools at a number of central points; that desks be provided to enable writing and drawing to be taught; and that there be uniformity in the blank reports for superintendents.—*The Nation*.

THE CHILDREN'S FRIEND. A Friends' Illustrated Monthly Journal, devoted to the instruction of the Young. It presents a variety of reading matter in a pleasing and attractive style, and is designed to supply a want long felt in our Society for juvenile reading, of a purely moral and scientific character, that will aid in the growth of virtuous principles. The Sixth No. (Tenth month) will contain a Steel Engraving of Wm. Penn. the only original picture of his youth. The closing number of present volume will present his portrait when a Friend, taken in advanced years. Terms \$1.50 per annum, in advance. Back numbers supplied to new subscribers. 922 2.

A YOUNG WOMAN of experience wants a situation in a private school, or as Governess in a family. Address 721 tf. E. W. C. Hockessin, Delaware.

WANTED, by a young woman, a Friend, a situation as Assistant Teacher, or would take charge of a private school. 929 4t. Address ASSISTANT TEACHER, Office Friends' Intelligencer.

APPLE PARERS, Preserving Kettles, Bread Slicers, Clothes Sprinklers, (for ironing,) Patent Flat-Iron Holders, Knives and Scissor Sharpeners, Expansion Brace Bits, Clutch Braces, (require neither filing or notching of bits,) and a general variety of Hardware and Tools. For sale by **TAUMAN & SHAW,** 929. No. 836 (Eight Thirty Five) Market St., below Ninth.

DOMESTIC DRY GOODS.—Always on hand, a large assortment of Domestic Dry Goods; Muslins of all kinds and of the best makes, both Bleached and Unbleached; Flannels of all grades White and Colored, Twilled and Plain; Calicoes, Ginghams, Check, Shirtings and Drillings, Bleached and Brown Table Linens, Towelings by the piece and by the yard. Men's and Boys' wear, a well assorted stock. **ERZKIEL TYSON,** 721 tf. 1638 Market St., Philada.

CONCORDVILLE SEMINARY.—The Fall and Winter Term of Concordville Seminary, commences Tenth month 1st, 1866. In addition to the regular course, a Commercial Department has been instituted. For circulars address, **JOS. SHOOTLINER, A. M., Principal,** Concordville, Delaware Co., or **MAGGIE B. JACKSON,** Kennett Square, Pa. amvt immi

FATON FEMALE INSTITUTE.—A Friends' Boarding School, situated on the Phila. & Balt. C. R. R. Next Term will commence on the 1st of Tenth month next. For Circulars, giving full information, inquire of **EVAN T. SWAYNE, Principal and Proprietor,** 8mo. 15, 1866—awa at p 106. Kennett Square, Chester Co., Pa.

CHESTER VALLEY ACADEMY.—The next term of this institution commences 9th mo. 3d., 1866. Whole number of pupils last year, 107,—60 boarders, 47 day pupils. Send for a Catalogue. **J. K. TAYLOR, Principal,** 84 10t 106. Croftsville, Chester Co., Pa.

BELLEVUE FEMALE INSTITUTE.—The Fall and Winter Term of this healthfully and beautifully located Boarding-School for Girls will commence 10th mo. 1st, 1866, and close 4th mo. 12, 1867. For further information apply for a Circular to **ISRAEL J. GRAMME,** } Principals. **JANE P. GRAMME,** } **Attleboro' P. O., Bucks county, Pa.** 72 tf.

CHESTERFIELD BOARDING SCHOOL FOR BOYS, situated on the Crosswicks Road, three miles from Bordentown, N. J. The Fifty-Third session of this Institution will commence on the 19th of 11th mo. 1866, and continue twenty weeks. Terms, \$65. For further particulars address **HENRY W. RIDGWAY,** 4766 825t 3367 pmnz pa in. Crosswicks P.O., Burlington Co., N. J.

SAMUEL TOWNSEND & SON, Produce Commission Merchants, No. 52 Light Street, Baltimore, respectfully solicit consignments of Grain, Flour, Seeds, Butter, Eggs, Beans, Poultry, &c. Constantly in store and for sale, Clover, Timothy, Orchard Grass, and other Field Seeds. Also Bone Dust and other Fertilizers. Dried Fruits bought and sold. 721 tf. 6.

W. M. HEACOCK, General Furnishing Undertaker, No. 18 North Ninth Street.—A general assortment of ready-made Collars, and every requisite for Funerals furnished. Being entrusted with the oversight of "Fair Hill" Burial Ground,—Funerals, and all other business connected with the ground, will be promptly attended to. 811. ly. was m p.

SELECTIONS FROM THE WRITINGS OF JOHN BARCLAY.

(Continued from page 467.)

1816, *April 16th*.—Went this day for the first time on trial to ——— Solicitors; being at the office at nine in the morning, and leaving it at nine in the evening to return home at Clapham. Did not attend a meeting in the middle of the week on first going there; but the third week I went to Grace Church Street Meeting, and regularly afterwards to some one meeting, unless absolutely impracticable.

1816, *April 30th*.—Independent of all other considerations which might induce me to court the company and intercourse of Friends, (and many other reasons there are,) this one would have much weight with me, namely, that into whatever Friend's family I have gone, I have not as yet failed to find them a happy set of people,—cheerful yet sober, liberal yet strict, and above all things, sincere and honest. I have not had much acquaintance with Friends; but I may truly declare, that I have seldom, if ever, gone away from a Friend's house without carrying with me a temper and feeling of mind so peaceable, so calm, contented and cheerful, full of such warm desires of being and doing good, as are by no means easily effaced.

1816, *May 1st*.—Though pressed hard for time, I am constrained to commemorate the admirable goodness of the Lord to my soul this morning, in evidently answering my petition, and affording me suitable instruction, which

was received, I trust, with benefit. At Grace Church Street Meeting, this morning, being weary with my own intruding imaginations, and earnestly desiring to be rightly directed in the awfully important business which I came about, and for which I had given up much to obtain liberty of attendance,—a secret prayer seemed to arise and run through me, that, if it were best, I might, through some instrumental means, be informed and instructed in the great duty of public worship. No sooner had such desires presented themselves, than M. S. (Mary Savory) rose, with nearly, if not exactly, these words: "Look not unto man, whose breath is in his nostrils, O thou of little faith; but look thou unto the Lord, who is mighty to deliver, and able to save to the uttermost, them that trust in him." As if she had said, "Look not for direction in this matter to man, but to the Lord, who can best instruct and incline thee when and how to worship himself acceptably." This instance of condescension was, and still remains a memorable one with me, and is not less gratefully remembered, on account of having experienced many especial favors of a similar nature and description, some of which, indeed, have been still more striking.

1816, *May 8th*.—My birthday (nineteen years of age.) I contrived to get one hour in the garden in the morning, though so closely tied to business. Many reflections appear to have been my companions in the midst of much business at this time; indeed, my mind was

greatly exercised and tried, yet also comforted, yes, unspeakably, during this season.

Hitherto the Lord hath helped me; hitherto has he helped me exceedingly,—more than I could even have thought or asked; and I can abundantly testify to this truth, “no good thing will He withhold from them that walk uprightly,” or even from them that seek to do so.

1816, *May 27th*.—I cannot but believe that the Lord will redeem my soul from the depth of difficulty and distress, which seem to encompass it; though there seems no way he will make one over the pit, which is dug about me by my enemy. Thanks be to the adorable fountain of all goodness, my faith is yet firm; I know in whom I have believed and trusted, and that He is still able and willing, and shortly (in his own time) will make bare His arm, which is, indeed, mighty to save and to rescue. I read that the prayers of some, formerly, did ascend even into the ears of the Most High, and came before him as a memorial; now, I do heartily and indubitably believe, that “He is the same yesterday, to-day, and for ever;” that “his arm is not shortened that he cannot save, nor his ear grown heavy that he cannot hear” the cries of such as seek his direction.

1816, *May 29th*.—O Lord God of my fathers, the protector of every one that putteth his trust in thee, be pleased in thy unbounded compassion and unutterable mercy, to look upon thine afflicted servant for good. O! Lord, thou knowest my case and circumstances better than I can possibly relate; thou seest all my wants, my troubles and my fears; in thy abundant and overflowing mercy, forsake me not in this time of trial and deep exercise of spirit. O! thou that art mighty to save and to deliver, help me that I perish not in this extremity; but that aided by thee, I may be enabled to do thy will whilst here, whatsoever it may be; and be prepared to glorify thee for ever hereafter.

1816, *May 30th*.—O Lord! the Father of the fatherless, the helper of the helpless, the friend of the afflicted; who hast promised never to forsake them that seek thee, and trust in thee; receive the sigh and tear of one whose spirit crieth unto thee day and night,—yea, Lord, thou knowest, through every hour of the day; I pray not that thou wouldst take me out of the world, or from that station and place in it, which, in thy infinite goodness, is appointed for me; but this does my spirit crave of thee with unspeakable fervency, even that in all things, at all times, and in all places, thou mayest be pleased to dwell with me, and to keep me on every hand from all evil.

1816, *June*.—According to my present feelings and experience, I do verily believe that the business upon which I have entered is such

as requires much more time, close study and attention, than I can conscientiously give up thereto; it does entail such entanglement and engrossment in the things of time, as to leave to uncertainty and almost inevitable neglect the things of eternity. I, also, am of the firm persuasion, that business is not of that first importance which is so generally attached to it; but is, and should be, secondary and subordinate to the first and greatest object in life.

1816, *June*.—If after all means and endeavors are made use of, we believe that any thing is right to be done, surely it is our duty to do it. We ought not to look at the effects or consequences of thus having acted, but to leave them to Divine wisdom, that He may overrule or dispose of them as He sees best,—whether He is pleased to give us satisfaction within and the approbation of others, or to withhold them. None can tell us of our duty with certainty in every respect; they can tell us of the great fundamental and indispensable rules of the moral law; but in such actions and steps, the omission of which are no breach of morality, others can only recommend what they think is right; yet this is no infallible rule for us. Now, who is more likely to come to the knowledge of his duty in any particular, than he, who, in sincerity and simplicity, is daily and hourly striving to conform himself to the will of his Maker, as far as he knows it. Such a one should not despair or grieve if, in every respect, he does not immediately and clearly discover his way cast up before him; but rather should join faith to his obedience, endeavoring to be content and thankful that he is permitted to know what little he does, and is enabled to act up to that little; humbly hoping, and patiently waiting for more, if necessary.

1816, *June 12th*.—I have often been struck with the close analogy which many narratives in the Bible bear to the state of our own minds. The manner in which Thomas received the intelligence communicated by his fellow apostles of the resurrection of our Lord from the dead, has more than once impressed my mind whilst I looked at myself and my own state. I have been led to think, that any hesitation or delay on my part to believe in, and to receive the Lord of life and light, who is striving with me day by day, who is watching, waiting to be gracious, who is knocking at the door of my heart almost every hour, who is calling me, and running after me as a shepherd after his lamb that is gone astray,—is somewhat like the tardy yet deliberate conviction of Thomas, who, overpowered at length by the abundant evidence which the Lord was pleased to shower upon him, was unable, in the fulness of his heart, to say more than “My Lord and my God.” O! I do, indeed, desire, not only to be firmly convinced of what is right, but to be willing to

sacrifice every thing to the performance of the same, with courage, resolution and constancy.

1816, *June 13th*.—O! Lord, make me still more and more entirely devoted and dedicated, given up and surrendered unto thee; teach me, I pray thee, still more perfectly, the way that I should walk in, each step that I should every moment take whilst here; that so through thy boundless mercy I may be safe on every hand from every thing evil. O Lord! if it so please thee, I implore thee to take from me all vain confidence in myself or others,—all my own strength and wisdom; and impress upon my soul an earnest sense of my own nothingness and helplessness, that so through the low vestibule of true humility, I may be enabled to enter thy glorious temple, and therein to offer acceptable sacrifice and praise unto thee.

1816, *June 14th*.—Upon very deep and solid consideration, I am induced to think that no outward change is yet required of me, as to dress and address; but this I have been led to believe is called for at my hand immediately, and has been for some time, namely, a deportment and conversation in all respects consistent with the following texts of Scripture, and proceeding from a deep sense of the importance of them: "Watch and be sober;"—"Watch and pray, that ye enter not into temptation;"—"Be thou in the fear of the Lord all the day long." If we do not, in this manner, take up our daily cross, and follow Him, the Lord of life and glory, how little are we taking heed to that direction given, "Cleanse first the inside of the cup and platter, that the outside may be clean also."

1816, *June 28th*.—On considering the subject of the business proposed to me to enter upon, (that of a Solicitor's,) I can acknowledge that I would this day sign the articles of clerkship, if I thought it right to do so; but I feel too much given up and dedicated in heart and mind to Him who has, all my life long, blessed and helped me, for me to undertake this proposed occupation; and, therefore, I do trust that, though my relations may not approve the decision, they will respect the motives. It is, and has been, day and night, my most ardent desire to acquaint myself thoroughly, in spite of every obstacle, with the will of the Lord concerning me; and I may safely and sincerely add, that there is and has been no fear, no grief, no joy, so impressed on my soul, as the fear of not doing, the grief at not having done, and the joy at having done, what I know or believe to be right.

1816, *July 6th*.—Upon considering the Lord's extraordinary goodness to my soul, and how he has blessed me more and more, increasing my inward prosperity almost every day, and especially of late in a remarkable manner, so that, though outwardly much occupied, my thoughts

have been almost constantly raised and directed to Him in prayer or praise; upon these considerations my soul has been humbled at this time under the belief that the Lord's hand is in an awful manner upon me, to mould me as it seems good to Him; the feelings of this makes me fear and tremble before Him.

1816, *July 10th*.—The longer I am surrounded by the vanity and vice of this dissolute city, (London,) the more is my mind vexed with the daily witnessing of such things; the less, also, do I get reconciled to the perverted and depraved conduct and conversation which abound so deplorably in this place. O! what a holy and diligent watch should we maintain, who are placed in the midst of this vortex—this sink of filth and iniquity. O! Lord, thou alone canst make and keep clean our garments, —thou, only, canst preserve in us a clean heart, and renew a right spirit within us.

1816, *July 25th*.—The customs, fashions, vanities and ways of the world, have very often come under my serious consideration. I have been, I may, indeed, say, oppressed with a sense of the mass of folly (which is sin,) prevalent among the children of men. I believe the evil effects of these things are but little calculated by many reflecting minds; and that few look upon them in that serious light in which they deserve to be regarded, or esteem them worthy of reformation. It is in consequence of this lamentable remissness and weakness on the part of those who should stand up in resolute opposition, that the torrent becomes stronger and stronger, and the resistance of the few less and less effectual. Under this impression, my soul has oftentimes mourned; and my distress has been much excited of late, whilst walking in the streets of this great city, many of whose inhabitants seem bound in fetters, and enslaved by the caprice of pride, luxury and vanity. How frequent and fervent have been my desires, that the little band of those who professedly bear testimony against the fruits and effects of these evils, wherever and in whatsoever degree they appear, might be strengthened by a diligent recurrence to that principle which teaches a denial of self and a renouncing of the world with the lusts and vanities thereof,—still to hold out against the enemy.

(To be continued.)

CHOICE OF COMPANIONS.

It is highly important to young persons to be careful in the choice of friends and companions. This choice is too frequently made without thought, or is determined by some casual connections; and yet, very often, the whole of their future life may be influenced by it. The circumstances which chiefly attract the liking and the friendship of youth are vivacity, good humor, an engaging manner, and a cheerful

and easy temper; qualities amiable in themselves, and useful and valuable in their places. But these are not all the qualities requisite to form an intimate companion or friend; something more is still to be looked for: a sound understanding, a steady mind, a firm attachment to good principles, to virtue and honor.

LETTERS FROM SARAH (LYNES) GRUBB.

WITNEY, Tenth mo. 17, 1822.

The present system in this country seems to be to give the youth amongst us all the learning their brain can possibly be exercised in, and all the polish that would render them fit companions for the great people of the world; but I think that even with respect to these things, we should let our moderation appear unto all men; nor do I see that there is much prospect, in the general, of the attention of young persons being so turned to the Divine principle in themselves, as to make it very likely for us as a Society to have those valiants and ornaments produced, which I believe to be consistent with the will of Him who first gathered us to be a people. I wish dear Ireland may yet be favored with the native simplicity and purity of the Gospel, which prepares for the reception of the holy anointing, the pouring forth of the Spirit to the exaltation of the great name, and the edification of the Church. There are very many among you largely gifted by nature, who, if they did but fully yield to Divine grace, would be eminent in that cause which is "dignified with immortality, and crowned with eternal life." After my return home, I was many weeks very weakly indeed; my strength seemed nearly exhausted, yet, not feeling clear of some places about London, and being sensible of an enlargement of prospect to these parts, we could not see the way to resign our certificates, but, in the faith, requested more liberty of the Monthly Meeting; so when way clearly opened, we left our dear children once more; committing them to the gracious care of Israel's Shepherd. As usual, we sat down together to wait upon the Lord just before separating: it was a precious time, so that, although our dear children had anticipated an absence very painfully, I believe they gave us up freely to the service of Him, whom they felt to be goodness itself.

I may now tell thee that we have had many meetings on this journey with those not professing with us, as well as with Friends; they have mostly been, in the end, seasons of some considerable relief: I think the real state of things has been come at and spoken to, in the blessed authority of the unchangeable truth. Those meetings which we have held with a mixed company have generally, if not always, been very crowded, and yet so still, that except by sight, one would hardly have known that

many persons were present. In nearly all these opportunities, the living power has come into glorious dominion, after all the baptisms and strippings attendant on such engagements; for I think, from time to time, my spirit is brought into a deep sense of my own nothingness, even in a peculiar manner; and that frequently before meeting breaks up my heart is made glad that the Lord alone is exalted. What a solemn sense of his goodness is mostly afforded, in awful silence, toward the latter end of a meeting crowded with people sitting and standing! The bodily feelings are lost in a sense of the Divine influence. For ever magnified and praised be Israel's God. He is more and more bringing the people to the experience of true spiritual worship, even in the silence of all flesh. Whether we, as a Society, will become more spiritually minded or not, I cannot say, but God will be glorified, and truth and its testimonies exalted in the earth, even until all nations shall flow unto the mountain of His holiness, which is set on the top of the mountains and above all the hills. The dead forms and empty professions, whether among us or others, must yield to the living substance and the eternal power; but I fear that many under our name will wither more and more, and be taken away, so great is the oppression of the life, and so dry are many meetings, as to their general condition; so that I am often ready to say, Oh! where is the living sap from the living root?

I hope the poor people in Ireland are much relieved by the late exertions and great munificence of many in this country, and I believe that kind Providence designs to open the eyes of those, in many instances, who have been in darkness, yea, whom gross darkness has covered. Somehow I cannot but look forward for Ireland with hope of blessed days, through the influence of the Gospel of light and life, and my very soul says Amen. We have on this journey lodged at the house of two aged Friends, — Wm. Atkins and wife, who knew me when travelling this way four and twenty years ago. The age of W. A. is 85, and that of his wife 88: their faculties are clear. They were delighted to see me again, and were both at meeting with us. The state of mind in which they are is truly desirable. We took a solemn and I expect a final leave in this mutable state. It is encouraging to see these Christian travellers so far safe on their passage to a glorious eternity, for they seem to have weathered many storms, and to have cast anchor in the haven, waiting for a joyful landing on the blissful shore.

To Mary Davis.

KONNINGTON, Fourth mo. 12, 1822.

The Lord's little ones are sometimes conficted; even such who have none in heaven but Him, nor in all the earth beside Him; who

really possess every blessing with reference to the Giver of all good.

Now if those who choose the Lord for their portion and the God of Jacob for the lot of their inheritance have their faith thus tried, surely it is only that they may experience the trial of it to be more precious than that of gold which perisheth, and so endure to the end. Many times I have a hope thou hast been sensible of our real fellowship with each other, when I seemed as if I could not convey it in words: indeed I am much of the mind, that those who are mercifully preserved in the blessed oneness of the disciples of Christ, are truly helpful to each other in their varied exercises, even without outward demonstration of it, and when far separated in person; so, then, if we are but of the *living* stones, we shall be fitly joined and compacted together, growing into a holy temple in the Lord, and He will walk in us, and dwell in us; we shall be his people, and He will be our God. Is not this enough, let it cost us what it will of suffering to bring us into such a desirable state? Since I wrote to thee, my endeared sister, many, very many, have been my tossings, even as on the mighty billows; but I humbly trust some of these painful dispensations have tended more and more to reduce the will of the creature, and bring into a childlike dependence upon my heavenly Father. For a considerable time I lay "as among the pots" during this last winter; but I thought may be the Lord would raise me up in his own time, if it was my endeavor to wait upon Him for preservation, that I might be kept chaste in my love to Him, who had been to my soul the chief of ten thousand; and so He did, blessed be His Name! For I distinctly heard his voice again, and felt His power, giving me to ascend with the "wings of a dove," which are indeed "silver, and her feathers of yellow gold," even of that which had been tried in the fire. So it is good not to cast away our confidence, when we may seem to ourselves to be as a broken vessel.

IRRITABILITY OF ILLNESS.

Those who are blessed with health can never know, till they are in turn called upon to suffer, what heroic strength of spirit lies hidden under the mask of silent, uncomplaining suffering; how strong the temptations are to be unreasonable, pettish, or repining; how difficult it is to be grateful, and still more to be amiable, when the irritation of every nerve renders the most skilful attendance irksome, and the dearest presence a burden; when the irritated frame loathes the sunshine of a smile, and dreads the tear and the cloud, where all is pain, and weariness, and bitterness! Let the healthy lay these things ever to heart, and while they scrupulously perform their duty—while they reverence the fortitude and patience of the gentle and re-

signed, let them have pity upon many a poor and querulous sufferer; upon their side, let the sick not forget that the reverence and love thus excited are as the elixir of life to their often wearied and over-taxed attendants; quickening them to exertion by the sweetest of influences, instead of exhausting them with the struggle to perform an ungrateful duty.

LITTLE BY LITTLE.

We are not made ourselves by great events, nor do we make others by separate events and determinations. It was the glory and beauty of the great and good Dr. Arnold, of Rugby, that, whether he bathed with his scholars at evening, or walked with them at noonday, or preached to them on Sunday, they felt at all seasons the gentle influence of a good and true Christian man. There was no *trying* to be a power. He let his *life* work speak, and the result is known. "Little by little" is the law of nature's influence. It is the motto of the dew, the lesson of the light,—and in the manifold quickenings of the spring, and the glorious unfoldings of the summer, you cannot watch the steps of progress,—it is "here a little and there a little." Thus we influence others, and are influenced by them. So the son becomes like his father, and the schoolboy like his classmate, and the daughter like her mother. Seek for some great thing to do—and where will you discover it? Set to work at a great reading, a great visiting, a great writing,—and what have you achieved? Yet try silent and steady working, and then how vast the achievement!

When the good Samaritan gave his loving help to the man who had fallen among thieves, he evidently obeyed only the law of his nature, and did that which he was accustomed to do. It was a little act, an unobtrusive deed, done in a quiet way; consequently the record of his deed has moulded the lives of many more. Just a word here and a word there, a visit here and a visit there, a little kind deed here and another there, and you are a missionary of Christ, a friend of the sorrowful, a helper of the needy.

Alas! how we all seek for some great thing to do, forgetful of the fact that an earnest and holy life acts like quiet sunlight and gentle air, and that in living near to God ourselves, every thing in our life has been a telling quantity, though we may not see it so to be. No Christian man would be, or could be, what he is, without these little meditations, prayers, submissions, and self-conquests which have been all blended together in the formation of his Christian life.—*The Quiver.*

Not a few seek to accommodate truth to their views and feelings; it is wiser to accommodate our views and feelings to truth!

WAR AND PEACE.
BY MARY G. WARE.

The elements are perpetually at strife. Winds and waves; electricity and magnetism; earth shaken by internal convulsion, or disintegrated by the action of air and water; chemical and mechanical power acting upon both the mineral and vegetable world,—all are working to destroy present forms, as if creation were for no other end than destruction.

The animal world offers a similar picture. From the minutest insect discovered by the microscope, to the hugest of beasts and fishes, all are at war, offensively or defensively; all are either devouring or devoured.

Man again repeats the same story. Whether savage or civilized, ever the strong is striving to destroy the weak, ever the fierce is tyrannizing over the timid.

Side by side with all this destruction, the peaceful power of creation goes on as constantly, reconstructing, re-organizing, revivifying the world; silently but steadily working with a power strong enough to overrule destruction, and bring a new order, better than that which went before, out of what seemed the defeat of all system or plan.

The changes of day and night, and of the seasons of the year, offer a very perfect type of the greater cycles of the world. To him who should first see the setting sun, knowing nothing of the certainty of its re-appearance, how fearful would be the coming-down of the evening darkness! how terrible the weary hours of night! And winter, coming like an overpowering army and conquering the face of the earth, to one who had never seen its progress and its passing away, would seem like the veritable death of the world. In due time, darkness yields to light; and the cold of winter yields to the peaceful warmth of spring-time, and is more than conquered by the creative heat of summer.

So order came out from chaos; so creation ever follows destruction; so life wakes up from death; so beauty rises out from ashes, and mourning is exchanged for the oil of joy.

The order of nature is found in all things to be progress through alternations of defeat and success. There is no such thing as steady, prosperous growth. All things have their intervals of pause, decline, or even retrograde movement, however successful they may be finally. Final success to all things that should prevail is certain as day is sure to follow night, or summer to take the place of winter.

In our haste, we are often tempted to think that Providence is not on the side of right; that injustice is more powerful than justice, vice than virtue; and that the progress of the world is downward to final destruction. Yet an enlightened view of any prolonged, historic period

shows us, that, as centuries have rolled by, mankind have made great advances in rightful development, though their feet have often staggered in carnage, and their eyes been blinded by what seemed blackest night of falsehood.

The peace-giving, creative power is stronger than the contentious, destructive power. The love of God is omnipotent, and must finally prevail. Slowly but surely, order and harmony, and peace march onward with silent tread, subduing all things to his gracious purposes. The doubter asks: Why this slowness, if the power of peace be omnipotent? Because man is endowed with free will, and the Divine Wisdom seeks to draw him to goodness, without infringing upon his liberty. The Creator might have endowed man with all good attributes, so that he should be faithful to them as animals are, to their instincts; but then man would have been only a higher animal, whereas, the Creator desired him to be a voluntary human being, free to choose between good and evil.

The world in which he is placed, imperfect as himself, yet full of capacities whereby it may approach perfection, is designed to instruct him by types and figures as to what he is, and to what he may attain. * * * *

In the heart of each one of us, there is a household corresponding to that which is about us in the external world. The ruling intellectual principle within us corresponds to our father; and the ruling affection, to our mother. Below these are subordinate principles and affections, which are as brothers and sisters to us; and, again, there are other principles and affections developed in our minds, which are as sons and daughters. All these must be regenerated before we can come into a state of peace. The being born again is not a thing of generalities, but of particulars and of details. All the principles and affections must be changed from natural to spiritual, from earthly to heavenly, before we can form a peaceful household.

It is no easy or peaceful task to bring all the members of this household into subjection to the laws of truth and goodness. There will be wars, and rumors of war, so long as pride, ambition, worldliness, vanity, envy, discontent, anger, censoriousness, and all the other hydra-like heads of our unregenerate nature, with more or less strength and endurance, assert their claims for indulgence. The catalogue of vices looks very ugly, and we are fain to believe that it does not belong to us; but who among us is without sin? Whose heart has no secret evils, hidden though they may be from others by prudence, good breeding, or other masks, that our desire for the good opinion of our neighbors helps us to put on? Not until we can abstain from all wrong, whether of deed, or word, or thought, because we love the Lord and

our neighbor, is our warfare over, and our peace attained.

There are two kinds of peace,—the peace which belongs to this world, and the peace which belongs to heaven. The Lord says, "Peace I leave with you, my peace I give unto you; not as the world giveth give I unto you." Again he says, "If ye were of the world, the world would love his own; but because ye are not of the world, but I have chosen you out of the world, therefore, the world hateth you."

There is a peace felt by those who love the world, and whom the world loves in return, that is very agreeable to the natural mind, and which often seems like genuine, heavenly peace. It is full of self-complacency and satisfaction. With some, it is condescending and benevolent; with others, it is ostentatious and patronizing. This is the peace which incites the prayer, "I thank thee that I am not as other men." In this peace there is nothing that tends in any way towards spiritual growth or life; but, on the contrary, it belongs entirely to this world, and seeks only what this world can give. It glories only in its own possessions and attainments, its own kingdom and power, without giving any glory to Him from whom cometh every good and perfect gift. It values others in proportion as they minister in some way to its own dignity or pleasure; and, if it ministers to others, it is always with a desire, more or less hidden, that they, in turn, may minister to it.

Such peace makes the possessor dearly love life in this world; and many of this class would be willing to live here indefinitely, or to repeat life over again just as it has been already lived by them. There is, in this peace, nothing that looks toward a future life. It is all centred in the enjoyment of that which now is.

The world admires, and sometimes dearly loves, these peaceful persons; for they spend their lives in seeking the admiration and the love of the world. Verily, they receive their reward.

The peace given by the Lord to his disciples is something entirely apart from all this. His kingdom is not of this world, and his followers look constantly through this world to that which lies beyond. They seek a heavenly country while living, and through living in this. The admiration of the world gives them no satisfaction, unless their own hearts tell them that their Master says, "Well done, good and faithful servants!" Then they feel that they can enter into the joy of their Lord. Their peace is the only true liberty; for, through it, they are made independent of the world and of their own passions.

It can be found only through self-denial, tribulation and warfare; but, for this treasure, we may rejoice to sell all that we have beside;

no matter how much the world may admire it, or admire us for holding it in possession.

Nations, like individuals, go through all these states of contention and warfare in the progressive growth of the ages; and they have their states of worldly peace, also, between their periods of warfare. National peace and prosperity do not necessarily imply a state of national health; for they may have, as in the individual, only pride and worldliness for their foundation. Immense wealth and progress in the arts, that tend to make life convenient and elegant, often precede great national calamity.

Nations, no less than individuals, must learn their lessons of humility through disappointment, fear and tribulation. National success induces pride and arrogance, a love of conquest and the desire of rule. These passions make nation rise up against nation, and have induced all the wars that have desolated the earth.

Nations commit great crimes, and fancy that their strength insures them from punishment; but a day of reckoning is sure to come, though it may be long delayed.

Our heavenly Father is very patient. He waits as if wishing to offer every possible opportunity for the sinner to repent and reform; but at length the punishment comes as a natural result and consequence of the sin, and the might that knows no right but its own selfish will is humbled at the feet of its victim.

Civil wars have always been more obstinate and malignant than wars carried on by different nations, as family quarrels are most difficult to reconcile; and contentions waged within our own hearts are those that cause us the keenest anguish. Where we feel as though we had most right to expect friendliness and peace, we are most deeply and angrily disappointed if our expectations are not satisfied.

While there is that left in the minds of men which leads them individually to injustice and tyranny, war will never cease from the earth. The human race can never come under the rule of the Prince of peace, until each individual submits himself to the law of love, and is at peace in his own household. It is in vain that peace societies labor to prevent war by appeals to kings and governments, while the hearts of the people are full of selfishness, and of desire to possess that which belongs to others.

The only mode by which peace societies can advance their cause is by raising the morality of the people. Two nations wishing to be just can never go to war; and civil wars are impossible among a people that have justice in their hearts. Each one of us can convert his own soul to the gospel of peace; and, having done this, his life will be the best sermon he can preach to persuade others to believe the same gospel.

In the struggles that we carry on in our own hearts, we cannot conquer our enemies, and come into a state of peace with ourselves, until we become humble and willing to give up that which is wrong within us, and to yield to that which is right. Sometimes, after severe internal struggle, we make a false peace with ourselves by covering over and hiding our sins, so that the world cannot see them; and, compromising with what we know to be wrong, we hold fast the sin as firmly as before, perhaps in a modified form, but still in reality the same.

So nations often make false peace with each other, resorting to subterfuges and compromises, in order to escape the miseries of war; but still holding fast to evil in such wise, that the spirit of war, if not war itself, is sure to rise again out of the dregs of the old trouble.

In the civil war now going on in our own country, we shall probably abolish the sin of slavery which has occasioned it; but, unless we abolish, also, the spirit of hatred and contempt for the negro, which makes us unwilling to give him the rights of a citizen, our work will be but half done.

The North has joined hands with the South in prolonging this terrible wrong; and a large portion of the North shows the spirit of the slaveholder in the efforts it makes to prevent the immigration of the negro, or to avoid giving him the rights of a man if he is allowed to come within its borders. We can never expiate our sin against the slave until we do what lies within our power to make him a competent citizen of a free country.

We cannot suppose that society can ever exist without the distinction of rich and poor, and it is difficult to imagine a society in which the rich and the poor will not have many points of antagonism; but, the more Christianized any society becomes, the less of this antagonism there will be. If a society could be formed on earth of individuals who were true Christians, each at peace in the household of his own heart, then all antagonism between rich and poor, high and low, wise and simple, would cease; then would be seen that which has never yet been on earth,—a nation at peace with itself. Could the earth be peopled by nations such as these, war would cease, and the Prince of peace would reign supreme.

We have little reason to suppose that such a state of the world can ever exist; but this should be the model kept within our hearts by which to form our own characters.

If we lower our standard of excellence to what we think we can actually attain, there is danger, that, when we have attained it, we shall stop, contented with what we have done. If, on the other hand, we aim at the highest excellence we can conceive; so fast as we approach it, our mental horizon will widen, and open out

regions still beyond, leading us onward in a progress that will never end.

FRIENDS' INTELLIGENCER.

PHILADELPHIA, TENTH MONTH 6, 1866.

We give place, with pleasure, to the appeal which follows.

We have visited the Home, and were gratified to observe the comfortable appearance of the inmates. They are all women who have struggled hard through life, and by honest industry maintained themselves respectably, until age and infirmities no longer permitted them to do so.

We hope the efforts of the Managers to increase the funds of the Institution, and thus extend the benefits of this excellent charity, may be attended with success.

APPEAL.

The success which has attended the business efforts of Friends and others it is hoped will prompt a liberal response at this time to an appeal on behalf of the Home for Aged and Infirm Colored Persons, 340 South Front St.

Honest poverty naturally shrinks from a home in the almshouse, where it will necessarily have to mingle with those whose previous course of life may not have been commendable; and if we place ourselves in the like condition, we can appreciate the need of an Institution for the honest, industrious poor.

The Home is now full, whilst many applicants are anxious for admittance. An opportunity to purchase a more commodious house is now presented, and the Managers desire to raise funds to do so and maintain the Institution. Such a purchase would give increased room for the Women's Department, and allow of the organization of one for aged colored men, which want of room and means has hitherto prevented. Contributions thankfully received by the Treasurer, Samuel R. Shipley, 111 S. Fourth St.; Dillwyn Parrish, President, 1017 Cherry St.; Stephen Smith, Vice President, 1021 Lombard St.; M. Balderston, Secretary, 902 Spring Garden St.; Priscilla H. Henszey, 509 Green St., Chairman of Committee of Management.

MARRIED, on Fifth-day evening, 20th of Ninth month, 1866, under the care of the Monthly Meeting of Friends of Philadelphia, R. CROSBY FAIRLAMB, a member of Chester Monthly Meeting, Pa., and LUCRETIA M., eldest daughter of the late Josiah Bond.

—, on Fourth-day evening, the 26th of Ninth month, 1866, under the care of the same Monthly Meeting of which the parties are both members, JOHN C. HANCOCK to CAROLINE D., eldest daughter of Joseph B. and Sarah B. Conrow.

DIED, on the 13th of Eighth month, 1866, after a protracted illness, borne with truly Christian fortitude, HANNAH W. ASKEW, relict of the late Peter Askew, of Cecil Co., Md., in the 73d year of her age.

—, on the 23d of Ninth month, 1866, in Philadelphia, FERRIS PRICE, in the 82d year of his age.

—, on Third-day, the 25th of Ninth month, 1866, WILLIAM P., son of Isaac T. and Sarah P. Bedford, in the 29th year of his age.

HOMELESS BOYS OF LONDON.

We find in the *Christian Work* an account of a meeting of some two hundred of these boys in "St. Giles's Refuge for Destitute Boys," London, where a supper was given to them. The object of the meeting was more particularly to gain information as to their modes of life, and to devise methods of reclaiming them from their vicious habits. Their ages varied from twelve to sixteen years, and they were collected from the various workhouses of London. There were about one hundred visitors present. Conspicuous among these, both from rank and stature, was the Earl of Shaftesbury, who made a speech to them, eliciting by his good humor and conversational power much of interest from their history and general character. Mr. Hanbury, M. P., was also present and addressed the meeting.

"On engaging in conversation with the boys, it was found they were no ways loth to answer any questions that might be put. Their replies presented but little variety—a life of hardship, suffering, and homelessness, being the lot of all. Some had lost either father or mother, and some both parents; some had never known what it was to have enjoyed the benefits of parental rule, their first associations being linked with strangers, and with the workhouse, or with less friendly abodes; and even in those cases where they had parents, it was but too evident from their replies that the word was a misnomer. They were, for the most part, clever, intelligent fellows, whose wits had been sharpened by the daily struggle which they were called upon to wage in the battle of life. The countenances of some were wan and sickly, and their delicate and attenuated frames painfully told how unfit they were to combat with their trying and hapless lot; but in the majority of cases the appearance of rude health, resulting from exposure to atmospheric influences, predominated. Even here, however, a little closer examination made it apparent that, despite the ruddy complexion and the strong build, the seeds of disease had begun to be developed, and that they could not count upon the lengthened days which wou'd seem, in many cases, to have been the heritage of the sturdy beggar of a bygone age. In one particular they had all a great family resemblance—their unkempt appearance. In that assemblage of wild outcasts not a head but was shaggy in the extreme. In some instances

the hair stood erect and tangled in hopeless confusion, imparting to the possessor a weird-like aspect and individuality of expression that would give animation to the canvass itself.

"As for the costume, there was here variety indescribable; but a 'looped and windowed raggedness,' painful to the beholder, might be said to be the garb of all. Attempts had evidently been made in a few cases to brush up the person for appearance sake; but, to use an American phrase, it was 'no go.' No one could look upon that assemblage of wild city Arabs without invoking a blessing on the founders and promoters of ragged schools and of homes for the destitute. They were truly, without exception, of the class which Dr. Chalmers, on one occasion, expressively denominated 'tatter-wallops'; and when we are told that the metropolis has ten thousand of such boys roaming its streets, in all the freedom and licentiousness of the worst savagism, the Christian and well wisher of his country and race will at once perceive the necessity of vigorous steps being adopted in some way to provide for and, if possible, reclaim them. Another topic of inquiry of the boys was where they had slept the previous night; and in only two cases, so far as we could learn, did they state that they had done so at home. Several had passed the night in lofts; others in yards, or under carts; others under the piazzas of Covent Garden Theatre, or under railway arches; one under Blackfriars bridge; another in the shutter box at Drury Lane Theatre, and another in an unfinished sewer. The majority had obtained shelter in the workhouse, and a few in lodgings, for the latter, paying, of course, out of their daily earnings."

THE REFUGE FOR DESTITUTE BOYS.

After the supper, which consisted of half a pound of excellent cold roast beef for each boy, along with an abundant supply of bread, a pint of coffee, and the favorite English dish, plum pudding, speeches were made; Lord Shaftesbury in the chair. Mr. Williams, Secretary of the Boys' Refuge, gave a short account of the St. Giles Institution:

"This Refuge or Home for destitute boys and girls was established in the year 1852. From that period down to the year 1864, 661 boys and 504 girls have been admitted. During that period we have disposed of upwards of 600 boys, having sent them into various parts of the world as emigrants, or placed them in different situations. During the year 1865, we received upwards of 100 boys into this house, and these have to be added to the 100-and-odd boys who were in it at the beginning of the year, making 211 boys who received the benefits of this home during last year. Without going too much into detail, I may just mention that one result of the operations of the Boys'

THE REWARD OF COURTESY.
A TRUE ACCOUNT.

A few years since, on a radiant spring afternoon, two men, who from their conversation appeared to be foreigners, stopped before the gate of one of the large workshops in Philadelphia for the manufacture of locomotive engines. Entering a small office, the older of the two men inquired of the superintendent in attendance if he would permit him to inspect the works.

"You can pass in and look about, if you please," said the Superintendent, vexed apparently in being interrupted in the perusal of his newspaper. He scanned the two strangers more closely. They were respectably but plainly clad, and evidently made no pretensions to official dignity of any kind.

"Is there any one who can show us over the establishment and explain matters to us?" asked Mr. Wolf, the elder of the two strangers.

"You must pick your own way, gentlemen," replied the superintendent; "we are all too busy to attend to every party that comes along. I'll thank you not to interrupt the workmen by asking questions."

It was not so much the matter as the manner of the reply, that was offensive to Mr. Wolf and his companion. It was spoken with a certain official assumption of superiority, mingled with contempt for the visitors, indicating a haughty and selfish temper on the part of the speaker.

"I think we will not trouble you," said Mr. Wolf, bowing, and, taking his companion's arm, they passed out.

"If there is anything I dislike, it is incivility," said Mr. Wolf, when they were in the street. "I do not blame the man for not wishing to show us over his establishment; he is no doubt annoyed and interrupted by many heedless visitors, but he might have dismissed us with courtesy. He might have sent us away better content with a gracious refusal than with an ungracious consent."

"Perhaps," said the other stranger, "we shall be treated better here;" and they stopped before another workshop of a similar kind. They were received by a brisk little man, the head clerk apparently, who, in reply to their request to be shown over the establishment, answered, "O, yes! come with me, gentlemen. This way." So saying he hurried them along the area strewn with iron, brass, broken and rusty heels of iron, fragments of old boilers and cylinders, into the principal workshop.

Here, without stopping to explain any one thing, he led the strangers along with the evident intention of getting rid of them as soon as possible. When they passed where the workmen were riveting the external casing of a boiler, the clerk looked at his watch, tapped his foot against an iron tube and showed other signs of impatience, whereupon Mr. Wolf remarked:

"We will not detain you any longer sir," and with his friend took leave.

"This man is an improvement on the other," said Mr. Wolf, "but all the civility he has is on the surface; it does not come from the heart. We must look farther."

The strangers walked on for nearly half a mile in silence, when one of them pointed to an humble sign, with a picture of a locomotive engine with a train of cars underneath. It overtopped a small building not more than ten feet in height, communicating with a yard and workshop. "Look," said the observer, "here is a machinist whose name is not on our list."

"Probably it was thought too small a concern for our purpose," said his companion.

"Nevertheless, let us try," said Mr. Wolf.

They entered and found at the desk a middle-aged man, whose somewhat grimy aspect and apron around his waist, showed that he divided his labors between the workshop and counting room.

"We want to look over your works, if you have no objection," said Mr. Wolf.

"It will give me great pleasure to show you all that is to be seen," said the mechanic with a pleased alacrity, ringing a bell, telling the boy who entered to take charge of the office.

He then led the way, and explained to the strangers the whole process of constructing a locomotive engine. He showed them how the various parts of the machinery were manufactured and patiently answered all their questions. He told them of an improved mode of tabing boilers, by which the power of generating steam was increased, and showed with what care he provided for security from bursting.

Two hours passed rapidly away. The strangers were delighted with the intelligence displayed by the mechanic, and with his frank, attentive and unsuspicious manners.

"Here is a man who loves his profession so well, that he takes pleasure in explaining its mysteries to all who can understand them," said Mr. Wolf.

"I am afraid that we have given you a great deal of trouble," said the other stranger.

"Indeed, gentlemen, I have enjoyed your visit," said the mechanic, "and I shall be glad to see you again."

"Perhaps you may" said Mr. Wolf, and the strangers departed.

Five months afterwards, as the mechanic, whose means were quite limited, sat in his office meditating how hard it was to get business by the side of such large establishments as were his competitors, the two strangers entered. He gave them a hearty welcome, handed chairs, and all sat down.

"We come," said Mr. Wolf, "with a proposition to you from the Emperor of Russia, to visit St. Petersburg."

"From the Emperor? Impossible!"

"Here are your credentials."

"But, gentlemen," said the now agitated mechanic, "what does this mean? How have I earned such an honor?"

"Simply by your straightforward courtesy and frankness, combined with professional intelligence," said Mr. Wolf. "Because we were strangers you did not think it necessary to treat us with coldness or distrust. You saw that we were already interested in acquainting ourselves with your works, and you did not ask us, before extending to us your civilities, what letters of introduction we brought. You measured us by the spirit we showed, and not by the dignities we might have exhibited."

The mechanic visited St. Petersburg, and soon afterwards removed his whole establishment there. He had imperial orders there for as many locomotive engines as he could construct. He has lately returned to his own country, and is still receiving large returns from his Russian workshop. And all this prosperity grew out of his unselfish civility to two strangers, one of whom was the secret agent of the Czar of Russia.—*Exchange Paper.*

WAVES.

It is not a little remarkable that an element like water, one of the prime principles of which is that it always tends to seek a level, should be so liable to agitation, and that, when in large masses, it should in reality so seldom be at rest. But its very fluidity, which is the cause of its tendency to a state of quietude, is also the reason for its almost constant agitation. It requires but a breath of air to disturb its placidity with ripples, and the increase of the breeze, especially where there is a large area, rolls it up in waves, until the surface of the sea becomes alternate hills and valleys. One might suppose that the wind would pass smoothly over the face of the waters without exciting any great commotion, the contrast in the density of the two elements being so great; but it requires only a few moments for a strong wind to lash the ocean into fury, and to cause its waves to rise, as the phrase goes, mountain-high. This expression, however, is mere hyperbole. The actual height of waves is far below the ordinary estimate. Easily as the surface of water is disturbed by the wind, and raised into waves, it appears that there is a certain height beyond which it is not liable to be raised by any ordinary gales. This height is seldom, if ever more than ten feet, which, with the corresponding depression between the waves, would make the elevation above the trough of the sea twenty feet. Most persons who have been at sea in a storm, and who have carefully watched the approach of the mighty swells, which, as they are coming on, threaten to overwhelm even the largest vessel,

would be ready to assert that they have seen waves at least fifty or sixty feet in height; but all above twenty, or at the utmost, twenty five feet, is in the imagination. Of course, no accurate measurement of the waves can be made at sea, but an approximation to gauging them has often been reached, and under the most favorable circumstances, with the above result. Where a wave strikes an opposing object, as upon a bold shore, or against a rock or light-house, the water is dashed up to a far greater height. But twenty feet may be set down as the height of the loftiest mountain-wave that is seen at sea, the assertions of young and old voyagers to the contrary notwithstanding.

The velocity of waves is a far more curious and interesting subject of investigation. Of course, it is understood by all who have any acquaintance with the matter, that the water itself does not move forward with the wave, even when it attains the greatest velocity.

Only the form of the wave advances, the wave itself seeming to have a separate existence from the water, and holding on its course with tremendous speed and power, while the particles of water and the entire mass of the fluid simply rise and sink, being made the sport of one wave after another, as the succession comes on. When waves come in from the deep sea, and strike upon a shoal, or upon a shelving shore, they then make progress, not by the force of the wind, but only on the principle of the water seeking its own level. The velocity of the waves is in proportion to their magnitude, the largest proceeding at double the rate of the fleetest steamships, or about forty miles an hour. Those who are familiar with the sea have often, when running before the wind, watched their progress, seeing one after another, with regular intervals, sweeping by, and leaving the ship far behind.

The power of the waves is tremendous, and this force is almost a mystery, when we bear in mind the fact just stated, that it is only the form and not the substance which moves. Those who have felt the successive blows of these mighty trip-hammers against the sides or bows of a ship, when the ocean has been violently agitated, can scarcely believe that the entire mass of water has not been hurled with immense velocity against the vessel. And when these waves come rolling in upon a shallow bank, their force is greatly increased, so that the bulwarks must be strong indeed that can withstand their shocks.—*New York Journal of Commerce.*

Society would gain much were its members to restrict themselves to the expression only of their most cheerful feelings, digesting their evil moods in silence, just as some engines are made to consume their own smoke.

THE NATURAL MATHEMATICIAN.

In *Homes without Hands*, an elegant volume in the department of natural history, by J. G. Wood, recently published by the Harpers, the following facts are stated as showing that the hive-bee is the most accurate of mathematicians:

Many years ago, Miraldi being struck with the fact that the lozenge-shaped plates—of the honey-comb—always had the same angles, took the trouble to measure them, and found that in each lozenge the large angles measured 109 degrees, 28 minutes, and the smaller 70 degrees, 32 seconds—the two together making 180 degrees—the equivalent of two right angles. He also noted the fact that the apex of the three-sided cup was formed by the union of three of the great angles.

Some time after, Reaumur, thinking that this remarkable uniformity of angle might have some connection with the wonderful economy of space which is observable in the bee-comb, hit upon a very ingenious plan. Without mentioning his reasons for the question, he asked Kœnig, the mathematician, to make the following calculation: Given a hexagonal vessel, terminated by three lozenge shaped plates, what are the angles which would give the greatest amount of space with the least amount of material?

Kœnig made his calculations almost agreeing with Miraldi, and Reaumur concluded that the bee had very nearly solved the difficult mathematical problem.

Mathematicians were delighted with the result, and for a long time the calculations were not questioned. However, Maclurin, the well-known Scotch mathematician, was not satisfied with even so slight a difference between the two mathematicians. He wanted precision, tried the whole question himself, and found Miraldi's measurement correct.

Another question now arose: How did this discrepancy occur? How could so excellent a mathematician as Kœnig make so grave a mistake? On investigation it was found no blame was attached to Kœnig, but that the error lay in the book of logarithms which he used. Thus a mistake in a mathematical work was accidentally discovered by measuring the angles of a bee-cell—a mistake sufficiently great to have caused the loss of a ship whose captain happened to use a copy of the same logarithmic tables for calculating his longitude.—*Methodist*.

THE SKY AN INDICATOR OF THE WEATHER.

The color of the sky, at particular times, affords wonderfully good guidance. Not only does a rosy sunset presage good weather, and a ruddy sunrise bad weather, but there are other tints which speak with equal clearness and accuracy. A bright yellow sky, in the evening,

indicates wind; a pale yellow, wet; a neutral gray color constitutes a favorable sign in the evening, and an unfavorable one in the morning. The clouds are again full of meaning in themselves. If their forms are soft, undefined, and full feathery, the weather will be fine; if their edges are hard, sharp and definite, it will be foul. Generally speaking, any deep, unusual hues betoken wind or rain; while the more quiet and delicate tints bespeak fair weather. These are simple maxims, and yet not so simple but that the British Board of Trade has thought fit to publish them for the use of seafaring men.—*Scientific American*.

From the *Scientific American*.

THE SANDWICH ISLANDS.

Among the foreign countries engaged in commerce with our northwest Pacific States, there is none that is establishing with them more intimate commercial relations than the Sandwich Islands, which are located in the North Pacific, in latitude 20°, about 2,100 miles southwest from San Francisco, and directly in the track of vessels bound from that port to China. The prospect of a speedy establishment of a line of monthly steamers across the Pacific, under the contract to perform the American Mail service between California and China, touching at Honolulu and Japan, both in going and returning, gives increased interest to the agricultural progress of the group. Postmaster General Dennison has officially invited tenders for the performance of this important mail service; and as it is understood that parties are ready to place the steamers on the route at once, it is expected the line will be in operation during the next year at the farthest. The establishment of a steam line will reduce the time required to make the passage from San Francisco to Honolulu from fifteen days to eight, and tend to greatly increase the commerce with this group, which is practically an American colony, as a large majority of the foreign population are Americans. We propose, in two or three brief articles, to notice the agricultural progress made there during the past few years, most conspicuous among which has been the cultivation of sugar cane in the Sandwich Islands. It dates back more than twenty-five years; but it was not till after the settlement of California, and the consequent opening of a near and permanent market for sugar on the Pacific coast, that any impetus was given to the business. Since 1850 foreign capital has been slowly becoming interested in cane culture and in the manufacture of sugar and molasses, till now there is no less than twenty-five plantations, valued at over two millions of dollars, and capable of manufacturing twenty millions of pounds of sugar annually, with two hundred thousand gallons of molasses. The sugar mills are generally of the largest

size, well made with all the modern improvements, such as steam clarifiers, centrifugal machines and other late inventions, and are surpassed by no other sugar mills in the world. They have been manufactured mostly in Boston or Scotland, but a large iron foundry is now established in Honolulu which has turned out some very superior mills, though smaller than those imported from the above-named places. A first class plantation has machinery capable of manufacturing a thousand tons of sugar per annum, and several of them, it is thought, will produce that quantity this year. Such a plantation requires about 150 laborers and workmen. The latter are generally mechanics from the United States, England or Germany. The field laborers are wholly natives of the Islands, who, when well managed and treated, are found to be as reliable and efficient as any plantation laborers in other sugar countries. Indeed, some assert that the plantations in the Sandwich Islands are conducted with fewer hands, in proportion to the product, than in other countries. There has been no lack of laborers thus far, and if we may judge from the number of unemployed men living without any regular means of support, it will be some years before any great scarcity is felt. The Island Government has wisely taken measures to provide for any future deficiency that may arise, by making provision for the emigration of Asiatic laborers to the Islands, whenever any are found ready to migrate thither with their families.

The quantity of sugar manufactured in 1864 was about eleven millions of pounds, most of which found a ready market in San Francisco, Oregon and British Columbia. It is estimated that the production for 1865 will be fifteen millions of pounds, and that the annual increase will be about 33 per cent. In quality, the Sandwich Island sugar ranks in the San Francisco market equal to the best New Orleans or Cuba for consumption; and for refining purposes it is far superior to them, on account of its peculiar crystalizing or graining properties; and in this respect it is preferred to the best Manilla or China sugar. The cost of its manufacture in the Sandwich Islands has been estimated at four cents per pound; but on old-established plantations it probably does not exceed three and a half cents—prices which enable the planters to compete successfully with Manilla, India or China.

The climate of the Islands has been found to be peculiarly adapted to the growth of cane, and though the average yield does not exceed two tons of sugar to the acre, yet as high as five or six tons of sugar have been frequently produced from a single acre. There is a large extent of cane land still unoccupied. The island of Hawaii alone, it is estimated, is capable of

producing one hundred millions of pounds of sugar annually. This being so, there is a prospect that this group may, before many years have elapsed, become to the Pacific coast what Cuba now is to the Atlantic States. For its development this business must rely in future as in the past on foreign capital and management; but with a stable government, and with permanent steam communication between its chief ports and our Pacific States, its progress will be sure and rapid. M. H. W.

EXTEMPORANEOUS SURGERY.

Even young children should be taught how to act in some of the accidents of life which require surgical skill. The arteries of the body carry the life's blood from the heart. If one of these is ruptured from any cause, and the blood is allowed to escape, the man will die in a few minutes sometimes, when with the aid of a stick and a string or handkerchief, either of which are almost always at hand, his life might be saved. If the severed artery is in the leg or arm, and there is no string at hand, tear a strip from any part of the clothing, tie it loose around the limb, pass the stick between the skin and the string, and twist it around until the bleeding ceases. If a vein is wounded or cut, apply the dust from a tea canister or common cobweb; or even without these, wrap a strip of cotton cloth around moderately tight, and then another piece around that; if the bleeding does not cease, let cold water run on the wound until it does, or until a physician arrives. But it is of vital importance to remember that the artery sends out blood by spurts and jets and of a bright red character. If the blood flows from a vein it flows slowly and evenly, and is of a dark red. But these directions will do no good unless it is specially noted that if the blood comes from an artery, the application of the string must be made above the wound, that is, between the wound and the heart; if a vein has been wounded, and the same appliances are needed, they must be made below the wound, or between the wound and the extremities.

If an artery is cut in a part of the body where a string cannot be applied, hard pressure with the thumb at a spot about where the string would have been applied may save life.

If stung or bitten by insect, snake or animal, apply spirits of hartshorn very freely with a soft rag, because it is one of the strongest of alkalies, and familiar to most persons. The substance which causes the so-called poison from bites or stings, is, as far as is ascertained, generally acid. Hence the hartshorn antagonizes it in proportion to the promptitude with which it is applied. If no hartshorn is at hand, pour a cup of hot water on a cup of cooking soda or saleratus, or even the ashes of wood just taken from the fire-place, because these are

all strong alkalis, and hartshorn is only best because it is the strongest. There is no conclusive evidence to induce the belief that burning or cutting out a bite has ever done the slightest good. The proof adduced to show that they have been effectual is wholly of a negative character, and, therefore, not decisive.—*Hall's Journal of Health.*

ITEMS.

The difficulty between Italy and Austria, in regard to the debt of Venetia, is nearly at an end, and it is believed that a compromise will be effected, which will result in a lasting peace.

The damages by the recent heavy rains in Ohio to the Atlantic and Great Western Railway have been repaired, and trains are running as usual.

Much interest has been created by a recent discovery, in the Valley of the Mississippi, near New Orleans, of an immense bed of pure rock salt, almost as transparent as crystal, which lies some thirty feet below the surface. Specimens of the salt have been received by the Smithsonian Institution. The most singular fact in connection with this valuable deposit has been the discovery of the remains of an elephant, twenty feet below the surface of the superincumbent earth, beneath which have been found basket-work, formed of reeds. Photographic representations of this ancient hand-work are in possession of the Institute.—*The Moravian.*

THE FREEDMEN.—The board of trustees for the freedmen's school, formed in Washington City, have succeeded in making good their claim to a proportion of the public school money of the city, amounting to \$35,000 or \$40,000 per annum. They have also the prospect of recovering a similar proportion from the city government, due the board, which has been withheld for a number of years, and appropriated to the white schools.

The Legislature of South Carolina has passed an act securing to the freedmen the right to make and enforce contracts, to sue and be sued, to give evidence, to inherit, purchase, lease, sell real and personal property, to make bills, enjoy full and equal benefit of personal security, personal liberty, and private property, and of all legal remedies, the same as whites. It further provides for the infliction of the same punishment for the same offences upon whites and blacks alike, and repeals all laws inconsistent herewith, excepting the law declaring marriages between whites and blacks illegal and void.

Gen. Howard has received from the assistant commissioner of the Freedmen's Bureau for the State of Florida a report of the operations of the bureau in that State during the Eighth month. He reports that there is an evident improvement in the treatment of freedmen both by the courts and planters. Ex-army officers, who, since the close of the war, purchased plantations and engaged in the planting business, are reported as doing well.

The prospect of a fine cotton crop is very promising. The cotton worms had appeared, but the bolls were so far matured that but little damage was sustained. In some sections of the State the corn crop is large; in others, small, but generally larger than for years past.

The Savings and Trust Company for Freedmen has now nineteen agencies or branches in thirteen of the States and the District of Columbia.

Aggregate of deposits, Seventh mo. 1, \$616,802 54
Payments (to depositors) 384,795 48

Amount remaining on deposit, \$232,007 06

A dividend of five per cent. per annum has just been declared on sums deposited for the past six months.

THE MONT CENIS TUNNEL.—The progress of the work upon the great tunnel through the Alps is announced to be highly satisfactory. It is to be about seven and a half miles long, and very nearly three and a half miles are cut, the engineers estimating that in ten years from now the tunnel will be finished. The present rate of expenditure is about \$1,200,000 a year, and the boring machines, which are now penetrating very hard rock, from both ends of the tunnel, penetrate from two and a half to three feet a day on each side. The hard rocks are obstacles that may be surmounted, but the cholera among the workmen is said to seriously retard the labor.—*Ledger.*

SELECTIONS FROM THE WRITINGS OF JOHN BARCLAY.

(Continued from page 483.)

1816, *August 3d.*—O! that I might be helped this day to do the will of the Lord. O! that I might be strengthened with inward might, patiently yet firmly and constantly to persevere in what is right. Though assaulted daily by the powerful enemy, yet may I be favored with unwearied fortitude to watch and pray, that he may not finally overcome. How liable are we every moment of each day of our lives to fall or falter in our steppings; and how blessed are they who are kept by the power of God through faith unto salvation. My secret constant craving is, that in all things and at all times, I may have such an awe and fear of Him, whom all should fear, as to be preserved from evil; and that thus walking before Him, I may be led into the way of peace.

I remember, when under great exercise long continued on the subject of business, and amidst many thoughts as to getting a livelihood in the world, with my very restrained views every way,—I opened a book in great fluctuation and sore grief of mind, as it lay near me, craving that I might be secretly informed in this way, or in any way with certainty, as to the line of duty prescribed to me by heavenly wisdom; when, to my astonishment, I found immediately to my hand this passage from William Penn's *No Cross No Crown*,—"Whoever thou art that wouldst do the will of God but faintest in thy

desires from the opposition of worldly considerations,—remember, I tell thee in the name of Christ, that he that prefers father or mother, sister or brother, house, &c., to the testimony of the light of Jesus in his own conscience, shall be rejected of Him in the solemn and general inquest upon the world, when all shall be judged, and receive according to the deeds done, not the profession made, in this life. It was the doctrine of Jesus, that 'if thy right hand offend thee, thou must cut it off; and if thy right eye offend thee, thou must pluck it out,' (Matt. v. 29, 30;) that is, if the most dear, the most useful and tender comforts thou enjoyest, stand in thy soul's way, and interrupt thy obedience to the voice of God, and thy conformity to his holy will revealed in thy soul, thou art engaged, under the penalty of damnation, to part with them."—Part I. Chap. i. Sect. 21st. O! here was a revelation, indeed, to me, if ever there was one; for, as surely as there is a secret Divine Power, it was manifested in my soul in the reading of this passage; and it so overcame me in gratitude to the Father of mercies, that my knees were bowed, and my heart was contrited before Him at that favored season, and tears fell in abundance.

There has, indeed, been a wonderful Providence all along about me, too large to be fully set forth in order. When the time for my decision and signing of the articles of clerkship arrived, whereby I was to serve in an attorney's office for five years, with every prospect that a

handsome income would succeed my application to this line of business; and when the draft of the deed was about to be sent to be engrossed, and I was to take it to the law-stationer's for that purpose;—borne down by hidden trials, my earnest fervent petition (in a secret place, where I stepped aside to pour out my soul unto God) was, that if the Lord was my guide and my leader, he would make a way even now, when there appeared none, to get out of the predicament in which I was so closely confined; and speedily that day I was taken ill, and obliged to see a physician, who ordered me to Southampton as soon as I could go, which was accordingly effected in three days. I have cause to remember to this day, how closely the Mighty Helper was about my bed and about my path at that time; so that my tenderness of heart, and my cries and tears in secret, were often remarkably answered, and were felt even to prevail with God. My song also was unto him in the night season; and living praises would ascend, in very small intervals of time, when the soul had a few seconds only to turn to its Comforter. When I returned from Southampton I resumed my station at the desk; but my eye saw clearly that that place was not my lot, though I did not even then think of giving up the profession altogether; but that was also shown me in due season, when I was able to bear it. So that there is, indeed, ground for me yet to trust and not be afraid, as well as for others; seeing that there is One who can make darkness light, and crooked things straight, and hard things easy.

[He finally relinquished the pursuit of the law in the latter end of this year.]

1816, *September*.—What inexhaustible goodness and loving kindness has the Lord in store for those of every age, class and description, who strive to serve him in sincerity! O! He sheds at times his refreshing presence and protection in a remarkable manner round about his poor dependent little ones, showering down upon them the redundant dew of His grace. I have thought, indeed, that the inward consciousness of His approbation attending us is sometimes permitted to be as strong and evident as we could desire. It has been graciously allotted me, during this day or two, to experience such a degree of His favor attending me, and to feel such a measure of His divine blessing shed upon me, that I can scarcely forbear, in this manner, testifying to the continuance of His care for His creatures, even for those who have widely strayed from His flock, and have been long wandering in the wilderness. Yes, O yes!—"His hand is stretched out still;"—praised be His name evermore!

1816, *September 19th*.—Though I wish to be the last to find fault with the innocent and natural sprightliness and liveliness of youth, yet I

cannot but excuse myself from joining in with what is commonly so termed, having often felt thereby unsettled in mind, and indisposed for reflection. I have found that by occasionally relaxing in the discipline of watchfulness, the inclination to laughter, more particularly, gained much ground upon me; and there has been no small difficulty in restraining this habit, when much indulged; so that it strikes me to be a snare. Though religion does not make a man gloomy, yet it never allows him to be off his guard; no, he must "watch and pray, lest he enter into temptation,"—taking up his daily cross to all frivolous and foolish talking and jesting, besides other more evident and open evils.

To W. F.

LONDON, October 10th, 1816.

DEAR FRIEND:—Whilst taking up my pen to address you, I feel very desirous not to incur the sentence denounced in Scripture, against him that "trusted in man, and made flesh his arm, and whose heart departed from the Lord," for there is a disposition to regard the creature more than the Creator, in whom alone is everlasting strength. And yet a saying of the apostles Peter and John, when brought before the Jewish council, has often been comfortably remembered by me, after much unreserved communication with some of my dear friends, and I trust I may safely adopt it as my own on this occasion,—“for we cannot but speak the things which we have both seen and heard.” How shall I then be silent concerning the dealings of Infinite Goodness, or how shall I forbear to testify of Him who “delighteth in mercy;” of whom it is said, and has been experienced by thousands, as well as by myself,—“He will subdue our iniquities, and will cast all our sins into the depths of the sea.” Indeed, I have reason to say thus, and much more; for few suspect the depth of perdition from which I have been rescued. Awfully appropriate was that language twice repeated in the little company I sat with, at our friend's house at S.—“Thou wert as a brand plucked out of the burning.” I earnestly desire that what follows may not equally apply,—“yet hast thou not returned unto me, saith the Lord.” How strongly have I been encouraged, my dear friend, to believe that even in these latter times the same arm of everlasting mercy is still underneath, the same crook of loving kindness is yet conspicuously stretched out to reclaim and to restore. Though I have but little time or space to spare, yet one circumstance attending my former course of life, I may not omit to mention:—I remember, my dear friend, (bear with me if you can,) a season when my wickedness had arrived at such a complicated and aggravated height, as to threaten (to all appearances and all probability) inevitably impending

consequences; and these so encompassed me round on every side, that, though a thorough adept, I totally despaired of escaping that which was likely to follow. At this eventful crisis, when my wretchedness was more than I can describe, and almost more than I could bear, there was a secret but fervent desire raised in my very inmost soul, that if it were possible, I might be delivered from this anguish of mind and dilemma of situation, which were then owned (by me) to have been brought on by my own sinfulness, and much less than was deserved. There was also something like a covenant (on my part) that if I might be thus rescued, no bounds should be placed to the dedication of my future life. The sequel was as striking as the fact itself,—each black cloud of this storm, from that very day forward, rolled gradually away, and, in a surprising manner, withdrew and dissipated. So that in truth I have had, and still have most feelingly to adopt a language as literally and remarkably applicable to myself as it could, perhaps, have been to him that used it,—“He brought me up, also, out of the horrible pit, out of the miry clay;” and I think I may add, it is equally my desire and belief, that the remainder of this passage may and will be as nearly my experience:—“This is the Lord’s doing, and it is marvellous in our eyes.” Yes, my dear friend, “I am as a wonder unto many,” amongst those who knew me little more than three years ago, then living in total forgetfulness, or rather abandonment of Him, who, notwithstanding, did not utterly abandon me, but, as Fenelon says, “who followed me in my ways, which were those of sin; who has run after me, as a shepherd in search of his strayed sheep.” So that I cannot be silent on this subject; but am constrained to acknowledge, that in all my various difficulties, distresses and dangers, the power and presence of One, “who is able to save to the uttermost,” has been with me and around me, bringing about seeming impossibilities, making a way where no way was, and effecting deliverance “with a mighty hand, and with an outstretched arm.”

With respect to that share of affliction which has been handed to me of late, I can truly say, it is my desire that others in their various trials, may be equally enabled with myself to discover and acknowledge in them the hand of Him who “is righteous in all His ways, and holy in all His works.” When privations are permitted to attend, what a consolation, my dear friend, to find a Father of the fatherless; when about to separate from those who have, from childhood, shared the same mixed cup of joy and grief, what a favor to feel that wherever scattered still each of us is near that Fountain to which we may all have access; when a total revolution in our outward condition takes place, when luxury, delicacy, splendor and vanity, together

with all those objects endeared by fond recollection, are to be relinquished, how sweet to know “it is the Lord—let him do what seemeth him good;” and in taking up the cross—the daily cross, denying ourselves, and following our Leader through evil report and good report, through sufferings, conflicts, and probation,—what a blessing will it be if we “are kept by the power of God through faith unto salvation.”

Your sincere friend, J. B.

1816, *October 22d.*—The farther I advance in my course along this valley of mist and obscurity, the more evidently am I permitted to discover—the more frequently am I constrained to admire—the infinite condescension of the Lord. O! how sincerely can I exclaim with the Psalmist, “What is man, that thou art mindful of him, or the son of man that thou visitest him.” Fervent, indeed, have been my desires, and still more and more so, as the visitations of condescending mercy have been renewedly extended—that my whole heart may be prepared for the reception and further manifestations of this great and gracious Guest. O! may there be in my inmost thoughts and imaginations, as well as over my words and outward demeanor, such a constant watchfulness as may evidence a holy awe and fear of giving Him offence, or occasioning a separation between Him and my soul.

O! thou who seest in secret, and to whom my most secret petitions are thoroughly known, and known to ascend even daily and hourly,—be pleased, in thy exceeding great compassion and wonted mercy, to hand me a little help. Grant that I may be made willing to follow thee whithersoever thou leadest, and to become whatsoever thou wouldst have me to be.

(To be continued.)

Hannah More once went into the shop of a carpet-weaver, and as she looked upon the product of his industry, she said that she could not understand the pattern. The loose and tangled threads seemed, to her, confusion instead of beauty. The weaver told her it was going to be one of the loveliest patterns he had ever wrought, at which she wondered greatly, till he added, “Madam, you are looking at the wrong side!” So we are often looking on the wrong side of God’s ways, but faith teaches us to trust Him where we cannot see Him; and in proportion as we do so, will our way open before us, our lips will be filled with songs of gratitude, and we will be able to say with the holy Fletcher, “I am poor in nothing but thanks.”

Read not books alone, but men; and, above all, read thyself.

"REBUILD THE WASTE PLACES."

At this time, when a concern is awakened in many minds for the welfare of our religious Society, it may not be out of place to inquire into the cause of our present condition, and how we shall be enabled to rise again to the truly enviable position occupied by our fathers. It seems to me that God's prophet has plainly set forth the principle cause, in a very few words, when speaking of a highly favored people formerly. They have forsaken the Fountain of living waters, and have hewn out for themselves cisterns that can hold no water. We have been accustomed to consider the rise of the Society of Friends as a revival of primitive Christianity,—that our worthy ancestors were led by the Divine Spirit out of a lifeless, ceremonial religion into a more spiritual worship—and that by faithfulness to the witness for God in their own hearts, they became a prosperous people, compelling their enemies to respect them, and the government under which they lived to grant them religious privileges. Being faithful to the openings of Truth, they were entrusted by the Great Head of the Church with great and important testimonies; and as they were obedient to the simple requiring of the Divine Mind, they were blest with the reward of peace, and an enlargement in the things that belong to the everlasting kingdom. Thus the truly dedicated children of every age have been permitted to ascend round after round of that ladder whose top reaches the highest mansion of the Father's house; thus one duty performed makes way for another, and by faithfulness in the *little* our hands find to do, we become rulers over more. All real advancement in the inner life is the result of individual faithfulness; the outgrowth of the spiritual seed in the soul, and the growth of societies and communities, depends on the progress of individuals. The world was not made in a day. Seed time and harvest must ever remain to be distinct periods, mutually dependent on each other, and every succeeding harvest laden with golden grain must originate with the germinating seed. So our spiritual condition as a religious people will depend altogether on the seed we sow, and the heavenly dews that descend on the tender plants from the exhaustless Source of light and life. No mere human contrivance, no cold, calculating policy, can ever build up the Church of God, nor advance the cause of truth and righteousness in the earth; yet the Christian's watchword is *onward*, for he that puts his hand to the gospel plough and looks back is not fit for the kingdom of heaven. No place is so high above earth and its temptations that the toil-worn pilgrim can with safety take up his rest. The spirit of the Great Eternal ever points upward and onward, and angel voices

from the abode of the ransomed cheer the weary traveller, lest he faint by the way. Since it was the Light of Christ that made us a people, and since, so long as we were faithful, it pleased God to build us up, and give us a place of honor and renown among the people, it follows as certain as effects follow causes, that our decline as a religious people is the legitimate fruit of unfaithfulness, and turning our backs to the Light of Christ, suffering the little seed of the kingdom to be smothered out with the things of the world;" "For if any man love the world, the love of the Father is not in him." We need not be surprised at our almost deserted places of worship, for we have indeed sown to the world and to a formal, lifeless religion these many years. The Scripture prophecy has been verified, and we have accordingly reaped an abundant harvest. May we not rejoice that, notwithstanding our high profession without corresponding fruits, the Great Head of the Church has not wholly forsaken us, but still continue, in his infinite regard, to pour out his spirit upon us in this wilderness state, and still invites his erring children back to the heavenly mansion, where the repentant prodigal will ever find "bread enough and to spare." Hence we may safely conclude that nothing short of the same Divine Power that enabled the faithful and devoted George Fox to gather this people out of the lifeless ceremonial religion of his time can ever restore us again to a healthy condition. The generation that longs for the flesh-pots of Egypt will have, as of old, to leave their carcasses in the wilderness. Man merely as man never can work the righteousness of God. He giveth not his glory to another, nor his praise to images of man's device. Thou that art concerned to build up this people, cease from thy own contrivings. Lay self with all his imagined greatness at the feet of the Master. Labor to restore *one* professed disciple of Fox to primitive purity. Remember that we must all begin just where our fathers began, and that acceptance with the Most High descends not by inheritance, but thou too must know the immediate birth—the state of infancy and youth, before the strong man in Christ. Behold the giant tree of the forest! It grew not in a day; but, obedient to the law of its being and of the elements, it has grown to be a mighty tree by developing one tiny leaf after another. Be thou likewise faithful to the laws of thy spiritual being, and light will yet shine out of darkness, beauty will rise out of ashes and life out of the dust, and the dry bones of the valley will yet become a living army, going forth conquering and to conquer in the name of the Infinite Father.

FULTON, 10th mo. 2, 1866.

W. M. W.

The sure effect of obedience to the still small

voice of our Divine Master in the soul, is quietness, tenderness, humility, soundness of mind and substantial peace.

THE IRREPARABLE PAST.

Time is the solemn inheritance to which every man who is born is heir—he has a life-rent of this world—a little section cut out of eternity and given us to do our work in; an eternity before, an eternity behind; and the small stream between flowing swiftly from the one into the vast bosom of the other. The man who has felt with all his soul the significance of time, will not be long in learning every lesson this world has to teach him. Have you ever felt it? Have you ever realized how your own little streamlet is gliding away, and bearing you along with it toward that awful other world, of which all things here are but the thin shadows, down into that eternity toward which the confused wreck of all earthly things is bound? Let us realize that till sensation of time, and the infinite meaning which is wrapped up in it, has taken possession of our souls, there is no chance of our ever feeling strongly that it is worse than madness to sleep time away. Every day in this world has its work; and every day as it rises out of eternity, keeps putting to each of us the question afresh, what will you do before to-day has sunk into eternity, and nothing rises again? And now what have we to say with respect to this solemn thing—time? That men do with it through life just what the apostle did for one precious and irreparable hour of it in the garden of Gethsemane; they go to sleep.

Have you ever seen those marble statues in some public square or garden, which art has so finished with a perennial fountain that through the lips or through the hands, the clear water flows in a perpetual stream, on, on, on forever; and the marble stands there—passive, cold, making no effort to arrest the gliding water? It is so that time flows through the hands of men—swift, never pausing till it has run itself out; and there is the man petrified into a marble sleep, not feeling what it is which is passing away forever.

It is so, just so, that the destiny of nine men out of ten accomplishes itself, slipping away from them, aimless, useless, till it is too late. And we are asked, with all the solemn thoughts which crowd around an approaching eternity, what has been our life, and what do we intend it shall be? Yesterday, last week, last year—they are gone. Yesterday, for example, was such a day as never was before, and never can be again. Out of darkness and eternity it was born, a new, fresh day; into darkness and eternity it sank again forever. It had a voice calling to us, of its own. Its own work, its own duties, what were we doing yesterday? Idling,

whiling away the time in idleness and luxurious literature—not as life's relaxation, but as life's business? Thrilling our hearts with the excitement of life? continuing now to spend the day most pleasantly? Was that our duty? Sleep, brethren, all that is, but sleep. And now let us remember this, there is a day coming when that sleep will be rudely broken, with a shock; there is a day in our future lives when our time will be counted, not by years, nor by months, nor yet by hours, but by minutes—the day when unmistakable symptoms shall announce that the messengers of Death have come to take us.

The startling moment will come which it is vain to attempt to realize now, when it will be felt that it is all over at last—that our chances, our trials are past. The moment that we have tried to think of, shrunk from, put away from us, here it is, going, too, like all other moments that have gone before it; and then with eyes unsealed at last, you look back on the life that has gone by. There is no mistake about it; there it is, a sleep, a most palpable sleep, self-indulged unconsciousness of single destinies, and God, and Christ; asleep when Christ was calling out to you to watch with Him one hour; asleep where there was something to be done; a sleep broken, it may be, once or twice by restless dreams, and by a voice of truth which would make itself heard at times, but still a sleep which was only rocked into deeper stillness by interruptions. And now from the undone eternity, the boom of whose waves is distinctly audible upon your soul, there comes the serene voice again—a solemn, sad voice—but no longer the same word “watch”—other words altogether, “you may go to sleep.” It is too late to wake; there is no science in earth or heaven to recall time that has once fled.—*F. W. Robertson.*

SCIENCE IS A SYSTEMATIC EXPOSITION OF GOD'S LAWS.

The assumption that science is a mere human invention, necessarily opposed to and incompatible with the Divine truth, is happily now much less prevalent than formerly, and is so far from being correct that the very reverse may be truly affirmed. In the strictest sense of the word, science is nothing else than a systematic exposition of the works and laws of God, discoverable in the field of nature; and if we reflect for a moment, we shall see that it can be nothing else. The mere fact that a man thinks and says so and so, does not make that exist which has no existence in nature; but, on the other hand, when a law or object has a real existence, man's denial or neglect of it does not in the least diminish the sphere of its action, or lighten the penalty of disregarding it. Thus, an ardent student may believe that excessive

study and want of sleep are not hurtful to him ; but his false opinion will in no degree prevent their deleterious action. In like manner, a person may believe that sitting inactive with cold wet feet will do him no harm ; but such belief will be quite unavailing to protect him against the usual consequences of such behaviour. It is God, and not man, who has created the universe and established the relations which subsist among all its constituent parts, animate and inanimate. Every phenomenon which occurs in the natural world, however striking from its magnitude and extent,—as in the case of an earthquake or a storm, or the movements of the heavenly bodies,—or however incomprehensible from its extreme minuteness, like the microscopic animalculæ, has been devised by His wisdom and is regulated by His laws. Every truth, therefore, which science demonstrates, and every principle which it unfolds, are traceable to God as their author, and, in common with the inferences rightly deduced from them, demand our respect for this above all other reasons, and carry with them the sanction of the Deity himself. Apart from this, indeed, they would inspire no confidence in their stability, and could present no claim to our obedience.—*Dr. Andrew Combe.*

FAMILY TIES THE LIFE OF NATIONS.

Little as any of us are disposed in this country to sympathize with Comte in his philosophy, there is one great truth which he has made the basis of all politics and social ideas, and into which all other theories must flow, and by which they must be tested. It is this : that *the family is the social unit* ; not the man alone, as the head of the family ; not man or woman separately ; not the children as the hope of the future, but the man, his wife, and the children of their union form the social unit. For the good and the promotion of family prosperity, all governments and other powers and forces of the social state exist, whether political, intellectual or religious. It is true that Comte did not first discover this. It formed the basis of the religion of Abraham and the whole Jewish system. The Chinese government, the best preserved of the ancient systems, is based professedly on this principle, and now seems falling into decay through the practical neglect and subversion of it. The most ancient of the Vedas were written at a period of Indian history so ancient that family religion and worship were the highest known, and before temples and caste had begun to grow.

This great principle lies at the basis of all true social relations ; i. e., that they all are valuable exactly in proportion as they promote the growth and prosperity of the greatest number of families side by side ; a republic of such, with equal protection to all in the enjoyment of

their rights and liberties. All the right of property exists for the family, according to the views of some of the profoundest lawyers and thinkers, and the great ends of government may therefore all be summed up in the protection of all the persons and property of the State. The great source of corruption in the governments of the Old World is that some inferior institution has become idolized, and interferes with the protection of this higher, highest law of all earthly institutions. In Greece, anciently, when the few free men held all the rest as slaves, and, steeped in wealth and luxury, trampled on the family ties, decay followed. The greatness of military power, riches and glory, swallowed up everything else in Rome, finally proved fatal to family ties and virtues, and destroyed the Roman Empire.

The feudalism of the Dark Ages became inimical to family virtue and family ties, as the condition of the French nobles to the time of the Revolution showed, and it therefore fell. In England, family relations have been better preserved and fostered among the middle classes, and they have flourished, but both birth and wealth have created an aristocracy that enables the few to trample on the family ties of the lower orders. These are kept by low wages so poor that they cannot rise, cannot support a family in many of the farming and manufacturing districts, and the laws made by the rich alone favor this state of things ; the rich get richer and the poor poorer. So long as nations remain free, and without too wide distinctions between rich and poor, they become virtuous and prosperous, and increase rapidly. But the very increase of riches, concentrating into the hands of a few, is unfriendly to the family life of the many, unless the dangers are foreseen and provided against by careful training and correct public opinion. In Europe, troops of servants are kept in celibacy to wait upon the rich, unable to form family ties of their own.

This sudden accumulation of wealth is the greatest danger we have to fear, and the loss of our republican simplicity of manners and purity of morals. In cities, wealth becomes concentrated in larger fortunes, and the separation of the extremes of society increases. In just that proportion the number of marriages decrease. Business life, and club life, and political life, and the life of pleasure, overshadow the quieter happiness of the family, and pervert the social life of the people. The pleasures that can be partaken of by the whole family together are the most valuable, and those that cannot be thus enjoyed, with few exceptions, are of very questionable utility or morality.—*Public Ledger.*

"He that ruleth his spirit is greater than he that taketh a city," were the words of a king."

From the Advocate and Guardian.

RESIGNATION.

"Why should we doubt a Father's love,
So constant and so kind?
To His unerring, gracious will,
Be every wish resigned."

There is, perhaps, no one principle or element of the Christian character more beautiful, or that diffuses a sweeter charm around its possessor, than a calm resignation to the Divine will—a quiet, patient submission to the decrees of the all-wise Disposer of events. We notice this particularly when seen in connection with some great calamity, or afflictive dispensation of Providence.

To suffer a long, painful sickness, to have much sickness in our families, or to be called to give up our dearest friends, and lay them away in the cold, silent tomb, are among the greatest of earth's sorrows; and when one is brought to pass through such trials, and is seen to meet them calmly, without a murmur, though with a heart wrung with anguish, and is able to say, "Thy will, O God, not mine be done," truly, such an one manifests a spirit of true submission, and shows without doubt a firm faith in an overruling Providence, and a trust that all is for the best.

See that fond mother, watching over a darling child, who has been stricken down by disease. See how earnestly and faithfully she ministers to that child; how intense her anxiety, as day after day and night after night, refusing to take rest herself, she watches over and cares for it with a devotion such as only a mother knows. Looking to the possibility that it may be taken from her, she tries to think that in such an event she would be willing to give it up.

See her again, when the trying hour comes; disease having done its work, and death relieved the little one from all suffering. If she be a true Christian, how ready she is, in the midst of keenest anguish, to say that "the Lord gave and the Lord hath taken away; blessed be the name of the Lord." Although she may not now see the purpose of this affliction, yet she feels that it is wisely ordered, and will be understood some time in the future.

But there are other times and other circumstances in which we are called to exercise this principle of resignation, and they occur to most of us each day of our lives. Those petty trials and annoyances which are constantly coming up in our pathway, as we mingle with the busy, bustling world of mankind, sometimes provoking us, then thwarting our plans, and preventing our realizing the expected ends of nicely-laid schemes.

These troubles arise in various ways, and have a tendency to severely try our patience, to ruffle our tempers, and to make us fretful

and ill-humored to those around us. To bear these perplexities properly, to conduct ourselves becomingly among men, and rightly before God, we need to cultivate a spirit of meekness and exercise strong faith in the wisdom and goodness of our Creator.

I once learned from a child this lesson: A little girl of five years had been promised that she might accompany her parents on a visit to some friends in a neighboring county, and see her little cousins. Of course, she was elated with the idea, and for days previous to the time set to go, her expectations ran high. The anxiously looked-for morning at last arrived, and with it a hard rain-storm, which, had it continued, would have prevented the ride. As she awoke, and heard the patter of the rain on the windows, she says,

"Mamma, I am glad it rains."

A little surprised at this expression of her little daughter under the circumstances, the mother asks,

"Why, daughter, are you glad it rains?"

"Because God thinks best," replied the dear child, and not a murmur of regret escaped her lips. The rain proved to be a smart shower only, and soon ceased, so that the intended journey was made the same day.

Now, here was exhibited simple faith. The child, profiting by the teachings of a pious mother, seemed to acquiesce cheerfully in circumstances which many older people would naturally have taken as a great disappointment, to say the least. I believe it to be true that faith and trust are nowhere to be found more beautifully illustrated than sometimes in young children.

O, that we had more simple, childlike faith—more confidence in the ability and purpose of the Almighty to order all things for our best good! We make calculations large, build castles high, and lay great plans for future prosperity, fame, or honor, too often forgetting that all these must be subject to the supervision of a higher power; and when, with one breath of that power, our cherished hopes are swept away, our airy castles demolished, how apt to mourn, and think our trials greater than we can bear. Alas, for poor human nature; we could hardly bear the ills of our life with a becoming spirit, did we not receive strength from above.

Be we, then, ever so energetic and ambitious to achieve great things—and I certainly admire both energy and ambition when directed toward worthy objects—be we ever so strongly constituted physically, and ever so highly favored, and surrounded by the kindest of friends, and by the choicest of the good things of earth, we must remember that we owe all to God, and He can, if it will better serve His purpose, lay heavily His hand upon us, take

from us health, friends, and comforts, and frustrate all our bright earthly hopes and prospects. And when, in His infinite goodness, He sees fit thus to disappoint and afflict us, may we so have grace imparted to us from above, that we shall be enabled to exemplify this spirit of resignation in all its beauty.

J. W. G.

FRIENDS' INTELLIGENCER.

PHILADELPHIA, TENTH MONTH 13, 1866.

FRIENDS TRAVELLING IN THE MINISTRY.

—Rhebe W. Foulke obtained a minute from Gwynedd Monthly Meeting to accompany Ann A. Townsend in the visit to Baltimore Yearly Meeting and the meetings of Nottingham and Warrington Quarters.

No charge is made for the insertion of Marriages or Deaths.

MARRIED, on the 11th of Ninth month, 1866, by Friends' ceremony, at the residence of the bride's parents, J. NEWPORT PORTS, of Richmond, Ind., and ALICE J., daughter of Samuel S. Cowman, Sr., of Baltimore, Md.

DIED, on the evening of the 12th of Ninth month, 1866, at her residence near Mt. Pleasant, Jefferson Co., Ohio, ELIZABETH GRIFFITH, widow of Evan Griffith, formerly of Chester Co., Pa., in the 92d year of her age; a member and for many years an Elder of Short Creek Monthly Meeting of Friends.

Although far advanced beyond the years usually allotted to our race, her mind and memory were remarkably preserved, and strength afforded to descend the pathway of time in calmness and serenity, giving evidence of a preparation to enter the mansions of eternal rest and peace.

—, at his residence, in Quakertown, Hunterdon Co., N. J., on the 2d of Ninth month, 1866, in the 66th year of his age, WILLIAM CLIFFTON, after one week's illness, which he endured with entire patience and resignation.

He expressed that he "saw nothing in his way," and if the countenance is an index of the mind, his gave evidence that all was peace within; and the conviction is sealed upon our minds that, although suddenly called from a sphere of active service, he has been gathered to the fold of eternal rest. His removal is a great loss to his family, as he was always concerned to administer to their comfort. He was a kind husband and an indulgent father. He will be much missed in the community and in the meeting of which he was a member, as he was a very diligent attender, rarely being absent on First-days or in the middle of the week. He was both Elder and Overseer at the time of his decease. Much more might be said of his worth and amiability of character.

NOTICE.

There is a small meeting of Friends in the vicinity of New Market, a branch of Pipe Creek Monthly Meeting. This is situated within sight of Monrovia, on the Baltimore and Ohio Railroad, in Frederick Co., Md., about fifty miles west of Baltimore by railroad, though not more than thirty-eight by turnpike,

which runs from Baltimore to the west immediately through the neighborhood, thus making a very convenient locality in regard to roads and the facilities for getting produce to market. Since Slavery was abolished in this State, many desirable farms have been offered for sale by former slave owners and others; and although many of them show the effects of bad cultivation, an incubus carried by slavery, yet the land in this portion of Maryland is naturally good and yields well. Friends and others wishing to purchase homes at moderate prices, and in convenient localities, would do well to visit New Market and the surrounding neighborhood before purchasing elsewhere. Pipe Creek Monthly Meeting is held alternately here and at Pipe Creek.

New Market, Md., 9th mo. 25, 1866.

FRAGMENTS OF BARK FROM OUR OLUB.

NO. V.

10th month.

Quite recently we have been walking among the ferns. With us, it is an annual custom to renew our acquaintance with these beautiful ornaments of our rocks and dells, just before October comes and rocks them to sleep on the cold earth. And, as we have found pleasure in reading the curious hieroglyphics found, at this season, covering their matured fronds—even more pleasure than ever before—we now venture to make a simple plea for their thoughtful study and cultivation. The flowers that gave such interest to our summer rambles are rapidly passing away:

"The Primrose to its grave has gone,
The Hawthorn flower is dead,
The Violet by the mossy stone
Hath lain her weary head;"

but the happy thoughts left with us as a legacy at parting will make a banquet rich enough to last through the winter.

Not more than about fifty species of ferns will be found in the neighborhood of our city, and the localities chosen by each one are as various as the aspects of the ferns themselves. The Polypodium vulgare anchors its creeping, clasping rhizomes in the crevices of the rocks, girdling their brows with wreaths of evergreen, in preference to crowning their summits. Two other species of Polypodium cluster their deciduous fronds in the rich earth and deep shade of the forest, in company with the Maiden-hair fern. The Bracken forms by itself miniature thickets on sunny hill-sides, or ferny groves in warm, moist meadows. Such a grove may be seen below Swarthmore, on the creek; as thick and tangled as was the "Bracken bush" on "Benledi's living side," which Roderic Dhu's whistle garrisoned

"At once with full five hundred men."

The Allosorus thrusts its wiry roots into the wrinkles on the sun-burned face of limestone rocks; the Asplenium trichomanes, one of our loveliest ferns, plants its tiny spores in the clefts of our dry gneiss rocks, and its black

stems and spreading, green rosettes are very beautiful. Year after year, since our boyhood, at least, that rare fern in this locality, the *Asplenium pinnatifidum*, has thrown its jewelled seeds from the rocks in South Laurel Hill, over a few treasured graves, and no man living knows whence it came, or why it clusters only among the rocks of that populous but silent city. Others again, like *Onoclea*, dip their long roots into the stream, and rear their tall, broad fronds against the light, making pictures of marvellous beauty. But few of our American species are confined to the neighborhood of waterfalls.

Ferns, moreover, have strongly marked individualities. The Adders-tongue fern has one veined, rhomboidal leaf half way up its stem; it is only several inches high. Most others have pinnate fronds, and some are as tall as a man. The walking-fern bends its little leaf over in a graceful arch, and takes root from the point, whence it starts again ready for another step. The *Lygodium*—that most charming of all our ferns—is a delicate climber; its frail stems come up in moist thickets, feeble and helpless, like the young of our own kind—they cannot walk like some others of their species, neither can they stand alone. After a little while the green threads lean against some stronger stem, around which, at length, they twine, thus reaching up into the light. Like everything else beautiful, it is *ever green*, and at Christmas, its palmate leaves, and brown, terminal and fruit-laden fronds hang, like ringlets, from the bushes. With climbing plants we have always had a near sympathy, for we associate them with sentiments of affection; but the *Lygodium* touches our sensibilities acutely:

"For so we fling our feelings out,
The tendrils of the heart, to bear us up."

But the ferns have other charms than those of locality, or of individualities of general growth. Let us bring home from the woods some mature fronds and learn what they have to say to us. They won't ask us our name, nor how much money we have, nor whom we shall vote for; but they will pour into our listening ears one endless song of Him,

"Who dresses *Osmunda* in stately array;
The Filmy-fern covers with warm leafy shade;
The Bristle-fern frond He baptises with spray,
For o'er all creation His grace is displayed."

A delicate cuticle is spread all over their surface, and, at intervals, this is pierced with little windows for the passage of air and gasses. But the exquisite shape of these windows; not like the stiff, square holes we build in our houses, destitute of grace and the power to give pleasure; but charming, Gothic crypts, set in curving, graceful lines. We are told that the ferns are very old; that their green fronds waved over the earth before man came upon

the scene. These little windows then are the most ancient types we have, and it is very curious to note their strong likeness to the Gothic in architecture; that style which pleases most and tires never. In Dumblane Abbey, Scotland, there is a little window looking towards the setting sun. The guide books call it peculiarly beautiful; and Ruskin says he knows not any thing so perfect in its simplicity and so beautiful. Now, if we could figure that window on this page, and place alongside of it the structure we have been describing in ferns, they would be precisely alike.

Botanists care too much for Botany, and not enough often for the simple types of Divine architecture—pictures of Divine thought, whose outworkings in material forms give lasting pleasure to the soul, and lead us on to pitch our tent each day nearer home. In all her decorations nature is Gothic. Notice the pinna of the ferns; their outlines are segments of curves meeting at angles, their fronds droop over in Gothic arches, and the thin veins which thread their leaves creep out from their stems in charming lines, sections of circles, each one carrying in its bosom a spiral coil, still true to the type. The leaves now falling in the forest—the outlines of the great trees themselves—the sweeping hills—summer's gilded clouds—the birds and insects of the air—the fish—ourselves—are all cast in Gothic moulds; and even the earth herself rolls in pride her Gothic form around the sun. All this is not accidental, but marvellously designed to increase our happiness here; and, in the language of Charles Kingsley, make thus "life, death, and that vast forever, one grand, sweet song."

On the ferns we have been examining are little round spots, arranged in rows at regular intervals. Here the fruit is borne. Let us place one of them under our binocular microscope, and concentrate upon it a strong, reflected light. What do we see? Motion, form, and sparkling gem-like brilliancy, all in superlative condition. Hundreds of little caskets, clear as glass, polished as dew-drops, and filled with golden grains, each one a thought coming directly from its Maker, are carried on the ends of as many jointed and amber-colored stems, elastic, and coiled up at first in Gordian knots; but while we look in admiration, each fairy cup rises on its stem, and bursting, suddenly scatters its golden shower around. Like a spring, the stem now flies back and never again opens; its function has been performed and its life is ended. Let us not suppose, however, that these delicate organs—these little spots of primeval sunshine—are left all naked and exposed. Between their infant life and the rough world, Nature has interposed little shields; for does she not guard as carefully her smallest children as she does her greatest? and how thoughtfully.

she has cared for the ferns! In some species these shields are placed like miniature umbrellas over each fruit cluster; in others, a little scale rises up on one side like a trap door, and the seed cases are snugly tucked beneath it. Their forms are very various; their function is to protect the essential organs of the ferns in their young and tender state; and when the little springs become strong enough to lift up the seed cases, so that the spores may be cast more widely around, they, too, often wither away.

We have asked the ferns what they had to say to us. We shall woo them now with feelings of liveliest admiration; with earnest though patient love; for only in that mood can we coax the shy wood nymphs to whisper their life secrets.

On a sheet of clean white paper we will place one of these mature fronds, with the fruit spots downwards. After it has reposed in this position for several hours, we remove it carefully, and find a figure of the fern remaining on the paper. This figure is made by the little seeds, which have burst from their cases and fallen on the paper. Already has the fern written a portion of its history; but how transient is that history. A slight jar of the paper will destroy the likeness. When our leaves fall, and autumn comes to gather our ripened seeds into the final store-house, will our histories be written more permanently than this? We will gather up these spores—and there are millions of them—and spread them on a piece of smooth sandstone not larger than our hand. Place the stone in a saucer, and pour water in until it rises near the surface; now invert a tumbler over the coming harvest, and set all in a window. From time to time examine some of the spores under the microscope. On some of them we will see the first visible act of germinative life manifested as a little sack-like protuberance of the inner coat of the spore; this gradually is prolonged into a little rootlet, which goes forth in quest of food, for absorption takes place through it, and the spore swells till it bursts, and growth takes place from its surface in an opposite direction. This new growth consists of a series of cells filled with green granules arranged in a line, like the conferva, which is an order of plants much lower than the ferns. After a time, cell multiplication takes place laterally and transversely, so that a membrane is formed in all its aspects, resembling a liverwort, another order of plants lower than the ferns but higher than the conferva. This membrane is called the prothallium, and should be well studied by all who would know the ferns. On its under surface grow little rootlets, which supply nutrition and fix it in position; and also the antheridia and archegonia, the true representatives of the

essential parts of the flowers in higher plants. The antheridia first appear as little hemispherical projections from the surface of the prothallium, filled with green granules, but soon a free cell is observed in their midst; this enlarges, and contains within it secondary cells, with regular outlines, each one containing a coiled up filament. As the antheridia develop in size, they become separated from the prothallium by a partition, and assume the condition of independent organs. They now burst open, thus giving exit to the secondary cells, which, in turn, rupture, and thus permit the coiled up filaments—the antherozoids—to swim freely about in the water, impelled by four or more cilia attached to one end. These antherozoids seem now to have a jolly time of it, for they roam about, sowing wild oats, or doing whatever else their nature demands. Let us not lose sight of them, however, for they will swim back again upon the scene. We, too, often go astray, but the hand that allowed us to wander can conduct us to return.

The archegonia, less numerous than the antheridia, appear also as little elevations from the surface of the prothallium, built up of large cells, placed four in a series over each other, and around a minute cavity, like chimneys, slightly open at the top. These little chimneys lead down to the germ-cell, which nature has wonderfully prepared at the bottom of each archegonium, and in that germ cell, protected thus in the soft bosom of its nurse, the prothallium, she has also deposited the embryonic vesicle. Now, those antherozoids which swam off so gaily at the bursting of the antheridia, come back again, and penetrating the summits of the archegonia, descend these little chimneys, and, coming in contact with the germ-cells, penetrate their cavities and fertilize the embryonic vesicles lying within. Now commences the first cell of a new fern, and development progresses at the expense of nutrition prepared for it by the prothallium. The infant fern soon bursts forth from the cavity of the dead archegonium, to send its radicles down in quest of independent nutrition, and its fronds up after the glorious light. Wonderful is this history of the ferns, and yet its parallel is found in every little cryptogamic plant that springs from the damp earth.

In reply to our earnest wooings, the ferns have given us their tenderest secrets, and we will now ask our readers to join with us in liveliest admiration of their marvellous history. We love the teachings of the plants, especially of the little ones among them; for, as the smallest planets are kept nearest the sun, and little children, says Richter, seem ever nearest God, so do these little plants, as they seem to cluster nearest the great fountain of life—

"Have each a voice that singeth this sweet song of songs to me:

This world is full of beauty, like other worlds above,

And if we did our duty, it might be full of love."

For the Children.

THE TOOLS OF ANIMALS.

BY WORTHINGTON HOOKER.

Man is the only animal that makes tools to use. God has given him a mind that can contrive tools, and He has also given him hands by which he can use them. But He has given no such mind to other animals, and therefore He has not given them hands. They do not know enough to make tools, and so hands are not needed by them.

But, though other animals do not make tools, they have tools which they use. God has given them, ready made, such tools as they need. Let us look, then, at some of the tools that we find in different animals.

You see a man in the stern or hinder end of a small boat. He is sculling, as it is called. He is making the boat go by working the oar to the one side and the other. The oar is the instrument or tool by which he does it. Now a fish has an instrument like this, by which he goes through the water. His tail is like the sculling-oar that man has contrived, and which he uses with his hands. If you watch a fish as he goes through the water, you will find that he moves it to one side and the other, as the man does his oar; and while he goes ahead by means of his tail, he uses his fins mostly as balancers, to guide his motion. He moves them rather gently, except when he wants to change his course quickly. When he is moving along fast, and wants to stop, he makes his fins stand out straight on each side. This is just as rowers in a boat use their oars when they want to stop the boat.

You see a man drilling a hole in a rock, and you hear the sound of the tool as it goes click, click, all the while. The woodpecker has a drill that works in the same way. With his bill, he drills holes in the trees, and you hear the sound of his tool, as you do that of the tool of the rock-blaster. It is a sort of knocking sound repeated many times very quickly.

What do you think the woodpecker drills holes for? It is to get at worms and insects which he eats. These are in the bark and wood of dead trunks and branches of trees. The woodpecker knows this, and so drills to find them. He does not drill into live bark and wood, for he knows that there are generally no worms nor insects there.

But the woodpecker's instrument is something more than a drill. It is a drill with another instrument inside of it. This instrument is for pulling out the insect or worm that he finds

in drilling. It is a very long straight tongue, and ends in a bony thorn. This is armed with sharp teeth pointing backward, like the barbs of a fish-hook. Here, then, are two instruments or tools together. And the way the woodpecker manages them is this: while he is drilling, the two parts of the bill are closed together, making a good wedge-pointed drill, and at the same time a snug case for the insect-catcher. As soon as he comes to an insect he opens the drill and pushes the barbed end of his long tongue into the insect and draws him into his mouth.

As the woodpecker has to strike so hard in drilling, the bones of his skull are made very heavy and strong. If this were not so, his drilling would jar his brain too much; and another thing is to be observed: while he is drilling he needs to stand very firmly. He must hold on tightly to the tree, or he will slip as soon as he begins to drill. He has therefore strong claws to hold on with.

Some animals have tools to dig with. The elephant has long, strong tusks. These he uses to dig up roots of different kinds from the ground to eat. The hen digs in a small way with the claws of her feet, to find grains and other kinds of food that happen to be mingled with the earth. The pig can dig with its snout. It does not have much use for this when shut up in its pen; but let it out, and see how it will root, as we say. It does this to find things in the ground that it can eat. When the pig runs wild, it roots to get acorns and other things that become mixed up with the earth.

The mole has a similar contrivance to work in the earth with. This animal also has heavy claws with which it plows and digs. The bones of its fore paws are very heavy and strong, and are worked by very large muscles. The claws on its fingers too are very powerful. Great execution does the mole do with this digging and plowing machine in making his tunnels and galleries in the ground.

The mole's habitation is a singular affair. It consists of a large circular room, with several large galleries and passages. He makes all this in this way. He first heaps a round hill or mound, pressing the earth to make it very solid and firm; he then digs out his round room, where he lives, and the passages. The circular room has a deep passage out from it at the bottom, which opens into another passage which leads out into the open air. I suppose the use of these passages is to enable the mole to keep out of the way of those who want to catch it.

The marmot, or woodchuck, as it is commonly called, is a great digger. He digs his hole where he lives in this way. He loosens the dirt with his fore paws, using his teeth also when the earth is very hard, or where any roots

happen to be in the way. He pushes back the dirt as he loosens it. When he gets a considerable heap, what do you think he does with it? He shovels it out with his hinder feet, for they are so shaped that he can use them as shovels. They have a strong skin between the toes, so that when the toes are spread out, the feet answer very well to shovel dirt with.

Beavers are very singular animals. They do not live alone, but many of them live together. They live in a sort of cabin, which they build with branches of trees and mud, the mud answering for mortar. In gathering the branches they often gnaw then off with their sharp and powerful teeth. They are great diggers. They dig up the earth with their paws, to use in building their cabins. It is said they use their flat tails as masons do their trowels, spitting and smoothing the coating of mud as they put it on. The tail, which is very stout, answers another purpose. As the beaver builds the wall of the cabin, when it gets rather high, he props himself up on his tail as he works.

The beavers build their cabin close to a stream of water, and their entrance to it is below, so that they have to go down under water to get at it; and a dam is built to keep the water over this entrance of the proper height. If it were not for this, the door of his cabin might get closed with ice, if the water should get low in the stream during the winter. This dam the beavers build of branches of trees and mud and stones. The stones are used to make the branches stay down. In the cabins there are two rooms; in the upper one they live, and in the lower one they stow their food. This is the arrangement of these animals for the winter. In the summer they do not live together in companies, but each one makes a burrow for itself. Every autumn they come together, and unite in building their dams and cabins.

TAKE HEART.

All day the stormy wind has blown
From off the dark and rainy sea;
No bird has past the window flown,
The only song has been the moan
The wind made in the willow tree.

This is the Summer's burial time;
She died when dropped the earliest leaves,
And, cold upon her rosy prime,
Fell down the Autumn's frosty rime—
Yet I am not as one that grieves.

For well I know o'er sunny seas
The bluebird waits for April skies;
And at the roots of forest trees
The Mayflowers sleep in fragrant ease,
And violets hide their azure eyes.

Oh! thou, by winds of grief o'erblown
Beside some golden Summer's bier—
Take heart! Thy birds are only flown,
Thy blossoms sleeping, tearful sown,
To greet thee in the immortal year!

Edna Dean Proctor.

THE SURE REFUGE.

"Trust Him at all times."—PSALM lxxii. 8.

Oh! I know the hand that is guiding me
Through the shadow to the light;
And I know that all betiding me
Is meted out aright.

I know that the thorny path I tread
Is ruled with a golden line;
And I know that the darker life's tangled thread,
The brighter the rich design.

When faints and fails each wilderness hope,
And the lamp of faith burns dim,

Oh! I know where to find the honey-drop—
On the bitter chalice brim.

For I see, though veiled from my mortal sight,
God's plan is all complete;
Though the darkness at present be not light,
And the bitter be not sweet.

I can wait till the dayspring shall overflow
The night of pain and care;
For I know there's a blessing for every woe,
A promise for every prayer.

Yes, I feel that the Hand which is holding me,
Will ever hold me fast;

And the strength of the Arms that are folding me,
Will keep me to the last.

Crowdson.

THE PHENOMENA OF CRYSTALLIZATION.

Looking closer into the organization of matter, we shall find that force not only forms irregular aggregations of molecules, but it works with order and symmetry. Witness the phenomena of crystallization, to appreciate which, we need go no further than the freezing of water, and the formation of snow. Professor Tyndall deftly and delicately dissects a block of ice, by means of a beam from his electric lamp, pulling the crystal edifice to pieces by accurately reversing the order of its architecture. Silently and symmetrically the crystallizing force had built the atoms up; silently and symmetrically does the electric beam take them down. Here we have a star, and there a star; and as the action continues, the ice appears to resolve itself into stars, each one possessing six rays, each one resembling a beautiful six-petaled flower. By shifting the lens to and fro, new star flowers are brought into view; and as the action continues, the edges of the petal become serrated, spreading themselves out like fern leaves. Probably few are aware of the beauty latent in a block of common ice. Only think, continues our eloquent countryman, of lavish Nature operating thus throughout the world! Every atom of the solid ice which sheets the frozen lakes of the North has been fixed according to this law. Nature "lays her beams in music," and it is the functions of science to purify our organs, so as to enable us to hear the strain. To many persons a block of ice may seem of no more interest and beauty than a block of glass; but, in reality, it bears the same relation to glass that an oratorio of Handel does to the cries in a market place. The ice is music, the glass is noise; the ice is order, the glass is confusion.

In the glass, molecular forces constitute an inextricably entangled skein; in the ice, they are woven into a symmetric web, of the wonderful texture just described.

Snow-flakes are not less curious nor less complicated in their structure. When the cold is enough to cause water to congeal, each tiny droplet that hangs in the air gives birth to a slim six-sided column, terminated at each end by a six-faced pyramid. These little crystals do not remain isolated. During their descent they cluster together, so forming star-shaped groups. Sometimes six crystals only assemble round a common centre,—the simplest possible form of a star; but in the majority of cases, the crystalline associations are more numerous. On the branches of a primary star, smaller crystals are regularly disposed, and on these latter, smaller branchlets still. Thus the snowy star grows more and more complicated, while every additional ramification is made in obedience to the one same law.

Our great English lecturer also tells us that snow, perfectly formed, is not an irregular aggregate of ice particles. In a calm atmosphere, the aqueous atoms arrange themselves so as to form the most exquisite figures. The snow crystals are built upon the same type as the six petaled flowers, which show themselves within a block of ice when a beam of heat is sent through it. The molecules arrange themselves to form hexagonal stars. From a central nucleus shoot six spiculæ, every two of which are separated by an angle of sixty degrees. From these central ribs, smaller spiculæ shoot right and left with unerring fidelity, to the angle of sixty degrees; and from these again other smaller ones diverge at the same angle. These frozen six-leaved blossoms constitute our mountain snows. They load the Alpine heights, where their frail architecture is soon destroyed by the accidents of the weather. Every winter they fall, and every summer they disappear. While they last they assume the most wonderful variety of form; their tracery is of the finest frozen gauze; and, round about their corners, other rosettes of smaller dimensions often cling. Beauty is superposed upon beauty, as if nature, once committed to her task, took delight in showing, even within the narrowest limits, the wealth of her resources.

To behold this force in action, you have only to watch the process of crystallization under the microscope—a most astounding spectacle, especially when seen with polarized light. Although the atoms themselves are imperceptible, you witness the rapid growth of their aggregation. Invisible soldiers form into visible battalions, arranging themselves regularly, as at the word of command. The same troops, that is, the same solutions, never perform by mistake the evolutions proper to others. Alum presents itself in a mass, with eight equal triangular faces; sea-

salt furnishes cubes; the prisms of rock crystal are equally recognizable. Minerals have a physiognomy, which reveals the constitution of their bodies. Chemistry tells us that bodies which are similar in form, are fundamentally similar; that is, if they affect the same crystalline form, they offer a like mode of composition.—*All the Year Round.*

A BAROMETER WHICH EVERYBODY CAN AFFORD TO KEEP.

To save himself the trouble of carrying an umbrella for four or five hours, while riding on horseback, on cloudy, threatening days, the writer had been in the habit of consulting the barometer of a friend. The following communication in the *Scientific American* has furnished him with a storm-glass of his own, which makes him quite independent in this respect. We have tried it now for about two months, and find it to be very reliable.

"Dealers in philosophical and optical instruments sell simple storm-glasses, which are used for the purpose of indicating approaching storms. One of these consists of a glass tube, about ten inches in length, and three-fourths of an inch in diameter, filled with a liquid containing camphor, and having its mouth covered with a piece of bladder, perforated with a needle. A tall phial will answer the purpose nearly as well as the ten-inch tube. The composition placed within the tube consists of two drachms of camphor, half a drachm of pure saltpetre, and half a drachm of the muriate of ammonia, pulverized and mixed with about two ounces of proof spirits. The tube is usually suspended, by a thread, near a window, and the functions of its contents are as follows:—If the atmosphere is dry, and the weather promises to be settled, the solid parts of the camphor in the liquid contained in the tube will remain at the bottom, and the liquid above will be quite clear; but on the approach of a change to rain, the solid matter will gradually rise, and small crystalline stars will float about in the liquid. On the approach of high winds, the solid parts of the camphor will rise in the form of leaves, and appear near the surface in a state resembling fermentation. These indications are sometimes manifested *twenty-four hours* before a storm breaks out! After some experience in observing the motions of the camphor matter in the tube, the magnitude of a coming storm may be estimated; also its direction, inasmuch as the particles lie closer together on that side of the tube that is *opposite* to that from which the coming storm will approach. The cause of some of these indications is as yet unknown; but the leading principle is the insolubility in water, combined with the fact that the drier the atmosphere the more aqueous vapor does it take up, and *vice versa.*"

Here, then, is a storm-glass so cheap that the poorest can afford to have one; and simply as a matter of *curiosity*, to say nothing of *convenience*, it is well worth keeping.—*Calendar*.

From the Scientific American.

AN INSECT SHOW.

In the month of September of this year there was a novel and exceedingly instructive exhibition at the Palace of Industry in Paris—an exhibition of insects; those that are useful to man, such as the bee and the silkworm, and those that are injurious, as the curculio, the apple moth, the devouring caterpillars, etc. So far as possible, at that season, each insect was exhibited in its several stages—the egg, the larva, the chrysalis, and the moth or butterfly.

We hope to see this idea taken up in this country, and insect exhibitions made a prominent feature at all our agricultural fairs. In nearly every neighborhood, there are naturalists who would be very willing to present such collections, and they would certainly prove exceedingly instructive and attractive to visitors. If arrangements could be made for a lecture at a certain hour each day, describing the habits of the insects, the value and attractiveness of the exhibition would be greatly increased.

The importance of insects, and the importance of studying their habits, are thus forcibly set forth by the Paris *Moniteur* :—

"Noxious insects are to the human race what an invading army is to the territory invaded. We are assailed day and night by three hundred thousand species of insects armed with augers, pincers, and saws, which invade our fields, granaries, barns, and dwellings, and would destroy everything before them were they not prevented. Our vines, trees, grains, and buildings are each the prey of a separate class of destructive insects. Our neighbors are subject to the attacks of twenty-six species of insects belonging to four different orders. During a period of ten years, the vine-growing districts of Macon and Beaujolais, suffered a loss of thirty-four millions of francs through the ravages of these insects. This does not appear so astounding when we reflect upon the prodigious fecundity of insects and their insatiable appetite. A female termite has been known to lay the seemingly incredible number of 86,400 eggs within twenty-four hours, being at the rate of one egg each second, and a single female of the *tenredo pini*, if allowed to multiply without hindrance, would give birth in the space of ten years to two hundred billions of its species. The plant louse is even still more prolific. The learned Dr. Ratzburg states that the trunk of a fir tree sometimes affords shelter to 23,000 couples of the *bostrichus typographus*. In 1839, in Saxe-Altenburg, 500 acres of forest land were ravaged by the *liparis monacha*, when upward

of twenty millions of insects were destroyed. In 1856, 33,540,000 beetles were collected in the environs of Inedlingburg, Prussia. Between 1813 and 1824, Provence was overwhelmed by such an immense host of travelling crickets that the authorities of Marseilles and Arles offered a reward of fifty centimes per pound for the eggs, and twenty-five centimes per pound for the insects themselves, at which rates they expended 20,000 francs for eggs and 25,000 for the insects. In 1837, '38 and '39, the forests in the vicinity of Toulouse were overrun for a space of twenty-five square leagues by the *liparis dis par*. The noise made by the caterpillars in gnawing the leaves is said to have resembled that heard in silkworm nurseries. The *bombyx monacha* has been known to devastate over 200,000 acres in three or four years time. St. Augustin mentions an invasion of crickets in Numidia, whose dead bodies created a pestilence by which 800,000 persons perished. Every year the Laplanders migrate northward until they come to a region cold enough to keep off the *æstrina*, a species of gad-fly, whose buzzing alone is sufficient to strike terror into a whole herd of reindeer. Livingstone states that in settling in certain parts of southern Africa, the first enemy to be ousted is a venomous fly called the *teete*, which is more dangerous to large cattle than the lion. In South America, settlers have sometimes been obliged to use cannon in order to destroy the gigantic mounds built up by the termite. This insect, improperly styled a white ant, belongs to the same entomological order as our *libellula*.

"This insect creation is so powerful that we are only enabled to restrain it by having allies in its ranks, for fortunately a large number of these little creatures have interests identical with our own, and, consequently, we enjoy their aid. What a reflection upon human pride! Our most formidable enemy is not to be found among the lords of the animal kingdom—it is neither the lion, the elephant, nor the crocodile, but a diminutive insect, or rather embryonic insects, in the shape of larvæ. We are held in check by a host of larvæ. Agricultural prosperity, and, consequently, all social progress, are involved in the existence of a certain number of insects perpetually hungering after other insects. Twenty-two kinds of coleoptera, neuroptera, diptera, hymenoptera and orthoptera make the *pyrale*, or vine insect, their prey. The larvæ of the *calosoma* invade caterpillars' nests, pierce through their bodies, and continue to feed upon them, until they can hold no more. The larvæ of the ichneumon fly are hatched in the very body of the caterpillar, where they live until metamorphosed into *nymphæ* or eggs. A certain variety of insect called the *asile* is accustomed to watch almost continually for little butterflies, common flies and drones, which it

seizes on the wing by means of its long feet. Wherever carabes abound they speedily exterminate an insect called the *maus*, the hideous and formidable offspring of the black beetle. It is to our interest to ascertain which classes of insects are useful to man, and these should be protected and increased in number; but our farmers establish no distinction between the insects which ravage our crops and those created by Providence to prey upon and limit the number of the former. Whether useful or noxious, they all suffer the same fate as nocturnal birds of prey, and insectivorous birds; muskrats and moles among mammiferous animals, and snakes and toads among reptiles and amphibious animals. It has been calculated that the preservation of night birds would save annually from twelve to thirteen million bushels of cereals which are now devoured by rats and field mice. It may, in truth, be said that man has an enemy far more dangerous to him than those we have specified—and this enemy is his own ignorance."

For Friends' Intelligencer.

REVIEW OF THE WEATHER, &c.

NINTH MONTH.

	1865.	1866.
Rain during some portion of the 24 hours,	12 days.	11 days.
Rain all or nearly all day,...	0 "	2 "
Cloudy, without storms,.....	5 "	5 "
Clear, in the ordinary acceptance of the term,.....	13 "	12 "
	30 "	30 "
TEMPERATURE, RAIN, DEATHS, &c.	1865.	1866.
Mean temperature of 9th month per Penna. Hospital.	72.68 deg.	69.50 deg.
Highest do. during month.	89.00 "	89.25 "
Lowest do. do. do.	50.00 "	50.01 "
Rain during the month,.....	7.96 in.	8.70 in.
Deaths during the month, being for 5 current weeks for each year.....	1333	1812
Average of the mean temperature of 9th month for the past seventy-seven years	66.13 deg.	
Highest mean of do. during that entire period, 1865.....	72.68 "	
Lowest do. do. do. do. 1840	60.00 "	

COMPARISON OF RAIN.

	1865.	1866.
Totals for the first six mos. of each year.....	28.94 "	22.47 "
Seventh month.....	2.97 "	2.52 "
Eighth month.....	3.75 "	2.18 "
Ninth month.....	7.96 "	8.70 "
Totals.....	43.62 "	35.87 "

It may be remembered that for the corresponding month of last year we had an unprecedented record to

present, and although the excess of heat this year is about *three degrees less*, we find it almost three and a half degrees above the average for the past seventy-seven years.

It will be seen that the number of deaths continue on the increase, showing an excess for the month (counting *five weeks* each year,) of 1866 over 1865, of *four hundred and seventy-nine* (479.)

In reference to climate, &c., the following facts are worthy of preservation. They are gleaned from a paper read some time since before one of the sections of the Association for the Advancement of Science and Art, Cooper Institute, New York, by Mr. J. Disturnell, on the influence of climate. In the course of his remarks he gave the results of meteorological observations, as far as they could be collected, for the past three hundred years. The oldest record was obtained from the learned men connected with the Bishop's Palace, Quebec. Here records have been preserved of the change of weather, temperature, &c., from the time of Jacques Cartier (1535-36) to the present period.

From these long continued observations, although at times irregular, the following conclusions were arrived at in regard to the temperature of the vicinity of Quebec, 46 degrees, 50 minutes north latitude. On carefully comparing the meteorological observations made in the sixteenth and seventeenth centuries with those of the middle of the nineteenth century, it is easily to be understood that the climate of Canada—at least the neighborhood of Quebec—is about the same as it was three hundred years ago. Then, three or four feet of snow; now, at least as much; the first snow falling the first fortnight of November; navigation on the St. Lawrence, between Quebec and Montreal, interrupted by ice in the last week of November, and opening toward the end of April—five months closed on an average. The apple, cherry and plum trees blossoming the last half of May and beginning of June; this is what we find at both epochs. In this respect nothing appears changed, and the clearings and improvements made until now have had very little influence in the present temperature of Canada.

On comparing the observations relating to Philadelphia, for the past sixty years, it seems that the seasons embracing the whole year are somewhat warmer than they were at the time of the early settlement of the country, or since trustworthy records have been kept.

The mean annual temperature of Philadelphia, for the last sixty years, at periods of ten years, are as follows:

From 1800 to 1809, average	51 deg. 80 min. Fahr.
" 1810 to 1819, "	50 deg. 70 min. "
" 1820 to 1829, "	52 deg. 70 min. "
" 1830 to 1839, "	52 deg. 00 min. "
" 1840 to 1849, "	52 deg. 70 min. "
" 1850 to 1859, "	53 deg. 00 min. "

The coldest year was 1816, being a mean of 49 degrees Fahrenheit, and the warmest 1858, being 54 degrees, making a variation of 5 degrees Fahrenheit. Thus the mean annual temperature of Philadelphia may be said to have increased during a period of 66 years about $1\frac{1}{2}$ degrees Fahrenheit.

Phila., Tenth mo. 3, 1866.

J. M. ELLIS.

AGRICULTURE.

Study is essential to the highest success of agriculture, and farming ought to rank among the learned professions as a field of intellectual labor and enjoyment. It is beautifully adapted to the wants of man. The general laws of vege-

table growth are so simple that they can be understood by men in a low state of civilization when the wants are few; and they are also so complicated and nicely balanced in their higher relations that they require all the study, wisdom and skill of the highest civilized society, that the fruits of the earth may satisfy, in their quantity and quality, the demands of such a state of society. We find, then, in the very beginning, plants adapted to man as an intellectual and physical being. By their unlimited power of improvement they are fitted to call out forever his mental activity, and by this very power of improvement they are fitted to gratify his increasing desires as he advances in civilization.—*Prof. Chadbourne, of Williams College.*

ITEMS.

The insurrection in Candia is serious. No progress has been made in its suppression, and the movement appears likely to spread to the other Turkish Islands as well as to the mainland.

JEWISH AGRICULTURISTS IN RUSSIA.—Formerly Jews were altogether excluded from the interior of Russia. The Emperor has greatly modified the restrictions, in order to facilitate Jewish immigration. The consequence is a considerable influx of Jews into the government of Kieff, most of whom devote themselves to agriculture. The *Gazette of the Provinces* states that 355 Jewish farmers have settled on the Crown domains, consisting of 2,729 males and 2,820 females, all of whom carry on agriculture. Moreover, 41 Jewish families in the same year bought farms of their own. These families consist of 762 males and 764 females.

THE FREEDMEN.—Commissioner Ely, of the Freedmen's Bureau, in Kentucky, writes to the "Friends' Association for the Aid and Elevation of the Freedmen," that, "In view of the approaching winter, the Bureau Superintendents in the State are sending to this office estimates for clothing that will be needed for gratuitous distribution to the few helpless cases of indigents in their respective localities. All articles of men's wear I draw from the Quartermaster's Department; therefore only need clothing and shoes suitable for women and children of all ages and sizes, and trust that, notwithstanding the large draft made on your benevolent Society, you may still be able to render assistance to the poor and needy in Kentucky. No provision has yet been made by the civil authorities of the State to clothe, feed and warm its pauper freedmen; this is a disgraceful and wicked blot on its character, for no State west of the Alleghanies is to-day more prosperous or more wealthy, in proportion to its white inhabitants, than Kentucky. I am glad to say that the freedmen, as a class, are industrious and are daily improving their condition, and the percentage of paupers is very small. In all parts of the State the colored people evince a strong desire to have their children taught the rudiments of an English education, sending them to school whenever it is possible to do so. In this city, (Louisville), and all the larger towns of the State, the colored schools have as yet been supported entirely by subscriptions from the freedmen whose children attend them; these schools are well attended and the pupils are apt in learning. Of course many are excluded from them on account of the inability of their parents to pay the tuition price. There is a very bitter and mean prejudice existing among a majority of the white people of the State

against schools for negroes, and especially against the white teachers of such schools; yet I have met with many noble Kentuckians who are an exception to the majority, and as time advances these liberal sentiments are gradually gaining and eventually will prevail."

From South Carolina come reports of small crops, attributed partly to the drought and partly to a lack of means and implements to carry on the plantations. The agent in St. Thomas Parish states, as a result of his observation, that in his opinion the coming winter will be one of insupportable hardship to thousands of freedmen in his section of the State, and that, without Government assistance, famine will prevail. There is now, even, great suffering among them from want of food, and they have very little clothing, scarcely one in ten having a pair of shoes. There is said to be a general movement towards Florida on the part of those backs who despair of obtaining land of the too tenacious planters.

SELECTIONS FROM THE WRITINGS OF JOHN BARCLAY.

(Continued from page 499.)

1816, *November*.—Do not look at others, whether their example seems to recommend one line of conduct or another, no not even at such as are very industrious in business, and yet accounted strictly religious characters; they are no guide for you:—stand on your own ground; nothing will justify what you are about to do, or to forbear to do, but a full conviction of duty. If you have that true peace which no man can give or take away, it matters little what others may say or think. Remember that the honest fishermen quitted their lawful concerns, nay all, to follow Him that called them, but it was not *till* He called; the hundredfold reward, and the everlasting inheritance were promised, not to those who merely forsook all that they had, but to those who did so *for his name's sake*. I think it was W. Penn who said, "it is not the sacrifice (however great) that recommends the heart, but the heart which gives the sacrifice (however mean) acceptance."

1816, *November 9th*.—O! what shall I say, or what words shall I make use of, to declare fully the Lord's goodness and compassion to this poor frame of mine! Day by day, yes, all the day long, is his hand renewedly and refreshingly turned upon me, for my present and everlasting welfare. Even when the power of the wicked one came over my poor soul, when all desires and endeavors after good—after

"those things that make for peace," were to appearance utterly extinguished—even in that dismal hour, which was still more darkened by the insensibility which benumbed me, the gloriously great and gracious Giver of all good was pleased to pity me, and to revive the latent spark within me, making it grow gradually brighter. Surely, He is working a great work within me; his hand, his holy hand is upon me; and if not through my own default, he will by no means draw back or desist, until he has made me all that he would have me to be. What a multitude of obstructions as well as snares and difficulties encompass me: how shall I put one foot forward in the right way, except the Lord himself condescend continually to "direct my steps." And O! then what a constant need there is of acknowledging Him in *all* my ways; that so this promise of safe and sure direction may happily be fulfilled in my experience:—"The Lord, he it is that doth go before thee; he will be with thee; he will not fail thee, neither forsake thee."

1816, *November 12th*.—O Lord God Almighty! it is of thy exceeding mercy that I am raised up, and thus fervently, thus solemnly to address thee as the God which hast led me unto this day. O! how clearly and comfortably hast thou, during this time of need, revived the remembrance of what thou hast done for them that have sought or desired to seek thee. Where is not thy "mighty hand," and thy "outstretched arm," to be discovered?

When I "look at the generations of old and see," through thy grace I am enabled to silence every doubt, every discouraging fear, by that feeling and forcible interrogation,—"*Did ever any trust in the Lord, and was confounded; did any abide in his fear, and was forsaken; or whom did he ever despise, that called upon him?*" Well might thy servant say, "The earth, O! Lord, is full of thy mercy;" and thy prophet exclaim—"The whole earth is full of his glory." "And now, Lord! what wait I for? my hope is in thee:"—in thee, in thee alone is my joy, my crown, my confidence. I dare not ask of thee deliverance out of trouble, except in thy time; but O! my very soul doth crave of thee, that I may be kept from everything like evil;—that I may be supported and sustained by that "hidden manna," which is promised "to him that overcometh." O! grant, Lord, unto him, who feels himself at this time awfully humbled under thy mighty hand,—that he may be made still more deeply sensible, that "thou art God *alone*:" and as often as thou art pleased, in thy very abundant compassion, to renew within him that which constrains him to cry out, "My soul thirsteth for God, for the living God,"—at such precious seasons, may he be satisfied with nothing short of Thee; and strengthen thou him to endure patiently through all,—waiting upon, hoping in, and watching for thee!

1816, *November 23d*.—At the present favored interval of retirement and leisure, I am concerned to repeat an inquiry, more than once instituted before this time, whether I am not now called upon to declare and profess before men, the religious persuasion and principles which I most surely hold; and to adopt that course of daily practice in conduct and conversation, of the reasonableness and rightness of which I have not any doubt. It does appear to my view highly and imperatively necessary, that an internal change should precede an external one. I believe that conversion is that of the heart; that profession must follow, not go before possession; and that an outward show and appearance of peculiar seriousness is hypocrisy and increased condemnation, if not accompanied by the inward work of sanctification in the soul. Nevertheless, it is certain to my mind that one invariable evidence of true religion having entered and taken up its abode in us, will always be, that we shall no longer conform ourselves to this world in its vanity and folly; and that, in our dress, address and general conduct in every particular, we shall not be governed by worldly maxims or opinions, but by the law written in our hearts. How far then is this the case with me? How far can I assuredly say, that this change of heart is my experience? O! I feel indeed that I come short of what ought to be my practice; that though

I have given up my name to serve the living God, even Him who hath led me unto this day,—though I have withheld not some things which were required of me to give up and to forsake,—yet has not my heart fully, entirely, and without reserve resigned *my all*. O! there have been those parleys and tamperings with sin, those secret relapses, those connivances with the enemy, which the Lord abhors. What a total surrender of self does our pure and righteous Lord call for; what an abandonment of everything evil does He expect from his followers; what a daily and hourly watchfulness and circumspection is required of those, who would be heirs of a glorious mansion, where nothing impure can enter! How *very* appropriately is it written, "Be ye holy, for I the Lord your God am holy."

Same date.—How beautiful, how glorious a sight is it to behold the sun in the morning when it issues from its bed of crimson hue, when it gradually ascends the horizon, dissipating the dusky gloom of fading night, and tinging every object in nature with its golden rays. And O! may I not say, that through the blessings of a gracious Creator, I am enabled almost daily to witness the spiritual arising of the "Sun of righteousness with healing in his wings." Surely the dayspring from on high, "through the tender mercy of our God," hath visited, and is visiting me; and assuredly the end and purpose of his arising is the same that it was formerly,—even "to give light to them that sit in darkness and in the shadow of death, to guide their feet into the way of peace." I think I say not amiss, when I declare my belief, that the light within me seems to get brighter, and the fire warmer almost every day. O! that I may be content to remain in the refiner's fire, that I may become purified and refined from everything evil.

1816, *November 27th*.—I have been long in much trouble and difficulty about changing my dress, as well as adopting those other distinctions and testimonies which Friends uphold and practice; and my anxiety respecting these things has been, lest I should take them up without good ground, and without being clearly and indubitably sensible that these sacrifices are called for. Indeed, I have gone mourning on my way, day after day, and night after night. Perplexity and discouragement, darkness and distress, have at seasons clouded the horizon of the morning of my days; and mainly, because I knew not certainly the Divine will, as to these external observances, and to as many other sacrifices. But I think that this subject has been cleared up very satisfactorily to me this day, in much mercy, both by what I felt, and by what was delivered through a servant of the Lord, at meeting.

Same date.—I see evidently that "Jesus

Christ came into the world to save sinners," and that "unto them that look for him, shall he appear a second time, without sin unto salvation;"—"the wages of sin is death," and consequently, that without repentance there is no remission of sin;—that we must be in the way of being redeemed from the power of evil, or the punishment will not be remitted;—that we must be delivered from sin itself, before we can be delivered from the wages of it, which is condemnation; for it is aptly expressed, "There is now no condemnation to them that are in Christ Jesus, who walk not after the flesh, but after the Spirit. O! then, my soul, surely there is required of thee a clean heart and a right spirit to be renewed within. O! how shall I bestow pains and anxiety about cleaning the exterior, whilst there lurks any filth in the interior. How shall I garnish the outside with an appearance of the beauty of holiness, and polish it after the similitude of a temple dedicated to the Lord, when it stinketh within by reason of the defilement there concealed. Surely it was well said by the Lord to those hypocrites the Pharisees, and it equally applies to many in these days as to them:—"Cleanse first that which is within the cup and platter, that the outside of them may be clean also:" and the latter part of this exhortation remains strikingly true,—for I am fully persuaded that all cleansing of the exterior to be sincere and not hypocritical, must be the effect of a change of heart.

1816, December 4th.—Is it not beyond a doubt, that the Lord will make known his will to his poor dependent creatures, who with sighs and tears both day and night seek to serve him aright in all things? Surely He is no hard master who does not evidently let his servants see what is required of them; nor, I am persuaded, does he at any time call for more arduous service than he gives strength to accomplish. But then he must and will be sought unto, both in order that his will may be clearly known; and when known, that sufficient strength may be handed to enable to perform the same. All my desire is before the Lord; and he knows, and I believe, hears my prayers,—he sees my watchings and my weepings, and is witness to all my woes. I do indubitably believe that the present time is very precious to me,—that the hand, mighty hand of the Lord is upon me for good—that he is extending his gracious visitation to me his poor sinful creature, who has been bound by the bond of darkness, by the power of the destroyer. O! he is and has been arising for my help, for my deliverance; he has assuredly, in some measure, brought me as it were out of the land of Egyptian and cruel bondage; and it appears to me impossible, unless by my own default, that his promises should fail in the midst of the fulfilment of them, and

that he should leave me in the wilderness to die in my sins, to be destroyed by famine and want:—no, he has a fountain of living waters in store for me; and though I know not whether I may partake of that delicious and reviving consolation, out of the bare and barren rock, or on the fruitful and flowery banks; "yet I will rejoice in the Lord, I will joy in the God of my salvation."

1817, January 27th.—"Having food and raiment, let us be therewith content," &c. I have admired the honest simplicity and plain speech, which the first Christians, and especially their great pattern, made use of to instruct their hearers: the reasoning of the apostle in this place is unanswerable, and the process of his thoughts appears to me so natural as to be not easily misunderstood. The substance of that which he sets forth, is, without any strained exposition, nearly as follows:—the gain of riches is by no means godliness, nor can it be a substitute for godliness in the end; on the contrary, godliness is profitable both here and hereafter, and therefore is alone true gain. Wealth and possessions last us only whilst we live: we had them not when we came into the world, and it is certain that we can retain them no longer than whilst we are here. Seeing then, that soon, very soon, we must part with these things, let us provide "bags which wax not old, a treasure in the heavens which faileth not:" and as to everything else, the riches, the enjoyments of this vain and passing scene, let us use these things as not abusing them; let us not be slaves to them, but rather render them of service to us. If we are rich, let us not hide our talent in the earth, but be rich in good works: and if we are in a middling condition as to outward circumstances, let us endeavor so to act, as to be able strictly to adopt the apostle's language,—"these hands have ministered unto my necessities, and to them that were with me." Thus we shall be enabled more fully to understand, and more freely to accede to the text, "having food and raiment, let us be therewith content."

(To be continued.)

The throng of thoughts which are continually passing in and out, how shall we dream of examining, judging, trying them all, except by a special Divine interference in our behalf? Divine power can qualify a man for anything; but nothing short of Divine power can qualify him for a task so onerous as this. To God, then, let us commit the keeping of our souls in the most absolute self-distrust. Thus he shall have Christ dwelling in his heart by faith; and this indwelling shall be a sure preservative against evil thoughts; and in that heart, though agitated on the surface, there shall be a peace which it has never known before.

THE RELIGIOUS.

To be religious is to feel that God is ever near. It is to go through life with this thought coming instinctively and unbidden: Thou God seest me.

A life of religion is a life of faith; and faith is that strange faculty by which man feels the presence of the invisible, exactly as some animals have the power of seeing in the dark. That is the difference between the Christian and the world. Most men know nothing beyond what they see. This lovely world is all in all to them,—its outer beauty, not its hidden loveliness.

Prosperity—struggle—sadness—is all the same. They struggle through it all alone, and when old age comes, and the companions of early days are gone, they feel that they are solitary. In all this strange deep world, they never meet, or but for a moment, the Spirit of it all, who stands at their very side. And it is exactly the opposite of this that makes a Christian. Move where he will, there is a thought and a Presence which he cannot put aside. God looks out upon him from the clear sky, and through the thick darkness,—is present in the rain-drop that trickles down the branches, and in the tempest that crushes down the forest.

A living Redeemer stands beside him, goes with him, talks with him, as a man talks to his friend. The emphatic description of a life of spirituality is, "Enoch walked with God."—*Robertson.*

EXTRACT FROM JOURNAL OF JESSE KERSEY.

2d of Eighth month, 1840.—I am now in the close of my seventy-second year. My thoughts continue to be active in the various concerns of the day. After the experience of a middling long life, I see no cause to doubt the truth of the principle professed by Friends, and their belief in the manifestation of the Divine gift of God to man. And it seems to me that if they are faithful in following this Heavenly Guide, they must continue to be a light to the world, and advance the cause of universal righteousness. Already it is evident that they have been instrumental in holding up many valuable testimonies. The rights of conscience have been plead by them; and mankind now agree to a large extent that it is a principle which no human authority can control, or has any right to interfere with in matters relating to our duty toward the Supreme Being.

Other testimonies are also embraced in the profession of Friends, that are of great value to mankind. Witness their doctrine in relation to oaths, a hireling ministry, and bearing of arms. Each of these is a testimony so important to the human family, that they should all be kept in view and faithfully maintained

with the greatest integrity and care. On the subject of the ministry, their testimony to its purity and freedom is of sufficient importance to demand the most rigid attention. If the Society should ever let fall this testimony, it will be a departure from a great Christian obligation, and an immense loss to the subject of the spreading of the light of the glorious Gospel.

Besides the preceding valuable points of the principles of Truth, Friends have adopted the most rational and perfect mode of social worship that is to be met with; because they meet and sit in silence. In this state every mind has the opportunity of attending to its own condition; and if it holds to a state of union with the divine gift, it may in the silent state of the meeting, be prepared devoutly to worship God in spirit and in truth. Again, if an individual in the meeting should be sensible of having been unfaithful, or disobedient, and therefore should feel condemnation,—there is the advantage of silently attending to its own case; and thus the mind may become prepared (by a deepfelt spiritual repentance) to return with honest integrity to its merciful Creator, and renew its covenant with him: in which case it has gained a qualification to worship in the beauty of holiness.

Not only have these silent opportunities an advantage in favor of honest integrity, but they put it in the power of the sincere-hearted to feel after, and to understand their real condition, their spiritual state. But when an assembly are met together for the purpose of Divine worship and religious improvement,—and immediately on entering their meeting house, begin to pray, or sing, or in any other manner become active,—there is great reason to doubt the soundness of their proceedings; because it is quite probable that the services they so hastily engage in have no higher principle than the mere will and activity of the creature. And though such may seem to kindle a fire, or warmth of zeal, and to move in the light of the sparks thereof,—they may find the effects of this creaturely activity to be as declared by the prophet, "This shall ye have of mine hand, ye shall lie down in sorrow."

Eighth month 9th, 1840.—Being now a member of Fallowfield Monthly Meeting, I was favored in one of our religious opportunities with some views of the attribute of mercy that were instructive; and it appeared to me to be my duty to make the following remarks on the subject. We may hold a belief in the existence of this wonderful attribute, and yet not be proper objects for it to act upon. Those who witness the precious enjoyment of this Divine attribute, are such as sincerely abhor all evil, and are endeavoring to be conformed to the Heavenly Father's will. Such are coming out

of the follies of the world, and are entering into the Divine life, and to those is the attribute of mercy extended. But while people are living in the indulgence of the passions and propensities of the natural mind, they stand in a state of wilful disobedience, and therefore are not children of the kingdom and government of Christ. For, in order to become members of his church, it is necessary that he alone should rule and govern all our actions. Such as these are the objects of his mercy, and it is his good pleasure to own them by his blessed light, truth, and spirit, in their hearts. To such is the Heavenly Father's love, and his mercy is over them for good, while they continue to walk in his law.

Having opened in our Monthly Meeting a concern to visit Warrington Quarterly Meeting, and some meetings on the way, it was united with, and a Minute furnished me for the occasion. I accordingly set out on the 18th of the Eleventh month, 1840, having Joseph S. Walton for my companion. We stopped a short time in Columbia, where, amidst the rejoicings of the people on account of the election of President, one man had his arm broken by the unlooked for discharge of a cannon, and others were in great danger of losing their lives.

On Seventh-day, the 21st, the meeting of ministers and elders met. They were a small company; but in sitting quietly among them, I felt thankful in being impressed with a clear sense that they were mercifully cared for by the Head of the church. And a hope was entertained that if they continue faithful, there will be a gathering and increase of Society. Next day the public meeting was mercifully crowned with a deepfelt solemnity. I have seldom witnessed the power of Truth to be in such admirable dominion as in this meeting. I was led to show that the work of man's salvation consisted in a perfect conquest over the natural spirit; and also that this was a change which Christianity called for; likewise, that the apostle Paul in all his ministry pointed to this victory as a state of the triumph of the soul of man over the animal nature.

On Fourth-day, the 25th, we were at Huntington meeting. It was an opportunity in which I was glad to urge upon the assembly the awful necessity there was rightly to improve the time, in order that they might be fitted and prepared to enter the eternal world. In this meeting my mind was much humbled under a sense of the mercy and grace furnished to that assembly. In the evening I had an important opportunity with a number of Friends, in which I succeeded in convincing most that were present, that as a Society, we were called to peace; that in order to obey this call it was necessary that we should remember that our Holy Head had declared that his kingdom was

not of this world; but that it stood in the peaceable, lamb-like nature and spirit. Hence I inferred that the members of it should keep out of all strife and contention, and set an example of complete separation from all the noise and tumults that are going on among men; for I could not see how Friends were to maintain the peaceable testimony with consistency, and at the same time take a part in the political contests that were agitated in the world.

26th.—We parted with Friends at Huntington, and rode to Yorktown, where I had an appointed meeting with the inhabitants. It was a memorable opportunity, in which many minds were solemnized by the blessed power of the Gospel of Christ, and I was glad to find much tenderness among the people. Visits were also made to sundry other places, much to my satisfaction. At Berlin, however, it was a time of trial, but ended under a satisfactory solemnity. To me it is always cause of thankfulness, when the people are brought into a state of true silence. It is then that I believe the voice of the Shepherd and Bishop of souls is heard, and the company benefited.

I was also at some places not much visited by Friends, and it appeared to be particularly encouraging to many of the inhabitants to find that they had been thought of in this way.

William Penn has, in a letter to Archbishop Tillotson, these memorable words:—"I abhor two principles in religion, and pity them that own them. The first is obedience upon authority, without conviction; and the other, destroying them that differ from me, for God's sake. Such a religion is without judgment, though not without teeth. Union is best if right; else charity.

From the Western Christian Advocate.

THOUGHTS ON PRAYER.

BY A. C. GEORGE.

1. *Prayer is the hunger of the soul.* It is the appetite for God which the Holy Spirit excites in the heart. No one need despair of his spiritual condition who has an inclination to pray. Longing for God will certainly end in the enjoyment of God. Bishop Hall exclaimed, giving voice to the wail of myriads of hearts, "If God had not said, 'Blessed are those that hunger,' I know not what could keep weak Christians from sinking in despair. Many times all I can do is to complain that I want him, and wish to recover him." Let us be comforted, then, if we hunger, if we want God, if we long for the communion of his love as our only satisfactory portion. For this feeling is supplication, and such as God must hear and answer. Does not the child pray who says to the parent, "I am hungry," and is not the parent moved by every throb of love to supply

its need? And if we truly hunger for the bread of life, will not our compassionate Lord satisfy the cravings of our undying souls?

3. *Prayer is expectation.* Bishop Thomson tells of a wealthy man who had a taste for gardening and horticulture, and who was accustomed to import from distant climes the seeds of choice exotics and sow them in his garden. Then, after a few days, he would closely examine the ground with a microscope for the first indications of life and growth. Thus should we look for the answer to our prayers, and for the fruit of our Christian labors. The expectant soul is the first to catch a blessing. When the prophet prayed for rain, he sent his servant to look over toward the sea and bring him word whether there were any sign of rain. And as often as he prayed he sent him on this errand; and when the servant brought him word, "there is a little cloud the size of a man's hand," he took it at once as the answer to his prayer, and prophesied an abundance of rain.

4. *Prayer is contemplation.* Ruskin has taught us how to observe and study the facts of the natural world. Only by careful, patient and prolonged observation are we enabled to discover all the beauty of leaf and flower, of river and mountain, of cloud and sky, of plain and ocean. Through what weary hours and days will artists contemplate a great painting, observing it in detail and in the relation of its parts, and intensely admiring its beauty and dwelling on its excellencies, till the splendid creation of genius has become the property of their own souls! How an astronomer will gaze into the heavens, section by section, gazing and wondering, forgetting the world and all its affairs, till his whole nature is absorbed in the contemplation of the magnificence and glory of the material universe of God!

It is said of the wicked man, "God is not in all his thoughts;" but the praying soul is filled with the visions of the Infinite. He beholds the beauty of the Lord; he discerns every where the artistic hand of Him who has shaped the forms of all things according to a perfect standard of beauty and utility; and on his believing mind has burst the splendors of the celestial heavens. As he prays he adores; he dwells in thought on the goodness and greatness of his Heavenly Father; he loves to contemplate the Divine character; and while he looks he is transformed, changed from glory to glory, as by the Spirit of the Lord.

5. *Prayer is choice of the Divine will.* "Choose thou mine inheritance for me," is the wise prayer of the Psalmist. When a little sick lad was asked by his pastor, "Would you like to get better?" he replied, "I would like the will of God." Could an angel have answered with more justness and propriety? When a certain Sabbath-school teacher asked of his

class, "How do the angels in heaven do the will of God?" one child answered, "Immediately;" another said, "Diligently;" a third answered, "With all the heart;" a fourth said, "Always;" a fifth said, "They do it altogether." After a pause a little girl spoke up and said, "*They do it without asking any questions.*" This is a beautiful illustration of a rare and wonderful grace. Such *unquestioning* obedience comes only from a resolute and full-hearted choice of the will of God. Such prayer is already heard, and the expectation of such bosoms is not delayed. "And it shall come to pass, that before they call I will answer; and while they are yet speaking I will hear."

6. *Prayer is earnestness of desire, amounting sometimes to agony.*

Dr. Payson said that he pitied the Christian who had no longing at the throne of grace which he could not clothe in language. Says Jeremy Taylor: "*Easiness of desire* is a great enemy to the success of a good man's prayer. It must be an intent, zealous, busy, operative prayer. For, consider what a huge indecency it is, that a man should speak to God for a thing that he values not. Our prayers upbraid our spirits, when we beg *tamely* for those things for which we ought to die; which are more precious than imperial scepters, richer than the spoils of the sea, or the treasures of Indian hills." Recall the wrestling of Jacob—"I will not let thee go, except thou bless me"—the "pouring out of soul" of David, the importunity of the Syro Phenician woman, and the persistency of blind Bartimeus, and learn how to pray!

7. *Prayer is enjoyment.* Edwards speaks of the "sweet hours" which he enjoyed "on the banks of the Hudson River, in *sweet converse with God*;" and every Christian has such delightful recollections and joyous experiences. "Good prayers," says an old English divine, "never come weeping home. I am sure I shall receive either what I ask or what I *should* ask." Suppose prayer were limited to one day, one place, or one great occasion, what a privilege would it be esteemed! but the Christian may come with every breath to a Throne of Grace.

In worldly matters "think twice;" but in duty, it has been well said, "first thoughts are best;" they are more fresh, more pure, have more of God in them. There is nothing like the first glance we get at duty, before there has been any special pleading of our affections or inclinations. Duty is never uncertain at first. It is only after we have become involved in the mazes and sophistries of wishing that things were otherwise than they are that it seems indistinct. Considering a duty, is often only explaining it away. God's guidance is plain, when we are true.

For Friends' Intelligencer.

THOUGHTS OF AN OBSERVER.

[The following note is from the Memoranda of a young man, in unity with Friends' principles and worship, but who has not yet seen it right to join any religious society:]

September 23d, 1866.—Attended Friends' meeting at ———. Found it still on its downward way—small and feeble—though there are several sincere-minded Christians there; but they are as “sparrows sitting on the housetop,” and their flight, which must soon be taken, will leave another empty place of worship. Feeling rather despondent, I sat long, as on a waveless sea; but at length the clouds parted and a living breeze sprang up, filling my sails with thought. I perceived that all Christians ought, at some time, in their proper place and measure, to become preachers of righteousness. “Exhort one another daily,” said the Apostle to the Hebrews, “while it is called to-day, lest any of you be hardened through the deceitfulness of sin.” “As the apple-tree among the trees of the wood, so is my Beloved among the sons;” and such must his children be. If they bear not fruit, they are of less value than the oak and cedar; and the fruit they ought to bear is both deeds and words, as occasion may require. In the household, if the head be taken away, some other member, or all combined, must do his work. In an army, when officers are lost, others are chosen to fill their places. So in the Church of Christ. When those who have ministered at the altar or table are removed, others should succeed them; for it is needful to a healthful and growing body that the Word of life should be ministered.

It is true the Lord's treasury and store-house are open, and all may help themselves who will; but as our social joy and health are promoted by meeting together at meals—though life might be sustained by every one “eating his morsel himself alone,”—and as, when so met, we pass food from one to another, and, if the heads of the table be absent, others are chosen to their service—so it should be in our religious meetings which are, or ought to be, the table of the Lord. And as not one only, but all, when occasion demands, assist in serving at our earthly boards, so all Christians ought to be able to pass round the cup of consolation, or the word of exhortation, as they are needed by the sick or hungry. Our religious communings ought to be conducted with greater freedom, as they evidently were in the apostles' time; so that as a useful thought or sentiment arises in any, even though a child in religion, it may have utterance, like fruit dropping from a young apple-tree (and such, it may be remarked, is often the fairest,) for the edification and joy of the company.

But there is a stiffness and heaviness of old age in the Society of Friends, and an excess of caution, from what Solomon calls being “righteous over much,” which precludes this necessary freedom, and renders their religious meetings less pleasant and even less profitable, especially to the young, than are their social gatherings. This is greatly to be lamented, and is, I believe, one of the foremost causes of their unnatural decline. How it is to be remedied I know not, and fear that “new wine” will have to be put into “new bottles”—that Friends, being in many places reduced to a handful of aged persons, have become so confirmed in their habits, that God will let them die out and raise up a new generation to bear forward the standard of spiritual religion, and plant it again in the front rank of the church militant.

I ventured to express something of this unexpected presentation to this little meeting, and to exhort them to let the light which was working in their minds shine forth, even though as through a mist or broken cloud, that they might be comforted and edified together. Thus they might attract others who are hungry, and not so spiritual that they can be satisfied with contemplation only, or that manna which falls like the dew in the silence of Christ's arising, but who desire meat or corn, which contain the essence of air and sunlight, combined with what is more tangible, to suit their ruder capacity and taste. I confess I only dared hint this advice, though it seems proper to be given, not only to them, but to all the Society. But I went farther, and related an incident which had just transpired, when, in trying to persuade a young lady, who had been converted by the Spirit's immediate operation, and who seemed inclining towards the Methodists, to continue rather to go forward, trusting in the same Power which had called her, and which, if faithfully followed, would lead her into a more spiritual path, she remarked that there was this about the Friends which she did not like—“*they are so very formal.*” Indeed! have they whose principles and profession ignore all forms become “*very formal?*” It was the opinion of an unsophisticated and friendly observer, and I could not but feel and acknowledge that it reached the core of truth. Alas, that it should be so! that the people whom God called to walk in the simplicity of Christian faith and manners should have become turf-bound, and stiffened into a rigid and barren ceremony of silence and idleness! And why is it, but for want both of *life* and that *freedom and exercise* which are *absolutely essential* to the preservation and growth of life? The rank and tangled luxuriance of the wilderness is more sufferable than the arid gloom of the desert, and a valley of salt grass more hospitable to hungry flocks than the bald heights

of the snow-clad or burning mountain which holds communion with but heaven alone.

Christians, both in their daily walk, and in their religious gatherings, which are the feasts of the soul, should be genial, free and inviting, and aim rather at the strengthening and development of every member of Christ's body, than at the maintenance of a fair, but too often a frigid and lifeless order. "The life is more than meat, and the body than raiment."

FRIENDS' INTELLIGENCER.

PHILADELPHIA, TENTH MONTH 20, 1866.

THOUGHTS OF AN OBSERVER.—"Faithful are the wounds of a friend." It appears to be in no unfriendly or fault-finding spirit that the young man (an extract from whose memoranda will be found in this number) comments upon the present condition of the Society of Friends. Though some of his assertions are too unqualified, there is much that is suggestive, and that we will do well to ponder. The state of the meeting alluded to is no doubt that of many others here and there, and may well clothe the mind with feelings of discouragement, calling forth the earnest query, "What shall be done to make these desert places blossom again?"

He appears to take for granted that the Society of Friends is on the decline; but this, after all that has been written on the subject, is still an open question, at least as regards this side of the Atlantic. There is generally some confusion of ideas in the mind when this subject is thought of, between a decline in numbers, and a decline in purity and zeal. Embracing, as a whole, all the sections into which the society in this country is divided, it is estimated that there is a considerable and steady increase in numbers. The question of a decline in purity and zeal is one that statistics will not settle, but it will be variously decided according to the gloomy or cheerful temperament—the disposition to look backward or forward, of each individual. It is very common to contrast Friends of the present day with the earnest men and women who were conspicuous at the rise of the Society. But no just comparison can be thus drawn. As well might we compare the thriving farmer, living in comfort amid his cultivated fields, surrounded by good society, and with means and leisure for mental improvement,

with the hardy pioneer into a new country, laboriously wielding his axe, or breaking up the fallow ground—his loaded gun standing ready to repel the incursions of wild beasts. The courage and energy of the latter are only made conspicuous by the circumstances that required their constant exercise, but they are still latent after the obstacles have been overcome, and, under other forms and combinations, equally needed to maintain the prosperity acquired.

Divine Power is sometimes so strikingly displayed, both in the history of societies and individuals, as to constitute an era of marked progress in religious thought and feeling. These "visitations" appear to be independent of human agency—cannot be calculated upon as regards intervals of time; and their causes are as yet hidden in the counsels of Infinite Wisdom. One of such eras was the rise of the Society of Friends, and it was attended with manifestations peculiar to the period and the circumstances. As at present constituted, it is not, therefore, in the condition of the hardy settler in a wilderness, but rather like one who inheriting a patrimony cleared and brought under cultivation by the energy of those who have labored for this end, must see to it not only that it does not deteriorate through his management, but that he goes on to make the improvements which his greater means and leisure enable him to do. He need not look back with envy on the hardihood, the adventure, and the rough life of his predecessor. He has other duties to perform, less conspicuous, perhaps, but not less important to the good of society at large.

Thoughts similar to those of our young friend have of latter time occupied the minds of many of the truly concerned amongst us, particularly when they see some of our younger members disposed to adopt the forms and systems of belief of other sects. There have been close searchings of heart on this account, and the inquiry has been individually made, "Have I left any thing undone that would have tended to gather these tender minds into that simple path which I have found wide enough for true enjoyment, and to that simple faith in Divine guidance, which manifests itself not in forms of worship or modes of belief, but in a life of devotion and active benevolence? Such an inquiry, pursued

in a spirit of candor and humility, may lead to the conclusion that we have neglected some of the *means* necessary to secure this desirable end. Have we sufficiently considered that the young mind does not readily apprehend abstract truth, and have we not taught our great central principles in too general and abstract a manner? Are our religious meetings alone, and the ministry in them, a sufficient means of bringing the good and wise and loving of the older class into personal religious intercourse with the young, or might not some additional means be devised for this purpose? Do we not need something, call it what we will, which, as our young members approach manhood and womanhood, shall lead them into serious reflection upon the state of their own hearts and their relations to and duties in the Society of which they are members? Is there a sufficient sphere in our Society for useful activity, and ought there not to be? Are our testimonies properly explained and illustrated, and are our young people made acquainted with the literature of the Society? And, as much of this is entombed in folios, and unattractive from its antiquated garb, are we taking means to draw from its hiding place all in it that is vital and valuable, and present it in a popular and pleasing form? These queries indicate some of the duties of our Society in the present day; and until it is faithful in their performance, its members must not look back and mourn that they did not live in the days of their fathers, since they are unfaithful in the work they have left them to finish. It is encouraging to find here and there movements made to meet some of these wants. The First-day school, the conversation meeting and the establishment of a college may not and do not fully meet them; but there must be a beginning, and these may form a nucleus around which will gather much that is not now available for want of concentration. If in the furtherance of this good work all would give of that which they have,—the spiritually gifted of their gifts, the mentally gifted of their talents, and the wealthy of their wealth,—we might not indeed produce that awakening which should found a new religion or a new society, but we should, like good Nehemiah, restore the waste places, and build again the wall that has fallen down.

Friends are cautioned against a person calling himself Richard Wilcox. His appearance is that of a Friend, and he professes to be collecting money for a Freedmen's school in Alexandria, Va. We have received satisfactory information that he is an impostor.

MARRIED, on Second-day, 8th of Tenth month, 1866, in accordance with the order of the Society of Friends, HARRISON CAMPION, of Camden, N. J., and ANNA M., daughter of Edith W. and the late John H. Willetts, both members of Philadelphia Monthly Meeting.

DIED, suddenly, on the 2d of Tenth month, 1866, SAMUEL F. PALMER, of Philadelphia, aged 57 years.

—, suddenly, on the 6th of Tenth month, 1866, BARCLAY IVINS, of Penn's Manor, Bucks Co., Pa.

—, on the 8th of Tenth month, 1866, at Crosswicks, N. J., HANNAH B., wife of Asa M. Satterthwaite, and daughter of Enoch Middleton, in her 34th year.

Appeal from the Association of Friends in Philadelphia for the Aid and Elevation of the Freedmen.

The time for re-opening our Schools having arrived, and most of our teachers being at their several posts of duty, we again appeal to those through whose liberality we were enabled to establish them, to continue their aid in behalf of the Education and Elevation of the Freedmen.

The Second Annual Report, issued during the week of the last Philadelphia Yearly Meeting, was extensively distributed, and we trust it has been generally read: to it we refer for a detailed account of our proceedings, and the success attending our labors.

We have now seventeen teachers engaged,—eleven of these are located in Virginia, and six in South Carolina; the number of pupils at the close of the summer term in the twelve schools then in operation was 585.

In order to support these schools, we must be able not only to pay the salaries of the teachers and their traveling expenses, provide books, maps, slates, etc., but, in many cases, desks, benches, and often the fuel; and that none may be kept from school for want of clothing, each teacher should have on hand a supply of clothing to meet this want. The sick and the aged, also, call loudly for our care.

We ask our friends for means, not only to keep up these schools, but to enable us to establish others: appeals continue to come to us from various parts of the South for teachers, and, if our funds would permit, we might advantageously double their number. It is greatly to be desired that this work should be vigorously carried on, as we do not know how long our teachers may be permitted to remain at their posts.

The present political aspect of the country

fills us with fear for the future of the colored people, while the great progress they make in spelling, reading, deportment and cleanliness inspires us with renewed desires to teach as many as we can the elements of learning and of domestic economy while the opportunity is afforded.

Will not our friends in the city and country aid us to do this?

Donations in money, part-worn clothing, books, toys, garden seeds, etc., may be forwarded to

HENRY M. LAING, *Treasurer*,

ACKWORTH SCHOOL.

The respectful allusion to Ackworth school, by Edward Parrish, in his excellent "Essay on Education in the Society of Friends," has led many Friends to desire further information concerning this denominational seminary of the Friends of England. With the view of presenting the readers of the *Friends' Intelligencer* with a concise account of Ackworth, the following simple article has been compiled. T.

BALTIMORE, 10th mo. 6th, 1866.

From the period when the organization of the Society of Friends had taken place, the converts to the faith promulgated by George Fox, and himself amongst them, gave serious attention to the education of their children; and it appears, that as early as 1671, from records made on the subject, they had at least fifteen Boarding-schools in and around London. In one of these the ancient and modern languages were taught by respectable linguists, by which means some of the members of the Society kept up an acquaintance with ancient and modern literature; but, as many of the early Friends were poor, and lived in remote districts, they gave very little attention to school learning, so that in fifty years after the death of George Fox,* the ignorance of the Friends in those quarters was a matter of concern with their more enlightened contemporaries, and the right education of their children became a subject of abiding solicitude with them. This solicitude was manifested in the care constantly taken in the selection of the best teachers of the time for the schools which were in progress.

In 1737, the importance of teaching the children of Friends other modern languages besides the English tongue, was deemed so necessary by the London Yearly Meeting as to be recommended, in a printed Minute, of its proceedings; but what course was taken to promote such instruction we have not the means of ascertaining. There was, however, in the Lon-

don Yearly Meeting no want of interest in the cause of education, and we find amongst its records a report from a committee appointed in 1751, in which the following creditable sentiments are delivered: "The formation of a true Christian character is ever the first thing, and indeed the one thing, respecting which we are anxious; but in forming the Christian man we do not overlook his social animal being, and are therefore anxious for his acquisition of whatever arts and sciences may, in these respects, improve his condition by fitting him for the better performance of his duties and the supply of his wants."

In London, during the succeeding Yearly Meetings, the concern was maintained, and in 1777 that body recorded its judgment, that "the establishment of a Boarding-school for the education of the children of Friends who are not in affluent circumstances would be advantageous to society."

A committee on the subject produced a plan for effecting the purpose of the Yearly Meeting, which was deposited with the Meeting for Sufferings, in order to be matured.

A training establishment for teachers, and an increased remuneration for them when in service, were prominent topics in the reports of the Meeting for Sufferings of the period; and the amount of ignorance which prevailed throughout many departments of Society was likewise repeatedly the subject of lamentation. So deeply impressed was Dr. John Fothergill (a member of the Meeting for Sufferings, and one of the most eminent men of his time) with the ignorance and self complacency of many of his contemporaries in religious profession, that in one of the reports he prepared for the London Yearly Meeting, after referring to the efforts which had been made to arouse the unthinking Friends of the importance of educating their youth, adds, "All this labor, however, appears to have been fruitless of any obvious result. Ignorance, there is reason to believe, is but too prevalent in many parts, especially in the rural districts, where members of the Society are very numerous; and it has been observed that the desire for knowledge is usually in inverse proportion to its need."

Dr. Fothergill had, in early life, received a good education, which he continued to improve by study; and his desires to promote the diffusion of useful knowledge amongst all classes, and particularly amongst the people of his own Society, led him to constant labor on their behalf. As he approached the evening of his days, the subject pressed more earnestly upon him, and led him to make the first effectual movement toward the formation of a Boarding-school, which might become a national seminary with his sect, and serve as a rallying point for the mutual interests of its members.

* George Fox commenced his ministerial labors in 1647, and died in 1690.

As he travelled through England in the year 1777, he learned that a large building near the village of Ackworth, in Yorkshire, which had been built for and used as a branch of the Great Foundling Hospital of London, was for sale, with its surrounding ground of 84 acres of land. Considering the situation eligible for his purpose, after consulting with some of his friends, they became the purchasers thereof, without waiting a decision of the Yearly Meeting, for the sum of £7,000, or about \$35,000.

The purchase was announced to the Yearly Meeting in 1778; was approved, accepted, and transferred to trustees. The Friends who were capitalists entered cheerfully into the project, and donations amounting to £6,965, and subscriptions for annuities for £3,100, are given in the report of 1780 as having been received. It was proposed to inaugurate the house as soon as possible under the title of Ackworth School, for the reception of three hundred pupils of both sexes; and on the 18th of the Tenth month, 1779, all preliminary arrangements having been adjusted, the establishment was opened, and at the end of the following year nearly three hundred pupils had been entered. It became, however, a matter of remark at the time, and verified the assertion of Dr. Fothergill, that "those who are the most in need of instruction are the last to become sensible of its importance." Lancashire did not send one child, and Yorkshire did not furnish twelve pupils; but the prejudices of parents in these counties yielded, after a few years, to other convictions, and pupils came in from them also. In the meantime, the friends of the school never relaxed their labors, and an institution which was at first designed merely to benefit the poor, has exerted a happy influence on their benefactors also, as we shall see. Dr. Fothergill did not live long enough to give to the institution, in which he had manifested so constant an interest, the benefit of his instructions. His health had been in a suffering and precarious condition for five years previous to the purchase of Ackworth, and his maladies increasing rapidly, he died at his residence, either in or near London, in the 68th year of his age, about a year after the school received its first pupils. One of his biographers records that he left a handsome endowment to Ackworth, but the precise sum is not stated.

A general meeting, to be held once a year, was established for the regulation of the concerns of Ackworth, and consists at present, as at the first years of the school, of representatives from all the Quarterly Meetings willing to appoint them.

Thus the cultivated and polished Friends of London and other cities and their vicinities are brought into close proximity with their rustic brethren from remote counties, whose outward

advantages have been limited in character; but harmonizing together under the blessed influence of the Divine and Christian principle, they have learned to respect whatever is excellent in each other, and have cordially labored together for the general good of the whole body.

Before the early days of Ackworth, marked distinctions were made even amongst Friends between different classes, and those that were rich were much in the ascendant in Society. The great Gospel lesson, which the teachings of George Fox illustrated with the utmost force, "that one is your Master, even Christ, and all ye are brethren," though acknowledged in words by the English Friends, was not always apparent in their actions. They had not reached the interpretation of the sacred text, which the Friends of the United States have long since decided upon. We, in forming our conclusion respecting the different ranks and classes of people, have accepted as a maxim the declaration of an American statesman, viz.: "The true distinctions amongst men are those which we make between virtue and vice, talents and ignorance." May these distinctions long continue. According to tradition, and also to written statements, we learn that in most of the Friends' Boarding-schools in and around London, those especially for the children of poor Friends, were, in regard to discipline, costume, and diet, conducted agreeably to the most austere and simple rules; and the mortification of the flesh, such as has been practised by a few of the Roman Catholic orders, was a favorite theory.

Sarah Lynes Grubb, afterwards a minister of extraordinary ability, was educated in one of them, and has left the following information on record concerning one of them—Clerkenwell—where she and two of her family were sent to school after the death of her father: "The change was severely felt by us, who had come from every comfort, to endure sore privations." (See Friends' Intelligencer of the present year, No. 24.) Clerkenwell was supported almost altogether by the Friends of London Quarterly Meeting, and the teaching, so far as it went, was of the best kind.

(To be continued.)

ALL'S WELL.

The day is ended. Ere I sink to sleep,
My weary spirit seeks repose in Thine;
Father! forgive my trespasses, and keep
This little life of mine.

With loving kindness curtain Thou my bed,
And cool, in rest, my burning pilgrim feet;
Thy pardon be the pillow for my head,
So shall my sleep be sweet.

At peace with all the world, dear Lord, and Thee,
No fears my soul's unwavering faith can shake;
All's well whichever side the grave for me
The morning light may break. Kimball.

"Whose heart the Lord opened."—ACTS xvi. 14.

We cannot see the wondrous Hand
That makes the budding flower expand :
One sunbeam's kiss—one dew-drop's fall—
May open wide its coronal ;
And every folded petal part,
That noon's full tide may reach its heart.

And yet the Hand that drops the dew
Is shaded from our finite view ;
And He who guides the ray of light
Is hidden from our mortal sight.
We see not,—but we own the power
That makes the bud become the flower.

Oh Lord ! Thy hand alone can part
The shadows that enfold man's heart ;
Thy Holy Spirit's quickening breath
Can vivify the germ of faith ;
Thy word can cause the bud to grow ;
Thy touch can make the flower to blow.

To Thee our infant flowers we bring ;—
Our buds,—so slow in opening !—
Perchance, within the folded cup,
The germ of life is treasured up ;—
We bring them, Lord, to crave Thy aid,
To that dear "place where prayer is made."

One gracious drop of heavenly dew
May bring the hidden life to view ;
One touch of love the leaves unroll,
And shed Truth's noontide o'er the soul ;
And thus, by sweet degrees, transmute
The open blossom into fruit !

J. Crewdson.

BEAR THY CROSS CHEERFULLY.

Bear thy cross cheerfully,
Brother, the night
Passeth, though tearfully
Dim is thy sight.
Carry it duteously,
Looking afar,
Where gleameth beauteously
The morning star.
Bear it with white hands up,
Sister in pain,
Drinking life's bitterest cup,
Know 'tis in vain.
Hopefully, prayerfully,
Light then 'twill be,
For the Lord carefully
Thus leadeth thee.
Through surging sorrows' tides,
Vales dark and lone,
Up rugged mountain sides,
Making no moan,
Though shrinking wearily
Beneath the load,
Take it up cheerily,
'Tis from thy God.
Bear thy cross trustingly,
Whate'er it be,
Then will it tenderly
Rest upon thee.
Think not to lay it down
Till life is done ;
The cross shall wear the crown
When heaven is won.

—Christian Guardian.

Many are complaining of their weakness who
ought to be complaining of their *worldliness*.

(From the Nonconformist.)

THE EXTINCTION OF LEISURE.

From some points of view, one might almost suppose that the middle of the nineteenth century must be marked pre-eminently by a great abundance of leisure. The most popular of modern inventions are those which save time. What was once, in many provinces of industry, the tedious labor of days, is reduced now to the easy process of an hour. Improvements in machinery and perfected organization display their triumphs not more in producing the commodity, than in finishing and parcelling it out for distribution. From the hands of the professional packer, or rather from the maw of his huge hydraulic press, the goods disappear, as if by magic, into luries and vans, and in their next stage are shot along viaducts or through tunnels, or transported in ships which do not put a girdle round the earth in forty minutes, but do make their port at the Antipodes in less than sixty days. Exports of a solid or liquid kind do not fly so fast as opinions and news. We ourselves vie in speed with the rapidity with which the materials for our comfort and convenience come to us. Young men and maidens, old men and children, rush hither and thither in express and excursion trains. Not a Hong kong junk or a Travancore palanquin, would excite more astonishment in the streets even of our provincial towns, than one of those sedan chairs in which our grandfathers went out to their ceremonious or snug evening parties.—quaint, perpendicular receptacles, in which they were trotted along by chairmen who might have been models for Dogberry and Verges. Revolutions like these might seem so many guarantees for a great increase of leisure. Surely it follows from these wonderful and ingenious modes of saving time, that a great deal of time must be saved.

Somehow the hope is not verified. We look for the golden hours which our slaves of iron and steam have earned for us, and we find them conspicuous by their absence. The time redeemed is set immediately afloat again, as "capital required in the business," or locked up in some mysterious way so as never to be had when we want it. There is idleness enough always in the world, and the old watchword of the sluggard still repeats itself, "A little more sleep and a little more slumber." But these are not facts which enter into the present discussion. "Leisure," etymologists aver, is from "loisir," or "laisser," and both the origin of the word and its current application might seem to imply sometimes a life spent in dreaming, or "sunk in sweet sloth ;" but called by whatever name, this is an abuse of Divine gifts, not their honest, salutary enjoyment. You cannot slacken what has not been girded, or unloose what has never yet been bound ; and it is those who

are doing the world's work diligently with hand or with brain, or with both, to whom rest after labor is sweet, and who need to lose the sense of fatigue in repose, and of wearing responsibility in a temporary emancipation and peace. And yet every day the cry waxes louder that we must quicken our pace, and that if we do not keep moving, we shall be trodden under foot, or go to the wall. The spirit of high pressure and of telegrams seems to have crept into men's very blood, and the rate of thinking and transacting business, to compete with the rate of travelling. Is the art of thinking soberly and feeling tranquilly dying out, like the dodo and the mammoth? Will the possibility of leisure be consumed and exhausted, even sooner than the stock of coal? Shall we, with one of the least hopeful, though not one of the least musical singers of our time, say—

—That repose has fled
For ever the course of the River of Time;
That cities will grow to its edge
In a blacker, incessanter line;
That the din will be more on its banks,
Denser the trade on its stream,
Flatter the plain where it flows,
Fiercer the sun overhead;
That never will those on its breast
See an ennobling sight,
Drink of the feeling of quiet again?

We may at least safely take for granted that there will be no return to the stereotyped religious observances and traditional politics of the middle of last century, or to the primitive, almost immeasurably remoter condition of things, when the earth was but thinly inhabited, and history only beginning, and fields "lay unworn by the plough." "Nature brings not back the mastodon, nor we those times." The very fact that we and those tranquil, if somewhat slow and sleepy centuries, have parted company for ever, lends an additional charm to their ivy-grown ruins, and shady college quadrangles, and dim cloisters and cathedral aisles. Even the narratives of the Old Testament attract and refresh us partly for this reason, that we prize in them the change from our own crowded and hurried life to a world where a chief and the head of a tribe sat in the door of his tent in the cool of the day, undisturbed except by a visit from angels, and where, as some one has said, the human figure fills so large a space in the landscape as to make it quite natural to mention how a man setting out on a journey girded up his loins, and took his staff in his hand. But you may admit the Dispensation, when movements were deliberate and leisurely, to have long ago waxed old and vanished away, without resigning yourself never to "drink of the feeling of quiet again," much more, never to "see an ennobling sight," or be stirred again by high, and pure, and inspiring thoughts. Human life need not be small and

petty to any of us, if we ourselves do not love to have it so. Inevitably we partake of the movement of the planet as our earth rotates on her axis, but there is no similar necessity for being carried off our feet by the strangeness and novelty of events which are taking place around us, or for letting ourselves go with every feverish rush of expectation or panic, or with every momentary fluctuation of popular feeling. It may be impossible quite to forget to-morrow or yesterday, but why brood over their burdens, or lengthen out their shadow? When you are forced to travel on by the highway, there is no escaping the annoyance of the clouds of dust; but why insist on keeping that thick, choking atmosphere around you, when you may walk at least a mile or two along quiet footpaths and through cool green fields? "Since our office is with moments, let us husband them. Five minutes of to-day are worth as much to me as five minutes in the next millennium. Let us be poised, and wise, and our own to-day. Let us treat the men and women well; treat them as if they were real; perhaps they are." One secret of the apparent scarcity of leisure is, that very many people do not really understand what it is to be "glad because they be quiet." A day without sensational excitement of some kind is a weariness to their flesh, and the company of their own thoughts is the company they least wish to keep. Instead of learning how to say, "My mind, or my home to me a kingdom is," they are spending themselves in the vain attempt to decide on the fate of some foreign empire, or "in hearing or telling some new thing."

A far greater evil, because less in our own power to remedy, is the real demand made on the strength and time of large portions of the community—the severe and constant drain on men's powers of judgment, and of sympathy, and of self-control, and, indeed, on all the energies of their mind. The astonishing and simultaneous development of several great branches of human activity, seems to throw, on this generation at least, a necessity for continually "laboring in their minds," quickly adapting themselves to new combinations, which would be considerably easier and simpler than it is, were there eight-and-forty hours in the day. When the learned Dr. Thomas Parr, and that other great scholar, Sir William Jones, were both school-boys at Harrow, the latter turned round one day and exclaimed, as he looked into the precociously mature countenance of the former—"Parr, if you should have the good luck to live forty years, you may stand a chance of overtaking your face." The features of social and intellectual life among us are so rapidly being stamped with new lines, and so completely outgrowing their former expression, that even sober-minded conscientious men are tempted

sometimes to despair of "overtaking the face" of the world they live in. Into which departments of honorable endeavor shall you throw yourself, and from which resolutely abstain, lest you should simply intermeddle with many things, and do nothing well? Of how many subjects shall you remain willingly ignorant, that your mind may not be a mere whirl of confused imperfectly-connected thoughts? Questions like these are for ever in one shape or another rising up, and there is no standing or uniform solution of them. It is only by a determination which will often appear obstinate and unsociable, that you can secure leisure to read or think, or even leisure to pray. For these uses of life some amount of time is as absolute a necessity as the bread which men eat, or the air which they breathe. But when the maximum of spare time is secured and appropriated, is there any way of virtually extending it? Is there any substitute for leisure, or any means of raising as it were to "a higher power" the little leisure that you have? Suppose a man's hours of business are long, and that even more sleep would be good for him than he can afford to take. With no covetous or selfish solicitude, but mindful of the things of others more than his own, he sees success and adversity trembling in the balance, or the alternative of an affluent and honorable career hanging in suspense against a long series of obscure and ill-rewarded tasks. Surely it is an inexpressible relief and support to such a man to be able to distinguish clearly between means and ends—between aids and accompaniments to happiness which are good and serviceable if they are to be had, but not indispensable, and sources of enjoyment and peace of mind which are quite incapable of being closed against him, and satisfying in themselves. He returns—it may be not often, but as often as he can—to the familiar walk in which every tree and hill takes its separate individual hue and physiognomy from each season of the year, and each softening or splendid influence of the sky. The children gather round his knee, welcoming some curious piece of knowledge or some dear, often-repeated story from his lips, while he also, though they may not know it, learns from them, and "sees the love they to each other make." Are there a few books, too, of which he is never tired, and friends who, alike in their letters, or by their living voice, express always the same warm affection and truth? Is that fountain still open which, as it flows with a stream ever old as well as ever new, in secret supplies of patience, and courage, and tranquillity, may be best called by its old name, "The peace of God, which passeth all understanding, keeping his heart and mind through Christ Jesus?" Of leisure, in the common sense, that man may have little, but he carries everywhere in the

deep places of his mind a serenity and steadfastness which the greater and the smaller storms outside, or near the surface, neither do nor can extinguish. Not seldom, too—

There comes a lull in that hot race
Wherein men do for ever chase
That flying and elusive shadow, Rest.
An air of coolness plays upon his face,
And an unwonted calm pervades his breast.
And then he thinks he knows
The hills where his life rose,
And the sea where it goes.

Perhaps it is a greater energy of Divine power which keeps the Christian from day to day, from year to year, praying, hoping, running, believing against all hindrances.—which maintains him a *living* martyr, than that which bears him up for an hour in sacrificing himself at the stake.—*Cecil*.

THE LITTLE SEA MASON.

"And God said, Let the waters bring forth abundantly."—GEN. 1: 2.

Who can compute the myriad tons of earthly matter which the dews and rains and rivers are continually washing down from the face of the earth, and rolling onward into the sea? With the process of evaporation also continually going on, it requires some counteracting influence to prevent the waters from becoming, in time, as completely saturated with salt as those of the Dead Sea. The agent God has seen fit to employ is a very humble one, like most of the servants he commissions to do his mightiest works. It is not the great leviathans of the deep he has made the "conservators of the ocean," but the tiny worm, which scarcely possesses in itself the power of locomotion. Yet to these most helpless of his creatures he has given the power and the instinct to absorb the mineral substances washed down from the earth, and to convert them into habitations for themselves. There is a peculiar force in that word "abundantly," as it is used in the Mosaic account of the creation. The waters of the sea so teem with little living things, that they rear up bulwarks of stone, more massive than any workman's chisel ever fashioned. What are the foundations of a temple, or a ponderous pyramid, compared with the foundation of an island or a continent?

Another class of these little masons, down below, take up these salts with their tiny absorbents, and fashion them over into a form of rare beauty, or a lustrous gem, fitted to grace the fairest brow in kingly courts.

There is still another set, so small that only the microscope can reveal them, which pervade each drop and bubble of foam on the crested wave. They, too, catch up the mineral atoms, and mould them into thin, tiny shields, living their little lives in their great cradle, which

never ceases its swinging, and sinking down at last into the vast cemetery below, to help form, perhaps, new marl beds and white chalk hills for future ages. The deep sea-soundings bring up these little shells, a thousand shoals of which seem only like an atom of clay. How wonderful the power that can look after such a company, noticing each tiny animalcule, and providing for it food and shelter until its momentary life is over! Oh, the height and depth of his greatness and his loving-kindness! "Will he not much more care for you, O ye of little faith?"—*Sunday School Times.*

PAINFUL INCONSISTENCIES.

Some men talk like angels, and pray with fervor, and meditate within deep recesses, and speak to God with loving affection and words of union, and adhere to him in silent devotion, and when they go abroad are passionate as ever, peevish as a frightened fly, vexing themselves with their reflections; they are cruel in their bargains, unmerciful to their tenants, and proud as a barbarian prince! They are, for all their fine words, impatient of reproof, scornful to their neighbors, lovers of money, supreme in their own thoughts, and submit to none. All their spiritual fancy is an illusion. They are still under the power of their passions, and their sin rules them imperiously and carries them away infallibly.—*Jeremy Taylor.*

THE UNIVERSAL PEACE SOCIETY.

This Society met in Philadelphia on the 10th inst., pursuant to an adjournment which took place at Providence, Rhode Island, in Fifth month, 1866, and continued in session several days. The opening address of the President, Alfred H. Love, stated that the object of the Society was to disseminate pure and thorough peace principles. All persons, irrespective of theological or political belief, who reverently acknowledge their obligations to God and man, and who earnestly desire something better for the government of the world and the settlement of difficulties than the war power and the spirit of hate and oppression which make for war, are cordially invited to co-operate in promoting the sacred cause.

During the sessions of the Association a branch of the above named was organized in this city under the title of the Pennsylvania Peace Society.

How admirable is that religion which, while it seems to have in view only the felicity of another world, is, at the same time, the highest happiness of this.

ITEMS.

From various points along the Atlantic coast we have accounts of the damage caused by the recent great storm. Many lives have been lost, and much property destroyed. Vessels have been lost or se-

riously injured, while along the great rivers near the sea, houses and bridges have been swept away, seriously interrupting travel. The Smithsonian Institution reports that, within the twenty-four hours, ending at 9 o'clock, A. M., yesterday, the amount of rain at that point measured five inches, the greatest quantity that has fallen for many years.

The steamer Evening Star, from New York to New Orleans, foundered at sea when 180 miles east of the Tybee, with 250 passengers and fifty of the crew. The vessel went down on the morning of the 3d inst., in a hurricane. Sixteen are only known to be saved.

A new charitable institution has been established in Boston called the "Boston Station Home." It is designed for the reception of persons "who would otherwise be confined in the police stations, who are capable of reform." The man or woman, says the *Boston Traveller*, who has just succumbed to the temptations of a city life, arrested perhaps for the first time, for which they were degraded by a sentence as criminals, with the stigma of the Police Court resting on them, would be likely to enter on the road to ruin, will here be surrounded with good influences, and instead of hearing the profane and obscene language of hardened criminals, will receive encouragement to reform, and try again. The home is now ready for occupancy.

A notice has been received by the United States Lighthouse Board from the Hydrographic Office of the British Admiralty, warning mariners to avoid anchoring near the Atlantic Telegraph cable in Trinity Bay, Newfoundland.

The treaty of peace between Austria and Italy has been finally signed. The Italians agree to pay 73,000,000 francs on account of the Austrian debt for Venetia. Some settlement has also been made with respect to the rectification of the frontier of the Trent district, though perhaps not such as to remove all causes of future discussion.

The insurrectionists in Candia have issued a lengthy appeal to the President of the United States for sympathy and moral aid. This is, no doubt, meant to influence public opinion in Europe, and the latest news is to the effect that the Eastern question is now engaging the serious attention of the cabinets of the Great Powers. The *London Times* declares that there is no peaceful solution of the question, and considers war inevitable.

THE RUSSIAN-AMERICAN TELEGRAPH.—The *St. Petersburg Borsen Zeitung* says that all preparations on the mainland, and the soundings in Behring Straits, for the completion of the line of telegraph between Russia and America are nearly finished. In the course of the present year the telegraph will be constructed over a distance of three thousand five hundred miles beyond Revel, and the lines will be finished from Granley Haven to the Kwichpak, and along the valley of this river, from the mouth of the Anadyr to Fort Anadyr, from Okhotak to Gischiga, and perhaps even as far as to be joined with the Anadyr line. The cable between Granley Haven and Sseujawin Bay, a distance of about seven hundred miles, and that between Cape Sponberg and Cape Tolstoi, in the Bay of Anadyr, will, as it is said, be laid before the end of this month.

EARTHQUAKE IN FRANCE.—On the morning of the 15th of Ninth month, a severe shock of earthquake is reported to have been felt in Paris and its neighborhood, especially in the direction of Versailles, in which town persons say that when awakened by the motion they heard a cracking of the walls and floors, and the first shock was followed by several others. At Boulogne and Anteuil beds were shaken, and

glasses standing near one another on tables and shelves were heard ringing. At Crestail, Montretout, Ville d'Avray, and Haut Sevrès, similar phenomena were observed. At Tours nearly all the inhabitants were roused from sleep. At Limoges a strongly pronounced vibratory movement from east to south was felt for three seconds. Similar accounts are received from Rouen, Nantes, Angers and Angoulême. The shock lasted about six seconds, and was accompanied by a dull heavy sound. The barometer fell six millimetres.

A NEW LEAGUE IN EUROPE.—A new philanthropic movement under the title of "The League of the Public Good," has been begun in Antwerp. The *London Star* says it is due chiefly to the efforts of M. Edmond Potonié, whose papers on political economy in *La Mutridité* and other French Journals have attracted much attention lately. The new league holds its meetings in Antwerp and Paris. M. Potonié strongly urges the formation of branch committees of the league in all the great towns of England and the continent. In addition to this the present time seems opportune to the committee of the league for holding in Brussels a congress of the Friends of Peace to protest against the system of permanent armies, which has been and still is the cause of so much misery throughout the world. It was at first proposed that the Congress should meet in 1887, but after long deliberation the committee finally resolved on holding it the present year. Deputations from committees formed in France, Spain, Holland, Belgium and Switzerland, will attend, and one of the first questions discussed will be that of the formation of an International Tribunal, consisting of representatives of the leading states, for the pacific settlement of the various questions that from time to time arise among European powers.

Terrible and destructive fires occurred in Ottawa and Quebec, Canada, on the 14th inst. and on the night of that day. In Ottawa many tenement houses were burned, and a large number of families rendered homeless and destitute. In Quebec two thousand houses were destroyed, four men killed and a number wounded. A public meeting has been called for the relief of the unfortunate.

THE FREEDMEN.—General Howard recently received from the assistant commissioner of the Freedmen's Bureau for the State of Tennessee, a report of the operations of the bureau and of the condition of the freedmen in that State during the Eighth month.

In several of the counties complaints of outrages are made, and it is reported that considerable difficulty is experienced in inducing civil magistrates to take notice of the offences. In the majority of the counties, however, the civil authorities are reported as being disposed to deal justly and impartially with the freedmen.

From nearly all sections of the State the reports of crops are unfavorable, cotton yielding but about one-half a crop, and corn about the same. It is believed, however, that the crop will prove sufficient for home consumption, and that no suffering need be anticipated in the rural districts. Some anxiety is felt, however, for the large number of destitute persons crowded in the larger towns, especially in view of the decrease in the contributions of the various charitable and benevolent associations of the North, which have heretofore contributed largely towards supplying the destitute during the winter months.

Since the Memphis riots no interference has been met with from parties inimical to colored schools more serious than harmless threats, except the burning of two small and unimportant school buildings in East Tennessee by unknown parties.

SELECTIONS FROM THE WRITINGS OF JOHN BARCLAY.

(Continued from page 515.)

To L. A. B.

CLAPHAM, January 29th, 1817.

Dear Sister,—I am inclined to believe that we are somewhat similarly situated in a spiritual point of view, and therefore that a few lines from one who desires to accompany you hand in hand through this painful pilgrimage may not be unacceptable. On reading to you the very reviving and refreshing Psalm which occurred to me yesterday, I was ready to think that we could hardly take with us too much courage on our perilous journey through life. Some may look forward at the commencement of their course, with no other feelings than those of cool complacency and comfort, as if our life whilst here was somewhat like a summer's day; others may view this state of being as a vivid and glittering scene of continued enjoyment, and, like the gay and giddy butterfly, no sooner are they in existence than their sport begins. But O! the longer I am permitted to remain here, the truth of that view of life which the Scriptures present, appears more and more evident. Is it not there said to be a state of trial and of trouble? "Man is born unto trouble as the sparks fly upward." When I look as far before me, as my imperfect and short-sighted senses will enable me, I see mountains of opposition and difficulty, wastes of desolation and desertion, floods of affliction, and rivers of bit-

terness to wade through and to pass over,—the heavens above appearing black, and the horizon beyond veiled in obscurity. Whatever you, or I, or any, may think or say, be assured, that the Christian's path through this state of being to a better, is no other than that which it has always been, and will ever be; as it is said, "we must through much tribulation enter into the kingdom." O! the path for you and me, as well as for all, is not such as the flesh could wish; it is indeed a narrow path, too narrow for sense and self to walk in; there is in it but just room and that is all: it is not wide enough for us to pass pleasantly along with singing and with mirth; but may rather be compared to those narrow defiles between the snow-topped Alps, through which the traveller is directed to pass quickly, without trifling, without delay, and in silence, lest the huge masses above him, or the parts on which he stands, should in a moment consign him to destruction. If this be true, then, how very much occasion is there for us both to lay aside every weight, every thing that is likely to entangle, to ensnare, or to impede, in the race that is set before us. Is it not the case that we are less disposed to remember our providential escapes, and the many mercies that have been granted, than to murmur at the scantiness of our fare, or the bareness of our shelter. It does then appear to me especially necessary, that we should take with us all the strength and encouragement afforded. And where is this to be found, but as it were

in the very bosom of perfection, in Him who alone is the true source of every good, and the resource of every evil. Let us consider what is said of Him in Scripture, that not one sparrow in his vast creation escapes the protecting hand, and the observing eye of its Maker. We have indeed a Parent, who is nothing but love, who created us out of the purest love, who preserves our natural lives every moment, whose love alone gave us immortal souls fitted for immortal joys, and through his Son opened a way by which all might enter into the possession of eternal life and glory:—and it is expressly said, “no good thing will God withhold from them that walk uprightly.” So that there is help, and hope, and happiness for all, whatever may be their condition or situation, excepting only such as wilfully persist in refusing or abusing extended and continual mercy. J. B.

1817, *February 8th*.—The very important decision, as to the line of life which I am to pursue, has often, for this year past, given me much anxiety and inward exercise,—it has often been the cause of restless nights and anxious days, and even (I have reason to believe) to the injury of my health of body, as well as of mind. The anxiety which it excited in me seems however to have been misplaced; because I ought to have been desirous to know what was right to be done in the case, and how, and when, rather than to find out what could be contrived or thought of, by my own skill and management. There ought to have been more of that simple reliance and dependence, that trust and confidence, which is the behaviour and feeling of a babe towards its mother; how quiet, how calm it slumbers in her arms—how safe and happy it is whilst there. O! my soul, take heed, lest after having experienced marvellous deliverances,—after having been, like the Israelites of old, led in the day-time, “with a cloud, and all the night with a light of fire.”—after having been fed as with manna in the wilderness, and thy thirst quenched with water as from the rock,—take heed lest after all that has been done for thee, thou shouldst, through unwatchfulness or unbelief, in the least degree doubt the strength of that hand that upholds thee, the depth of that wisdom which is directing thee, the providence of that eye which slumbers not, the extent or continuance of that love, from which nothing but sin can disengage thee.

Whatever is to be thy lot, whatever task is assigned thee in the vineyard, wherever may be the scene of thy earthly tarrying, whether affliction surprise thee as a flood, or thy pleasures be as a full flowing fountain, “hope thou only in God,” for “from him cometh thy salvation.” Neither give place to doubt or disbelief, nor to very much anxiety or disturbance of mind, respecting what may befall thee; never fear,—

there is one that provideth for the sparrows, there is one to whom every event is in subjection,—He is good: from his hand “proceedeth not evil;” and he hath said, “there shall no evil happen to the just.” In the meantime, in all thy watchings and waitings, in all thy wants and weariness, cease not to think of his mercies, his goodness, his tender dealings with thee; be mindful of these things; hide them not, be not ashamed of them; but to show “to the generation to come, the praises of the Lord, and his strength, and his wonderful works that he hath done.” Surely, O! my soul, if thou doest thus, if thou rememberest that God has been and will be thy rock and thy redeemer,—if thou trustest in the Lord, and makest him thy hope,—thou shalt “be as a tree planted by the waters, and that spreadeth out her roots by the rivers;” thou shalt prosper in thy day, and be established.

1817, *February*.—I have been at this time, as at many others, very seriously impressed with the belief of the immediate influence of the Spirit of that great and gracious Being, who promised by the mouth of Him whom He sent into the world, that it should be, in his true disciples, a teacher of all things, and a guide into all truth. There has been felt this evening a still, small voice, whispering in the secret of my soul, and gently opening what would be required of me. It has been given me to see with an unusual degree of clearness, that there will be an important post—an honorable station for me to hold, if I am but faithful to the smaller discoveries of duty;—that the track, which for a short space I have been stepping in, though likely to lead me in the way of usefulness, is not the track appointed for me;—but that way will be opened, in due time and manner, to engage in a more extensive occupation, even a high and holy calling. I speak not here of a prospect of engaging publicly as a minister among Friends, but of religious usefulness generally. I desire not to be misunderstood, and thus to bring disgrace on the Truth, or the true lovers of it: I therefore can scarcely forbear to mention the view of my mind, as it is and has been on this matter. I have long mourned day and night, and have been grievously affected with the rapid advances which the enemy of souls is making on the earth at large, on professing Christians generally. Under this impression my soul has been weighed down more or less, for the space of above two years, with little intermission, even before I came into acquaintance with that Society, of which I was born a nominal member. My very health, I believe, has been at times injured by this constant anxiety; which was not to be erased or smothered by close application to business, or by society, or recreation. My concern has been much increased, by a review of the depth

of perdition from which I have been plucked, even as a brand from the burning: and by the deplorable effects of sin on those, with whom in my vile courses I kept company. Now I believe I may not with innocency or impunity quench or reject, or make light of such concerns and impressions as have their foundation in Truth, and the end of which is the advancement of Truth; nor am I at liberty to treat such thoughts as he did, who said, "Go thy way for this time, when I have a convenient season I will call for thee;" for as much as I know not that another opportunity may be afforded me. I therefore feel bound to encourage and cherish good impressions by all means and at all times. The oftener I have considered this important and extensive subject, the more strongly have I been induced to believe, that sacrifices will be called for at my hand; and that I shall be constrained to take up my daily cross in a peculiar manner, not only as to things which are wrong in themselves, but as to those which have a tendency to evil, and even in many things which religious people account innocent and allowable. O! when I read in the Scriptures the very excellent precepts and instructions given for us to follow; and when I examine closely the conformity of the lives of those by whom the precepts are delivered; my admiration at the coincidence in every minute particular is, as it were, swallowed up in mourning, at the declension of the present professors of the same religious duties. By such considerations and reflections, my soul is stimulated very fervently and frequently to petition Him who is the fountain of all good, that He would, in his own time and way, aid his own cause;—that He would be pleased to regard the sighs, the cries, and the tears of His exercised people—"His own elect, which cry day and night unto Him," for the advancement, extension and prosperity of everything that is good.

1817, *March*.—The subject of dress has very frequently come under my serious consideration,—it has of late been still more often and more deeply impressed on my mind; and as I have kept quiet and calm, singly desirous to know and to do whatever might be required, the matter has opened more and more clearly before my view; and some things with regard to it, which had been hitherto hid from me, whilst in a disposition to follow my own reasonings and fleshly wisdom, or concerning which I seemed then to be uncertain and undecided, now brighten up into clearness so as to make me conclude that they are indisputably right for me to adopt. And surely, I may add, no sooner is a truth clearly manifested,—a duty distinctly marked out, than it should without hesitation be obeyed. With regard to my present dress, and outward appearance, it is evident there is much to alter. That dress, from which

my forefathers have, without good reason and from improper motives departed, to that dress I must return:—that simple appearance, now become singular, which occasioned and still continues to occasion the professor of the Truth, suffering and contempt, the same must I also take up, and submit to the consequences thereof. Some may object to this, as if it were improperly "taking thought;" but I differ from them, not in the rule itself about the anxiety bestowed on clothing, but about the application of that rule. It is right, if the vain customs, folly and fashions of this world, have insinuated themselves into any branch of our daily conduct, to eradicate them, with every one of their useless innovations, whatever trouble, anxiety, or persecution it may cost us. But after we have once broken our bonds, we shall find a freedom from anxiety, trouble, or thought about our apparel, far surpassing the unconcern and forgetfulness, which seems to deaden the spiritual eye and apprehension of the slave of custom.

1817, *March 15th*.—Nothing can show us and detect within us evil, but that good principle which manifests what is evil. It is therefore the business and duty of all men, in respect to their salvation, to become acquainted with the grace and Spirit of the Lord Jesus Christ, as it is revealed and appears to all men;—to follow its leadings, to obey its teachings, to heed its reproofs. And how are we to become acquainted with—how shall we know its appearance? There is nothing of or in man that is good, but that which is of and from God,—that which is of and from His grace and Spirit. Therefore, O! reader, follow that which inclines to good in thee; and whatever gives thee inward pain and trouble of mind abstain from. The more we turn away from and deny sin through Divine grace, the more weak is its power in and over us; but the less we mortify our evil inclinations, the less power we have to resist them, when next they assail us. He that is faithful over one city, will be made ruler over many; as he that improved his talent was said in the Scriptures to be entrusted with more. If any one says how shall I know assuredly the teachings of the Holy Spirit from the suggestions of my own mind and reason, or from the insinuations of him, who sometimes puts on the resemblance of an angel of light? O! inquiring reader, know of a truth, that whatever may be the artifices and deceitful appearance of the enemy, whatever may be the reasonings, imaginations and mental workings of the natural part in thee, however specious, however excellent they may appear, yet are they easily and with certainty detected, by the humble, waiting, patient, praying soul;—yes, by every one who in sincerity and simplicity thirsts and hungers after the knowledge and performance,

of the whole will of God concerning him. These shall know the Truth, and the Truth shall make them free. These shall know Him who is Truth; these shall be led and guided unto all Truth.

1817, *March 18th*.—I think it right at this time to set down my opinions, or rather such opinions as I conceive to be sound and good, relative to the subject of business: I fear many of my near and dear friends have much mistaken my ideas on this matter; and perhaps I myself have not entirely acted up in every respect to that standard, into which the Truth leads those who follow its dictates. I believe that it is good for man to earn his livelihood by the sweat of his brow. If any one has, or ever comes to have sufficient for the support of himself or family,—(by a sufficiency, I do not mean that which will satisfy all his *desires*, nor that which may raise his family above the sphere in which they were born, neither that which will furnish his children with large capitals to enter lucrative or extensive concerns,)—but if he has wherewith to support himself and family in a moderate way of living, and to afford his children an useful education, the knowledge of some honest employ, and a little to begin with,—it is enough. I am inclined to think, that such an one should consider, whether it be not right for him to give up his business to his children, to faithful dependents, or to relations that want it; unless he be of a disposition that can hardly find occupation for his mind out of business, and in this case let him continue to employ himself in it, taking only a small share of the profits. With respect to charity, let not any in trade nicely glean their vine of the fruit with which the Lord hath so abundantly blessed them; but let them gather sufficient, and the rest let them leave for the portion of the poor. For my own part, if way open for my going into business, I believe it will be safest for me to engage in such an one as is moderately profitable, yielding regular returns, and tending to the general and substantial welfare of mankind, to the injury of none, and which will not take up much attention or anxiety. But especially I desire, that I may never sell to others any article which has an evil tendency, or which evidently and often is misapplied. With respect to this particular, I have lamented to see that Friends, who are fearful lest they should give way to the spirit of vanity, pride, and extravagance, and who on that account neither decorate their persons nor houses, nor even allow their servants to dress gaily,—that these should yet feel easy to deal to others, things which they disapprove of for themselves;—that they should not hesitate to buy and sell such articles, as they well know are inconsistent and incompatible with the pure teachings of that principle, by which they profess to be led. This matter has impressed me much. I

know that by adopting this sentiment, I show my disapprobation of the conduct of many sincere-hearted Friends, and I am also aware how few descriptions of occupations in life are entirely free from this objection. Nevertheless, I do believe that the sincere-hearted amongst us will not hesitate to give up that in their outward concerns, which they see and know to be an encouragement to evil in any shape. That these may come to see this matter, as clearly as I do at this present time, is the warm desire of my soul!

But the ground upon which I think it best for me to be not much engrossed in the things of this life, is this:—having experienced no small share of the forbearance and mercy of the Lord, having been rescued and delivered from the pit of destruction, having sincere and fervent desires for my own preservation and salvation, as well as for that of my poor fellow-creatures everywhere,—I have inclined towards the belief, that the Lord will make use of me, if I am faithful to his requirings, in the way and time, and for the purposes, which He sees best. Under this impression it is, that I believe it right for me to sit loose to this world and its anxieties, and not to be too much entangled in them; lest I should be incapacitated for performing that service which may be shown to be my duty, or unable from my situation in business to undertake it. Though I scarcely think it my place to be out of business; yet I believe that it is good for some to be entirely released from it; and also, that well disposed persons should devote a considerable portion of their talents, time and money, to visiting and relieving the poor, and advancing and promoting the good of mankind in various other ways, according to their several gifts.

(To be continued.)

TEMPER UNDER CONTROL.

It is one of the rich rewards of self-mastery, that the very occurrences which fret the temper of an irritable person, bring relief and satisfaction to him who rules his spirit. The following anecdote of Wilberforce is in point:—A friend told me that he found him once in the greatest agitation looking for a dispatch which he had mislaid—one of the royal family was waiting for it—he had delayed the search till the last moment—he seemed at last quite vexed and flurried. At this unlucky instant, a disturbance in the nursery overhead occurred. My friend, who was with him, said to himself, "Now, for once, Wilberforce's temper will give way." He had hardly thought thus, when Wilberforce turned to him and said, "What a blessing it is to have these dear children! Only think what a relief, amidst other hurries, to hear their voices and know they are well.—*The Moravian.*"

Having read with interest a memoir of our friend R. B. Thompson, compiled by her husband, we offer some portions of it to the perusal of our readers.

REBECCA B. THOMPSON, a Minister of New Garden Monthly Meeting, Pa., who deceased Third mo. 19th, 1864, aged about fifty years.

From an impression which has, from early youth, accompanied my mind, that at some proper time it would be right for me to show to others the gracious kindness and condescension of my heavenly Father towards me, a poor worm of the dust, I shall now endeavor, with as much accuracy as events and times, which can now only be recalled by memory, and the assistance of Him whose goodness and power I wish to commemorate, to pen down whatever may seem to arise as being worthy of preservation; hoping it may be useful to some into whose hands it may chance to fall, and afford renewed evidence of the unsearchable wisdom and watchful care of the great Shepherd of Israel, who sleepeth not by day, nor slumbereth by night; and who hath said, the very hairs of your heads are numbered, and that not even a sparrow shall fall to the ground without his notice; and are not ye of more value than many sparrows?

My parents, Cyrus and Rachel Barnard, (formerly Wilson,) were respectable and valuable Friends, adorning the religion they professed, by their dedication and faithful walking before its author; and were, beyond a doubt, useful instruments in His holy hand, in gathering many to righteousness. My mother, I think in her twentieth year, was enabled to confess Christ before men, by publicly opening her mouth in the assemblies of His people; and, by taking heed to the trust committed to her, became an acknowledged minister in Society. In the exercise of this gift she travelled extensively, much in the unity of her friends, both at home and abroad; and, indeed, so much was her time occupied in the discharge of this duty, and her decease having taken place when I was between six and seven years of age, it seems as though I could never retain a distinct recollection of her; but that which I have gathered from the testimony of others is truly precious, and has often proved a cordial to my feelings, and an incentive to endeavor to follow her as she was concerned to follow Christ. One of her expressions upon her deathbed, which is brought before the view of my mind at this time, was her concern for those who dwelt at ease in their "ceiled houses," and her sympathy for the rightly exercised. Having been strengthened and enabled to perform the work appointed her, she was, I doubt not, gathered to rest from her arduous labors, in the forty-second year of her age.

My father, who survived her about seven

years, possessed a meek and quiet spirit, and was generally beloved wherever he was known, by all classes of persons; for in him the worthy and respectable found a companion, the poor and distressed a sympathising friend and counsellor, and who often obtained shelter under his hospitable roof. His sickness, which was of several months' continuance, he endured with much patience. Although I was young, I was much with him, and never remember to have heard a murmur escape his lips, although his sufferings were, I believe, great at times; while the prospect of an ultimate dissolution, and leaving three young orphan children, (of whom I was the eldest,) exposed to the many snares and temptations which surround the youth, was a trial which no doubt exercised his sensitive mind, and caused him to seek for strength from the arm of power, which he had learned to lean upon, not only in seasons of affliction, but in prosperity. That it was granted him, may be inferred from the composure with which he had his two surviving children summoned to his bedside, to give them his last benediction; believing, as he expressed it, that He who numbered the hairs of our heads, and watched over the sparrows, so that not one of them fell to the ground without His notice, would watch over and care for us;—and I feel bound on this occasion to testify to the truth of the promise, believing it has been verified. For, although we were thus left exposed to many and various temptations,—almost wholly without earthly protectors to train and instruct us in that which is profitable,—yet I have no hesitation in asserting that His all-seeing eye was over us, preserving us from many evils to which we were exposed.

He was a man of considerable business, in the transaction of which he was much from home: and his family was of a character which rendered the situation of his children exposing, as regarded example; for, as might be expected in so large a family, there were those who would not be so guarded either in conduct or conversation as would have been profitable. But I remember hearing the housekeeper say, on one occasion, in speaking of my two brothers, that she had never known them to depart from the truth, or say a bad word, which she considered rather remarkable, I suppose, when she considered all the circumstances under which we were placed, and furnishes another proof that the Divine principle is implanted in each and every breast; which is capable of preserving from all evil, and which, if suffered to take root, will bring forth fruit to the honor of the great Husbandman; but if stifled in the bud by that which is evil, it will gradually become fainter and fainter, until it is wholly obscured. How necessary, therefore, for those unto whom is intrusted the great responsibility

of rearing the infantile mind, that they take these things into serious consideration,—as good or bad principles, implanted while young, commonly go with us through life. My dear father was exceedingly fond of his children, and when at home we were his companions: for the feeling was mutual, and there was nothing like fear attached to our intercourse. On the contrary, when we expected him home, after being absent either a short or long time, his arrival was hailed as a source of great joy; and who should be the first to meet him, and impart to him our little joys or sorrows, was a question that was settled only by our activity. How many mingled sensations of joy and sorrow do these reflections call forth! The last journey of any importance which he took was to the city of Washington, in order to obtain a patent for the invention of a machine which, it was considered, would be greatly useful in removing the large quantities of earth required in the construction of canals, &c., which at that time were claiming the attention of those around him; and having obtained it, he returned as far as Baltimore, where he was attacked with the disease which eventually terminated his useful life.

He was taken ill at the house of a friend and relative, where he remained some time, unable to return home. Here he was kindly attended by his friends and their physician; and word being at length received by his family, preparations were made to assist him in returning; and never while memory remains shall I forget his arrival amongst us. The carriage came to the door, and we went, as usual, to meet him; we met him in the yard,—it seems now as though I could mark the spot. He was pale, with a blanket wrapped around him, for the weather was cold. The meeting was one of mingled joy and sorrow, and I turned to hide my tears. He was spared to us until about the middle of the ensuing summer, and then passed away, leaving a void in the hearts of his children and numerous friends, which time alone could fill. An aged father in the truth bore this testimony to his worth at the time his remains were consigned to the silent grave: "This day hath a king and a great man fallen in Israel."

Having given this hasty notice of my worthy parents, whose memory is so precious to me, I will proceed.

(To be continued.)

Wherefore the matter is plain, there is such a thing as an effectual overpowering communication of the Holy Ghost for the manifesting of the love of God, of great necessity and importance to Christians, that may be had, and ought to be diligently sought after.—*John Howe, A. M.*

From the Parables.

THE VOICE OF JUDGMENT.

A rich man, called Chryses, ordered his servants to drive out a poor widow and her children from one of his houses, because she was not able to pay the annual rent. When the servants came, the woman said, "Alas! delay a little; perhaps your master will have compassion upon me; I will go and entreat him."

Now the widow went to the rich man with four of her children, for the fifth was sick, and all entreated him fervently not to drive them away.

But Chryses answered, "I cannot alter my orders, unless, indeed, you pay your debt immediately."

The mother wept bitterly, and said, "Alas! the illness of my child has cost me all my savings, and hindered me from working." The children implored him again not to turn them out of the house. But Chryses turned his back upon them, went into his summer-house, and lay down on a couch to rest, as he was wont to do. The day was very sultry; but close by the summer-house flowed a river, spreading refreshing coolness, and it was so calm that every breeze was hushed.

Now Chryses heard the reeds rustling which grew by the river side; but it sounded to him like the wailing voices of the children of the poor widow, and he began to feel disquieted on his couch. Then he listened to the rustling of the river; and it was to him as if he were lying on the shore of an immense ocean; and he threw himself about on his cushions. When he listened again, he heard at a distance the thunder of an approaching tempest; now it was to him as if he heard the voice of Judgment.

Suddenly he rose, hastened home, and ordered his servants to open the house to the poor widow. But she was gone with her children into the forest, and was nowhere to be found. In the meantime, the tempest increased, the thunder roared, and a heavy rain fell. Chryses walked to and fro in disquietude and trouble.

The following day he heard that the sick child had died in the forest, and that the mother had wandered away with the others.

Then he had no more pleasure in his garden, his summer-house, or his couch; and the cooling air of the rustling river gladdened him no longer.

Soon after Chryses fell sick; and in the heat of the fever he heard incessantly the rustling of the reeds, the murmur of the waves, and the roar of the approaching tempest. Thus he died.

No man ever did or ever will do his duty "by and by!"

INCREASE OF LUXURY.

The increase of luxury among us is very deplorable. Whenever it sets in as a habit, it may be accepted as an indication that the country is not advancing, at least. Thus came the decline and fall of the great empires of the West and East—Rome and Constantinople—thus fell France when the revolution of 1789 broke out; thus is England declining, and so, it would seem, must always happen

"When wealth accumulates and men decay."

During last week the foreign importations at New York amounted to \$4,407,005. Much of this vast amount—only a single week's receipts, and these at the close of the season—was for sheer luxuries. For example: \$52,949 for jewelry; \$66,097 for fancy goods; \$21,187 for champagne; \$2,659 for cigars; \$33,157 for toys; \$6,821 for perfumery; \$61,397 for wines, and \$19,658 for brandy. Surely our people could well dispense with these jewelry and perfumes, fancy goods and toys, champagne and brandy, cigars and wines? The founders of our great Republic—those who sealed the charter of the nation's freedom with their blood, and those whose wisdom framed the Constitution—contrived to live, very comfortably and creditably, without sending vast treasures to Europe for mere luxuries. They thought it no shame to be clad in honest homespun, as well as their wives and children, and spent their hard-earned money at home, where they made it, thereby contributing to the national wealth, and laying the foundation of the large fortunes, which their descendants, in too many instances, are now foolishly lavishing in vulgar extravagance. At the close of the most terrible, because most devastating and costly war the world ever saw, here we are, almost broken by the weight of taxation, robbed by dealers who make us pay three times as much as the actual value for food and raiment, and literally swindled by the rapacity which has about doubled all rent, and yet, because it is the fashion, forsooth, we are sending millions after millions out of the country to purchase foreign luxuries which are not necessary for the comfort and elegance of life. Over fifty thousand dollars sent to Europe, in one week, for jewelry alone! nearly seven thousand for perfumery! eighty-one thousand dollars for wine and brandy! sixty-six thousand for fancy goods, and over twenty-one thousand for champagne alone—the drinking of which indicates the lowest taste. Nay, so very childish and capricious is this generation, that the week's import of toys alone amounts to over thirty-three thousand dollars. This would appear almost incredible—but it is true.

Perhaps we may be told that people have a right to spend their money as they please. This is plausible, but untrue, for such a right

does not exist. Habits of luxury and extravagance, hurtful to those who indulge in them, are deteriorating to the community by their bad example. The simplicity of living which indicates a virtuous character, is destroyed by bad example. When a woman puts on her head an apology for a bonnet, at the cost of from ten to fifty dollars, her neighbor, with smaller means, is tempted to do the same, and, if the necessary money be not fairly procurable, will probably soon lose her scruple as to the means of getting it. Nearly all the vice which walks our streets at night has mainly arisen from that curse, the love of dress. When men and women wore plain homespun, society was purer and better than it is now. Very little champagne did the conscript Fathers of the Revolution consume. All the women of the Republic, then struggling into nationality, paid in the whole year the sixty-six thousand dollars which the demoiselles of to-day expend on the import of a single week. They had no occasion for perfumes, their personal habits being of extreme cleanliness, manufactured sweet odors being generally used only by those who need them. This country—oh! that its inhabitants would only remember the fact!—produces every article necessary for the comfort and elegance of life. Those who, thinking otherwise, send millions to foreigners for mere luxuries are the reverse of patriotic.—*Philadelphia Press.*

PRAISE.

Many people seem to imagine that God is praised only by direct ascriptions, in thought if not in word. All admiration and love of God's works are utterly wasted emotions so far as any religious value or significance is concerned. They look on the world with its manifold beauties of form and color, its magnificent landscapes, morning pomps and evening glories, its wonderful utilities and crowded lessons, as a dangerous rival of the Creator, catching the eye and calling forth the delight which should be lifted above these visible objects, and fixed in worship, on Him alone. This is a mistake. An artist who had hung a few pictures in a gallery sat down unknown to watch the effects they produced upon visitors, and catch the casual expressions of approval and censure that might drop from their lips. And the modest painter, who would have been pained by direct praise, was cheered and delighted with the notice his studies attracted, and the comments they called forth. He had put himself into his work, and all admiration of that was praise of him.

The infinite Artist is not jealous of his works, trembling lest they shall intercept the admiration which else would rise to him; but he puts so much of himself into his creations, so fills the landscapes, which he paints anew morning

after morning, with his own perfections, so saturates these ever-changing sceneries of earth and sky with his spirit, so vivifies these visible things with his life, that all delight in them, and admiration of them, and loving communion with them is unconscious praise of him. True, our homage ought not to stop with visible beauty and good; but even when it stops with these it is homage still, and unconsciously rendered to Him who enchants the world with his presence. The danger is not that we shall think too much of the marvellous beauty and magnificence of the universe, but that we shall think too little of it; not that we shall enjoy and love these visible displays of God's power and art more than we ought, but that we shall be too unmindful of and indifferent to them. For they are set, not to tempt, but to train our faculties. The visible creation is merely the veil which is dropped over an invisible face; it cannot quite conceal from the feeblest sight—a veil wrought and fringed with loveliness, dyed with splendid hues, and all aglow with supersensual glory to catch the eye, and interest the mind, and call forth the heart's wonder and homage.—*Inquirer*.

FRIENDS' INTELLIGENCER.

PHILADELPHIA, TENTH MONTH 27, 1866.

MARRIED, on Fourth-day, 17th of Tenth month, 1866, according to the order of the Society of Friends, HEULINGS LIPPINCOTT to ANNA S., daughter of Asa Lippincott, all of Cinnaminson, N. J.

—, on the 12th of Ninth month, 1866, according to the order of the religious Society of Friends, at the residence of the bride's father, JAMES GRISCOM, of Greenwich, Cumberland Co., N. J., to HANNAH BORTON, of Woodstown, Salem Co., N. J.

—, on Fourth-day, 17th of Tenth month, 1866, according to the order of the religious Society of Friends, at the residence of the bride's parents, ALFRED WOOD to MARY A. MARSHALL, all of Trenton, N. J.

DIED, on the 16th of Tenth month, 1866, at Germantown, CATHARINE, relict of Charles Keyser, in her 86th year; a member of the Monthly Meeting of Friends of Philadelphia.

—, on the 25th of Twelfth month, 1865, at Rahway, N. J., JOSEPH O. LUFEBRY, in his 80th year.

ERRATA.—In the Editorial of our last number, page 521, 7th line from the top, for "principles" read "principle." In the article on Ackworth School, 5th line from the beginning, for "denominational" read "national."

FRIENDS' EMPLOYMENT REGISTER.

With a view to aid Friends in obtaining employment, a book has been opened at the office of Friends' Intelligencer, 144 N. Seventh Street, where those desiring situations can register their names; also those in need of clerks, salesmen, &c., can record their wants.

The co-operation of Friends generally is requested, especially those engaged in business.

Deeming it very desirable that our members, especially minors, should obtain board amongst Friends, it is also proposed to keep a list of those in this city who are willing to take boarders.

H. E. N. R.

PHILADELPHIA, Tenth month, 1866.

ACKWORTH SCHOOL.

(Continued from page 523.)

It is interesting to notice in the pamphlets and other English publications concerning Ackworth, the various improvements which have been carried out since the school was first opened. Being designed, as we have seen, for the education of children whose parents were not in affluent circumstances, the course of study embraced, in the first instance, only instruction in "reading, writing and accounts, as fully as their time would permit." The haste of some parents to remove their children from school to the more active concerns of life, scarcely allowed them the opportunity for this simple programme, and often led to remonstrances from the managers, the superintendent and the teachers to parents on the misuse of their authority and want of true wisdom in relation thereto. Such appeals were not always made in vain, and a change has gradually taken place in the length of time allowed to the pursuits of school learning. But still greater alterations have been effected by the enlargement of the buildings for the comfort of the pupils, and in the dietary regulations, and in the branches of study pursued within its walls. Such innovations on the old plan of instruction for those who could not be considered as belonging to the rich of this world, has led to the remark in the present day: that it had happened well for all concerned, that the committee of Ackworth and the corps of managers, throughout their years of service, had not been restrained in their benevolent designs for the good of the pupils of the institution by laws, which, like those of the "Medes and Persians, alter not." They seem in their administration to have obeyed the instructive lesson of the founder of Quakerism—"Mind the light"—and a great amount of good has been the consequence. To quote an English writer, "For years after Ackworth became the national seminary of the Friends of England, the rod, the cane, and the ferula, in other words, the system of corporal chastisement, bore sway universally, and Ackworth participated in a general opinion of its necessity and excellence. But this system has slowly passed away, and other influences better adapted to affect the heart and conscience have succeeded."

In the construction of the building originally

ventilation* had not been considered; the ceilings of many of the apartments were too low to admit of a healthful atmospheric condition, and fever in its various forms repeatedly visited their inmates. To obviate this state of things, liberal contributions from members of the London Yearly Meeting were made when required, so that Ackworth is no longer the humble establishment which greeted its pupils on its inauguration, in 1779.

The author of the pamphlet before quoted remarks concerning their changes: "In the early days of the institution but little attention was given beyond reading, spelling, writing and accounts, and the elements of grammar to the elder children. Limited as this range of instruction may appear, it was quite in advance of the school education of the day, and the mode of its communication vastly superior; it being the aim of the managers and teachers to teach thoroughly what they professed to teach.—Throughout the history of Ackworth School, the conduct of its managers *generally* has been in advance of the masses of society on the subject of the improvement of the mind, and has been gradually becoming more and more liberal; they have been men prepared to enlarge their course of instruction as the requirements of Society made it necessary. Grammar was soon taught in the whole school; Geography was next introduced, and gradually extended to History, and a considerable amount of general information and scientific knowledge imparted. In 1825, Latin was introduced, and taught to a small class of the most advanced boys, and another class has since been added. The older children of both sexes are now taught French, and mathematics has been added, and instruction is also given in model drawing, and lectures are delivered on scientific subjects by the teachers or other persons engaged for the purpose.

"Besides the instruction given in the schools, endeavors are used to direct the minds of the children to the promotion of self-improvement, and for this end voluntary associations have been encouraged. The Association for the Improvement of the Mind was the earliest of these juvenile societies, and was established in 1821, for encouraging the art of composition by Essay writing and for other objects of mental improvement. The Association possesses a small library and an interesting cabinet of natural

curiosities. At a later period the Society of Arts commenced its labors, and has periodical exhibitions of drawing, maps, penmanship, turnery, &c. The portfolio of the society contains a large collection of drawing copies and useful practical works on the fine arts. The workshop, furnished with benches, tools and lathes, is a valuable aid in the handicraft department, and absorbs much of the spare energy of active children, which would otherwise run wild. The Horticultural Society, for cherishing the love of gardening amongst the boys, and promoting the neat cultivation of their little plots of ground, and the Botanical class, have also contributed to the same object of moral and intellectual progress; all these have received kind support and encouragement from the numberless friends of the Institution."*

Thus we find that Ackworth School, after having been in operation for nearly one hundred years, has been respectably supported and has greatly increased in usefulness. Its progress onward was retarded during its earlier years by the prejudices of portions of the masses of society, from whence arose individuals who, forgetful of the obligations of all civilized generations to the men of letters of their own or previous times, failed not to cry out, both in season and out of season, "the letter killeth," "knowledge puffeth up," &c. The weight, however, of this conservative class of religious professors never overpowered the managers and contributors to Ackworth, who seem to have kept their attention steadily fixed on the great object of Dr. Fothergill and his co-laborers—the cause of education. The movements, though slow, have been forward, and have at length brought the institution to the condition of which its statistics, which we need not now present, furnish a testimony. The influence of Ackworth School on the Friends of England can scarcely be rated too high, and we may not speak too favorably when we suggest that it has been the means, under the Divine blessing, of preserving alive the unity and the virtue which remains in the Quakerism of Great Britain. Nor should we overlook the fact that some of the great leading minds amongst the men of that country, leaving women out of the question, have been either directly or indirectly influenced by its diffusive beneficence, and have either been educated within its precincts, or have been stimulated in their efforts for bettering the condition of humanity by the meetings which take place every year in the halls of Ackworth. We

* Dr. Hale published his essays in England on ventilation as early as 1749, and accompanied them with illustrations of experiments tried with ventilators in the Savoy prison. The ravages of the jail fever were so much lessened by their use in this prison that for a time general attention was directed to the subject, but this attention did not continue long enough to produce a thorough conviction of the necessity of well-ventilated apartments wherever the preservation of health is an object.

* The patrons of Ackworth never appear to have supposed that the school would become a self-supporting seminary, but in the most friendly and liberal manner contribute every year to make up deficiencies in the income, which is derived from various sources.

select from these eminent persons only two examples; the first, Jonathan Dymond, whose fine essays on moral subjects have become classical; the second, John Bright,* now a member of Parliament, and a leader in the reforms which promise to enlarge the liberties of the British people.

The committee in charge of Ackworth meet once in six months to examine the state of the school; but the most important assembly meets only once in the year, during the fine weather of summer. On this occasion several hundred Friends from different parts of the kingdom are in attendance for the purpose of examining into the course of study pursued during the past year, consulting together on the interests of the establishment, and in directing the records in relation thereto. During this process of examination an interchange of sentiment takes place, which has been found useful in checking and softening the asperities of illiberal and denunciatory opinions, whose tendency has ever been to "divide" and "scatter," and in promoting mutual love and kindness. And amongst the capitalists who contributed to the support of the institution during its first struggles for maintenance, there were those left, who, before passing away "from works unto rewards," enjoyed the happy experience of having transmuted their gold from its earthly offers into the great treasury of the Father of mercies, which is in the minds of His children.

All the officers and teachers of Ackworth have each a fixed salary, which is paid at stated periods. For some years after the commencement of the school the office of Superintendent and Treasurer was discharged gratuitously by one individual; after his death it was thought advisable to transfer the Treasury department to a Friend in London, and make the Superintendent a salaried officer. This arrangement has resulted favorably, and is likely to be continued, as it very rarely happens that a man whose powers render him fit for so responsible a position has sufficient money at his disposal to enable him to live comfortably, and look forward with complacency toward the evening of his days without remuneration for his services.

An adjourned meeting of the Ackworth General Meeting is held every year in London, (at the season of the London Yearly Meeting), which enters with minuteness into the details of the income and expenditure of the establishment. The reader who desires further information on the subject is referred to the annual re-

ports published in the London *Friend* and in the *British Friend*.

The Flounders Institute, a valuable auxiliary to the cause of learning with the Friends of Great Britain, has been built up within half a mile of Ackworth, in 1847, and opened to pupils in 1848. It was erected after the design of Benjamin Flounders, of Yarm, who appropriated £40,000 in the three per cent. stocks for the purpose. The course of instruction, in accordance with the deed of trust, includes the ancient and modern languages, mathematics, and natural philosophy, in all its parts. To these have been added some subjects intended to meet the more recent requirements of education, and others bearing upon what more immediately concern the Society of Friends. The required number of students is twelve, but fourteen have, during some years, been admitted. The Flounders Institute has greatly improved the standard of education with the teachers of the Friends of Great Britain.

THE ENGLISH FEMALE MEDICAL SOCIETY.

Emily Faithful & Co. have published in London, in pamphlet form, a full report of the proceedings of the annual meeting in aid of the Female Medical Society, held in June last, under the presidency of the Earl of Shaftesbury. The following is an extract from the report:

"The progress of the society's rudimentary college has been thoroughly satisfactory; the number of students has increased to twenty; the lectureships have hitherto proved almost self-supporting; and the entries of students for the next session are likely to exceed in number those of either of the former years. The reports from Dr. Murphy, Dr. Edmunds, and the lay secretary, as to the regularity of attendance, general intelligence, and good conduct of the students are so unexceptionable as to amount only to a repetition of those which were printed at length last year. But several of those students who intend to support themselves as accoucheuses have now completed the prescribed course of practical as well as theoretical and general scientific instruction, and having already commenced practice, a considerable number of lady patients have been referred to their care from the office. No sort of casualty or misfortune has occurred in any case, and a number of letters are at hand for perusal, which have since been received from these patients, and which, without exception, convey the warmest expressions of thanks to the society and of satisfaction with the attendance of the ladies. One of the students to whom a clergyman's wife was referred in this way, has since the attendance been offered a handsome douceur in order to induce her to remove into the lady's neighborhood. There is no doubt whatever that this profession will prove a comparatively

* John Bright occasionally speaks to the Friends of London Yearly Meeting in their meetings for business, a privilege which his birthright membership with the Society confers on him; and there, as elsewhere, his integrity and candor are alike conspicuous.

easy and lucrative employment for intelligent, gentle-handed and properly educated women, and one to which the public will extend a rapidly-increasing patronage."—*N. Y. Ev. Post.*

WEIGHING THE BABY.

"How many pounds does the baby weigh—
Baby who came but a month ago?
How many pounds from the crowning curl
To the rosy point of the restless toe?"
Grandfather ties the kerchief's knot,
Tenderly guides the swinging weight,
And carefully over his glasses peers
To read the record, "Only eight."
Softly the echo goes around;
The father laughs at the tiny girl;
The fair young mother sings the words,
While the grandmother smooths the golden curl.
And, stooping above the precious thing,
Nestles a kiss within a prayer,
Murmuring softly, "Little one,
Grandfather did not weigh you fair."
Nobody weighed the baby's smile,
Or the love that came with the helpless one;
Nobody weighed the threads of care
From which a woman's life is spun.
No index tells the mighty worth
Of a little baby's quiet breath—
A soft, unceasing metronome,
Patient and faithful unto death.
Nobody weighed the baby's soul,
For here on earth no weights there be
That could avail; God only knows
Its value in eternity.
Only eight pounds to hold a soul
That seeks no angel's silver wing,
But shrines it in this human guise,
Within so fair and small a thing.
Oh, mother, laugh thy merry note;
Be gay and glad, but don't forget
From baby's eyes looks out a soul
That claims a home in Eden yet.

THE GREAT WORSHIP.

BY JOHN G. WHITTIER.

The harp at nature's advent strung,
Has never ceased to play;
The stars the song of morning sung,
Has never died away.
And prayer is made, and praise is given,
By all things near and far;
The ocean looketh up to heaven,
And mirrors every star.
Its waves are kneeling on the strand,
As kneels the human knee,
Their white locks bowing to the sand,
The priesthood of the sea.
They pour their glittering treasures forth,
Their gifts of pearl they bring,
And all the listening hills of earth
Take up the song they sing.
The green earth sends her incense up
From many a mountain shrine;
From folded leaf and dewy cup
She pours her sacred wine.
The mists above the morning rills
Rise white as wings of prayer;
The altar-curtains of the hills
Are sunset's purple air.

The winds with hymns of praise are loud,
Or low with sobs of pain;
The thunder organs of the cloud,
The dropping tears of rain.

With drooping head and branches crossed,
The twilight forest grieves,
Or speaks with tongues of Pentecost
From all its sunlit leaves.

The blue sky is the temple's arch,
Its transept, earth and air;
The music of its starry march
The chorus of its prayer.

So nature keeps the reverent frame
With which her years began;
And all her signs and voices shame
The prayerless heart of man.

For the Children.

MORE ABOUT THE TOOLS OF ANIMALS.

BY WORTHINGTON HOOKER.

Insects have various tools. There is a fly called the saw fly, because it really has a saw. It is a very nice one—much nicer than any saw that man ever made. The fly uses the saw to make a place to put its eggs, where they will be secure, and, what is very curious, it has a sort of glue with which it fastens the eggs in their place.

There are some insects that have cutting instruments, which will cut as well as you can with scissors, if not better. There is a bee that is remarkable in this respect. It has also a boring tool. Its nest is commonly in old, half-decayed wood. It clears out a space in it with its boring instrument; it then sets itself to work with its cutting instrument, to cut out pieces of leaves to line the nest, and make the cells in it. These are cut of different shapes, as they are needed. Great pains is taken by the bees in getting each piece of leaf of the right shape to fit well, and the pieces are very nicely fastened together.

There are some animals that have machinery for making things. All the silk that is used in the world is made by worms. The silkworm has a regular set of machinery for spinning silk. It winds it up as it spins it. Then man unwinds it, and makes a great variety of beautiful fabrics with this silk thread.

The spinning machinery of the spider is much finer than that of the silk worm. The thread which he spins is made up of a multitude of threads, each one of these coming out from an exceedingly small hole in the spider's body. You know that there is a large number of fibres or threads in a rope. So it is with the spider's rope; for his thread that you see, small as it is, is a rope to him, and you may sometimes see him swinging upon it. Sometimes, too, he lets himself down from some height, spinning the rope that holds him as he goes down. When he does this, his spinning machine must work very briskly.

The wasp has a paper factory in him. He

makes his paper out of fibres of wood, which he picks off, I suppose, with his teeth, and gathers them into a bundle. He makes this into a soft pulp in some way; then, from this, he makes the paper, with which he builds his nest. It is, you know, very much like the common brown paper that man makes. The wasps work in companies, and though each one can make but little paper, they altogether make their nest in a very little time. The pulp which they make their paper from is very much like the pulp from which man makes paper, and which you may see at any time in the large tubs or vats of a paper factory. This pulp is generally made from rags ground up fine; but lately, wood has been much used. Perhaps the hint was taken from the wasps, who were the earliest paper-makers in the world.

Animals cannot use knives and forks as we do, in dividing up their food. They, therefore, have instruments given them, which do this very well. Those long, sharp teeth which dogs, cats, tigers, &c., have, answer to tear to pieces the flesh they eat, as thoroughly as we can cut it up. We do not need such teeth, because with instruments contrived by man's mind, for his hands to use, we cut up the food sufficiently.

I have told you that the elephant can draw up water into his trunk. His trunk is, therefore, like the tube with which we suck up water, or any liquid; and it is like a pump, too, for water is raised in a pump just as it is in a tube, when we suck through it. It is with a pump something like an elephant's that many insects get the honey from the flowers. This pump is called a proboscis. It is with such an instrument that the musquito sucks up your blood. At the end of his pump he has something with which he pierces a hole in your skin, and then he pumps your blood up into his stomach. In some instances the proboscis is very long. It is hollow, and with it the insect sucks up the honey from very deep flowers, without being obliged to go to the bottom of them.

The proboscis is commonly coiled up when it is not in use.

The tongue of the humming-bird is really a proboscis, and a very curious one it is, too. It has two tubes alongside of each other, like the two barrels of a double-barreled gun. At the tip of the tongue these tubes are a little separated, and their ends are shaped like spoons. The honey is spooned up, as we may say, and then it is drawn into the mouth through the long tubes of the tongue. But the bird uses its tongue in another way. It catches insects with it, for it lives on these as well as on honey. It does it in this way: the two spoons grasp the insect like a pair of tongs, and the tongue, bending, puts it into the bird's

mouth. The tongue then of the humming-bird is not merely one instrument, but it contains several instruments together—two pumps, two spoons, and a pair of tongs.

The tongue of a cat is a singular instrument. It is her curry-comb. For this purpose it is rough, as you will find if you feel it. When she cleans herself so industriously, she gets off the dirt, and smooths her coat just as the hostler cleans and smooths the horse's coat with the curry-comb. Her head she cannot get at with her tongue, so she has to make her fore-paws answer the purpose instead.

There are some birds that live on fishes. They have instruments, therefore, purposely for catching them. The heron is a bird of this kind. He manages in this way: when the light is dim, either at dawn or when there is moonlight, it is his time for going a fishing. He will stand in shallow water, so stiff and so still, that he might be mistaken for a stump of a tree, or something else. He looks steadily and patiently down into the water, and the moment a fish comes along, down goes his sharp bill, and off he flies to his nest with his prey. The plumes of this singular bird are beautiful.

There is one bird that lives chiefly on oysters. It has a bill, therefore, with which it can open an oyster-shell as skilfully as an oyster-man can with his knife.

Some birds can sew very well with their beaks, and feet. There is one bird that sews so well that it is called the tailor-bird. It hides its nest in leaves which it sews together. It does this with thread which it makes itself. It gets cotton from the cotton plant, and with its long, delicate bill, and little feet, spins it into a thread. It then pierces the holes through the leaves with its bill, and, passing the thread through the holes, sews them together. I believe that in getting the thread through the holes it uses both its bill and its feet.

There is a fish that has a singular instrument. It is a squirt-gun for shooting insects. It can shoot them not only when they are still, but when they are flying. It watches them as they are flying over the water, and hits one of them, whenever it can get a chance, with a fine stream of water from its little gun. The insect, stunned with the blow, falls into the water, and the fish eats it.

I could give you a great many more examples of the different tools that we find in animals, but these are sufficient. You can observe other examples yourselves, as you look at different animals.

The disbursements of frequent talking, without the incomes of a prayerful silence, generally result, and very rapidly, too, in the evaporation and loss of the inward life.—*Upkam*.

From Chambers' Journal.

A TREE OF ALL WORK.

If trees took rank according to usefulness, the bamboo might fairly claim the crown of the vegetable kingdom. Tried by the test of utility to man, there is no plant the earth produces worthy to enter into competition with it. The Chinese say, and truly say, the bamboo is all profit. Seasoned with chillies, its tender young shoots make a favorite sambal of the Malay; sliced and boiled, they are served at the tables of the wealthiest Japanese; and when salted, dried, and prepared in vinegar, they make a pickle ever welcome to the Siamese gourmand. As the plant grows older, a fluid is secreted in its hollow joints which affords a refreshing beverage, and if it is allowed to remain untapped, the valuable medicine tabascheer—said to resist alike fire and acids—is produced. The leaves of the bamboo are reckoned a sovereign remedy for sore throat, as the bark is all-powerful against fever, and other useful medicaments are obtained from the buds and the roots.

Entire houses are constructed out of the bamboo, the stouter parts of the tree supplying ready-turned pillars, while the slenderer joints are combined together to form the walls. Split into laths, and beaten out, it makes an excellent flooring; and for the roof, the canes are arranged side by side across the building, with their concave sides uppermost to catch the rain; the edges of these are covered with another row, with the convex side outwards, and thus the roof is rendered perfectly water-tight. Should the householder be lucky enough to own the land surrounding his domicile, a bamboo palisade forms his best protection against intruders, whether quadruped or biped. Does he want to bring the waters of the neighboring river into his service for domestic purposes—in the hollow stems of the bamboo he has pipes ready to his hand; pipes easily converted into gutters and spouts, to get rid of the water he does not want. Then, inside this bamboo house will be found chairs to sit upon, benches to recline upon, mattresses to lie upon, pillows to rest the head upon, and mats to put the feet upon, all and each of the same material as the tube through which their owner inhales the fragrant weed at home, and the cane he leans upon, as he takes his walks abroad, with a bamboo basket on his arm, a bamboo hat upon his head, and possibly bamboo splints at his finger-ends to protect his long uncut nails.

The tea-crops of the inland districts of China find their way to the seaports upon the shoulders of the coolies. Two strong bamboo canes are fastened to the sides of the load, their ends resting on the shoulders of the carriers. When the load is too much for four men, room is made for any additional number of bearers, by

joining shorter bamboos to a cross-piece fixed to the ends of the longer canes. The palanquins of the mandarins are borne through the streets in a similar manner, just as sedan-chairs used to be carried through London thoroughfares in the days of our great-grandfathers. The bamboo is applied to transit purposes in many other ways. "The cary wagons light" of Milton are still used in Cathay; the Dyak propels his light canoe by means of the bamboo; the river rafts of the Chinese are made of nothing else; and give a Hindoo boatbuilder three pennyworth of bamboo, and he will turn out a four ton vessel, with mast and sails complete.

The Japanese separate the heads of their corn from the stalks by beating it over a bamboo grating, which, having a sharp edge, cuts off the grain at every stroke, leaving them to fall through the grating to the ground; or after being thrashed with a bamboo flail, the grain is sifted through a bamboo sieve.

When about to erect a house, the first proceeding on the part of a Chinese builder is the raising of a strong but light scaffolding of bamboo, and inside this the house is built up. When a building is to be pulled down, the bamboo is again called into requisition; the roof having been taken off, each of the end-walls is attacked by a party of coolies, who fix their bamboos as high up the wall as possible, and push steadily together till it topples over with a loud crash and a smothering dust. This process is often performed at a fire in order to stay the progress of the destroyer. The Cantonese possess a fire engine, but for all that, still press the bamboo into service, the hose being held over the people's heads on long bamboos, and by their agency carried quickly to any desired spot. The watch-towers, too, from whence the police discern the whereabouts of a fire as soon as it breaks out, are merely skeletons of bamboo. Lieutenant-Colonel Fisher bears witness to the ingenuity of the Chinese bamboo workers, and the strength of their work when done. When a verandah was required for an English mess-room, it was some time before the bamboo worker could be made to comprehend exactly what was wanted. At last he was told to make "one piecey makey walkey topside, makey look see;" and the verandah soon proved that this extraordinary specimen of the English language was intelligible enough to him.

The Chinese man of letters writes with a bamboo pen upon paper of the same material, the musician extracts sounds sweet to Chinese ears on bamboo instruments, and the artist is indebted to the same source for his brushes.

Besides serving so many uses in commerce, industry and art, the bamboo performs its part in warlike operations, supplying lances, bows, and those wonderful grotesque shields with which the braves of the Celestial Empire seek

to frighten their foes. The earliest attempt in the way of cannon on the part of the Chinese was a weapon of bamboo. In the war of '58, one of our Sepoy regiments was startled by a tremendous shower of rockets falling into their encampment at night, and killing a commissariat sheep. Next morning, a party was despatched across the creek in search of the battery, and succeeded in capturing a number of novel machines, consisting of stout bamboos lashed together, which had evidently been used for the discharge of the rockets that had caused such commotion among the guardians of the government stores. The bamboo did good service on our side in the hands of the coolies, acting as a land transport corps, and earned them the popular designation of the "Bamboo Rifles;" while, on the other hand, its employment in the shape of stakes driven deep in the mud before the forts of Taku, cost England the lives of many brave men, and entailed an expensive campaign to obliterate the memory of an untimely disaster.

John Chinaman would be ungrateful if he did not love and admire his tree of all work; but he has good reason, also, to look upon it with awe and trembling. The bamboo is the be all and end all of the Chinese code of justice, and as such may fairly be said to rule the most populous country in the world. Chinese law recognizes two degrees of punishment; in the first and least severe, the number of blows inflicted on an offender varies from four to twenty, that being considered discipline sufficient to make a transgressor entertain a sense of shame for his past behaviour, and render him cautious as to his future conduct. The second class of punishment applies to offences of a serious nature, and the law allows as many as a hundred blows to be awarded, but in practice forty is the limit. Two different instruments are used, one being a bamboo five feet eight inches long, two inches and three-quarters broad, weighing nearly three pounds; the other of smaller dimensions, falling short of two pounds in weight. Women are not exempt from the bamboo discipline, but, by a stretch of gallantry, are permitted to wear a single upper garment during the infliction of the punishment, except in cases of matrimonial infidelity, when they must content themselves with the protection afforded by their lower garments. In China, as elsewhere, the law is supposed to be no respecter of persons, and in theory all ranks are subject to the bamboo; but the fact that the stripes awarded by the judge are commutable into a proportionable money fine, makes all possible difference in practice. The criminal's experience of the bamboo's adaptability does not stop here; if he is obstinate in asserting his innocence, bamboo stakes supply the officials with the means of inflicting no end of ingenious tor-

tures; and when his death is deemed necessary, a bamboo rope vindicates the majesty of the law.

There are several species of bamboo, but according to Mr. Fortune the best and most beautiful is the Mow-chok, which is largely cultivated in the central and eastern provinces of China. The stems of this handsome tree are straight, smooth and clear, attaining a height of from sixty to eighty feet in a very short space of time, for it grows at the rate of two or two and a half feet in twenty-four hours. This useful giant has been introduced into India, and may, in time, supersede the inferior descriptions of bamboo, and give the Hindoo one more reason to venerate the name of Robert Fortune.

From the "Spectator."

THE AWAKENING OF THE CABLE.

There can be but few who have read without a certain thrill of fanciful wonder, or almost awe, of the strange inarticulate messages which have come at intervals, during the whole year of the lost Atlantic cable's immersion, from the depths of the ocean three miles down, to the electricians watching the end of the clue which was safely attached to the Irish shore. "Night and day," says the *Times*, "for a whole year an electrician has always been on duty watching the tiny ray of light through which signals are given, and twice every day the whole length of wire—1,240 miles—has been tested for conductivity and insulation. . . . The object of observing the ray of light was of course not any expectation of a message, but simply to keep an accurate record of the condition of the wire. Sometimes indeed wild incoherent messages from the deep did come, but these were merely the results of magnetic storms and earth currents, which deflected the galvanometer rapidly and *spelt the most extraordinary words, and sometimes even sentences of nonsense*, upon the graduated scale before the mirror. Suddenly, last Saturday morning, at a quarter to six o'clock, while the light was being watched by Mr. May, he observed a peculiar indication about it which showed at once to his experienced eye that a message was at hand. In a few minutes afterwards the unsteady flickering was changed to coherency, if we may use such a term, and at once the cable began to speak,"—to transmit, that is, at regular intervals, the appointed signals which indicate human purpose and method at the other end, instead of the hurried signs, broken speech, and inarticulate cries of the still illiterate Atlantic. When at length the message did come, the "insulation" and "conducting power" of the cable, so long lost at the bottom of the ocean, were found to be even more perfect than those of the new cable just laid down. The messages

came through it more distinctly and more rapidly than through the line of communication which has just been successfully completed. After the long interval in which it had brought us nothing but the moody and often delirious mutterings of the sea stammering over its alphabet in vain, the words "Canning to Glass" must have seemed like the first rational word uttered by a high-fever patient when the ravings have ceased and his consciousness returns. The same telegraphic wire which, when played upon only by the general galvanic currents of the earth, uttered unmeaning and tumultuous sounds,—the mere stormy reverie of the elements,—became precise, business like, informing, so soon as the lost end of it was picked up by a creature of the same order as he who managed the shore end.

It is not easy to hear of these things without being struck by the curious analogy between these artificial and artistic processes and those natural processes from which they are in some sense imitated. Scientific men assert that the nerves of the human body are to all intents and purposes a telegraphic apparatus, in which, however, the nervous agent, or equivalent of electricity, travels along the nervous cable indefinitely more slowly than electricity along the wire, more slowly than sound, more slowly than the motion of a race-horse. Could we imagine the cable a living nerve instead of a wire, and Ireland a ganglion communicating by means of this nerve with the other extremity, then, instead of receiving a thrill from the opposite end in far less than a second, the message would travel quite as slowly as if sent by express train from the same distance. The speed of the nervous agency,—so say the men of science,—is so utterly distanced by the speed of electricity that were the earth, as some of the ancient philosophers believed, a sort of vast globular animal, with a corporeal and nervous organisation of its own *not more perfect than that of man*, then, any one part of her body would be indefinitely longer in receiving notice through her nervous system of what is happening to other parts of her body than even the carrier pigeon would be in bearing the news; and hence the invention of the electric telegraph would in such a case actually bring intelligence to any one organic centre of the earth *weeks beforehand* of the sympathetic pain that it would feel on the arrival of the nervous message weeks later, from any specific injury already affecting some other centre of its nervous force. If, then, the human nerves be carriers of information which are indefinitely more tardy, and therefore of course liable to indefinitely more perturbations by the way, than the magnetic cable beneath the Atlantic, may we not fairly suppose that those chains of intellectual, moral, and spiritual association, for

the complete command of which, in our present state, we are certainly more or less dependent on nervous agency, and which assuredly are not traversed by the mind itself from one end to the other without an appreciable and not inconsiderable lapse of time, are liable not only to the same class of perturbations as the magnetic cable itself, but even to more and greater? Owing to the much tardier rate at which thought travels down the long strands of association, and the far more complicated network of memories by which it is crossed and re-crossed, not only in virtue of its original workmanship, but of the futile efforts with which we, like the Atlantic cable squadron, often attempt to grapple and buoy them, there seems to us to be far more danger both of imperfect insulation and of interrupted coherence in the use of these delicate conducting media of thought and feeling, than of the injuries to which the Atlantic cable is itself liable. It is true indeed that we can scarcely suppose the spiritual chain of memory to be measurable by any corresponding and co-extensive length of nerve, so that it is scarcely fair to infer from the slow transmission of perception along the nerves, the equally slow transmission of association and memory between past and present or present and past. No nervous fibre stretches away into our past, like the Atlantic cable, from the American to the European shores, and it would be absurd to assert that in recalling our own past history from year to year, the number and succession of our thoughts could be measured by the length of nervous cable down which the supposed nervous fluid is transmitted from our earliest memory to our latest. Still, as there is a certain proportion between the rapidity of our various mental faculties, anything which gives us the rate at which we grow into full and conscious *perception*, affords some approximate measure of the general speed of our mental processes.

(To be continued.)

ITEMS.

As there appears to be a conflict of opinion as to whether the volume of paper money afloat in the United States is increasing or not, we give the comparative figures from the latest authentic data:

	June 1, 1866.	Sept. 1, 1866.
Legal tenders,	\$564,140,458	\$555,115,732
National bank-notes,	278,905,675	289,915,828
Fractional currency,	27,334,965	26,483,998

Total, \$970,381,098 \$371,515,559

It will be seen from these figures that while the legal-tender currency has been reduced \$9,024,726, and the fractional currency \$850,967, during the last three months, there has been an increase of \$11,010,154 in National Bank Notes. The amount of National Bank Notes to be issued, before the \$300,000,000 prescribed by law shall be reached, is now about \$10,000,000, after which we shall witness a gradual reduction in the volume of paper money, a consummation devoutly to be wished, as the de-

crease in volume will be accompanied by a corresponding increase in value of the circulating medium. The reduction in legal tenders since June 1st has been mainly in the compound-interest notes, which, three months ago, stood at \$182,012,140, and are now down to \$155,512,140. The plain green-back circulation on June 1st, was \$402,128,618, and September 1st, \$399,603,592. Fully one-sixth of the entire legal-tender circulation lies in the vaults of the banks of this city, which at present hold the heaviest reserve in this legal-tender form ever before controlled by the local banks.

A year ago the legal-tender circulation of Treasury was up to \$684,138,559. It has since been reduced nearly \$136,000,000, or at the rate of close on eleven millions a month. The National Bank-note circulation has been increased, during the year ending on the 1st of September, from \$177,487,220 to \$289,915,829, or absolutely, \$112,428,608, which increase is at the rate of not less than nine and a half millions a month, showing conclusively that, during the past year, the legal-tender circulation has been diminished far more rapidly than the volume of National Bank-notes has been augmented. A very considerable portion of the issue of National Bank currency through the year has superseded the circulation of State Banks, converted into National Banks, or wound up altogether, so that it is safe to assume that the volume of paper money of all kinds in circulation has been materially lessened since Sept. 1, 1865. The compound interest legal-tender notes have ceased to circulate from hand to hand, as money, and have now no other function to perform in our financial system, except that they are held as a reserve by the National Banks. On the whole, we think we have reached the maximum amount of paper money circulation.—*Shipping and Commercial.*

THE FREEDMEN.—In Alabama there are seven schools taught by as many Southern whites, three by seven colored men, and two by ex-Union soldiers, with a daily attendance of 729.

The State Convention of colored people that met at Raleigh, N. C., on the 2d inst., adopted a constitution for a freedmen's educational association, of which the object shall be "to aid in the establishment of schools, from which none shall be excluded on account of color or poverty, and to encourage unsectarian education in this State, especially among the freedmen." Among the resolutions was one making it the duty of every member, on his return home, to assist in forming an equal rights league; others, advising the formation of joint-stock companies and mutual patronage among colored people; thanking the Legislature for its courtesy in receiving their late petition, and expressing faith in that body; pledging the members to raise \$2,500 for a school house, to serve also for public and State purposes. An address was issued to all the citizens of the State, without regard to color, setting forth the claims of the blacks to the right of suffrage.

The officers of the Freedmen's Bureau in Florida send a report similar to that forwarded by General Sheridan from Louisiana, that "the homestead law is very obnoxious to many of the planters, and threats are made to intimidate negroes from making settlements under its provisions."

There are constant indications of a growing disposition in the South to diversify their industry, and to cultivate resources and embark in pursuits which have hitherto been neglected. In North Carolina dried berries valued at several millions of dollars have been collected and shipped North this season. In Fredericksburg, Va., a considerable quantity of

sumac has been purchased from the inhabitants of the surrounding regions. In Georgia, seventy-two mills for the manufacture of woollen and cotton goods are now in process of erection, and a company has been organized for the erection of extensive iron works in Dade county. A large establishment for the manufacture of mixed cotton and woollen goods is about to be erected at Raleigh, N. C. A woollen factory is about to be erected at Leesburg, Va. An organization has recently been formed in North Carolina for the purpose of encouraging the growth of grapes and the manufacture of wine. Agricultural fairs are becoming much more numerous than in former times. At New Orleans the Mechanic and Agricultural Association will hold a grand exhibition in November, at which liberal premiums will be given to the successful competitors in many varied branches of agriculture, horticulture, rural economy and mechanic arts.

The great Southern staples were never more important and valuable than at present, and the interests of the Southern people will, in the end, be promoted by the policy they are evidently disposed to adopt, of increasing the diversity of their pursuits.—*Phila. Press.*

SELECTIONS FROM THE WRITINGS OF JOHN BARCLAY.

(Continued from page 552.)

1817, April 4th.—Last Tuesday week, the 25th of March, was our Quarterly Meeting, at which precious opportunity I was much favored to feel refreshment and instruction; the business of the meeting was conducted pretty much to satisfaction, and the conclusion of the last sitting, I have reason to remember. During the interval of ten days which has since elapsed, I have frequently had on my mind an inclination to record the awful and weighty posture, into which my soul was brought on that occasion, by the merciful visitation of a tender Father. Towards the latter part of the concluding sitting, after the business of the meeting was transacted, and a suitable pause had ensued, a minister got up with this most impressive language of the apostle,—“Other foundation can no man lay, than that is laid, which is Jesus Christ. Now, if any man build upon this foundation, gold, silver, precious stones, wood, hay, stubble,—every man’s work shall be made manifest; for, the day shall declare it, because it shall be revealed by fire; and the fire shall try every man’s work, of what sort it is. If any man’s work abide which he hath built thereupon, he shall receive a reward.” I believe nothing was added to this by the Friend himself, though R. Phillips carried forward the subject a little with much force and vigor. After this another minister rose, and, in a solemn

and earnest manner, applied the foregoing to the youth then present; he urged them in a powerful manner to look to their foundation, and to examine what hope they were laying up against the time to come; he reminded them how soon and how suddenly, even the healthy, and the strong, were cut desired them to recollect that the Lord an early sacrifice, a sacrifice of time, talents, and treasure,—a sacrifice of ever and he recommended to those who were to give up all and follow their crucified fully to ascertain that what they were offer was required and called for at their and in all their undertakings and thoroughly to try “the fleece.” I cannot what I felt upon this awful occasion, as the remarks came from one to whom I am not known, nor do I even know him by sight. I could scarcely speak to any one after the meeting broke up; but walked home in fear and trembling, under a renewed impression and belief that the Lord is yet as mindful of his poor frail creature as ever he has been. As I was returning to Clapham in deep retirement of spirit, and in silent waiting before Him, “who giveth us all things richly to enjoy,” these texts of Scripture were revived in my recollection, and sealed very firmly the instructive communications which I had heard:—“Let every man prove his own work, and then shall he have rejoicing in himself, and not in another.”—“Be not deceived, God is not

mocked: for, whatsoever a man soweth, that shall he also reap. For, he that soweth to his flesh, shall of the flesh reap corruption: but he that soweth to the Spirit shall of the Spirit reap life everlasting." I had also occasion to remember that he it was who came to Christ, heard his sayings and did them, that was likened to a man who built upon a rock.

[It appears that about this period the author felt it to be his duty to address his late school-master; having, when under his charge, been guilty of much irregular and disreputable conduct. The reader may judge of his feelings on this occasion, by the following extracts from his letter to this person, after having left the school about four years.]

To B. H. M.

10th of Fourth month, 1817.

Esteemed Friend:—Whilst taking up my pen to address thee, my mind is deeply affected by the vivid occurrence of past events, with all the crowd of feelings which spring up on this occasion. The mass of sin and folly through which I walked when under thy notice,—the exhortations, the reproofs, the forbearance, and the warnings which I received and despised,—together with all the flood of remorse and repentance, which has since intervened; and, above all, the clear conviction with which I am to this day favored, that it was nothing short of "the mighty hand and the outstretched arm," which brought about my deliverance;—these are a few, and but a few of the emotions that throng me, whilst attempting to relieve myself of duty which has long been due.

object in my view by this humiliation to be to procure from thee, numerous injuries, which, in time thou offered thee, such a free and as as I am encouraged to believe, since received from a still more w, who is in heaven. Whatever opposition thou mayst entertain to in if likely to be at all different ch I have every reason to expect; is feeling of gratitude and respect,

with which I remember thy wholesome discipline and indulgent attention to me when under thy protection, that it seems, as though I could receive with equal regard the severest or the mildest reply, which thou mayst see best to make. Amidst all the discouragements, which, in many ways, attend the honorable and truly important post in which thou art placed, from the ingratitude, the perverseness, the corrupt and hardened insensibility to what is good, so often prevalent in early youth; still is there much cause to believe that many more of this class are arrested in their perilous career; than return to acknowledge it, to such as have had the charge of them; and it is probable that even some of whom after much solicitude and

unwearied endeavors on thy part, thou hast given up almost every hope, shall yet live to fill up their various stations in society with satisfaction and with credit. When I look back upon my own past conduct, and take in all the various aggravating circumstances attending or connected with it, many of which thou art not acquainted with, I find myself able to express very little of what I feel, not only towards thyself, but towards all whom I have in any manner injured, whether more or less remotely.

With feelings of esteem for thyself and family,

Believe me to be thy friend, J. B.

To a Friend.

CLAPHAM, 22d of Fourth month, 1817.

My Dear —:—In the season of sore affliction, which has at this time overtaken me, next to that consolation which springs from Him who is the source of all good, I know of nothing that affords such refreshment as the sympathy of dear and valued friends. And that I have thy tender sympathy and solicitude at this time of trial and of tears, I feel too well assured to doubt. How insignificant, how comparatively light did the adoption of any alteration in appearance and behaviour seem to my view, whilst they were looked upon at a distance; how little did I suppose that such trembling and distress would have been occasioned by so trifling a circumstance as the discontinuance of some paltry practices and habits, which were clearly seen to have had their origin in evil, or tended to it; how far was I from believing that when the time should come for my standing forth, and showing under whose banner I had enlisted, in whose chosen regiment I served, there could be any other feeling in my heart but joy, that I was counted worthy to suffer whatever might be the consequence. Well, dear —, we have that which is better than words, by and through which we can communicate; why then need I add more. It may, however, relieve thee a little of what I know thou feels for me, to be assured that in every respect as to this important matter, whether I look at the time, the mode, or extent of this act of dedication, I have nothing for which to reprove myself as yet,—nothing that I could *really* and *truly* wish to be otherwise than it is; and that I have abundant cause for thankfulness and encouragement.

Believe me, thy affectionate friend,

J. B.

[In a letter to a Friend, dated about this time, he writes:—]

We have truly witnessed the "mighty hand," and the "outstretched arm:" then let neither of us be using in effect any other language than — "the will of the Lord be done." Let us beware, lest we be in any wise counteracting the intention of Him who intends better for us, far

better than we can possibly provide for ourselves. I believe there is a work assigned to each of us; that whilst to one is given a talent of one kind wherewith to occupy, to another may be handed one of a very different description; and as long as we are in our allotted stations, a blessing attaches to us. That thou and I may both be found not blindly choosing our own path, or laying down our own self-willed plans and projects; for that which we may call our welfare in life is my earnest desire. For assuredly it is not the estimated usefulness or service which we may be rendering to ourselves and to society, by taking up this or the other course of life; but it is the being in our right places, which is acceptable. Or, as R. Barclay said, "If Paul, when his face was turned by the Lord towards Jerusalem, had gone back to Achaia or Macedonia, he might have supposed he would have done God more acceptable service in preaching and confirming the churches, than in being shut up in prison in Judea; but would God have been pleased herewith? Nay, certainly. Obedience is better than sacrifice; and it is not our doing that which is good simply which pleaseth God, but that good which he willeth us to do." J. B.

To J. F. M.

CLAPHAM, Fifth month, 1817.

I could say much to thee at this time, and could tell thee what a precious interval the present is more and more felt by me; how clearly matters seem daily to open before me, as a calm, willing, watchful state is abode under; how hard things are made easy, bitter things sweet; and how things that were expected to have brought suffering have yielded little else but joy and rejoicing, as "a song in the night."

It must be an encouragement to thee, and a cause of joy, to see how very graciously and tenderly I am dealt with day by day,—how the task is proportioned to the measure of ability afforded,—and when the spark is cherished by obedience, and everything that tends to damp or check is removed, how an increase in strength is experienced—and, especially, what sweet peace is at intervals the result. "What shall we render to Him," for all our blessings and benefits; is there anything too great to sacrifice, or that any of us shall withhold? May we become more and more learned, more and more deeply taught in that best of lessons, humility; for, without this seasoning virtue, the highest attainments in religious knowledge are likely to produce nothing short of additional condemnation. O! it is the humbled and contrite spirit that is an acceptable sacrifice, and said to be "precious in the sight of Him with whom we have to do." Farewell.

J. B.

1817, Fifth month.—I think I have heard a

remark made by some amongst us, tending rather to the injury and prejudice of them that give place to the sentiment,—namely, that persons should not let their outward profession and appearance outstep their inward and real condition and character. This sentiment sounds very well, and perhaps is sound with some qualifications. It is, however, in the neighborhood of error; and, therefore, should be cautiously received and acted upon. For, verily, the reason why I or any others have adopted a strict appearance in dress, address, or other particulars, is not that we thought ourselves better than those who have not found this strictness expedient for them; nor is this strictness of profession among men any certain or safe mark of taking up the cross of Christ. The cross that we have daily to take up, as followers of a crucified Saviour, is a spiritual cross, a cross to our appetites, passions, affections and wills. The crucifying power will, no doubt, after cleansing us from all manifest wickedness, cleanse also and purify our very thoughts and imaginations, our very secret desires and latent motives; and amongst these will it also destroy "the lust of the eye and the pride of life," with all the fruits and effects thereof, which have crept into, and are so apparent in the daily conduct of men of the world. Thus, no doubt remains with me, but that if we, as a Society, were more universally subject to the operative and purifying power which we profess to believe in, there would be found more strictness even in minor matters than is now seen, and greater necessity for circumspection, and a continual standing in awe.

1817, Fifth month 18th.—I have

ing and have just finished the journal life and religious labors of Mary. I have not read very many of the deceased Friends, but from those I read, there has been impressed upon me many an instructive lesson. It is in such accounts that we gain that treasure of experience, which, without books or writings, would be only attainable by the aged. We see from these narratives, at one comprehensive view, the importance, the value, the object, and the end of human life. The travellers, whose pilgrimages are described, seem to traverse their course again under our inspection. We follow them through their turnings and windings,—through their difficulties, discouragements and dangers,—through the heights of rejoicing, and depths of desolation, to which, in youth, in age, in poverty, in riches, under all conditions and circumstances, they have been subject. From these accounts, we learn the many liabilities which surround us, and we may (unless through wilful blindness) unequivocally discover where the true rest and peace is to be found; and in what consists the only security, strength and sure

standing. O! how loudly do the lives and deaths of these worthies preach to us; they being dead do, indeed, yet speak, exhorting and entreating that we, who still survive, may lay hold and keep hold of those things in which alone they could derive any comfort in the end. I have accompanied this dear friend, as it were, from place to place, and from time to time; I have seen her as she passed through the changing circumstances and events of each revolving year; and cannot but observe that while she followed the gentle leadings of Israel's Shepherd, giving up her own to His will, she found such peace as encouraged and strengthened her under every distress, perplexity and darkness. O! it was an unwearied, unshaken belief in the being of an infinitely great and gracious Master, that enabled her, as it ever has, and as it does even now enable all who rightly embrace it, to encounter the buffetings of the enemy, the perils and pains of the body, the exercises and conflicts of the soul, the uncertainties and exigencies of time, with the same calm confidence, and, at seasons, even with triumphant joy. Thou, dear fellow traveller, dear to me in proportion as thou art near to Him who is very tender to us all, I do affectionately salute thee, whoever thou art that readest what is here written, whether a relation or a stranger, young or old, born in a higher or more humble station,—I affectionately entreat thee that thou wouldst weightily lay these things to heart, whilst it is day unto thee,—whilst the light, which makes manifest what things are reprobable and what commendable, shines in thine heart,—whilst the Lord is in exceeding mercy condescending to care for thee, and to plead with thee,—O! lay these things to heart. I testify as in the sight of Him who sees in secret, who knows thy and my inmost thoughts, that there is no other way to real rest, amidst the contingencies of time, nor to an unfading reward, when this earthly tabernacle is dissolved, but in obeying Him who said, "I am the way, the truth, and the life." Be warned—be prevailed upon, dear reader, by one who acknowledges to thee that he himself has been in great depths of wickedness, through disobedience to the faithful unflattering monitor, and who has found no peace, no deliverance, but through the low portal of obedience to the same. By this he has been from day to day encouraged and strengthened to leave off one evil practice and disposition after another, and has been helped in some very small degree to put on a better righteousness than his own; and he assures thee that thy repentance and thy faith are to be measured by thy obedience to this appearance of Christ within "the hope of glory," as he is received in his secret visitations, and obeyed in his manifested requiremings.

(To be continued.)

MEMOIR OF REBECCA B. THOMPSON.

(Continued from page 534.)

"I was born on the 8th of Third month, 1814. When quite young, and at school, my inclination was, during hours of relaxation, to leave my childish plays, and mingle with those much older than myself; and I well remember repeatedly being told by my playmates I would make a preacher; and I believe that it was not by way of ridicule, but on account of a predisposition to seriousness. I also remember, when attacked with illness (although nothing serious or lasting) in quite early life, an anxiety that attended my mind respecting my being in a prepared state to leave the world, should I be called upon.

At the time of my mother's decease, I was too young to understand the great and irreparable loss to which I was subjected; but I well remember, when quite small, wishing father would marry again, that I might have a mother; being fully sensible it was a great favor; and sometimes, when among my young female companions who were thus favored, I could scarcely refrain from shedding tears, when I compared my situation with theirs; for, oh, I felt it was indeed a privilege of which I was denied; and that all who enjoy it may duly prize it, for there is an accountability attached to it which many do not feel until they are deprived of it; then, if they have slighted their counsel and pious concern for them, it will hang as a mill-stone around their necks. Let all ponder these things.

Soon after my father's decease, myself and brother went to reside with my grandmother Wilson and her son, a man well advanced in years; and she being above seventy years of age, our opportunities for improvement were very limited. She, however, was in a few months removed by death, when the scene was again changed. In a little while I was sent to boarding-school, so that from this time brother and I were mostly separated. He was sometimes at school, and then went to learn the turning business; and it always felt to me that we sustained a great loss by being so little together. I have always thought where parents can conveniently keep their families together, (though I know it does not always seem prudent), and as much as possible cherish kind feelings for each other, that their sentiments and feelings would become blended together, and they would be mutually helpful one to another. After being at school as much as my friends thought necessary, I commenced teaching school, in which I continued occasionally until a short time before I was married. During this period of my life I became fond of gay dress and gay young company, in which I indulged to a considerable extent, frequenting parties and places of amusement. In all this I was

followed by the Divine monitor within, although at times I almost stifled his voice; yet sometimes, when I assembled with my companions for the purpose of spending our precious time in these vanities, I wished the time was passed, and we were ready to return to our homes, secretly feeling how wrong it was thus to squander that time which was given for nobler purposes. And when I have retired to my bed, after having thus spent my time, sorrow of heart has been my portion, which I fully believe is more or less the situation of all others; although I believe we may stifle these convictions until they become almost extinct.

Oh! that young persons could be awakened seriously to consider the responsibility which rests upon them, rightly to employ the talents given them by the great Author of "every good and perfect gift," and who will hold them accountable for the advantages with which he blessed them. He does not endow them with talents capable of being greatly useful, and place them in situations in which these may be cultivated, without requiring something at their hands, by which all the glory and honor may be given unto him, and the creature be laid low in self-abasement before him.

Much also depends upon parents and heads of families, that they in a proper manner instil these sentiments into the minds of the youth intrusted to their care,—the great object of their creation,—and the awful responsibility which rests upon them, to be attentive to the still small voice within, that will teach them what they should do and what to leave undone. I can set my seal to the truth of the declaration that it will lead them out of all vain amusements and sinful pleasures, with which the world abounds; and as they become willing to take up the cross in these things He will be with them, and they shall become weaned from the world and the world from them. Thus they experience a living unto that which is truly valuable, for the more they become crucified to the world, the more they will be engaged to look unto their Heavenly Father, who will be their counsellor and friend; although their earthly friends may for a season forsake them, sorrow not for them. If they have Him for an instructor, they will be strengthened and enabled to journey forward with the happy assurance that having performed the part allotted them, in this state of being, they shall be gathered to rest with those who have passed from time to the enjoyment of a happy eternity.

On the important subject of making choice of a companion for life, I was favored to see and feel that neither the rich in the things of this world, nor those who made the most showy appearance, were to be the objects of my choice, for when such opportunities presented, clouds of darkness came before me, so that that

which to the outward observer might seem suitable was controlled by His invisible power for some wise and suitable purpose best known to himself."

In the 12th mo., 1839, when in the twenty-sixth year of her age, with the approbation of New Garden Monthly Meeting, she was married to George Thompson. According to her own testimony, during the early years of her married life, though she was often sensible of the sweet incomes of the Father's love as the reward of obedience, yet she was not at all times faithful to the revealings of Truth upon her mind, and had not fully surrendered her will to the Divine will. Yet she was considered a religiously-minded young woman, and fulfilled the duties of wife and mother with great tenderness and fidelity. The Memoir continues:—

"Feeling, as she often expressed it, in times of sickness and suffering, when powerless to help ourselves, how very dependent we were upon one another for the fulfilment of those kind offices which humanity dictates, even to smooth the couch or wipe the falling tear, these feelings often prompted her to seek the bedside of the sick and afflicted, there with her own hands to minister to their necessities; and I feel that there are those now on the busy stage of life who can look back to acts of dedication on her part, and remember her with feelings of gratitude and affection. This innate feeling, coupled with a genial affability of manners, with great deference to the sentiments and views of others, caused her to be beloved and esteemed by a large circle of neighbors and acquaintances.

But as revolving years rolled round, her health gradually declined; and, being of a naturally weak and delicate constitution, she was at times brought into much bodily suffering, which was more or less her portion for several years. It was during this time of suffering and trial that she became more thoroughly aroused to the necessity of greater dedication on her part to the will of her Divine Master, and a more thorough knowledge of his will concerning her, that thereby she might grow in grace and in favor with him, and ultimately come to know a preparation for a solemn, final change. This seemed the more imperative, as she could not look forward with much hope that her life would (at best) be lengthened out many years, but that it was held by a very slender thread. As it became her daily concern to know His will concerning her, and as obedience kept pace with knowledge, a great future was opened up before her, and she was favored to see that the axe must be laid at the root of the corrupt tree; that even our strong self-love, together with all our animal passions and propensities, must be brought into entire subjection to the Divine will.

But as one little sacrifice or duty after another was called for, she not having attained to the "stature of the full man in Christ," for want of true dedication to the pointings of Truth, entire obedience was sometimes wanting, and His will or command not obeyed; but the penalty for disobedience was heartfelt sorrow and lamentation; and I have believed that none but those who have paid this penalty can truly feel for and sympathize with those tribulated ones.

She was permitted to remain in this state of probation several months, wherein at times she felt the hand of the Infinite Father underneath her, and the gentle touches of his love wooing her away from a dependence upon all outward help to become wholly His. At other times she drank of the bitter cup to its very dregs.

Her path seemed to be a narrow one. She was called, as she believed, to many little acts of duty, which, to the natural man, seemed peculiar and even simple; but in referring to them in after life, she believed them necessary in the Divine hand, to subdue her natural will, so as to be willing to become, as it were, a fool for Christ's sake. Having in a measure submitted to the turning and overturning of His holy hand, and thus learned somewhat of obedience by the things she had suffered, she was, by the love and condescension of the Infinite Father, measurably released and redeemed from this state of thralldom, for which she could ascribe thanksgiving and praise to His great name.

In the year following, to wit, 1851, she was deeply tried, and all the tender sensibilities of her nature keenly awakened, in having to part with and consign to the grave a darling child, one on whom was centered a mother's love. But having learned in the school of Christ the necessity of submission to all the dispensations of Providence, and feeling, as she expressed it, that he *was too pure for earth*, and had become the recipient of the joys of heaven, she submitted thereto with becoming resignation. She had, for some time previous to this, felt, at times, that it would be right for her to make known to others the merciful dealings and long-suffering kindness of a gracious God to her, (as she would express it,) a poor worm of the dust. Hence, in our religious gatherings, she sometimes felt concerned to hand forth a word of exhortation to those assembled, but on account of natural diffidence, and feeling her unworthiness, she, for a time, shrank from so weighty a service; but being made obedient through suffering, she at length came forth in the ministry.

One of the peculiar and distinguishing traits in her character, that of having little confidence in her natural abilities, and the settled conviction on her mind of the necessity for the

natural will in us to become slain, that we may come into the teachable state of the little child before we can be instructed in divine things, will be best exemplified by the introduction of the two following letters written about this time.

(To be continued.)

DOING AND BEING.

There is a difference between doing and being. Perfection is being, not doing; it is not to effect an act, but to achieve a character. If the aim of life were to do something, then, as in an earthly business, except in doing this one thing, the business would be at a standstill. The student is not doing the one thing of student life when he has ceased to think or read. The laborer leaves his work undone when the spade is not in his hand, and he sits beneath the hedge to rest. But in Christian life every moment and every act is an opportunity of doing the one thing of becoming Christ-like. Every day is full of a most impressive experience. Every temptation to evil temper which can assail us to-day will be an opportunity to decide the question whether we shall gain the calmness and the rest of Christ, or whether we shall be tossed by the restlessness and agitation of the world. Nay, the very vicissitudes of the seasons, day and night, heat and cold, affecting us variably, and producing exhilaration or depression, are so contrived as to conduce towards the being which we become, and decide whether we shall be masters of ourselves, or whether we shall be swept at the mercy of accident and circumstance, miserably susceptible of merely outward influences. Infinite as are the varieties of life, so manifold are the paths to saintly character; and he who has not found out how directly or indirectly to make every thing converge towards his soul's sanctification has as yet missed the meaning of this life.—F. W. Robertson.

From the London Friend.

WHAT ARE SOME OF THE PECULIAR DANGERS OF A THEOCRATIC CHURCH?

Assuming the theocracy of the true Church of Christ which owns his abiding presence, and is subject to his immediate rule, what are the special dangers that form the set-off, in this imperfect state, to the privileges of such a church?

Unless grace be maintained in the members, there will be a constant tendency to a hollow though high profession—to a mere form of godliness. That which grew out of life, and took shape in the freshness of that life, may subside into the deadest of all forms. To be freed from forms is, doubtless, no small deliverance; but the advantage is lost when, with the absence of life, everything departs, and not even the forms

of instruction remain. Nor can there be a more lamentable exhibition, in all the range of false religion, than the upholding, by men who are not spiritual, the standard of a high spirituality.

As respects, also, that department of order and government in the Church which is instrumentally administered, peculiar dangers wait upon a professedly theocratic church. Unless the members are not only quick of understanding in the fear of the Lord, but deeply grounded and settled in Christian humility, there will be, on the part of some, an assumption of superior light that may work into church power of the worst description.

The domination of an open and avowed hierarchy is bad; but that of those who might assume that it is not they, but Christ in them, that would lord it over the brethren, would be incomparably worse.

Yet there must be order, and the means of maintaining it, in the Church; God is not the author of confusion; a church without order is not of Him. And those upon whom the upholding of it will naturally devolve will be such as are approved among the brethren, having just influence by weight of Christian character. But, just in proportion as they who have attained this standing depart from the meekness and gentleness of Christ, they lose their relation to Christ, have no more the mind of Christ, are no longer safe guides, nor can exert a gathering and helpful influence over the body. The badge, therefore, of a right authority in the Church, so far as it is committed to any of the members, is a deep humility in the fear of the Lord; and they who have this mark upon them will, while retaining the confidence of the brethren, be preserved from any ill use of that confidence, and, in general, we may believe, from any important mistakes. For it is in meekness that we learn of Christ, and can be made wise for the needs of his Church. The meek will He guide in judgment, and the meek will He teach his way.

There is another set of difficulties, if not of dangers, in a theocratic church (where the judgment is held to lie with an Invisible Head, while it is to be instrumentally expressed), in regard to all that belongs to designation to offices in the church, and more especially to the call and qualification of its ministers. Upon so deep and interesting a subject, much might be speculated, much might be written. But it is best to consider it as simply as we can. Of course, for these things to be rightly done, there is an absolute demand for some good measure of health and vitality in the church itself. This being so, and there being that impartiality, freedom from prejudice, and unclouded judgment which health and vitality bestow, the proper persons will generally be

perceived and selected to fill the various offices. And even as respects the very nice and critical point of judgment upon ministry, I see not but that this also may be best looked at with great simplicity. Here, emphatically, spiritual life, imparting all that is wholesome, candid and impartial, must be pre-supposed in the hearers. How else can they be found in possession of capacity for judgment? It would be the mere theory or semblance of a church deliberation, without any practical validity. But, these indispensable conditions granted, the true rule for judgment may be found in those weighty words: "If thine eye be single, thy whole body shall be full of light;" and, when this precious experience is vouchsafed, in answer to humble prayer, can we doubt that there will be a tolerably clear perception of the nature and origin of the offerings in question. The mind that is itself in worshipping order, and, most of all, that is brought into some correspondence with the mind of Christ, will be likely to discern whether such offerings are in the true spiritual harmony, as surely they are when proceeding from the constrainings of the love of Christ, in humility and the fear of the Lord. What is obviously objectionable will give rise to so general a disapproval, that the agreement in its suppression clears the subject of its graver difficulties. What is doubtful must be borne with. Eventually, some precious fruit may come out, by a long process; and the church must wait, and have long patience for it. Nor need the word of gentle care and tender counsel be wholly forborne; though the sun and rain from on high, and the winds of heaven, both north and south, are the best nurture of the precious seed.

WILLIAM BALL.

GLEN ROTHAY (RYDAL) WESTMORELAND, Ninth month 10th, 1866.

CLEANLINESS NEXT TO GODLINESS.

There is a good deal of preaching the Gospel that is preparatory to the preaching of it. When Christ came, he had a John Baptist to prepare the way. It was as important that the way should be prepared as that he should preach when he came. And there is a great deal of what may be called John Baptist preparation in preaching the Gospel. For example, all those things which increase the average health and strength of the lower sections of the population in a city are a preparation for the preaching of the Gospel. For, although health is not religion, it leads toward it, as the want of health hinders it. When, therefore, you make good sewers in your poor streets and keep them clean, you are what?—preaching the Gospel? No: but getting ready to preach it. My street is pretty good, and I have very little to complain of; but I never

have gone out into the poorer places, I never have gone to the Navy Yard, that I have not found streets that offended my moral sensibility. I speak the truth. I never go into a street where the working classes live, and where I smell fifty thousand smells, that I do not smell sin. And I say that, as you permit these people to live in filth, and compel their children to be brought up in violation of natural law, you hinder the Gospel; while, if you clean their streets, drain them, light them, and make them comfortable, and carry humanity through them, you certainly go a long way toward preparing the poor that live in them for a higher spiritual instruction. And when I see whitewash on the curb-stones, I say, "Oh, I see that John Baptist has been here!" I like these preparations, because they are going to lead to something better; because they are going to fit those among whom they are taking place to receive higher ministrations with trust and confidence.—*H. W. Beecher.*

FRIENDS' INTELLIGENCER.

PHILADELPHIA, ELEVENTH MONTH 3, 1866.

In making our extracts from the valuable memoir of John Barclay, we occasionally meet with expressions conveying a doctrinal view, with which we do not unite—not having so learned Christ; but wishing to show the steps by which he was gradually led out of some hurtful customs and enabled to attain a standing above the spirit of the world, we take such letters or memoranda as comport with this object—irrespective of some expressions which we cannot endorse—not considering ourselves accountable for his individual faith.

In an early period of our editorial labors we adopted the motto, "We glean from every vintage." Thus our selections are sometimes from the writings of those whose theological belief differs even more widely from our own than does that of the author of the memoir before us.

We have been interested in observing the positive evidence running throughout J. Barclay's writings, that his reliance for preservation and acceptance with the Father was upon the anointing power of Truth, as he says in one of his letters, "This is what secretly works upon the soul, bruises our self-confidence breaks our false peace, awakens out of our dreams of pleasure, riches, honor and acquisitions, shows us our real state, where we are,

how far we have missed the road, whether in principle or practice, and clearly points the way to true and everlasting peace;—giving us also such full directions that we cannot possibly miss it, if we do but follow them and not our own reasonings and imaginations."

INDIANA YEARLY MEETING.—Through the kindness of our friend George Barrett, we have received some account of the late Indiana Yearly Meeting. "Considering the generally prevailing lukewarmness among us," our correspondent writes, "it may truly be said to have been a favored season. We had in attendance several Friends from other Yearly Meetings, and much gospel labor was bestowed upon and around us. The public meetings were largely attended; the fountain of love seemed open, and the current of life flowed freely in testimony and prayer. I never before had such a realizing sense of the deep instruction contained in the Parable of the Sower, given and explained by Jesus, as during some of these meetings. The light and airy—the lukewarm—those 'at ease in Zion' were there, ready enough to receive, but with no strength to retain. The way-side ones were also there; those whose minds were engrossed in the cares and snares involved in the eager pursuit of wealth. Those representing the stony ground were also there: but, blessed be the Holy Name, a living remnant is still preserved. The pure mind in these was stirred up by way of remembrance, and they were encouraged to hold on their way. In the public meeting and in the private family, upon some of the dear children, especially, the holy anointing distilled as the dew. It felt to me to be for them and for all a season of renewed visitation. May the good ground retain the seed, and give favorable reception both 'to the early and the latter rain' to the bringing forth fruit of many fold."

BALTIMORE YEARLY MEETING convened on the 29th ult., and has been in session the present week. The Meeting for Ministers and Elders was held on the Seventh-day previous. We hope to receive early information of its proceedings.

MARRIED, on Fifth-day, the 18th of Tenth month, 1866, according to the order of the religious Society of Friends, THOMAS P. BOND, of Mannington,

Salem Co., N. J., to MARY D. FULTON, of Fallowfield Monthly Meeting, Chester Co., Pa.

DIED, on the 3d of Ninth month, 1866, after an illness of four weeks, MARIANN LEWIS, daughter of John and Esther Lewis, deceased, of Kimberton, Chester Co., Pa.

"Blessed are the pure in heart, for they shall see God."

—, on the 7th of Tenth month, 1866, MANSEL PASSMORE, an Elder of Fallowfield Monthly Meeting, Chester Co., Pa., in the 65th year of his age.

—, on the 22d of Tenth month, 1866, BENJAMIN PARKER, SR., in the 81st year of his age; a member of Green Street Monthly Meeting.

—, on the 29th of Tenth month, 1866, in the 34th year of her age, CORNELIA J., wife of Edward M. Needles, and daughter of Hunn and Eliza Jenkins, of Camden, Del.

A Stated Meeting of Friends' Association of Philadelphia for the Aid and Elevation of the Freedmen will be held at Race St. Meeting-House (Room No. 5) on Fourth-day evening, the 7th inst., at 7½ o'clock.

For Friends' Intelligencer.

FRIENDS AMONGST THE FREEDMEN.

NO. I.

Believing our *Friends* in the country who *cannot*, as well as some in the city who *do not*, attend the semi-monthly meetings of "The Association of Friends for the Aid and Elevation of the Freedmen," would be interested with some account of its proceedings, the writer, who is in frequent correspondence with the teachers sent by it, proposes occasionally to give a brief synopsis similar to the following:

At last meeting reports from seven of the schools in Virginia informed that the aggregate number of pupils was 209. Of these 97 were males, and 112 females; 163 of the whole number being under 16 years of age. Eighty-nine of these can read, and 103 write.

One teacher appropriates one afternoon in each week for sewing, while another has a First day school with an attendance of about 150. And as an evidence of the extreme anxiety they manifest in their studies, the same teacher informs there are some pupils in her week-day school who have not been absent a single session during a period of nearly five months; while, in confirmation of the *teacher's* faithfulness, it may not be amiss to mention, that during the same period *she* has only taken two holidays.

The teachers furnish classified reports once a month, arranged so as to compare each item with the month previous, many of which are worthy of note. For instance, in one school of 42 pupils, only 2 are in the alphabet; in another of 52, only 5 are in the alphabet. The familiar letters of our teachers are full of interest, hope, and cheerfulness. Sarah A. Steer, of Waterford, speaks of the preparation of her monthly report as a "*pleasant duty*." Mary K. Brosius, at Vienna, in alluding to her

"isolated position," thinks she "*has no cause for complaint*."

Hannah Shortlidge, at Big Falls, after stating that she had none who knew their letters when she commenced after vacation this season, and noting their rapid progress, remarks:

"The Virginians think the negroes cannot learn, but they are mistaken. I have taught *white children* for two years, and never had one to become perfect master of the alphabet in so short a time as these colored children; they are so eager to learn, that instead of being a labor, I find it a pleasure to teach them."

Mary McBride, at Fairfax Court House, remarks: "How pleasant it is to return after absence and find you have been greatly missed, and your appearance hailed with delight. Last Sabbath was reception day with me; at one time I counted fifteen colored visitors, some cried, some laughed, and others *looked* their happiness—their faces beamed with joy. Some of my children told me yesterday they '*knew I would come back*.' 'Why?' '*Because we prayed for you night and morning*!' I sincerely hope their prayers will not be in vain in other respects. It made me happy to know these poor children had not forgotten to pray for their teacher while absent. I was soon installed in my old log school-house, surrounded by my dusky flock, all eager, attentive, and glad to get back to school. To my surprise and delight they had not forgotten anything I had taught them, but had faithfully performed their promise to study during vacation."

Others of our teachers have occupied their positions at newly-established schools so short a time they can say but little, except as to a hopeful future. At last reports these new schools were small, but with a prospect of increase.

Cornelia Hancock has written, announcing the safe arrival of herself, Mary Taylor and Caroline Taylor at Mount Pleasant, S. C., and from whom we look for a continuation of their interesting reports as soon as their schools are re-opened.

J. M. E.

"True wisdom makes us enjoy what we still have of love and brightness in each passing day, closes our eyes to the shadowy future which no man can fathom, and keeps us from brooding too much on the sad past, which is as God ordered it, and part of His plan, as yet uncomprehended by us.

They say, in the great tapestries of France, the workers saw only the wrong side, and as they followed their pattern, could only blindly trust that it was working well the beautiful picture on the right side.

We all have a little corner of our own in the tapestry of existence, and some day shall know the meaning of all the broken threads and dark shades."

THE AWAKENING OF THE CABLE.

(Concluded from page 543.)

Memory is probably so much quicker than perception only because, knowing the line of march, we skip the unimportant links in the chain without attending to them to-day at all in the way in which we did yesterday, while the journey was new; had we to attend as much to every point in the line of memory as we did in traversing the route for the first time, it would take us probably as long to remember yesterday as it did to live through it. But we refer to this not to establish a theory, but simply to justify the suggestion that if the scientific men are right in the time they assign to the transmission of a perception from one point to another of our organism, we may have some measure of the rate at which we should recall the same process at a future period, supposing that we dwelt with the same stress of attention on each stage of the process. And if this be granted, then what we are driving at all this time becomes evident, that strands of moral and spiritual association twisted (if we may be allowed the metaphor) through many long years, and submerged for the whole of that period far beneath the surface of the mind, are strictly speaking, and without metaphor, liable in a far higher degree to the same kinds of accidents, the same disturbing causes, the same imperfect insulations, the same temporary interruptions, and even in the last resort to the same ruptures, as the submarine cable of the Atlantic telegraph itself. What are many kinds of nervous disturbance but false messages carried through old trains of association, in consequence of interruptions of the proper series of links by some rude shock at one of the more important centres of feeling during the slow passage of the connecting thought? What is the ordinary failure of power which we connect with paralysis but the hesitation and delay with which the mind travels down a train of association that is, as we may say, imperfectly insulated, that is, broken by flutterings of ill-defined and half-remembered feelings at various stages on the path? What are various kinds of madness itself but the absolute rupture of some of the more important strands of memory, due to some great agitation or storm that has agitated the mind to its depth, and which become, therefore, instead of connecting threads of communication between person and person, or between one province of life and another, mere conductors of the unmeaning mutterings of reverie, striking accidentally some one of the broken chords in some now useless chain of once specific associations?

Such an analogy does not in the least imply the materiality of the mind itself, which we hold to be absurd. But if the conditions of association are similar in the time which they

require for the process of recollection, and the regularity or irregularity with which the mind travels along them, to the conditions of the passage of nervous fluid along the nerves, and therefore also of the electric fluid along the wire,—there must be similar conditions also of the greater or less perfection with which they perform their office, and the same sort of possibility of their being rendered useless altogether, and becoming mere channels to transmit the fitful murmurings of inarticulate thought or feeling. When, indeed, the lost cable is not one of the great strands of memory on which the soundness of the mind itself depends, we all of us can recall plenty of instances in which we have personally fitted out such an expedition as the recent one in the Atlantic, have grappled with the missing clue, sometimes half found it, buoyed it with a new symbol to show its whereabouts, and almost got the lost end on board, when it has slipped away again with a great thud to the bottom. Sometimes, too, we may have been more successful, and re-established an important line of communication with provinces of thought long lost to view, and even then perhaps have had, like the *Great Eastern*, to overrun the wire to a considerable distance nearer our own end than the point at which we first grappled with it, in order to get rid of the tangle in which the different "buoy and grapnel ropes"—the extrinsic clues of fresh association by which we have sought to recover the lost thread—have involved it. But the point which makes our analogy seem, fancifully perhaps, of some value, is the report of the electricians that the line of cable may really gain in value as a transmitting medium during the time in which it is lost and useless. Its "insulation" has, they say, in this case become more perfect, and the messages transmitted by it are better and more rapidly transmitted than by the newly-laid cable. If this be true of an electric cable,—the only reason for it being of course that the pressure of the sea above it and the uniform temperature have rendered it less and less liable to disturbing influences,—why may not the same improvement take place, and for a like reason, in those broken cables of intellectual and moral associations that lie far beneath the consciousness of so many minds lost for the time to human reason? It certainly is not that the associative power is no longer there, for the very signals which we receive through them, incoherent and wild as they are in consequence of the rupture at the other end, often show, as the electric light on the lost cable showed perfect and wonderful transmitting power, though the proper use of it is for the time lost. The true force of moral associations, we all know, often increases in intensity the less it is used to carry superficial currents of feeling. Those of our personal ties

in which actual communication is broken by absence or death grow, as dreams alone are sufficient to tell us, clearer, keener, more perfectly "insulated," less crossed by petty and false threads of marrying association, through the years of silence and disuse. That little ray of light by the gleam of which perhaps, unknown to us, the great Electrician of the spirit tests them day and night, shines the brighter only as the waves of daily action and passion roll deeper and fuller over the strands along which it flashes. And why may it not be so also with those broken strands which are interrupted not by absence or death, but by violent moral shocks,—the magnetic storms, as it were, of the spirit? Is there not even for the insane a hope that the gathering up of one or two drifting threads of passionate association, even though it be postponed from this life to the other, will restore them not merely to their former, but more than former, rational energy? The expedition may have to be fitted out from the opposite shore, through the helplessness of the mind still lingering on this; it may be that no resources of human science can effect for them the renewal of the lost clues in mid-ocean, but it is easy to conceive that the drifting ends once fairly seized, whether from the spiritual shore or from this, it will need no miracle of healing, nothing more than the mere restored line of communication between mind and mind, to exchange those wild and incoherent mutterings of broken association for streams of thought and feeling even purer, clearer, and more rapid than any which passed through it before the line was fractured and its bearings lost.

"I WILL NEVER LEAVE THEE NOR FORSAKE THEE."

(Translated from the German.)

Forsake me not, my God,
Thou God of my salvation!
Give me Thy light, to be
My sure illumination.
My soul to folly turns,
Seeking she knows not what;
Oh! lead her to Thyself—
My God, forsake me not!

Forsake me not, my God!
Take not Thy spirit from me;
And suffer not the night
Of sin to overcome me.
A Father pitieth
The children he begot;
My Father, pity me—
My God, forsake me not.

Forsake me not, my God!
Thou God of life and power,
Enliven, strengthen me
In every evil hour;
And when the sinful fire
Within my heart is hot,
Be not Thou far from me—
My God, forsake me not!

Forsake me not, my God!
Uphold me in my going,
That evermore I may
Please Thee in all well-doing;
And that Thy will, O Lord!
May never be forgot,
In all my works and ways—
My God, forsake me not!

Forsake me not, my God!
I would be Thine forever!
Confirm me mightily
In every right endeavor:
And when my hour is come,
Cleansed from all stain and spot
Of sin, receive my soul—
My God, forsake me not!
—From "The Changed Cross."

For Friends' Intelligencer.

OCTOBER.

Bright October is here,
Fairest month of the year,
Bringing treasures of value untold;
Lo! she comes as a queen,
In a mantle of green,
Quaintly brodered with scarlet and gold.

And her brow bathed in light,
A fair diadem bright,
The insignia of royalty bears;
And her sceptre she wields,
Over forests and fields,
Till each leaflet her livery wears.

And her bountiful hand
Scatters over the land
All the blessings that come in her train;
And from Autumn's rich stores
She most lavishly pours
The ripe fruits and the rich golden grain.

Lo! the far-distant hills,
And the clear-flowing rills,
Are all clothed in rich beauty anew,
As her glory she shrouds
In a veil of soft clouds,
Of rich purple and roseate hue.

And the dim mountain height,
In the blue, smoky light,
Seems the far-off Delectable Land,
Whence, with Faith's piercing eye,
We can clearly descry
Where the tents of the shining ones stand.

But the flush on her cheeks
Of Decay ever speaks,
And rejoicing is mingled with grief;
"I am passing away,"
She seems ever to say,
"Lo! my triumph and glory are brief."

Yet so calmly she goes
To her dreamless repose,
I no longer lament her brief stay—
Though her whispered adieu
Does but tell me anew
That I also am "passing away."

Oh! that my closing day
May, like her, pass away,
Full of joy and as brightly serene;
And at life's setting sun,
When my day's work is done,
Neither tempest nor cloud intervene!

A. B. P.

From the "Cornhill Magazine."

THE LOSS OF THE STEAMSHIP "LONDON."

(BY ONE OF THE SURVIVORS)

On Saturday morning, 30th December, 1865, I left Fenchurch Street Station for Tilbury, to join as passenger the screw steamship *London*, to sail that day for Melbourne. She was built and despatched by the Messrs. Wigram, of Blackwall—a firm of high standing, of long experience in the Australian trade, and whose name was a sufficient guarantee that the equipment and management would be good. She was comparatively a new ship, this being her third voyage. Built of iron, 1428 tons register, and 267 feet long, auxiliary screw of 200 horse-power, very loftily sparred, and ship-rigged, clipper or modern build, long, low, and narrow, which said she was built for speed—the very thing that induced me, and no doubt others, to choose this ship. I had come home from Australia a few months previous, and had selected this *London* to return, saying, "I can spend a month longer time at home, and still be at Melbourne as soon by her as though I started a month earlier by a sailing vessel." She was commanded by Captain Martin, a navigator of great experience, a skilful sailor in every sense of the word, and a gentleman, I should say, as far as I had an opportunity of judging. So, naturally enough, we entertained high hopes of a speedy and safe voyage.

I had always a great dislike, or rather dread, in commencing this voyage during the winter season, on account of the dangers of the English Channel, and getting off clear of the coast. This was also one of my reasons for choosing this ship: she having steam-power, the danger I considered was very much lessened, as well as a saving of time, and I felt in undertaking this voyage, at this inclement season of the year, perfect security, and no such thought as fear entered my mind, wholly reliant on the reputation of the ship, captain and owners.

Everybody who has been to sea a little have their own ideas as to the character and seaworthiness of a ship, and of course I have mine; but in the case of the *London*, would not exercise my judgment; would have considered it presumption, and quite ridiculous for me to be biassed by my humble opinion of one of the first ships of London, owned by one of the first firms, and commanded by an experienced captain. No; I would take all for granted, or else what good is there in a reputation or name?

On board the ship, lying in the river off Gravesend, were the usual scenes of confusion, preparation; affectionate and trying partings of friends, generally attending at departure for these long voyages. About two o'clock in the day we left Gravesend, and proceeded down the Thames on our long voyage to Australia,

or rather Plymouth; for on a voyage we always look forward to the next port that we expect to call at, though it should not be the port of destination. The day was fine as we steamed down the river; the passengers congregated on deck to view the country, which was already green, and also to take observations, as the saying is at sea, to examine the ship, and criticise her rig and general appearance; also to notice each other and make acquaintances. I was surprised to find so many Australians on board: fully three out of four had been out there and were returning again, many saying it was for the last time; that they had got tired of England, and particularly London, where the sun had not been seen for a month; longed for the beautiful Australian climate, with its clear atmosphere, blue sky, and bright sunshine, for ten months out of twelve. That evening about sunset we anchored at the Nore. Though the evening was fine the barometer denoted unsettled weather, which we had the next day, (Sunday), and owing to its severity we remained at anchor till Monday morning, the 1st January, when the weather had become fine. Between eight and nine in the morning we were again under weigh, steaming down Channel. The wind was ahead; the day pleasant. We had a fine view of the coast—Margate, Ramsgate, North and South Foreland, and Dover, which we passed about 4 P. M. That night the wind increased. The next morning it was dull, heavy, unsettled weather; pretty strong wind dead ahead, with a nasty short Channel sea on; a great number of passengers sick; and, as usual, many regretting having come, and would certainly leave the ship at Plymouth, and forfeit their passage-money. But how suddenly we change our minds under different circumstances.

About ten in the morning we were in sight of the Isle of Wight: the weather still boisterous, the indications of the barometer threatening. Captain Martin and pilot decided on taking shelter at Spithead, which we did, and anchored about 4 P. M., opposite to Ryde; and thankful we were, for it blew fearfully that night. The next morning was fine. We were under weigh again about 9 A. M., steaming out of the St. Helen's Roads; passed out through the Needles at noon; once again in the Channel; day fine, wind ahead, heavy swell. Next morning, Thursday, 4th, the weather was very boisterous, the heaviest we had experienced as yet. By this time we had an opportunity of judging of the sea-going qualities of the *London*, and I must say I was very much disappointed in her. I could see she was a ship of great length for breadth, heavily sparred, very low in the water, not at all lively or buoyant; and when contemplating the thoughts of her in a gale, I actually entertained fears for her.

Opinions were expressed freely, as always are on board of passenger-ships, such as,—“Boys, we have got a wet, uncomfortable old tub this time, and if I could afford it, would leave her at Plymouth.” Another would say, “Oh, nonsense; she will be all right after a few days, as she will lighten by consumption of coal and stores, and we will soon be in fine weather. In a week or two we will be to Maderia: all plain sailing then to the Cape, and if we meet any rough weather there, why she will be in proper trim.”

Between eight and nine in the morning of this Thursday, the 4th, we were off Plymouth waiting for a pilot. Soon a fishing-smack with three men and two boys in her ran up near us, and launched a little boat from their deck, intending to board us, to pilot our ship into harbor. Two men got into her—a heavy sea running at the time. In a few minutes after casting off, I saw that the little boat did not rise on the wave: presently I saw the heads of the two men rise up on a wave, and could see that their boat was swamped. At that moment I heard Mr. Harris, the chief mate of our ship, give orders to man a lifeboat. Soon the men were in it ready for lowering, but there was a great delay in consequence of the lowering gear not being in proper order. The detention was truly painful. Occasionally the two heads would appear, then down again, expecting every time to be the last. Presently our boat got up to where they were. We could see them pick up one man, then row about looking for the other; but the poor fellow had sunk only two or three minutes before they got to the spot. The affair cast quite a gloom over the ship. Many said it was a bad omen for us; and what made the accident appear worse and more to be regretted, was that it might have been prevented had the lowering apparatus been in proper order, or Clifford's patent.

In a short time a pilot boat was seen bearing down to us. At about ten o'clock the pilot was on board, and we running into the Sound, and at noon were anchored inside of the breakwater. The afternoon was wet and cold, consequently very little was done towards preparing for sea. The next morning, Friday, 5th January, was beautiful, clear and still, much like a November morning: all was bustle and life on board now, as it was reported we should sail that day. Barges came alongside with coal, and fifty tons were added to our stock and piled on deck in sacks; boats with stock, meat, vegetables, &c. Many passengers joined us here: I observed our passengers were of a superior class. In the afternoon my attention was called to a gentleman and lady walking on the poop: they were Mr. and Mrs. G. V. Brooke. Fortunately the lady did not accompany her husband on this voyage; she was to have joined him out there in a year.

Almost every class of society was represented on board our ship—clergyman, actor, magistrate, lawyer, banker, merchant, tradesman, laborer,—of all ages; mothers with their children and nurses; beautiful and accomplished young ladies; newly-married couples; young men in the prime of manhood; wealthy families returning after a visit to their native country; also many going out for the first time to seek their fortune, full of hope.

Two of our passengers left the ship at Plymouth—a fortunate thing for them. One was a gentleman, whose acquaintance I had made during the trip from Gravesend. He expressed a great dislike to the sea and the long voyage before us, this being his first voyage; also the horror of being compelled to live in one of those small cell-like state rooms for two months or more. When he left the ship he did not tell us of his intention of not returning; perhaps he thought we would consider him a coward. The other was a young man who had, from some family quarrel, taken passage in the *London*, unknown to them. He was entreated to return by an advertisement in *The Times*, to which he paid no attention. The last day his whereabouts was ascertained; a brother came on board, and by urgent entreaty he was induced to quit the vessel. I know of three who would have willingly left the ship at Plymouth, but were ashamed. A young man, one of my state-room companions, about twenty years of age, and who was married only the day before his departure—but fortunately had left his wife behind—was thinking very seriously of leaving the ship, was quite undecided all day. All he wanted was a little encouragement to have done so. But many are deterred at a time like this from following their desires out of fear of the opinions of others. I now can call to mind many remarks of passengers' forebodings of the evil to come; of course I naturally remember them in a case of this kind.

At dark all was ready for sea: Captain Martin gave orders for all to be on board, as we would sail that evening; but the more knowing ones gave it as their opinion that Captain Martin would not sail till after twelve o'clock, to avoid commencing the voyage on a Friday. There is a superstitious belief amongst sailors, and in fact amongst many who are not, that Friday is an unlucky day to sail. A young girl said to me, “I hope we shall not sail to-night.” —“Why?” —“Because Friday sail always fail.” I asked her if she was influenced by such foolish nonsense as that? For my part, I said, I was willing we should sail at once. The public, through the newspapers, have censured Capt. Martin very much for putting to sea when he did, and disregarding the threatening indications of the barometer. In justice to him, I will state that at no time after leaving Plymouth did I

hear one word of censure by anybody on board. The night of Friday that we sailed was fine. Saturday was fine; true, Sunday and Monday were rough, but nothing to create fear for a well-found and first-class ship. I am sure, had Captain Martin not sailed, say until Sunday, he would have been censured by the passengers for remaining so long. In judging Captain Martin, we must go back to that time. He would argue, "I know what the *London* is, I have confidence in her; I have made two voyages to Melbourne with her; as a matter of course she would experience some heavy weather during these trips, and if I wait for fine weather to cross the Bay of Biscay, I may be here all winter. It's midwinter now, we must expect five days stormy out of the seven. I have a fine night to start with; true, the barometer is falling, but the storm foretold may bring a favorable wind; if it should not, the *London* will weather it; and more than that, I can afford to use plenty of coal at the commencement of the voyage."

(To be continued.)

THE TELEGRAPH AND THE FISHERIES.

On the north and west coasts of Norway the telegraph lines have of late been greatly extended through very thinly settled regions, and one of the inducements for this extension was the great service which a coast telegraph can render to the fisheries. As the employment of the telegraph for this purpose seems to be peculiar to Norway, Director Nielson's account of this branch of the Norwegian telegraphic service is not without general interest. The Norwegian fisheries are carried on along 1,200 geographical miles of coast-line, and it is estimated that 40,000 men are employed in the herring fishery and as many in the cod fishery. The herring come upon the coast at regularly recurring seasons; they are taken in large quantities from the middle of January or first of February till the middle of March. The signs of the coming of the herring, the so called "herring-shine" or "herring glimmer," are visible a short time before the actual arrival of the fish. Vast shoals of herring approach the coast, followed by cetaceans and accompanied by clouds of sea-birds. Travelling inspectors of the fisheries send to all fishing ports and stations daily telegraphic reports of the arrival of the fish, their numbers, and of the exact localities where they most abound. Telegraphic stations are temporarily established at any points of the lines at which the desired information is to be had directly and promptly. Thus advised, the fishermen are enabled to hasten from all sides without loss of time straight to the most teeming waters. With the fishermen come also the dealers who buy of them. During the whole herring season the

official inspectors announce by daily bulletins at the telegraph stations the amount of the catch, the price of the fish, the changes in the positions of the shoals, and even the color of the water. A milky color of the water is said to indicate that the spawning is ended; it forebodes the departure of the shoals of herring.

It is very obvious that an intelligent use of the telegraph can greatly increase the productiveness of the fisheries on sparsely populated coasts, whither fish resort at somewhat irregular intervals, or at scattered points of which they touch, now at one locality, now at another. The greater part of the Norwegian coast is thinly settled, and when great multitudes of fish invade some particular bay or harbor, the inhabitants of the region are utterly unable to secure the riches which the sea brings to their doors. The telegraph brings vessels and men and casks and salt from far and wide in season to secure the booty.

There are several valuable kinds of fish which, like the herring on the Norwegian coasts, appear with a good degree of regularity on the coasts of the United States. The alewives and the shad, as formerly the salmon, have regular seasons for coming into our rivers from the sea. Would it not be a benefit to the fishing communities as a whole if all the particulars about the arrival of these fish in their favorite waters, about their quantity, size, and condition, and the prices they command, were daily announced by telegraph, just as all the particulars of the cattle markets are given? Would it not be for the advantage of every fishing village in New England if, during the mackerel season, the whereabouts of the mackerel fleet, the success of the fishing, the size and temper of the fish and their changes of place, should be daily announced by telegraph from stations which could follow the fish and keep constant watch upon their movements? The productiveness of the fisheries could undoubtedly be much increased by a well-organized system which should give fishermen accurate daily reports from all the principal fishing grounds near the coast.—*The Nation*.

NEST OF THE HUMMING-BIRD.

The nest of the humming-bird is a miracle of perfection in domestic economy. For beauty, fitness and safety, the wisdom and taste displayed in its arrangement are irreproachable. Bedecked in a plumage of emerald, ruby and topaz, remarkable for the delicacy of its form and grace of its motion, unsullied by rain from the clouds, or dust from the earth, feeding upon the nectar of the flowers, its habitation should be in character, and so it is. Shaped like a half cup, it is delicately formed of lichens colored like the branch on which it is fixed, and lined with the soft down of plant blossoms, of

mullein leaves, or the young fern. It is delicately soft, sheltered, and undistinguishable from the bark of the tree, of which it seems a most natural excrescence—a moss-grown knot. Two white eggs, as large as peas, adorn the nest, upon which, as asserted by some naturalists, the cock and hen sit by turns for ten or twelve days.

The little birds, scarcely larger than flies, enter upon their existence in a chamber tapestried as with velvet, and are fed with the sweets of flowers from the maternal tongue. The tiny household exhibits not only a commendable neatness, but exquisite taste and delicacy in all its arrangements. Can gentle humanity derive no lesson from such an example?—*J. R. Dodge, Ohio Reports, 1864.*

LINOLEUM MANUFACTURE.

The manufacture of this new and interesting material, which threatens to rival the India-rubber trade in the multiplicity and utility of its manufactures, is based on the invention of Frederick Walton, whose patents are now worked by the Linoleum Manufacturing Company, at Staines, and 45 Cannon St., west. The word linoleum is derived from *linus* (linseed) and *oleum* (oil.) from which products the new substance is made. The linseed oil of commerce is solidified or "oxydized" by the absorption of oxygen, by which process it becomes changed into a semi-resinous substance. It is then combined at a strong heat with resinous gums and other ingredients, and the substance thus obtained has all the appearance and many of the properties of India-rubber.

Those who are conversant with the uses of the pliable elastic gums, readily perceive the wide field of usefulness that any material possessing such properties is designed to occupy, more especially as the price of the new substance is much lower than India-rubber or gutta-percha. Linoleum can also be dissolved into a varnish or cement in the same manner as India-rubber, and in this form can be employed in the manufacture of material for water-proof clothing. As a varnish or paint for protecting iron or wood, or for coating ships' bottoms, it is said to be admirably adapted, as it dries rapidly, in fifteen or twenty minutes, and adheres with singular tenacity. As a cement for uniting substances, such as wood with iron, or wood with wood, it is very effective, and has similar properties to the marine glue, made from India-rubber and shellac. Singularly enough, linoleum can also be vulcanized or hardened by exposure to heat. By this means it is made as hard as the hardest wood, and rendered capable of receiving a high polish without the aid of varnish or any other extraneous substance. In this condition it can be filed, planed or turned, as easily as wood, and employed in many of the various ways for which

wood is used. Or it can be moulded in heated dies to any desired form, as, for example, flax spinners' bosses, sheaves for ships blocks, surgical instrument handles, picture frames, mouldings, veneers to imitate marble, ivory, ebony and other woods. Combined with emery, it forms a grinding wheel, having extraordinary cutting or abrasive power. Very dissimilar are some of the uses to which the new substance can be applied. Carriage aprons, cart-sheeting, sail-covers, reticules, tarpauling, printers' blankets, gas pipes, telegraph supports, washable felt carpets, table covers, paints for carriages or for painting floor-cloths, or enamels of any color for enameling papier-mache or metals. These are only some of the many uses to which linoleum may be applied.

The manufacture has hitherto been chiefly confined to the development of the floor-cloth trade, for which the new material has proved itself well adapted. Linoleum floor-cloth is produced by combining the linoleum with ground or powdered cork, which is rolled on to a stout canvas, the back of the canvas being afterward waterproofed with a cement or varnish made from the solidified or oxydized oil before referred to. The combined fabric so manufactured is then painted by means of blocks in every variety of pattern, in the ordinary way. The floor-cloth thus produced is pliable and comparatively noiseless to walk upon. It washes well, preserves its color, and can be rolled up like any ordinary carpet. Besides being very durable—the component parts being almost indestructible except by fire—it will not decompose by heat or exposure to the sun or air, as is the case with India rubber. It is therefore better adapted than that substance for hot climates. To the chemist, engineer and manufacturer, linoleum offers quite a new substance for experiment, and no doubt, as it becomes better known, the various uses to which it may be applied will be more fully developed and appreciated.—*Mechanic's Magazine.*

ITEMS.

THE PHILADELPHIA MINT.—The gold deposits at the U. S. Mint for the Ninth month amounted to \$1,174,697, and the silver deposits and purchases to \$33,498.95—in all \$1,208,197. The gold coinage in the same time amounted to \$1,268,792, almost wholly in double eagles, and the silver coinage to \$33,689, mainly in half dollars and fine bars. The copper coinage, principally in one and three cent pieces, amounted to \$118,745. The total coinage of the month, of all metals, amounted to \$1,411,205, covering 3,621,344 pieces.

An appeal to the public has been made by the Jamaica Committee for £10,000, for the prosecution of ex-Governor Eyre. Mr. Coleridge, the Queen's counsel, has been secured by the committee.

FIRE-PROOF WASH FOR SHINGLES.—A wash, composed of lime, salt and fine sand or wood ashes, put on in the ordinary way of white-washing, renders the roof fifty per cent. more secure against

taking fire from falling cinders or otherwise, in case of fire in the vicinity. It pays the expenses a hundredfold in preserving influence against the effect of the weather. The older and more weather-beaten the shingles the more benefit derived. Such shingles generally become more or less warped, rough and cracked; the application of the wash, by wetting the upper surface, restores them at once to their original or first form, thereby closing up the spaces between the shingles, and the lime and sand, by filling up the cracks and pores in the shingle itself, prevents it from warping.

INCOMBUSTIBLE WASH.—Slake some stone lime in a large tub or barrel, with boiling water; when slaked, pass six quarts of it through a fine sieve. It will then be in a state of fine flour. Now to six quarts of this lime add one quart of salt and one gallon of water; then boil the mixture and skim it clean. To every five gallons of this mixture add one pound of alum, half pound of copperas, by slow degrees, three-quarters of a pound of potash, and four quarts of white sand, or hard wood ashes sifted. This solution will admit of any coloring matter, and may be applied with a brush. It is more durable than paint. It will stop small leaks in the roof, prevent the moss from growing over and rotting the wood, and render it incombustible from sparks falling upon it. When laid upon brick work, it renders the brick impervious to rain or wet.

THE FREEDMEN.—Major-Gen. Sheridan has transmitted a report of the condition of the freedmen in Louisiana for the quarter ending Ninth month 30th, 1866. The General states the prospects of the cotton crop are gloomy, and that many employers, whose entire crops have been destroyed, will not be able to pay their employees, and there appears to be a general desire to get rid of the responsibility of any longer maintaining the employees, every pretext being sought for discharging them. Many of the freedmen, who engaged to work for a share of the crops, will be left not only destitute of the means of support during the coming winter, but will be in debt to the owners of lands for supplies advanced to them during the summer. Complaints are frequent that the freedmen, after having labored faithfully from the date of their contracts, First month 1st, 1866, until the crop was ready to harvest, are being discharged and driven away, ostensibly on the ground of having been insolent. There are frequent reports of cruelty to the freedmen, particularly in the northwestern parishes, where men go through the country at night disguised, and take the freedmen from their houses and whip and otherwise maltreat them. Homicides are frequent in some localities. Sometimes they are investigated by a coroner's jury, which justifies the act in some instances, and releases the perpetrator. In other cases, when the proof comes to the knowledge of the agent of the Bureau, the parties are held to bail in a nominal sum; but the trial of a white man for the killing of a freedman can, in the existing state of society in the State, be nothing more or less than a farce. The total suspension of the issue of rations will cause much distress.

Official information from Alabama states that in a large portion of that State the corn crop has been almost a total failure, and that the cotton crop has been severely injured by the drought and worm. The people in the inland and northern portions of the State are destitute, and unless there be immediate assistance the suffering during the winter will be great.

John Towles, an Episcopal Clergyman, in Fauquier County, Virginia, gave notice that he would

open a First-day school for the freedmen in the building formerly known as the "Sulphur Spring Academy." He was informed that he would not be allowed either to teach or preach to the freedmen. Having the consent and approbation of two-thirds of the Board of Trustees, and knowing that he was engaged in a good work, he endeavored to reason with his advisors, and bring them to see the matter in its true light. He secured teachers and organized the schools, but a few days before it was to have been opened the building was fired by the hand of an incendiary and burned to the ground. The Rector wishes to rebuild the "Sulphur Spring Academy," and in the meantime the First-day school for the freedmen will go on, on his own premises. He says, "I feel that I have put my hand to God's work, and must leave consequences to Him."

SELECTIONS FROM THE WRITINGS OF JOHN BARCLAY.

(Continued from page 548.)

1817, *Fifth month 16th*.—In what words shall I express thy tender dealings, thy loving-kindness, O Lord! to my poor soul? How shall I approach thee, how shall I speak of thee, or speak to thee, O! Thou, the Giver of every good gift? Thou art far more gracious than any language can commemorate, or than any tongue can convey an adequate notion of. Thou hast wrapped me in a garment of praise; thou hast covered me with a sense of thy compassion. I am swallowed up with love of thee, with thy love towards me. Take pity upon the poor dust, which thou hast been pleased to animate with the breath of thy pure Spirit, and to make a living soul;—still condescend to continue thy fatherly protection—thy very tender mercies and forbearance, hitherto vouchsafed;—and enable me and all thy poor creatures, to answer yet more and more thy end and purpose in creating us,—still more and more to love and adore thee, who art our all in all. O! may thy kingdom, thy power, and thy glory, yet more widely and triumphantly extend over every thing within us and without us;—O! may thy blessed will so come over all, that the period may again be known, when "the morning stars sing together, and all thy sons, O God, shout for joy!"

1817, *Fifth month 20th*.—O! how fervently, how earnestly, have my cries and breathings

ascended to Him, who is the fountain and source of all good, that all the true well-wishers to Zion's welfare,—all the hearty, zealous, living laborers may be preserved at this season, (Yearly Meeting,) on the right hand and on the left;—that they may be kept in their proper places, and in subjection to the Great Master of our assemblies;—that their spiritual eye and ear may be opened and enlivened by his healing hand;—that their speech may be directed and their mouths filled in his own time and way, to his glory! May each one of these be kept low under His almighty hand; may that which is of the creature within them be abased, whilst that which comes from the source of life and glory, is exalted above every obstacle or opposition. O! Thou, who art pleased at times to favor thy poor dependent little ones, those who have no hope, or help, or happiness, but in the smile of thy benignant countenance, be pleased at this time so to refresh their hearts with the influence of thy paternal presence, so to overshadow them with a sense of thy continued protection and care, that they may be severally encouraged and confirmed to serve Thee with greater diligence, to devote themselves afresh to thy service and disposal, and more sincerely and unreservedly to say and to feel that Thy will is best in all things!

1817, *Sixth month 1st*.—I have attended the sittings of this Yearly Meeting, as well as those of its large Committee on Epistles, of which I was nominated a member; and am in-

olined in this manner to notice it. I think I never saw the importance of our assemblies, or indeed of any system of church government, in so strong a light, as previously to this Yearly Meeting. For many days before it commenced, my mind seemed engrossed with a sense of the weighty act of duty, which we were going to take in hand: I was encompassed with earnest desires and great exercise of soul, that every individual attendant there might be availingly instructed and benefited whether it should fall to his lot to be more or less prominently engaged; and that thus whatever we might do in word or deed, we might do all to the glory of the Lord, and for the promotion of his great cause. I was favored to continue in the same tender feeling frame of mind, with but little diminution, to the conclusion of our solemn engagement: at times, the Lord did extend his precious gathering wing over his poor dependent little ones, and enabled some to sing in their hearts to his praise;—blessed be his holy name. O! what a privilege it is to experience preservation on every hand, to be each of us kept in our proper places, and under our own fig tree, where none can make us afraid,—each of us abiding under our particular exercises, and upon the watch-tower.

A few lines affectionately offered and addressed to every young person whom they may concern.

1817, Sixth month 10th.

Dear fellow traveller—In a little of that love which has been extended to me by Him, who “sheweth mercy unto thousands,” I send thee these few lines; sincerely desiring that the eye of thy soul may be so effectually opened and enlightened by the healing hand of the great physician, Christ Jesus, as to enable thee clearly to see the things which belong unto thy peace, before they are hidden from thee.

Dear fellow traveller, dost thou not at times, when thy mind is in some degree disengaged from the round of sin and folly, or when thy natural flow of health and spirits is somewhat broken, dost thou not feel within thee convictions of thy wickedness, and condemnation for the same? Hast thou not intelligibly heard at such intervals a language which whispers, “all is not right?” Hast thou not felt that the end of these things, in which thy gratification is placed, can never be peace,—can never be any thing short of death, eternal death to the soul that persists in them? Be assured, then, that although these are thy secret feelings, thou art still the object of infinite condescension and loving-kindness; he who desires not the death of the evil-doer, but the death of the evil, is still near thee, notwithstanding all thy rebellion,—following thee in thy ways, which are those of sin, and running after thee as a shepherd in search of his strayed sheep. These pleadings of Divine grace, these convictions of

the Spirit of Christ, which in spite of thy concealment of them are pursuing thee, and in spite of thy endeavors to appease them by partial reformation are galling thy soul,—even these are the evidences of His gracious hand upon thee, who wounds only to heal, and whose very judgments are in mercy. O! that thou mayst come to see with undoubted clearness the truth of this; that thou mayst be encouraged and emboldened unreservedly to follow that which is, as I fully believe, shown thee to be right and acceptable in the sight of the great Judge of all the earth. Assuredly He has shown thee what he is requiring at thy hands, and what his righteous controversy is with. He requires of thee nothing but that which has separated thee from Him, the only source and centre of true joy,—nothing but that which, if not forsaken, will embitter thy present life, and plunge thee into utter darkness after it. Dear fellow traveller, it may be that thou hast been, within these few years, my companion in the walk of wickedness; that we have taken delight to set at defiance the commandments of a great Creator; and have yielded ourselves, and all that we possess, the ready instruments of Satan:—our time, our talents, our means, our youth, our health, our peace have been freely sacrificed at the altar of our soul's enemy. Be then entreated by one who has himself trod in this path; who has hurried forward with impetuosity down this fatal current; who, borne by the rushing waters to the very brink of a tremendous precipice, has been there snatched from the very mouth of destruction. There is indeed, dear young person, neither help, nor hope, nor happiness, even in this state of existence, but in the favor of Him, (in whose favor is life,) in implicit obedience to the Divine will as far as it is made known to us. It is to no purpose that we reckon ourselves, or are reckoned by others as belonging to this sect or the other church, to this class or the other division of professing Christians—if we fall short of those unalterable marks and evidences of true Christianity, by which we shall be known and distinguished in that great day, when every gloss will be removed, and every ceremony and shadow shall fade before the eternal sun of truth. We read that at that awful crisis there shall be but two names or classes by which the inhabitants of the whole world shall be known,—the sheep and the goats,—the good and the bad. Well, dear fellow traveller, it remains for each of us, if we have any desire that this transient state of being may terminate in an unfading inheritance, to lay aside all the false and foolish reasonings, all the vain suggestions, the cheating insinuations of an unwearied adversary; and with sincerity and simplicity of soul to take up the holy resolution to seek and to serve the Lord our God, during

the few remaining days that may be allotted us; and to this end, that we be found daily inquiring in his temple, the temple of our own hearts, and waiting upon him there, where his kingdom must come and his will be done; that so we may feel his presence and power to direct and to guide us into the saving knowledge of himself. That thou and I, as well as all our poor brethren upon the face of the earth, may be of that gloriously happy number, who shall inherit an eternity of joy unspeakable in the kingdom of heaven, is the earnest desire of one who feels himself thy soul's true friend.

To a Friend.

CLAPHAM, 16th of Sixth month, 1817.

Whilst thinking of writing to thee, a part of a beautiful meditation of the Psalmist, on the works and wonders of Providence, occurs to me. After dwelling much on the variety and immensity, the order, the harmony, the excellent provision and appointment of all things both in heaven and upon the earth, the poor servant cries out, as if unequal to the task,—"O Lord! how manifold are thy works! in wisdom hast thou made them all; the earth is full of thy riches." I remember it is somewhere said, "all thy works shall praise thee, and thy saints shall bless thee;" and whilst we thus see that the heavens declare his glory, and the firmament his handiwork,—whilst we see that all his works praise him, are we not convinced that his saints should likewise bless him? Are we not abundantly persuaded, that man also,—whom we now see the only flaw, the only speck in this vast production, perverted in himself, and perverting the rest of the creation,—was originally made pure and perfect in his kind, and did then glorify his Maker. O! how fully do I believe, how clearly do I see, that it is only as we poor creatures come to be renewed in the spirit of our minds, and to experience the putting on of the new man, which after the image of Him that made us, is created in righteousness and true holiness; that we can rightly worship, acceptably praise, and truly give glory to so infinitely righteous and holy a Being, with whom we have to do. Thus alone are we brought inexpressibly to feel the beauty of those scriptural or other writings, which dwell on the works of the creation; thus also are the faculties of our mind opened, enlarged, and quickened to examine, to perceive, and adore, the great First Cause of all. What a blessed experience, when every thing within us and without us, the stars above us, the dust under our feet, seem all to join with us, and to show forth that Power which has made them, and which supports and sustains this system, this machinery of the universe. Surely the revolutions and vicissitudes to which the spiritual as well as the natural kingdom seems subject, the turnings and overturnings, the

storms and the calms, the darkness and the brightness, the dreary and the cheering prospects, the drooping and the delightful seasons, are equally in the hollow of his hand, who is said to be "all in all." He saith to the raging winds, "peace be still," and to the foaming billow, "thus far shalt thou come, but no farther." What then should be the invariable language of our hearts,—what should be the clothing of our spirits day and night, in all extremities, and under all the circumstances to which we are constantly liable, but—"the will of the Lord be done." O! that we might be privileged to continue from day to day, and all day long, in such a prostrated, humbled, reverential frame of spirit, as would indubitably evince our belief in the presence, protection, providence, and power of Him whom we profess to serve.

Thy affectionate friend,
J. B.

1817, *Sixth month 24th.*—I think I have never felt in so reduced a condition, in so pitiable a state of mind, as during some intervals of late: at this time especially, it seems as though I were at the very boundary where distress of soul ends, and where utter darkness and desolation begin. Still is there something like hope;—still is there, through the infinite mercy of Him, whose kingdom and whose power are far above the dominion of the wicked one, something resembling the faintest glimmer of a spark of light, through all the horror and gloom which reigns. O Lord! this once help me,—condescend to bless me, and be with me, and I will follow thee whithersoever thou leadest. O! Lord God of my fathers, I have read of thy goodness towards those who sought thee, towards those who trusted in thee, in times that are past; I have seen, and I have known, and am sure, that it shall ever be well with those, who have no help, or hope, or happiness, but in and by and through thee, the source and centre, the spring and the river of all consolation and refreshment.

1817, *Sixth month 25th.*—I attended our Quarterly Meeting held this day, under a weight of discouragement, without being able to feel any thing alive within me. It seemed to some, however, to be an open time, a time of refreshment; the truly hungry and thirsty were shown what a blessed condition they were in; and they were directed to the fountain of living waters, the living bread from heaven, whereby they might be nourished up into eternal life. There was also a supplication put forth on behalf of some, who were under discouragement and doubting whether they ought not to enter upon some important duty; and a desire for such, that they might "go forth in this their strength,"—in the deep sense of their own weakness:—which much reached me. The sittings for business were no less trying to me,

and I believe to some others, who mourn at the untempered, (if I may use that expression,) or rather perhaps unleavened manner in which these our meetings for the promotion of good order, Christian conduct and conversation, are sometimes held. Oh! how little of an inwardly gathered and retired disposition do we see,—how little of that weighty concern and exercise of soul—that abiding under the overshadowing canopy of pure fear which were witnessed by those amongst us, in former times, and spoken of in these words of William Penn: "Care for others was then much upon us, as well as for ourselves, especially the young convinced. Often had we the burden of the word of the Lord to our neighbors, relations, and acquaintances, and sometimes to strangers also: we were in travail for one another's preservation, treating one another as those that believed and felt God present; which kept our conversation innocent, serious, and weighty. We held the Truth in the spirit of it, and not in our own spirits, or after our own will and affection. We were bowed and brought into subjection, insomuch that it was visible to them that knew us; we did not think ourselves at our own disposal, to go where we list, or say or do what we list or when we list: our liberty stood in the liberty of the Spirit of Truth; and no pleasure, no profit, no fear, no favor, could draw us from this retired, strict, and watchful frame. Our words were few and savory, our looks composed and weighty, and our whole deportment very observable. I cannot forget the chaste zeal and humility of that day;—O! how constant at meetings,—how retired in them,—how firm to Truth's life as well as to Truth's principles!" Thus far William Penn, and oh! that we could say, that anything like all this did really and truly pervade our conduct now, as a religious body.

(To be continued.)

REAL THOUGHT.

In a loose sense of the word, all men may be said to think; that is, a succession of ideas, notions, passes through their minds from morning to night; but in as far as this succession is passive, undirected, or governed only by accident and outward impulse, it has little more claim to dignity than the experience of the brute, who receives, with like passiveness, sensations from abroad through his waking hours. Such thought, if thought it may be called, having no aim, is as useless as the vision of an eye which rests on nothing, which flies without pause over earth and sky, and of consequence receives no distinct image. Thought, in its true sense, is an energy of intellect. In thought, the mind not only receives impressions or suggestions from without or within, but reacts upon them; collects its attention, concentrates its forces

upon them, breaks them up, and analyses them, like a living laboratory, and then combines them anew, traces their connexions, and thus impresses itself on all the objects which engage it.—*Dr. Channing.*

MEMOIR OF REBECCA B. THOMPSON.

(Continued from page 550.)

MILL CREEK, Tenth month 22d, 1851.

Dear Friend:—It has been my lot to pass through a season of stripping, in which I have felt my unworthiness to ask of the Father even one crumb of soul-sustaining bread, and yet He has condescended to bless me far beyond my merit, inasmuch as He has not wholly cast me off, but has commanded me, as I have believed, to write what He may direct for an absent friend. "As iron sharpeneth iron, so doth the countenance of a man his friend;" so, also, do I believe that communications of this kind may have a tendency to stir up the pure mind by way of remembrance; for as it is the pure in spirit that shall see God, they who feel that they have none in heaven or in all the earth to look unto but Him for counsel and direction, feel, also, that none other can teach as He does, and that His mercies are new every morning; and as it has been written that "ten righteous persons may be the means of saving a city," so do I believe that the prayers of the rightly exercised, on behalf of those we love, may avail much, for He who is our author and creator is a prayer-hearing God. Had it not been so, I should have been driven from His presence as one totally unworthy of the smallest favor. Had it not been for the secret petitions of my parents, which ascended to the throne of grace on behalf of their infant charge, which they early left to the care and protection of strangers, outwardly, yet secretly, they were watched over by the All-wise Caretaker, and preserved from many snares and temptations by which they were surrounded. And all that is within me is bowed when I reflect upon His goodness and matchless love, and the little return which I have made for these favors, for which body, soul and spirit should be given into His hands, to be converted to the purpose He designed, that of giving glory and honor to his great name, by surrendering my own will in passive obedience to His entire control, and allow the creature to lie low in self-abasement before him. This, my friend, is what He requireth of us individually, in order that we may come to know Him to be the resurrection and the life; for when this comes to be our condition, we do His works, and there is a ceasing from man's, for what man knoweth the things of God but God, and he to whom He revealeth them; and, as He is a spirit, they can only be spiritually discerned by His unspeaking voice, which must be attentively listened to, or we may not distin-

guish it from the voice of the stranger, and thereby fall into error, from which we may have much difficulty in freeing ourselves. But if, on the other hand, we are willing to listen to the divine monitor within, we shall come to know his power to be superior to every other power, because it can set us free from the law of sin and death,—not the death of the outward body, but that death which is produced by transgression. It is recorded, “the soul that sinneth shall die,” for, as in Adam, all shall die; showing that the animal propensities of our nature must know a death to pass upon them in the character of the fire of the Lord, which consumes all that is light and chaffy, while that which remains may be compared to silver in a pure state, free from the dross that adhered to it when dug from the earth. That which is of the earth is earthy, and must undergo the refining process before it can become valuable in the hands of the refiner. “He shall sit as a refiner and purifier of silver.” These, then, being testimonies recorded in the Scriptures of Truth, what further evidence do we want to show that man as man can never perform the works of God? He must come to experience His spirit breathed into him, for “He breathed into his nostrils the breath of life, by which he became a living soul,” showing that he was passive to the operation as the clay in the hands of the potter, which resisteth not, but is fashioned and formed agreeably to the will of the maker into many different shapes, not presuming to call in question the wisdom of the architect, who fully understands the use which he designs each vessel should be applied to. As this is yielded to, there is no clashing nor jarring, for this might have a tendency totally to destroy that which would be otherwise truly valuable and precious.

And, as regards the Society which we are members of, it was, I believe, established upon the firm basis of Scripture truth, the *light within*. Had it not been so, its founders would never have been able to have endured the bitter and cruel persecution which was inflicted upon them by their enemies, and which nothing but a superhuman power could have supported them under and raised them above, until they were constrained, amidst it all, to sing praises unto Him, whose divine arm of power was underneath them. And as He remains to be the same yesterday, to-day and forever, He will raise up and qualify those who will not only maintain these principles, but will raise the standard of truth and righteousness yet higher in the view of surrounding nations. Truth is mightier than error, and must prevail; so it is also progressive, and instead of our being as we now are, a hissing and a by-word, there would be a flocking unto us not only from the highways and hedges, but from among those of rank

and fortune, whose eyes would be pleased with the beauty of holiness, such as were not only professed but practiced by the followers of that memorable instrument in the hands of his Divine Master, George Fox. These views have been presented to me, I believe, in the light of truth, which can alone reveal them unto man, and which he, with all his high and exalted reasoning powers, can never comprehend, because they are spiritually discerned even by babes and sucklings, those who hunger and thirst after the milk of the kingdom, which nourisheth up the soul unto immortality and eternal life.

However much and often I have missed my way in my spiritual journey, the sincere desire of my heart is to be found walking in my allotted sphere; for fully convinced I am that I can never bring glory and honor unto His great name by seeking to establish principles and rules of my own contrivance, and which, the more I indulge in, will lead me farther away from the source and centre of all good, which is God. And although one among the weakest of His servants, He has sometimes commissioned me to hand forth to others, either verbally or in epistolary communications, that which He may deem meet for them to have, although it may be by way of reproof, and sometimes by way of instruction or encouragement, to those who are weary and heavy laden, and who feel that they have none in heaven or in all the earth to rest their hopes of salvation upon but Christ Jesus, “the rock of ages.” Unto these the salutation of the spirit through me is, fear not little flock, for it is your Father’s good pleasure to give you the kingdom. Lift up then the hands which are ready to hang down on account of the many deficiencies prevailing among us as a people, remembering, as has been testified, that the prayers of rightly-exercised parents on behalf of their offspring, avail much; so, also, do those of the parents in the truth, for the preservation and protection of that unto which they may feel bound by the strong ties of deep and fervent love to the Father, and, consequently, to the children, over whom he has, in a measure, placed these as fathers and mothers in the truth, denominated ministers and elders. As I have written nothing but that which seemed to present in the light which we as a people profess, I will close, with the salutation of love.

REBECCA B. THOMPSON.

(To be continued.)

GOOD MANNERS.

There is an impression that moral attributes have a certain hard and rugged nature of their own, and that they are genuine in proportion as they are unlovely. Many persons think that truth spoken in love hardly bears the spirit of truth. They want a man to speak the truth

very much as a bull-dog speaks—right out with it at a bark! Where a man does this, people say, "That is the sort of man that I like. There is no flummery about what he says. When he speaks the truth he bites off his words as though he meant it." They seem to like a blunt, hard, wounding way of speaking. Whereas, if another man studies to speak the truth, so as not only by the truth to touch as many points as possible, but to avoid as many evil effects as possible, they say, "He may speak the truth; but then, there is a kind of indirectness about it. I do not like a varnishing of the truth. Truth ought to be spoken in its own nature." What is its own nature? When a man speaks the truth without sympathy; without feeling; harshly; not in love, as the Apostle commanded that it should be spoken; but in passion, in irritableness, and in uncharitableness; then people seem to think that it is spoken in its own nature. No, it is not. The truth is spoken in its own nature when it is spoken as God speaks it through the universe. The heavens symbolize it by all the beautiful forms of clouds, and by the colors of sunrise and sunset. The earth speaks it by all the exquisite flowers of summer. "The heavens declare the glory of God, and the firmament sheweth his handiwork." And these things are so many parts of that universal tongue which praises God and declares him to be the One that sits in the beauty of holiness. And when I hear men take the rudest things to make them the symbols of truth-speaking, I marvel that the revolutions of the revolving world have not taught them that God is love, and that God is beautiful.

Throughout the New Testament, not only are moral qualities enjoined, but they are enjoined to be exercised graciously and attractively. Christ does not merely say, "Let your light shine:" he says, "Let your light so shine before men, that they may see your good works, and glorify your Father." You are to attract men, to win them—not to dazzle and drive them.

Hence, bluntness, coarseness, hardness of speech, are not to be preferred. If a man has been reared on a ship's deck, if his eye and his tones are genial, and you see that he knows no better than to be blunt in his speech, you will bear with his bluntness, and it will not offend you; but where a man has had opportunities of cultivating suavity and grace of speech, there can be no greater mistake, or one more palpably in violation of the spirit of Christianity, than for him to suppose that he must speak abruptly, or be rough in his manner or address. A disagreeable piety is impious by so much as it is disagreeable. Virtue is lovely. So is truth. So is piety. Men admire these things. There is something in them that addresses itself to the fundamental quality in every person's soul.

And you are bound to give truth a fair exposition in your conduct. Certainly you are not to slander it by acting on purpose as though to be pious was necessarily to be cold; as though to be good was necessarily to be unrich; as though to be Christian was necessarily to be void of everything that is lovely, and beautiful, and pleasure-giving. ¶

This view will present a much higher idea of good manners than is often presented. We are usually taught good manners by parents and teachers in schools because good manners are important to our making our way in the world; but I hold that good manners stand on a moral and a Christian ground. A man is bound so to speak, so to rise up, so to sit down, so to conduct himself in all the thousand usages of society, as that his presence shall be a pleasant and not a disagreeable thing, or a burden to his fellow-men. Where a man has good manners, he has the power of producing unconscious pleasure all the time.

From the British Friend.

A SHORT MEMOIR OF MARY GRIFFIN.

Mary Griffin, of Nine Partners, in the State of New York, was the daughter of Moses Palmer, of Stonington, Connecticut, who was a strict member of the Presbyterian Society—zealous in the performance of family duties, such as daily prayers, &c., yet allowed his children to attend what was termed decent balls, and some other places of amusement, customary amongst young people at that day.

In this manner Mary received her education, but was met with in an unexpected moment at a time little thought of by her, when she was engaged on the floor in a dance, which circumstance she related as follows:—

"While I was in the midst of the dance, my mind was solemnly impressed with the sad effects of misspent time, and I immediately retired and took my seat, at which the company were surprised, and inquired the cause. I honestly told them that I would not take another step in that way, and accordingly never attended another one."

Thus she bore testimony to the principle professed by Friends, a Society that she had little or no knowledge of.

She continued for some time a member of the Presbyterian Society, and when young in years entered into a married life; and not long after the birth of her second child, she understood by some means that a travelling minister of the Society of Friends was to have an evening meeting in the neighborhood, and in the course of the day preceding it frequently occurred to her mind, accompanied with a wish or desire to attend it. Her husband being from home, and no one in the family but herself and children, she was at a loss to know how

to dispose of them during her absence if she attended the meeting. She finally concluded to take supper early, and put the children to bed; and as soon as they were asleep, she placed the bedclothes around them, and set out for the meeting, leaving them to the protection of a kind Providence: she secretly said to herself, "I have faith to believe they will be cared for until my return."

She had to travel on foot about four miles to the meeting, and on the way had to cross a stream of water, which she found had risen to so great a height as to run over a small bridge which was placed over it for foot passengers. This appeared a difficulty not easily surmounted. She nevertheless did not give up her intention, as she fully believed it was her duty to go, but absolutely waded through the strong current of the stream, without receiving any material injury. After which, she arrived at the meeting, and while sitting therein, the following emphatic passage of Scripture frequently presented itself to her mind, till at length she believed it right to rise up and express it amongst them:

"Though thou exalt thyself as the eagle, and though thou set thy nest amongst the stars, thence I will bring thee down, saith the Lord." (Obadiah 4.)

After she sat down she felt great peace of mind; and when the meeting was over she returned, rejoicing that she had been there, and on her arrival at home found her children safe as when she left them.

She at that time appeared in the garb that was customary in the Society to which she belonged, having a scarlet-colored cloak, edged with fur.

It appeared afterwards that a man of considerable standing was present at the meeting—one who had been very troublesome, and was about to engage in some overbearing conduct toward Friends—who was so overcome on hearing the aforesaid communication, that he declined prosecuting the object that he had in view, and after the meeting was over, took an opportunity with them, made a satisfactory acknowledgment of his error, and became a useful member of society.

She soon afterwards joined herself in membership with Friends, became an approved minister in the Society about the twentieth year of her age, and continued in that station upwards of fourscore years, as appears by the memorial given forth by Nine Partners Monthly Meeting respecting her.

It further appeared that though she had given up in obedience to what she believed was required of her in the foregoing instances, she had not reflected on the impropriety of her gay dress, until a Friend expressed herself in meeting to this effect:

"Laces proceed from pride—pride is sin—and sin will lead down lower than the grave."

She was then sensible of the inconsistency of her dress, and immediately altered it, laying aside all those parts that she saw were superfluous.

A remarkable circumstance took place of her knowledge and quickness of apprehension when she was about six years of age. Being present when her parents were conversing about their minister's salary, and her mother, advising to liberality, remarked, "We must not starve the gospel," the little girl replied, "Starve the gospel, mother! that you cannot do, for it is the power of God unto salvation to every one that believeth."

When she was about the ninety-fifth year of her age, she performed a very satisfactory visit to a number of the Monthly Meetings in Nine Partners and Stanford Quarterly Meetings, and the families constituting them. In the hundredth year of her age, when she was so weak in body as not to be well able to stand alone, she felt her mind drawn to visit a part of the families of Nine Partners Particular Meeting, which, by the aid of her friends, she performed, and was led to point out and speak with clearness to particular states among those she visited. She also attended several public meetings at that place, wherein she was admirably favored to communicate suitable counsel and advice in a very lively and pertinent manner.

Near the close of her time she called for her children and grandchildren, and addressed them with her last words, saying, "Fear the Lord above all things, and keep up your religious meetings."

She departed this life on the morning of the 2d of Twelfth month, 1810, aged upwards of one hundred years.

GOD'S WAY OF ANSWERING PRAYERS.

And have you never found that prayer answered, when God has destroyed some earthly hope, brought you down from riches to poverty, from high to low estate, from the gladdening companionship of those you loved to be the mournful followers of them to the darksome grave! Did you mean God to search you, and to prove you? and did you mean that he should do it in your way, or in his own? And if he has done it in his own way, do you doubt its being well done? or do you think your ways higher than his ways, because your thoughts are different from his thoughts? and that, though he is a "God of truth and without iniquity" to others, he has dealt unfairly with you? We say not—for every "heart knoweth its own bitterness," and a stranger may not unduly, and without sympathy, intermeddle therewith—we say not that yours may not be a hard trial, a deep affliction, a destruction of worldly hopes, such as they are; but what if it should lead, as God would have it lead, to the setting of your

heart's best affections on that God, and that heaven, and that home above, from which these earthly hopes that are now destroyed have made you too much strangers! What if those hopes destroyed should tend to fix your hearts there, where alone true joys are to be found; and to cast all your care upon him who careth for you, and who has destroyed your worldly hopes *because* he cared for you: then, there *will* come a day, without a cloud to darken or a sorrow to depress, when, if the infirmity of nature should murmur, "Where is now the hope?" and the sneer of the infidel should suggest, "Who shall see it?" you shall be able to say, in the happy repose of pious submission, "Though he slay me, yet will I trust in him;" for he, my God and Saviour, can raise from the death-bed of earthly hopes, other hopes that are life-giving and heavenly; for "who is God but the Lord, and who is a rock save our God?" I often think of the pious Fenelon. When his illustrious pupil lay dead in his coffin, and the nobles of the court were gathered around, the good archbishop approached the body, and gazing feelingly upon it for a time, at last exclaimed to the following effect: "There lies one for whom my affection was equal to the most tender regard of the most tender parent, and he loved me in return with all the ardor of a son. There he lies, and much of my worldly hope lies dead with him. But"—(and here is the point of his holy resignation)—"but if the turning of a straw would bring him back to life, I would not, for a thousand worlds, be the turner of that straw, in opposition to the will of God."—*Dr. Langley.*

FRIENDS' INTELLIGENCER.

PHILADELPHIA, ELEVENTH MONTH 10, 1866.

SCIPIO QUARTERLY MEETING.—We are glad to receive notice of what transpires in other parts of the heritage. Though what is communicated may not seem of especial importance, yet a knowledge of how Friends in different sections are faring, tends to renew our interest in each other, and enables us to sympathize with all in their various allotments, whether it be in localities in which hundreds may assemble, or where only the two or three are found bearing our name.

A correspondent informs that Scipio Quarterly Meeting, composed of Scipio, Deruyter and Verona Monthly Meetings, was held at South Street Meeting-house, Scipio, (now in the town of Ledyard,) Cayuga Co., N. Y., on Fourth-day, the 26th of Ninth month. This meeting has become greatly reduced in size

within the last few years, yet, on the recent occasion, a considerable number of Friends were in attendance. Representatives were present from the other Monthly Meetings, and members from all, or nearly all, the preparative meetings. Several ministers were there; one, who, though aged and quite infirm, came with his wife a distance of fifty miles by horse and wagon. In the meeting for worship several Friends were engaged in testimony, and their service was apparently acceptable to their hearers.

At the public meeting on Fifth-day, many of the neighbors not in membership with Friends were present. A Minister from Genesee delivered a long and edifying discourse. After attending the Quarterly Meeting he proceeded to Canada in the further prosecution of his religious concern.

SWARTHMORE COLLEGE.—We have numerous inquiries concerning the progress of the building and the prospect of an early organization of the school in which so many of our subscribers are interested, and have made inquiries recently with a view to answering these. The masonry on the west wing of the College is so nearly completed as to justify the confident expectation that the roof will be upon it before the winter weather prevents out-door work. The carpenters can then proceed with their labors under cover, the floors can be laid, the stud partitions put up, and the other inside work proceeded with early in the spring. The masons will proceed with the erection of the remaining walls, which are already erected to the line of the first joist, and there can be little doubt that the roof will be raised upon the whole building before this time next year. The French roof, which has been adopted as an improvement in the plans, gives an additional story, in which the older class of pupils can be lodged; and it is believed that the Board of Managers will determine, at its next meeting, to open the Preparatory School in the west wing in the autumn of next year. Although this measure would be liable to some objections, it would, no doubt, give a more definite and positive direction to the interest already manifested in the enterprise, and attract toward it some who have stood aloof upon the plea that the plans of education and management were

not sufficiently matured to enable them to judge intelligently of them. There is a feeling with some that the Institution is being erected upon an extravagant basis—that too much money is being spent upon the building—such should visit the grounds and examine the plans; they will find that while the building is substantially constructed, as it certainly should be, to meet the views of all, it has no more expended upon it than would be considered essential to any structure of its size and objects. Upon the number of pupils it is capable of accommodating, must depend in great measure the cheapness of instruction and living of the pupils, and upon this must depend the adaptation of the Institution to the wants and requirements of the community. We learn that an effort is now being made to increase the means of the corporation by a general duplication of former subscriptions, and that upon the success of this will probably depend the ability of the Board to open the school next autumn, and at the same time to extend the building to completion. In closing this article, we need hardly urge upon all who would promote the spread of intelligence and liberal culture in the Society of Friends, and in the communities in which they predominate, to aid this enterprise to the extent of their surplus means.

MARRIED, by Friends' ceremony, in London, England, on the 3d of Tenth month, 1866, JOSEPH G. MILLER, of Long Island, to ISABELLA THOMPSON, of the former place.

DIED, on the 6th of Ninth month, 1866, in Bristol, Pa., of typhoid fever, REBECCA P., widow of Timothy Stackhouse, in the 58th year of her age. May she rest in peace.

—, on the 4th of Tenth month, 1866, in the 35th year of her age, MARY C., wife of Jas. A. Wright, and daughter of Catharine and the late Edward Cook, of New York.

—, suddenly, on the 27th of Tenth month, 1866, in Kent Co., Md., CHARLES E. P., only son of Townsend Hilliard, aged 17 years; a member of Green Street Monthly Meeting.

—, at St. Paul, Minnesota, on the 27th of Tenth month, 1866, JONATHAN, son of Edward C. and Ann M. Knight, of Phila., in his 26th year.

—, on Fourth-day afternoon, Tenth month 31st, 1866, in the 40th year of his age, T. ELLWOOD LUKENS; a member of Green Street Monthly Meeting, Phila.

—, on the 2d inst., AMOS WICKERHAM, of Jenkintown, Pa., in the 82d year of his age.

—, on the morning of the 2d of Tenth month, 1866, of membranous croup, ARTHUR JOHN, son of Sylvester D. and Sarah W. Linvill, aged about 3 years. An interesting child, whose flower of promise was early nipped in the bud.

The (London) *Friend*, reviewing Margaret Howitt's work, "Twelve Months with Frederica Bremer in Sweden," quotes from it some remarkable passages in the life of Pehr Thomasson, the Swedish poet.

Every event of life, be it ever so small, is assuredly under the control of a power beyond ourselves. I like to believe this, for it is a faith which makes me unspeakably happy. In connection with this subject I will relate the following perfectly true narrative:—

"In the early part of this century two peasant lads, in a beautiful part of the south of Sweden, herded their small flocks by the side of a wood in which was a large cave. They had glorious times together—they had not a care in the world; and when their sheep or goats, or whatever their herd might consist of, were safe, they would retire to the cave and live there a life happier than kings. At no great distance from this place stood a castle, the residence of a noble lady, a widow, with an only son about their own age. By some chance he became acquainted with the herd-boys—at least so far as to know that they led much merrier lives in their cave than he did in his castle; and after a little while he was invited to pay them a visit. This was, of all things, what he desired; but still he only dared to have this enjoyment by stealing away from his home unknown to his mother. The appointed time came and he went, none of the three thinking at all about the weather, nor observing the lowering clouds which gathered, until the storm burst over their heads in torrents of rain, flashes of jagged lightning, and heavy rolling thunder. The young nobleman, who had never been exposed to the elements before, trembled from head to foot. It seemed to him a judgment from heaven, and he feared he should never return alive to his castle. The two peasant lads, caring nothing for weather, having been out even in worse storms than this, and with perfectly easy minds, did their best to reassure their visitor—wrapped him in their coats, placed him in the back of the cave, and stood at its entrance to shut out the fierce lightning. The storm passed over, but only to give place to a still more terrible domestic one. The absence of the lad during the thunder-storm brought to his mother's knowledge where he had been, and she then sternly forbade his ever again associating with low and vulgar peasants. The farmers who employed them to herd their flocks were informed of their idle, negligent habits; the cave settlement was broken up; there was an end of their merry times together, and they went into other service—one this way and the other that. Years passed; the boys grew into men without knowing anything further of each other. One, however, he

with whom we have especially to do, Pehr Thomasson, developed into a poet and became known throughout Sweden for his patriotic songs and the breath of fresh nature which permeates them. On one occasion during his earlier success he visited the capital, and amongst other places of public interest which he inspected was the great prison at Vaxholm. After he had seen through the whole place and was crossing the court to leave, he was accosted by a thin, woe-begone-looking man, who said, 'Ah! I remember you, but you will not recognize me!' Pehr Thomasson could not but confirm the truth of his words. How great, then, was his emotion when he discovered that this sorrowful, poverty-stricken man was the great aristocrat, at one time too noble to associate with peasant boys, yet who now, a prisoner for debt, claimed his acquaintance. On another occasion, when the poet was again in Stockholm, he visited an exhibition of new pictures, when at once his eyes were attracted by a large painting representing the interior of a cave in a thunder-storm, and two sturdy peasant lads screening a delicate and apparently high-born youth from its terrors. Arrested at once by the familiar scene of his own boyish experience, he exclaimed aloud, 'Why, here we are to the life! Who in the world has painted this picture?' 'I,' said a voice behind him, 'your old comrade, brother Thomasson—the painter Nordenburg!' You can imagine the meeting better than I can describe it. It was this same Nordenburg who exhibited in the International Exhibition the clever picture of the Collection of Tithes in Scania, his own district, and which would, no doubt, be painted with equal fidelity to the life."

Of Amelie von Braunn, M. Howitt writes:—

"Strongly attached to the Church of Sweden, and deeply mourning over such as heretics who in any way differed from it, she yet deplored its coldness and reliance on outward ceremonies, and often raised her voice against it, as a Church recreant to its high origin and authority. These opinions, however, were less strongly spoken out in her lifetime than in her *Pictures of Christian Life in our Days*, a work written after much prayer, which she left as a legacy to her nation. She acted out the principles, however, which she desired should reanimate the Church. Born in 1811, one of the several daughters of a lieutenant-colonel, whose small means were expended on the education of his sons, Amelie spent the earlier years of her life in spinning, weaving, and perhaps even, on an emergency, scouring a floor. All her household duties were, however, conscientiously performed, although she devoured every book that came in her way, digesting its contents over her mechanical labors; so that, even when thus employed, her mind was developing. From the

early age of five, she knew that she had a Father in heaven; and, though encountering by the way many a difficulty, many an impediment, she yet advanced onward, ever onward, towards her heavenly home. She was a singularly dutiful daughter, never undertaking anything without the advice and blessing of her father. This also speaks much for the character of the parent. Nevertheless, there was one higher than her earthly father, as she says, 'From my tenderest years I have thrown myself on Jesus alone; nor has any undertaking of mine prospered in which I have followed human advice, or obeyed the will of others in opposition to the warning of an inward voice.' In 1843, she began to work quietly amongst the poor of Carlshamn, where her family was then residing. She visited the lowest cabins of sin and misery, carrying with her a clean cloth and candles. The cloth she spread on a table and the candles she lighted, for to the Swedes clean table linen and lighted candles convey the idea of the highest rejoicing and festivity. Having done this, made all beautifully impressive and attractive, she then poured out words of divine truth and kindness into the hearts of the poor inmates. She produced in this way such an extraordinary effect, that the poor, wretched people use to clean up their miserable abodes in the hope of her coming, that she might see she was expected and made welcome. For nine years she carried on a large Sunday-school. She labored too amongst the sailors, and the most demoralized class of workmen, and found, throughout the experience of her life, men more easy to influence than women. In 1856, a still more extensive field of labor was opened to her. She came to Stockholm for the purpose of conversing with religious-minded persons, whose views accorded with her own, and especially as regarded certain tendencies which she greatly deplored. Here she was strongly urged to proceed to Dalecarlia, where the church was much shaken. She hesitated at first, for the distance was great and the people strange to her. At length, believing it to be the Divine will, she went there, and talking with the people great numbers thronged to listen. She conversed with them also in private, circulating orthodox works, and was regarded by them as a messenger of God, and, at the urgent entreaty of many, returned to them the following year. From this time forth she became a religious lecturer amongst the poorer orders generally, over whom she exercised great power. With the cultivated classes she could do less; the latter she intended to benefit by her pen, and that only after her death, for she feared that excessive partiality on one side, and rancour on the other, might destroy the wholesome effect at which she aimed. She had not, strange to say, much influence with chil-

dren; but she trusted that felling some great trees, little ones might be brought down with them, and rejoiced that there were so many loving women who especially could work amongst the young. Spite of her simple, unassuming manners, which vanquished the prejudices of many, as might naturally be expected, she met with violent opposition; still, without any effort on her part, as one door of usefulness was closed, another opened. Various clergymen warmly espoused her cause, inviting her to their districts during the great festivals of the Church. She would then, after the conclusion of the service, hold meetings in the summer in the open air. These meetings began with a hymn, in which hundreds of deeply affected voices joined. Her discourses continued for two, sometimes even for three hours, the people listening with rapt attention. Her voice was tenderly persuasive; and, as she would describe to them the poor prodigal man or woman returning to the Father's house, after giving them her own experiences, many were the hearts which she won. She exhorted them also to obey the authority of the law, for the Lord's sake; nor did she omit earnest prayer for the Church and its ministers, especially including the pastor of their own parish and his family. Her journeyings through the woods, and her abode in desolate country cabins, undermined her health, yet she never gave up her work, which she regarded as her calling from God. When not laboring abroad, she continued her 'Pictures.' During the winter of 1859, she had a fall on the ice, by which she was considerably hurt; nevertheless, though suffering great pain, she continued the journey she was then upon, for eight days longer, preaching for many hours during the day, and sleeping at night in some humble homestead, forgetting, as she says, the pain and uneasiness she endured, in the kindness of her sisters in the faith, and the praying, singing, reading, and conversation of her spiritual brothers. Towards the end of February of the same winter, waiting one Sunday for some friend in a cold churchyard after service, she was chilled, and subsequently preaching in a small over-heated cabin, she became seriously unwell. From this day her last illness dates, and on the 30th of the following month she departed this life, some of her last words being, 'My spirit is well—onwards!—onwards! Victory and light! I see now clearly—much more clearly!' An intense hatred of sin, of indolence, and luxury, may be stated as the prevailing character of her *Pictures of Christian Life*, which, though not quite completed, have been published as she left them.

The human heart, like a well, if utterly closed in from the outer world, is sure to generate an atmosphere of death.

SUNNY DAYS IN WINTER.

D. F. MACARTHY.

Summer is a glorious season,
Warm, and bright, and pleasant;
But the past is not a reason
To despise the present:
So, while health can climb the mountain,
And the log lights up the hall,
There are sunny days in winter, after all!
Spring, no doubt, hath faded from us,
Maiden-like in charms;
Summer, too, with all her promise,
Perished in our arms:
But the memory of the vanished
Whom our hearts recall,
Maketh sunny days in winter, after all!
True, there's scarce a flower that bloometh,
All the best are dead;
But the wall-flower still perfumeth
Yonder garden bed;
And the arbutus, pearl-blossomed,
Hangs its coral ball:
There are sunny days in winter, after all!
Summer trees are pretty,—very,
And I love them well;
But this holly's glistening berry
None of those excel;
While the fir can warm the landscape,
And the ivy clothes the wall,
There are sunny days in winter, after all!
Sunny hours in every season
Wait the innocent;—
Those who taste with love and reason
What their God has sent;
Those who neither soar too highly,
Nor too lowly fall,
Feel the sunny days of winter, after all!
Then, although our darling treasures
Vanish from the heart;
Then, although our once-loved pleasures
One by one depart;
Though the tomb looms in the distance,
And the mourning pall,
There is sunshine, and no winter, after all!

NOTHING TO SPARE.

What! hast thou naught to spare? Alas! thy lot,
Indeed, is hapless; thou art very poor.
Poorer than thy poor brethren, who have not
The hoarded much, that crieth still for more!
Where are thy baubles? Where thy glittering toys?
Where thy rich trappings? Thy amusements,
where?
The daily luxury, that only cloy?
Oh! look, and see if thou hast "naught to spare?"
Where is thy wasted time? Thy unbreathed word
Of gentleness? Thy hidden talent, where?
The look of pity which thou mightst accord?
Oh! do not tell me thou hast "naught to spare."
Bethink thee ere thou speakest so again,
And for thy needy brethren have some care;
Oh! be more grateful to thy Father, when
So much He giveth thee—so much "to spare."

A. S. Standard.

They are brave who know to speak
For the fallen and the weak;
They are brave who calmly choose
Hatred, scoffing and abuse,
Rather than in silence shrink
From the truth they needs must think;
They are brave who dare to be
In the right with two or three.

THE LOSS OF THE STEAMSHIP "LONDON."

(BY ONE OF THE SURVIVORS.)

(Continued from page 558.)

As the evening wore on, the passengers were nearly all on board. We found that a larger number had joined us there than we had expected to see; so we made a pretty large party, 252, including captain, crew, and all connected with the ship, divided as follows:—59 first-class passengers, 52 second-class, 52 third-class, 89 belonging to the ship, and, I have no doubt, a few stowaways; I was told of some, and I knew of three on board whose names were not on the published list; say there were six, making a total of 258. The number of passengers was 163, not many for so large a ship as the *London*, but 160 too many, as the end proved.

In the course of the evening the usual questions were asked, as it generally is at the beginning of a voyage—What is to be the length of time for the passage? and usually bets are made. One would give her sixty days; or would bet a dinner that we would be able to take one at the "*Albion*," in Bourke Street, by 10th of March. Others would give her sixty-five to seventy days. One man said, "I'll take odds she never gets to Melbourne. Do you remember what I told you at Gravesend, that she looked like a coffin?" Not a very comforting observation, but I remember it distinctly.

The next morning we were out of sight of land: we had left in the night. I asked one who was up at the time of starting, helping to heave the anchor, what was the time then; he said twelve, or little before. This our first day (Saturday) was pleasant—light head wind, ship rolling considerably. The coals piled on deck, in sacks, rolled down, and came very nigh killing a little boy. A good number of passengers on deck—making acquaintance. But this day gave us the last opportunity of seeing much of each other. The weather the next day became severe—it was too unpleasant to be on deck, and a great number were sea-sick and kept to their rooms. I do not think I saw a lady on deck at any time after, excepting on the last day. So Saturday passed over, and Sunday came in, and with it rain, and rather heavy wind, but a little more favorable, and we had now a few sails set. At noon, being on deck, I noticed that the ship's position was posted up, which I now forget; but I distinctly remember that our distance then from Plymouth was 170 miles. Understand what I mean by the position of the ship: on board passenger-vessels, the latitude, longitude, and distance run for the last day, ending at noon, or since last reckoning, is posted up by one of the officers in a conspicuous part of the ship, for the satisfaction of the passengers, who generally keep logs, and can see their position every day on a map or chart. In

the afternoon, a clergyman from the after, or chief saloon—the Rev. Mr. Kerr I think was his name—came to our cabin, in second class, and read prayers and gave a short sermon or exhortation, but under difficulties, as he said he was suffering from sea-sickness: also the water occasionally would come down on his bare head, through the small skylights in the deck-house. Divine service was held in the chief saloon in the morning, I think by Rev. Dr. Wolly. I suppose very few thought of that being their last Sabbath.

Monday, the 8th, came in a little more pleasantly; that is, through the day the sun was to be seen at times, but the wind was still strong and ahead, and the ship under steam, and being low in the water, she made pretty heavy weather of it. The ship's position this day, as far as I can remember, was latitude $46^{\circ} 40'$ N., longitude $7^{\circ} 7'$ W. The distance I can remember more distinctly was 102 miles, we being now 272 miles from Plymouth, and entered on to the Bay of Biscay—that bay of terrible repute for why I did not fully understand, but do now.

There are unpleasant days at sea, and this was one of them: no comfort below, nor pleasure on deck. I am now speaking of the second-class accommodation on board an Australian passenger steamship of *London*, not *Liverpool*. The cabin is between decks, entered by the main hatchway of the ship, nearly midships and just forward of the main-mast. As far as regards the motion of the ship, this is the best part to be in. There were fifty-two passengers and only two stewards, not a sufficient number to do the work. The consequence was, the work was always ahead; everything rough and dirty, everybody complaining.

I felt rather disappointed myself with the arrangements of the ship. Coming down Channel, I saw much to complain of, but said nothing; would make every allowance at the commencement of a voyage, knowing well what those long voyages are, and trusting that all would be right, once we left Plymouth and at sea. But instead of matters improving, they grew worse. Of course, you must make some allowances for the severe weather; and, to make matters worse, there was the steam-winch, that the work of the ship was done by, with its everlasting din and rattle. It was placed on the main deck, close to our hatchway; and while it was working—which was more than half the time—we could not hear each other converse in our cabin; and as for reading—the only solace at sea—why, you would just as much think of taking a book on a cold showery day in winter, and sit on London Bridge to read, as there. On deck it was worse still; for this *London* was a very wet ship, much more so than any I had ever seen. Her decks were continu-

ally covered with water, more or less swashing from one side to the other; and she had such a wholesale way of taking it in. She would roll well over on her side (and she was a devil for rolling!), and scoop in the green seas, and then it would take ten or fifteen minutes before it would run off. The scuppers appeared to me to be very small, and not at all suitable for the purpose. I can very well remember being on deck that afternoon, standing with a few others near the cuddy. You will please understand that the cuddy or chief saloon was on the main-deck, and extended to, say, a third the length of the ship. The deck over it is the poop, and where none but first-class passengers are permitted. From the cuddy forward to the fore-castle is the large, clear main-deck, or waste, protected by bulwarks and a rail on top, in all together over six feet high—a good shelter from the wind and sea. We had not been there long before over came a sea, wetting us effectually, and taking us up to about the knees. Presently we noticed that the water was not running off. "Oh, I see. Who will wade to the side, and take away that door-mat and rub-bish from over the scupper?" It was done, but still no difference. "Get a stick and run it down, perhaps that will clear it. Oh, I see now what is the trouble, the scupper is filled with coal." And so they were most of the time after. They came from the sacks of coal piled on deck. There were also large lumps that had not been put in sacks, which would roll about the decks, to the great danger of men's legs. For two nights after I could hear these lumps of coal rolling about above my head. So at any time after I did not go on deck oftener than was required, for fear of getting hurt; as there were always so many things knocking about the decks, such as lumps of coal, buckets, empty casks, &c., and sometimes we would see a bag of coal moving about with the water. So after remaining on deck until we got nicely drenched, we went to our happy home below, to hear dishes rattling, children crying, women grumbling, and that everlasting steam winch.

While we were at tea this evening (Monday, the 8th) the ship commenced to roll (it is often remarked at sea that a ship generally commences to roll and pitch at meal times), and shipped a great deal of water, which soon found its way down through the skylight on to our heads. Soon after we shipped another heavy sea—or rather dipped it in out of the Bay of Biscay; and it came rushing down our hatchway in a body, causing quite a scene of consternation among the ladies, many screaming at once, "Oh, we are sinking!" others crying, "Shut down the lids of the hatch!" One man who had come home in her from Melbourne said, "Oh, you must not mind this, it is an old trick of the *London's*; and more than

that, if the lids of the hatch are shut down, it will not prevent the water coming down—they are not made properly; the sides of the covering of the hatch don't fit close to the combings, and also the water floats up the lid, and comes down nearly the same as though there were none!" all of which proved true. After a time the water on deck subsided. Then the men had to fall to and carry up the water in buckets out of their state-rooms, to save their clothes from being spoilt. This continued nearly all night; for by the time the rooms were free, down would come another supply. All the women, excepting a few, remained up all night: not that there was any danger—or rather I did not consider there was. About twelve o'clock I went to bed, as our side of the ship was dry, we being then on the windward side. At four in the morning (of Tuesday, the 9th), I found that the ship was then on the other tack, that we had the leeward side, consequently the water; and I heard a lady in the next state room asking some others, her companions who had remained up all night, to come and assist her in keeping the state-room dry, saying they could pray and work too, as she did; I at once got up and assisted her.

When daylight came in, we learned that the wind was still ahead, the weather heavy, the ship under steam, and making very little progress. About ten o'clock I went on deck, and found that the jibboom was carried away, and the fore-royal-mast broken in two and hanging down: soon after the foretopgallant-mast broke off, then the foretop mast, and all hanging down a wreck. That day, some time after, the main-royal-mast was carried away. The first part of the day rather pleasant: I remember the sun was shining when I went on deck to see the wreck of the foretop-mast. But towards the latter part of the day the wind increased—the ship laboring very much, and a prospect of a wild night. Many now began to express fears, and question the propriety of the captain still forcing the ship in the face of a head-sea. We had several passengers on board who had been sailors. One, I remember, John Hickman, from Ballarat, had his wife and four children on board. He told me that he had been brought up to the sea, and was, if I remember right, fourteen years at it. In the afternoon of this day, I saw Hickman come down from the deck. "Well Hickman," said I, "how do matters look on deck?" He said in reply—"I have been a good deal at sea; I have been in a great many vessels, and I know something about them, but I never yet saw one behave as this. She frightens me—I don't know what to make of her." The same opinions were expressed by others. The women all this time were in a constant state of fear; but their fears were no proof of danger. By seven or eight o'clock

matters grew worse, the gale increasing. One of the lifeboats was carried away—lifted out of the davits by the sea. Shipping a deal of water, our hatches had to be closed; but, as I said before, this did not prevent the water coming in, and by nine o'clock in the evening all was confusion and terror in our second-class cabin: ladies clinging to you, and beseeching you to stay beside them; some in their rooms reading and praying, but the majority out in the open cabin. Fear at this time was not confined entirely to the females. Most of the men had fear in their faces. I myself began to feel very uneasy, for I heard expressions of doubt and fear from many who understood nautical matters. Mr. Munroe, one of the surviving passengers, and who had formerly been at sea, came down about twelve o'clock. I asked him how things looked on deck. He said, "I have been on the poop all the night, and the sight up there is really terrible—seas mounting right over her." "Do you think there is any danger?" I asked. "Yes; not so much from the violence of the gale, as the behaviour of the ship." He added that Captain Martin had been on deck all the time, and it was plain to be seen that he was not at rest in his mind as to the fate of his ship. He (Munroe) said, "I dread to be down here, but I am nearly perished by being on deck so long." And no wonder he dreaded being below. Apart from the horror of being in the company of nearly frantic girls and women, who thought that every roll would be the last, and not quite clear on that point yourself, there was the discomfort that at every roll of the ship the water would shoot down the hatchway, first one side, then the other—then wash to and fro the same as on the upper deck. Then worse than all was the steam, produced by water that went down the engine-hatch on to the hot machinery: this steam came forward and lodged in our cabin, which was very suffocating. During any lull of the sea we lifted the lid to get some fresh air, but most of the time we could not see each other five feet apart. Most of the passengers were sitting on the tables. That night was really terrible, but the next was worse. The ship at this time was hove to, and oh! how she would roll! It was no gentle, undulating motion; she would roll on her side until you were in doubts of her ever coming up again. Then up she would come with a jerk; and when she did rise there was a general displacement of boxes, trunks, chairs, buckets, and other movable articles, placed on board in confusion at Gravesend and Plymouth. How the passengers fared in the other parts of the ship, or what their fears were, I can't say. Those in the afterpart, I think, would not see the same danger as we; at any rate they would not be so inconvenienced as we were. We could now

see that we had more than the dangers of a gale to contend with. It was quite evident our ship was deeply, if not over laden. She was a ship built for speed, of great length for her breadth—belonging to a class of ships that cannot be loaded with safety in proportion to her tonnage, like those of the old style. She was, perhaps, safe enough when properly loaded, with less top-hamper, not so heavily sparred, and properly equipped. And besides, it was the prevailing opinion on board that she was not prepared for a gale. It appeared as if she had been forced to sea in a hurry, and there was confusion above deck as well as below. Work was always ahead. The sailors were continually at work, and yet the ship was never "snugged," as the saying is at sea. The crew had not got used to the ship; and, another difficulty, many were foreigners, and did not understand English. Once I saw Mr. Angel, one of the officers, directing a man to do something: the poor fellow was anxious to do it right, but every attempt was wrong; at last I discovered that he did not understand a word that was said to him. I also noticed a want of regularity and discipline in the ship. I make this observation with no desire to throw discredit on any one, or insinuate that the loss of the ship was in any way attributable to this; but I think it will all tend to show that there was not that sufficient preparation, or that proper regard to life, at the outset, and in the despatching of the ship, that there ought to have been; yet I feel fully convinced as I now write this, that had the same gale overtaken us two months after, on the last week of our voyage, the *London* would not have succumbed to it as she did. I believe she was a good, strong, well-built ship; but that is not where the fault rests; it's in the cramming her so full of goods that even the space allotted to the passengers was encroached on. This interfered with the working of the ship when trouble overtook us.

(To be continued.)

"Every species of intolerance," says Paley, "which enjoins suppression and silence, and every species of persecution which enforces such injunctions, is averse to the progress of truth, inasmuch as it causes that to be fixed by one set of men at one time, which is much better and with much more probability of success left to the independent and progressive inquiries of separate individuals."

Survey the page of ecclesiastical history; mark the intervals of languor when the right of private judgment was denied—then was the church of Christ debilitated and pestered with a heterogeneous mass of errors. "No man can write down truth. Inquiry is to truth what friction is to the diamond. It proves its hard-

ness, adds to its lustre, and excites new admiration."

No. 30 N. Third St.

Philada., 11th mo. 3d, 1866.

For Friends' Intelligencer.

REVIEW OF THE WEATHER, &c. TENTH MONTH.

	1865.	1866.
Rain during some portion of the 24 hours,.....	10 days.	8 days.
Rain all or nearly all day,...	0 "	2 "
Cloudy, without storms,.....	7 "	6 "
Clear, in the ordinary ac- ception of the term,.....	14 "	15 "
	31 "	31 "

TEMPERATURE, RAIN, DEATHS, &c.

	1865.	1866.
Mean temperature of 10th month per Penna. Hospital.	54.88 deg.	58.35 deg.
Highest do. during month,	79.00 "	73.50 "
Lowest do. do. do.	39.50 "	40.00 "
Rain during the month,.....	3.05 in.	4.15 in.
Deaths during the month, being for 4 current weeks for each year.....	1084	1428

Average of the mean temperature of 10th month for the past seventy-seven years	54.59 deg.
Highest mean of do. during that entire period, 1793.....	64.00 "
Lowest do. do. do. 1827	46.00 "

COMPARISON OF RAIN.

	1865.	1866.
Totals for the first six mos. of each year.....	28.94 "	22.47 "
Seventh month.....	2.97 "	2.52 "
Eighth month.....	3.75 "	2.18 "
Ninth month.....	7.96 "	8.70 "
Tenth month.....	3.05 "	4.15 "
Totals.....	46.67 "	40.02 "

From the above it will be seen that the temperature of the month just passed has exceeded that of the corresponding month of last year by about *three and one half degrees*, although the difference in the extremes is about *nine degrees less*. The marine record for last month will show such a sorrowful list of disasters as has probably never before been seen.

The devastations by fire during the past month or two have also been terrible. Witness the following in Quebec: "The number of lives lost is now known to be six. The number of houses burned is found to

be even larger than previously estimated, and numbers twenty-three hundred. Nearly twenty thousand people are without shelter. The skating ring, drill sheds, Marine hospital, the Jacques Castor Hall, and the lower town market are filled with people."

It may not be deemed inappropriate to introduce the following, clipped from an exchange paper.

"A thunderbolt from a perfectly cloudless sky struck a church and three dwelling houses at Rising Sun, Indiana, a few days ago. It killed a girl outright, and stripped all the clothing from a boy, whom, strange to say, it only stunned. A more remarkable electrical phenomenon has rarely occurred."

While the following interesting item will possess still more interest should the prediction be verified:

"*Meteors expected*—On the 13th or 14th of November next, says Professor Newton, of Yale College, a prodigious flight of meteors, the most imposing of its kind, will make its appearance, probably for the last time in this century. Only thirteen of these meteoric showers are recorded between the years 903 and 1833. That of the latter year was a sublime spectacle. Arago computes that not less than two hundred and forty thousand meteors were visible above the horizon of Boston on the morning of the 13th of November, 1833. This display was seen all over North America. A similar display was seen by Humboldt, at Cumana, South America in 1790."

J. M. E.

ITEMS.

The Queen of Spain has issued a proclamation that any person held in Slavery in Cuba or Porto Rico, shall be considered free the moment he lands in Spain, whatever may be the cause of his coming thither; and shall also be free whenever, either in company with the master or sent by him, he enters the territory or jurisdiction of any State where slavery does not exist.

With four weights of respectively one pound, three pounds, nine pounds, and twenty-seven pounds, any number of pounds from one to forty may be weighed.

Until recently the scientific world has held, from the almost universal absence of remains in the lower strata, that man had no existence on the earth until after the period of the fossil mastodon, which the caution of the inductive generalizers of our day still permits us to know is by them reckoned at hundreds of thousands of years ago. Three or four discoveries have of late thrown some doubt upon the matter. A singular relic was recently received at the Smithsonian Institution. It is a piece of matting wrought of the bark of the cane (*Arundinaria macrospermum*) by the hand of man, which was found in a stratum two feet below that in which were found, about the same spot, the fossil remains of an elephant of the remote period. The specimen was found on Petit Anse Island, near Vermillion Bay, on the coast of Louisiana, last Spring. This island, independently of this extraordinary revelation, is itself sufficiently wonderful.

An Island of Salt.—The extent of the isle is about five thousand acres, covered with a soil from fifteen to twenty feet deep. At this depth, in any part of the tract, may be found a stratum of hard, pure rock salt, of unknown depth, and, practically, inexhaustible quantity. It is this, within three feet of which it was found, that preserved the matting referred to. This salt, of which a large mass is deposited in the Smithsonian Institution, is almost chemically pure, very strong, and nearly or quite as hard as sandstone. Mention is historically made of its discovery

by the early explorers of the Gulf coast, as Professor Baird informs me, but without knowledge of the fact, the rebels made the discovery, and drew thence for a time considerable supplies of salt.

Salt is, of course, soluble in water, but as the solution must take place on the surface of the mass, where the crystallization is so perfectly compact, as in this specimen, and as the depth of this stratum has never been measured, there is no telling on what foundations, licked through the ages by the craving sea, may rest the "everlasting" rocks of the coast. —*N. Y. Evening Post.*

MANUFACTURE OF KNIT GOODS IN THE UNITED STATES.—The Boston *Commercial Bulletin* remarks: This business now employs in England about 80,000 operatives, and produces over \$20,000,000 of goods per year. The manufacture of knit goods in the United States, previous to the late war, was trifling in extent and value; but the recent high price of gold and scarcity of imported goods stimulated its development, and now it is estimated that not less than 400 sets of machinery and 40,000 hands are employed in this single branch of industry in the United States. The value of the goods produced is believed to be about \$20,000,000 per year.

"The New England States, with New York, New Jersey and Pennsylvania, nearly monopolize this business; New York taking the lead with her extensive mills at Cohoes. Philadelphia is largely engaged in the manufacture of what is known as 'fancy hosiery,' including hoods, shawls, sountags, scarfs, etc., all of which are made of the best American wool. Most of the labor in this branch of the business is performed by American women. In New York, machine made goods principally engage the attention of manufacturers—goods in which the webbing is wholly made by power, and the sewing done by machines.

"It is estimated that there are still in the United States 27,000,000 persons who will use at least three pairs of stockings per annum, requiring 81,000,000 pairs; 9,000,000 males who will want one knit shirt and one pair of knit drawers each per year, making 9,000,000 of each; 450,000 females will wear under vests and drawers; and the aggregate value of these goods per year will be about \$13,000,000.

"One of the peculiarities of this branch of manufacture is in the fact that it furnishes remunerative employment to women at their own homes. In the manufacture of all-wool Shaker socks, for instance, the finishing of heels and toes is all done outside the mill—the labor of one hundred and five women on this work being required for each set of machinery in operation. Each set engaged on the hand-seamed goods, on which the knitting is done by machinery, and the seaming by hand, requires the labor of eighty women outside the mill."—*Country Gentleman.*

THE FREEDMEN.—Increased efforts are making in Mississippi to extend the benefits of education to the freed-people, and strong appeals are made to all liberal-minded citizens of the State to co-operate with the benevolent societies of the North to this most desirable end.

It is due to the State authorities to say, that all outrages brought to their notice have received prompt attention, and no pains have been spared to arrest and bring to justice the offenders. The grain crop, though early in the season, promising an abundant yield, has, in consequence of the protracted drought, proved an almost total failure, and a competent observer has concluded that it will not support the people beyond the 1st of January next. The cotton crop, through the ravages of the army worm, has

experienced a like destruction. This insect had made its appearance but partially in August, but since then has come in myriads and completed its work of ruin. In addition to this disaster, the heavy rains ensuing prevented the gathering of the residue of the cotton spared from the ravages of the worm. From these causes it is confidently estimated that the amount of cotton produced will not repay the amount invested in planting and caring for it.

SELECTIONS FROM THE WRITINGS OF JOHN BARCLAY.

(Continued from page 564.)
To Thomas Shillito.

CLAPHAM, 30th of Sixth month, 1817.

RESPECTED FRIEND, T. S.—Having fulfilled the object which induced me to send the preceding lines, I am inclined to add a few more, which, I am ready to believe, I should have done well to communicate to thee when last in thy company. I faintly recollect, many years past, when but very young, and at school, hearing thee, (I think I cannot be mistaken as to its being thyself,) in a meeting for worship at Wandsworth, largely and powerfully engaged in testimony. I also remember my own feelings at that season, how ready I was to laugh thee to scorn, and to despise thee. But I have been met with like poor Saul; and am now brought to such a pass that I cannot find satisfaction or even safety in any thing short of a warm and unreserved espousal of that cause, which I but lately made light of. The subjects to which thou wast concerned to call the serious attention of Friends at the last Yearly Meeting, have been deeply felt by me; and I may truly say, that nearly as long as I have been privileged by an acquaintance with the houses and families of Friends, (which, though I was born a member, is not long,) I have at times almost mourned at the great relaxation from Gospel strictness, and simplicity of living, so evident amongst us. Surely I have thought if we were to cast out the

crowd of opinions, which have got the first place in our minds,—opinions founded or cherished by custom, example and education in the good, and by vanity, or something worse, in the bad; and if we were coolly and calmly to listen to the silent dictates of best wisdom, we should clearly see that the holy principle which we profess (to use the words of John Woolman) inevitably "leads those who faithfully follow it to apply all the gifts of Divine Providence to the purposes for which they were intended." I venture to say we should then find a greater necessity laid upon us to exercise self-denial in what we are apt to think little matters, than is now often thought of; we should have such a testimony to bear against superfluity, extravagance, ostentation, inconsistency and the unreasonable use of those things which perish with the using, as we now profess to have against the more flagrantly, foolish customs and fashions of the world. Whatever some may think in regard to these things, I feel assured that he, who, in his outward appearance or behaviour, bears any remnant of a testimony against the customs and fashions of the world, ought to be ashamed of himself, if he belies his avowed sentiments by a departure from simplicity in the furniture of his house, and way of living. Wilt thou excuse my saying a little more, dear friend, on so important a subject as this has long felt to me? I have been almost ready to blush for some at whose houses I have been, where pier-glasses with a profusion of gills

carving and ornament about them, delicately papered rooms with rich borders, damask table-cloths curiously worked and figured extremely fine, expensive cut glass, and gay carpets of many colors, are neither spared nor scrupled at. Some, indeed, seem to be desirous of disguising and excusing their violation of the simplicity, which their better feelings convince them they should practice by saying that this or the other new or fashionable vanity is an improvement on the old article,—that this gay and gaudy trumpery will wear and keep its color better than a plainer one,—that this precious bauble was given them by their relations. Thus are they endeavoring to satisfy the inquiries of those who love consistent plainness, and to silence that uneasy inmate, the unflattering witness which is following them. I have been much exercised and troubled on my own account, and on that of others, as to these matters; and have been very desirous that we may all keep clear of these departures.

Thus thou seest I have felt much freedom in addressing thee, even like that of an old acquaintance; and hope I shall never want this honest openness towards such as are examples in conduct and conversation; for when there is a want in this respect it seems with me to indicate a want of that which brings with it boldness and confidence towards all men, even a fear of One who is greater than man. With desires that, in receiving and reading this communication from one who is so young in years and experience, thou mayst be encouraged in thy arduous labor, in which I have felt much sympathy with thee; and trusting it may be blessed by the reward of peace to thyself, and by the return of many a backslider to the living fountain,

I remain thy sincere friend,

J. B.

1817, *Seventh month 4th*.—In reading the 13th chapter of the 1st book of Kings, I have at this time been much instructed, and am ready to take the lesson to myself as a warning or special admonition. Herein we see that it availed nothing in respect to the future, that the prophet had (though so lately) been favored with a divine commission, and was hitherto upright in the faithful discharge of that arduous duty which devolved upon him from his Lord,—even that of openly proclaiming the vengeance of the Almighty against the idolatry that had overtaken the people,—and boldly asserting the destruction of the priests even to their faces, and in the presence of their king; saying to him in reply to his invitation,—“If thou wilt give me half thine house, I will not go in with thee; neither will I eat bread or drink water in this place;”—yet, after all, he was weak enough to give up his own clear convictions of duty, as revealed in and to himself, (the truth of which

was indubitably evinced and sealed by the miracle, which attended the partial performance of them,) and to prefer obeying the old prophet before compliance with “the word of the Lord.” O! how greatly have I longed in a peculiar and especial manner for myself, as I am now situated and circumstanced, that I may steadfastly adhere to no other law but the law written on the heart; and closely to attend to the secret dictates of best wisdom alone. For assuredly there is no safety, but in implicitly giving up to the reproofs of instruction, which are and ever will be the way to life. “Be ye followers of me,” says the apostle Paul; but he adds,—“even as I also am of Christ;” intimating surely that the examples of others in life and conversation are to be followed only so far as they accord with the example and precepts of Him who said, “I am the light of the world,”—“whilst ye have the light believe in the light,”—“walk while ye have the light.” So that in looking back at such acts of dedication, as have been, according to my belief, required at my hands, and in contemplating the peace which has ensued after even the smallest surrender, when the sacrifice has been offered out of a sincere and upright heart; I have earnestly, and I may truly say above every other earthly consideration, desired that nothing may be suffered to hinder me—to turn me aside even in trifling, as well as in great matters and concerns, from carefully, closely, unremittingly attending to, and abiding by, the counsels and teachings of that divine principle, even the Spirit of Christ, which is given to every one for his guide in the way of salvation. I have found amongst many other acts and false suggestions and temptations, which the enemy makes use of to deter us from giving up ourselves to the guidance of the Holy Spirit, one which is much talked of and acted upon by many through their own inexperience, and the deceit of the prince of darkness, namely, that these leadings, and secret influences, and inspirations are not distinguishable from the workings of our own mental or rational powers; and if they are distinguishable, that these persons have not felt them or known them. Now, in answer to this, which has been my own delusion, I may say that every one who has for a long season habitually stifled by disobedience this divine monitor, cannot expect to hear or to understand so plainly its voice as those do who have for a long period listened to its secret whispers, and surrendered themselves unreservedly to its injunctions; these can testify that they follow no uncertain vapor or idle tale; but that its reproofs are to be plainly perceived, and its incitements early to be felt; and that the peace they witness cannot be imitated, neither can it be expressed to the understandings, or conceived by the imaginations of such

as have none of this blessed experience. Nor let any poor, seeking, sincere or serious minds be discouraged that they do not upon submission immediately or very quickly feel what they wait to feel, even the arising of that secret, influencing, actuating, constraining and restraining power or Spirit of the Lord. Let them not be discouraged if this be their case, nor be dismayed if even after some considerable sacrifices and trying testimonies of sincerity, they find not that rich reward of peace which they had expected. Let such remember it is written,—“He that *endureth to the end*, the same shall be saved: now, where there is a moment's enduring only, and that previous to or whilst in the performance of what is required, this cannot be called “enduring to the end;” but O! it is that “resistance unto blood” (as it were) in faith and faithfulness, that “patient continuance in well doing,” in defiance of difficulties, discouragement, darkness, doubt and distress, which will give us the victory, and will make us, through the mercy of God in Christ Jesus, heirs of that eternity of peace, and rest, and joy, which we know is prepared for such as overcome.

1817, *Ninth month 6th*.—For more than a week past I have been plunged, by the permission of best wisdom, into such a depth of darkness and discouragement, without any perceptible glimmer of alleviation or ray of comfort, that my poor, tossed, troubled soul seems on the very point of giving up the contest, and losing hold of its only support and security. Whilst the heavens are as brass, and the earth as it were iron, what is frail, helpless man to do for himself? It seems to my view that there is nothing left for him to do to aid himself, or to deliver himself out of his forlorn situation, but to sink down into his own nothingness; and there, as in the dust, to remain all the Lord's determined time, until he shall seem meet to appoint unto him “beauty for ashes, the oil of joy for mourning, the garment of praise for the spirit of heaviness.”

When I took my pen to write what has thus been written, I did not expect to come to the preceding conclusion, or that any such reflection would arise out of the subject. The Lord grant that what I have written may be more than mere words; and that through and over all difficulty and distress I may come forth the wiser and the better, and more devoted to his disposal, and more patient under his dispensations.

1817, *Ninth month 17th*.—I believe myself called upon to bear an open, unequivocal, unflinching testimony, not only against all pride, extravagance, ostentation and excess, but also in a peculiar manner against all the secret insinuations and covered appearances, under which they are creeping in, and growing up

amongst us as a Society. I have for years believed that the declension amongst Friends from the true standard of simplicity is great; and I am of the mind that if they had diligently hearkened unto, and implicitly obeyed the dictates of best Wisdom, they would have been led to “apply all the gifts of Divine Providence to the purposes for which they were intended.” I believe that it is my duty to live in such an humble, plain, homely, simple manner, as that neither in the furniture, food or clothing used, any misapplication of the gifts of Divine providence be admitted or encouraged.

1817, *Ninth month*.—“Day unto day uttereth speech, and night unto night showeth knowledge;” and where is an end to praising the Lord for his mercy, which “endureth forever,” and which is abundantly shed abroad to the rejoicing of the hearts of those that seek to serve Him, and to the great comfort of their souls in the midst of much tribulation. O! that there may be more and more reliance, unshaken, immovable reliance on Him who thus daily scatters and profusely deals out tokens of his loving-kindness. O! that there may be an increase of faith experienced, an increase of resignation proportioned to the nearer approach of perplexity and difficulty and embarrassment on every hand. And now when the waves of affliction run high, and the floods seem irresistible, may the Lord Almighty, who “is mightier than the noise of many waters,” in his own time lift up a standard against them, saying, “Thus far, but no farther.” O! surely, He who remains as ever to be the only sure “confidence of all the ends of the earth,”—He who can overrule events for the good of those that sincerely seek him, will not overlook or despise any of those who desire to look unto, and who lean upon Him alone in all their troubles.

“O! Lord God of my fathers, art not thou God in heaven? and rulest thou not over all the kingdoms of the heathen? and in thy hand is there not power and might, so that none is able to withstand thee?” Art not thou my God? Art not thou my joy, my delight, my glory, the crown of my rejoicing? Art not thou He that hath hitherto helped me, that hath brought me out of much evil, that hath inclined my heart to seek thee, and my soul to love and fear thee? Wilt thou not arise for my help in the time of trouble, of temptation, of darkness, of distress, from whatever cause these may proceed, whether by thy permission, or by thy appointment? O! Lord, thou knowest perfectly what are the causes of my present disquietude, and how to dispose of all things for the best, both as to the present and as to the future: thou knowest how poor, and weak, and utterly incapable I am to help myself in any exigency that may arise; and that without thee nothing but confusion, and sorrow, and desolation is

likely to be my portion; O! make me yet more deeply and lastingly sensible of this, and that "I have no might against this great company that cometh against me, neither know I rightly what to do." I beseech thee renew daily and hourly my faith, and dependence, and watchfulness unto prayer, and my love and fear of thee. O! arm me with thy gloriously impenetrable armor, and make me strong in thee and in the power of thy might, that through thy abundantly sufficient grace and truth I may be fit for all occasions and trials to which thou mayst see meet to call me; that so my eye being continually upon thee thy precious cause may prosper, and thy name be exalted by me, in me and through me, both whilst my soul is confined in this frail body, and for ever and ever. Amen.

(To be continued.)

When God makes our cross a little heavier, he means that we shall come to him for added strength to carry it. We must draw closer to the Lord our Strength and lean more simply upon him. He has fulness without limit, and of his fulness shall we receive.

MEMOIR OF REBECCA B. THOMPSON.

(Continued from page 568.)

MILL CREEK, Tenth month 23d, 1851.

Dear Friend,—After a season of almost (as I feared) total banishment from the presence of my Heavenly Father, a little speck of light seemed at last to arise, bringing with it the evidence that I must address an absent friend, as way may seem to open in the light of Truth; not feeling myself at liberty to correspond, even with those I truly love, in any other manner, except in way of business; for I have plainly seen, that in my own will and time I can do no good thing, but that the Lord's *time* and *will* is the alone *right time and way*; and if I move not thus, I mar the work he designed me to perform. And as this is my situation, it is, I believe, the condition of others of the human family, dependent as they are upon the same great Author for every blessing, and therefore required to render obedience to His dictates, made manifest in the secret of their hearts, and which they can never correctly understand until there is a willingness, not only to listen to, but also to comply therewith. For as God is a spirit, they who worship him must worship him in spirit and in truth, for such he seeketh to worship him. They that seek me shall find me, is one of his declarations to the children of men; and of this class he knows no distinction, but, of "every nation, kindred, tongue and people, they that fear God and work righteousness are accepted of him;" they who fear to offend him, by being disobedient to his inspeaking voice, which cannot be heard in the noise and confusion which

abound in the world, or the worldly wisdom of man, but in the silence of all flesh. All the imaginations of the creature must be laid low in the dust before Him, who says, "Keep silence before me, oh! ye isles, and let the people hear my voice, that they may understand my law, that they may write it in their inmost parts." How plain, then, that there must be a willingness to hear, before much knowledge is gained in divine things. "The sluggard that will not plow by reason of the cold, shall beg in harvest and have nothing;" for if the ground is not prepared for the reception of the seed, how can we expect a crop to be produced and gathered into the garner where it will be protected from the whirlwind and the storm that rages around, scattering as to the forewinds of heaven all that is not founded in the immutable Truth? And as all these testimonies are to be gathered from the Scriptures, given forth by the inspiration of God, for the instruction of His finite dependent creature man, who is incapable of himself to judge of the things which pertain to the salvation of his immortal soul, he must receive that knowledge solely from God, who formed him in the beginning, and consequently has all power to do with him as may seem good in his sight. And although this brings us into the littleness of self, and prostrates us at his feet as humble suppliants at the throne of Grace, yet it must be submitted too, for it is "by grace ye are saved if ye are," and not by any merit of your own; all belongs to God. This, then, my friend, is the foundation upon which the church of Christ is built—the *revealed will of God to man*. For he says, "Thou art Peter, and upon this rock I will build my church, and the gates of hell shall not prevail against it." Neither shall the combined reasoning powers of man overthrow what He has established in order more fully to show forth His marvellous power, by bringing all into subjection unto Him, whereby all glory and honor is given to His great name. And as this is the principle and object of the formation of our beloved Society, can it be sustained in any other way than the one alluded to? And yet how prone we are to endeavor to keep it together by doing things in our own wisdom which we should leave undone, and in this way often mar the work. This I have known from a degree of experience, as I feel that I have sometimes missed it in this way, even when the motive was good. Fully convinced I am that it requires strict watchfulness on our parts, lest we step aside from the beaten path. If we should even fear for the safety of the ark, let us not in our own wills put forth a hand to steady it, lest peradventure we retard the performance of that which would build it up by simply allowing His will to rule and reign within us. Feeling, as is often my portion, one

of the poorest and weakest of the Father's flock, and that in me dwelleth no good thing, yet the aspirations of my spirit are poured forth unto the Father of spirits that he will condescend to bless my feeble efforts to perform his will even in the littleness; knowing, as I do, that if I am not faithful in the little, I will not be made ruler over more. "He that is not faithful in the little, shall never be made ruler over more." Let none then despise the day of small things, as it is by little and little we rise or fall; rise in favor with Him, or bring upon ourselves the divine displeasure by disobedience to His command, as manifested in the secret of our hearts. No keener anguish of spirit have I ever known than for unfaithfulness, even in very little things. And if this is the state in which we are placed for the neglect of trivial things, how much greater must be the condemnation of those who slight His internal voice, which has been wooing them to forsake the evil of their ways and come unto Him, until His locks are wet as with the dew of the night, and there is a fearful looking for the judgment; for he has declared His spirit shall not always strive with men, but such as they sow, such shall they reap; if they sow unto the flesh, they shall of the flesh reap corruption; but if to the spirit, life everlasting. The salutation of the spirit unto thee through me, a poor weak worm of the dust, is, that thou slight not the day of small things, lest thou fall little by little, until thou comest unto the state which I alluded to in the commencement of this letter, even that of total banishment from the presence of thy Heavenly Father. As I have not written this in my own will; on the contrary, would gladly have been excused, having been under the necessity of neglecting many things which seemed to press heavily upon me; but I felt that no outward things, however rational and useful they may be, must ever interfere with the performance of that which my Heavenly Father requires at my hands. In that love which is not confined to persons or sect, I remain, thy friend,

REBECCA B. THOMPSON.

(To be continued.)

Many suppose Heaven to be a place where the prophecies which relate to the salvation of mankind will be fulfilled; and therefore, instead of looking for the coming of Christ's kingdom to them on earth, are indifferent whether they are prepared for it by suitable dispositions or not. Thus one of the Protestant Bishops says of Heaven, "There nation will no more lift up sword against nation, nor learn war any more;" as if the wrathful spirit of man would die away with the body, and a flame of Divine love naturally rise in the soul from its ashes.—*G. Dillwyn.*

CHRISTIAN COURTESY.

"A Christian is the highest style of man," says the poet. A gentleman is the highest style of man, says the lover of fashion. The true Christian is the most accomplished gentleman, says the philosopher. The most refined, generous, and noble sentiments are the fruit of Christian culture. The Gospel everywhere inculcates self-denial, self-sacrifice, and disinterested love. These qualities are the foundation of all genuine politeness. There is a passage in the biography of Abraham, recorded in the 23d chapter of Genesis, which shows that the spirit of the Gospel prevailed under the patriarchal dispensation. True courtesy is the same in all ages.

"One touch of nature makes the whole world kin."

One noble action unites distant ages, and brings to our hearts a touch of pathos over the sleeping dust of a hundred generations of men. A cordon of human souls constitutes the telegraphic cable which conveys down the long track of the ages the generous emotions of an infant world. Abraham, in a strange land, was bereft of the wife of his youth. Bowed with sorrow, he came before the assembled inhabitants, and said, "I am a stranger and a sojourner with you, give me a possession of a burying-place with you, that I may bury my dead out of my sight." The request was answered with matchless dignity and courtesy by the rulers of the nation, "Thou art a mighty prince among us; in the choice of our sepulchres bury thy dead; none of us shall withhold from thee his sepulchre, but that thou mayest bury thy dead." Abraham bowed his thanks, and communed with the people. He asked not a gift, but the right of purchase. He indicated his choice of the field of Ephron. The reply of Ephron is one of true nobility and generosity. "Nay, my lord, hear me. The field give I thee, and the cave that is therein, I give it thee. In the presence of the sons of my people give I it thee; bury thy dead." The world's entire history does not record a more princely benefaction. Abraham, with like dignity, declines the gift, and offers the full value of the field. "The land," said the emir, "is worth four hundred shekels of silver; what is that betwixt me and thee? bury therefore thy dead." This was a very large sum for those days. The offer exceeds even royal magnificence in such an age; but Abraham, with some lofty courtesy with which the offer was made, weighed to Ephron the silver, for there were no coins in those days, and received public possession of the field. As there were no written records of titles in that early age, the bargain was ratified "in the presence of the children of Heth, before all that went into the gate of his city."

What a noble picture of true politeness is here given for the instruction of the men of all

subsequent ages! This delightful interchange of courtly sentiments will be read in all tongues and in all the generations of articulate speaking men down to the last syllable of recorded time.

Every portion of the Bible has its lessons of wisdom for the thoughtful mind. The history and biography there recorded are often more instructive than its precious doctrines and still more precious promises. We are apt sometimes to think that "we are the people, and wisdom will die with us;" but according to a German proverb, "Behind the mountains there are people." Beyond the highest ridges of distant ages there are proofs of wisdom, kindness, and love. What noble sentiments of patriotism warmed the breast of dying Israel, the founder of a great nation, when he remembered the resting-place of Isaac his father, and Abraham his grandfather, and charged his best beloved son saying, "Bury me with my fathers in the cave that is in the field of Ephron the Hittite." Breaking through the barriers of an unknown tongue, and sweeping with lightning speed over the track of ages, the sympathetic soul of to-day hovers over the couch of the dying patriarch, and listens to the inspired and prophetic words of his lips as he briefly portrayed the character of each of his sons. For thirty-five centuries succeeding generations have consented to honor the last resting-place of the father of the faithful and his illustrious posterity. Over that hallowed cave in Hebron stands one of the most magnificent of Mohammedan mosques, which no unbeliever was ever permitted to enter, till, by a liberal bribe, the Prince of Wales, a few years ago, gained admission to its sacred precincts.—*Western Christian Advocate*.

THE TWO VOICES.

When Guttenberg, the first printer, was working in his cell in the monastery of St. Aboegot, he tells us that he heard two voices address him. The one bade him desist; told him the power his invention would put in the hands of bad men to propagate their wickedness; told him how men would profane the art he had created, and how posterity would have cause to curse the man who gave it to the world. So impressed was Guttenberg with what he heard, that he took a hammer, and broke to pieces the types he had so laboriously put together. His work of destruction was only stayed by another voice, sweet and musical, that fell on his ear, telling him to go on, and to rejoice in his work; that all good might be made the cause of evil, but that God would bless the right in the end. So to all of us still come those voices that came to Guttenberg; the one calling us to work while it is called to-day—to try to leave this world better than we found it; and the other tempting us to give over and take our

ease—to leave the plough in mid-furrow, and to rest on our oars when we should be pulling against the stream.—*The Methodist*.

From the British Friend.

THE TRUE STORY OF DINAH EVANS.

Towards the close of the last century, Dinah Evans, wife of Seth Evans, himself a useful local preacher, commenced her public labors in Derbyshire. She is described as "one of the most pure-minded and holy women that ever adorned the Church of Christ on earth." In her childhood she was remarkable for her docility, conscientiousness, and sweet disposition. Her early girlhood was consecrated to religion; and when Wesley's travels and labors had raised up, throughout the land, societies in the social worship of which women were allowed to share, her rare natural talents found an appropriate sphere of usefulness which no other denomination except Quakerism then afforded. She preached in cottages and sometimes in the open air. Her appearance, her womanly delicacy, and her affecting eloquence, subdued the rudest multitudes into reverence and tenderness toward her; and she assisted in an extraordinary degree in laying the foundations of the Church in many benighted districts. She was a constant visitor to the abodes of the poor and wretched, to prisons and almshouses; she penetrated into the dens of crime and infamy, the charm of her benign presence and speech securing her not only protection, but welcome among the most brutal men. She even followed the penitent murderers to the gallows, ministering the word of life to her till the last moment among the pitiless and jeering throng. Elizabeth Fry, the Quaker philanthropist, could not fail to sympathize with such a woman; she became her friend and counsellor, and encouraged her in her beneficent work. Dinah Evans represented, in her gentle but ardent nature, the best traits of both Quakerism and Methodism.

Seth Evans, then a class-leader, heard her at Ashbourne, and has left a brief allusion to the occasion:—"The members of my class invited me to go to Ashbourne with them to hear a pious and devoted female, from Nottingham, preach. Truly, it may be said of her, she is a burning and shining light. She preached, with great power and unction from above, to a crowded congregation. Her doctrine is sound and simple. Simplicity, love, and sweetness, are blended in her. Her whole heart is in the work. She is made instrumental in the conversion of many sinners. The morning of the resurrection will reveal more than we know of her usefulness."

She became his wife and his assistant in humble efforts for the religious improvement of the rustic inhabitants of Royston and its neighboring villages. A great religious interest soon

ensued in that town, where there were but few Methodists, and in Snelston, where there were none. Hundreds flocked to hear the Gospel from her lips, in the open air, or in barns, for the cottages could not accommodate the crowds. Classes and prayer-meetings were established in many houses, the village ale-houses were deserted, and a visible change came over the whole region. Her example of interest for the poor excited the charity of her neighbors, and the afflicted found sympathy and relief, such as they never before received.

Seth and Dinah Evans founded Methodism in Edlaston, which, before his death, was adorned with a substantial Wesleyan chapel. They removed from Royston to Derby. It is said that old men, who were then little children, still recall the sorrowful day of their departure from the village, for it was mourned as a day of bereavement not only to the poor, but to all its families. They founded Methodism in Derby by forming a class. They preached out of doors in all the adjacent villages. At Millhouse, about thirteen miles from Derby, Seth Evans organized a society of four members, which soon increased to between twenty and thirty, and afforded two preachers to the Conference, one of whom became a missionary to the West Indies. His wife also began a class of three or four females, and in a short time she had three such weekly meetings under her care. They frequently walked fifteen miles on Sunday to preach in neglected hamlets. "Never," he wrote years after her death, "did I hear my wife complain. On the contrary, she always held up my hands, and urged me to take up my cross, and not grow weary in well doing. A few years after our arrival at Millhouse, a great revival broke out in Wirksworth, and also at our factory. There was a most powerful shaking among the hardest and worst of sinners. These were indeed happy days. There are a few left who witnessed those happy scenes; but the greater part of the converts have gone to their rest."

Dinah Evans died at Wirksworth, of a lingering disease, during which it is said that sermons were heard, from her deathbed, more "eloquent than ever fell from her lips on Royston Green." She passed away with the meek unutterable peace which had given so much dignity and grace to her life. Her husband could not but suffer deeply from the loss of such a wife. It shattered his health; his faculties began to fail; he could seldom allude to her without tears. Unable to preach any more, he spent the remaining years of his life in visiting the sick and the dying: and at last, with unfaltering hope, departed to rejoin her in heaven. So exemplary and beautiful with holiness had been their united lives, that one who knew them well, but cared not for his own soul, said he

"did not believe that our first parents in Eden were more pure than they."

We believe that it is not what a man may profess, or pretend to be, that should establish his claim to the Christian name, but what he is seen and known to be, in all those relations and intercourses which try and prove "what spirit he is of."

SELF-CONQUEST.

The wisest of men, King Solomon, says, "The beginning of strife is as when one letteth out water." In some countries where the shore is low, as in Holland, they raise immense mounds, or dykes of earth, to keep out the waves of ocean. If there should be the smallest breach in the dyke, the water begins to press from all parts towards the opening; and if not immediately stopped, the sea overcomes all resistance, and sweeps away the barriers, burying cities and villages beneath the flood, and spreading misery and ruin all around. "Therefore," speaks Solomon again, "leave off contention before it be meddled with,"—rather, before it be "mingled together;" that is, before your spirits be joined in conflict, before you deal out hard words against one another.

"Greater," says Solomon, "is he that ruleth his own spirit than he that taketh a city." Courage and skill are only needed in the one case: but what efforts, and above all, what strength from God, to accomplish the other! Such conquests, however, may and have been made, and that even by the young. As an illustration, let me mention how a little girl acted under circumstances of provocation, and the victory which she gained over herself.

Two little sisters—Frances about seven, and Augusta about five years old—were as happy as little girls could be, loving their parents and each other dearly. Sometimes, however, as it happens with the best friends, little differences would arise. On one of those occasions, Frances, perceiving how matters were tending, with a thoughtfulness, decision, and self-command surprising in so young a child, said, "I am getting angry; I had better go out of the room for a few minutes." She acted immediately upon her resolution, and left the room for a short time. When she returned the storm was hushed, and they went to their play as happy as ever.

This is no imaginary story, but a fact, and occurred just as it is related; and it teaches our young friends, nay, all of us, a most useful lesson.

Were all children to act like the little girl I have mentioned, how many sad scenes would be avoided, and what happiness would spring up in youthful hearts from self-conquest. There is this to encourage us, that just as bad habits

grow in strength, the more they are yielded to, so each time temper is overcome, will strength be gained for future conflict. Only remember, no effort of your own can accomplish it without the aid of God's Holy Spirit. That aid will be given if you earnestly and devoutly seek it. If parents, though sinful, know how to give good things unto their children, "how much more shall your Father which is in heaven give the Holy Spirit to them that ask Him?" —*Christian Recorder.*

FRIENDS' INTELLIGENCER.

PHILADELPHIA, ELEVENTH MONTH 17, 1866.

MARRIED, on Fifth-day, the 25th of Tenth month, 1866, at the residence of the bride's father, according to the order of the religious Society of Friends, JOHN SELLERS BANCROFT, a member of Green St. Monthly Meeting, Philadelphia, to ELIZABETH H. RICHARDSON, of Wilmington Monthly Meeting, Del.

—, on the 25th of Tenth month, 1866, under the care of Green St. Monthly Meeting, in accordance with the new article of Discipline, HOWARD R. DEACON to ANNA C., daughter of Jos. Tomlinson.

DIED, on the 15th of Tenth month, 1866, LYDIA, wife of John Worth, in the 82d year of her age; an Elder of Bradford Monthly Meeting, Chester Co., Pa.

—, on the 6th of Eleventh month, 1866, at Darby, Pa., FANNY, youngest daughter of Samuel and Susan L. Bunting.

—, on the 7th of Eleventh month, 1866, in Philadelphia, Pa., ABIGAIL DICKINSON, in her 83d year.

—, on the 9th of Eleventh month, 1866, NATHANIEL BRANIN, of Frankford, Pa., in his 76th year; a member of Green St. Monthly Meeting.

—, on the 6th of Sixth month, 1866, HORN L. MOORE, wife of Cyrus Moore, in the 38th year of her age; a member of Chester Monthly Meeting, N. J.

—, on the 15th of Tenth month, 1866, at her residence near Phoenixville, Pa., ANNA T. ROBINSON, in the 88th year of her age; a member of Radnor Monthly Meeting.

—, on the 20th of Tenth month, 1866, HENRY W. WORTHINGTON, in the 51st year of his age.

—, on the evening of the 26th of Tenth month, 1866, at the residence of his father, in West Marlborough Township, Chester Co., Pa., after a short but severe illness of typhoid fever, JOEL, youngest son of Isaac and Rebecca Skelton; a member of Fallowfield Monthly Meeting. Truly "Death hath no season for its own." Surrounded by all the blessings of life, with the bright prospects and activity of early and noble manhood, he has been suddenly called away from an endeared family, leaving them the full assurance that with him "all would be well." The silence which covered the large assembly of sympathizing friends, gathered to witness the interment, bore evidence that the solemnity of the occasion was truly felt.

Friends' Association for the Aid and Elevation of the Freedmen will meet on Fourth-day evening, 21st of Eleventh month, at 7½ o'clock, at Green Street Meeting-House. All interested in this important concern are invited to attend.

NOTICE.

The Annual Meeting of the Contributors of Swarthmore College will be held at Race St. Meeting-house, in the City of Philadelphia, on Third-day, the 4th of Twelfth month, 1866, at 3 o'clock, P. M.

EDWARD PARRISH, } *Clarks.*
EDITH W. ATLEE, }

EXTRACTS FROM THE MINUTES OF BALTIMORE YEARLY MEETING.

At a Yearly Meeting of Friends, held in Baltimore, for the Western shore of Maryland, and the adjacent parts of Pennsylvania and Virginia, by adjournments, from the 29th of the 10th Month, to the 1st of the 11th Month, inclusive, 1866.

By written Reports now received from our several Quarterly Meetings, it appears that the following named Friends have been appointed Representatives to this Meeting. [Sixty-one in number, present fifty-one.]

Minutes for the following named Friends, who are acceptably in attendance with us from within the limits of other Yearly Meetings, were received from the Meeting of Ministers and Elders, and read, viz:

George Truman, a Minister, from the Monthly Meeting of Friends of Philadelphia.

Catharine H. Truman, his wife, an Elder, from the same meeting.

John Hunt, a Minister, from Burlington Monthly Meeting, New Jersey.

Ann P. Jackson, a Minister, from Birmingham Monthly Meeting, Pennsylvania.

Ann A. Townsend, a Minister, from Green Street Monthly Meeting, Philadelphia.

Israel Drake, a Minister, from Rensselaerville Monthly Meeting, State of New York.

The following Minutes were subsequently received, viz:

For John Owen, a member, from Woodbury Monthly Meeting, N. J.

Phebe W. Foulke, a member, and companion of Ann A. Townsend, from Gwynedd Monthly Meeting, Pennsylvania.

Warrington Quarterly Meeting informs, that it has discontinued its Mid-week Meetings, on the weeks of the Monthly, Quarterly, and Yearly Meetings: that its Preparative Meetings will be held on the Mid-week Meeting days following the 1st Second day in each month, and that its select Preparative Meetings will be held at 9 o'clock on the morning of the Monthly Meeting days in the 2d, 5th, 8th and 11th Months.

Nottingham Quarterly Meeting informs, that the time of holding the Quarterly Meeting has been changed from the 6th day following the 3d Second-day, in 2d, 5th, 8th and 11th Months, to the 6th day following the 4th Second-day in the same months, at 11 o'clock.

The Meeting of Ministers and Elders the day

preceding the Quarterly Meeting, at 2 o'clock, P. M.

Acceptable Epistles from our brethren of Philadelphia, New York, Genesee, Ohio and Indiana were received, and the first three were now read, and their interesting and instructive contents were truly cordial to us.

The following named Friends were appointed to prepare Essays of Epistles to the several Yearly Meetings, with which we correspond, and produce them to a future sitting.

Also to endeavor to embody some of the exercises of the Meeting, in a suitable minute, and produce it to a future sitting, to be inserted in our extracts, for the benefit of our absent members.

The following Report of the Standing Committee on the Indian Concern was received, which was satisfactory to the Meeting, and the labors of the Committee approved. The Committee was continued, and encouraged to embrace every right opening that may present, to be useful to these interesting and greatly wronged people, viz :

To Baltimore Yearly Meeting :

The Standing Committee of the Indian Concern report, that they have continued, through the past year, as heretofore, to give unremitted attention to the wants and interests of the Indians on the Cattaraugus and Alleghany Reservations, as these have been made known to us.

In the Eleventh Month last, the Committee was informed by Nathaniel T. Strong, one of the Indian Council, that, in consequence of the advance in the price of wages, labor, books, &c., the appropriation from the State of New York would not allow of the Schools on the Reservations being continued open longer than twelve weeks for the winter term, which he regarded as entirely too short for the Indian children. The Seneca Treasury, he said, was drained, by the extraordinary appropriations which the Council had been compelled to make, during the year, to repair the damages from the freshets, &c. ; so that the needed help could not be obtained from that source ; and he suggested the propriety of the Committee furnishing the means to prolong the terms of the Schools for the winter session, one month each, which would make the term sixteen weeks instead of twelve.

The Committee, accordingly, sent funds for the purpose proposed, and, on last New Year's day, President Silverheels gave notice to the Teachers of those Schools, that through the benevolence of the Friends of Baltimore Yearly Meeting, their Schools would be extended four weeks longer than had previously been concluded upon. The acknowledgment of the Seneca Government was returned, for what

they called "this timely, great, and truly general benevolence, to the Indians on the Cattaraugus and Alleghany Reservations."

Asher Wright, the Missionary on the Cattaraugus Reservation, says, in a letter, "I think your gift of two hundred and fifty dollars to the schools has accomplished great good. Silverheels and Strong gave public notice that you had furnished the means of adding a month to all the schools in both Reservations, fourteen in number."

In the Third month last, we received a touching appeal for aid to the Orphan Indian Children in the Thomas Asylum. They said, "The bread bill of one hundred dollars, for the Asylum, is due, and sent in for payment. There is no money in the Treasury, and none expected for a month," and the Committee was solicited to extend a helping hand in their time of need. The Committee, thereupon, made them a remittance of two hundred dollars from the Indian Fund, the receipt of which was gratefully acknowledged.

In the Fifth month last, a letter was received by the Committee, from H. B. Whipple, Bishop of Minnesota, who has been long and arduously laboring for the protection and welfare of the Western Indians, in relation to a bill that had passed the Senate of the United States, and was then before the Committee of Indian Affairs of the House of Representatives, of which bill he said, "While it is not all it *should* be, it is the *only* bill that has ever looked to the protection of the Indians," and he asked the aid of Friends, in endeavoring to secure its passage.

On procuring a copy of the bill, and finding its general provisions were such as we could approve, the Committee appointed a delegation to proceed to Washington and give attention to the subject. This delegation had an interesting interview with the Commissioner of Indian Affairs, and found the bill met the approbation of the Indian Department. Also, with the Committee on Indian Affairs of the Senate, and of the House, and with several influential members of the House of Representatives ; and there was reason to believe the bill would pass, if it could be brought before that body, which, however, was never done.

One of our Committee, during the past summer, while on a mission of love as companion to a ministering Friend to the meetings in the State of New York and Canada, embraced the opportunity thus presented of making a visit to these interesting objects of our care and concern on the Cattaraugus Reservation, and was informed that there was more order and harmony among the Indians at present than at some previous periods ; that their crops this season were good, and that the Indians were generally in a prosperous condition. Much

gratification was felt at witnessing the neatness and order which prevailed in every department of the Asylum for Orphan Indian Children, to which we have long been rendering our aid.

The Committee are gratified at the evidences that have been afforded on different occasions, that the little misunderstanding on the part of the Indians which, for a brief period, produced a seeming coolness towards Friends, has been entirely removed, and that we now possess their confidence, respect and affection, as much probably as at any former time.

Our sympathies have been deeply awakened during the past year, on behalf of some of the Indian tribes west of the Mississippi River, who have been the victims of great injustice, hardship and cruelty, but no way has been seen by which we could be serviceable to them. Our aspirations have been raised, that Israel's unslumbering Shepherd, who is God of the whole earth, and has regard to every nation and every people, may have them in continual remembrance, and surround them by the protecting arm of His power.

Signed by direction and on behalf of the Committee,

BENJAMIN HALLOWELL, *Secretary.*

BALTIMORE, Tenth mo. 27, 1866.

[Benjamin Hallowell was appointed Clerk and Levi H. Brown Assistant.]

The Minutes of the proceedings of the Meeting for Sufferings for the past year were read, and the proceedings of that meeting approved and sanctioned, and a committee appointed to bring forward to a future sitting the names of suitable Friends to constitute a Meeting for Sufferings for the ensuing year.

The following named Friends were appointed to examine and settle the Treasurer's account, propose a sum to be raised to defray the expenses of the ensuing year, and to bring forward the name of a suitable Friend to serve as Treasurer of this meeting.

Third day.—The meeting entered upon the consideration of the state of Society, as presented by the Answers to the Queries from our Subordinate Meetings, and proceeded therein with the Answers thereto, under a covering of precious solemnity, during which much salutary counsel was handed forth.

(To be continued.)

Foolish would that man be who sowed tares, and expected to reap wheat; yet not more foolish than the conduct of those who sow the seeds of wickedness and folly, and think, by and by, when the harvest comes, to reap the fruit of holiness and love. "Whatsoever a man soweth, that shall he also reap; for he that soweth to his flesh shall of the flesh reap corruption; but he that soweth to the Spirit shall of the Spirit reap life everlasting."

For the Children.

WINGS.

BY WORTHINGTON HOOKER.

Birds walk upon two legs as we do; but instead of such hands as we have, they have hands made on purpose to lift them up in the air. The bones in a bird's wing are very much like the bones in our arms and hands, but they make a framework for the feathers of the wing to spread out from. The bones that go out almost to the very end of the wing are like the bones of our fingers, only they are much longer.

A bird's wing, when it is stretched out, is a very large thing. It needs to be large to do its work well. A bird could not fly with small wings. You know that by trying very hard, you jump up into the air a very little way. But the bird goes up very easily as high as it pleases and does not seem to be tired. This is because its wings spread out so broadly.

The reason that birds need such large wings is this. As the bird rises by pressing upon the air, it must press on a great deal of air to do this. If it presses upon only a little air it could not rise at all, because the air gets out of the way so easily when it is pressed upon. Swimming is flying in the water, and as water does not get out of the way when pressed as easily as air does, the tail and fins with which fishes swim do not need to be as large as the wings of birds. For the same reason, hands and feet answer very well for us to swim with, though we cannot fly with them.

The condor is a very large bird. To lift such a heavy body as he has up into the air, must require very large wings. Now to work such broad wings the bird has very stout muscles. You know how the breast of a bird stands out. This is because the muscles with which it works its wings are there. You can see this is the reason when a bird is cooked. The meat, you know, is very thick on the breast bone—thicker than in any other part of the body. If we had as large muscles on our breast bones we should look very strangely. But we do not need such large muscles to work our arms as birds do to work their wings.

A man could not fly if he had wings fixed on his arms. It has been tried. I knew a man once to make something like wings for himself. After he had made them he went up on to the roof of a shed to try them. He jumped off and flapped his wings, but down he came about as soon as if he had no wings, and he was so much bruised that he was not disposed to try the experiment again. Now why could he not fly? It was not for want of wings. There the wings were, and he had made them right, for he had shaped them like the wings of birds. They were large enough and light enough; the difficulty was that the muscles of his arms were

not strong enough to work them well. They were arm muscles and not wing muscles. A man cannot be like a bird merely by having wings. He must have a bird's flying muscles, or he cannot fly.

Different birds have wings of different sizes. Those that fly very far and swiftly have the largest wings. The wings of a hen are not large enough to carry her far up into the air. The most that she can do is to fly over a very high fence; and if her wings are partly cut off, or cropped, as it is called, she cannot even do that. There are some birds that do not use their wings. The ostrich is a great runner. He cannot fly, but his wings help him some in running.

In what way the wings act in raising birds and carrying them along, I will explain when I come to tell you about the air.

How beautiful are the motions of many of the birds as they fly in the air! How gracefully and easily their wings work! See a bird as it goes up and up, and then look at it as it makes a turn and comes down so swiftly on its stretched out wings, taking a beautiful sweep off at a distance; and then up it goes again to come down, in the same way that boys do when they travel up a long hill to slide down so swiftly on their sleds. The swallow, as he has this fine sport, is, at the same time, getting his living. As he skims along close to the ground or the water, quick as thought, he catches any unlucky fly that happens to be in his way.

Especially beautiful are the motions of the humming-bird. Look at him as he stops before some flower, fluttering on his wings, or as he darts with them from one flower to another. The muscles of his wings are very nimble workmen. Our muscles can make no motions as quick as these make.

Did you ever examine a feather from a bird's wing to see what a curiously made thing it is? The quill part of it is very strong, but, at the same time, light. The plume or feather part is quite strong also. It is made up of a great many very thin and delicate flat leaves, as we may call them, which are locked together curiously by fine teeth on their edges. If you separate them, they soon come together again, and are locked as fast as ever. You can see the teeth by which they hold on to each other very well with a common microscope.

No wonder that the bat can fly so swiftly, with such broad and light wings as he has. Did you ever observe how a bat's wing is made? It is a very curious and really beautiful thing. It is an exceedingly fine, thin skin, on a framework of long slender bones. These are to it what sticks of whalebone are to an umbrella; and the wings can be folded up somewhat as an umbrella is. This is done whenever the bat is not flying. When it is on the ground it is very awkward in its movements. It cannot get a

start to fly, and so it pushes itself along with its hind feet, at the same time pulling by the hooks in its wings, which it puts forward, first one and then the other, hooking them into the ground. It never likes to get upon the ground, and takes its rest always by hanging itself up by the two hooks in its wings.

Nothing is more delicate than the wings of insects. They are like gauze; but they have a framework that makes them quite firm, just as leaves are firm from the ribs that are in them. You must examine the wings to see their beauty. Even the wing of a common fly is very beautiful, so delicate is its structure.

The wing of the Katydid, as it is called, is peculiarly beautiful and delicate. Its color is a light green. There is a rather thick, three-cornered ridge at that part of the wing which joins the body, and a similar ridge on the wing of the other side. In the space within this ridge there is a thin but strong membrane or skin, so that it makes a kind of drum-head. It is the rubbing together of these two drum-heads on the wings that makes the noise. It is a queer sound. There is no music in it, but the Katydids seem to enjoy making it.

The Katydid commonly makes three rubs at a time with its drum-heads. It sounds somewhat as if it said "Katy did," and from that comes its name. Sometimes there are only two rubs, and then you can fancy that it says, "She did" or "she didn't." The Katydids, you know are all quiet in the day time, but when evening comes they are very noisy. I have often been amused to hear them as they begin just at dusk. One will begin and perhaps say its "Katy did" several times; then another on a neighboring tree will reply; and after a little time the whole tribe will be at work. Each one appears to rest upon it after each rubbing, and so it seems as if they answered each other from one tree and another. It is curious that you can at once stop the noise of this insect by striking the trunk of the tree on which he is with your hand.

For Friends' Intelligence.

MUSINGS IN A FRIENDS' MEETING.

'Tis not in vain, ye faithful seeking ones,
Ye gather duly for this quiet hour,
Like patient watchmen waiting for the dawn;
The perfect day may never come to you,
But in your patience, in your faith and hope,
Ye may behold and hail it from afar.
I see before me faces varying
From youth to age; and fancy I can read
Somewhat of inward hist'ry traced on each.
Ingenuous youth is here, with longings vague
For something that may feed the immortal life:
Not skilled, as yet, to know that ev'ry thing
Appointed in the providence of God
Is food to faithful souls, they ask for bread;
And, as of old, the Word took outward form,
So it takes voice, to meet the children's need.
Others I see, with eyes whose inward look
Bespeak the spirit's large development:

Little of outward help these seek or need,—
 They're fed by silent thought; yet these, if school'd
 In heavenly charity, will not condemn
 The children's food, because *they* need it not.
 Faces I see, where furrows have been plowed
 By struggle—conflict; by unyielding wills,
 That, suffering only, had the power to bend.
 The highest good has ever come to these,
 As comes the sun when stormy clouds have passed:
 They know our Father as a *chastening* power,
 Thus dealing with the children whom he loves.
 Faces are here, of soft and gentle mould,
 Telling of pliant wills—of passions calm—
 Perhaps, too, of a nurture, tender, firm—
 That thus has kept them ever near the fold:
 These feel that Wisdom's ways are pleasant ways,
 And echo back that cheering utterance.
 Oh ye, who deem ye are admitted near
 The Sacred Presence door, that ye may bring
 Tidings to dwellers in the outward court,
 Beware, lest ye take glimpses for the whole:
 Short-sighted man, who sees but *relative*
 And *partial* truth, is prone to round it out
 With half-truths suited to a former age,
 Putting new cloth into the garment old.
 Thy vision tell, O seer! thy message give
 In simple words; and thou hast done thy all.
 Stop not a fellow-servant on his way,
 Thinking his errand fits not with thy own;
 In the great household there are many states,
 Each to be fed and ministered unto.
 Is it a dream, inspired by earnest hope,
 That some behold a better day at hand,
 When truths that make an echo in the heart
 Shall find a simpler, purer utterance?
 When kindly offices, and holy lives,
 Shall be the test of Christian fellowship,
 And mere belief, the offspring of the head,
 Usurp no longer the sweet place of love.
 When usages grown dry as ripened husks
 Shall burst, like them, and let the germ spring forth.
 When man—his faculties—their use and scope,
 And how they fit his glorious destiny,
 Shall be the noblest study of a man.
 When youth shall grow like rose and hyacinth,
 With fitting soil, and sun, and gentle showers,
 And, radiant with a beauty all its own,
 Waft each its own sweet fragrance up to Heaven.
 A better day! has not the longing soul,
 Ever looked forward to a better day?
 And when some faithful messenger has called
 To simpler faith and purer righteousness,
 'Twas thought that better day had surely come.
 There was a time when Israel waited long
 Her Promised One; and when he came at last,
 Who were the ones that knew and welcomed him?
 Shepherds, who watched their flocks while others
 slept!
 Sages, who pondered on prophetic lore!
 Some who were mending broken fishing-nets,
 And talked the while of him who was to come;
 Mothers, who brought their children to be bless'd;
 The pious Jew, who kept his sacred law,
 While yet he waited for the better hope;
 The good old Simeon, and the prophetess,
 Who watched and fed the temple's sacred fire!
 Are we, too, watching like these faithful ones?
 Or are we, fretful at the long delay,
 Our fellow-servants chiding? and, for lack
 Of heavenly good, content with that of earth?
 Ah! 'tis not such as these that enter in
 When the great feast is spread; but those who wait
 With their lamps burning, and with girded loins,
 E'en until midnight, for the welcome call.

PHILADELPHIA, 11th mo., 1866.

S.

THE LOSS OF THE STEAMSHIP "LONDON."

(BY ONE OF THE SURVIVORS)

(Continued from page 574.)

As I said before, fear was not confined to the females; we all experienced it more or less. Of course we men endeavored to disguise our real feelings from them—going from one room to the other cheering them up as best we could. This state of things continued all night. About two in the morning (Wednesday) I went to my room, and had a short sleep, the last I had in the *London*. When I awoke I then found a slight improvement in the cabin—not so much water coming down, and the ship rolling less: she had been put around an hour before to return to Plymouth, and was running close-hauled.

When daylight came in, the wind had somewhat abated, but the sea was very heavy. We then had to go to work, and carry up water out of our rooms. I went on deck at nine in the morning, and looked over the side just abaft the main rigging, and saw the two pieces of broken booms that had been carried away the previous day, still towing by the iron rigging and thumping against the ship's sides. I was told by one of the firemen that night that there were one or two forward dead-lights knocked in by these booms. The most of this day, say up to three o'clock, the crew were engaged in getting in-board the wreck of the boom, for what purpose I never understood, nor do I know now, unless it was fear of it coming in contact with the screw. Even so I think that in towing it to the stern, and then letting it go adrift, there would have been no danger. As it was, it proved a cause of trouble to us: it was lashed that afternoon just alongside of the engine-room skylight, and at night, when the gale increased, it got loose from its lashings and was knocking about, there always being a deal of water on the deck; and by the action of it and the sea the skylight over the engine-room was carried away, which was the immediate cause of the ship's loss.

When it was known in the morning that we were returning to England, everybody appeared much pleased. Then commenced new speculations, many saying they would not return in this ship, they didn't like her, some would go by another vessel, some would give up going to Australia altogether. Several asked me what I intended doing. I said, "If the ship goes I go. I am not afraid of the *London*" (although I was the previous night,) "if she is properly managed. When she gets repaired and put in proper sea-trim, she will go all right. She was started this time before she was ready. I think the owners and captain will have learned a severe lesson not to attempt the like again."

We had a scrambling dinner that day, which was the last meal we had together. It was

very good under the circumstances,—thanks to a good steward.

A small vessel passed near us. I did not see her, not happening to be on deck at the time, but I heard many speaking of having seen her. People have since asked why Captain Martin did not request this vessel to remain near us. That is a question no one can answer. He may have said, "I have perfect confidence in my own ship," and I know the feeling in our cabin was perfect reliance on his judgment. The whole day (Wednesday) was dull and gloomy; heavy cross seas, ship laboring, no comfort any where. Darkness came on early, the wind increased, the sky looked wild, everything bespoke a terrible night; and the anxious countenances of all seemed to have forebodings of danger. I dreaded the thoughts of another such night as last. I thought of the hatchway, and said to Munroe, "Here is night coming on, and a prospect of a severe one, and yet nothing has been done to prevent the water coming down." He said, "I know it. I have told Mr. Harris (the first officer) about it, and all the satisfaction I got was, 'Let it go down.' If they would only let me have canvass and pump tacks, I would do it myself. I will try again." After a while I heard some one hammering overhead. When he returned, I said, "Well, you have succeeded at last." He said, "No, only partially. I got enough canvass, but could get only half enough pump-tacks. Everything is alike on board, everything in confusion, nothing can be got that is required."

At length night set in: hatches were closed down and fastened on the inside, to prevent the water from floating them up; but still the water came in—first one side, then the other,—with every roll. By seven or eight o'clock we were in as great a state of terror as on the previous night, and with more cause, for the gale was more violent. The steam was so troublesome that we could not open the lids for a moment to let in air. The sensation in the cabin then was really awful. I never shall be able to convey any idea of it. Imagine what your feelings would be, waiting and expecting every moment to meet death. Add to that the dismal sound of water rushing in. You could not see it through the cloud of steam and dim lights, and were not sure whether the ship was filling or not; in fact, a foot of water washing to and fro, carrying with it every moveable article, strengthened your fears that she was. Then at every heavy roll a woman shrieked. There was one young girl nearly frantic. By nine o'clock we were in worse state than ever; when the ship rolled there would be nearly two feet of water in the cabin. It would come in with a rush, then back again to the other side, carrying with it anything that was not lashed. The boards of the lower borths were washed out,

and the bedding would drop down, and then, by the roll of the ship, was carried out into the cabin and there floated about. There was a lady in the next state-room—about the only one who remained in her berth—and whom I was assisting to prevent her trunks being broken; both of us up to our knees in water, in which various articles, such as buckets, pieces of boxes, clothing of every description, apples, books and papers were swimming. A few of the women were quite collected—talking as calmly as on land. One in particular I remember, Mrs. M——, who had come home in this ship on her last voyage from Melbourne; she said to me, "I feel as if I never should see land again. I am loth to give up life, but it is not so much on my own account as for those I leave behind. I was married only two months before leaving Melbourne. I know my husband will mourn my death very much. I came home to settle some property. And another thing I regret very much is, that I have brought this little niece of mine with me" (a nice girl of about twelve or thirteen years.) "I induced her father and mother to let her come with me." "Never mind," says the little niece, "I am happy, aunt, and we will die together." And I think they did. They were the last whom I spoke to in the cuddy, just before leaving the ship. They were then close together, sitting at one of the tables, and the water nearly up to the seat, and not far from the Rev. Mr. Drapper.

I often stood that night watching the port-hole in the state-room—when the ship would take those awful lurches. I would see the water dark and still against the glass of the port; it would remain so for half a minute or more. I would say to myself, "Is she sinking now, and twenty feet under water, or is she at her old tricks?" Presently I would see the water in a foam against the glass, and then I would say, "She is all right yet."

So the evening wore on—all of us more or less frightened; with the females, some reading and praying, some their husbands comforting. In one cabin where there were several congregated, one woman had five children: two of the smaller ones were playing about in the bed as happy as could be: some one remarked that their innocence and happiness were to be envied. The children at no time showed much fear—even those of eight or ten years of age did not seem to realize their danger. Several females, still seated on the tables, had never been in bed since Sunday night; their clothes wet, their eyes red from the hot steam. Occasionally a man would come in from the deck, and his report would be anything but consoling. Our means of getting on deck now was through to the afterpart and up through the cuddy.

About ten o'clock, the purser of the ship

came into our cabin. I spoke to him about the water being there. "Oh, you have nothing to complain of," he said, "we are just as bad off: we have been carrying it out of the state-rooms all the evening." I said it was very wrong that it should be there when it could have been so easily prevented by securing the hatches—not on account of the danger, but for the comfort of the passengers: they had plenty of warning—last night was nearly as bad. He said, "There is no danger of it; it runs aft to the engine pumps, and is pumped up." But what was the consequence? its weight all told with a heavily-laden ship; it all tended to bring her deeper in the water. In a few minutes after, the fires were out—the engine stopped: what use were their pumps then, and where was the water? Still there.

While the purser and I were talking, there came some sailors, and rushed past us going to the room where the sails were kept. I heard one say to another, "Let us make haste with a sail, or she will sink." At that moment I heard an order from one of the sailors that all men were wanted on the poop. I knew this applied to the passengers, and felt there must be something very serious now. Immediately we left to go aft, leaving the women alone: only a few men having children remained behind, their wives begging of them not to go. In getting there we had to grope our way through a long dark passage, say sixty or eighty feet in length, and over the top of stores, luggage, &c., that were piled in some places within two feet of the deck. Once through, and in passing the engine-room, we could see there was water rushing down. A short time before, the skylight over the engine-room hatch had been washed off, and this was the cause of the consternation. At this time I was not aware of it, but hurried by to get up on the poop, the place we were ordered to. There a dismal sight presented itself, and one I shall never forget. The gale was at its height. The night was very dark; but from lights held at the cuddy windows to give light on the deck in front, and which reflected up the mainmast, could be seen the half of the maintopsail still standing, and the other half blown away, the shreds blown straight out at right angles with the yard by the force of the wind. The winds whistling through the wire rigging produced a dreadful sound. Waves lashed the sides of the ship—now and then one breaking over her, she laying over very much. There was a boiling foam level with the railings, and a little farther off could be seen seas ten or fifteen feet above us, with a phosphorescent crest showing through the dark. While standing there, viewing this scene of wild fury, and supporting myself by the companion-way, others were coming up the steps; so I let go my hold, and

reached across to catch hold of a railing round the screw-shaft or opening, where it was drawn up out of water when disconnected, but I found nothing to hold on by but a smooth wall. All at once I found myself sliding down to leeward, and nothing to prevent me going over the low iron railing into the boiling foam below, when suddenly I caught hold of something in the dark that brought me up. No one but myself knew what a narrow escape I had—even to the present day it sends a thrill through me when I think of it.

(To be continued.)

THE FRANKLIN FUND.

Dr. Franklin, by his will, gave a thousand pounds sterling in money to the city of Boston, to be kept as a fund to assist young mechanics of good character, in setting up in business for themselves. He calculated that in one hundred years the fund would increase to one hundred and thirty-one thousand pounds, of which one hundred thousand should then be laid out in such public improvements as would make the town "more convenient to its people and more agreeable to strangers." The remaining thirty-one thousand should be managed as before for another hundred years, when it would amount to more than four millions sterling, all which he would leave to the disposal of the state and the town, "not presuming to carry his views further."

A recent report of the city clerk of Boston, on the state of this fund, discloses the existence of only "one bond" for \$80, for money loaned to a mechanic. The residue, amounting to one hundred and ten thousand dollars, for which there has been no demand, is "deposited with the Massachusetts Hospital Life Insurance Company," where it is quite secure, and yields an interest of five per cent. The opportunities for loaning to young mechanics under the terms of the will, have ceased, owing to the changes in the manner of conducting business. The day for the first distribution, by which Boston is to receive half a million dollars for public improvements, is thrust forward a good way into the next century, but it will come with the lapse of time.

In earlier times it was customary for the young mechanics of Boston to get loans from the Franklin Fund. But it is a remarkable fact that seven-eighths of the repayments of the authorized loans were made by the sureties, and not by the principals. Mr. Wm. Minot was treasurer of the fund from 1811 to 1866, during which period it increased from \$9,000 to \$110,166.

The fact that a scheme emanating from one so wise and philanthropic, and conversant with affairs, as Franklin, has proved so entirely futile, shows how fast the country has advanced

in practical sagacity, under the culture of Republican liberty. Nothing is more uncertain or less satisfactory than the result of mortuary investments generally, for purposes of business or benevolence. Those gifts are most productive of good which are employed directly by the giver, or under his personal supervision, and applied directly for the benefit of the generations out of whose labors the wealth has accrued, or for the benefit of their immediate posterity, leaving it to the generations of the distant future to do as much for themselves when they come upon the stage of action.—*N. Y. Evening Post.*

Society would gain much were its members to restrict themselves to the expression only of their most cheerful feelings, digesting their evil moods in silence, just as some engines are made to consume their own smoke.

HENRY M. LAING, Treasurer,
No. 30 N. Third St.

Philada., 11th mo. 10th, 1866.

A wise philosopher remarked that “he who makes two blades of grass grow where but one grew before is a public benefactor.” And this is true, although, of course, he increases his income by doubling his grass crop.

“When I awake I am still with Thee.” What we love most, we most muse upon. That which we much like, we shall much mind. Believers, keep up holy and spiritual affections; for such as your affections are, such will be your thoughts.

ITEMS.

The *Intellectual Observer* gives some interesting information concerning meteoric showers. “Mr. Alexander Herschel recently gave a lecture at the Royal Institution, ‘On the Shooting Stars of the years 1865—66, and on the Probability of the Cosmical Theory of their Origin.’ He commenced by advertising to the probability established by Professor Newton, of Yale College, ‘that in the current year, 1866, a prodigious flight of meteors, the most imposing of its kind, and visible over a large area of the earth’s surface, will make its appearance—perhaps for the last time in the present century—either on the morning of the 13th or 14th of November.’

“Mr. Herschel observes that ‘between the 13th of October and the 12th of November, during the years

from A. D. 903 to 1833, not less than thirteen great star-showers have been recorded. They are separated from each other by the third part of a century, or by some multiple of this period, and the periodical reappearances of one grand meteoric shower, viz., that seen by Humboldt in 1799, and by Olmsted in 1833, the star-shower expected to return in the present year, and known by the name of the ‘great November shower.’ Its contact with the earth takes place one day in the year at each of its principal returns. They proceed, with few exceptions, from a common centre in some part of the constellation of Leo.’ Two hundred and forty thousand meteors are computed by Arago to have been visible above the horizon of Boston on the morning of the 13th of November, 1833.

“The average height of shooting stars at the middle of their apparent paths is not quite sixty miles above the earth.

“Mr. Herschel points out a singular difference in the behavior of shooting stars and aerolites, or meteoric stones. The meteoric stones most frequently fall after mid-day, between noon and nine P. M., while the shooting stars are most abundant after midnight; and only one stone has been known to fall on the 10th of August or the 13th of November, when shooting stars are most numerous.”

ANOTHER FEARFUL ACCIDENT AT MONT BLANC.—The news of another disaster comes to us from Chamonix. It appears that the fine weather had attracted a considerable number of families to that place, and among others Captain Arkwright, an Englishman, with his mother and his two sisters. On Friday morning last he resolved to attempt the ascent of Mont Blanc, and one of his sisters decided to accompany him as far as the Grand-Mulets.

Early on the following morning Captain Arkwright took his departure with two guides and a porter, and about 9 o’clock they were seen ascending the Grand Plateau. In advance of the party went Sylvain Couttet, the proprietor of the new huts on the Grand-Mulets, attached by a rope to a coachman of the Hotel Royal, known by the name of Nicholas, who wished to profit by the opportunity to ascend Mont Blanc. On reaching the Grand Plateau the parties agreed to take the passage which had been usually followed before 1820, but which was subsequently abandoned in consequence of a catastrophe similar to the present.

They adopted it in preference to the “Corridor,” from its shortening the journey by two hours, and because they calculated to have much less ice to cut through, as was experienced during the summer by three or four other parties. They were about half an hour in their ascent, when Sylvain Couttet, who was in advance, suddenly heard above him a loud detonation. He looked up, and to his horror saw an avalanche rushing down with fearful rapidity. He instantly shouted out to those who were below him, “Save yourselves! to the right! to the right!” He threw himself in that direction, advanced a few steps, struck his staff into the snow, and clung to it with all his might, and his companion Nicholas did the same.

They both threw themselves flat on their faces, and buried their heads in the snow. They had hardly done so when a tremendous crash followed, and the immense mass thundered along quite close to them—so close that they were all over splashed with the fragments of the ice. In a few minutes, when the avalanche had passed, they raised themselves up, and looked about for their unfortunate companions. They saw nothing—nothing but a furrow under them,

and further down on the Grand Plateau a mass of blocks of ice.

Couttet and Nicholas descended in all haste in the same direction, and searched everywhere in the hope of hearing a cry or moan to indicate that some had survived the catastrophe. They at last perceived an arm. At great risk to themselves they reached the spot, and dragged out from beneath the blocks a dead body, the skull crushed and the breast laid open. They laid it on the snow and resumed their search, but found nothing more.

On Sunday morning, fifteen men, selected from among the most intrepid of the population, left on the search. They proposed to pass the night on the Grand-Mulets, in order to begin early the following morning clearing away the avalanche; and many others have offered themselves to act on the following days if necessary. Fortunately the weather was fine and favorable to their perilous work.

A letter from Chamounix says: "Twenty-six guides left the Grand Mulets at 6 A. M. yesterday for the Grand Plateau; their progress was watched with great interest by means of powerful glasses, until at last they were observed to divide into parties of twos and threes, and for some time to wander to and fro, when they were observed to collect together on one spot, 'to the right of the Rocher Rouge,' and from the many anxious glances that were given through all the available glasses in Chamounix, the conclusion came to was that they had discovered some traces of the poor fellows.

"This surmise turned out to be true, for at 2.30 eight guides were despatched to Chamounix with the sad news that they had recovered the bodies of the two porters, (Joseph and Francois Tournier), and that they had left eighteen guides, with the indefatigable Silvain Couttet diligently searching for some traces of poor Capt. Arkwright and his guide, Simond Michel. After toiling away until nearly dusk, they had to return to the Grand-Mulets unsuccessful in finding the least trace of Captain Arkwright or his guide."—*Paris (October 17) Correspondence of London Times.*

THE FREEDMEN.—The report of J. W. Alvord, Inspector of Schools and Finances of Freedmen for First and Seventh mos., 1866, gives full and reliable information of the work carried on among the freedmen, and especially of their present educational condition. It shows a total of 975 schools, 1,405, teachers, 90,778 pupils. This does not include all the schools, especially night, private, and First-day schools.

In the District of Columbia there are 132 teachers. Eight or ten self-supporting schools, taught by colored teachers, numbering at least 500 scholars, are also in operation in the District. Some of these appear remarkably well. There is an association of all the above teachers of these schools, with 100 members. In their monthly meetings reports are made, and questions of mutual interest discussed, and in this way the general character of the schools is constantly improved.

Maryland reports 34 schools, with over 3,000 pupils; over one-half of them in the city of Baltimore. The colored people aided the country schools last year by paying \$2,000. The American Missionary Association have 5 schools in Maryland; the Society of Friends 1; besides which there were 7 schools in Baltimore under the management of the colored people, supported by their own money, and taught by them.

In Virginia there are 200 teachers; in North Carolina, 135; South Carolina, 148; Georgia, 51; Alabama, 31; Tennessee, 125.

SELECTIONS FROM THE WRITINGS OF JOHN BARCLAY.

(Continued from page 580.)

1817, *Ninth month 20th*.—Truly do I rejoice in believing that I find myself losing more and more of that authority and ability to do anything for the service of the blessed cause which proceeds from the creature; and in this happy experience I see advancement as well as safety. O! that all shadow and appearance of confidence in the fleshly part may be still farther removed; that there may follow a yet more firm establishment on the Rock of sure strength, the immovable foundation of all true wisdom. Man may possibly think, in his reasoning, that a smooth path is best for the Christian pilgrim, little knowing how it is that "we must, through much tribulation, enter the kingdom,"—except, perhaps, as it respects outward affliction. Yet we do see, and some of us feelingly know, that deep plungings, with buffetings, and toilings, and groanings of spirit, are the "bonds and afflictions that await us," down to the final hour it may be of our departure hence; and we can, of a truth, declare at times, that such heavily distressing dispensations are by the permission of the Author of all good in love to our souls; and we are sometimes enabled in the blessed moment when we feel ourselves on the banks of deliverance, to extel His holy name, who hath made us a path through the mighty waters, and sustained us in the wilderness. O! how shall my soul forbear to sing aloud unto Him

who has preserved it in its travel through a land of pits and of snares, through unspeakable darkness, and an almost utterly disconsolate state; and has given me this hour of rest and of peace, this little interval of refreshment, and joy, and great consolation. O! that this precious season had never been graciously given unto me, rather than that I should, after such tender mercies, turn away from following the Lord in the "little moment," when he may again be pleased to "hide his face."

To J. F. M.

LONDON, 22d of Ninth month, 1817.

My Dear Friend:—There are some bright spots in this wilderness journey, and I think thou wilt recognize them by my faint description, when as from an eminence we are enabled to see to a considerable distance both before and behind us; feeling ourselves as it were removed into a purer atmosphere. We can even distinguish the little stumbling-blocks that have impeded our progress, the rough and rocky ground that has sorely wounded our feet, the very brambles and briary thickets that have jaded us, the narrow passes and threatening precipices through which we have escaped, and on the edge of which we have been preserved. Here it is, on this interesting elevation, whilst the eye of the mind is rapidly traversing over and tracing the windings of the road by which we have come, that we remember where and when "the troubles of our hearts were enlarged;"

we call to mind the perplexity that befell us, the secret conflicts that attended, and the temptations that waylaid us;—we can precisely point out the spot where “we sat down by the rivers of Babylon,” where “we wept when we remembered Zion,” and “hanged our harps upon the willows,” and refused to be comforted;—we can tell where it was that we “fell among thieves, who stripped and wounded us,” and left us, as it were, half dead; and we shall not easily forget where the good Samaritan found us, and had compassion on us, and how tenderly he treated us, how diligently he took care of us, and provided for our wants. O! which of us at such a time can fail to discover, and to admire the hand that is over us continually for good; how seasonably it has been stretched out for our deliverance, for our encouragement, when there seemed no one near to help, and nothing to do but to give up the tedious travel. It is in such a season that we are truly enabled to “praise Him who is the help of our countenance and our God;” and to repose anew in Him our confidence and trust for the time to come.

Thy very affectionate

J. B.

1817, *Ninth month 28th*.—During the present and past fight of afflictions, which the Lord has, in wisdom, appointed unto me, I have at times, through the assisting grace of Him who has been pleased to fight for me, maintained a fierce and desperate contest; and in degree have been enabled to stand firm against the fury of the enemy. Yet at other seasons, after having been a long time under arms, and very weary with watching and fasting, there has been a relapse or retreat experienced; and the ground that had been gained by hard fighting has been lost or relinquished. O! how difficult at such a moment, when harassed and oppressed, faint and ready to drop, to keep from utterly falling away, and fleeing before the emboldened adversary, who, exulting in his success, is proudly pushing forward at this critical juncture, to make the most of his advantages. But firmly persuaded I am that with the Lord there is sufficient strength and power to enable us to overcome all our enemies; I do very earnestly desire to trust in Him, and not be afraid to repose my reliance upon Him afresh day by day, to keep near to Him at all times, to be very faithful unto his requirings, to be very patient in waiting for his aid and counsel, and increasingly watchful against the snares of the enemy. And may his blessing come upon me, and prevent my utter destruction, which at times seems fearfully impending. O! where is there hope, but in the Lord!

1817, *Ninth month 29th*.—O! how shall words set forth the dispensation of desolation as to anything like good that seems to have

come over my soul? Darker and darker,—deeper and deeper,—what will be the termination of this distress?

Yesterday I attended Westminster Meeting; upon sitting down my sorrows began to arise like a whirlwind, and I was ready soon to burst into tears, exclaiming in secret, “The Lord hath forsaken me, he hath utterly forgotten and rejected me.” After a time of great trial and tossing, a young Friend got up with these words, “Fear not, for I am with thee, be not dismayed, for I am thy God; I will uphold thee by the right hand of my righteousness.” Soon after which, F. Smith rose, and, in a very tender manner, addressed the poor, afflicted, tossed, tried servants, whose conflict he described as being so heavy, and their souls almost in despair; he expatiated on the number of promises contained in Scripture, for such as these, if they still continued faithful and steadfast to the end,—if they still persisted in hoping in, waiting for, and trusting to the Lord alone. He said he believed there were some present whose language was,—“The Lord hath forsaken and forgotten me;”—with much more for the encouragement of such to patience and perseverance under suffering. As for me, I seemed utterly unable to receive any comfort or hope, as if all hold was gone and out of reach, and like poor Job, who refused to be comforted.

This evening, after a day of heavy exercise and tears, my brother read a portion of the Psalms. Whilst he was preparing to read, my heart said, “It is all over with me, there is no good at all for me; I am rejected of the Lord, his presence and blessing is departed:”—however, when he began to read, the first words awfully ran through me, “My God, my God, why hast thou forsaken me, why art thou so far from helping me, and from the words of my roaring?” O my God! I cry in the day time, but thou hearest not; and in the night season I am not silent.” Then I was somewhat comforted in remembering that this was the language of David in great distress; yet he was not forsaken, but was greatly helped every way by the Lord in the appointed time.

1817, *Ninth month*.—O! it is good to trust in the name of the Lord, to repose in his arm of strength, his parental tenderness and compassion. It is good to have our many strongholds invaded, our misplaced confidence unhinged, our secret props struck away; that we may more closely cling unto that which is not of ourselves, nor of our brethren, but comes only from the Source of all might and of all mercy. O! it is good to have all sense of hope and of help withdrawn,—to be laid low in the dust with all our pride and selfishness; that we may feel that which is good to flow in upon us in the Lord's own time as an unmerited gift, and thus be enabled to give the praise to Him alone, from

whom comes grace and glory, and every good thing. O! how great is my desire that the Lord would rather give me darkness and distress, than that, enjoying his favor and blessing, I should be unmindful of the Giver, or grieve him by saying or doing anything inconsistent with his blessed will concerning me.

1817, *Date uncertain*.—My mind has been much burdened, and weightily affected with the present aspect of things, relating to the growth and prosperity of the ever blessed truth; and not only do I allude to the low state of things within my own bosom, and in the circle of our privileged Society, but also in the world at large. Under a very humbling sense of the infinite condescension, which still spurs us from day to day, and from year to year, and of the unfathomable compassion which still pities, helps, preserves and provides for us with paternal tenderness, I am ready to cry out,—"Who will not love, and fear, and obey thee, O! Lord; and give themselves up to be moulded into accordance with thy blessed will?" But O! the ravages, the desolations which the enemy hath effected on the face of all the earth; how hath he blighted the blooming bud, and blasted the richest grain, and parched up the fruitful field; so that the time of harvest is become the hour of desolation and darkness! Here and there, through the gloom of this vast howling wilderness, a patch of green revives the drooping eye, and cheers the desert scene; here and there, amidst the straw and stubble in this great field, the earth, a few single ears are to be discovered raising their heads, and is just sufficient to show what the glory of the crop and of the harvest would have been had it escaped the destroyer's hand, and not been trampled down by the wild beasts.

1817, *Tenth month 2d*.—"When the Lord turned again the captivity of Zion, we were like them that dream. Then was our mouth filled with laughter, and our tongue with singing: then said they among the heathen, the Lord hath done great things for them. The Lord hath done great things for us, whereof we are glad. Turn again our captivity, O Lord! as the streams in the south. They that sow in tears, shall reap in joy. He that goeth forth and weepeth, bearing precious seed, shall doubtless come again with rejoicing, bringing his sheaves with him." O! the precious applicableness to my present condition, which my soul perceives and warmly feels in the above written Psalm. I seem as though I dare not omit testifying of the abundant riches of his mercies and of his grace, which the Lord hath profusely shed upon me to the joy of my heart, to the very lighting up of my countenance. Weeping may endure in the night season, but joy cometh in the morning, when the Sun of righteousness ariseth with healing in his wings,

and gladdens the face of all things, making the whole heritage of God shout for joy. My soul did, during the several opportunities which were permitted us through this Quarterly Meeting, earnestly crave and wrestle for a blessing, even for the slightest token of the Lord's compassionate regard; and O! how sweetly he has condescended to answer my petitions, my cries, my longings for a little of the living bread,—that precious power and presence which is only of and from him, and is in his wisdom allotted or withheld. Much instruction and comfort were also verbally conveyed at this time; and I was rejoiced to see some young persons, who appeared to have the cause of truth and righteousness at heart, as well as their own individual advancement and preservation in the strait and narrow way in which they have happily set their feet. Yet alas! what a number of this class seem to be ready to leave us! I believe, with some confidence, that but few of those who do leave our religious Society truly thrive in a spiritual sense; not that I confine true religion to our own profession by any means, but that I believe that there is that grace and truth to be met with in a diligent and patient waiting for the teachings of the heavenly Guide, which they who leave us are in great measure unacquainted with, or do not much regard or value. This I have found to be the case, even with some of the few who profess to leave us on conscientious grounds. But O! if all left us only for something, which, after solemn inquiry, they believed to be nearer the truth, how few should we have to lament the loss of. I was very earnestly desirous for our dear young Friends, during our sitting together in the Youths' Meeting, (appointed at the request of Mary Dudley,) as well as during the first sitting for worship, that they might come up in the strength and power of the living principle of grace and truth, to the help of the great cause;—that they might, in some measure, make up for the flagrant deficiency of standard-bearers apparent among our sex; even by such a steady, firm, consistent life and conversation,—by such an abiding in the blessed life and power and strength of the gospel, as is now too rarely to be discovered amongst us.

(To be continued.)

Be earnestly of God that the power of sanctification may come upon thy fancy. Some Christians have attained such a degree of sanctification of their imagination, that they have had much sweetness left upon their hearts by the spiritual workings of it.—*Flavel*.

The more any renewed heart tastes the sweetness of communion with God, by so much more it is disposed for unity or peace with his people.—*Flavel*.

MEMOIR OF REBECCA B. THOMPSON.

(Continued from page 581.)

During her progress through the spiritual baptism that had then been meted out to her, having had to part with many things upon which her hopes of enjoyment had been centered, and learned through suffering that all terrestrial things are fleeting and uncertain, she came experimentally to realize that all substantial joys, even every blessing with which we are favored, was from the Divine hand; and as this feeling was cherished, a concern was matured, that when we came to partake of the bounteous supply of that which goes to nourish these poor bodies when assembled at our meals, that the family be all gathered, and a solemn silence be observed, wherein a feeling of gratitude might arise in our minds for these numberless blessings. This concern lived with her to the latest period of her life, and it was often her engagement in these opportunities of silence and waiting openly to acknowledge these favors, and hand forth a word of exhortation and encouragement.

It was also her practice during several years of the latter part of her life, generally before retiring at night, to sit down in stillness, and, in the quiet, frequently requesting myself, sometimes others of the family, to join her therein, for the purpose (as she would express it) of waiting upon God for the renewal of our strength, that we might look over our past actions with a view to future improvement; and often giving advice peculiarly suited to the occasion.

Having been brought into a state of entire dependence upon, and a sense given her of the great condescension and loving kindness of her Redeemer in meeting with and redeeming her from her low estate, she felt that none need despair of his mercies. She therefore felt constrained, in the love of the Father, to go forth even as to the highways and hedges, that she might proclaim the glad tidings of the gospel, even to the seemingly most degraded, that there was yet hope for all. Under this feeling, and about this time, she visited many mostly not of our Society; and the remembrance is now vividly before me of the simple but earnest pleadings of this loved one, and the touching and heart-tendering acknowledgments of His unmerited mercies to her, as an incentive to their amendment of life, with the encouraging language, "Come unto me all ye that are weary and heavily laden, and I will give you rest." As a further evidence of this feeling pervading her mind, and her desire to be found faithful in the performance of his divine requirings, I will give an incident that occurred about this time. While sitting in a meeting at Mill Creek, a stranger in charge of cattle, while passing the house, used language

in her hearing that grated harshly on her ear. Her sympathetic feelings went out after him with desires for his improvement, and as the concern matured, she felt drawn to have an opportunity with him; but as none then offered, she returned home; but not feeling excused, a horse and carriage were provided, and she travelled several miles alone, not knowing where she should find him. Having procured an interview, and after relieving her mind of the concern, he acknowledged in broken accents his obligations for her kindness and interest in him; and she returned home with the reward of sweet peace for this little act of dedication. Although favored at times to be the recipient of Divine love and favor, for acts of obedience, yet, by not keeping sufficiently on the watch, she was at times brought into suffering on account of omissions of little duties, as set forth in the following manuscript:

"Since it was my privilege to mingle with you, my mind has been much exercised on account of my neglect of a trifling duty, which seemed pointed out for me to perform; but, letting the reasoner in, I omitted to attend to it. Desiring that all may not be lost, I feel drawn to address you by letter, as matter may seem to present, believing as I do that our Heavenly Father condescends to make use of his creatures as instruments of good or usefulness one unto another, in order to advance his cause in the earth, which is truth and righteousness.

"After a season of suffering, on account of not fully performing the part which I believe was appointed me, a spark or glimmer of light shone forth, and with it a command to address you by letter, as way should open; not in my own ability, for I acknowledge little of this for letter writing. Therefore, if any thing valuable is communicated, let all the glory be given to God, who is able to dictate what to write as what to speak, either in private opportunities or in the public assemblies of his people. In the love which I feel in the enjoyment of my Heavenly Father, which is in proportion to my obedience to his will, I was drawn to visit you with what I believed to be a message of His love to you, through me, a poor weak instrument. But finding my way much closed up, I came away burthened in spirit, on account of my unfaithfulness; yet I believe that He who appoints can open a way, if we let not the reasoner in and conclude it is out of the question to perform our known duty. This reasoner is the grand enemy of our soul's salvation; which destroys the happiness of all who listen to his voice, for it is always in opposition to the will of God; for the voice of God, if strictly followed, raises us above the fear of man. This I have known from a degree of happy experience, as I have also known deep sorrow occasioned by omissions of known duty.

"For as a parent careth for a child, so doth our Heavenly Father watch over and care for us, the workmanship of His holy hand, and appointeth unto each a work to do, in order that they may work out their own soul's salvation with fear and trembling before him. He giveth unto each one according to their ability to comprehend. This is beautifully illustrated in the passage, 'He carrieth the lambs in his bosom, and tenderly tendeth those with young;' evidencing clearly that his care is extended even to the youngest of his flock—the feeble and the helpless ones. These are nourished and fed by the sincere milk of his word, and they come to know that it alone can support them. That which is of an outward or external character can never nourish up the soul to life and immortality. Those who have tasted of His goodness are constrained to bear testimony to, and invite their fellow-travellers, wherever their lot may be cast, to come taste and see that the Lord is good, and a rich rewarder of all those who diligently seek him; for 'they that seek shall find,' and 'unto those who knock it shall be opened,' and 'they shall come in and sup with me and I with them.' They shall enjoy union and communion and sweet fellowship with the Author of their being, and see with indubitable clearness his will concerning them. These, then, are the blessed privileges of the Gospel of Jesus Christ, to which all may have access if they will submit to his terms. If any man will be my disciple, he must deny himself, take up his daily cross, and follow me in the way of my leadings; not in his own will, for that would rob God of his glory, which he has testified he will not give unto another, nor his praise to graven images. Proving beyond a doubt that man of himself cannot perform acceptable worship unto the great Author and Creator of all; for it is not in man that walketh to direct his steps aright. He is prone to hew our cisterns, broken cisterns, that can hold no water; such as proceed from Him, the pure and inexhaustible fountain of living waters, and whose crystal streams make glad the whole heritage of God."

(To be continued.)

CHRISTIAN OLD AGE.

Up to a certain period of life it is the tendency of man to look forwards. There is a marvellous prodigality with which we throw away our present happiness when we are young, which belongs to those who feel that they are rich in happiness, and never expect to be bankrupts. It almost seems one of the signatures of our immortality that we squander time as if there were a dim consciousness that we are in possession of an eternity of it; but as we arrive at middle age, it is the tendency of man to look

back. To a man of middle life, existence is no longer a dream, but a reality. He has not much more now to look forward to, for the character of his life is generally fixed by that time. His profession, his home, his occupation, will be for the most part what they are now. He will make few new acquaintances,—no new friends. It is the solemn thought connected with middle age that life's last business is begun in earnest; and it is then, midway between the cradle and the grave, that a man begins to look back and marvel with a kind of remorseful feeling, that he let the days of youth go by so half-enjoyed. It is the pensive autumn feeling,—it is the sensation of half-sadness that we experience when the longest day of the year is past, and every day that follows is shorter, and the lights fainter, and the feebler shadows tell that nature is hastening with gigantic footsteps to her winter grave. So does man look back upon his youth. When the first grey hairs become visible,—when the unwelcome truth fastens itself upon the mind that a man is no longer going up the hill, but down, and that the sun is already westering,—he looks back on things behind. Now, this is a natural feeling, but is it the high Christian tone of feeling? We may assuredly answer, No. We who have an inheritance in corruptible and undefiled, and that fadeth not away, what have we to do with things past? When we were children, we thought as children. But now there lies before us, manhood with its earnest work, and then old age; and then the grave, and then home. And so manhood in the Christian life is a better thing than boyhood, because it is a ripier thing; and old age ought to be a brighter, and a calmer, and a more serene thing than manhood. There is a second youth for man, better and holier than his first, if he will look on and not back. There is a peculiar simplicity of heart, and a touching singleness of purpose, in Christian old age, which has ripened gradually and not fitfully. It is then that to the wisdom of the serpent is added the harmlessness of the dove; it is then that to the firmness of manhood is joined almost the gentleness of womanhood; it is then that the somewhat austere and sour character of growing strength, moral and intellectual, mellow into the rich ripeness of an old age made sweet and tolerant by experience; it is then that man returns to first principles. There comes a love more pure and deep than the boy could ever feel; there comes a conviction, with a strength beyond that which the boy could ever know, that the earliest lesson of life is infinite, Christ is all in all.—*F. W. Robertson.*

"It seems the part of wisdom, and no sin
Against the law of love, to measure lots
With less distinguished than ourselves, that thus
We may with patience bear our moderate ills,
And sympathize with others suffering more."

From the British Friend.

THE INDIAN PREACHER.

The following is an account of the Christian experience of an Indian preacher, as related by himself to a number of Friends in America. It is in his own simple words, and shows how Christ leads and instructs his disciples by his Holy Spirit:

He says, "I don't often open my mind to any, but I now feel the way is open, and a freedom to do it. Some years past it was laid upon me to encourage others to do well, but I thought I was such a poor, ignorant Indian, I could not encourage others to do well, so I shoved it away," (the Indian pushed his hand out as though he had put it from him, and then fetching it back again and putting it on his breast, he continued), "but it was brought back and put upon me. I then put it away again," (and he waved his hand to and fro again, to show the wavering of his mind.) "It was then opened to my mind that the truth was a very precious thing, very precious, indeed; oh, how precious it did look to me, words cannot say half. I then said with Peter, 'Depart from me, O Lord, for I am a sinful man.'" But it was laid upon me again.

"One morning, as I was going to a Presbyterian meeting, I saw a flock of sheep—I did not see them with these eyes—they appeared to be travelling along before me; the foremost were fat and grown large, &c. I heard them talking to one another—but not with these ears—saying to one another, 'God speed, God help you on the way.' The hindermost looked poor and small, their heads hung down, and they seemed almost ready to give up. I wondered what it should mean; then something came and talked with me, it talked to me and told me, 'These are my sheep, and this day you shall see them lift up their heads in hope, and feed upon the bread of life.' Then it said to me, 'These that are before are the priests and deacons; they are grown fat and full, they can encourage one another, but they forget the poor of the flock.'

I went on to meeting; the priest preached, and prayed, and sung, and used the very words I heard the fat sheep use to one another. So after he had sat down, I thought it my duty to tell them what I saw on the way; so I did, and I thought I saw my vision fulfilled; the poor of the flock lifted up their heads in hope, and fed on the bread of life. The priest acknowledged, in the presence of the people, that what I said was true, and that the truth had been declared among them by a poor, ignorant, Indian man. Then I went home very comfortable; oh! how comfortable I did feel.

"Then sometimes I felt my mind drawn into sympathy with some, and I wanted to go to see them, but I did not; I was afraid some would

think I undertook to encourage others to do well, and I did not want folks to think so. I felt such a sympathy for a poor family I wanted to go and see them, but I did not know how to do so. I thought I would take a sack of meal on my back and go to where they lived; and so I did; and when I stepped in it was just night. There was a rich man lived on the other side of the wood; I supposed he would have let me have a bed to sleep on, but I thought I would rather lie by the men's fire; I felt their wants and I wanted to be with them. In the morning, when I was going away, I asked the woman to hand me something to put some meal in; she was unwilling, but I told her she must; so she got a bowl, and I took out a part of my meal and left it with her. I felt the wants of the poor children so that I did not carry all my meal away. Then I took my leave of them, and went home quietly; and thus I kept along.

"When I felt very much in sympathy with any, I tried to go to see them, and I thought I was getting on pretty well. One day I was thinking I should go to meeting two or three days hence, and I began to think what I should say when I came there, so I thought it over. I got something fixed in my mind which I thought would do very well, and I hung it up; by and by I took it and looked at it again; I thought it would do very well; so I did many times before meeting-day came. I went to the meeting, and, after the priest got through, I stood up and said it off as well as I could, and thought I said it off pretty well. Oh, how was I troubled! I went home. I did not know what the matter was; but oh! how I was distressed, and so I passed a long, long time, but did not know what the matter was. Then something came and talked to me, and said, 'Did you ever know a great man, if he wanted great business done away in Philadelphia, to send a poor, ignorant, unlearned man to do it?' 'No,' I said, 'I did not.' 'No more will the Great Spirit take you.' Well, I thought, sure enough I have been mistaken; I never have known what good is. Oh, how I was distressed." This, he supposed, was the bad spirit coming at a time when he went wrong, endeavoring to persuade him that he had never known what good was. Then, he says, "Something else came and talked with me, which I supposed to be the Good Spirit, and said, 'The great One knows all things—He knows what is best. If a king wants great business done, he has servants under him. When he sends one to do business for him, if he is a wise, learned man, he ought to say what the king tells him to say: if he is an ignorant man he can say over after the king just what he tells him, if it be two, three, four words, or less; just what the king says, just so he ought to say.' Then it said, 'Suppose one of your neighbors had a piece of

fresh meat given to him, a very good piece when it was given to him, he takes it, feels it, handles it, looks at it, hangs it up; then, by and by, he takes it down, looks at it, handles it, and hangs it up again; and so he does a great many times, and keeps it three or four days, till it begins to stink; then he takes it, cooks it, and sets it before you to eat; would you eat it?' 'No,' said I, 'I would not eat it.' 'Well, just so was your preaching the other day; the Great Spirit won't have it, the people won't have it.'

"Then it came to my mind the passage when there is a piece of money brought to our Saviour; I don't remember it particularly, I believe they had some design of ensnaring him, but I remember he asked them whose image and superscription was on it. They said unto him, Cæsar's. Well, he told them to render unto Cæsar the things that are Cæsar's, to God the things that are God's. Then I saw my preaching had Cæsar's inscription on it; because it was something of my own preparation; it did not come from the Great Spirit, therefore, it had not his superscription on it, and he would not have it; and that was the reason why I was so troubled. I saw that everything of man's contrivance had Cæsar's superscription on it, and that only that which came immediately from the Great Spirit would return to him, or would be food for his true sheep. 'My sheep,' says Christ, 'know my voice.' I did not feel it here; I love to feel it here (and he put his hand to his breast.) Then it opened in my mind the passage where the multitude followed our Saviour into the wilderness; the disciples seemed willing to send them away and give them nothing to eat, but he knew their wants, he did not want them to faint by the way. He called to his disciples, and asked them if they had anything to eat. They said they had five loaves and a few fishes, but what are they among so many? But he knew what he was going to do, and he directed that the multitude should all sit down in companies on the grass. Then he called on the disciples, and they gave all up to him that they had, and he took and blessed it, and gave it to the disciples. After all this was done he commanded them to hand it to the multitude; then it was food for them, and they had enough and to spare. Just so I see it is now; when the Great Spirit is pleased to break the bread of life, to hand to his disciples, and command them to hand it to the people, then it is food for them.

"Now, after all this, it was laid upon me again to encourage others to do well, but it looked so great, and I felt like such a poor, ignorant Indian, that I thought I could not give up to it. I said to that that talked to me, There are a great many that can do better than I can; take some other, and excuse me. It asked, Who?

I said, Such an one; it told me to fetch him up. I did in my mind, but it would not have him, but shoved him away.' And so in this way he said he brought up a number, but he would not have them, but he says. 'It told me I must give up. Now, I found the Great Spirit condescended to my weak state, and opened my understanding in a way to meet my capacity. So I found it was necessary to wait upon him to be instructed what to say and when to say, and then I could say with the servants that were sent out to invite in to the feast, 'It is done, Lord, as thou hast commanded, and yet there is room.' And I found there is room yet for more exercise, more labor, more invitations. The way is open, the way is not shut up in my heart. Then it opened in my mind the circumstance of Joseph, how he was sold by his brethren, and the reason why they sold him; he was designed by the Great Spirit to be greater than his brethren; he had some dreams that seemed to lead them to think so.' Some of them had a mind to kill him, others thought best to sell him and see what would become of his dreams. So they sold him, and he was carried off and put in prison wrongfully, but the Great Spirit was with him there, and knew what he was going to bring about; his brethren appeared to get along pretty well for a while. Then there was somebody in prison with Joseph, and he was released, and Joseph told him when he came in the presence of the king to remember him, but he forgot Joseph until he was brought into a strait. The king had some dreams, but I cannot read much, I cannot just tell what it was, but I remember he dreamed about some ears of corn eating some ears of corn, and there was nobody could interpret his dreams. Then the man remembered Joseph, and he was sent for. The Great Spirit was with him and knew all things, so he could tell the king the interpretation of his dreams; and when he told him what was going to happen, the king believed him, and thought it best to prepare against the famine that Joseph said was coming, and thought there was none so suitable as Joseph, because the Great Spirit was with him. So he put all power in his hand, only the king was greater. Joseph ordered storehouses to be built, and laid up corn for the time of famine that was coming, and he had the keys of the stores. Now the famine came; his brethren came to want, although they had sold Joseph and did not intend to bow to him. They heard there was corn in Egypt, so their father sent some of them down to buy corn. They applied to Joseph; he knew them, but they did not know him; he asked them whether they had any brethren, and whether they had a father living; they told him about them; so, after a while, Joseph sent for them, and they all went down and bowed to Joseph, for there

was no other way for them to be kept alive. Now it looked plain to me that we have a measure of the Good Spirit offered to us, to lead us, to instruct us, and it is greater than we are, and designed to rule over us. We may do as that tells us, or we may mind the bad spirit; but if we do, it will not yield the peaceable fruits of righteousness. We may say to the Good Spirit, We will not have this man to rule over us; we may push it away and sell it, and it may be put in prison. Yet a famine will overtake us, and though we may go into a far country, far away from what is good and right, and not even know Joseph or this Good Spirit, yet it will know us, and it will there rise up and plead with us. Now, there is no other way but to come back again to what is right, and acknowledge this Joseph to be greatest—this Good Spirit of the Lord Jesus Christ. He has the keys of the store, and they that will not bow to him must die. The same disposition that was in Joseph's brethren, and in the days of the apostles, is now in people. I have seen some people so simple that they have got angry with a gun and broke it in pieces, because it had done some mischief, as if the gun was to blame. If it had not been charged, and then fire put to it, it would not have done any harm. So when the apostles were charged, and the fire of Divine love operated on them, then they could do execution, but after it had passed through them, they were like the empty gun; it was not they that did it. It was that flame of Divine love that operated through them, and yet the people took the apostles and put some of them to death, as though they had done it, and thought to stop it from spreading. But they could not, for it operated through others, and it operates through a thousand others now, and they never can stop it."

FRIENDS' INTELLIGENCER.

PHILADELPHIA, ELEVENTH MONTH 24, 1866.

DIED, at Mt. Kisco, N. Y., on the 5th of Tenth month, 1866, of dysentery, BERTHA, only daughter of Albert and Berthena N. Tompkins, aged 18 months and 11 days.

—, at the residence of his uncle, Isaac Buckman, near Newtown, Bucks Co., Pa., on the 28th of Tenth month, 1866, of small-pox, SAMUEL H., son of the late Isaac B. and Rebecca M. Satterthwaite, in his 21st year.

—, on the 13th of Eleventh month, 1866, at her residence in Penn's Manor, Bucks Co., Pa., of inflammation of the lungs, SUSANNA H. BURTON, relict of Dr. William Burton, in her 70th year; a member of Falls Monthly Meeting.

—, on the 16th of Tenth month, 1866, HANNAH, daughter of Wm. D. and Lydia Rogers, in the 33d year of her age; a member of Evesham Monthly Meeting, N. J.

—, on the 15th of Eleventh month, 1866, in Philadelphia, RACHEL M. ROWLEY, daughter of the late Thomas Gillingham, in her 74th year.

DIED, on the 15th of Eleventh month, at Salem, N. J., EMMA P., wife of Clarkson Lippincott, and daughter of the late Joseph D. Pedrick, aged 24 years.

FRIENDS' FUEL ASSOCIATION FOR THE POOR.

The Annual Meeting of this Association will be held at Race St. Meeting-House. (Monthly Meeting Room) on Seventh-day evening, Twelfth month 1st, at 8 o'clock. The Annual Summary will be read and other business transacted. All interested are invited.

JOS. S. TRUMAN, JR.,
Clerk.

The Meetings for consideration of the Discipline and Testimonies of Friends have been recommenced, and will be continued at Race St. Meeting-House, on the second and fourth Fourth-day evenings in each month, at 7½ o'clock.

EXTRACTS FROM THE MINUTES OF BALTIMORE YEARLY MEETING.

(Concluded from page 586.)

Fourth Day.—The Committee appointed at a former sitting, to bring forward the names of suitable Friends to constitute a Meeting for Sufferings for the ensuing year, produced the following list, which was approved, and the Friends therein named were accordingly appointed to that service.

The Committee appointed last year to attend at the opening of the Quarterly Meeting at Prairie Grove, Iowa, produced the following report, which was satisfactory, viz:

To Baltimore Yearly Meeting of Friends:

The Committee appointed by the Yearly Meeting to attend at the opening of the Quarterly Meeting at Prairie Grove, Iowa, report:

That through Divine favor we were all enabled to comply with the appointment, (except one of our number who was removed by death.) The meeting of Ministers and Elders was an occasion of unusual solemnity. And at the large Public Meeting on First-day, there was much unanimity of feeling and expression, and the Meeting closed under great solemnity.

The general Quarterly Meeting was organized and held in a satisfactory manner. We found a larger body of solid Friends than we had expected, accessions having been made within the past year by removals, and a number from conviction.

A part of our number attended the Monthly Meeting at Wapamonock, and all the Committee attended the Monthly Meeting at Prairie Grove, in both of which, representatives were appointed in the regular order of Society, to attend at the opening of the Quarterly Meeting.

At the close of the Meeting for worship, preceding the business part of the Quarterly Meeting, the Committee suggested that the Representatives from the two Monthly Meetings should retire, and choose clerks to serve for the day; which was approved of by the Meeting,

and clerks to both Men's and Women's Meetings were appointed as proposed.

We have reason to believe there is a religious concern among Friends in that new and interesting land, to hold their Meetings to good reputation, and to advance the precious testimonies of truth among the people.

Signed, by all the Committee who attended.
Prairie Grove, Henry Co., Iowa, 6th mo., 11th, 1866.

The Committee continued from last year, in relation to some of our Virginia Friends, who have suffered from the ravages of war, produced the following report, which was satisfactory to the Meeting, and the Committee was continued another year, viz:

To the Yearly Meeting:

The Committee appointed by the Yearly Meeting, in the year 1864, to assist such of our members, who had been stripped of their substance by the ravages of the late war, and were continued by our last Yearly Meeting with instructions to extend aid and care in providing suitable school facilities for the children of Friends so circumstanced, now report to the Yearly Meeting, that soon after its close in the 11th Month last they opened a school in Winchester, under the charge of a female Friend, and those of our members who were embraced in this concern of the Yearly Meeting, were encouraged to send their children to it; and such, to the number of *twenty-one* were received and carefully instructed, besides *nine* others, not the children of Friends, whose tuition was paid for, and to that extent diminished the expense of the school. Most of the children were too young to be sent far from home, and it was thought by the Committee, that the object of the Yearly Meeting, would be more economically accomplished in this way, than by any other mode suggested. The whole cost of this school to the Yearly Meeting, including rent of room, salary of teacher, and books furnished, amounted to *five hundred and seventeen dollars and twenty-five cents*, the vouchers for which are in the hands of our Clerk.

In addition to this school the Committee had placed, in accordance with the wishes of their parents, *three* children at *Sandy Spring*, and assumed the cost of *three* at *Wilmington* and *two* at *Chester Valley School*, Pennsylvania, of those older and further advanced in their studies, which has involved an expense of *one thousand, twenty-seven dollars and forty cents* in addition to the above amount, making the total expenditures of the Committee, *fifteen hundred and forty-four dollars and sixty-five cents*. They have received of the voluntary contributions of our members towards this most laudable object, the sum of *two hundred and fifty-eight dollars and fifty cents*, leaving a balance of

twelve hundred and eighty-eight dollars and eighty-one cents to be paid by the Yearly Meeting.

The Committee are of opinion, that the liberality and sympathy of the Yearly Meeting for our Friends and their children, has been, through the efforts of the Committee, of material assistance to them and productive of good; and they are willing to hope, with the better prospects now before our Friends in that part of the Yearly Meeting, that further care on its part in these respects will not much longer be needed, but that the Committee should be continued another year.

On behalf of the Committee,

GERARD H. REESE,
BENJ. RUSH ROBERTS,
SUSAN H. JONES,
MARY D. BROWN.

The Standing Committee in charge of the Fair Hill Fund produced a report, which was satisfactory to the Meeting, and the Committee was directed to pay the sum of \$105.60 of interest now in their hands, to the Committee having the charge of the Education of the children of Virginia Friends, referred to in the preceding report.

Fifth Day.—The Committee appointed at a former sitting, produced the following minute, embodying some of the exercises of this Meeting, which was satisfactory, and it was directed to be inserted in our printed Extracts, viz:

In the early part of the Meeting, the injunction of the Divine Master, to his disciples was revived among us: "As I have washed your feet, so ought you to wash one another's feet;" and it was shown that the stream of gospel love, which flows from vessel to vessel in an assembly of devout worshippers, has a tendency to refresh the heart, and purify the understanding, enabling us to go forward in the path of religious duty. By yielding to this holy influence, we may become one another's joy in the Lord, and partake together of that heavenly bread—that hidden manna—which nourishes the soul unto everlasting life. They who attain to this happy experience, find in our Meetings for divine worship a source of high spiritual enjoyment, and a means of preparation for the various duties of life. Although no lip may be touched with the live coal from God's holy altar, calling for the exercise of vocal ministry, yet the sweet influences of religious peace may flow from one to another, during our silent meditations.

The importance of abiding, always, under the harmonizing influence of divine love, was feelingly brought before us, as the only bond of our union; for, if our love fail, our Meetings will fail with it, and all the benefits of religious society must cease. Let us, therefore, cherish this tender plant, that it may grow up and

bring forth fruit, to the honor of the great husbandman.

The desolating effects of a spirit of detraction were brought into view, and their consequences were feelingly portrayed. From this cause arise dissensions among brethren that obstruct spiritual communion, impair the sweetness of social intercourse, and finally lay waste the heritage of God.

We have been affectionately cautioned against the indulgence of a critical and censorious spirit in relation to the communications of our ministering friends. If they err, let us remember that, like ourselves, they are subject to the frailties of human nature, and that nothing short of entire self-renunciation and subjection to the divine will, can preserve the pure water of life from contamination; for "we have this treasure in earthen vessels, that the excellency of the power may be of God, and not of us."

The home education of our children has been impressively brought to our view, as a subject of deep and abiding interest. It was evidently the design of our bountiful Creator, in endowing the human mind with intellectual and moral faculties, susceptible of improvement, that we should assiduously cultivate these powers, and devote them to his service. In the quietude of domestic life, and under the fostering care of parental affection, the young mind expands and receives those early impressions which mould its future character. How important then is the charge entrusted to parents and guardians, to watch over the opening mind, and guide the inexperienced steps in the paths of purity and virtue.

The love of God is the basis of all true religion: where it prevails, the heart is expanded into love for all our fellow creatures, and through the operation of the Holy Spirit, the faithful followers of the Lamb are created anew in Christ Jesus. In order to attain this blessed experience, we must not "despise the day of small things," for those who do so shall "fall by little and little." On the contrary, we must watch over ourselves, check the first presentations of evil as they arise in the mind, and turn our thoughts towards that ever-present Divine power, who alone can save us in the hour of temptation. By this means may we "work out our salvation with fear and trembling," reverently acknowledging that the ability is not of us; for "it is God that worketh in us, both to will and to do of his good pleasure."

A deep exercise has been felt that our testimony against the unnecessary use of ardent spirits may be maintained; and a desire has been expressed that this testimony may be extended to the disuse, as a beverage, of all fermented drinks. The fearful ravages of intemperance throughout our land should incite us to make some sacrifices, in order to discoun-

tenance a practice which is fraught with so much evil to the human family; and experience teaches that it can only be averted by watching and checking the first approaches of the insidious foe.

While rejoicing that the conflict of arms has ceased in our land, and that the blessings of peace are measurably enjoyed, we have mournfully to reflect, that the elements of strife still exist in our midst. May we then, as the professed followers of the Prince of Peace, keep close to our Leader, and follow his example, "who, when he was reviled, reviled not again; when he suffered he threatened not, but committed himself to Him that judgeth righteously."

The Committee appointed at a former sitting on the Treasurer's accounts, produced a report, which was approved by the Meeting, and Richard H. Townsend was accordingly appointed Treasurer to this Meeting for the ensuing year; and our Quarterly Meetings are directed to forward to him their respective quotas of the sum proposed to be raised.

The following report was received from the Committee appointed at our last sitting, in relation to the meeting house at Winchester, Va., viz:

The Committee appointed to propose to the Meeting the mode to be pursued in reference to the money directed to be raised, for the erection of a Meeting house in Winchester, Virginia, report:

That they unite in recommending the Yearly Meeting to authorize the Treasurer of this Meeting to pay to the Friends in Winchester, the sum of seventy five dollars, to provide them with a suitable building as a place of meeting for the ensuing year; and that the subject of the new building be postponed for the present.

Which, upon deliberation, was united with, by the meeting, and the Treasurer was directed to pay \$75 to Daniel Walker, for the purposes proposed in the report.

The Committee appointed at a former sitting to prepare Essays of Epistles to the several Yearly Meetings with which we correspond, produced one embodying the Minutes of this Meeting, which, upon being read, was satisfactory to the Meeting, and the Clerk was directed to transcribe it, sign it on behalf of the Meeting, and forward a copy to the Yearly Meetings of Philadelphia, New York, Genesee, Ohio, and Indiana, respectively.

Having been favored through several sittings of this Yearly Meeting, with a comforting evidence of the continuance of Divine love and favor, solemnizing and strengthening our hearts, and gathering all, we trust, into a feeling of common brotherhood, enabling us to transact the business that has claimed our attention, in much harmony and condescension,

under a sense of which our hearts are humbled in gratitude to the Great Head of the Church, the Meeting adjourned, to meet at the usual time next year, if consistent with the Divine will.

BENJ. HALLOWELL, *Clerk.*

For Friends' Intelligencer.

CONFERENCE ON EDUCATION.

During the week of the late Yearly Meeting at Baltimore, a large and interesting meeting was held at Lombard Street Meeting-house, on the subject of Education, with special reference to the prospects of Swarthmore College. Remarks were made by Samuel M. Janney, Henry Haydock, of Benjamin Hallowell, Edward Parrish, Henry Hallowell, John Cox, and others.

Many aspects of the general subject were ably presented. The great and obvious advantage of a religious body, holding vital principles fitted to benefit all mankind, having an institution adapted to cultivate the intellectual powers and develop the talent of its members, so that in the midst of this reading age it may be at least fairly represented in the world of letters, was presented as a leading consideration.

Oral preaching under the divine influence and direction is indeed a great instrumentality for good, but it reaches comparatively few, while books and publications go everywhere and silently, at all times and in all places, to mould the opinions and fix the principles of those to whose capacity they are addressed. We want books especially for the young,—books which will interest while they inform the mind and improve the heart of those who must soon come upon the stage of active life.

The three kinds of enjoyment were presented to view: Physical enjoyment, which man has in common with the beasts that perish, is the lowest, and its pursuit as the main object of life has a tendency to degrade and debase. Intellectual enjoyment is elevating and improving, enlarging our conceptions of the Creator and his works, and rendering the mind sensitive to those influences provided in the external universe for its growth and expansion. Spiritual enjoyment, which comes from the exercise of our affections towards God and our fellow creatures, is the highest and most enduring, and above all else to be sought after and prized. These three kinds of enjoyment are desirable each in its appropriate place, and Society owes it to its members that opportunities are furnished as far as practicable for their pursuit and realization by all.

In commenting upon the importance of the cultivation of Science, the circumstances under which steam came to be applied to the mechanic arts were adverted to. The philosopher

first investigated its properties as affected by the various conditions of temperature and pressure, and taught these from the lecturer's desk, before the mechanic seized upon and applied this wonderful agent to his purposes. As a result of this discovery and application more than to any other cause, the humblest mechanic in our time may enjoy comfort and means of improvement, greater than those of kings and princes three hundred years ago. The discovery of the philosophical fact that a galvanic current passing round a piece of soft iron gave it the properties of a magnet, was the first step toward the perfection of those wonderful means of communication by which events in the most distant communities and the thoughts of the most widely separated men are now spread with lightning speed over the world.

The social influence of institutions of learning was forcibly presented by a Friend who had graduated in Yale College. He said that wherever he travelled he found the name "Yale" a passport to the friendly regard of any one who had ever enjoyed the privileges of that ancient College, and he hoped in the future Swarthmore would be a word of equal charm to its graduates, with the additional advantage that those knit together by memories of our College would be generally of the same social and religious training, and would include both sexes, and, in some instances, doubtless, those associated in the nearest relations of life.

Although no effort was made by the officers of this meeting to obtain the names of subscribers to the fund for the erection of the College, we are informed that considerable pecuniary results have already followed from it, and we earnestly wish that similar conferences might be held throughout the Society, till such interest should be awakened as would insure an ample fund for the completion and endowment of Swarthmore College.

11th mo., 1866.

It is better to trust, and be sometimes deceived, than never to trust at all.

"But of all the sad sights that I ever saw,
The saddest under the sun
Is a little one,
Whose poor, pale face was despoiled of grace
Ere yet its life begun.

No glimpse of the good green Nature
To gladden with sweet surprise
The staring eyes
That only have seen, close walls between,
A hand-breadth of the skies.

Ah! never a bird is heard to sing
At the windows under ground,
The long year round:
There never the morn on its pipes of corn
Maketh a cheerful sound.

Alice Curry.

From the Congregationalist.
THE MIDNIGHT TRAIN.

BY I. N. FARBOX.

As I lay awake in the night,
And heard the pattering rain,
Faintly I caught the rumbling sound
Of the coming midnight train.

The world was murky and still,
The air was loaded with damp,
And on the folds of the mist it came—
The noise of this iron tramp.

Plunging through darkness and fog,
Screaming its signals before,
Searching the night with its eye of flame,
And filling the earth with its roar.

I knew all the track, and could tell,
By the sinking and swell of the sound,
When it dashed through woods, or toiled up a grade,
Or leaped o'er a bridge at a bound.

Now the sound floated free on the air,
Now it died round the curve of a hill,
Now lost to the ear in the deep rocky pass,
But the mad thing was rushing on still—

Plunging through blackness and mist,
Sending wild 'larums before,
Howling like demon of darkness let loose
From Acheron's fiery shore.

And now all the windings are passed,
And out it comes on to the plain,
Shaking the earth as it tears along
Through midnight blackness and rain.

O, that some forest chief,
From his ancient woodland nest,
Might peer through the night and catch the wild
sight
Of this monster troubling his rest!

Nearer and nearer it comes—
Louder the crash and the roar,
Bearing its precious load of life,
Two hundred souls and more.

Many their errands be—
Some journey for traffic and gain,
Some go to the gloomy chambers of death,
And some to the bridal train.

Here are eyes heavy with sleep,
Here bright with the light of love,
In joy and in tears, with hopes, with fears,
On through the darkness they move.

And now it goes by at a leap,
Wild the weird flashes it throws!
Out of thick darkness it comes in its flight,
And into thick darkness it goes.

Plunging through blackness and fog,
Sending loud signals before,
Searching the night with its eye of flame,
And filling the earth with its roar.

Wm. Allen thus replies to a question as to his mental impressions:—Those who are in the spirit of the world are so apt to ask, How do you know whether what you take for a divine impulse, may not be the working of your own imagination? It sweetly occurred that it might be known by the same test that our Lord gave to distinguish his followers from those of the world—*by the fruits.*

THE LOSS OF THE STEAMSHIP "LONDON."

(BY ONE OF THE SURVIVORS)

(Continued from page 590.)

Soon after getting on the poop I saw there was nothing to be done there, and with the others went down again. I then went into the cuddy, which was well lit up; it was full of people. There was a clergyman praying at the time, very fervently, and all joined in with deep and earnest Amens. It was a solemn and trying moment: I remained there about five minutes until prayers were ended, when all arose and with one consent showed a willingness to assist in any way for our safety; even some of the ladies were very energetic—assisting the best they could, and encouraging others. Of course there were some quite prostrated with fear. Very much has been said upon the remarkable coolness and resignation evinced by all, which certainly was the case during the last twelve or fourteen hours: but when our helpless position was first apparent to every one, then fear and excitement showed itself more or less in every face; but there was no raving, no running to and fro but in the way of assisting. Several were advising what the captain should do. I heard one gentleman, a first-class passenger, crying out, "Tell the captain to shut the watertight compartments and run to land." I said to myself, "That request is useless now, as the ship is filling through the openings in the deck; if it were a hole knocked through her bottom, these compartments might be of some use. As for running to land, 'tis too late; we have to go wherever the wind takes us." As soon as prayers were over, I heard one of the officers order more lights to be held to the windows to enable the men to see how to secure the engine-room hatch. I got two swing-lights from the after-part of the cuddy, and took them to the windows. There were several holding lights at the time; a lady came to us—she was rather tall and exceedingly handsome—and proposed that the ladies should hold the lights if we could assist in anything else. Sails were being got up at the time from the second cabin. I went below 'tween decks to assist with the sails. As I passed along by the engine-room, Mr. Greenhill, the chief engineer, sung out to the firemen below to come up. Soon I saw three men come, who said, "It's useless to try any longer; the fires are out and the water up to our middle." All this took place in a short time—say about ten minutes from the time I went on to the poop, then to the cuddy, and then to the engine-room, 'tween decks. Water was coming down at the time, but the mass of it was stopped by sails, &c., placed over the opening. While I stood by the engine-room holding a light for the men who were seeking sails, I had an opportunity of learning our actual condition

from the captain, officers, doctor, and engineer, who frequently met there. They had little hope, though they endeavored to disguise the actual danger. The engineer, Mr. Greenhill, took a light from me to go down into the engine to have a look. It seemed to me a very dangerous undertaking, as there was water still going down, and I could hear it washing about below. He was a very active and able young man. I did not see him return, and felt very uneasy about him—some time after I was relieved to see him—he had come up without my noticing him. At this time, almost all the passengers were assisting; among them was G. V. Brooke, without coat or hat, working with a will. I then helped with a sail which they were getting through to take up on deck; when it was up, I heard an order to bring mattresses, beds, &c., to put in this opening over the engine-room, to prevent it going down in a body; then afterwards to be covered over with sails. The ladies immediately went into their rooms and turned up their beds to get at the mattress. The conduct of some of the ladies was certainly heroic in aiding, directing, and encouraging. After the mattresses were passed out on deck, I went below again. It was then proposed that the passengers should get buckets and pass up water from between decks, as every little would lighten, though two were coming in for one taken out. Buckets were accordingly produced, and fifty or eighty men were soon employed in passing along buckets of water. Some time after, say half-past one o'clock, (Thursday morning, the 11th), as we were arranged along 'tween decks, the captain came to us and said, "Men, put down those buckets, and come and try to secure the engine-room hatch, for that is the only chance to save the ship." It has been thought that there must have been some other leak than the engine-room hatch,—the captain's words do not favor the supposition. Immediately some one sung out, "More sails wanted." A very large one was brought, the last one of the lot (as I was told.) It was very heavy, and they had great difficulty in getting it along.

The sails were kept in a store or state-room, on the starboard side abaft the mainmast; they could not be taken aft by the passage-way on that side of the ship, as it was blocked up with freight or luggage; consequently they had to be taken forward around the mainmast and down the passage-way on the port side, where there was just room enough left to crawl over; and here is where the detention was, a truly painful one at that time. As the sail was thus delayed, some came down to see what was the cause; first the captain, asking, "What is detaining you? hurry it along!" then Mr. Tycehurst, the second officer, singing out, "Hurry up that sail!" then some one else,

"For God's sake bring along that sail, or the ship will sink!" I mention this to show how every space was choked up that should have been clear, and also to show the unprepared state of the ship for an emergency. At length the sail was got over, (I think the passage-way had to be cleared first), and through on to the deck. There we could best understand our hopeless condition. There was much water on deck, perhaps never less than two feet on the lee side, though she was not taking much over on the weather side she would roll over and take it over the lee rail; then when she rolled to windward, up would come a tide two to three feet deep, carrying everything before it. It is no wonder then the skylight was carried away, particularly when there was a piece of a spar striking against it.

About fifty men were on deck assisting to put the sail where it was required, and where there were already a pile of them about three feet high. The great difficulty appeared to be in preventing the water from floating up the whole pile of sails and getting down. The one we had just brought up was spread over all the others, and nailed to the deck on the lee side with great difficulty. I saw Mr. Harris and the carpenter driving nails in a foot of water. We were about half-an-hour at this job, and oh, how it did blow, and how cold was the water, and what a medley of dismal noises there was—men hallooing, the sea roaring, and the rigging whistling! At this time I heard the captain give orders that the pumps should be kept going. When the sail was placed over, I went into the cuddy, and passed on down below to assist in carrying up water—fully convinced that the ship must sink. I did not expect her to keep afloat till daylight, and am astonished to this day that she floated as long as she did. I remember saying twice that night to a young man, "This ship will sink before morning, and there will not be one left to tell the tale." My prophecy did not prove true. It was an error in judgment, a thing which few like to own to, but I am happy to do so in this instance.

Again below, I joined in the ranks of those passing buckets of water. Presently Mr. Grant, one of the junior officers, came round raising volunteers for the pumps. At this time there was a great difficulty in getting men to go to the pumps; not but what they were willing to work, but they dreaded going on to the deck—the night dark and cold—and a danger of being washed out to sea. I consented to go, though I dreaded it as much as the others; moreover, I felt very weak and fatigued, having eaten little that day. On my way up, I noticed that the stern posts on the starboard side were knocked in; and the water coming in later in the morning those on the port side were also

stove in. On my way out, through the cuddy, I noticed that almost everybody had become very quiet. Ladies were sitting together talking, some reading. Those from the second cabin were there also, as well as the children. Men had become much more calm than they were three or four hours previous; there was very little conversation; every one seemed wrapped in his own thoughts. I got to the cuddy door to go out, watching an opportunity when the ship was over to leeward to open the door, so that the water should not rush in. Once on deck, what a sensation it was! Water whirling round you up to the knees—wind piercing cold—night intensely dark. I felt my way along in the darkness, again steadying myself by the ropes, &c., on the weather bulwarks, to about midships, to where the pumps were. I found about a dozen men there. I could barely distinguish figures in the dark, though I recognized a few voices. It required six to turn the wheels that worked the pumps, three at each handle. All were passengers there at the time, excepting two of the officers, Mr. Angel and Mr. Grant. Mr. Angel was placed to see the pumps were kept going—and nobly he did his duty. I saw him there after we had left the ship, still at his post, encouraging and assisting. There were no sailors at the pumps at any time after I went out. I do not think worse of them for this. They had had a hard week of it—most all the time at work—all the time wet; poorly fed for the last day or two. Some were disabled by so much lumber on deck; I saw several who had bad wounds. Mr. Munroe went to the fore-castle once to get men for the pumps, and twenty pleaded illness. The work at the pumps was very laborious. We had to take brief spells, being short-handed; occasionally we would have a fresh hand, whom Mr. Grant had persuaded to come, while others left off, quite done up; and indeed it was a trying place. The seas broke over us so roughly, that sometimes I felt the water up round my neck. At those moments the pumps would have to stop; but as soon as the tide had receded, then would be heard Mr. Angel's voice, "Round with the pumps, keep them going." There was a good deal of talking and encouraging to keep up pluck and make the work go lighter. I felt much happier here, away from the women, for seeing so many frightened made me feel worse, and when inside you did not know how matters stood, whether she was sinking or not; and I had a great horror of being shut up inside when she did go. After being about an hour there we were getting fatigued—wanted a stimulant—and wishing we could get something to drink. One said, "I will try and get some." He went to the cuddy and returned with a bottle of whiskey, which was fully appreciated. It gave

us new life. Some time after, Mr. Main, a passenger, and I were sent to the cuddy to raise volunteers, as we were getting worn out. When we got in I saw a good many men sitting there, and asked every one; some went out, some were not well, some sitting beside their wives and children. The mother would say, "Oh do not take him from me!" Most of the passengers were still below, carrying up water.

Daylight at length came in, and then we could see what a helpless log our ship was. She was then pretty low at the stern, and when she rolled seemed going right under. The sensation to any one on deck was truly awful. None seemed to blame Captain Martin; and at no time did I hear anybody reproach him. But the expressions towards the owners were quite different: they were anything but blessings.

(To be continued.)

THE CHALETs OF THE ALPS.

Those who have not in person visited the Chalets can form but little idea of the primitive simplicity with which these rude dwellings are built. In some places they are merely made of large stones piled on one another, with a sloping roof, and surrounded by a narrow gutter to carry off the rain; others, when situated within reach of the forests, are built of rough logs of wood, placed across each other, the interstices being filled with moss and dried leaves; those are better than the stone huts, as they are much warmer and retain less damp. The whole building is about 20 ft. by 14 ft. and divided by a slight wooden partition, the larger portion being used as a cowshed. Above this apartment, and under the slanting roof, is the place where the hay is stored, and which forms the shepherd's sleeping chamber. The remainder, a space of about 14 ft. by 6 ft. is reserved for kitchen and parlor, and is not unfrequently shared by one or two favorite goats, or even a pig. This part is open to the roof, and through a trap door, kept open by a means of a long fir-pole, the smoke finds exit, chimneys not being in vogue. It has also another slight partition or screen across one corner, which is appropriated as pantry or larder.

There being no windows, daylight is admitted through the door, which is kept open for that purpose. The floor is of stone, or rather a mixture of earth, rock, and stone; and there is no fire place, a fire being made when required on the ground in a corner. Its furniture consists of a wooden bench or settle, and perhaps a large stone boulder, which serves as a table or seat, as may be required. The kitchen utensils comprise two or three porringers, a kettle, and a few wooden spoons, besides two milking-pails. Above the hearth, which is formed of stones, is suspended a little wooden

crane that turns on a pivot, upon which is hung the great copper cauldron that the king of the herd brought up in triumph on his head from the village below, and in which the milk is scalded preparatory to making it into butter and cheese. There is no lack of ventilation in the dwelling, for around, above and between the bare rafters which form the walls the wind and cold air from the glaciers above whistles freely, though this is in a measure tempered by the warm and fragrant breath of the cows, which are closely packed every night within the hut. — *Chambers's Journal*.

CRUELTY TO TURTLES.

The New York Evening Post publishes the following reply of Professor Agassiz to a letter from Henry Bergh, President of the Society for the prevention of cruelty to animals, requesting the learned Professor to lecture, sometime during the coming fall, on the turtle:

NABANT, September 27, 1866.

Dear Sir: It would give me the greatest pleasure to co-operate with your Society, for I sympathize heartily with the object you have in view.

But my life is absorbed with other duties, and with the best will I cannot do more than what I have already engaged to do.

Excuse me, therefore, if I answer but briefly your special questions. To meet you in New York and expound publicly my views upon such subject is out of the question.

I need not tell you that men have always excuses enough to justify their wrong doings. So it was with the slave trade; so it is to day with the turtle market. And though black men are more likely to be protected hereafter, their former sufferings during long sea voyages are on record, and humanity shudders at the tale. Whether men may ever be refined enough to feel their guilt when they torment animals, remains to be seen, and your Society will no doubt do its share in educating them in that direction. But to say that turtles do not suffer when dragged from their natural haunts, tied that they may not move, turned upside down, &c., &c., is simply absurd. It is true that they can live for a long time without food or drink; but they do feel pain, and are indeed very sensitive to some injuries. That of turning them upside down among others is sufficient, for instance, to prevent their eggs from hatching. Their sufferings may be inferred by the violent and convulsive movements to which the perforation of their fins gives rise. And yet to this proceeding dealers in turtles generally resort in order to tie them more closely and pack a larger number in a smaller space.

Of course when tied in this manner they must suffer less by being turned upon their backs, because the fins are thus relieved from

the pressure of their whole weight; but the best evidence I can afford that they suffer in that position is, that they die if it is much protracted; and yet turtles are among the animals that resist longest privations of all kinds. Is not the fact that they die merely from the attitude in which they are forcibly kept the most complete evidence of their suffering? For what else would cause death, if not pain and the unnatural pressure of parts brought into unaccustomed positions.

Having gone so far, let me call your attention to the dangers arising from ill treatment of beef cattle before slaughtering them. While in Brazil, I learned that the city of Para suffered from the quality of the beef sold in the public market, deteriorated because the oxen and cows killed in the city were brought in from a considerable distance, and were often kept many days without food. The matter grew so bad that a company was formed to bring, by steam, beef killed upon the farms; and everybody felt the difference in the condition of the meat and its nutritive qualities.

Very respectfully yours,

L. AGASSIZ.

Phila., 11th mo. 17th, 1866.

ITEMS.

A company of Americans have obtained permission to erect telegraph wires or to sink telegraph cables along the coast, and to connect them with other lines now building in Russia.

It having been decided by the Secretary of the Interior to have printed instead of manuscript copies of patent cases prepared by the Superintendent of Public Printing, all the female clerks employed upon such work have been discharged.

The thirteenth article of the Constitution of Indiana, known as the "black article," forbidding negroes from entering the State, etc., has been pronounced unconstitutional and void by the Supreme Court of the State.

The Jamaica committee has unanimously resolved to indict Governor Eyre for murder.

A royal decree prohibits in Spain the dangerous toys known as "Pharaoh's serpents."

THE BRICKS OF EGYPT.—Professor Unger, the celebrated Viennese botanist and palaeontologist, has recently published some remarks on the bricks of the ancient Egyptians, especially those of the pyramid of Dashour, which was built about 3400 years before our era. One of them being examined through the microscope by the professor, he dis-

covered that the mud of the Nile, out of which it was made, contained the remains of plants and animals that had existed in those pyramid-building days. There were fresh-water shells, fishes, remains of insects and swarms of other organic bodies, which are, for the most part, found without change in Egypt at the present time. There were two sorts of grain—wheat and barley—the field pea, the common flax, which he supposes was cultivated as an article of food as well as for spinning; also the wild radish, common vetch and many other weeds of familiar kinds. He also found fragments of burnt tiles, of pottery, a small piece of twine, spun of flax and sheeps' wool, indicating the advance that civilization had made more than five thousand years ago. The chopped straw clearly discernible in the body of the bricks confirms the description of the manner of making the latter, such as we find in Herodotus and in the Book of Exodus. —*Galignani.*

THE INDIANS.—The census of the Indian tribes of the United States, accompanying the annual report of the Commissioner of Indian Affairs for 1886, shows that the Indians are distributed as follows: Washington superintendency, 14,800; Oregon do., 10,471; California do., 25,962; Arizona do., 34,500; Nevada do., 8,200; Utah do., 19,800; New Mexico do., 19,900; Colorado do., 5,000; Dakota do., 24,470; Idaho do., 7,330; Montana do., 13,633; Northern do., 18,178; Central do., 12,837; Southern do., 53,904; various independent agencies throughout the country, 26,779. Total number in the United States, 295,774.

Both Houses of the Cherokee Legislature have elected William P. Ross Chief of the Cherokee Nation in the place of the late John Ross. He delivered an inaugural, in which he paid a tribute to his predecessor, and urged them to imitate his virtue, congratulated the nation on the return of peace and the treaty of the 19th of Seventh month, recommended the adoption of the amendments required by the treaty, the repeal of the confiscation laws, and the granting of the right of way to the Pacific road and a census of the nation. He discussed also the condition of the public schools, and the granting of indemnity for losses of the war.

THE FREEDMEN.—The Secretary of the Treasury has sold the marine hospital at Charleston, S. C., to the Protestant Episcopal Church South, of that city, to be used as an orphan's home and school for the education of freedmen's children.

The Bureau has recently extended its operations in procuring employment for the large number of freedmen congregated in certain localities. Under the direction of the Assistant Commissioner of the District of Columbia, offices have been recently opened in New York, Brooklyn, Jersey City, Boston, Providence, and other points in the North and West. Large numbers of freed-people are constantly being shipped to good homes, in accordance with the requisitions of these offices.

A circular from General Charles H. Howard, Assistant Commissioner of the Freedmen's Bureau, sets forth that there is a much larger number of freed-people in the District than can find work at proper wages, and the Bureau has sought the aid of benevolent societies in the North and East, and called upon officers of its own, for the furnishing to the freedmen of employment with fair remuneration. About 5,000 freed-people have been provided for during the past year, having been furnished transportation from this city to places at which employment had been secured for them. It is stated in the circular that amongst a population of 23,000

freed-people in the District, probably not more than 15,000 can obtain work at fair wages, and the colored people are invited to avail themselves of the agency of the Bureau in giving them transportation to points where they can be furnished with employment.

A plan to entice negroes to Peru, where they would be placed upon the footing of coolies and reduced to practical serfdom, has been exposed by Secretary Seward.

SELECTIONS FROM THE WRITINGS OF JOHN BARCLAY.

(Continued from page 595.)

1817, *Tenth month 2d*.—I have been fearful of leaving anything on record behind me, but what upon clear conviction has appeared to be right; and have often seen the necessity of looking as closely to what is thus committed to paper as to anything that may be said or done, it being my earnest desire that nothing may even in secret be done or said but what will bear the test of being brought to light. It may seem to many, who have not hitherto been much, if at all, brought under the reducing, refining power of Truth, that such heavy exercises as have been permitted to come upon me, and as have come upon others, are nothing but the effects of a weak mind and a bewildered imagination; and such may not enter into any understanding or feeling of these trials, which are described in such strong terms. These may be yet more surprised when they read of such sudden changes and revolutions as some experienced in their religious states. Yet, in the natural world, how often do we see the greatest storm preceded, and, at other times, followed, by the smoothest, calmest weather. The analogy is striking, and it may be safely concluded that all these reverses are designed to produce a beneficial effect.

1817, *Tenth month 17th*.—About a month ago, I was at a young Friend's house, concern-

ing whose zeal and sincerity in the blessed cause I have not a doubt. He has appeared in the ministry, I believe, acceptably to Friends in general, and is a promising, growing character. In the course of much intimate conversation, we approached the subject of prayer. Upon which, he asked me whether I did not think that the end which Friends had in view, by the practice of private retirement, was vocal prayer, that is, the outward act and attitude of kneeling down and using words. I felt very much at this question; and an awfulness came over me, and exercise, lest either this person or myself should be adventuring, without taking off our shoes, upon holy ground. In replying to him, I could scarcely refrain from using the language of William Penn, "Words are for others, not for ourselves, nor for God, who hears, not as bodies do, but as spirits should." It is the heart or soul that can alone cry acceptably through the drawings of that Spirit which inclines to good and to the source of all good; the mouth may speak out of the very abundance of the heart. There is nothing, however, in words, as such, nor in outward silence, as such. So that our prayers are none the better for being clothed in words, nor the less likely to be accepted when not clothed in words. There may be words when none should be used, and there may be a silence when words are called for; and herein stands the snare which should be carefully guarded against.

To a Friend.

LONDON, Tenth month 20th, 1817.

This morning, upon calling at J. S.'s, I found Samuel Alexander within and alone, and spent about twenty minutes pleasantly with him. Upon inquiring after the American Friends, S. A. said they were both there, and that Hannah Field was unwell, but that I should see Elizabeth Barker. Upon this, he left the room, and soon returned, introducing E. B., whom I had felt dear to me, indeed, before I saw her. She took my hand with the affection of a near relative, and addressed me in as moving and affecting a manner as I remember ever witnessing. She seemed to be speaking to one whom she believed to be under the powerful, refining and preparing hand of the Lord, and with whom she tenderly entered into sympathy, under His necessary provings and purgings, using several times the words "dear exercised child," and speaking especially of the over-ruling power that is to be regarded and trusted to in all our affairs, both temporal and spiritual; and these words, as it were, still ring in my ears—"He can bless a little, and he can blast a great deal." Oh! that we may all keep in the littleness, in the lowliness, remembering what we are in the absence of our Beloved. How poor, how mean, how unable to preserve ourselves from falling, or to keep our souls alive to what is good; that so we may truly know wherein our strength lies, whence our qualifications come, how we may be what we ought to be, and how become instrumental to good in any way.

Thou knowest that I have wished, in regard to my settlement in the world, far more earnestly to obtain the blessing which maketh truly rich than any other acquisition. Thou art also fully aware, that, as this blessing is annexed to obedience, so the nearest way to partake of it in our outward affairs is to submit to that which may be required of us. I am ready to think, if there be anything for me to do in the line of business, it will be in a very humiliating way; that I must, whether in business or not, descend into a rank far below the wishes of my dear relatives and friends, and be subject to the wants of those poorer brethren and sisters, who are often meanly esteemed and little regarded; that I must thus enter into their sufferings and taste of their cup of bitterness, and thus also loudly testify against the prevailing prejudices, pride and luxury of this age, but more especially against many notions and opinions that are creeping in amongst us a people. Oh! how is the prosperity of the precious cause of Truth obstructed and impeded—how grievously is it suffering under some who call themselves its friends. "Ye are my friends," said our Lord, "if ye do that which I command you." Ye are the friends of

Truth who obey the dictates of Truth; but those would rob her of her simplicity, and have her disguise the distinguishing features of her countenance, and cover her with their own deceitful embellishments, their own vain inventions. But I cannot express to thee the warmth of feeling that prevails with me when I look around and consider the situation of that numerous class, the full, the rich and the gay; nor can I convey to thee the pity that I have in my heart for them. How are they encompassed about by their own selfish, earthly satisfactions and comforts—how are they snugly nestling themselves in that which is likely, in the end, to prove to them a bed of briars! May we be favored to subject our own fallible faculties and powers, our own reason and natural understanding, which are ever apt to busy themselves in things that cannot rightly be brought under their decision; that we may each, I repeat, endeavor to sink down low and dwell low in that which sheweth indubitably the good from the evil in all our undertakings and designs. Oh! this is an attainment that comes only by a diligent attention to the voice of the true Shepherd.

Thy very affectionate friend,

J. B.

To his Sister.

Tenth month 31st, 1817.

MY DEAR LYDIA:—Thou art very near to me in the best sense. How precious to feel one another to be under the continual observation of One who cares for us and watches over us for good. Though I have passed over some wild heaths and dry deserts since I last saw thy face, and have been, as it were, parched with thirst and panting for the water-brook, longing also for the shadow of the great Rock in this weary land: yet, there has met me the good Samaritan, whilst I lay by the road-side, bruised and buffeted by him who waylaid me. Oh! what shall I say of all that has been done for me by Him who had compassion on me; how precisely can I point out the spot where he saw me as I lay—it was even at that spot where every human help forsook me, and every hope seemed to be taken away—the priest and the Levite had passed by! I have, I think, seen by experience somewhat of the narrowness of the right path; and, in prospect, (as regards myself,) I see it more and more narrow; still have I day by day the portion of encouragement that is best for me, the good that is convenient, and such timely support as enables me still to struggle forward, still to journey on. May we both be aided to look over and beyond our trials, to the inheritance laid up for those who persevere in faith and patience to the end. Let not thy feet slip insensibly from off the sure foundation, the Eternal Rock, the unchangeable Truth; but

often be concerned to survey thy building, and upon what it stands; to examine whether it be firmly fixed upon that which is immovable, or whether it be in any degree propped up by inferior dependence; also, inquire whether, if outward means, aids and instruments were removed, thy building would still withstand the inclemencies of the varied seasons. For when the floods of affliction outwardly or inwardly arise—when the winds of opposition or of persecution assail, and when the rains descend—it may be too late for any to lay to heart these things, for their ruin may be at the door. The approbation, the regard, the sympathy of such as love what is good, have required from me all the watchfulness, all the earnest desires for preservation that I have been blessed with. How needful, then, is it that our foundation be on that in which there is no variableness, neither shadow of turning. Thus we may come to know in whom we have believed, and to see who is our Teacher, and to feel Him a present help in the time of need—a shield, a tower, a rock, a refuge, our joy and crown of glory. I have longed that, amongst the many deceits of the enemy, thou mayest not be taken by a very subtle one—discouragement. Oh! how many have set out well, have made some strait steps with firm foot and steady eye, have begun to show forth by some sweet fruits the great and marvellous power which has visited them; yet, through giving way to the wiles of the enemy, they have let in discouragements, like a flood, which have borne down everything before them. All unprofitable discouragement, all undue lamentation on account of frailty, folly or disobedience, may be considered to be the work of him who was a liar from the beginning. We read that “godly sorrow worketh repentance,” and it is, indeed, nothing short of an ungodly sorrow that induces despair. Oh! that we may be content at such times of discouragement to sink down with that which suffers within us; that we may there wait in patience, in humility, in true prostration and silence of all flesh, being determined to hope against hope, being resigned to acquiesce in whatever may be called for.

We profess to believe that that which is to be known of God is manifested within; and that there is revealed or manifested what the Lord requireth at our hands. I believe that we have need to exercise a daily and hourly watching and waiting in the light, in order to be favored clearly to discover those things that belong to our peace.

1817, *Eleventh month 10th*.—I think I have seen the danger of young men or women dwelling anywhere else than in the valley of humility. Human learning, human attainments and excellencies—I mean all those things that are obtained by the memory, judgment, reasoning

powers and mental abilities, separate from any immediate influence and assistance derived from the source of all true wisdom—these natural acquisitions and talents are well in their places, and are serviceable to us, when kept in subjection to the pure teachings of Him “who teaches” by His Spirit “as never man taught.” But when any natural talent or faculty of the mind, or acquisition by virtue of that talent or faculty, usurps and domineers over the little seed of the kingdom sown in the heart, it had been better that such an enemy were cast, as it were, into the sea, or utterly annihilated, than that such mischief should be done. I have been in company with some young persons of our Society, who have been not a little injured by giving way to pride and foolish talkativeness, in respect to many matters, in which, though they seemed well-informed, yet not keeping in the littleness and lowliness, they have acquitted themselves but ill, through letting in a forward, prating spirit. Now, the best light in which we can view true talents and virtues, and in which they are set off to the best advantage, is the sombre shade of humility. For the more the frame-work is colored, or gilt, or carved, or ornamented, the more there is to take off the attention of the eye from the picture itself. So that it seems to me best for each of us to dwell in the littleness, in the lowliness; always bearing in mind whence we are, even from the dust, and whither we shall return, even to the dust; and that we should not forget from whence all that is good, either immediately or mediately comes, even from the source of all good. This would make us backward and timid at giving our judgment; it would render us ready and willing to esteem others better than ourselves—quick to hear, slow to speak, slow to wrath, because we should be patient, humble, forgiving one another, loving one another, pitying one another—for we should then know how frail man is.

(To be continued.)

SELECTED.

Do we find Christ frequently examining his followers in their creed, and rejecting one as a sceptic and another as an infidel? Sceptics they were all, so long as he was among them, a society of doubters, attaining to faith only at intervals, and then falling back again into uncertainty. And from their Master they received reproofs for this, but reproofs tenderly expressed—not dry threats nor cold dismissal.

Assuredly those who represent Christ as representing to men an abstruse theology, and saying to them peremptorily, “Believe or be damned,” have the coarsest conception of the Saviour of the world. He will reject, he tells us, those who refuse to clothe the naked, or tend the sick, those whose lamps have gone out, those who have buried their talents—not those

whose minds are poorly furnished with theological knowledge. Incredulity and uncertainty, as long as it seemed honest, he always treated with kind consideration; and so disposed was he to the largest tolerance that on one occasion he refused to condemn one who, showing some respect for his character, yet disobeyed his first and most peremptory law—namely, that which commanded all persons to follow and attach themselves to him. And on this occasion he uttered words which breathe that contempt for forms, and respect for what is substantial, which is the unfailing mark of a commanding spirit—“He that is not against us is on our part.”

MEMOIR OF REBECCA B. THOMPSON.

(Continued from page 597.)

She was at the time referred to, and for several years previous, an almost constant attender of our religious meetings, making many sacrifices, often in much weakness, and under bodily suffering. Her interest in these, and her views on the right ordering thereof, may be gathered from the letters inserted. Although she had a high regard for the Society of which she was a member, yet she was measureably free from that sectarian feeling so much abounding in the world, and so much to be deplored. This feeling is well depicted in the following manuscript, to wit:—

“From an impression which has attended my mind to write what the spirit may dictate, as being applicable to whomsoever it may seem to be addressed, for in that particular I am at this time blind; therefore, the natural will in me can have no part, having long since seen that of myself I can do no good thing, neither do I believe it possible for any man, as man, to do the works of God. But in order to do this, he must know a coming down into the littleness and lowliness of self, willing to ask counsel and direction of Him; not depending on his own understanding, or that of others, as regards what he may do or leave undone. However high and exalted his reasoning powers may be, they are insufficient to teach him his duty to his God. For no man knoweth the things of God save God and he to whom he revealeth them by his inspeaking word, whispered in the attentive ear of the sincere seeker after spiritual food. The Scriptures of Truth declare ‘they that seek me shall find me, and unto those who knock it shall be opened;’ showing that there must be a laboring upon our parts for our daily bread, in order that we may be nourished and supported with spiritual food during this state of existence; and thereby be prepared, when done with the perishing things of this world, to enter upon a life of joy unspeakable and full of glory in that which is to come. Thus we may be enabled to adopt the language of that eminent apostle, Paul, ‘I have fought the good

fight, I have kept the faith, and henceforth there is laid up for me a crown of righteousness that fadeth not away; and not for me only, but for all those who do likewise.’ How much is embraced in these few words, *not for me only*, but for all those who follow me, as I have followed Christ! This includes all the human family, no matter what their rank or condition in life may be, or to what religious sect they may belong. * * *

If they are only concerned to acknowledge and follow Christ as their holy leader and true guide, as Paul did, they will be enabled to adopt the same glorious language when about to bid adieu to the perishing things of this world. This is the precious privilege of the love of God to his poor finite creature man,—that it does not confine him to any particular creed or any set forms of worship, it only requires true humility and entire dedication of heart; for ‘the humble he teacheth of his ways, and the pure in spirit shall see God.’ They shall know a union and communion of feeling—a sweet fellowship, in which they shall not only feel love to God, but it will extend to all the workmanship of his hands. ‘By this shall all men know that ye are my disciples, that ye have love one for another.’ Under the influence of this love, I ask no man to embrace my particular title or sect of religion, for I have no feeling but that of love for any one, however differently they may see from myself; it having been my lot to mingle with different religious professors, where every feeling of ‘stand by thyself, I am holier than thou,’ was swallowed up in the love which emanates from the Father, and there was a joy and rejoicing together, unknown to the unbaptized in spirit,—they who are trusting in their own strength instead of leaning upon the breast of the beloved of souls.”

Her offerings in the ministry were for a time but seldom, and often of but few words, expressed with fear and trembling; neither were they at any time in the “enticing words of man’s wisdom,” but were few and savory, accompanied with a vitality that made them generally acceptable to her hearers. In 1853, she was acknowledged to have received a gift in the ministry, which was in the thirty-seventh year of her age. Although she never obtained a minute from her Monthly Meeting to travel in the service of Truth on her own account, yet she several times received the sanction of her friends, by way of minute, to unite with other laborers in the vineyard, when she felt a Gospel call leading her thereto. But her great care and concern, not to engage in such weighty undertakings without the sanction and approval of the great Head of the Church, will be best exemplified by an extract from a letter to a female friend, respecting a proposed religious visit on Truth’s account:—

"Feeling, as I believed, the way opened this morning to communicate a few lines to thee, I gladly embrace it, not having before seen with clearness how to proceed in so weighty an undertaking as was under consideration when I last saw thee; but as I have been willing to leave all with my Heavenly Father, who is not only able to appoint, but also to anoint, I am only desirous of becoming passive in His holy hands, knowing that, unless this is my condition, I can never go forth as an instrument of usefulness. I also know that strict watchfulness is necessary to maintain this position, for the enemy of our souls' salvation is ever on the watch, and if he cannot draw us in one way, he will seek to do so in another. This I have known from a degree of experience. I believe I must for the present endure all that my Father may be pleased to inflict for my further refinement, for He will refine His servants, and make them as pure gold and as polished shafts before they can go forth in His name. This, then, is the situation in which I am placed; therefore, I can move no further in the concern, unless a fresh command should proceed from His lips, who doeth all things well. Therefore, let none go forth in His name, unless fully convinced it is His will."

(To be continued.)

A TRUE GENTLEMAN.

A gentleman is not merely a person acquainted with certain forms and etiquettes of life, easy and self-possessed in society, able to speak and to act and move in the world without awkwardness, and free from habits which are vulgar and in bad taste. A gentleman is something much beyond this; that which lies at the root of all his ease and refinement, and tact and power of pleasing, is the same spirit which lies at the root of every Christian virtue. It is the thoughtful desire of doing in every instance to others as he would that others should do unto him. He is constantly thinking, not indeed how he may give pleasure to others, for the mere sense of pleasing, but how he can show respect for others—how he may avoid hurting their feelings. When he is in society, he scrupulously ascertains the position and relation of every one with whom he is brought into contact, that he may give to each his due honor, his proper position. He studies how he may avoid touching in conversation upon any subject which may needlessly hurt their feelings—how he may abstain from any allusion which may call up a disagreeable or offensive association. A gentleman never alludes to, never even appears conscious of, any personal defect, bodily deformity, inferiority of talent, of rank, of reputation, in the persons in whose society he is placed. He never assumes any superiority to himself—never

ridicules, never sneers, never boasts, never makes a display of his own power, or rank, or advantage—such as is implied in ridicule, or sarcasm, or abuse—as he never indulges in habits, or tricks, or inclinations, which may be offensive to others. He feels as a mere member of society, that he has no right to trespass on others, to wound or annoy them. And he feels, as a Christian, that they are his brothers—that, as his brothers, they are children, like himself, of God—members, like himself, of Christ—heirs, like himself, of the kingdom of heaven.—*Quarterly Review.*

ANCIENT ROME.

BY F. W. ROBERTSON.

The Public Life of Rome.

First, I notice the spirit of its religion. The very word shows what that was.

Religion, a Roman word, means obligation, a binding power. Very different from the corresponding Greek expression, which implies worship by a sensuous ceremonial (*threskeia*.)

The Roman began, like the Jew, from Law. He started from the idea of Duty. But there was an important difference. The Jew was taught duty or obedience to the Law of a personal, holy God. The Roman obeyed, as his Etruscan ancestors taught him, a Fate or Will; and with very different results. But at present we only observe the lofty character of the early religion which resulted from such a starting-point.

The early history of Rome is wrapped in fable; but the fable itself is worth much, as preserving the spirit of the old life when it does not preserve the facts. Accordingly, the tradition taught that the building of Rome was done in obedience to the intimations of the will of Heaven. It was rebuilt in a site selected not by human prudence, but a voice divinely guided.

Its first great legislator (Numa) is represented as giving laws, not from a human heart, but after secret communion with the Superhuman. It was the belief of Roman writers that the early faith taught access to God only through the mind; that, therefore, no images, but only temples, were found in Rome during the first two centuries of her existence. No bloody sacrifices defiled the city. War itself was a religious act, solemnly declared by a minister of religion casting a spear into the enemy's territory. Nay, we even find something in spirit resembling the Jewish Sabbath—the command that during the rites of religion no traffic should go on, nor workmen's hammer break the consecrated silence, but that men should devoutly contemplate God. Here was a high, earnest, severe religion.

Now, this resulted in government, as its highest earthly expression. Duty: and there-

fore Law on earth, as a copy of the will of Heaven. Different nations seem, consciously or unconsciously, destined by God to achieve different missions. The Jew had the highest: to reveal to the world Holiness. The Oriental stands as a witness to the reality of the invisible above the visible. The Greek reminded the world of Eternal Beauty; and the destiny of the Roman seems to have been to stamp upon the minds of mankind the ideas of Law, Government, Order.

Beauty was not the object of the Roman contemplation, nor worship; nor was harmony. The taste for them might be taught, superinduced; but it was not natural. It was not indigenous to the soil of his nature.

Hence, when Greece was reduced to a Roman province, in 146 B. C., the Roman soldiers took the noblest specimens of Grecian painting and converted them into gambling-tables.

You may distinguish the difference of the two characters from the relics which they have left behind them. The Greek produced a statue or a temple, the expression of a sentiment. The Roman, standing upon visible Fact, dealing with the practical, and living in the actual life of men, has left behind him works of public usefulness: noble roads which intersect empires, mighty aqueducts, bridges, enormous excavations for draining cities, at which we stand astonished; and above all, that system of Law, the slow result of ages of experience, which has so largely entered into the modern jurisprudence of most European nations.

One of their own writers has distinctly recognized this destiny (Virgil.) "It is for others to work brass into breathing shape; others may be more eloquent, or describe the circling movements of the heavens, and tell the rising of the stars. Thy work, O Roman! is to rule the nations; these be thine acts: to impose the conditions of the world is peace, to show mercy to the fallen, and to crush the proud."

In accordance with this, it is a characteristic fact that we find the *institutions* of Rome referred to inspiration. Not a decalogue of private duties, but a code of municipal laws. And turning to the page of Scripture, whenever the Roman comes prominently forward, we always find him the organ of law, the instrument of public rule and order. Pilate has no idea of condemning unjustly: "Why, what evil hath He done?" But he yields at the mention of the source of Law, the Emperor. The Apostle Paul appeals to Cæsar; and even a corrupt Festus respects the appeal: "Unto Cæsar thou shalt go." Nor could even the prisoner's innocence reverse his own appeal: "This man might have been set at liberty, if he had not appealed unto Cæsar." The tumult

at Ephesus is stilled by a hint of Roman interference: "We are in danger of being called in question for this day's uproar." When the angry crowd at Athens, and the equally angry mob of the Sanhedrim, was about to destroy Paul, again the Roman comes—Claudius Lysias—"with an army and rescues him." It was always the same thing. The Roman seems almost to have existed to exhibit on earth a copy of the Divine order of the Universe, the law of the heavenly hierarchies.

Private Life.

Second, We observe the sanctity of the domestic ties. Very touching are all the well-known anecdotes. That, for instance, of the noble matron, who fell, all spotless as she was, life-dishonored, and died by her own hand. The sacredness of Home was expressed strongly by the idea of two guardian deities, (Lares and Penates), who watched over it. A Roman's own fireside and hearthstone were almost the most sacred spots on earth. There was no battle-cry that came so to his heart as that, "For the altar and the hearth." How firmly this was rooted in the nation's heart is plain from the tradition that for one hundred and seventy years no separation took place by law between those who had been united in wedlock.

There is deep importance in this remark; for it was to this that Rome owed her greatness. The whole fabric of the commonwealth rose out of the Family. The Family was the nucleus round which all the rest agglomerated. First, the Family; then the clan, made up of the family and its dependents or clients; then the tribe; lastly, the nation. And so the noble structure of the Roman commonwealth arose, compacted and mortised together, but resting on the foundation of the hearthstone.

Very different is it in the East. A nation is a collection of units, held together by a government. There is a principle of cohesion in them; but only such cohesion as belongs to the column of sand, supported by the whirlwind: when the blast ceases, the atoms fall asunder. When the chief is slain or murdered, the nation is in anarchy—the family does not exist. Polygamy and infanticide, the bane of domestic life, are the destruction, too, of national existence.

There is a solemn lesson in this. Moral decay in the family is the invariable prelude to public corruption. It is a false distinction which we make between public integrity and private honor. The man whom you cannot admit into your family, whose morals are corrupt, cannot be a pure statesman. Whoever studies history will be profoundly convinced that a nation stands or falls with the sanctity of its domestic ties. Rome mixed with Greece,

and learned her morals. The Goth was at her gates; but she fell not till she was corrupt and tainted at the heart. The domestic corruption preceded the political. When there was no longer purity on the hearthstone, nor integrity in her senate, then and not till then, the death-knell was rung.

We will bless God for our English homes. Partly the result of our religion. Partly the result of the climate which God has given us, according to the law of compensation by which physical evil is repaid by moral blessing; so that, its gloom and darkness making life more necessarily spent within doors than it is among continental nations, our life is domestic and theirs is social. When England shall learn domestic maxims from strangers, as Rome from Greece, her ruin is accomplished. And this blessing, too, comes from Christ, who presided at the marriage feast at Cana, who found a home in the family of Nazareth, and consecrated the hearthstone with everlasting inviolability.

Let us break up this private life into particulars. We find manly courage. This, too, is preserved in a word. Virtue is a Roman word—manhood, courage; for courage, manhood, virtue, were one word. Words are fossil thoughts. You trace the ancient feeling in that word; you trace it, too, in the corruption of the word. Among the degenerate descendants of the Romans, *virtue* not only means manhood; it is simply diletantism. The decay of life exhibits itself in the debasement even of words.

We dwell on this courage, because it was not merely animal daring. Like everything Roman, it was connected with religion. It was duty—obedience to will—self-surrender to the public good.

The Roman legions subdued the world; but it was not their discipline alone, nor their strength, nor their brute daring. It was rather for their moral force. A nation whose legendary and historical heroes could thrust their hand into the flame and see it consumed without a nerve shrinking; or come from captivity on parole, advise their countrymen against peace and then go back to torture and certain death; or devote themselves by solemn self-sacrifice, (like the Decii), who could bid sublime defiance to pain, and count dishonor the only evil; the world must bow before such men; for, unconsciously, here was a form of the spirit of the cross,—self-surrender, unconquerable fidelity to duty, sacrifice for others. And so far as Rome had in her that spirit, and so long as she had it, her career was the career of all those who, in any form, even the lowest, take up the cross: she went forth conquering and to conquer.

Deep as Roman greatness was rooted in the

courage of her men, it was rooted deeper still in the honor of her women. I take one significant fact, which exhibits its natural feeling. There was a fire in Rome called eternal, forever replenished. It was the type and symbol of the duration of the Republic. This fire was tended by the vestals: a beautifully significant institution. It implied that the duration of Rome was co-extensive with the preservation of her purity of morals. So long as the dignity of her matrons and her virgins remain unsullied, so long she would last—no longer. Female chastity guarded the eternal city.

Here we observe something anticipative of Christianity. In the earlier ages after the advent there was divine honors paid to the Queen of Heaven; and the land was covered over with houses set apart for celibacy. Of course, rude and gross minds can find plenty to sneer at in that institution; and doubtless the form of the truth was mistaken enough, as all mere *forms* of doctrine are. But the heart of truth which lay beneath all that superstition was a precious one. It was this: So long as purity of heart, delicacy of feeling, chastity of life, are found in a nation, so long that nation is great, no longer. Personal purity is the divinest thing in man and woman. It is the most sacred truth which the church of Christ is commissioned to exhibit and proclaim. Upon these virtues I observe: The Roman was conspicuous for the virtues of this earth,—honor fidelity, courage, chastity, all manliness; yet the Apostle felt that he had a Gospel to preach to them that were in Rome also. Moral virtues are not religious graces. There are two classes of excellence. There are men whose lives are full of moral principle, and there are others whose feelings are strongly devotional. And, strange to say, each of these is found at times disjoined from the other. Men of almost spotless earthly honor, who scarcely seem to know what reverence for things heavenly and devout aspirations towards God mean. Men who have religious instinct pray with fervor, kindle with spiritual raptures, and yet are impure in their feelings, and fail in matters of common truth and honesty. Each of these is but half a man—dwarfed and stunted in his spiritual growth. The "perfect man in Christ Jesus," who has grown to the "measure of the stature of the fulness of Christ," is he who has united these two things; who to the high Roman virtues which adorn this earth has added the sublimer feelings which are the investiture of heaven; in whom justice, mercy and truth," are but the body of which the soul is faith and love. Yet, observe, these are moral virtues, and morality is not religion. Still, beware of depreciating them. Beware of talking contemptuously of "mere morality."

If we must choose between two things which

ought never to be divided, moral principle and religious sentiment, there is no question which most constitutes the character "which is not far from the kingdom of heaven."

Devout feelings are common enough in childhood,—religious emotions, religious warmth,—instances of which are retailed by the happy parent; common enough, too, in grown men and women; but listen—those devout feelings separate from high principle, do not save from immorality; nay, I do believe, are the very stepping-stone towards it. When the sensual is confounded with and mistaken for the spiritual, and merely devout warmth is the rich, rank soil of the heart, in which moral evil most surely and most rankly grows, you will not easily build Roman virtues upon *that*. But high principle, which is in other words the baptism of John, is the very basis on which is most naturally raised the superstructure of religious faith.

Happy, thrice happy, he who begins with the law and ends with the Gospel.

FRIENDS' INTELLIGENCER.

PHILADELPHIA, TWELFTH MONTH 1, 1866.

INDIANA YEARLY MEETING.—Extracts from its Minutes have been received. They will be noticed next week.

The Annual Meeting of the Contributors of Swarthmore College will be held at Race St. Meeting-house, in the City of Philadelphia, on Third-day, the 4th of Twelfth month, 1866, at 3 o'clock, P. M.

EDWARD PARRISH, } Clerks.
EDITH W. ATLEN, }

BALTIMORE YEARLY MEETING OF WOMEN FRIENDS.

As the subjects that claimed the attention of Baltimore Yearly Meeting of Women Friends are the same as those contained in the Extracts of the Men's Meeting, already published, we give only the minute embracing the exercises of the meeting.

As we have collected again as a Yearly Meeting, some of us have felt it to be a great privilege to mingle in fellowship together, and amid some discouragements, have had cause to believe that we can be helpers to each other, as we dwell in love. And only by faith and reliance upon Him, before whom all souls are equal, can we receive that love which unites in sympathy and fellowship.

We feel encouraged to press forward, and not stumble at the failings of others; and a concern has been felt for those of our dear young people, who may not always find what their souls crave among us, in consequence of

looking too much at the infirmities of those professing to walk in the light, and who fear that the brightness of our early days has passed away, and that darkness has settled around us.—Take not your flight in the winter.

The same power which was with our fathers is just as near to aid and support us. The same dedication, the same earnestness of effort manifested now as in the early days, would produce the same results; and spiritual miracles would be wrought now as formerly they were done outwardly. We, too, have a work to do. Let us endeavor to "walk worthy of the vocation wherewith we are called." To every heart the Divine Spirit is calling, and pointing out the path of duty, and however small its requirements, let us give diligent heed to them, and thus be prepared for greater service. Obedience to every intimation of duty is our only means of being made rulers over more. We are a people blessed with many privileges. Could we as a united band press forward, bearing each others burdens, what an army might we be to promote the cause of truth and righteousness on the earth. We are called to bear before the world peculiar testimonies, and it has been urged upon us, that what may seem to many to be little things, have most important bearings upon our spiritual health and life. Our freedom from the thralldom of fashion, cannot be maintained, unless we preserve our beautiful testimonies to simplicity of attire, of language, and of manners. We have the power to choose. Relying on Divine assistance, and being faithful, we may become lights in the world, and draw others to us; or neglecting this, may drift into the vortex of the world, and be lost to usefulness.

No one can lay out a sphere of duty for another, but the mind imbued with the love of God, and attentive and watchful, will find that it is oftentimes led out of itself, and will have to labor for the good of others. "The fields are already white to harvest." "Pray ye therefore the Lord of the harvest, that He will send forth laborers into the harvest."

We have been impressively reminded of the large field of labor opening before us, as a whole race in our land has just passed from a state of bondage.—Our young Women have been reminded that they might minister greatly to the comfort and benefit of our sisters of the African race, by patiently instructing them in the use of the needle.

Multitudes of their children are growing up in ignorance of this art, and also of many industrial pursuits, the knowledge of which would tend to make them self-reliant and independent. "Inasmuch as ye have done it unto the least of these, ye have done it unto me."

Finally, let us be not "slothful in business; fervent in spirit, serving the Lord," and we

shall find that He who has been our morning sacrifice, will be our evening star.

With reverent acknowledgement of the favors extended to us at this time, we conclude, to meet again next year if so permitted.

Signed on behalf of the Meeting,

MARY G. MOORE, *Clerk.*

FRIENDS' SOCIAL LYCEUM, PHILADELPHIA.

The present season has opened with a prospect of an interesting series of meetings of the Lyceum. Lectures have been delivered by Caleb S. Hallowell, Dr. J. G. Hunt, Henry Bentley and Thomas H. Speakman. That of Henry Bentley was upon the subject of Telegraphing, and was illustrated by electro-magnetic apparatus used for conveying messages to distant places. The alphabet of telegraphy was shown, and many very interesting details in regard to the history of the art and the practical details of its management. The position of the Lecturer as the manager of a large establishment through which intelligence is constantly transmitted from remote and very widely separated points, makes him familiar with many curious incidents, the relation of which gave variety and interest to the lecture. On the evening of the 13th inst., an essay on Phrenology was read by Thomas H. Speakman, which was followed by a discussion in regard to the truth of that science. There can be no doubt that the labors of Phrenologists have done much to popularize the study of mental phenomena, and have given, perhaps, the best classification of the mental faculties yet invented, while the pretensions of those who have professed to enter into the minutiae of character by an examination of skulls, and have made a business of this, have tended to bring discredit upon the study. The reasons for believing in Phrenology as a science of mind were cogently presented in this lecture, and in the discussion which followed, the most that was urged by those who opposed its claims related to its details rather than to the great facts which underlie it, and which point to close connection between the form and size of the brain, and the mental characteristics which pertain to it.

While some professors are laboring to mitigate the rule of Christ, let us be solely taken up in seeking that powerful help of the Holy Spirit, which renews the strength of the fainting soul, and enduing her with power from on high, shall in truth make the most rigid practice easy. While some strive to accommodate the road to their strength, let us, by relying on God, seek from Him strength adequate to the difficulties of the way,—let us avoid the error of softening down Christianity to the low standard of general practice.—*Memoirs of Port Royal.*

For Friends' Intelligencer.

FRIENDS AMONGST THE FREEDMEN.

NO. II.

Reports for the Tenth month have been received by the Education Committee of the Association of Friends for the Aid and Elevation of the Freedmen from seven of its teachers in Fairfax Co., Va., from two in Loudon Co., Va., and three in South Carolina. The remainder of the schools not officially reported.

These twelve reports present the following aggregate:

	No. of Pupils.	No. Reading.	No. Writing.	In Alphabet.
7 Schools in Fairfax Co.,	209	122	116	22
2 " Loudon Co.,	93	33	46	10
3 " S. Carolina,	151	116	116	24
12 Total,	453	271	278	56

Of the entire number above designated, 222 are Males and 231 Females, while 404 of them are between 6 and 16 years of age. The account also presents the remarkable fact that only 56 are learning the alphabet!

In reference to the Teachers of these schools, the following items have been gleaned from their letters, and may prove of interest to some of the readers of the Intelligencer.

CATHARINE E. HALL, at "Andrews Chapel," speaks very encouragingly of the increase of her school and the progress of the pupils, being very agreeably surprised at their intelligence. She has visited them at their residences, and urged their attendance. She also makes an urgent appeal for assistance in the way of clothing, some children being unable to attend school for want of it; closing with the remark, "Their desire for learning has dispelled the labor, and made the task of teaching them a pleasure."

From ELIZA E. WAY we have yet received no classified report, her school having been so recently established; but she appears well satisfied with her position, and describes "Falls Church" as a pleasant village situated about seven miles from Washington and four from Alexandria, with a post-office, &c."

HANNAH SHORTLIDGE, at "Big Falls," states her school is increasing, but there are more who would come had they clothes sufficient to protect them from the cold, adding, "There are others, who cannot come in the daytime, who seem so anxious to learn, I have started a school of evenings during a portion of the week."

MARTHA WRIGHT, at "Lewinsville," reports that the Freedmen have completed a building (except the gallery) intended both for school and church purposes, and adds, "I wish I could clothe some of the poor creatures who are most needy."

FRANCIS E. GAUSE, at "Herndon Station," remarks, "I have enough to keep me busy now,

though I anticipate quite an increase in numbers during the winter. There were not any of my pupils who knew their letters when they commenced; now, some of them know the first line of tables." Her report shows that she has twenty-one pupils between the ages of 6 and 16 years, and yet there are but three in the alphabet.

SARAH E. LLOYD, at "Woodlawn," has a school of 34 pupils, 31 of whom are between 6 and 16 years of age, and yet only 4 are in the alphabet; 26 are reading, and 21 write.

CAROLINE THOMAS, at "Leesburg," gives an interesting account of one of her pupils who was in many respects incorrigible when she entered her school, but by patient labor with her a reformation has taken place to such an extent that she is now willing to avail herself of her services as an assistant, in which position she has thus far been successful.

MARY K. BROSIUS, at "Vienna," in alluding to the recent removal of that true and faithful friend of the freedmen, Capt. Thos. H. Ross, from that district, says, "There are some unhappy faces of sable hue just now." Her school is on the increase; 23 of her pupils are between 6 and 16 years of age, with only 4 in the alphabet. She has also an evening school of twenty men and women.

MARY McBRIDE, at "Fairfax Court House," remarks, "I am quite proud of my pupils; a number of them take particular pride in dressing neatly and nicely, and looking like ladies! two of them especially, in the first class. They are good, faithful girls, in whom I have every confidence, and I think in the future they will be able to take entire charge of the school. They are good spellers and readers, write well, and talk grammatically. A number of the young ladies at the boarding school here do not read or write as well as four of the girls in my first class." She also alludes to another pupil, daughter of the village blacksmith, *nine years of age*, who keeps her father's books, and does all his writing, much to the astonishment of the influential inhabitants of the place.

SARAH A. STEER, at "Waterford," gives an interesting account of one of her pupils "who is anxious to become a teacher, to accomplish which she has been working during the summer for *seventy-five cents per week*, with the privilege of attending school four afternoons in the week. She tries very hard to have her lessons always perfect, and is now my best scholar." (The Education Committee, desiring the encouragement of such an earnest seeker after knowledge, and deeming this a fit opportunity to carry out a view that had for some time claimed their attention, instructed S. A. Steer, to employ her as an assistant, at a compensation that would leave her at liberty not only to profit by the exercises of the school as a pupil,

but aid her in fitting herself for a teacher. It may be well also to remark, that other teachers have been encouraged to advance such of their pupils as were competent to the position of assistants.) In a subsequent letter from S. A. Steer, she says, "My assistant has been duly installed in her new office. She is very grateful for the opportunity thus afforded to improve herself, and at the same time earn a support by imparting to others the instruction she has received."

Interesting letters have been received from our teachers in South Carolina, as well as classified reports from CORNELIA HANCOCK, CAROLINE TAYLOR and MARY A. TAYLOR, located at Mount Pleasant. It will be seen these three schools numbered last month 151 scholars, of which 147 were between 6 and 16 years of age.

CORNELIA HANCOCK remarks, "The pupils show an undiminished zeal in their studies, and all have evidently *studied* during their holidays. I never saw a school so easily re-organized, after a vacation, and such prompt attention observed. They had had fears we would not return, and their joy that they were to have a steady school to attend knew no bounds. My scholars are now fit for monitors, and a class of fifteen of M. Taylor's school are so instructed. To see some of them teaching *their parents* is a gratifying sight."

CAROLINE TAYLOR states she has "substantially the same scholars as before vacation. The children give me satisfactory evidence of improvement in their studies, and particularly in their conduct towards each other as respects their former quarrelling; giving fresh evidence of the civilizing influence of the schools."

MARY A. TAYLOR writes, "What shall I say of my little ones? My school is not so well organized as either of the two others, as there are so many more, fit only for *my* department. Almost every day I have to turn from the door some small individual seeking his education, as we make a rule to take none under seven years of age. I often look around me, and as I see sixty children struggling for an education, I think there is work enough before me to keep me some time before either *Poets* or *Philosophers* are raised amongst them, and yet I am not particularly discouraged. They nearly all prefer remaining in at recess to write on their slates, to going out to play."

Cheerful greetings have also been received from our two teachers at St. Helena,—Phileas Heald and Sarah M. Ely; although they had at the time of writing only reached Beaufort. They say, "Once more safe, so near our island home that we almost imagine we can hear the voices of our flock; and we long to be with them soon again." Thus the same cheerful spirit appears to animate *all* our teachers, as

was so eminently manifested during their previous labors in the good work.

In the fear that some of his readers may have been wearied with the above, the compiler may remark that it is hardly probable so lengthy a statement will again be presented, but it was thought it would be well at the commencement of another season that Friends should have an opportunity to see the *system* that had been adopted, as well as the *cheerfulness and energy* with which our Teachers are resuming their labors.

11th mo. 1866.

J. M. E.

SWITZERLAND—THE MER DE GLACE.

BY FREDERICKA BREMER.

It was the following day we ascended through the pine forest to Le Montanvert. It is here that one sees before one the so-called Mer de Glace, a broad stream of ice and snow, the offspring of the highest Alps, which pours itself between lofty mountain ridges down into the valley of Chamouni, where, from beneath its gates, issues the river of Arveron. I say, "pours itself," because the frozen river slides from the heights down into the valley, and these icy masses are besides, as one knows, in a state of continual advance.

From the heights of Montanvert we saw the Mer de Glace, Le Mont Blanc des Dames, splendidly shining in the morning sun, and a party of gentlemen and ladies crossing to the opposite side. It looked quite calm and agreeable. Why should not we do the same? Our guides encouraged us to do so, yet with a certain cautiousness of expression.

In half an hour we could cross the Mer de Glace, afterward we should have about an hour's "somewhat difficult road," in the mountain to Le Chapeau; but once there we should see a grand sight, and then also every danger and difficulty would be over—and the guides would have earned a double day's wages! Of this last consideration, however, they said nothing, but the knowledge of it was the reason of their encouraging words.

I was tempted by the thought of becoming acquainted with the beauties and dangers of the Mer de Glace, and determined to undertake the hazardous journey; but how I repented doing so, when, in its midst, I discovered what the nature of it was. For one did not only run the continual danger of slipping or falling while climbing over the icy billows, but one found oneself perpetually on the brink of wide crevices in an ice mass of two or three hundred feet deep, and across which one must leap without any other foothold than a smooth icy wave or hillock. I was in a state of silent despair at having undertaken this enterprise, particularly as I had Louise Coulin with me. If any thing should happen to this young girl! If I

should not be able to restore her to her parents! Then I could not live myself! I thought about turning back, but my guide assured me that we had already accomplished the worst part of the way; but, what yet remained was, in comparison, not without danger; even he himself fell more than once on our slippery career.

With an anxiety which cannot be described, my eyes followed Louise, who went before me with her guide, as lightly and as nimbly as though they were dancing a minuet. This guide was a young man, who had only within the last half year become incorporated into the guild of Chamouni guides, and I therefore felt all the less dependence upon him; but he was light-footed and agile, and in reality better than my old, safe, but very heavy-footed conductor. My guide was a peasant, Louise's was a cavalier; but Louise's was not only young, strong and safe upon his feet, but he enjoyed the undertaking, and never thought about danger. But as for me—

And when we found ourselves midway on the Mer de Glace, and I was desired to notice the splendid walls of a broad ice fissure, in the abyss of which the thundering roar of waters is heard, and was called upon to admire the Mer de Glace, which is even from this point up to the top of the mountains, where it is born, I felt myself like one doomed to death, with the rope already round my neck, who is desired to notice "the beautiful prospect!" But I said nothing, and as Louise gaily recommended me to do, I broke off little pieces of ice and let them melt in my mouth: this, and the beaming glances of my young friend, refreshed me.

The sun shone with great heat, melting the ice, and through the latter part of the road we went sliding and splashing through a regular ice slush. How delighted I was when I had once more firm footing on earth, and I saw Louise there in safety. I gathered and kissed a little common crimson flower, which grew on the borders of the ice like a kind of salutation of welcome.

But the joy was of short duration; for in order to reach Le Chapeau—the only way on this side down to Chamouni—one must clamber along the side of a perpendicular rock, without any thing to hold by but a rope, fastened by iron nails, as a hand-rail on the mountain wall. One walks along a narrow pathway out in the rocks, midway between two perpendicular mountain walls, the one above, the other below. At the depth of many hundred feet below this again is the Mer de Glace, with its sheer descent. A moment's dizziness and all would be over! The guides now began to advise us to hasten, "because stones are frequently precipitated from the rocks above."

I glance up and see that masses of stones are hanging above our heads, as it appeared, just

ready to fall. But how is one to hasten here where one must give heed to every step, and hold fast by the rope? And now even this ceases and the path goes before me, steep up hill; I have merely the guide's hand, who pulls me up.

"We shall go quite safely," he says, consolingly. "Nay; on, on! go on still faster!" I replied, whilst I see stones and debris giving way under each heavy step he takes, and I pray silently, "Deliver us from evil."

Louise, with her light-footed guide, is already up and out of danger, and all the difficulties of the journey are overcome. We are very near the Chapeau, and may quietly rest there before we go farther. I feel ready to cry.

But a few minutes later, when we reached the Chapeau and little Alpine cottage, sheltered by a rock, in the shape of a hat crown, and seated upon a wooden bench in the cheerful sunshine, with my young friend's hand clasped in mine, I felt so unspeakably thankful to have overcome all the perils of the way, that I could not do other than share Louise's delight over the extraordinary spectacle which the Mer de Glace presented; for at this place the pressure from above has caused the ice to mass itself together, and to assume the most remarkable forms. Imagine to yourself a stream of ice-witches and hobgoblins, with their children and bag and baggage, on their journey to the lowest pit! Here, a great giantess, with three daughters, in hoods, shawls and crinolines, are advancing majestically forward; then a whole procession of gray nuns, ten monks without heads; there giants in berserker mood, and yonder a castle of ice, with many towers, like an immense artichoke, with its point somewhat turning inward. In general it seemed to me that the figures of the Mer de Glace resemble the forms and peaks of the circumjacent mountains. Saussure saw, from the heights of Mount Blanc, groups of its pyramids and needles, like the leaves of an artichoke, turning inward toward the middle. Imagine to yourself all this crowd of dirty gray ice-witches, little and big hobgoblins, now in fantastic groups, now a solitary lofty figure, among towers, columns, ruins, as of a demolished city,—imagine all this immovable, and yet advancing downward on a slope of from two to three leagues! Sometimes a witch looses her head, which, set at liberty by the sun, is precipitated into the depths below, and one hears it roaring down like the sound of subterranean thunder.

"The law of truth is that it cannot be shut up without becoming a dead thing and mortifying the whole nature.

Not the truth which a man knows, but that which he says and lives, becomes the soul's life. Truth cannot bless except when it is lived for, proclaimed, and suffered for."

JAMES RUSSELL LOWELL'S TRIBUTE TO HIS WIFE.

Not as all other women are
Is she that to my soul is dear;
Her glorious fancies come from far,
Beneath the silver evening star,
And yet her heart is ever near.

Great feelings hath she of her own,
Which lesser souls may never know;
God giveth them to her alone,
And sweet they are as any tone
Wherewith the wind may choose to blow.

Yet in herself she dwelleth not,
Although no home were half so fair;
No simplest duty is forgot,
Life hath no dim and lonely spot
That doth not in her sunshine share.

She doeth little kindness,
Which most leave undone, or despise;
For naught that sets one heart at ease,
And giveth happiness or peace,
Is low-esteemed in her eyes.

She hath no scorn of common things,
And though she seem of other birth,
Round us her heart entwines and clings,
And patiently she folds her wings
To tread the humble paths of earth.

Blessing she is; God made her so,
And deeds of week-day holiness
Fall from her noiseless as the snow,
Nor hath she ever chanced to know
That aught were easier than to bless.

She is most fair, and thereunto
Her life doth rightly harmonize;
Feeling or thought that was not true
Ne'er made less beautiful the blue
Unclouded heaven of her eyes.

She is a woman: one in whom
The spring-time of her childish years
Hath never lost its fresh perfume,
Though knowing well that life hath room
For many blights and many tears.

I love her with a love as still
As a broad river's peaceful might,
Which, by high tower and lowly mill,
Goes wandering at its own sweet will,
And yet doth ever flow aright.

And on its full deep breast serene,
Like quiet isles my duties lie;
It flows around them and between,
And makes them fresh and fair and green,
Sweet homes wherein to live and die.

DARK HOURS.

BY CAROLINE A. MASON.

Oh, my tried soul, be patient! Roughest rinds
Fold over sweetest fruitage; heaviest clouds
Rain the most ample harvest on the fields;
The grass grows greenest where the wintry snows
Have fallen deepest, and the fairest flowers
Spring from old dead decay. The darkest mine
Yields the most flashing jewels from its cell,
And stars are born of darkness, day of night.
Oh, my tried soul, be patient! Yet for thee
Goes on the secret alchemy of life!
God, the One Giver, grants no boon to earth
That He withholds from thee; and from the dark
Of thy deep sorrow shall envelope new light,

New strength to do and suffer, new resolves,
 Perchance new gladnesses and freshest hopes !
 Oh ! there are times when I can no more weep
 That I have suffered, for I know great strength
 Is born of suffering ; and I trust that still
 Wrapt in the dry husk of my outer life,
 Lie warmer seeds than ever yet have burst
 From their dull covering : stronger purposes
 Stir consciously within, and make me great
 With a new life—a life akin to God's—
 Which I must nurture for the holy skies.
 Help me thou great All Patient ! For the flesh
 Will sometimes falter, and the spirit fail ;
 Add to my human Thy divinest strength,
 When next I waver ; rouse my faith as now.
 That out of darkness I may see great light,
 And follow where it ever leads,—to Thee !

LOSS OF THE STEAMSHIP "LONDON."

BY ONE OF THE SURVIVORS.

(Continued from page 606.)

The weather in the morning was very dull and unsettled. The wind was not so furious as in the night, but the sea still heavy. A few now talked about the boats, though none entertained much hopes of them—of those remaining—for the life boats were both gone. The last one had been washed away the evening previous, and one of the cutters was stove, and hanging down at the side of the ship by the stern-fall from the davit. The mate to it on the opposite side was still good, also two iron pinnaces, capable of carrying say thirty each, and a small wooden boat forward at the fore-castle. The two iron boats were swung on davits on board. About nine o'clock in the morning, and while I was still at the pumps, I saw them making ready the starboard iron boat. The captain had given orders to get the boats ready. I did not leave the pumps to seek a chance in the boat, although there was one whom I knew who was helping in preparing her for sea. I had previously made up my mind to stop by the ship till the last, in case any vessel should come to our rescue, although we had no distress signals up ; for why, I cannot say. I am puzzled to this day why Captain Martin did not have up signals, as a vessel, if she did happen to sight us, and we not her, of course, would take no notice, and pass on. Another reason why I was so indifferent about the boats was this : I thought that where a large ship could not live, a small boat could not. I saw the boat lowered, and several jump over the side to get in her. Soon I saw them climbing in again. The boat had been swamped in lowering her, and she sank. I think, but am not sure, that one or two were drowned at that time.

Steam had now been got up in the donkey-engine, which was a house on deck forward, and shortly it was connected with the pumps, and we were relieved. I then climbed up on the poop, where everything presented a gloomy appearance—the boat sinking had destroyed all

hope. We had still three boats, but they were on the weather side ; the ship would have to be brought round before they could be lowered. There was no effort made at that time to get them out. People were walking about, very quiet and very anxious. I saw the captain then, also Mr. Tycehurst ; several ladies walking about bareheaded, their hair flying about with the wind, but calm and resigned, and very little being said.

They were walking about just as you see people at a railway station when they are waiting for a train. I saw and spoke to the young girl who was so frantic at first ; now she was as reasonable and calm as anybody. I then thought, as a good many thought, that we were not long for this world ; death was staring us in the face. I felt loth to give up life ; I enjoy life. There was also the uppermost thought of all—the uncertain hereafter. I said to myself, " Well, I suppose I am as prepared now as I should be twenty years to come." I regretted most for those I was leaving behind, and whom I had come on a visit half round the world to see ; and now to be drowned on returning, and that in such a stupid, unsatisfactory way ! There happened to be no excuse for it whatever. True, we had a severe gale, but I fancied I had seen as heavy a one before. It appeared to me that a new, strong, well-built ship had been thrown away. Had our ship been driven on to a rock, or had taken fire, or met with some unavoidable accident, I should not have felt so bad. I always dread to think, or to get talking on this part of it, for my feelings of sorrow become mixed with feelings of regret and reproach against some one for so cruel a sacrifice.

Whilst on the deck at this time, I saw the sailors going about throwing overboard any articles they could—hencoops, useless gear, &c. I then looked about to see what prospect there was of saving myself. Hope had not altogether deserted me. I looked out on to the sea, and asked myself the question, What boat could live there but a life-boat ? There was no vessel in sight. I then turned my eyes to the deck. I saw a piece of a board or side of a hencoop, and said to myself, " I shall keep near that when she sinks." It appears now a ridiculous idea to expect that to save me, then 190 miles from land ! I remained on deck about half an hour, and then went below to the cuddy, to see how fared my lady acquaintances, it then being about ten o'clock. Just as I was turning to go down, I noticed the sailors were beginning to get the port-cutter ready ; and I heard one say, " This boat is for the captain and ladies ;" so any hopes I had from this boat were destroyed then ; for I would not try to get in it, and destroy the chance of any of the ladies. So took no notice of it, and passed on

below, intending to keep a pretty sharp look out when she was going to sink, to rush on deck to where my board was.

When I got to the cuddy, the usual question was put by the women, as it was to any one coming in from the deck, "What hopes now." I said, "We are afloat still, and while we are afloat, we are alive, is all I can say." At this time, I thought it wrong to disguise our actual condition; in fact, the captain did not. He had been in the cuddy some time previous, and told all to "prepare for the worst; nothing but a miracle would save us now!" which dreadful assertion was received with no fresh outburst of terror. All the women from the second cabin were sitting by themselves. Those from the steerage part of the ship were in the cuddy also. No distinction now. There were fathers and mothers, with their families of three, four and five, grouped around them—the children very quiet. They did not seem to understand why their fathers and mothers were crying so; and, poor little things, many were standing up to their knees in water. The Rev. Mr. Draper was sitting about the middle of the cuddy, at one of the tables, with many around him, reading and praying unceasingly. Now and then would be heard a voice, saying, Oh, Mr. Draper, pray with me." There were also to be seen men by themselves, reading the Bible. I remember seeing a newly-married couple, sitting by themselves, weeping bitterly. He had lately returned from Australia, had got married, and had induced many of his relations to return with him. They were on board—in all, nine, I have since heard. He appeared to be reproaching himself for having taken her away from her home. She was consoling and comforting him as best she could, saying she was happy, and they would die together. One poor young girl was writing a message on an envelope. I little thought I might have been the bearer of it. She probably intended putting it in a cask or keg that was being got ready by a friend of hers, as I learned afterwards. A young man whom I know was instrumental in starting it; his name was Row, of New Zealand. This keg has not yet turned up.

I conversed with many I knew; every one seemed fully to understand that there was no chance of being saved. A few clung to the hope that a vessel would yet come. Some of the sailors circulated a report that a vessel was in sight, to quiet them. I remained there until say twelve o'clock. Matters getting worse and worse, I could not remain below, but went up on deck again, bidding some whom I knew good-by. As I went to the door to go up the steps, I found a number of people standing on the ladder-way, apparently bewildered. I turned round and took the last look I ever had of the cuddy; the sight is indelibly stamped on

my memory. I found some difficulty in pushing my way through the crowd to gain the deck. The day had brightened up a little, the sun would occasionally show out. The wind and sea were still heavy, but I think had abated since morning. I noticed the sailors were still about the same boat, intending soon to lower it; but, as I had previously heard this was for the ladies and captain, of course, I never looked to it with any hope for my safety. I glanced at the state of the ship, wondering at the length of time she kept together—which raised false hopes with many, not that she would ever get to land, but that she might live long enough for a vessel to come to take us off. For my part, I thought she might keep afloat for four or five hours yet—at this time, I would not not ask anybody's opinion, for fear of being misled—and concluded I would go down to the state-room to put on a dry coat. I thought I might as well live comfortably for a few hours, if I had to die then. Before going, I satisfied myself she would not sink while I was below, as I had a long distance to go, and had a particular horror of being closed in. I went down the companion-way to the cuddy-deck, then around and down to between decks. At this time the passengers had ceased with the buckets, thinking their labor useless. There was no one there at the time but the captain. He had been having a look at the engine-room. I spoke to him, and asked him if he thought it any use to still continue carrying up water; if so, I would go and try and get them together again. He did not care about answering me, and walked back to the engine-room, and I with him. We looked down, and a frightful place it was—the water colored black with the coal, and washing about and breaking up the iron floorings or platforms, and producing an unearthly noise. And a great pool of water it appeared to be. We stood looking for a minute or two. When he turned to go aft, I said, "Well, captain, what do you say?" He replied, "You may, but I think it's no use." We then went up the steps on to the cuddy-deck. There was a division between the after state-rooms and the cuddy. In passing these rooms, we saw some sailors and firemen in there opening cases of liquor, and some with bottles of brandy in their hands; there were several drunk at this time. The captain said to them, calling some by name, "Don't do that, boys! don't die cowards!" I saw a sailor down on his knees, feeling about in a foot of water for a sovereign he had dropped out of his mouth; he was as cool and eager looking for it as a street Arab would be for a sixpence he had seen fall. I saw standing at the cuddy-door a first-class passenger with a life-preserver strapped round him. I then turned and went down again to go to my room, opened one of my trunks, took

out a coat, saw my watch and purse; thought to myself, well, I may as well take them; laid them out, shut the trunk, was particular in locking it, (such is the force of habit), then put my watch in my pocket. At that moment, the ship gave a roll, the water covering the port, which darkened the room, and, in picking up my coat, my purse fell into the water. There was about a foot and a half there at the time. I put my arm down, and felt for half a minute, like the sailor for the sovereign, but could not find it: then walked out into the cabin; there were about half-a-dozen there at the time. I saw a Mr. Lemmon, of Melbourne; I spoke to a Mr. Harding,—he shook his head as much as to say he did not wish to be interrupted then: some sitting with their heads resting on the table—almost all preparing for death, and patiently waiting. I saw an elderly person strapping up a railway-rug into a bundle; shortly after he was seen on deck with it, when the captain, with a faint smile, asked him if he intended taking it with him. I have since been told by friends of this gentlemen that he had a thousand sovereigns with him; and probably these were in the rug. On my way back to the engine-room, I was alarmed at seeing that a serious change had taken place—a deal more water was rushing down. From what I saw, I thought the pile of sails over the opening above had floated up, the water pouring in underneath. I looked over into the engine-room below, and noticed that the water had increased considerably since the captain and I were there: it was now within two or three feet of the deck on which I was standing. I got on the poop as soon as I could, knowing now that the end was near. I had some difficulty in getting up the staircase between the cuddy and the poop, as it was crowded with people, who were all mute. It was then about one o'clock or half-past one in the day, Thursday, 11th January. Just as I on to the poop I saw an elderly couple, man and wife, with three children, two little girls about eight to ten years of age, and an infant. I am not sure, but I think they were the same who were wrecked a short time previously in the *Dunbar*, and this was the second, if not the third, attempt they had made to get to Australia. The mother and the two girls were sitting on the lee-side, close to the mizzen rigging, and the father alongside of them, holding an infant in his arms, and shielding it from the spray that was blowing clean over from windward. I took the mother and two girls up, and set them midship in the lee of the after companion-way. In about half-an-hour after, and just before we left the ship, I saw the mother and two girls washing about on deck, drowned.

(To be continued.)

It is the sickness of the soul, and not the heaviness of the cross, which makes it hard to bear.

PREMATURE BURIALS.

A correspondent of the *Cincinnati Gazette* relates the following: During the last prevalence of cholera, a remarkable case of recovery from a supposed state of death, and so pronounced by respectable physicians, occurred in the family of a friend of mine in Chicago. He was a young man, recently married. His wife was attacked with cholera, and died. A few days after her death he was attacked, and although he received every attention which kind friends and relations and attentive physicians could render, he was supposed to have died. His body was laid on a board, and placed near a window in the parlor, and the usual preparation made for its interment. Before the hour for the funeral service arrived, a violent storm arose, accompanied with loud peals of thunder and vivid flashes of lightening. This storm aroused the supposed dead man; he opened his eyes, moved his hands, and thus attracted the notice of persons in the room. He revived, lived nearly a week, but died of congestive fever. Now, but for a mere accident, this person would have been buried alive. How many such cases may have occurred, no man knows, or can know: and unless proper views are made known and acted upon during the prevalence of cholera there may be many such fearful mistakes. It is the duty of the living, therefore, to see that there are no cases of premature interments.

ITEMS.

Rumors of a Prusso-Russian alliance continue to prevail. It is even said that the treaty provides for the admission of the United States into the alliance, with a sovereign establishment in the Mediterranean Sea, and guarantees that nation highly favorable commercial advantages.

In England there is still trouble in the manufacturing districts, and "strikes" are becoming more numerous.

John Bright has delivered a remarkable speech at Dublin, in which he proposes that the absentee landlords should dispose of their large estates to the government, which should then sell them out in small lots to the present tenantry. The Reform agitation continues and must soon compel some satisfactory action on the part of the government.

In the locality of Union-street, Borough-roads, London, is to be seen an old stable with one hundred infants in the horse-troughs and hay-cribs. The work has been undertaken by George Adlington, who

has secured an old stable to form a nursery, and has fitted it up for taking care of the young children of women obliged to go out to char or work away from home.

THE PROPOSED CONGRESS OF JEWS IN PARIS.—The *Gazette de France*, alluding to the Jewish council which is to assemble in Paris next year, remarks that the meeting will be especially called on to decide the following questions: The abolition of the prohibition of certain articles of food; the suppression of polygamy which exists among the Jews in Algeria, and the recognition of female children as equally qualified to inherit in that country with males. The French Government is said to be very anxious for the reforms relating to the African colony, as there are in Algeria forty thousand Jewish families, composed of industrious people, who are not subject to the general laws of the civil code.

The crew of the whale-ship *Antelope* brings home a gold watch and silver spoons said to belong to Sir John Franklin, and word as to where the remains of the explorer are buried.

THE FREEDMEN.—At a recent meeting of the Penn. Association for the Freedmen, held in Philadelphia, Gen. O. O. Howard made the following statement, that "in some sections of the South the negroes were extremely ignorant. In others, as in New Orleans, they were as intelligent and apt to learn as the whites. Public sentiment in the South had been opposed to the education of the negro; but that sentiment is gradually changing. That change must be encouraged. He had seen planters who were bitterly opposed to education, but who now say send us teachers; the negroes will not stay with and work for us without them. And this feeling is increasing to such a degree that ere long he who attempts to run a plantation without a school house upon it will attempt an impossibility. They now say, send us teachers—send the right kind—send us, if you please, negroes—but don't send us Yankees. Why? Because they teach negroes to hate us; to sing offensive songs and the like. He has heard this from the pulpit; from the stage, and from other sources. This is true. Then why not give them Southern teachers? Because the Southerner does not recognize the manhood of the negro. Our Northern teachers do recognize that manhood, and consequently teach him a certain degree of self-respect. In this line we must persevere. We cannot help resisting all education that teaches a human being that he should be a slave. Keep on, then, in sending Northern teachers—the very best that can be sent—who can give a good, thorough, systematic education. We must have more heart in this work, more interest, more universality.

Judge Bond, of Baltimore, stated that throughout the State of Maryland at this time every negro pays ten cents for his education. Out of fifteen hundred negro scholars in the city of Baltimore, there were only five who did not bring their ten cents. Talk of the civil-rights bill. What is it worth when all the sheriffs and other officers are secessionists, and the negro has to go before secession judges? At the last report we had 150,000 scholars at the regularly-organized schools. This has, to some extent, been done by the colored people themselves. Take Arkansas, for instance. In that State alone 100,000 colored people have paid four dollars a piece toward the work of education. The interest taken by the colored people is astonishing.

The recent report of the Baltimore association for the moral and educational improvement of the colored people states that the society has in operation 73 schools, including 22 in that city, numbering in all,

74 teachers and 7,000 scholars; most of the teachers are colored. The most encouraging success has attended the efforts of this association, the colored people everywhere manifesting the greatest eagerness to learn and willingness to contribute to the support of the schools. \$16,000 have been contributed by the colored people in the counties during the year.

FOR FRIENDS.—The Subscriber, about to relinquish the Farming business, will sell at Public Sale, on Second-day, 10th of 12th mo., 1866, on the premises, a VALUABLE LITTLE FARM of 42 acres, in a high state of cultivation, with good improvements, situated in Warminster Township, Bucks Co., Pa., half mile from Warminster Meeting of Friends, three miles from Horsham Meeting-house and 16 from Philadelphia. A rare chance for a desirable home, on easy terms. Sale at 2 o'clock, P. M.

Apply to Emmor Comly, 144 N. 7th st., Phila., or to the owner on the premises, 131 ST. AWINZ.O. CHARLES STOKES, Near Johnsville.

FOR SALE, at Office of Friends' Intelligencer, 144 N. Seventh St. At Office. By mail.

SELECTIONS FROM THE WRITINGS OF JOHN BARCLAY.

(Continued from page 611)

1817, *Eleventh month 27th*.—I question whether they who go empty away from our religious meetings, or from those gatherings of two or three in the name of the Lord Jesus, where He himself is in the midst ready to heal each one of his diseases and infirmities;—I question much whether such as go home none the better for meeting with those thus gathered together are not "rich,"—are not full,—are not satisfied, confident, "settled on the lees," sluggish and sleeping in security. We may remember there is a woe against "those that are at ease in Zion." It is also worthy of remark that all those that came to Jesus when personally on earth to be cured of their maladies were in a very opposite state to that of those of whom I have spoken above; these were destitute, afflicted, forsaken, despised; and, what is still more, they were sensible of their lamentable situation, their helplessness and distress; and they knew or believed who it was that had power to stem the torrent of their troubles, the tide of their calamities. "Speak the word only," said one, "and my servant shall be healed." "Believe ye that I am able to do this?" said Jesus to two who answered—"Yea, Lord." "Lord I believe," said another, "help thou mine unbelief." So that the blessing which maketh truly rich shall assuredly and inevitably come down in abundance upon

those who, with a humble and a contrite heart, wait upon the Lord, and are exercised and engaged in truth and earnestness to seek Him. O! what a rich reward of peace at times flows into the hearts of these true disciples, these poor publicans, these buffeted, bruised, broken-hearted little ones; whose help is placed, and hope fixed upon Him that is mighty, the giver of glory and grace, and of every good thing; but whose hands are ready to hang down, their knees to smite one against the other, and their hearts to fail, because they find not Him whom their soul loveth, and feel not his aid "who is able to save unto the uttermost." O! these are the poor of the everlasting kingdom, and are richer than the richest in outward mammon, or even than the richest in good works, (though these also will not be wanting herein,) because they are the "rich in faith," whom God hath chosen as heirs of the kingdom, which he hath prepared for them that love him.

1817, *Twelfth month 10th*.—I can look back upon many a favored season, many an availing prayer,—sometimes a single sigh after what was good,—sometimes the mental eye turned inward during a few spare minutes of intermission or leisure from the hurry of business, when in my father's banking-house; sometimes as I went and returned to and from town, but especially before dinner. At that particular time I was in the regular habit of secluding myself for a short season in private, and either devout

ing that opportunity to reading the Scriptures, or more commonly to silently seeking the Lord, and waiting upon him for support, strength, sustenance, and whatever he saw needful for me. After this period the efficacy of the same spirit of dependence and reliance which the Lord had begotten and kept alive in me was striking; and it has been memorable to me since, when I was engaged in the business of an attorney's office, and lived at lodgings: there the same power, as I was concerned to keep close to it, preserved me through all the difficulties and trials that were strewed in my path. O! what sweet First-days have I spent at a disagreeable dull lodging; what meetings have I had, what sweet meetings in the middle of the week, when I gave up everything that stood in the way, and thus procured liberty to attend them. What sighs, what ories unto the Lord in secret corners, when a few minutes could be spared in the midst of the bustle of worldly engagements: when walking through the noisy crowded streets, what songs unto the Lord God of all tender mercies who overshadowed me;—and when occasionally an afternoon was allowed me wherein to be absent from business, what sweet contemplative walks in the meadows and country, a few miles out of town! But how shall I stop, or where shall I end, in speaking of the merciful compassion of Him who regards the prayer of the humble under many circumstances which I have not mentioned. How has the Lord ever had his eye upon and over me to turn all to good, as long as I have regarded, trusted in, resigned myself unto his preserving power; when I have been enabled to say, "I am thine, do with me what thou wilt." So that surely we may never doubt, but that "whosoever calls upon the name of the Lord shall be saved."

1817, *Twelfth month 17th*.—In the midst of much drought, and distress, and apparent desertion, which have encompassed me for a long season, I cannot forget the grievous sufferings which the greater part of my poor fellow-creatures are daily undergoing. O! how my heart has been this evening affected with the sight of a heap of human creatures, nestling together under the shelter of a wall, striving to cover each other's half bare limbs from the piercing cold. Ah! ye rich, ye gay, ye proud, ye professors of good words and good works, the charity of this starving family will sooner be accepted of their Maker than yours; for ye of your abundance have cast the paltry pittance, whilst they have in their wretchedness sheltered each other from the piercing cold, and wept over each other's woe. Surely, surely, (I have been ready to exclaim in my heart at this, and at other times,) the Lord Almighty will arise for the cry of the poor and the sighing of the

needy;—surely, he will take vengeance upon such as spend their lives in fulness of bread, and abundance of idleness,—upon such as abuse his gifts, and forget his creatures, and shut up their bowels of compassion against their own flesh, and do not remember the many good things which the Lord has showered upon them. O! how heavily hath my soul been burdened, because of such who live in pleasure, in luxury and extravagance; and how deeply have I felt for the poor and needy.

Date uncertain, perhaps Twelfth month, 1817.—It seems as if, after such exercise and trouble as can scarcely be expressed to another, I had now at length a glimpse of light thrown on the path before me, through the free extension of abundant mercy. Yet what a spark, what a faint flash, what a slender beam! When I consider how easy it is to mistake the true shinings of the heavenly star, to listen to the whisperings of the deceitful one, and to take them for the manifestations and leadings of the best Counsellor, the infallible Guide;—my spirit is engaged in earnest desire that I may be preserved on every hand, and protected from the evil. O! how strongly does the instance of poor yet faithful Abraham come to my mind whilst writing these lines; and firmly am I encouraged to believe that He of whom it is said, "faithful is He that hath called you, who also will do it," even the Father of faithful Abraham, whose tender mercies are over all his works, and who remains even now the same unfailling source of help and strength that ever he was,—will be near to the very least of his contrite little ones; even those that are bowed down, and bruised, and buffeted. He knows, indeed, who these are, though no one else may cast an eye upon them, or esteem or regard them. He knows their sufferings, their sighs, their tears; and O! what a sweet savor, what an acceptable incense arises from the hearts of these, even though no knee be bent, or mouth be opened. Surely under the shadow of His wings, under the blessing of the strength of His extended arm, shall these go forth through this vast howling wilderness; the floods and rivers shall be divided and dried up before them, and the parched desert shall become a fruitful field.

Date unknown.—We are placed here on earth only for a season: like travellers at an inn, we are permitted to take shelter for a night in this frail habitation:—it is a strange place, and has but temporary and middling accommodations; and all the comfort it affords is far inferior to the abundance which we have to expect will be dealt to us in our Father's mansion, our heavenly home. None of those numerous objects which we see around rightly belong to us; they are not our property, strictly speaking; but are lent to us for the supply of our neces-

sities, for our comfort, for the right enjoyment of them. I have often wished that this view of life might occasionally occupy our minds. Let us consider what would be some of the consequences of taking such a view of life, as I have ventured to point out. Let us see what ought properly to follow from the establishment of such a principle as this, that the earth we inhabit is not our rest, that we are but pilgrims and wanderers upon the face of it, that none of those things which our senses can perceive are our own; but that we are only for a time permitted the use of them: how could we, with this principle in sight, abuse those innumerable blessings which the great Giver of every good and perfect gift has been pleased to bestow; how could we do otherwise than apply all those natural things which are in mercy provided for us to the purposes for which they were intended. Then among many other good effects there would be no servile and degrading obedience to custom and fashion; but such simplicity in our way of living, such denial of whatever is superfluous, expensive, useless, or productive of injury to the mind, as is now scarcely thought of or understood.

1818, *First month 12th.*—The struggle which I have been enabled to sustain against a flood of affliction and deep exercise still goes on through unutterable mercy and condescension; but it is daily with me a question how each succeeding day's conflict will terminate. It seems sometimes as if there was no other language in my heart, but—"If it be possible, forsake me not, O! thou Most High!" again, when a little relieved, something seems to arise like this—"Save me from myself, leave me not to myself; spare not, neither pity, but utterly destroy all that in me—which is not of and from thee." What to-morrow's light may bring forth, what it may find me, or in what condition, I know not; but this do I desire to know and to be assured of,—that the Lord is, and that he is good, and to feel his goodness overcoming and taking the place of the evil both in me and in all the world. O! that I might be delivered from all looking out for release from this chastising and purifying dispensation, which has been in an increasing measure allotted me ever since I was made willing more fully to follow the Lord in the way of his requirements. O! that I might be preserved from all desire to take myself under my own care, or to walk in the way which my own will approves: and as to outward matters, that I might be made more and more entirely disposed to acquiesce in whatever is manifested unto me, to be the will of the Lord concerning me. The highest good that I or any can attain to in this life seems to me at this time to consist and centre in the ability to say and feel always,—“Thy will, and not mine, be done, O Lord.”

1818, *First month 20th.*—O! how much dross, how much evil is there still lurking within me, how many and how deceitful are the modes by which the enemy contrives to keep up his kingdom, his seat in my soul; when shall I, through Him that fights for me, utterly expel, subdue, and tread under foot this unwearied enemy! The Lord, my strength, give me patience, that I may quietly confide in Him yet more and more; and suffer all the exercises, chastenings, withdrawals, judgments and afflictions which he is pleased in mercy and love to bring upon me; for I think I see plainly that his scourge and severity is not dealt out to his tender babe-like nature, but to that nature which is not of Him, but of the wicked one,—even that selfish, unfeeling, Egyptian spirit which is to be destroyed. O! how much of this do I feel continually within me, lurking in secret under cover of many plausible pretences, eating out any appearance of good with which the Lord is pleased to favor me, appropriating to self any good action, motive or thought; endeavoring, when it cannot hinder the entrance of good, to make me proud of it, and so convert it into evil:—thus the best friends, the best books, the best feelings, the best intentions with which I am at any time privileged, these the wicked one endeavors so to pervert as to render them a snare to me. He cares not how busy I am in reading good books, how fond I am of waiting on the Lord, how great a lover I am of the Lord's people; and the Lord's cause; if I will but fall down and worship him in these, all shall be mine,—all the honor and praise of being a great and good character, a saint, shall be mine, if I will but let him have a little share, a little corner in my heart. “O Lord! disappoint him, cast him down, deliver my soul. Let not thy hand spare, neither let thine eye pity, till all be utterly purged away, which defiles and is unseemly in thy sight.” When mine eye is opened rightly to see these things, my heart craves that I may abide in patience under the operation of proving and refinement, however severe it may seem, to wean me from this world and the wickedness thereof; not only from gross sins, but also from hidden and secret faults, and from the deepest insinuations of the enemy in my heart, in the semblance of an angel of light. I have had of late such a time of this discipline as had never before befallen me in my life;—such apparent desertion of everything like good, such distress in consequence of outward circumstances of various kinds, that at many intervals a deep conviction of the certainty of a future judgment seemed to prevent my choosing death rather than life. Yet through inexpressibly tender mercy, I have been preserved to this day in earnest seeking after the Lord, and with great desires after submission to his will,

cost what it may. And even in the hour of desolation and darkness, I have often experienced such a sweet cessation from suffering, and such an influx of love from the inexhaustible fountain, as has enabled me still to struggle and hold on my way in a degree of hope (almost imperceptibly small,) that all would be well in the end if I was concerned to look unto Him who is the author, and also the finisher of our faith.

(From George Fox's Works.)

MARRIAGE.

"The right joining in marriage is the work of the Lord only, and not the priests or magistrates, for it is God's ordinance, and not man's.

And, therefore, Friends cannot consent that they should join them together. For we marry none—it is the Lord's work, and we are but witnesses. But yet if a Friend, through tenderness, have a desire that the magistrate should know it (after the marriage is performed in a public meeting of Friends and others, according to the holy order and practice of Friends in truth throughout the world, and according to the manner of the holy men and women of God of old,) he may go and carry a copy of the certificate to the magistrate; Friends are left to their own freedom herein.

But for priests or magistrates to marry or join any in that relation, it is not according to the Scripture; and our testimony and practice hath been always against it.

It was God's work before the fall, and it is God's work only in the restoration.

THE LOVING KINDNESS OF GOD.

The loving kindness of God! what a beautiful expression! How rich and consoling the thought contained in it! It is not a mere good will, nor mere complacent friendship, nor the mere neighborly kindness of human beings, although these are of high and precious account; it is the good will, the friendship, the kindness of love—of the love of God, who is love itself. We know something of the loving kindness of father and mother. We have been gently tended and nursed by his kindness; or parents ourselves, we know full well the throbbing of paternal affection. Deep, earnest, self-sacrificing, is human love in many tender relations. We trust in it fervently, and without fear. O, if there were no human love in which we could trust, what a desolate place would this world be? But the loving kindness of God—of that great, incomprehensible Being who fills the universe with his presence, and before whose majesty pillars of heaven tremble—what a loving kindness that must be! the kindness of infinite love wedded with infinite power! There is nothing that love can conceive of or wish to do for its object, but is contained here, and

rendered not only possible, but absolutely certain.

MEMOIR OF REBECCA B. THOMPSON.

(Continued from page 613.)

"In looking back over the chain that connected her with her paternal ancestry, she would remark, 'There is but one link left,' and that link was an only and devotedly-attached brother. They were often together, and there being a great congeniality of spirit and feeling between them, it is not surprising that upon him should be centred all a sister's love. He being several years younger than herself, of a more robust constitution, with a fair prospect for a longer life, she had looked forward to him as a staff to lean upon in more advanced years; but in this, too, she was doomed to disappointment, for in the spring of 1852, he, too, was followed to the grave by this solitary, disconsolate sister. His removal being sudden, the shock on her already shattered nervous system was such, that her life for a time seemed almost poised as in a balance. But in a time, a greater degree of resignation was attained to. . . .

From this time forward her health began gradually to improve; and being favored measurably to keep the enemy of her soul's peace under foot, and having received an enlargement of her gift in the ministry, she journeyed forward for a time, filling up, in a good degree, her measure in the line of a Gospel minister. During this portion of her life, she often attended neighboring meetings in Gospel love, and was frequent in her appearances in our own. But for some time prior to 1861, she was mostly silent therein. From that time, she seemed to be released from her bonds, and again came forth in the ministry, to the great satisfaction of her friends, and so continued so long as health permitted her to attend meetings.

Although her path through life may seem to have been a tribulated one, she having had so often to go down into suffering on her own account and for the suffering seed, yet she was permitted, I believe, at times, to experience newness of life, and be made a partaker of those substantial joys which the unbaptized in spirit know not of. And as she became weaned from the world and its entanglements, and experienced more of the smiles of Divine favor, she came to enjoy life (in Christian simplicity) with a greater zest, and greatly enjoyed the society of her friends and neighbors, and loved to mingle much with them in the way of receiving and making social calls or friendly visits, thus manifesting her interest in their welfare, not overlooking those in the humbler walks of life. These were the fruits of a feeling inherent in her nature, which she would sometimes allude to thus: 'I live not for my-

self alone; and being liberal in her views and feelings, with much honesty and simplicity of character, caused her to be beloved by many, especially by the young.

In the spring of 1864, our son and only child was attacked with measles, which proved to be of a serious character, during which he was waited on by her with that unremitting attention, such as a mother's solicitude only could prompt, that by the time he began to recover, she became quite indisposed from over-exertion of body and mind, and in this condition she, too, was attacked with the same disease; and, although she suffered but little bodily pain, she soon sank with the progress of the disease, her mind through the whole (except at short intervals) remaining clear and unclouded."

Her illness continued about two weeks, and was marked by a beautiful feeling of resignation to the will of her Heavenly Father. At one time she said, alluding to her recovery. "On your account I could desire it; but it is very doubtful; yet if it is the Master's will, He can yet raise me up and put a new song into my mouth; and I now feel, if He has a further work for me to do, I shall be more faithful and obedient than I have heretofore been. The cares and pleasures of this world have sometimes been a snare to me, leading me away from a full dependence upon Him." At another time she said, "Oh! if I had only been faithful, how the work would have prospered; but it has been marred upon the wheel." Again, she remarked, "I thought last night my way was clear, but since then clouds and thick darkness have intervened; I have leaned too much to the weakness of the flesh." At another time she said, "I think if I can get still enough I can see Him after awhile." After this trying conflict passed away she was strengthened to give utterances to an impressive and deeply interesting and dying testimony. Looking round upon those about her, she exhorted them "to be faithful, reminding them that none of them had any too much time to do what they had to do." Her concern was now for others rather than for herself, and she spoke until feeble nature was exhausted. "Now let me rest," she said, "though I am not done;" but her voice of counsel and admonition was heard no more. She lay still and composed, with a countenance so expressive of peace that it was felt to be an evidence that she had finished her work and had entered into "that rest prepared for the people of God." In this apparently happy frame of mind she passed quietly away, and we believe her redeemed spirit is now an inhabitant of that city whose walls are "salvation and whose gates are praise."

She was interred at Mill Creek, on Third day, the 22d of 3d month, 1864, at which time a large and interesting meeting was held.

REMARKS ON THE MINISTRY.

"I never suffered myself to criticise it, but acted on the uniform principle of endeavoring to obtain from what I heard all the edification it afforded. This is a principle I would warmly recommend to my young friends in the present day; for nothing can be more mischievous than for learners to turn teachers, and young hearers critics. I am persuaded it is often the means of drying up the waters of life in the soul; and sure I am that an exact method of weighing words and balancing doctrines, which we hear, is a miserable exchange for tenderness of heart and the dew of Heaven."

MEDITATION.

Meditation is often confounded with something which only partially resembles it. Sometimes we sit in a kind of day-dream, the mind expatiating far away into vacancy, while minutes and hours slip by, almost unmarked in mere vacuity. That is not meditation, but revery,—a state to which the soul resigns itself in pure passivity. When the soul is absent and dreaming, let no man think that that is spiritual meditation, or any thing that is spiritual.

Meditation is partly a passive, partly an active state. Whoever has pondered long over a plan which he is anxious to accomplish, without distinctly seeing at first the way, knows what meditation is. The subject presents itself in leisure moments spontaneously; but then all this sets the mind at work—contriving, imagining, rejecting, modifying. It is in this way that one of the greatest of English engineers, a man uncouth and unaccustomed to regular discipline of mind, is said to have accomplished his most marvellous triumphs. He threw bridges over almost impracticable torrents, and pierced the eternal mountains for his viaducts. Sometimes a difficulty brought all the work to a pause: then he would shut himself up in his room, eat nothing, speak to no one, abandon himself intensely to the contemplation of that on which his heart was set; and at the end of two or three days, would come forth serene and calm, walk to the spot, and quietly give orders which seemed the result of superhuman intuition. This was meditation.

He, too, knows what it is, who has ever earnestly and sincerely loved one living human being. The image of his friend rises unbidden by day and night, stands before his soul in the street and in the field, comes athwart his every thought, and mixes its presence with his every plan. So far all is passive. But besides this he plans and contrives for that other's happiness; tries to devise what would give pleasure; examines his own conduct and conversation, to

avoid that which can by any possibility give pain. This is meditation.

So, too, is meditation on religious truth carried on. If it first be loved, it will recur spontaneously to the heart. But then it is dwelt on until it receives innumerable applications; is again and again brought up to the sun and tried in various lights, and so incorporates itself with the realities of practical existence.

Meditation is done in silence. By it we renounce our narrow individuality, and expatiate into that which is infinite. Only in the sacredness of inward silence does the soul truly meet the secret, hiding God. The strength of resolve, which afterwards shapes life and mixes itself with action, is the fruit of those sacred solitary moments. There is a divine depth in silence. We meet God alone.—*P. W. Robertson.*

THE FAMILY CIRCLE.

If there be any bond in life which ought to be sacredly guarded from everything that can put it in peril, it is that which unites the members of a family. If there be a spot upon earth from which discord and strife should be banished, it is the fireside. There centre the fondest hopes and the most tender affections. How lovely the spectacle presented by that family which is governed by the right spirit! Each strives to avoid giving offence, and is studiously considerate of the others' happiness. Sweet, loving dispositions are cultivated by all, and each tries to surpass the other in his efforts for the common harmony. Each heart glows with love; and the benediction of heavenly peace seems to abide upon that dwelling with such power that no black fiend of passion dare rear his head within it.

Who would not realize this lovely picture? It may be realized by all who employ the appointed means. Let the precepts of the Gospel be applied as they are designed to be; and they will be found to shed a holy charm upon the family circle, and make it what God designed it should be—the most heaven-like scene on earth.—*Country Gentleman.*

Those that have the "testimony of Christ confirmed" in them "come behind in no gift," but "are enriched by Him" in every thing, while waiting for the coming of our Lord. "Ask no man for it," says Augustine; "turn to thine own heart; already art thou placed at God's right hand. Do not mind thy glory being hidden; when the Lord cometh thou shalt appear with him in glory. The root liveth, though the branch may appear withered; inwardly, in the living marrow, is already the strength of the leaves and fruit, but they wait for the summer."

LETTER FROM JOHN JACKSON.

The following letter is in reply to one received from S. M., not a member of our Society, who was concerned on account of J. J. considering water-baptism and the ordinance of bread and wine non-essential. This person and her husband both became interested in Truth's testimonies as held by friends, and the latter regularly attends Friend's meetings.

SHARON, 2d mo., 1838.

"*Dear Friend,*—I received thy letter, and after giving it a careful perusal, could not question the sincerity with which it was written. believing it to proceed from the kindest feelings of gospel love, under the influence of which we can speak to each other, and desire for one another an establishment on the true foundation, Christ Jesus, the spiritual head of the Church. The substance of thy concern for my advancement in the knowledge of divine things appears to be, that I should be found in the observance of some of those outward ceremonies which *thou* believest are very essential, and by so doing put on the 'whole armor of God.' Although thou art a stranger to me, the expression of thy kind concern for my welfare is grateful to my feelings; and in answer to the query, 'why tarriest thou?' I am willing to give thee my views upon the subjects to which thou hast alluded.

"While I do not desire in any way to interfere with the religious opinions of others, or call in question the sincerity with which they adhere to their peculiar forms of worship or views of 'faith in Jesus,' yet I have not so learned Christ as to be unable to give a reason for the hope that is in me, and of that faith in him which I desire to hold fast unto the end without wavering. As regards myself, I have never felt the necessity of turning to the 'weak and beggarly elements' to witness that cleansing of heart which is necessary to sanctification, and that redemption from sin, which is followed by a communion of the soul with its Divine Author, believing that Christ has not called us to these, but to glory and to virtue.' The apostle has declared that as we give 'all diligence, to add to our faith virtue, to virtue knowledge, to knowledge temperance, to temperance patience, to patience godliness, to godliness brotherly kindness, and to brotherly kindness, charity,' that 'an entrance shall be ministered unto you abundantly into the everlasting kingdom of our Lord and Saviour Jesus Christ.' This kingdom I believe to be a state of *inward spiritual communion* with God; it cometh not by observation; 'neither shall they say, lo here! or lo there! for behold the kingdom of God is within you.'

"I have an unshaken confidence in the all-sufficiency of the spirit of Christ, as it becomes in us 'the resurrection and the life,' to effect

our redemption from all iniquity, and the suffering consequent upon a separation from the divine harmony, and to put us in the possession of the joys of holiness in this life, and a well-grounded hope of a blessed immortality. And in order to accomplish this great work, I believe it is essential to be *baptized*. But there is no evidence to my mind, either from the convictions of truth or the testimony of scripture, that the baptism of water is the one saving baptism enjoyed by our blessed Master, or enforced by his apostles. John the baptist, in the comparison he made of his mission, which was distinguished by the observance of this ordinance, with the mission of Christ, declared, 'He must *increase*, but I must decrease. He that cometh from above is above all. He that is of the earth is earthly, and speaketh of the earth.' 'I indeed baptize you with water unto repentance: but he that cometh after me is mightier than I, whose shoes I am not worthy to bear: he shall baptize you with the Holy Ghost and with fire.' The baptism of John was but an outward ceremony of a decreasing nature, which, like the ceremonies of the law, was typical of a more spiritual dispensation, but made not the comers thereunto perfect, as 'pertaining to the conscience.' Whereas, the baptism of Jesus Christ is of a spiritual, increasing and heavenly nature, and does not consist in the putting away of the filth of the flesh, but the 'answer of a good conscience toward God by the resurrection of Jesus Christ.'

"This I believe was the baptism which Jesus embraced in his great commission to his disciples, 'Go ye therefore and teach all nations, baptizing them in the name of the Father, and of the son and of the Holy Ghost; teaching them to observe all things whatsoever I have commanded you. And lo! I am with you always even unto the end of the world.' He did not say baptize them *with water*, but in the name of the Father and of the Son and of the Holy Ghost.' It is this spiritual baptism that is essential to wash away the sins of the soul, and it was no doubt this that was alluded to in the command given to Saul. 'Arise and be baptized and wash away thy sins, calling upon the name of the Lord.' For He declared in his epistle to Titus, 'It is not by works of righteousness which we have done, but according to his mercy he saved us, by the washing of regeneration and the renewings of the Holy Ghost.' Thus plainly setting forth the insufficiency of carnal ordinances, the performance of which constituted the righteousness of the law, and placing their hope of salvation upon the 'mercy of God, the washing of the regeneration and the renewings of the Holy Ghost.' As the Apostles witnessed this effectual baptism, they could declare, 'as many of us as were baptized into Jesus Christ, were baptized into

his death. Therefore we are buried with him by baptism unto death, that like as Christ was raised from the dead by the glory of the Father, even so, also, we should walk in the newness of life.' 'For as many as have been baptized into Christ, have put on Christ.'

"The apostle Paul has also declared, there is unto us but 'one Lord, one faith and one baptism.' This one baptism, then, is not an *outward ordinance*, but an inward spiritual cleansing, effected by the 'washing of regeneration and the renewings of the Holy Ghost.'

"I am satisfied that I have not followed cunningly devised fables, in placing my hope of sanctification here, believing this to be the baptism of Christ, and the ground taken by the primitive believers. And I am also well satisfied that were I to turn from the 'cloud of witnesses which have surrounded my mind, of the sufficiency of this baptism, to the observance of an outward ceremony, I should justly deserve the reproof given by Paul to a people formerly, 'O foolish Galatians, who hath bewitched you,' &c., (see the Epistle to the Galatians.)

"It was, no doubt, the baptism of the Holy Spirit that the three thousand souls were baptized with, by which they were introduced into membership with the church of Christ, on the memorable day of Pentecost, when the powerful appeals of the apostle Peter awakened in them the inquiry, 'men and brethren what shall we do to be saved.' We may remember the apostle exhorted them to 'repent and be baptized every one of you, in the name of Jesus Christ, for the remission of sins, and ye shall receive the gift of the Holy Ghost.' On another occasion the same apostle declares, that whosoever 'believeth in Christ,' shall receive remission of sins,' thus showing that this saving baptism is one and the same thing with a belief in Christ. I think it evident from the testimony of scripture that in the latter periods of the apostolic age, the use of water decreased, because they had experienced its inefficacy, and were made living witnesses of the powerful baptism of Christ, under the influence of which they could say, 'By one spirit we are all baptized into one body, whether we be Jews or Gentiles, whether we be bond or free, and have all been made to drink into one spirit.' It is also evident that water baptism became a fruitful source of contention, as will be seen by Paul's first epistle to the Corinthians, where he speaks of it in such a way as to give reason to believe, he was prepared to lay it aside, for he thanked God that he had baptized so few, saying, 'Christ sent me not to baptize, but to preach the gospel.'"

To be continued.

We should never have felt Christ's tender heart, if we had not felt ourselves "weary and

heavy laden, hungry and thirsty, poor and contrite." And then what comfort mayest thou have in prayer when thou canst say, "Our Father," in full assurance. What sweet thoughts wilt thou have of God. How sweet will be the promises, when thou art sure they are thine own. How lively will it make thee in the work of the Lord, and how profitable to all around thee. What vigor will it infuse into all thy graces and affections. All these sweet effects of assurance would make thy life a heaven upon earth.—*Baxter*.

FRIENDS' INTELLIGENCER.

PHILADELPHIA, TWELFTH MONTH 8, 1866.

PUBLIC MORALS.—"My ear is pained, my soul is sick with every day's report of wrong and outrage, with which earth is filled."

May not this lamentation of the pure-hearted poet be taken up by all who love their fellow men, and desire their country's good? For surely crime is rife in our land, and the sanctity of human life appears but little regarded by the reckless adventurer of the hour. Peaceful homes are invaded by the midnight robber, and the traveller on the highway is assailed, despoiled of his personal effects, and sometimes deprived of life.

To what shall we attribute the fearful increase of wickedness? The late war has contributed greatly to demoralization, but we view, with deep concern and regret, the fruitful source of evil in the example of many of the public and popular men of the day.

The Capitol of our "boasted land of liberty" is said to be filled with vice and immorality. Men chosen as the Legislators for their country's weal are so regardless of the important trust as to be allured, by the siren voice of dissipation, from the halls of wisdom and justice into the dens of degradation and sin. Honorable exceptions there are; but, if we are to judge men "by their fruits," these are the exceptions, and not the rule. Fearful, indeed, is that condition of things when the rulers of the land are themselves the exemplars of licentiousness and profanity. "Wickedness in high places" is especially to be deplored, because of its mighty power to disseminate its poison through the various grades of society. When the most exalted offices within the gift of the people are encumbered with those who use the

means thus placed at their command to minister to sensual gratification rather than to the public benefit, is it any marvel if, in the imitativeness of human nature, we find State Legislatures, County Courts, and City Councils influenced by the same spirit? We are not about to enter into the minutia of the wrongs connected with this subject, but there is one to which we would direct serious attention—we allude to that of *Bribery*. This has become so common as to appear to have lost, in a degree, its heinousness by familiarity, and is no longer to be numbered among the *secret* sins.

In the days of purer legislation a receiver of bribes would have been branded with ignominy and shame; but now we are told it is almost useless to attempt the passage of any bill, however useful its purpose, without becoming a party to this crime.

Are we, as a nation, forgetful of the true interests of our Republic, while we pride ourselves upon its commerce, its mineral wealth, its noble rivers, broad acres and fruitful fields? Do we lose sight of a retributive justice—that sin brings its own punishment? However noble the structure of any government, if the foundation be undermined by moral wrong it will totter, and must ultimately fall. It was said of Rome, "that when there was no longer purity on her hearthstone, nor integrity in her Senate, then, and not till then, her death-knell was rung."

The luxury and extravagance indulged in by individuals who have suddenly amassed wealth, during the fearful national struggle through which we have just passed, will sooner or later correct itself, and while the effect upon the community may be injurious, that is less to be feared than the grosser evils to which we have referred. Although removed from the arena of political life, we are not indifferent to our country's good; and in common with others who love the precepts of Jesus, and are concerned that they be practiced in the spirit in which they were taught by him, we feel the importance of an effort to correct evil.

The columns of the *Intelligencer*, with its comparative limited circulation, may not be deemed the most suitable channel to give publicity to the views we have expressed; but, in the remembrance of the assurance we have at

different times received, that Friends could, by their united influence, have a ruling voice in the elective franchise, we make an appeal to those who are interested in the preservation of the honor and integrity of our beloved country to use the power they may possess in the purification of its moral atmosphere, and do their part toward excluding from every responsible position in the government the man given to "strong drink," or he who would stain his hands with "the holding of bribes;" so that instead of weakness and decay through misrule we may witness an advance in that which *truly exalts* a nation. "*Righteousness exalteth a nation, but sin is a reproach to any people.*"

MARRIED, on the 24th day of Tenth month, 1866, by Friends' ceremony, at the residence of T. S. Wright, Woodlawn, Fairfax Co., Va., STEPHEN BARNETT, of Ridgway, Orleans Co., N. Y., to EMILY R. GREENE, of the former place.

—, on Fifth-day, the 8th of Eleventh month, 1866, at Friends' Meeting-House, according to the order of the religious Society of Friends, ABEL MILLS, son of Joseph and Sarah Mills, and ELIZABETH WILSON, daughter of Amos and Anna Wilson, all of Clear Creek Monthly Meeting, Putnam Co., Ill.

—, on Fifth-day, the 29th of Eleventh month, according to the order of Friends, under the care of Philadelphia Monthly Meeting, of which the parties are members, MORDECAI DAWSON RICHARDS and RUTH ANNA B., daughter of Comly and Susan S. Tyson.

DIED, on the 9th of Third month, 1866, at East Liberty, Logan Co., Ohio, SAMUEL MAROT, formerly of Philadelphia, in his 72d year; a member of Philadelphia Monthly Meeting.

—, on the 11th of Eleventh month, 1866, after a short and severe illness, PRUDENCE CONROW, formerly of Salem, N. J., in her 83d year.

—, on the 24th of Eleventh month, 1866, in Philadelphia, THOMAS TEMPLE, in his 90th year.

—, on the 20th of Eleventh month, 1866, at his parents' residence, Abington, Pa., ROBERT GRAY, son of Edwin A. and Annie L. Atlee, aged 6 months.

A Stated Meeting of the Committee of Management of The Library Association of Friends will be held in the Library Room on Fourth-day evening next, the 12th inst., at 8 o'clock.

JACOB M. ELLIS, *Clerk.*

12th mo. 8, 1866.

"Thou wilt keep him in perfect peace whose mind is stayed on thee, because he trusteth in thee."

REFORM.

All governments and societies of men do, in process of long time, gather an irregularity, and wear away much of their primitive institutions. And therefore the true wisdom of all ages hath been to review at fit periods those errors, defects, or excesses, that have insensibly crept into the public administration; to brush the dust off the wheels, and oil them

again, or, if it be found advisable, to choose a set of new ones. And this reformation is most easily, and with least disturbance, to be effected by the society itself, no single men being forbidden by any magistrate to amend their own manners, and, much more, all societies having the liberty to bring themselves within compass.—*Marvell.*

"When alone we have our thoughts to watch, in our families our tempers, and in society our tongues."

The late Indiana Yearly Meeting, held at Waynesville, O., the 1st of the Tenth month, 1866.

We give the following comprised account:

The Friends in attendance with minutes were Andrew Dorland, from Saratoga Monthly Meeting; Bennett Walters and Nathan Thomas, from Prairie Grove Monthly Meeting; Benj. Tomlinson, from Byberry Monthly Meeting; Samuel J. Levick, from Richland Monthly Meeting; Rebecca John, from Roaring Creek Monthly Meeting; Lydia S. Garrett, (companion to Rebecca John,) from Goshen Monthly Meeting; and Jesse Underwood, also companion to Rebecca John, from Centre Monthly Meeting.

[Epistles from the Yearly Meetings corresponding were received, except the one from Baltimore addressed to the Women's Meeting].

The Blue River Quarterly Meeting proposes that a change be made in that section of our book of discipline in relation to marriage, recommending the omission of the fifth paragraph—that the seventh be made to read thus: "When any of our members accomplish their marriage by the assistance of a hireling Minister, or attend a marriage so accomplished, they be tenderly admonished and treated with, and where they cannot be brought to a sense of their error that they be disowned." Also, "that a member be allowed to marry one not in membership with us provided the marriage be accomplished according to the order of our Society, and that marriages be permitted in a meeting at the residence of the bride, or other suitable place approved by the Monthly Meeting," which claiming the deliberation of this Meeting, resulted in the appointment of a joint Committee, to consider the subject and report their judgment at a future sitting.

This Committee subsequently reported, but the meeting was not sufficiently united therewith to make any change.

The Meeting for Sufferings produced the Minutes of its proceedings the past year, which were satisfactory.

[Robert Hatton was appointed Clerk and Samuel Morris Assistant in the Men's Meeting, and Sarah O. Plummer Clerk and Emily Stratton Assistant in the Women's Meeting.]

The Committee on Education produced the following satisfactory report, viz.: That it has been attentive to the concern. Schools have been taught at Waynesville, Green Plain, Cincinnati and Blue River to the encouragement of the committee. Negotiations are in progress to print a collection of reading in prose and verse adapted to schools or families. The committee continues to feel the subject to be one of great importance and essential to our existence as supporters of the principles of the religion of Christ, as professed by Friends. The committee is continued and are to report next year.

The committee on the concerns of the people of color informed that "three schools have been taught, of three months each, in Richmond, Indiana, the past year, the daily average attendance thirty scholars. One school has been in operation in Dublin, Indiana, for the term of three months, averaging thirty pupils. There is, on the part of the colored children, a strong desire to become properly educated, and it was particularly gratifying to the committee, to see that they had made such good progress in their studies. There is a prospect of two schools being taught in three months; average attendance, thirty pupils. For their tuition the committee expended thirty dollars, including one dollar in the hands of the committee last year. There is a prospect of two schools in Richmond the ensuing winter.

"We think the importance of the subject should receive the further care of the Yearly Meeting."

The report was satisfactory and the committee was continued.

The committee appointed last year, on the oppressive distinctions made by State laws against the colored people, made the following satisfactory report, and the further attention needful is referred to the Meeting for Sufferings:

"To the Yearly Meeting now sitting:

The committee appointed by the Yearly Meeting last year, upon the legal and civil disabilities of the people of color within the limits of Ohio and Indiana, have given attention to the subject, and report that, at the convening of the last Legislature of Indiana, there existed a constitutional enactment prohibiting colored people from settling within the limits of the State, and all contracts entered into by such persons were null and void.

By statutory law, the colored people of Indiana were denied the benefits of any portion of the school fund; were rendered incompetent as witnesses where a white person was an interested party; were taxed without being allowed representation; denied the benefits of laws regulating business pursuits, and were required to register their names upon the county records

to prove their right to a residence within the State.

On the 20th of Tenth month last, a part of the committee attended a sitting of the Legislature of Indiana, and, in conjunction with like committees of Orthodox Friends from two Yearly Meetings, endeavored to encourage the Legislators to obey the dictates of humanity, rather than of supposed political policy, when dealing with the interests of these people.

We hope our efforts were not wholly without good results. During the winter, the Legislature so amended the laws as to render competent as witnesses persons of color not in the State, in violation of the thirteenth article of the constitution, and rendered incompetent as witnesses all white persons who are interested parties to a suit, if the opposing party is a colored person whose testimony is forbidden by the thirteenth article of the constitution.

By the action of Congress, in the passage of the Civil Rights Bill, we suppose the thirteenth article of the constitution of Indiana, and all laws resting upon it, are null and void, leaving at the present time as just cause of complaint against the laws of Indiana upon the subject:

1. The failure to set apart a share of the school fund for the benefit of colored persons.
2. The presence upon our statute books of laws (probably obsolete) yet unjust and disgraceful.
3. The denial of the right of suffrage as the concomitant of taxation.

In Ohio we find a law prohibiting suffrage to all who have a preponderance of African blood.

We believe further attention to this subject by the Yearly Meeting will be fraught with good, and that we should not close our eyes to the duties that lie around us, nor refuse to exercise our influence for the benefit and advancement of our brother men.

We propose the appointment of a judicious committee, which should be left at liberty to memorialize the Legislatures of these States in behalf of this body, on the subjects hereinbefore mentioned, and to labor in such other manner as best wisdom may direct."

The following minute embraces some of the exercises of the women's meeting:

The reading of the epistles, received at this time, has induced a lively and corroborative feeling of the excellency of freely communicating that which is designed to be disseminated for the strengthening of one another's hands in things pertaining to the everlasting truth.

The language of encouragement was extended in view of the beauty of the order which at the time prevailed, and which was apprehended to be the effect of a general perception of the pre-eminent excellency of that which can supply all deficiencies and gather into a oneness even those who are afar off.

The virtue of perseverance in the line of known duty was feelingly commended, a lively concern was expressed that the youthful mind should be divested of all idea of gloom in connection with a life of devotion to the holy cause of truth, for this alone brings true peace and joy; and it would be found as required sacrifices were laid upon the altar, the reward would be more than commensurate thereto, and by virtue of those dedications the mind becomes cleared of previous occupants and room made for better guests.

The power of love to gather all into harmonious oneness, and qualifying for the right conducting of our business, was sweetly held forth to view, together with an exhortation to give ourselves up unreservedly to the truth.

The great Head of the Church was humbly supplicated to strengthen our faith in his divine power, that we might experience the incomes of his love preserving from the desolating effects of indifference to the soul's truest interest.

The state of society presenting, much exercise was elicited.

The satisfying effect of attending all our meetings when ability permitted, was earnestly portrayed.

Tender sympathy was expressed and former experience recurred to, in view of the temptations besetting our younger sisters to deviations from simplicity in dress and address, testimonies for which our ancestors greatly suffered. They were solicited to turn a deaf ear to those suggestions which would allure them from the path circumscribed by the truth as taught them by convictions in their own minds and corroborated by clear scriptural testimony, and, if these failed, to remember that respect was due to parents and society. Retirement and close communion with their own minds were recommended, that they might ascertain by the light afforded what ground they occupied in regard to those things.

It was recommended that the scriptures be read from serious motives, as the only means of securing corresponding results; if the heart be sincere in seeking instruction, the understanding would oftentimes be enlightened to apprehend and apply their testimonies.

The mutual enlightenment by the principle or light of Christ was interestingly demonstrated by the beautiful incident of Peter and Cornelius, whose knowledge of one another was only obtained through the revelation of truth in their own minds; by this was illustrated the spiritual benefit we may be one to another, when our tarriance is at the true place of waiting.

The inefficiency of that ministry which demands pecuniary remuneration was zealously proclaimed, elicited by deficiencies noticeable in our reports, and our young sisters were urged

to restrain their curiosity and suppress other motives that would lead them to violate our testimony concerning a free gospel ministry. Testimony was borne to the capability of parents in whom a right concern exists for the proper training of their children, by inducing attention to suitable objects: in this way preserving their unwary feet from the many snares which beset their slippery path, and preparing the ground for the seed of the great Husbandman. It was thought that utility accrued from mothers frequently gathering their little children around them, and endeavoring to instil ideas that would be likely to prove useful towards forming and bending their susceptible minds in the right way, making impressions to which it will prove profitable in after-time to recur.

We have been exhorted to rebuild the walls that may be broken down, each one against her own house, that a restoration of primitive zeal in the cause of truth may be witnessed; and it was made apparent that this could not be effected by working one time and being idle another, but the labor must go on uninterruptedly, overcoming, courageously, the obstructions and difficulties that present as impediments. Thus was perceived the necessity of a closer walking and a more continued co-operation with the spirit of truth, as revealed in our hearts, if we attain to that state of stability which secures contentment with the allotments of Providence, and enables us to adopt the language of the Apostle: "Everywhere and in all things I am instructed,"—a state which calls for the abandonment of self, and in which the illuminating beams of wisdom discover lessons of instruction even in things repugnant.

The blessed effects of devotion to the cause of righteousness was illustrated by the recital of the conduct of a young man, under the influence of that Spirit which would gather all into the fold of rest; which seemed to meet the witness for good in the minds of our dear young sisters, the remembrance of which, it was hoped, might not pass away as the morning cloud or evening dew.

Friends were reminded of the manifold privileges enjoyed by the Christian traveller in this day of gospel light, restraints and hindrances of a former time being removed. Yet it was mournfully obvious that feebleness, as a society, has increased, lukewarmness and indifference usurping the place of a properly tempered zeal, the clean and beautiful garments of righteousness have been soiled by trailing through the highways of the world. Our testimonies have been compromised, and there is too little practical recognition of the great fundamental principle and corner stone of our once peculiar building.

By the instance of the little captive maid was

shown the virtue of knowledge that can be made available to the good of others when seasonably imparted.

We were admonished to keep close behind our divine Guide, as there was danger, when not on the watch, of preceding and thus lose sight of the footsteps of the true Shepherd, which produces bewilderment and estrangement from the flock.

The different sittings of our meeting were marked by a prevailing interest in the exercises thereof, exemplified by a more general expression of feeling than usual, which was cause of thankfulness to those who have long borne the burthen of the day.

An encouraging evidence was felt that light was arising in the minds of many that would dissipate the dark shadows of unbelief and indifference, and workers would be furnished from the ranks of the young, to set up our gates and re-establish our falling walls.

Our public meetings were large and solemn; both watchmen and watchwomen proclaiming with vitality and earnestness the word of faith which we preach to the comfort of many, contriting of others, and we believe to the conviction of some truth-seeking ones.

We have been favored, through the several sittings of this meeting, with evidence of the continuance of the Father's love, uniting our spirits, and affording encouragement to believe there are those of the younger class amongst us who are under the preparing Hand to take the places of their elder sisters who are passing away; and now, under a feeling of solemnity, the meeting concludes to meet again at Richmond next year, if permitted.

SARAH O. PLUMMER,
Clerk.

FRIENDS' SOCIAL LYCEUM.

Lecture on "How to Read Understandingly."

BY DR J. THOMAS.

The lecturer remarked that in this life every advantage has its corresponding disadvantage; thus health, wealth, beauty and talents have each their peculiar dangers and temptations. The facility with which books are in our age multiplied and diffused constitutes no exception to this general remark; for not only are bad books diffused throughout the land even more extensively than good ones, but the vast amount of reading which seems necessary in order to keep up with the times, is a temptation to read superficially and with the least possible amount of thinking.

He alluded to the great number of works of fiction, to read which was not merely a waste of time,—it was worse; for the reader was almost certain to acquire bad habits, without acquiring any ideas that could repay him for the loss sustained. He did not, however, mean to

affirm that all works of fiction were unprofitable reading. Fiction indeed may be—and sometimes has been—made the vehicle of important truth; while that which goes under the name of true history may be so written as to convey the worst kind of falsehood; thus it may be written for the express purpose of perverting the truth and making the worse appear the better cause.

The most important question to be asked respecting any work is, "With what spirit has it been written?"—if with an honest and earnest purpose of representing men and things as they really are, it will probably be a good book, whether it goes by the name of fiction or history; but if for the purpose of misrepresentation, it must necessarily be a bad book, by whatever title it may be called.

True, it may sometimes be difficult to determine the spirit with which a book has been written; but if the reader is honest to himself, and will take the trouble to examine the work in question *attentively*,—and, as far as possible, *impartially*.—he will generally be able to form a correct judgment respecting its character.

In connection with this subject, the lecturer made some severe strictures on Macaulay the historian. No one admired Macaulay more than he; in a literary point of view his writings were admirable; his prose was perhaps the most brilliant to be found in the whole compass of English literature. It was because he admired Macaulay's genius that he so deeply regretted that he had not those high moral qualities which give to genius its brightest lustre. After a careful perusal of his works, the lecturer had reluctantly come to the conclusion that he was not to be trusted either as a historian or critic. In fact he seldom fails to misrepresent whenever a strong temptation to do so is presented to his mind, whether by interest, prejudice or passion. A lucrative office is given him under the East India Company, and he palliates, or rather whitewashes some of the most infamous acts of the agents of that Company. As a Whig and a lover of liberty, (as doubtless he sincerely was,) he was naturally prejudiced against James the Second; but he is not content with inveighing against his follies or his crimes alone, he would represent his virtues, few and feeble though they were, as weaknesses, if not deformities. Certain members of the Society of Friends in Edinburgh defeat his reelection to Parliament, and he revenges himself by calumniating William Penn, one of the purest, noblest and loveliest characters presented on the page of history—for no other reason, it would seem, than that the reputation of Penn was peculiarly dear to the Society of Friends, and a wound inflicted on him was sure to be keenly felt by all.

The lecturer spoke in high terms of the candor and fairness of Walter Scott, who, though a writer of fiction, was generally just in his delineation of historical characters. He did not say that Scott was *always strictly* just; it was a very difficult thing for the best of men to be so; but he showed the fairness of his spirit by representing some of his very finest and noblest characters as belonging to those religious and political parties to which he himself was opposed. If a writer is just towards those against whom he has a prejudice, he may for the most part be safely trusted in other cases. He cited Prescott as a noble example of a historian who everywhere manifests the spirit of justice and an unswerving devotion to truth.

The lecturer observed that every advance in society brought with it some modification or extension of the duties of the members of such society; the duties of the subjects of a despotic government are not exactly the same as those of the citizens of a republic; nor are the duties of men living in a state of barbarism precisely the same as those of a highly civilized nation. In like manner, the universal diffusion of literature among all classes in our country, imposes new duties upon us all. The Spanish proverb says, "Tell me who your company is, and I will tell you who you are." So one may say with equal if not greater truth to those who are fond of reading, "Tell me what your favorite books are, and I will tell you what you are." As a reading people, books not only become our companions, but precisely those companions that exercise the greatest influence in the formation of our character. Hence it is a duty which we owe to ourselves and to society, to select our books wisely and judge of them correctly. But it is impossible to judge rightly if we read hastily and superficially. Hence as a general rule we should read no more than we can *understand* and *digest*. By superficial reading our thinking powers do not merely remain uncultivated—they are actually impaired. Reading extensively and superficially tends also to confuse and impair the memory.

If we form a habit of reading *thoroughly*, of weighing what we read, and of forming, as far as may be, a correct judgment of the thoughts presented to our minds, we not only benefit ourselves and society at large so far as our influence extends, but we render a real service to authors, perhaps the most influential and important class that we have among us. If we accept and applaud every work that is written in a graceful and animated style, without much regard to the truth or error contained in it, we are offering the strongest temptation to authors to seek popularity rather than truth; and provided their manner is attractive, they will be apt to regard the matter of their works as of comparatively little account. The lecturer

cited several instances of works of the merest pretension, that had yet received the commendation of persons of no little intelligence, who, skimming over them rapidly, and finding them written in an agreeable style, supported by ingenious reasoning and a great parade of learned authorities, imagined that inasmuch as what they saw and understood (in part) seemed fair and plausible, what they did not understand at all was as much superior to the other as it was more profound. Now if the reader would only take the trouble to examine the authorities referred to in such works, he would in many cases find that they do not at all support the positions taken;—and perhaps they were not intended to do so, but simply to give the reader a profound impression of the author's erudition, in the hope that most persons would prefer to accept the positions without much examination, rather than incur the labor of searching beneath so deep a stratum of "learned lumber."

For Friends' Intelligencer.

"WHEN I SEE THEE I SHALL BE SATISFIED."

When in each budding flower,
And each green, waving tree,
And each soft, flattering, summer shower,
My spirit eyes see thee;
When all broad nature's field
Of joy tells me thy care,
My soul, in thrilling extacy,
Shall bless thee everywhere.

When not alone in these,
But in thy sterner form,
"Our Father" on the maddening sea,
"Our Father" in the storm;
When all our joys are wrecked,
Our loves and hopes laid low,—
Life swept of all the beautiful,
Can we our Father know?

Then, in that fearful hour,
To see thee, is to ride
Serene the tossing waves of life,
Our rudder at our side.
To see thee then, a present God,
Is to be satisfied.

S. A. NICHOLS.

Danby, Va.

THE LOSS OF THE STEAMSHIP "LONDON."

(BY ONE OF THE SURVIVORS)

(Continued from page 623.)

When I got on deck this last time, I found the ship being put round to bring the boats on the lee side, so that they could be lowered. The sun would show out occasionally—very heavy and troubled sea yet—people still walking about, calmly watching the scene. The captain was walking up and down the poop with a long mackintosh coat on, and a cap of same material tied close down under his chin. Poor man! I pitied him. It was a trying moment to each of us, but how much more must it be to a captain at a time like that, when every one looks up to him as their head; when ladies come up to him and ask if there is any hope, and he has to say

No; when one or more ask him if he would advise them to go in the boat, he has to tell them, "I think there is no hope for you," which amounts to saying, "No, you had better remain here, and be drowned at once." I felt very much for him situated at that moment; I felt at peace with every one, even the owners. The ship at this time was nearly on a level keel, and very low at the stern, and rolling much like a log—not those sudden tosses and jerks. There was no one at the helm, it (the wheel) was lashed with a rope. I looked around to see what prospect there was of being saved, and saw that the small wooden boat near the forecastle had been got out to the ship's side to be lowered, the bows were just over the railing. At this time, nor at any time after did I see any men near it for the purpose of launching it. The port iron pinnace was still hanging in its place; no order was given that I heard, nor any preparation made for lowering it. I saw a young man in it trying to do something, but he knew nothing of a boat. There was only one boat being got ready—the same one I have mentioned before—that for the captain and ladies,—the port cutter, a fine wooden boat, and still hanging in the davits, with several men in it. I stood by for a time watching the proceedings, when it gradually dawned on my mind that the sailors had this boat in their own possession, entirely under their own control. I never saw any of the officers giving any orders or directions; and as for the ladies, I saw no preparation towards getting any on board. The facts of the case were, as I afterwards learned—that after the first boat swamping in the morning, there seemed not much chance of any getting lowered and cleared from the ship with safety; which would account for the captain's not having his first order in the morning carried out,—of getting the boats ready; for if he saw reason to get the boats ready then, surely he must have seen more now. But a few of the sailors were evidently men who knew what could be done with a boat at sea, and agreed among themselves to fit out this boat, and have a trial for their lives. They got her ready with oars, compasses, bucket, bailer, life-buoys, biscuits, &c. The captain may have directed, but I never understood so; and, for the half hour or more that I was on deck at the last, I did not see him interfere, and I was near the boat all the time. So when I saw how matters stood with regard to this boat, I then and there determined to get in her if possible. Once that boat is in the water (thought I), I will jump in, and I don't think they will put me out. Presently I saw a sailor step over, and get in the stern of the boat, which was still hanging in the davits; he was one of those who had helped prepare her, and one I knew by sight—the only one on board. Our acquaintance was very slight, and made by

chance. When on my way from Fenchurch Street to Tilbury, he got in at Stepney, and sat on the same seat with me, and from that circumstance we spoke once or twice on board. I then went up to the side of the ship, and spoke to him in a free sailor-like way. Though not a seafaring man myself, I had been thrown during my life very much amongst sailors, and fancied I understood them pretty well, and knew their dislike to ceremony or to a line of distinction being drawn between them and the rest of society; so I asked him in an off-handed manner, wishing to establish a fellow feeling. It had the desired effect. He said, "Yes, but take your chance when she is in the water," which was all I wanted; for if I had been allowed to have got in before, I think I would not, as I was afraid she might upset in the lowering, as the first did. I soon found that my plan for gaining a favor at that time was decidedly the best, as I heard men beseeching of them to let them go, also offering large amounts of money; the answer was, "We don't want your money." When my friend the sailor gave me permission to go, I thought of the ladies; and asked myself the question, "Am I robbing them of any chance they might have?" and said to my friend in the boat, "Well, I do not like going and leaving those behind," pointing to some that were standing near the mizzenmast. Not that I thought many could be saved; but should like to have a few in the boat, in case we were saved, to show we were not selfish. He said, "I am as sorry as you, but it can't be helped; try and save yourself:" which nerved me, and also showed to me the impossibility of saving any, unless they jumped after the boat was lowered. Anybody would say, "Why not lower them in the boat?" but that was where the danger was, in case she upset, as a great many expected she would. If this sailor had said to me, "Yes, get one or two, and put them in the boat," I would not have done it; for I could not have advised females to go where I was afraid to go myself. Many at this time were standing near; some passengers and some of the foreign sailors were trying to get into the boat, but were prevented by one of the sailors whose duty it was to see she was not overloaded, for if so they could not lower her with any safety. The assistant surgeon was pleading very hard for himself and a young lady, and I heard one say to him, "Keep your money, and as for a doctor we don't want one." By the remark I judged he had been offering money, and I heard him say, "You must take me, you will want a doctor." This same young lady I saw soon after talking with one of the sailors; I heard after that she offered him 500*l.* if he would save her. I do not know her name. She was about middle height, and I think fair complexion and very pretty. He was very anxious to save h e

but I suppose he thought as others that it would not be advisable for her then to get in the boat. There was another young lady, also very pretty. She came to the side, and said to this sailor-friend of mine—"Young man, will you save me?" He said, "Yes, you jump as soon as you see the boat in the water all right;" and when the boat was in the water he held up his arms (she was then holding on by the mizzen-rigging), and told her to jump, but she would not. Often during the night after I heard him regretting that she did not jump. In the troubled state of the sea at that time, it was a very dangerous jump: if you fell into the water, then good by; no one would pull you in. I foresaw this difficulty, and provided against any such contingency, by asking my friend in court if he would pull me in in case I should fall into the water, which he promised to do; luckily I did not have occasion to test his honest intentions, which I never for a moment doubted.

By this time, say five or ten minutes before the boat was lowered, and about half-past one or nearly two o'clock of Thursday, the 11th, the ship was settling gradually by the stern. Any one who was keeping a sharp look-out could not but help seeing there was a great change within a quarter of an hour. People were still walking about—the number on deck increasing. I saw the captain amongst them, apparently giving no directions; now and then a lady would speak to him. A good many were standing in a group near the companion-way, scarcely a word being said. I saw some of those I knew, but did not even exchange a word with any one, excepting Munroe, when once he came near me. I said to him, "I intend to have a trial for this boat," not with the purpose of wishing to influence him, as I could not advise anybody at that time, but I wished to get his opinion as to the probability of a boat living in such a sea. All he said, "Are you?" and walked away. I began to fear that the ship would go from under us before the boat was lowered, so said to my acquaintance in the boat, "Unless you lower soon, you will be too late." He said, "We can't lower till King comes." He was one of their party, who had gone below to see if any water could be got to take with them; presently he came up, and they told him to come in, and they would lower. He then walked a short distance to where Captain Martin was, to ask him if he would go with them. He declined, saying (which I did not hear, being too far away), "God speed you safe to land." Then King asked him for the course and distance to land; he said, "E.N.E., ninety miles to Brest." King must have misunderstood him, as we were then fully 190 miles off. King returned and jumped into the boat, and immediately they lowered, being about a dozen in her. I got on to the rail, holding on to the mizzen-rigging; as soon

as I saw that she was safe in the water, I stepped down on to the mizzen-chains, then watched my opportunity when the boat rose on the sea, and made a cautious leap right into her stern. I did not have far to jump, about four or five feet, by waiting until a sea lifted the boat. Immediately that I was in, I saw the boat was drawing under the channels of the ship, and was in imminent peril. I at once got out an oar, as did two others, and we pressed the boat off. When the sailors saw that the boat was safe, and there was a chance of getting away, then they were anxious to have a few women. Mr. Munroe was at the side intending to leap, when they sung out to bring a lady; he turned round and ran his eyes around the few to find, naturally enough, one he knew; not seeing one, he made a few steps to the middle of the deck and asked the nearest, a young girl of sixteen or eighteen, if she would go. She said, "Yes." They went to the side to jump; but when she saw the fearful sight below, the little boat being tossed about, with a prospect of being smashed at every heave of the sea against the iron wall of the ship, she said, "I can't do that." There was no time for delay or consideration; as she would not leap, Munroe, seeing the boat shoving off, leaped in himself. All this took place in about a minute or two—that is, the lowering and getting away. After the boat was shoved off the first time, she drew in again. There appeared to be a suction at the stern and I saw when she drew in this time that she was drawing right under the stern—which would have been sudden death to us. The oars were again brought to bear against the side of the ship; we were then, I think, more in dread of being lost by getting under the ship's side than in fear of too many jumping. At that time there was no attempt made by any to prevent any one from getting in—all on board could have jumped. There was only one man prevented getting in, and that was one of the foreign sailors: he came down by the falls from the davits, and some one pressed them on one side so that if he dropped he would go into the water. The boat was apparently crowded full, and I heard one remark (which was very true). "Why don't they go and get out the other boats? why all look to this one, as if there was no other on board?" It still is an unaccountable thing to me why Captain Martin did not see and have those boats got ready, properly manned and officered, and then tell some of the ladies, "There is your only chance; accept it, if you choose." The second time the boat was shoved off her bows were got round, and soon we were pulling away on the port side, and running before the wind. Just then a heavy sea was seen to break over the ship's stern, and wash the people about the deck; but just before we saw a good many, both men and women, standing on the lee-side of the

forward part of the poop, waving handkerchiefs and cheering. The sun had just shone out at that time, which made the scene appear worse to me. I thought dark and gloom more suitable for such a sad moment, and more in keeping with the feelings of those on board. Not that I rejoiced over my position, or considered myself much better off, for we did not know the moment we would be swallowed up.

The brilliant prismatic colors of the pearl are attributed to the decomposition and reflection of the light by the numerous minute grooves on its surface.

The change in the fashions is said to be the cause of the prevailing distress among the weavers of Lyons; the Empress of the French is using her utmost efforts to bring into fashion the silks which are manufactured in that city.

The celebrated Japanese traveller, Dr. von Siebold died at Munich, on the 18th inst., of typhus, at the age of 71. He has left a rich collection of manuscripts.

THE FREEDMEN.—Secretary Stanton, under the act of Congress passed last session, has appointed a commission to award compensation to loyal slave owners of Maryland whose slaves were drafted into the army.

The case of Gen. John M. Palmer, accused of felony in abetting the escape of a slave woman, under his General Order No. 30, which was dismissed in the circuit court of Jefferson County because, in the meantime, the Constitutional Amendment had been adopted, and the alleged slave become a free woman, has been remanded by the Kentucky Court of Appeals for further proceedings. The logic of the bench that makes this decision is of a sort that reflects little credit on the State. "No jurist or enlightened man," says the court, "could doubt that, in a prosecution for horse stealing, the death of the stolen horse after the theft could not prevent a judgment of conviction according to the then existing law. And the parallelism between that case and this is complete in principle and reason."

General R. K. Scott, assistant commissioner of the Freedmen's Bureau for the State of South Carolina, says, in relation to the condition of the freedmen and the operations of the bureau in that State during the 10th month, in the district of Anderson, including Abbeville, Edgefield, Barnwell and Anderson districts, the freedmen are generally treated with kindness; labor is plentiful, and no destitution is known to exist. No schools are now open, and though they might be in operation without interference of any kind, lack of funds compel them to remain closed. One school, now in operation in Aiken, S. C., is attended by 123 pupils. The former teacher of the school was driven away by an armed mob, who threatened to take his life unless he left that place. None of the parties concerned in the outrage have yet been detected, though suspicion rests on several of the so called high-toned gentlemen residing in the vicinity. The feeling existing between the whites and freedmen among the most intelligent and respectable people is kindly in its character, and only from the poorer and more ignorant class of whites do the colored people receive injustice and ill-treatment.

Some destitution is reported in Colleton district in consequence of the partial failure of the crops, and unless aid is extended to the indigent persons, both white and black, much suffering will ensue.

THE STUDY OF LANGUAGE AS A MEANS OF MENTAL CULTURE.

*A Lecture delivered before Friends' Social Lyceum,
Philadelphia, by EDWARD H. MAGILL.*

It has, of late, become fashionable in certain quarters to decry the study of language, more especially that of the ancient languages, as a means of mental culture, and the advocates of this study are under the necessity, either of standing by and seeing their favorite theories demolished with unsparing hand, or of entering the arena of discussion, and maintaining their views by convincing arguments, which alone can influence the decision of the intelligent public of the present day. It is no longer sufficient for the advocates of classical learning to preserve a dignified reticence with reference to the theories which they cherish, superciliously assuming that it is as vain to attempt to convince those who have never enjoyed the advantages of classical culture of the truth of their views, as it would be to attempt to teach the nature of color to the blind; and still less will the plea of antiquity, of long established usage, avail them in these days when *change and improvement* are so generally regarded as convertible terms.

I do not propose, in this discussion, to decry the study of the external world; nor to attempt to hold up, in invidious contrast, any one exclusive course of study as opposed to another; my design being rather to present the claims of those studies to which my attention has been

more especially directed, and which the practical spirit of the age is too much inclined to assign to an inferior place, if not wholly to ignore; leaving it for others who are better fitted for the task, to present the especial claims of theirs. It is an important truth which cannot be too distinctly impressed upon the minds of educators, that it is a fatal defect in any system of education to foster a partial, one-sided, course of training, at the expense of other equally important and equally efficient means of discipline. Proper food and proper exercise must be provided for all the varied powers and needs of the human mind. Of what avail would it be to store the mind with the facts and principles of science, unless, at the same time, it be so trained as to bring forth promptly, when occasion demands it, from its rich store of treasures, things new and old; and, on the other hand, to what end would you train the mind to the utmost facility, precision, and even elegance of expression, and leave it totally destitute of any valuable thought to utter? It is clear that, in the language of Marcel, "Literature and science are mutually dependent upon each other, and must go hand in hand." Whoever attempts to divorce them, or, in the fulness of his zeal in the advocacy of his favorite studies, to set the one against the other, as though either could, by any possibility, be made to supply the other's place in a well-ordered system of instruction, but proves himself a visionary dreamer, ready to sacrifice to his pet theories;

the only means by which the broadest and most generous culture can be obtained. This whole controversy is but the re-enacting in another form of the ancient fable, concerning the stomach and members of the human body. Much of the bitterness of the controversy upon this, as upon other subjects, might be avoided if we would always remember that there are many truths which, from the peculiar circumstances under which we have been placed, and in consequence of the peculiar structure of our minds, lie beyond the reach of our circumscribed vision. Animated then by this spirit, aiming to present, with their full weight, truths which seem to me of vital importance, rather than to deny the existence of other equally important truths, let me direct your attention, during the brief time allotted me, to some considerations which cause me to attach great importance to the study of language as a means of mental discipline.

By the study of language, of course I do not refer to the study of the ancient or so-called dead languages merely, but to a comprehensive study of the works of the masters of thought and speech in our own, as well as in preceding ages. "For," says Sir Edward Bulwer Lytton, "to know Latin and Greek is a great intellectual luxury; but to know one's own tongue is an intellectual necessity." The argument is frequently adduced, and not without some show of reason,—if language is the *expressio* of thought, the means by which knowledge is communicated, why devote so many valuable years to the acquisition of that which is but a means to an end, and sacrifice to this acquisition of the means the very end at which we aim? Now, this objection is based upon the false supposition, which all educators should labor most assiduously to remove, that *education* and *information* are synonymous terms. It is this belief which has given rise to so many false systems of instruction, and given a coloring of truth to the serious charge, that our institutions of learning are so generally ingeniously contrived devices for the "murder of the innocents." Says Marcel, "The teacher's services are estimated not by the quickened apprehension, the established habit of attention, the well-regulated mind, and the refined taste of his pupil, but by the actual amount of Latin and Greek which has been waded through in the academic course." Under the false impression that he is the best educator who imparts, in a given time, the greatest amount of information, who succeeds best in a limited term of years in filling the minds of his pupils with positive knowledge, what wonder that ambitious teachers resort, so generally, to the cramming system, and that ambitious parents, who entertain similar views, countenance the process, and that under the terrible strain

of this twofold stimulus at home and at school so utterly at variance with the true idea of education, many of the most promising children are sacrificed. Now, if the study of language be so conducted that it is nothing better nor higher than learning a barren list of names for the same object, as the Icelandic Scaldic poet must know his 115 names for *Odin*, and 120 synonymous words for *island*, I freely admit that the study would be utterly unworthy of the high place to which, by the almost unanimous consent of the educated of all ages, it has been assigned. If the study must, of necessity, be so conducted that it becomes a mere exercise of the verbal memory, a parrot repetition of dry and often unmeaning forms, a slavish adherence to "the letter which killeth" to the entire neglect of "the spirit which maketh alive," the sooner the study of language be abandoned for studies in which a living interest can be inspired in the pupil's mind, the better it would be for the welfare of the individual pupil, and for the cause of sound learning everywhere. But whatever may have been the practice in this regard in many of our best colleges, where students who have been most thoroughly trained in their preparatory studies by able and experienced men in their various departments are brought under the *experimental* instruction of newly graduated tutors, whose diplomas are scarcely dry, surely no such necessity really exists for thus divorcing form and substance.

I assume, in this discussion, that the proper study of language, after obtaining so much familiarity with our own as a child of ordinary intelligence acquires before the age of ten, without the *hindrances* (or *help*, if that term be preferred,) of technical English Grammar, always begins with the study of the ancient languages. There are many substantial reasons for this preference; reasons which have always had their influence with educated men since the revival of letters, and which increase rather than diminish in weight with every passing generation. I am well aware that this view is directly at variance with opinions entertained by many distinguished writers and scholars of the present day, who admit that the study of Greek and Latin was all important at a period when all that was most valuable in literature, science and philosophy, all history and biography, all moral and religious instruction, was locked up in those ancient tongues; but claim that now, when we have a newly-created literature of our own, when all that is valuable in those ancient writings is easily accessible through the medium of translations, the same necessity for acquiring a knowledge of those languages no longer exists. This belief is based upon a twofold assumption: first, that it is possible to convey an accurate idea of the beauties of an author's style, or even a faithful

picture of his thought; through the medium of translations; and secondly, that the style and thought, in the study of a language, are the only objects worthy of regard. Both these assumptions are utterly groundless. Can you catch the true spirit of the master minds of antiquity—the orators, the poets, and the philosophers—through the poor medium of the most perfect translation? Let me answer the question in the language of Judge Story:—"Ay! as one remembers the face of a dead friend by gathering up the broken fragments of his image, as one listens to the tale of a dream twice told, as one catches the roar of the ocean in the ripple of a rivulet, as one sees the blaze of noon in the first glimpse of twilight." Nor can we more readily admit the truth of the second assumption,—that the author's style and thoughts are the only objects worthy of regard. It is true that we *do* and *should* study the models of antiquity for the unrivalled specimens of poetry and eloquence, of biography and history, which they present, specimens so elaborately wrought out in the minutest details, and of so exquisite a finish, that, after the lapse of two thousand years, we may still turn to them as models, since then unequalled, or certainly unsurpassed; and the subject-matter of those ancient writers, (embracing topics the most varied, from the humble themes of gardening and rearing bees, to the loftiest disquisitions upon law, both human and divine, scarcely omitting any topic of human interest,) is, even now, after the astonishing progress of the present century, well worthy of our profound study and reflection; teaching us that much that we are prone to regard as new in human experience is as old as Homer or Plato; that even modern inventions, and the far-reaching deductions of modern science, have often been foreshadowed by the intuitions of the masters of thought and speech, for more than two thousand years. And yet it is not *primarily*, either as models of style, or for the sake of the thoughts which they have recorded, that we study the classical writers of antiquity, but for that discipline of mind which they afford, a discipline which, owing to the peculiar arrangement and forms of the words, and the grammatical structure of the language, is of such a nature that its place cannot be supplied by any other means of mental culture ever yet devised.

I have said that the reasons for studying Latin and Greek are increasing rather than diminishing in weight with every passing generation. Fifty years ago the study of Comparative Philology was yet in its infancy. It is less than sixty years since the work of the German poet Schlegel appeared, "On the Learning and Wisdom of the Indians,"—a work which, according to Max Muller, was "the foundation of the science of language." Now any study of Comparative Philology, except in the most

superficial and unsatisfactory manner, is only possible after a knowledge of Greek and Latin, as the foundation has been surely laid. Latin is at once the master-key to the romance languages of Southern Europe, being the source whence the languages of Portugal, Spain, France, Italy, Wallachia, and that of the Grisons of Switzerland, are directly derived; not less than ninety-five per cent. of the words in the most useful of these languages, the French, presenting evident traces of their Latin originals. In our own language, although made up of a heterogeneous mass of words collected from every source—"rudis indigestaque moles,"—but few literary languages, or even dialects, being unrepresented in it, more than one-third of the words are of Greek or Latin origin, either directly, or, more generally, through the modified Latin of the French or other romance languages.

With the study of the ancient languages, the study of ancient history, of biography, and of classical geography should always be combined, and a vital interest *may* and *should* be given to the whole, by keeping up a constant comparison between ancient and modern times. A page of Demosthenes or Plato may be made an exercise of surpassing interest, if, while the essential drill upon grammatical forms and the construction of sentences is not neglected, the attention of the student is directed to the circumstances under which the words were uttered, the characters who were then upon the stage of action, the intended and the actual effect of the speaker's words, the part which the passage under consideration subserves in the general argument, and instances of parallel passages in other authors, both ancient and modern; if, in short, every thing be done to enable the student to see re-enacted, by living, breathing, real men, the scenes which transpired two thousand years ago. That all this is done, or even very generally attempted, in the class-room, I will not pretend to affirm. In the earlier stages of the pupil's course in particular, so much attention must necessarily be given to the forms of the words and the construction of the sentences that it is only by the greatest exertion on the teacher's part that any time can be obtained to attend to any of these things, which, at this stage of the course, must be made secondary, for strict attention to the *literal rendering* of the passage before him is as important to the student of language, at least in the earlier stages of his course, as the exercises in the dissecting-room are to the student of anatomy; and if this early training be neglected, the classical writers are never read with pleasure or profit. I would not then be understood as advocating the abandoning of the necessarily somewhat dry and tedious work of literal rendering, but that from the beginning more than that should be at-

tempted, and especially in the more advanced stages of the course, when, if the earlier labor has been faithfully performed, the forms and constructions are comparatively familiar. What a disgrace to the great schools of England that Staunton, in his recent work upon those schools, can truly say, "In teaching the classics we have not yet passed beyond the period of the dry bones. Who is to breathe on these dry as-dust relics with creative energy, and summon from the valley of death forms of glory, strength and beauty. What is to be the regenerated agency if our educational institutions continue apathetic." Now, whatever the study of language may be capable of effecting when properly conducted, judgment will inevitably be passed upon it in these practical days, not by what it *may*, but by what it actually *does* accomplish. It therefore becomes an imperative duty for those who would not see this time-honored study superseded by studies of a (so-called) practical nature, who are firmly convinced that nothing has ever yet been devised, as a means of intellectual training, which so admirably answers all the needs of the mind, and so fully fits it for the varied duties of life, to see to it that this study is so directed that its higher capabilities are proved in practice, and are not the vain imaginings of devoted enthusiasts or fanciful theorists. To this end let the grammars be simplified and greatly abridged, so that the essential principles of the language may be indelibly fixed in the pupil's mind, and he may not, in the language of Robespierre, "*lose sight of the principles amid the multitude of exceptions.*" Then, too, it is of the last importance, and cannot be too strenuously urged, that the exercises be so conducted that the actors in the scenes described shall be something more than mere shadowy names. A human interest would at once cluster around what would otherwise be dry and formal, if, bridging the great gulf of two thousand years, summoning, as with the enchanter's wand, the scenes and actors of other days, we could see in Cæsar, Cicero and Virgil, Xenophon, Demosthenes and Homer, men of like thoughts and feelings with ourselves.

(To be continued.)

A certain Scotchman being solicited to enter the army and fight for his country, asked the officer who desired to enlist him these questions: "Can you tell me if I kill a man that he will go to Heaven? Or can you say whether, if I am killed myself, I shall likewise go there." Meeting with no satisfactory answer, he continued:—"I dare not send a fellow-creature unprepared to Eternity, neither dare I rush thither unbidden." This man was a true hero; he would rather meet the dangers of life and the contumely of the world than offend his Divine Master.

SELECTIONS FROM THE WRITINGS OF JOHN BAROLAY.

(Continued from page 639)

To S. A.

1818, *Second Month 1st*.—I have been apprehensive that our views of these doctrines [of Immediate revelation, and the true and saving knowledge of God, and of His truth] which are closely accordant with those of the holy penmen of Scripture, are but little known among the many religious denominations. I have believed, both as to those within and without the pale of our own Society, that there is in this day (as there ever has been,) more need of leading people, in the first place, to the fountain of truth, the foundation stone, than of laying much stress upon the building, the beautiful harmonious superstructure of doctrines, which arises from that base, and can stand only upon it. This corner-stone we well know is Christ, not merely testified of without us, but also manifested within; and as we closely attend to, and obey the manifestations of His Spirit and power in our hearts, we come truly and savingly to *know* something of Him and His holy religion, according to our present ability and growth; and in following Him in His leadings we are best able to receive those true testimonies of Him recorded in Scripture, and livingly to understand, as well as availingly to believe, what is there said of His appearance in the flesh, with all that He said, did, and suffered. There has been, and still continues to be a great deal said and written, respecting correct and scriptural views, of the doctrines and duties of Christianity; but I believe until men come to that, which can alone give the true discernment of these spiritual things, they *will*, they *must* continue to grope as in the dark, not knowing the Scriptures, neither the power of God; and it is feared, resist Him, who the apostle said, "hath shined in our hearts, to give the light of the knowledge of the glory of God in the face of Jesus Christ." It seems to me, that under the constraining influence of the love of Christ, we should earnestly recommend people to believe in and obey His light in their hearts; that by following Him in this manifestation, they may have the light of life, as He Himself has graciously promised. No pointing to the written testimonies borne to the existence of this light within, will avail, but as the mind is gathered (in some measure, however small,) to that which witnesses those testimonies to be true, and alone enables us to receive them. I cannot think that that Scripture, "the letter killeth," if rightly made use of, could hurt any but those who walk not closely in accordance with that Spirit which gave it forth, and which is able to give a true understanding thereof. No man can availingly know or follow the directions laid down in

Scripture, but as he bows to the appearance and openings of that Light, which enlighteneth every man more or less in the day of his visitation. It seems to my view, that the greatest thing which we all have to guard against is, the leaving our heavenly guide; and this may easily be done, both in reading Scripture, and in every other religious engagement; if this be the case with us, we cannot but wrest them, some way or other, to our own condemnation or even destruction, whatever we may think or imagine; it may be by thinking to have *life in them*, as the Jews did, whom Jesus reproved. It was not that the Jews did *wrong* in diligently searching those writings, or that there was any harm or noxious influence in Scripture,—it was not in that sense that the letter killed, or doth kill; though, on the other hand, we know that they cannot *give* faith, and that all their authority, and excellence, and efficacy in the work of salvation, are only from that power and life whence they came. But it was by reading in the light of their own reason, which is indeed darkness;—heaping up a dead set of doctrines, in their own wisdom, which is foolishness; presuming to pry into things too high for them, things into which the Spirit of Truth led them not, but their own speculations and imaginations; thus they made the commandments of God of none effect, as many now do, by their own traditions, and expositions, and interpretations, adding to and diminishing from the true meaning of the Scriptures. Being unstable and very unlearned in the word, which spake forth the Scripture, though learned ever so much in the words, they cannot reach the essence; but must stumble as Nicodemus and other learned Jews did, who knew nothing of the new birth; though they could easily tell by the letter of the book, where Christ was to be born. It is such in this day, who are crucifying unto themselves the Son of God afresh, notwithstanding all their high professions about the atonement, etc., which they have very clearly in the notion and dead apprehension, but out of the life of these things:—the evil spirits could testify of Christ, and say, “I know thee who thou art, the holy one of God;” and, “these are the servants of the Most High God, which shew unto us the way of salvation;”—for even these had a knowledge of God, and belief in him,—a knowledge of Christ, and confession of him,—a knowledge also of the Scripture. The enemy also himself was ready at quoting Scripture,—witness the temptation of our Lord; and He can put men upon studying the Scriptures, so long as through the carnal mind he may but interpret, and apply them to their states; for by all this he has the poor soul the safer in his net. He is not deterred from prosecuting his evil designs, by our holding the Scriptures in ever so high estimation;

if in studying them, we lean on our own understanding, although with great and apparently laudible zeal: though we apply one part to confirm another—though we get them by heart,—though we extract all the doctrines and duties that are testified of therein,—though we are able by this skill to give an expert answer to such as may inquire a reason of the hope that we have adopted, and the faith which we have formed out of the letter of the *book*,—though we even set ourselves to do all that is commanded;—yet all these willings, and runnings, and strivings, do not overthrow his government in the heart: nay, his snare is not broken, but made more subtle and intricate. It is the simple, and those that abide in the simplicity of the truth, that are kept by the truth out of his beguiling snares; the spirit of truth is their shield and sure defence on the right hand as on the left, and they lean not unto their own understandings; so that the Scriptures and every other outward means are blessed to them, as they keep to the anointing which they have of him; by which, whether with or without instrumental aid, they know all things requisite for their present need; having “an understanding given them to know Him that is true.”

1818, *Third Month 3d*.—I believe if young persons were more fully open, and implicitly given up to acts of dedication apparently small, and were willing to go, to stay, to do, or to forbear in minor matters, as seemed best, that they would thrive more vigorously in religious stature and strength. One thing after another came gradually before the view of my mind; all that I had to do, or believed was required at my hands, came not upon me at once: for there was no hard task-maker to obey, but one who knew my weakness, and my inability to give up even to the least matter of duty, without His special aid. As I was concerned to keep my eye open, to see whatever He might shew me was to be given up to,—and as my desire from day to day unto Him, and the accomplishment of His will respecting me,—first one thing, then another, at seasons opened before me with sufficient clearness: sometimes these apprehended duties were very little matters, at other times they were of fearfully great importance; and often were they of a nature and complexion which the worldly-wise part in myself and in others could not bear or understand. Yet after having gone through and been favored to stand faithful in the performance of these things, I have often seen the propriety of them; and I have felt it a precious thing to be “led about and instructed” so suitably, so seasonably, so safely.

To E. H.

16th of Fourth Month, 1818.

DEAR EDWARD.—It is my belief, that, ac-

according to thy own expressions, "the Master is come," and coming, (what if I say,) to plead as in old time, with the modern money-changers in the temple, who turn the holy house of Him that is most holy into "a den of thieves;"—to upset their tables and scatter their silver and their gold; the "love" of which is said to be the "root of all evil." His scourge is, as it were, in His hand; and the buyers and sellers being cast out, the blind and the lame shall yet come to him in the temple, the house of prayer for all nations, and He will heal them. The little children shall yet cry in this temple, saying, "Hosanna to the Son of David;" and out of the mouths of the very "babes and sucklings," whose hearts He had fed with "the milk of His word," praises shall yet come forth unto Himself.

It is my belief, and I feel freedom to mention it to thee, that there are or will arise, those who will, in some sense, "build the old waste places." I live in the faith that the truth shall spread; and the number of those that are guided and governed by the teachings of that Spirit, which leadeth into all truth, will be greatly multiplied. Surely there are even now those that "are left of the captivity," who "are in great affliction and reproach;" we may also say, that, in some acceptance of the passage, "the wall of Jerusalem is broken down, and the gates thereof are burned with fire." May I not also add, there are, even in this day, those who can in measure adopt a similar language with that of Nehemiah,— "When I heard these things, I sat down and wept, and mourned certain days, and fasted, and prayed before the God of heaven." Surely there are those that can say, "I arose in the night, neither told I any man what my God had put in my heart to do at Jerusalem:—then went I up in the night by the brook, and viewed the wall, and turned back;—and the rulers knew not whither I went, or what I did: neither had I as yet told it to the Jews, nor to the priests, nor to the nobles, nor to the rulers, nor to the rest that did the work." There are doubtless some that are ready to laugh these to scorn, and to despise them; and to say, "What is this thing that ye do?"—and I judge there are those that can reply, "The God of heaven, He will prosper us: therefore we His servants will arise and build." To such as endeavour to entice the sincere-hearted, and to take them off, by whatever specious pretence, from their watch and work, their unceasing concern and travail for the prosperity of the great cause; I am clearly of the mind that the reply should be, "I am doing a great work, so that I cannot come down; why should the work cease, whilst I leave it and come down to you?" Now the work that is wanted, as far as I have in this and some other favored seasons

had capacity to see, is a sinking down and bowing down yet lower and deeper than many of us have hitherto humbled ourselves,—even under the government and dominion of the holy seed, Christ Jesus; that so we may, through subjection to Him, be led to "cease from our own works," and to let Him do and work all things in us according to His own divine will. Wherever this blessed work hath gone forward with strength and beauty, wherever this constraining power has been fully and faithfully given up to, I believe a necessity has been sooner or later felt, to make a full surrender and sacrifice of everything, which the law written in the heart may call for.

From one, who is much more often than otherwise plunged into the depths, and who finds himself yet weaker and weaker in himself to will or to do anything as of himself, but is at times favored to see still greater necessity for a daily waiting upon the Lord, that so His will may be daily known and done through His Spirit, which brings into and preserves in a watchful, weighty frame of mind at all times,—and who is, with feelings of affectionate regard, Thy friend, J. B.

(To be continued.)

LETTER FROM JOHN JACKSON.

(Concluded from page 631.)

"As regards that ordinance called the sacrament of the Lord's Supper, as it is observed by modern professors, it appears to me to be a continuation of a Jewish ceremony under a new name. For I think the testimony of all the Evangelists informs us, that it is not an institution of Christ, when they tell us that Jesus kept it as the 'passover.' 'The feast of the passover' and 'The feast of unleavened bread.'

"It was not consistent with the nature of the spiritual dispensation which Jesus Christ came to introduce, that any outward right could be essential to divine communion. It was the object of his mission to put an end to sin, by laying the axe at the root of every corrupt desire and inclination of the heart, and to bring in everlasting righteousness, a work too momentous to be effected by any outward forms. Hence it became necessary that he should 'blot out the handwriting of ordinances, nailing them to the cross,' and instruct them in the knowledge of the kingdom of God within them, where his appearance should be known by an inward and spiritual communion, a participation in which is the only true supper of the Lord. 'Behold I stand at the door and knock, if any man will hear my voice and open unto me, I will come in and sup with him and he shall sup with me.'

"The blessed Jesus frequently instructed his disciples in the knowledge of divine truths, by the aid of figures, well knowing they were un-

able to comprehend the fulness of the gospel day at once; and we find on the last occasion when he kept the ceremony of the 'Passover,' in which he took bread and blessed, and broke it, and gave it to them, saying, 'take eat, this is my body,' he wished to impress their minds through the medium of this interesting figure, that as this ceremony had been kept in commemoration of the deliverance of that people from Egyptian bondage, so it was a type or figure of the deliverance of the soul from the bondage or thralldom of sin, which was to be kept in commemoration of its redemption through Christ, 'the wisdom and the power of God.' He further told them, 'Verily I say unto you, I will drink no more of the fruit of the vine until that day when I drink it new with you in the kingdom of God.' Thus showing them that the observance of the type was to end, that it was expedient he should go away, but giving them the blessed promise that he would appear a second time without sin unto salvation, and be with his faithful followers and disciples 'always even unto the end of the world.' Jesus commanded his disciples and the people not to 'labor for that meat which perisheth, but for that meat which endureth unto everlasting life.' 'I am that bread of life.' 'Except ye eat the flesh of the Son of Man and drink his blood, ye have no life in you. Whoso eateth my flesh and drinketh my blood hath eternal life, and I will raise him up at the last day; for my flesh is meat indeed and my blood is drink indeed. He that eateth my flesh and drinketh my blood, dwelleth in me, and I in him. As the living Father hath sent me and I live by the Father, so he that eateth me, even he shall live by me. This is that bread which came down from heaven: not as your fathers did eat manna and are dead: he that eateth of this bread shall live forever.'

"The disciples did not perceive the mystical meaning of these sayings, but the blessed Jesus did not leave them to conjecture; for when he found they were offended at what they had heard, he told them, 'It is the spirit that quickeneth, the flesh profiteth nothing; the words that I speak unto you they are spirit and they are life.' Thus showing them that under the figure of his flesh and blood, he was speaking of his spiritual manifestation, in which he will become 'Christ in us, the hope of glory,' 'the resurrection and the life.' As we are made witnesses of this resurrection, we can in truth say, 'I know that my Redeemer liveth, and because he lives I shall live also.' Then shall we know that it is his life, and not his death, that becomes a propitiation for our sins, agreeably to his own promise. 'I will give my life a ransom for many.' And as we are clothed upon with the life of Christ, we come to put on the 'new man, which after God is created in righteousness and true holiness,' and are raised above carnal performances

and dead works, to serve the living God in newness of life.

"The apostle Paul assures the believers that 'meats and drinks, and divers washings, and carnal ordinances,' were only to continue till the 'time of reformation,' and this 'time of reformation,' he says, was the coming of Christ by the establishment of a 'greater and more perfect tabernacle not made with hands,' an inward and spiritual temple, where the true worshipper might worship God, not in form and ceremony, but 'in spirit and in truth.' However this kind of worship may be overlooked or neglected, it remains to be the blessed medium through which the soul finds access to the throne of grace, and knows its communion to be with God in the 'silence of all flesh.'

"As every reformation is gradual, and as many of the early converts to Christianity had been taught from their infancy to reverence the ceremonies of the law, we cannot suppose they would at once abandon them; but as they took heed unto that light, or 'manifestation of the spirit, which is given to every one to profit withal,' their views of divine truths became clearer and clearer, till at length they considered that righteousness which stood in the observance of the ceremonies of the law as 'filthy rags.'

"Whatever may have been the practice of the apostle Paul in the beginning of his ministry, we find, thirty years after his conversion, in the maturity of his religious experience, he drew a boundary line between the dispensation of the law, and the spiritual dispensation of the new covenant, (of which the other was only as a schoolmaster to lead unto;) and in view of the sufficiency of the grace of God to bring salvation, he cautioned the Hebrews after this manner: 'Be not carried about with divers and strange doctrines; for it is a good thing that the heart be established with grace; not with meats, which have not profited them that have been occupied therein.'

"Happy would it have been for the human family had this admonition of Paul been attended to; but how soon after the days of the apostles was the sufficiency of this grace of God to effect salvation questioned, the church turned again to the weak and beggarly elements, and brought in bondage to a mercenary priesthood. The civil and ecclesiastical powers were blended; men became the advocates of Christianity, more from the pecuniary interest with which it endowed its possessor, than that love of souls which distinguished the labors of the primitive followers of Jesus. In consequence of this unhallowed union, the church lost her purity. Mystery Babylon bewitched her with love of 'filthy lucre.' The use of many carnal ordinances increased, every effort was made to cloud the simplicity of Christianity, and to render that

obscure and difficult to be understood, which was easily comprehended by the illiterate fisherman of Galilee, and which was seen in prophetic vision to be so plain, that the 'way-faring man though a fool cannot err therein.' And had not God in his mercy preserved a little remnant, who, like the seven thousand in the days of Elijah, could not bow the knee to Baal nor worship his image, the church would have become an utter desolation. But truth triumphed over error, the light of the gospel has been shining with increasing brightness, opening to the obedient soul the simplicity and purity of the religion of Jesus. Should we not then desire that the church may come still more fully out of the wilderness, and that she may indeed be clothed with the sun of righteousness, Christ Jesus? That the fulness of the gospel day may be witnessed, in which the declaration of the prophet shall be fulfilled, 'They shall teach no more every man his neighbor, and every man his brother, saying know the Lord, for all shall know me from the least to the greatest of them.' When there shall be no need to depend upon the arm of flesh, the cry of lo, here is Christ! and lo, he is there! will cease; for the Lord's children, being all taught of the Lord, will speak the same language, and mind the same thing. Then may we not hope for the coming of that day in which all the disputes and contentions which have so long distracted Christendom, and divided it into sects and parties, will be at an end, and the professors of religion be able to labor harmoniously together for the universal establishment of the Redeemer's Kingdom?

"With sincere desires for thy advancement in the knowledge of the truth as it is in Jesus,

"I am thy friend, JOHN JACKSON."

FRIENDS' INTELLIGENCER.

PHILADELPHIA, TWELFTH MONTH 15, 1866.

THE TESTIMONY TO PEACE.—To the question which has at various times been asked us, as to what course Friends are generally pursuing in relation to such of their members as have violated the discipline by "bearing arms" or engaging in "other military services," we are unable to give a full answer, or much information. Several individuals belonging to different monthly meetings have voluntarily offered acknowledgments, which have been accepted by their friends; while others have not yet seen the inconsistency of engaging in warlike measures for the preservation of the government. We feel there should be no compromise of the peace principle as inculcated

in the "sermon on the mount," and as professed by Friends since the earliest rise of the Society. The excellence and power of this principle have been manifested in a number of instances both in ancient and modern times. A striking one, familiar, no doubt, to most of our readers, is related as occurring in the early settlement of this country by the English. The natives became incensed by the aggressions of the colonists, and looked upon them as invaders of their rights and privileges; and in the blood-thirstiness of uncivilized life, doomed the white man to destruction. Although revenge is so strong a characteristic of the Indian, even he had respect for the friend of Peace. A white feather—a fitting emblem—was placed over the door of the dwelling of the non-resistant "Quaker," to protect its inmates from cruelty and death, while another, a member of the same religious body, who was found armed with a deadly weapon, fell a victim to the tomahawk.

As a Society, our adherence to the righteous testimony against war has never, perhaps, been so closely tested as within the few past years; and it is lamentable that there were so many departures from that spirit which we have held as essential to the Christian character, by which evil is to be overcome with good.

Too few are to be found among us who have not in a greater or less degree participated in some way in the fearful strife, although it may have been in a manner to make them less amenable to the letter of discipline than if they had enlisted for personal combat. Much encouragement was given our young men, probably without intending it, by the expression of sympathy and interest in the cause at issue by those who were older, and were looked upon as consistent members of our religious Society. This should be duly considered; and we feel that great leniency should be shown those who, in the ardor and inexperience of youth, with their own ideas of patriotism and loyalty, were induced to buckle on the sword, regardless of physical or moral danger. In view of what we have recently suffered in relation to this subject, we increasingly feel the importance of endeavoring to impress upon the minds of children, *very early*, the necessity of forgiving

"as we hope to be forgiven." Let us bring before them the example of Jesus, whom all Christians claim as the pattern to be followed; who, when "reviled, reviled not again," and who taught that when smitten on the one cheek we should turn the other. If the twig be bent in this direction, will not the tree have the same inclination? But if instead of this peaceful course we engender a martial spirit, by placing in the hands of the little ones the toy-drum, pistol and gun, with the tin battalion, which, though inertive in themselves, are significant of hostility and a retaliatory temper, which demands "an eye for an eye, and a tooth for a tooth," we shall surely realize the fact that, after its kind, every seed bringeth forth fruit.

May we heed the touching appeal of Him who said, "Suffer little children to come unto me, and forbid them not." The prayerful effort on the part of parents will, we believe, be blessed with the assurance that they have done what they could. It may be thought we have given rather a gloomy view of the condition of things *among us*, and we are glad to be able, through an extract from a private letter, to present a brighter picture of another part of the heritage, which, we trust, will be as gratifying to others as it has been to us.

Among Friends in these parts, the effects of the late war seem to have been rather to heighten the appreciation of the principles of peace, and to advance our important testimony upon this subject; and this valuable result has been produced, not so much by any action of Society in a Society capacity, as from the influence of the events and circumstances on the individual heart, which was, no doubt, aided by the good spirit, to draw healthful and strengthening instruction from the sad realities that were seen and experienced. There is reason to believe that we often underrate the care of the Heavenly Father, to instruct His children in righteousness, from passing events—showing the hurtful consequences of a deviation from the laws of love and virtue; and addressing to the spiritual ear the language, "Come out of Babylon my people: be not partakers of her sins, that ye receive not of her plagues."

A Friend has procured us, through the kindness of the editors of the "Daily Evening

Bulletin," permission to use a cut of the "Old Slate-roof House," which appeared recently in their own paper. This building, situated at the corner of Second and Gothic Streets, is invested with especial interest as having been the residence of William Penn, the founder and Governor of the State of Pennsylvania. The particulars respecting it are also taken from the "Bulletin."

The site has been purchased by the Corn Exchange Association of Philadelphia.

MARRIED, on the 27th of 11th mo., according to the order of the religious Society of Friends, under the care of Green Street Monthly Meeting, of which the parties are members, AARON GASKILL, son of Aaron Gaskill, and REBECCA W., daughter of Abraham W. Haines.

DIED, on the 3d of Twelfth mo., at her husband's residence, Camden, N. J., HANNAH F., wife of Wm. C. Shourds, in her 57th year, a member of Green Street Monthly Meeting.

—, on the 27th of Eleventh month, 1866, at the residence of his father, Mahlon Chandler, Sandy Spring, Md., EDWIN CHANDLER, of the city of Baltimore, in the 46th year of his age.

Friends' Fuel Association for the Poor meets this (7th day) evening, 12th mo. 15th, at 7½ o'clock, at Race Street Monthly Meeting room.

JOSEPH M. TRUMAN, Clerk.

This Association meets on the first and third 7th day evenings in each of the winter months.

The Association of Friends for the Aid and Elevation of the Freedmen meets at Green Street Meeting House, on 4th day evening, 12th mo. 19th, at 7½ o'clock. Friends interested are invited.

JACOB M. ELLIS, } Clerks.
ANNE COOPER, }

AN APPEAL.

A Colored Orphan Asylum for the State of Louisiana is much needed. A French gentleman has given \$10,000 to an Association in New Orleans for this object, provided \$20,000 additional be raised by the 1st of First month, 1867. More than half that amount has been collected. Will each reader of the *Intelligencer* contribute \$1.00 to provide a home for these friendless and destitute children? Please send it by mail to

CHAS. T. BUNTING,
116 E. Twelfth St., New York.

NEW YORK, Twelfth mo., 1866.

The Employment Society of Friends, organized since 1862, is about to resume its winter's work, and would solicit a more general co-operation in this worthy charity, the object of which is to give assistance by sewing to the industrious poor. An annual subscription of three dollars entitles a member to a weekly allowance of work for her pensioner. The made garments are returned to the Society, and if not applied for are sold for the benefit of its fund. The managers of this association desired to bring it before the notice of Friends, hoping thereby to increase the number of its members and subscribers.

ELLA T. BUNTING, Secretary,
116 E. Twelfth Street.
JANE C. RUSSELL, Treasurer,
114 E. Twelfth Street.

For Friends' Intelligencer.

THIRD ANNUAL MEETING OF THE CONTRIBUTORS TO SWARTHMORE COLLEGE.

This occasion drew together a number of Friends from different sections, including some representatives from New York and Baltimore.

The report of the Board of Managers, which will be published with the Proceedings in pamphlet form, gave a favorable view of the progress of the building, about one-third of which is now being roofed in, while the foundation of the whole is completed and the first floor of joist laid.

A drawing of the building, as now fully agreed upon, with the French or Mansard roof, was exhibited, and called forth general commendation, as an improvement upon the former plan both in the appearance and in the amount of accommodation, at about the same cost of labor and material.

The expense of building has thus far fallen below the estimate, though it is evident that the completion of the entire structure will tax to the utmost the energies of those engaged in the work of obtaining the means.

The amount of money thus far subscribed has reached \$130,000. The farm, its improvements and stock have cost \$24,000; other expenses since the origin of the Association, \$3,500. The remainder will be nearly consumed in enclosing the entire building, while for completing it, fully \$60,000 more will be required, exclusive of arrangements for heating and lighting it, of fitting up the laundry, and of furnishing and supplying apparatus for instruction.

The additional funds required to be raised

to put the whole establishment in working order will reach an aggregate of \$100,000,—a sum which, although it appears large, is less than what has already been accomplished, when the subject was comparatively new to the great body of Friends, and when money was less plentiful than it is now.

An impression was alluded to, as being entertained by some, that this work was being carried on extravagantly, and on a scale not warranted by the necessities of the case; but it is the opinion of those who have the best opportunity of knowing that it is far otherwise. Considering the greatly enhanced prices of material and labor, the cost of construction is remarkably low, and when finished, the capacity of the building will, it is believed, be found below the requirements of society. It was the desire of the Board to have reached the conclusion at this time to open the preparatory department in the portion of the building now erected, next fall, but in view of their contracts to complete the walls of the whole structure, the funds in hand will not justify this, and it was resolved to postpone it, unless the results of this winter's canvass for subscriptions should make it practicable.

The subjects of the organization of the School, the selection of teachers and the arrangement of the course of study, have all received attention, and nothing is in the way of a commencement but the want of money. To secure this, a committee which was appointed a year ago was encouraged to add to its number from within the limits of Philadelphia Yearly Meeting, and to proceed with renewed activity in this indispensable part of the work.

THE OLD "SLATE-ROOF HOUSE."

From the Daily Evening Bulletin.

The last few architectural relics of the days of William Penn, in Philadelphia, are gradually disappearing. We know of but three that still remain: The "Swedes' Church, in Southwark," a relic of the days when the Swedes pushed

their settlements up the Delaware from Christians, in Delaware, and being contemporary with the English "Friends" who came hither under cover of the authority of the Duke of York, afterwards James II., of kicked-out memory. Then, there is the old Letitia House, on Letitia street, between Chestnut and Market,

and Front and Second streets. The latter was built, as our chroniclers tell us, for the daughter of the Quaker Founder of the State and city, was occupied by Penn himself, and was located upon a court that was named in honor of the lady for whose use the house was built. Tradition tells of how the cottage of the heiress of the Penn honors and estates was built with a view to a lookout upon the Delaware, and to the convenience of certain green lanes reaching to the "great meeting house," the Court House, &c., at Second and Market streets; but time has changed all that, and if Letitia Penn could reassume the flesh and revisit the neighborhood of her old home, in the year of grace 1866, she would find the lingering odors of defunct Market houses, with the present realities of big and little stores, lager beer saloons, crowded wharves, and stir and excitement generally, sufficient to scatter to the winds all ideas of the fulfilment of her illustrious father's pet plan of a "greene cuntrye towne" with a sylvan retreat for his daughter.

The "Old Slate-Roof House."

Third in our list of architectural relics of the days of the Founder, comes the "Old Slate-Roof House," at the corner of Second and Gothic streets, formerly Norris' alley. The name of the thoroughfare last named was changed a few years since, under our reformed street nomenclature; but we protest against the name of "Gothic." What fitness there is in the name of "Gothic" in such a locality, passes our understanding.

The old house, one of the only two still standing in which William Penn ever set foot in Philadelphia, "is tottering to its fall." It has long since outlived its usefulness, and it has stood in the way of the progress of the locality in which it stands, and whether rightfully or wrongfully, reverently or irreverently, its doom is sealed, and it must, within a few weeks, come down, to make way for the nineteenth century, and for the Corn Exchange Association.

History of the Old Mansion.

Few buildings in Philadelphia have more interesting historical associations clustering around them than the primitive structure, the past condition of which we illustrate in our columns to-day. The State House and Carpenter's Hall commend themselves to notice, from the fact that the Continental Congress first assembled within their walls, and that events of great historical importance, and of vast interest to the cause of liberty and humanity, occurred within their precincts. But the Slate-Roof House is a type of a much earlier period of the history of the city, and was a prominent feature of an exceedingly interesting era nearly a century prior to the events which gave importance to the sacred spots reverently preserved as the places

where the patriots of the revolution first met to deliberate upon the great events which marked that period.

The house was built before the close of the seventeenth century, by Samuel Carpenter, a wealthy Friend, who was conspicuous among the first citizens of Philadelphia for his enterprise and public spirit. We have no means of knowing whether Mr. Carpenter resided in the building after its completion, but judging from the fact that it would have been difficult at that early day to rent so *splendid* a mansion to advantage, it is probable it was intended for his own residence.

On the second visit of Wm. Penn to his infant city, in 1699, the slate-roof house was taken possession of by him, for his quarters, and he remained there during his stay upon this side of the Atlantic. The house was noted at that time as the finest in the town, and, as the residence of the Governor, it was an object of no little interest, and the scene of many important events.

In September, 1701, Wm. Penn, in obedience to the wish of his home-sick wife, and despite the conviction that his interests would be promoted by remaining in the colony, left his slate-roof house and started in the good ship Messenger for England, taking with him his infant son John, who was the first and only scion of the house ever born in America. John Penn was born soon after the arrival of his parents in Philadelphia, and first saw the light in the Slate-Roof House.

After Penn's departure, James Logan continued the mansion as the government house until 1704, when the public concerns were cared for at Clark's Hall, at Third and Chestnut streets. The tide of business and fashion was then beginning to move westward, and the latter had already ventured out as far as Third street and Chestnut street. It was many years after that time, however, before dwellings were numerous as far out as Third street.

Before the removal of James Logan from the Slate-Roof House, the property had been sold to Wm. Trent, the founder of Trenton, N. J., for the sum of £850, Pennsylvania currency, less than \$2,300. In addition to the present building there was then a fine garden, extending nearly to Front street on the east, and down Second street nearly to Walnut. It was filled with fine pines and shrubbery. This beautiful garden, through which the leading men of the early days of the colony wandered so often, is now covered with shops and lumber.

In 1702 Lord Cornbury, then Governor of New York and New Jersey, was invited to Philadelphia by James Logan, and entertained in splendid style at the Slate-Roof House. The distinguished guest was accompanied by a retinue of nearly thirty persons.

In 1709 the house was sold by William Trent to Isaac Norris, the great grandfather of Miss Sally Norris Dickinson, the late owner. This circumstance was a source of great annoyance to the Governor's friend, Logan, who wrote to Penn, saying, in reference to the house, "I wish it could be made thine, as nothing in this town is so well fitting a Governor."

For a long period preceding the Revolution the Slate-Roof House was occupied as a first-class boarding-house, and many persons of high distinction made their homes within its walls.

In 1764 the property was leased to the widow Graydon, and a humorous description of many of the persons who lodged there, as well as some account of the house itself, is furnished by Captain Graydon, the son of the proprietress, in his entertaining "memoirs." The Captain describes the house as "a singular, old-fashioned structure, laid out in the style of a fortification, with abundance of angles, both salient and re-entering. Its two wings projected to the street in the manner of bastions, to which the main building, retreating from sixteen to eighteen feet, served for a curtain."

This description will be found to compare accurately with our picture of the original condition of the building. Graydon gives a most entertaining account of the persons who lodged at the old house during the time it was occupied by his mother. Among other guests the names of Washington, Hancock and the elder Adams are mentioned.

Soon after the period of the Revolution, the Slate-Roof House lost its *prestige*. The march of improvement left the ancient mansion in the back ground; it speedily fell from its high estate and became insignificant in contrast with many of the mansions of the rising city. Its various apartments were rented out to different tenants, and these were not at all times of the most respectable class of society. The court-yard in front was filled up with the miserable wooden structures which still disfigure it, and the northern wing was converted into a shop long since. The slate-roof, which was its distinguishing mark, disappeared many years ago, and wooden shingles have taken its place upon the ancient rafters. The old building has, in fact, been tottering to its final fall for half a century or more.

The ancient structure has a world of interesting reminiscences clustering about it. As the city residence of the first Governor and proprietor of the State, it would command attention and excite an interest which would strengthen as its age grew greater, and its contrast with surrounding structures become more marked could it remain intact; but the necessities of the times demand its removal, and the doom of

anything that stands in the way of progress is sooner or later fixed in this utilitarian age.

The Corn Exchange Association, with characteristic liberality, proposed to give the building to the city, with a view to its translation as a whole to Fairmount Park, or to some other spot where it could be preserved as a relic of the infant Philadelphia. The Mayor and the City Councils have duly considered the matter, and consulted skilful architects, and the decision arrived at is, that the shaky old structure can neither be removed bodily, nor taken to pieces and transferred piecemeal, with a view to its reconstruction. So the old Slate-Roof House is doomed to disintegration and annihilation.

"BEAR YE ONE ANOTHER'S BURDENS."

Let us bear each other's burdens,

Aid each other while we may;

Every little act of kindness

Helps to smooth the onward way.

Cheering words, when rightly given,

Brighten earth with smiles of Heaven.

Though the deed seem poor and trifling,

Its effect we may not tell:

Is there little in our power?

"Let us do the little well."

For each loving duty willing,

Thus the "Law of Christ" fulfilling.

THE LOSS OF THE STEAMSHIP "LONDON."

(BY ONE OF THE SURVIVORS.)

(Continued from page 640.)

I saw distinctly Mr. Angel still by the pumps; many with their eyes turned towards us. The foresail was still standing, also the half of the maintopsail. The mizzen yards were swinging about, not braced; the wreck of the foretopmast still hanging, and swinging to and fro; the gangways knocked out, the bulwarks all standing as good as when she left the docks. The stern very low in the water, the bows pretty well out of it, so that we could see the red painted bottom, or colored iron by rust; the jib boom gone. Soon we ran down in the trough of a large sea, and were hid from sight of her. When we came up we could see she had changed her position very much; we could not see the after part of the vessel—whether under water or hid by a sea, I cannot tell; her bows were high up out of the water, and by the pitch or rake of the mast we could see that she was sitting at an angle of about 45 degrees. Soon another wave came, and we ran down in the trough of another sea; when we came up, there was nothing to be seen of the *London*.

Thus ended this fine ship and all in her. When we were lifted on the wave this second time, and found that the ship was no more to be seen, it cast a gloom over our little party, though pretty well prepared to expect it. We still continued looking in the direction where we last saw the ship, to see if anybody would be

seen clinging to a spar, boat, or anything; but nothing whatever was to be seen. Although there might have been one or more there, and we not able to see, even so they could not have survived long from the spray that was flying.

One of the sailors (King)—then I did not know the name of any—now sang out, "Boys, the *London* is gone, and there is no help for those gone with her, so let her drop for the present. If we don't mind what we are about, we'll soon be with them. Say nothing more about her, but attend to the boat"—which was certainly a wise proposition, as our boat was in a similar condition to our ship at starting—too heavily laden. She was a fine, light, square-sterned boat, about twenty-five feet in length, six in breadth in the widest part; her right complement I was told was twelve, and there were now nineteen in her. Our party consisted of three engineers, one fireman, one young midshipman, one carpenter, eight seamen, one steward, one boy, and three passengers. We had been thrown together mostly by chance, and were almost all unknown to each other, but all bound together by the same tie; for if one sunk all must sink too. We were entirely on our own resources, with no one to look up to, no captain to depend upon, and no officers to navigate to land. But we had what was far better, and the only thing to save us at that time: we had cool, skilful, and excellent boatmen; and, had we not, we would not have lived half-an-hour. I never had much experience in boats, and had no idea of what they could go through. No one could ever have made me believe that a boat could have withstood what ours did. I think some of our men must have been born and reared in a boat. Smith, a seaman, was the first who took the helm, and we all agreed to obey him, as there were now a good many giving orders. There were also other arrangements made: those who understood rowing were to work by spells, those who did not were to bail. I was one of the latter; two or three were to be on the look-out for vessels, one to be constantly watching behind to see when a wave was coming that had a crest on it, and tell the helmsman. Those were the waves we dreaded. And here was where the skill and judgment was displayed. One time we would have to back water so as to let the large sea break just in front of us. At other times the order would be pull quick, to get out of its way until its force would be spent; when along it would come and raise us up on the top, and as it would pass by would invariably give us a dash; then we had to bail out quickly. Three oars were out for the first few hours—as much to assist in steering as in pulling. We were running before the wind, and the chief study was to let the seas meet us square on to the stern, for if the boat was allowed to

broach to, or meet the seas on the side, she would fill or upset at once. As one sea would pass, then another would be seen coming from another direction, perhaps on our quarter. These were the cross seas, and the ones most likely to catch us; immediately the boat would have to be brought round to meet it. As the rudder could not bring her round in time, or it might be up out of the water at that moment, then would be heard the man at the helm singing out, "Pull on the starboard, and back on the port,—quick, quick." The next moment it would be, "Pull on the port, and back on the starboard," as a cross sea would be seen making for us. Then the next cry would be, "Pull, pull, all," that was to get out of the way of a sea that was going to break. After it had passed, then it would be, "Back, back, all." Sometimes all four orders would be given within the minute.

We also made arrangements as to the provisions, which consisted of about fifty pounds of biscuit; when anybody took a piece, all were to have alike. Soon we discovered that our little supply of water was mixed with salt. The cask was therefore thrown overboard to make more room, for we were very much crowded. After that the allowance of biscuit was restricted—they being so dry increased our thirst. Not long after getting away I learned that they had some brandy on board, which I thought was a fortunate provision, as the weather was dreadfully cold, with water splashing over us every little while. On second thought I feared it might prove to our disadvantage, in case they should take too much at once, but my fears were soon set to rights when I found that all we had was three bottles. One was out and dispatched, but it was only a mouthful to each. The second bottle was drank in the evening. The next morning, when we most wanted the other, it could not be found. There was also one bottle of champagne, which was the amount of drinkables on board. About two or three hours after being at sea, our helmsman had to resign his post, as one of his hands was sore, or frost-bitten, as he thought. Steering was most trying work for the hands, there being no tiller to the rudder—he had to work the rudder by his hand, consequently one hand was almost all the time in water. King, another seaman, then took his place, which he kept until about three o'clock next morning. Just before dark, we sighted a vessel. We at first thought to run for her, but soon we found it impossible; she was out of our track, and we had to keep fair before the wind. Our chief study was to keep afloat, no matter where we went to. We had two of the ship's compasses on board, but they proved of very little use to us. I heard King say in the night that he could not steer at all by them, even though the sea would per-

mit us. They had been adjusted for an iron vessel, which may have been the cause of their not working properly now.

Night was now coming on : I dreaded to look forward to it. Asked myself the question, how are we to see those curling seas that we so much fear? The sky looked wild; the wind still strong and very cold—the seas still very heavy. It was what you might call a troubled sea. All of us wet, cold, and hungry, and nearly worn out by the constant exertion anxiety and fatigue of the two previous days. I considered it about one chance in a hundred that ever we saw the morning. True, I was beginning to have more faith in our little boat and the good skill of our crew, but those high crested waves in the dark rather shook my hopes. I could not see any possible way of escaping them, and I was rather puzzled to see that the sailors did not entertain any more fear of them in the night than day—that is, they did not speak of this great difficulty that troubled me. Presently the night closed in, and the mystery was solved by the phosphorescent tops of the waves, which, shining through the dark, showed pretty well their position, and the way they were coming. The first of the evening was rather clear; the stars shone out occasionally; by them we could guess pretty nearly the direction we were steering. Up to about nine, we thought we were going south. I said to King, “At this course we will not fetch the Spanish coast, much less the French coast—we shall go wide of Cape Finisterre.” He said, “I can’t help it, we must go where we are compelled to—the wind may change soon.” And so it did. I had certain stars as guides, and by them I could see we were coming around gradually, and by about midnight were going pretty nearly east. We knew that any course that had east in it would bring us to land, which at this time we thought was only ninety miles distant. But our chief hope was in falling in with a vessel. As the evening wore on, I found that we got on pretty nearly as well as before dark, but great watchfulness was required; and King, who was then steering, was continually singing out to pull first one way, then immediately the other way, or back water. Then the next order would be, “Bail her out, keep her dry. Who is bailing now?” So in that way he was constantly talking and encouraging us, which was needed, for, cold as the night was, and drenched as we were, we were droway; in fact, we were quite done up with fatigue. I myself had had but three or four hours’ sleep since Sunday night, and no doubt there were others who had no more. At times, while baling, I would be half asleep, but still dipping out the water. When in that state I could always see a vessel before me with her stern under water—her bows well up

—her jib-boom and foretopmast gone, and her foressail shaking in the wind: it was the *London* as she last appeared to me. At any time during the night if I were to close my eyes, if only for a minute, the ship was always before me in this form.

A few hours after dark, King asked, “Who had the time?” I had. I had set my watch going at four o’clock. I pulled it out to look, but could not distinguish the hands in the darkness. By-and-by, I was asked about the time again; we thought it must be getting on towards daylight. I opened my watch, felt the hands, and found it was only eleven o’clock. And so the long dreary night wore slowly on. We thought daylight would never come.

About midnight the weather became more squally. Heavy black clouds came down upon us, and sometimes we were running, as it seemed, right into a black wall. It was difficult even to discern the figure of a man sitting alongside. It was a night remembered in London for a heavy fall of snow,—the heaviest of the season, when the telegraph wires were broken down in many parts of England, and vessels were being wrecked by scores in Torbay. About this time, and a time that will never be forgotten by any in the boat, we experienced the most narrow escape of any during the whole of our disaster. A large sea was seen close behind us, and on the point of breaking, and it was impossible to get out of the way in time. There it was, eight or ten feet higher than our stern, and the next moment we should be all engulfed. Some quietly remarked,—“It’s all over with us now.” I myself thought the end had come at last. ~~One~~ came the wave, burying the after part of the boat completely. She trembled, and up she came; the sea had passed on and left us in all but a sinking state. The water in the boat was about a foot and a half deep; a bucket would dip in it. Immediately King sung out, “Dont move—bail out quick—we are safe yet!” At once the bucket was going, and in a few minutes she was lightened, and on we went again. It was sometime before we fully recovered from that shock. It was a providential thing that we had no more in our boat at this time, for I think the weight of one man more would have taken us down.

(To be continued.)

“*Call upon Me in the day of trouble.*”—Be-ware, in your distress, of crooked policy, of unlawful means of relief, of impatience, of dejection. By nothing can you so much please God, as by your confidence in Him; and by nothing can you so recommend your religion, as by showing the peace of God, which passeth all understanding.

For Friends' Intelligence.
REVIEW OF THE WEATHER, &c.
 ELEVENTH MONTH.

	1865.	1866.
Rain during some portion of the 24 hours,	7 days.	5 days.
Rain all or nearly all day,...	2 "	1 "
Snow, including very slight falls,	2 "	2 "
Cloudy, without storms,	3 "	6 "
Clear, as ordinarily accepted	16 "	16 "
	30 "	30 "
TEMPERATURE, RAIN, DEATHS, &c.	1865	1866.
Mean temperature of 11th month per Penna. Hospital,	45.35 deg.	48.08 deg.
Highest do. during month	67.00 "	69.00 "
Lowest do. do. do.	28.50 "	29.50 "
Rain during the month,	3.96 in.	1.76 in.
Deaths during the month, being for 4 current weeks for each year,	1042	1091

Average of the mean temperature of 11th month for the past <i>seventy-seven</i> years	43.29 deg.
Highest mean of do. during that entire period, 1849,	50.50 "
Lowest do. do. 1793, 1827, 1842	38.00 "

FALL TEMPERATURES.	
Mean temperature of the three Fall mos. of 1864 and 1865,	57.63 deg.
Mean do do do do	
months of 1865 and 1866,	58.61 "
Average of the Fall temperature for the past <i>seventy-seven</i> years,	54.69 "
Highest Fall mean occurring during that entire period, 1850,	58.16 "
Lowest do. do. do. 1827	49.33 "

COMPARISON OF RAIN.	1865.	1866.
First month,	3.61 inch.	3.14 inch.
Second month,	5.83 "	6.61 "
Third month,	4.71 "	2.15 "
Fourth month,	2.83 "	2.93 "
Fifth month,	7.21 "	4.68 "
Sixth month,	4.75 "	2.96 "
Totals for the first six mos. of each year,	28.94 "	22.47 "
Seventh month,	2.97 "	2.52 "
Eighth month,	3.75 "	2.18 "
Ninth month,	7.96 "	8.70 "
Tenth month,	3.05 "	4.15 "
Eleventh month,	3.96 "	1.76 "
Totals,	50.63 "	41.78 "

It will be seen from the above that the temperatures throughout have been in *excess* of last year, in fact, not very far, in all their points, from the *highest* that have occurred during the past *seventy-seven* years. The number of deaths, it will also be seen, are but *little* in excess of last year.

Philada., 12th mo. 3d, 1866.

We are to be in the world, but not of it. The religion of the Gospel calls us both out of the world, and into the world; out of the

world as to its maxims and temper, into it as a field of labor and a sphere of usefulness. When Calvin was requested to leave off writing, "What," said he, "shall the Master come and find me doing nothing?" And Philip Henry's remark was, "What are candles for, but to burn out."

The Treasurer of Friends' Association for the Aid and Elevation of the Freedmen has received the following amounts since last report:—

Philada., 12th mo. 8th, 1866.

ITEMS.

Advices have been received from England to the effect that Minister Adams had renewed our demands upon the British Government for a speedy settlement of the claims for indemnity growing out of the depredations of rebel privateers. It is stated from England that a meeting of the British Cabinet will soon be held, when the case will receive respectful consideration. It is certain that the present British Ministry is actuated by a kinder feeling toward these claims than was the former one.

THE PARIS EXHIBITION.—The Imperial Commission has divided the contents of the coming Exhibition under ten general heads or groups. "The first group, that of works of art, is divided into five classes, namely, oil paintings, drawings, sculpture and dis-sinking, architecture and engraving and lithography.

"The second group comprises the materials and the applications of the liberal arts, as printing, paper making, bookbinding, colors, industrial design, photography, musical instruments, medical, scientific, and educational apparatus and instruments, maps and charts. Group three comprehends furniture and other objects connected with habitation; as furniture, properly so-called, upholstery, decoration, glass, porcelain and other pottery, carpets and other tissues, paper hangings, cutlery, jewelry, artistic bronzes and metal works, clock and watchmaking, heating, lighting and ventilation, perfumery and small-ware. The fourth group includes fabrics, clothing and all other objects of personal wear or use, beginning with cotton, woollen and silk manufactures, and ending with dolls and toys.

"The fifth group is entitled 'Productions, raw, or prepared, of extractive industry,' and includes mining and metallurgy, as well as the productions of the forest, the chase, and of agriculture, chemical and pharmaceutical products, leather and skin manufactures. Group six comprises the instruments and processes of the common arts, the means in fact of working and manufacturing the objects of the preceding group, with railways, civil engineering and navigation. Group the seventh includes articles of food and consumption, whether raw, preserved, partly prepared or cooked, including drinks of all kinds; group the eighth, living animals reared for the use or amusement of man; group the ninth, horticulture; and group ten, objects specially exhibited with a view to the amelioration of the moral and physical condition of the people.

"The last group forms of itself a general economic exhibition, as regards education, food, clothing and other necessities of life, and also includes costumes worn by the people of various countries, specimens of habitations, and the tools and processes in use by small masters, workmen engaged working at home on their own account."

The second session of the 39th Congress convened on the 3d inst. The President's Message was read in both Houses. In the Senate a bill was introduced for the admission of Nebraska into the Union, and was referred to the Committee on Territories. The joint resolution for the amendment to the Constitution, making the President of the United States ineligible for re-election, was taken up and referred to the appropriate committee. Various other bills and resolutions were offered and referred to committees. A bill was introduced and referred providing for the election of a delegate to Congress from the District of Columbia. The bill provides for impartial suffrage. A resolution was adopted ordering inquiry to be made as to the power of the President to restore confiscated property, and also as to the power of the Secretary of the Treasury to deliver, without judicial proceedings, to private claimants, property or proceeds of property seized by the United States.

HOUSE.—A rule was adopted for a standing committee of nine on freedmen's affairs. Various department and subordinate reports were presented. The Ways and Means Committee were instructed to inquire and report whether the repeal of the tax on cotton would not be beneficial to the interests of the country. A resolution was adopted declaring as the sense of the House, in answer to the President's message, that it finds in the disloyal attitude of the South, and the results of the elections in the North, additional reasons for the adoption of the Constitutional amendment before it will consider the propriety of giving them Congressional representation. A motion to lay on the table was lost—yeas 32, nays 119. A resolution was adopted for the investigation of the New Orleans massacre by a committee to be appointed by the speaker. A resolution was adopted directing the Committee on the Judiciary to inquire into the expediency of providing a law to more perfectly provide for the punishment of bribery at elections, and to make any person who shall be found guilty of purchasing votes ineligible to office.

THE FREEDMEN.—There are about 150,000 Freedmen, women and children attending school in the Southern States.

The Bureau superintendent of education in Georgia, in his report for 10th month, reckons the number of schools at 48, teachers 63, and pupils 2,755. Thirty-four of these schools and 1,163 pupils are sustained entirely by the freedmen; the rest by the benevolence of the North. Twenty-three of the teachers are colored, for the most part very imperfectly qualified. The contributions of the freedmen during the 10th mo. reached \$1,000.

Several outrages have been recently perpetrated upon the inoffensive freedmen residing in Fairfax County, Va. Two poor colored men were badly beaten near the Chain Bridge, and although a warrant was issued, it has not been served; religious meetings held in the house of a freedman at Langley have been disturbed; colored pupils of the night school at Great Falls have been attacked and injured; the school-house at Lewinville has been greatly damaged, and the one near Frying-Pan church and Herndon Station burned to the ground. The authorities apparently make no attempt to arrest the miscreants.

THE STUDY OF LANGUAGE AS A MEANS OF MENTAL CULTURE.

*A Lecture delivered before Friends' Social Lyceum,
Philadelphia, by EDWARD H. MACILL.*

(Concluded from page 644.)

No course of training could be devised better adapted to cultivate a taste for general literature than that of keeping up a constant comparison between the ancient and modern writers, and pointing out from time to time how far the latter are indebted to the former for many of their best thoughts, and even for the language in which those thoughts are clothed. Indeed, all the works of the greatest writers of our own and every other age so abound in allusions, direct and indirect, to the works of others, that all literature may be said to be relative, and a thorough understanding of any demands a familiarity with all. No course of instruction in ancient or modern language is complete or desirable which does not early awaken the mind of the pupil to this important fact, and, by this constant comparison, stimulate him to enrich and enlarge his mind by daily increasing familiarity with the works of the great and the good of all ages.

I have said that the peculiar nature of the discipline acquired in the study of language is especially adapted to prepare one for the practical duties of after life. The rival claims of the mathematics, as a means to this end, should receive a passing notice, although, as I stated in the outset, I do not wish to hold up for in-

vidious comparison any one course of training to the exclusion of all others. However, as the claims of mathematical studies have been put forward very prominently by others, in recent discussions upon this subject, even to the exclusion of linguistic studies, or reducing them to a subordinate position, I cannot forbear quoting the words of Professor Pillans, of Edinburgh, upon this point. He says, "It is a great mistake to suppose that the mere mathematician, from being accustomed to the long and beautiful deductions of his favorite science, is a better reasoner, or less liable to error than other men, in all matters that lie beyond the mathematical pale." On the contrary, it is notorious, that the more profound he is in his own science, and the more devoted to it, the less is he fitted for the investigation of truth in every other direction, and the more liable to be imposed upon by false reasoning, and led astray by specious views in the commerce and intercourse with the world; for, as Dugald Stewart observes,—and that beautiful writer on metaphysics and morals was himself an able mathematician,—"It unfortunately happens, that while mathematical studies exercise the faculty of reasoning or deduction, they give no employment to the other powers of the understanding concerned in the investigation of truth. On the contrary, they are apt to produce a facility in the admission of data, and a circumscription of the field of investigation, by partial and arbitrary definitions." In the study,

of language the mind is constantly occupied in balancing probabilities, as in the reasoning processes required in ordinary human affairs; while the absolute certainty of the conclusions following, admitted premises in mathematical reasoning, rarely finds a counterpart in actual life. In unraveling the intricacies of a long and involved sentence in Cicero or Livy, where the most closely connected parts are often far removed from each other, and the subordinate divisions of the sentence are ingeniously enfolded within other subordinate parts, the whole forming a sentence closely connected in thought with what precedes and follows, reason, observation and judgment are constantly called into action, in deciding the various relations of the words and clauses to each other, and of the whole sentence to the general course of thought; and a fine opportunity is afforded for the play of the imagination and fancy, in the selection of the most appropriate English dress, in which to clothe the thought when fully eliminated by the exercise of the other faculties. This is not, with the classical student, any unusual or irregular exercise, but forms the staple of his daily work. Who does not see that a course like this, pursued for a series of years, properly interspersed with other studies, (for ours, it will be borne in mind, is no *exclusive* claim,) cannot fail to have upon the youthful mind the most salutary effect, and that the Professors of language, devoted as they are to those studies, which are so especially adapted to the needs of the human mind, are not inaptly styled, in the Scottish Universities, Professors of the Humanities.

Intimately connected with the work of oral translation, and an essential part in every well-digested system of classical instruction, are written translations into English of some of the choice passages which have been the subjects of the daily recitations. If the student is encouraged, in these translations, to avoid the bald and literal rendering which the rigid analysis of the ordinary lesson would require, and to express the *exact thought* of the author without regard to the *form* in which that thought is expressed by him, (so far, at least, as it is possible to separate thought from the form in which it is expressed,) that is, to present the thought in the most approved modern dress, free from every blemish of antiquated style or of foreign idiom, it becomes a most valuable training in the proper use of his own language. What better training than this can be conceived for the future poet, orator, or historian, or even for those in the humblest private walks of life, who have thoughts to clothe, in words wherewith, to instruct and influence their fellow men—and who have not? Says a modern journalist, in a highly appreciative criticism of the poet Longfellow, "En-

dowed with a remarkable command of, and exquisite taste in language, he began his poetical education by rendering, not only with accuracy, but the most delicate analogy, German, Spanish, French and Italian verse into English. There is no exercise of the mind which so finely trains expression as such a work as this. Intimate acquaintance with the subtile eloquence and expressive significance of foreign tongues gives an insight and grasp as regards the vernacular. Thus, by experience and endowment, taste and mastery, Longfellow is a verbal artist. Words are to him what colors are to the painter; he has an exquisite sense of their fitness, a keen ear for their music. Thus furnished with the vocabulary of his art, and fastidious in its use, the love of beauty, the sense of the appropriate, methodize expression. As a mosaic worker carefully selects his tinted cube, and places it with exquisite fastidious skill, so, as to produce the desired form, shade and combination, until a saintly face or lovely flower of adamantine hue rewards his patient toil, so gracefully adjusted and wisely chosen, the words of the poet are combined into images of picturesque or plaintive relief and permanent grace."

Now, although the course above indicated is of the utmost value as a training in English, and cannot be omitted or lightly passed over without great disadvantage to the student, it must not, however, be allowed to encroach upon the more literal version, required in his daily work, for the twofold reason, that the construction of the language will be likely, in that case, to be overlooked, and the peculiar forms and idioms which, when properly studied, form so interesting and valuable a feature in the acquisition of any language, and which so often indicate the character of a people, are wholly lost. Thus, to make my meaning clear, let me borrow an illustration from the poems of the Sealdic bards. If, in translating the highly figurative language of these bards, we render "the beast of the sea" by the more homely, but more intelligible word, "ship," "the dew of pain," or "the water of the sword," by "blood," "the tree of battle" by "warrior," and "the flame of wounds" by "sword," we shall certainly, in every instance, come nearer a plain English translation of the passages in question, but we should fail, wholly, not merely to give the proper construction of the passages, which would, perhaps, be a minor consideration, but fail, as well, to convey any idea of the highly imaginative character of the people.

As no language is properly taught unless a comparison be constantly instituted between that language and the student's mother tongue, both as to the forms of words, the syntactical structure of the language, and parallel passages in the literature of the two, so a constant

comparison should be made between the Latin and Greek, and between these and whatever modern languages may claim the student's attention. For, although the derivation of the Latin from the Greek is an idea long since abandoned, and even the common derivation of both from the Sanskrit is most emphatically denied by Max Muller, the three languages being regarded by him rather in the light of three sisters, of which the Sanskrit may be considered the eldest, all pointing back to some earlier stage, when they were more similar to each other than we find them now, everything beyond this being, *as yet*, involved in profound obscurity; still this comparison of two kindred ancient tongues, without directly deriving one from the other, or even deciding which is the elder, is an essential aid in the acquisition of both. And the comparison of the Latin with the Romance Languages of modern Europe, which are directly derived, not it is true, wholly or chiefly from the classical Latin, as written and spoken by Cicero, but from the various dialects of ancient Italy, this comparison of the various modern languages with the original whence they are directly or indirectly derived, presents advantages in the acquisition of modern tongues; which may be appreciated from the fact, that on two pages of simple conversational French, which I took up at random to examine, for the purpose of this illustration, I find 200 different roots, and of the first 100, 96 are directly and readily traceable to their Latin originals, while of the second 100, every root may be thus traced. These are fair specimen pages of easy conversational French; and I hazard nothing in reaffirming the statement of Gibson, in his work published thirty years since, when the science of Comparative Philology was yet in its infancy, that "ninety-nine French words out of every one hundred are of Latin origin." If the study of language be conducted upon this principle, each new language acquired is an additional facility toward the acquisition of another, and to the industrious and faithful student, portal after portal will open, with constantly increasing rapidity, until the glorious temple of the science of Language, which involves in its wonderful revelations the history of the race, lies invitingly open, bidding him enter in.

Nor should he who thus devotes his life to the acquisition of foreign tongues, and the study of Comparative Philology, be stigmatized as a student of *words*,—mere *words*; for, in the language of Marsh, in the introduction to his excellent course of "Lectures on the English Language," "So necessary are *words* to thought, to reflection, to the memory of former states of self-conscious being, that, though the intelligence of persons born without the sense of hearing sometimes receives, through the

medium of manual signs, and without instruction in *words*, a very considerable degree of apparent culture, yet, when deaf mutes are educated and taught the use of verbal language, they are generally almost wholly unable to recall their mental status at earlier periods; and, so far as we are able to judge, they appear to have been previously devoid of those conceptions which we acquire, or at least retain and express, by means of general terms. So our recollection of moments of intense pain or pleasure, moral or physical, is dim and undefined. Grief, too big for words, joy, which finds no articulate voice for utterance, sensations too acute for description, when once their cause is removed, or when time has abated their keenness, leave traces *deep* indeed in *tone*, but too *shadowy* in *outline*, to be capable of distinct reproduction; for that alone which is precisely formulated can be clearly remembered."

You will pardon this long quotation, for it conveys most happily the exact thought which I wished to utter, and which I should vainly attempt to express as well. Let no one think to cast a stigma upon the studies of the philologist by accusing him of being a student of *mere words*. Mere words, indeed! and what is more noble and more worthy of our regard than the study of the various symbols of thought, and the changes wrought upon those symbols in the lapse of ages through various external circumstances and the steady progress of the human mind. Where shall we seek for a more ennobling and refining study than that which brings us into daily contact with the choice spirits of every age, and which places in our hand the *open sesame* to a richer mine of treasures than gold or silver can ever buy? Mere words, indeed! and what were the noble examples of the heroes and martyrs of other days to us of the present generation;—what would become of all the rich stores of history, which Bolingbroke has so felicitously characterized as "Philosophy Teaching by Example,"—aye, of the very teaching of the founder of Christianity himself,—but for the conservative power of written words. Mere words, indeed! as well stigmatize the acquisition of all knowledge as worse than useless, as thus attempt to cast reproach upon the study of the history and power of words. So great, indeed, is the influence of words upon human thought and action, that it is scarcely hyperbolic to say, that *words* are *realities*, no less than *deeds*. Who shall set a limit to the influence, for good or evil, of one written or spoken word?

If the careful study and classification of the bones of extinct species of animals is worthy the attention of the naturalist,—and who will presume to deny that this or any other study by which we increase our knowledge of the creatures of God's universe, and of the various

stages of development through which our earth has passed, is unworthy of our regard,—how much more worthy of profound study are the fragments of a lost language, the bones and framework of what has once been human speech? I listened with the deepest interest to a lecture by Agassiz on the Glacial Theory, on the eve of his departure upon his great exploring expedition to South America, and to his first lecture in Boston after his return, describing the waters of the Amazon; and as I followed the wonderful deductions of this Prince of Naturalists, by which the most astonishing conclusions were reached, step by step, from premises at first sight so apparently insignificant that it seemed impossible that they could be made the groundwork of any important theory, as in his first lecture he evolved, by clearly defined steps, his Glacial Theory, from the carefully observed scratches upon the surfaces of rocks, and from the great boulders deposited in various parts of the world, amid rocks of a totally different formation, indicating the gradual progress of immense fields of ice from the higher or polar regions towards the equatorial, I could not fail to remember how the patient investigations of Philologists had enabled them to trace, not merely the movement of great bodies of ice from north to south, but the various migrations of tribes and nations from east to west, from Asia to northern and afterwards to southern Europe, and how the history of our tongue, and of all the Teutonic stock to which it more especially belongs, and that of the softer and more harmonious tongues of Southern Europe, may thus be traced back, with unerring precision, to a time when, in the farthest east, in the early home of the human race, all were really one family, of one language and one speech. When I listened to his wonderful account of the Amazon and its tributary waters, and of the various kinds of fishes which inhabit that marvellous stream, and to the account of the labors of this indefatigable student of nature during the past year, resulting in the enriching of the domains of science by numerous specimens of fishes unheard of until now, and, by new theories, as to the changes which the centuries have produced upon the South American coast, I could but remember the unwearied labors of philologists in tracing the small streams of dialects, with their countless variations, and labyrinthian network of ramifications, not unlike the branches of this great river; and how from these minor streams, they have traced the broad flowing tide of human speech, sweeping down the ages, bearing on its bosom a precious freight, the collected wisdom of countless generations, and how these same philologists, from patient study of the word strata, which everywhere met their view, have

determined the former boundaries of the ocean of human thought, and measured its steady encroachments upon the domains of ignorance and error; and when, at the close of the lecture, the speaker commended to the kind regard of the citizens of his adopted State the University to which he belongs, and of which he is so bright an ornament, and said, in speaking of his own special department, that we had yet to obtain in this country the first crude notions of what a University should be, adding that although we might suppose that ample provision had been made at Harvard for all needed Professorships, *fourteen* Professors are employed in the University of Berlin, to fill the place assigned to him at Cambridge, I could not forget that, in the same University of Berlin, *twenty-eight* Professors are at present employed upon the various departments of Philology, many of them men whose reputation is world-wide, including among their number such names as Mullach, Mommsen, Bopp and Bekker, and that these twenty eight men make it the business of their lives to present to the crowds of students who flock to that renowned seat of learning the ripe results of their own department; and although the eager haste, and the eminently practical aims of our people, so characteristic of a young and growing nation, and so prejudicial to the highest results of scholarship, may long prevent the consummation of the wished expressed by the enthusiastic naturalist, that European youth, in a not very far distant future, may flock to our shores in search of the highest culture, as American youth now flock to the Old World, I could not help hoping and believing, that more abundant provision would be constantly made for the study of *all* the sciences; not forgetting, nor assigning to any secondary place, that science which in itself is better adapted than any other to supply the varied needs of the human mind, and upon which a knowledge of the early history of our race, as well as of all the sciences, so largely depends.

Creature comforts are often, to the soul, what suckers are to the tree; and the Heavenly Husbandman prunes us, to secure the sap for the bearing. Many are the afflictions of the righteous. The husbandman does not prune the *bramble*, but the *vine*. The stones designed for the Temple above require more cutting and polishing than those which are for the common wall.

Now let my soul arise,
And tread the tempter down;
My Captain leads me forth
To conquest and a crown:
A feeble saint shall win the day,
Though death and hell obstruct the way.

SELECTIONS FROM THE WRITINGS OF JOHN BARCLAY.

(Continued from page 644.)

To E. S.

RUSSELL SQUARE, 17th of Fourth month, 1818.

DEAR EDWARD.—The true authority as well as beauty of our religious meetings, in which I cannot exclude those for the right ordering of the affairs of truth, stands upon and consists in that, without which the very form is a mockery, though the best of forms. It is not age, it is not any station in the church, it is not an outward knowledge or experience in the letter of those laws, which the Spirit of Truth has led our forefathers to adopt,—much less is it any repute among men grounded upon outward possessions,—which will make one living stone for the Master's use, in the building up of his beautiful city the new Jerusalem. Now, if any man build with the straw and stubble, or even with that which appears like gold or silver;—every man's work shall be made manifest of what sort it is; for it shall be revealed by fire, and the day shall declare it." How much need then is there for all amongst us, who fill any of the offices in the church, and even for such as may be in the highest stations, and may have been made of eminent service therein, yet again and again to wait upon the Lord, yet again to bow down their souls; so that every high thing, that would exalt itself within them, may be abased, under the humbling influence of that power, which bruiseeth and breaketh in pieces, which bringeth us low, and keepeth us low, even as children and babes, willing to be led about and instructed, and ready to esteem another better than ourselves. Now as individuals are brought into such a feeling tender state as this, they become sweetly qualified to take those places, which the master-builder ordereth for them in his house, in his family, in his vineyard. They thus receive capacity and authority to labor for the great cause, and in the name and power of their leader; they have strength to bind and to loose, to help and to heal the weak and the wounded; and they have the spirit of patience and of pity given them, to plead with and to pray for the tempted, the tossed, the tried. And O! the tenderness that is shown by such as these, on behalf of their poor fellow-creatures, who may be overtaken or overcome of evil or error; knowing that they themselves stand only through the mercy of the Most High.

J. B.

1818, *Fourth month 21st.*—How little do we know what is best for us!—O! how good a thing it is to be led about and instructed by our tender Parent, even as little children; seeing that we, no more than they, can run alone with safety. When I am ready to receive hurt from some precious gift or other, which He has lent me;—when I am likely to be elated by seeing

myself so favored, or to assume anything to myself because the Lord showers upon me his blessing;—then in the abundance of his compassion he taketh away that which I was ready to abuse, and leaves me in darkness and in the deeps, it may be without a shadow of comfort or a ray of his heavenly presence. And then, in the bitterness of my soul, in the absence of my Beloved, I cry out and weary myself with bewailing; being in my own apprehension on the point of despair. But He, even my Father, regards not my crying, nor my weeping; he knows best what is good for me, and continues his dispensation of afflicting darkness and drought, until in his wisdom he sees that the set time to favor me is come.

1818, *Fourth month 22d.*—Was much instructed by looking over a Monthly Meeting's early minute-book, dated about 1666. I thought I clearly saw that our Friends in the beginning, were a simple, plain set of people; and that they mostly had but a very small proportion of learning or general knowledge,—very many in early times not being able to write legibly or even some to read. Divers advantages have we above them in several respects; yet it has seemed to me that some of these very advantages have proved our hurt and stunted our growth, so that we have not arrived at their stature or strength. "The love of other things," we read, choked the good seed; and this seems to me to be applied to our case, who have many "other things," (some of them very good when kept in subjection,) which draw away our minds from the simplicity of the Truth, and from a patient, humble, waiting frame of mind, in which alone true safety can be witnessed.

1818, *Fourth month 26th.*—I desire greatly not to be led away and ensnared, by coveting or looking for the esteem and notice of any, even of religious characters; I pray in my heart, that I may be preserved from liking to hear my own voice and tongue in company, and from the least approach to anything like a love of showing off even good qualities. If we are in the right spot, we shall forget ourselves, and not esteem those things as our own, which are wrought in us, or which we have been enabled rightly to do or say.

I have also seen, that much care is needful not to be endeavoring or presuming to correct the views and sentiments of others, by our own strength and in our own will and time; I see danger in this for all, but especially for young people, who are so likely to get into argument and much talking. Nothing is gained often thereby; but the way to openness and conviction respecting any matter is much blocked up. But after long patience and waiting, and much uneasiness has been undergone, lest the right thing should by any means suffer,—and after not a little exercise of mind on account of the

person who may hold such a wrong sentiment, —then have I seen a word in season put forth in meekness, do more than all the ill-timed efforts of a man's own will and strength.

1818, *Fifth month 10th*.—The day before yesterday, I completed my twenty first year. I may say, with some feeling, that my breathing in secret is unto the Lord, that he would in mercy continue near to me, to help in time of need; for I am still unable to take one right step, notwithstanding anything already attained; but have need day by day to wait upon him again and again, for a renewal of strength: for assuredly He alone, who began the work, can safely carry it on, and bring it to such a conclusion as will redound to his own praise.

1818, *Fifth month 19th*.—The day before yesterday, it seemed right for me to give up to go and sit among Friends at their Monthly Meeting at Kingston. I had no probable means of conveyance but on my feet, and it was a very rainy morning: but I cried unto the Lord that he would direct me, and give me sufficient strength to do whatever might be best. I got there (it being, I suppose, more than thirteen miles) some time after the hour of assembling, much wearied in body, but sweetly fresh and lively in mind, through the extendings of mercy; so that the driving rain and the length of my walk had not much effect upon me, who am but a poor weakly one. On my way thither, it rather vividly came to my mind,—“what if I should have to speak in their meeting?” But the Lord quieted that spirit within me, which would be questioning and reasoning; and I was favored to feel great composure and calmness, notwithstanding that suggestion. And O! the melting power and glorious influence which was enjoyed by me, and I believe by others, in the meeting for worship! how precious an half-hour did I spend among them! so much so, that my heart was filled with the song of praise unto that great Being, who remembers and cares for his poor little ones; and who in his own time fills his hungry ones with good things—yea, with the choice dainties of his table,—so that their cup runs over! O! the tears of joy that were shed! May I never forget the renewed mercies of the Lord my God, while I have my being! The next day was our Monthly Meeting at Westminster, where were present some choice servants; through whose ministry the language of encouragement was held out to the little ones, but especially to those young in years, whose hearts the Lord had in measure melted into a willingness to be conformed to his holy will respecting them. O! the unutterable condescension of Him, whose mercies are new every morning! May the objects of his bounty be yet more and more mindful of him, and of his goodness; and be induced yet more fully and faithfully to give up to his requireing; to

bring all the tithe into the Lord's treasury (as two dear Friends said in the meeting,) and prove him therewith, and see if He will not open the windows of heaven and pour them out a blessing, until there be no room to contain.

To E. J.

ISLE OF WIGHT, 30th Sixth month, 1818.

DEAR EDMUND,—I have felt so much dissipation of mind since I arrived here, as to unfit me for a calm enjoyment of the beauties of nature, so profusely mingled as they are here. The cares devolving upon me, not a little tend to lead away the mind from that “retired, strict, and watchful frame,” (as I think William Penn calls it,) which seems to be the safest and most profitable state for me as an individual, and a soil most conducive to my present growth. I may truly say, that though I desire not to prescribe for any, otherwise than seems to be my especial duty; yet, I believe that few, very few there are, to whom an approach to unwatchfulness or levity is not dangerous—is not ensnaring. How often have I been in different degrees unfitted thereby for that sweet retirement of mind, which seems to be, as it were, the element and atmosphere of the true Friend. I think of you at your Quarterly Meeting this day. I long that the many Pharisees, who are in the formality, and obtrude their services and “much speaking” in meetings for discipline, and some even in those for worship, may be kept under; for assuredly, the wisdom that is from below, is at enmity with the pure lowly seed of the kingdom, and will do only mischief to the good cause; its nature and tendency being to exalt *itself*, whilst its pretension is, to forward the right thing. But the foolish things of the world, and the weak things, and the base things, are still preferred and chosen to confound the wise, and to bring to nought every thing else, but the power, the life, the wisdom, the nobility of the Truth. Paul, the learned Paul, the enlightened Paul, when he came from the feet of Gamaliel the Pharisee, and sat at the feet of Jesus, would not even speak in the words which man's wisdom taught; he came not with enticing words or excellency of speech, lest his hearers should admire him or his words rather than the power; and so their faith should stand in the wisdom of man, and not upon that foundation, than which no other can be laid, and besides which, Paul determined to know nothing,—even Christ, the wisdom and power of God.

Dear E—, then knowest all this, yet I long that we both may keep to those things, which we have in mercy been made sensible of; that so we may be enabled to stand for the Truth and its simplicity, over all that which looks like Truth, but is not,—being only an image, which the enemy has patched up and

embellished, wherewith to deceive the simple; and he would have us worship this image, and highly esteem such as sacrifice to it. But Truth wants no ornaments nor paint,—none of the “vain philosophy” of the learned; the polite airs and customs which are in the world, she shrinks from and avoids: the studied maxims, and gathered wisdom, and logical conclusions, and distinctness of the schools, only clog and impede our growth in the Truth. O! how little of the innocence, and artlessness, and openness, and simplicity, and natural beauty of the Christian religion, is to be seen and felt thriving amongst us at this time! The state of our Society not a little reminds me of that of a large machine or mill, which was made skillfully, and set a going admirably, and went well at the first: and when one wheel broke, the master took it away and supplied its place; and when any part of the machinery was worn away through much service, the master took care the work should not suffer thereby, but raised up other instruments. But at length the dry rot or some terrible mischief gets in and spoils it, so that the sound parts can hardly act or work, because of the number of unsound members. In such case, surely the machine must undergo a thorough repair; surely every member of the body must come under and submit to the reforming and refining hand: even the sound parts must, as it were, be taken to pieces for the sake of the rest; that all may be re-established in their several places, and according to their different capacities, by the ordering of the great Workman, whose workmanship they are.

(To be continued.)

The more the thought of God's love enters our minds, the more will faith in happiness issue from our souls as a blessed flower. Happiness is the end of our being; it is the will of the Father. To each one of us are these words addressed: God loves thee; be happy! Listen to all the voices which speak to you of comfort; be attentive to all the words of peace. Seek, labor, pray—till you are able to utter, in quiet confidence, those words of the Psalmist:

“In peace I lay me down to rest;
No fears of evil haunt my breast:
In peace I sleep till dawn of day,
For God, my God, is near alway;
On Him, in faith, my cares I roll,—
He never sleeps who guards my soul.”

God in the heart—this it is which adds zest to our enjoyments, sanctifies our affections, calms our griefs, and which, amidst the struggles, the sorrows, and the harrowing afflictions of life, suffers to rise from the heart to the countenance that sublime smile which can shine brightly even through tears.—*Naville.*

It is an essential feature of the new life that it makes him that heareth say, “Come.”

For Friends' Intelligence.

TATTLING.

A wish overspreads my feeble faculties that I could elevate the standard of truth and frown down so low and grovelling a thing as tattling, —manufacturing, magnifying and bearing tales from one to another for mischief-making purposes.

Unbridle the tongue, unstring the bow of watchfulness, and a much greater snare cannot be thrown out to entangle and retard the growth of society. There are many notorious evils appearing more public and world-wide, destructive in their aspect; but the liberated and unrestricted member of speech is like the venomous serpent in his hidden coil, seeking to strike poison to the hearts of the unsuspecting.

Few have arrived to years of understanding who have not witnessed the home circle and blessed fireside made dreary and uninviting by one or more designing individuals, prompted with no higher aspiration than popularity or the desire to interest those around them, and entertain their guests with something new and strange. And the evil does not always stop here. Persons are spoken of in disrespect which some listener garners up for future opportunity to convey, magnified, to the injured party, and thus, from a few unguarded expressions, discord is sown from which incalculable mischief is the result. Like the small seed that germinates in the earth, it grows a tender plant. A tare is apparently harmless, but time extends its branches and develops its thorns, until it becomes a formidable nuisance, and causes much labor to exterminate it.

Milton, Ind.

ISAAC L. WHITELEY.

THE RIGHT USE OF REASON.

The late Dr. Henry Ware, when asked by a parent to draw up some set rules for the government of children, replied by an anecdote:—“Dr. Hitchcock,” he said, “was settled at Sandwich; and when he made his first exchange with the Plymouth minister, he must needs pass through the Plymouth woods—a nine miles wilderness, where travellers almost always got lost, and frequently came out at the point they started from. Dr. Hitchcock, on entering this much dreaded labyrinth, met an old woman, and asked her to give him some directions for getting through the woods so as to fetch up at Plymouth rather than Sandwich; ‘Certainly,’ she said, ‘I will tell you all about it with the greatest pleasure. You will just keep right on till you get some ways into the woods, and you will come to a place where several roads branch off. Then you must stop and consider, and take the one *that seems to you most likely* to bring you out right.’” He did so, and came out right. Dr. W. added, “I have always followed the worthy and sen-

sible old ladies advice in bringing up my children. I do not think anybody can do better—at any rate, I cannot." Good common sense doubtless is often better than all set rules; but the thing is, to *have it*."

FRIENDS' INTELLIGENCER

PHILADELPHIA, TWELFTH MONTH 22, 1866.

DETRACTION.—The remarks in relation to talebearing, by I. L. W., which will be found in another part of the paper, are worth considering. We are willing to hope, however, that the evil does not exist to the extent apprehended by the writer, and we trust that a disposition to dwell upon the faults and failings of our neighbors is giving place to a more intelligent and healthy social condition. One of the means best calculated to awaken a sense of the impropriety of indulging in a practice so deleterious, not only to the censured, but the censor, is the observance of the admonition of Jesus, "Take heed how you *hear*." This must necessarily give a check to that spirit which would say, "Report, and we will report." The care of Friends on this subject, in the organization of the Society, is manifested by the second Query, which is read and answered in our monthly meetings four times in the year. We are first queried with as to whether love and unity are maintained? Where this is the case, talebearing and detraction will be discouraged; for if love abounds, there is no room for hatred and malice.

The Apostle Paul testified that "all the law is fulfilled in one word, even in this: Thou shalt love thy neighbor as thyself." And his counsel to the Galatians was, "Brethren, if a man be overtaken in a fault, ye which are spiritual restore such an one in the spirit of meekness; considering thyself, lest thou, also, be tempted." In thus remembering our own liability to err, we would feel no disposition to "speak evil one of another;" but would realize that the bridling of the tongue and the hallowing of the lip are attended with the same blessed results as of old, when it was said, "To him that ordereth his conversation *aright* will I show the salvation of God."

In the Epistle of James we read, "If any man among you seem to be religious, and

bridleth not his tongue, but deceiveth his own heart, that man's religion is vain."

We find by the above quotations, and many others which could be cited, that in past ages, as at the present time, the habit of "backbiting" was felt to be adverse to the spirit of love and charity, which is ever becoming the professors of Christianity. May we, therefore, be so watchful as to "refrain the tongue from evil, and the lips that they speak no guile," so that at all times our "conversation may be chaste, coupled with fear."

CONVERSATIONAL MEETING WITH REFERENCE TO THE DISCIPLINE AND TESTIMONIES OF FRIENDS.—These Meetings have been resumed, the present season, at Race Street Meeting-house in this city, where they are to be held on the second and fourth Fourth-day evenings of each month. The first meeting was held on the 14th instant, and was occupied in part with arranging the order of proceedings and appointing a Committee of Superintendence, after which the admirable letter of William Penn to his wife and children, written on the eve of his departure for his Province, was read and commented on. It was shown that the Freedom of Conscience and Equal Rights granted by Penn to his infant colony, which had not only been of incalculable advantage to successive generations of the people of Pennsylvania, but had spread to most of the States of the Union, grew out of his faithfulness to those convictions of duty which had made him a conspicuous example of piety and humility. His wise and loving counsel to his wife and children was commended to the young and old in our day, as worthy of their careful and serious consideration.

At the second meeting, on the 28th, the evening before "Thanksgiving day," our testimony "against the observance of days and times" was brought into view by reading the Discipline, under this head, with extracts from the writings of George Fox, William Tuke, Robert Barclay and Jesse Kersey.

The testimony of Friends against the holiness of any one day more than another was held up as requiring faithful maintenance. The restrictions upon travel upon the first day of the week, when enforced upon any other ground than that of the "Ease of Creation," are in

conflict with the principles advocated by Friends in regard to days and times, and as a part of the system of religious restrictions devised and maintained by the clergy, should be conscientiously opposed.

Yet, while all agreed in denying the right of the priest or magistrate to impose any religious observances on the people, and the duty of Friends to guard against unwarranted interference with the civil and religious liberties which are our birthright, it was urged by some, that the custom was commendable of breaking in upon the daily toil with occasional holidays, in which social and domestic enjoyments were realized, tending to relieve the monotony of everyday life, and to brighten the chain of family affection. A fear was expressed by others, lest even this social observance of holidays might lower the standard which Friends have always endeavored to maintain.

At the third Meeting of the season, the consideration of our testimony to a free Gospel Ministry, which claimed attention last year, was continued. After the paragraphs upon the subject, in the Discipline, the Committee introduced the excellent treatise of our late esteemed friend, John Jackson, upon the Christian Ministry, from which a chapter was read.

The subject was continued for further consideration on the 27th instant.

MARRIED, on the 18th of Tenth month, 1866, in accordance with our order, BENJAMIN W. COLEMAN, a member of Byberry Monthly Meeting, to JANE BURTON, a member of Falls Monthly Meeting, Pa.

—, on the 1st of Eleventh month, 1866, at the groom's residence, Whitemarsh, Pa., under the care of Green Street Monthly Meeting, of which the bride is a member, ISAAC CONARD and SARAH AMLER.

—, on the 28th of Eleventh month, 1866, at the residence of Abigail W. Ellis, Philadelphia, according to the order of Friends, WILMER ATKINSON, of Wilmington, Del., and ANNA ALLEN, a member of Green Street Monthly Meeting; daughter of Samuel and Elizabeth J. Allen.

—, on the 6th of Twelfth month, 1866, at the residence of Burtis Barber, according to the order of the religious Society of Friends, under the care of Green Street Monthly Meeting, GEORGE W. JESSUP and ESTHER ANNA, daughter of the late Biddle Hancock.

—, on the 6th of Twelfth month, 1866, at Baltimore, with the approbation of Baltimore Monthly Meeting, JAMES F. BIRDSALL, of Harrison, Westchester Co., N. Y., to ANNA MARIA CORNELL, of the former place.

—, on the 13th of Twelfth month, 1866, at Lumberville, Bucks Co., Pa., according to the order of Friends, ISAIAH KENDERDINE and EMMA C. E. LIVEZEY, both members of Solebury Monthly Meeting, Pa.

DIED, on Fourth-day, the 5th inst., at his residence near Denton, Caroline Co., Md., SAMUEL DUNNING, in the 67th year of his age. This Friend had for many years been an Elder in the church. His steadfast support of our principles and testimonies, with his plain and straightforward manner of giving expression to his convictions of right and truth, were marked features of his character. Although his bodily powers were weakened by protracted disease, his mental perceptions remained undimmed, and he looked forward to his release with the assurance of a blessed immortality.

—, at the residence of his father, in Bedford Co., Pa., on the 23d of Eleventh month, 1866, of typhoid fever, ELIAKIM P. BLACKBURN, son of James Blackburn, in the 25th year of his age, a member of Dunning's Creek Monthly Meeting. He was a young man of excellent talents and good education, and above all was possessed of great moral worth, which made him an ornament to society, and enabled him to do much good in the neighborhood where he lived. Though stricken down in early manhood and at an age when there was much to bind him to this life, yet he was enabled to feel that "all was right."

—, on the 13th of Eighth month, 1866, RACHEL E. COX, wife of William Cox, and daughter of Jehu and Susan M. Price, in the 41st year of her age; a member of Prairie Grove Monthly Meeting, Iowa. For some weeks previous to her decease she had a presentiment of the approaching change, and was in a sweet and resigned state of mind.

—, on the 21st of Eleventh month, 1866, from injuries received by being thrown from a horse, SAMUEL SHARPLES, aged 81, of Middletown, Delaware County.

—, on the 10th inst., MERRIT CANBY, in the 80th year of his age; a member of Wilmington Monthly Meeting, Del.

—, on the 11th inst., in Philadelphia, JAMES MORGAN, in his 52d year.

—, on the 11th inst., ABRAHAM LOWER, Sr., in his 53d year.

For the Children.

COVERING OF ANIMALS.

BY WORTHINGTON BOOKER.

The skin of man is his covering. It covers up, like a case, all the machinery that I have told you is in his body—the bones, the muscles, the nerves, the arteries, the veins, &c. It keeps them from being injured. Besides this, how strangely should we look if there were no skin to cover up these parts from view.

The skin fits very nicely all parts of the body. On the hands it is like a glove. See how well it fits. But, observe that there are some places where it is quite loose, and full of wrinkles. It is so between the thumb and forefinger, and around the joints of the fingers. In these places, it would not do to have it fit tight, because if it did, you could not move your thumb and fingers as freely as you do.

But the covering of man's body is different from that of other animals. It is, for the most part, bare skin, while most animals have either hair or feathers, or scales, or hard plates like armor, or shells. Why is it that man has a covering that protects him so much less than animals generally are protected by their cover-

ings? It is because he knows how to make such a covering as he needs to put over his skin. He can suit this to the degree of heat or cold. But animals know nothing about this. No one ever saw an animal make clothes and put them on. The Creator has given to each animal such covering or clothes as it needs, ready made.

Animals in very cold climates need a very warm covering. They therefore have a thick fur. But animals that live in warm countries have rather thin hair, instead of fur. The elephant has very little hair, and it is only with the greatest care that he can be made to live through our cold winters. The same is true of the monkey. If these animals had a good covering of fur on their skins the cold would not effect them in this way.

The hair of the horse is rather thin. It is not like fur; and if the horse's master is kind, he is very careful to put a good blanket on him whenever the cold makes it necessary. If he did not, the horse would get chilled, and take cold. The horse is not a native of cold countries, but of such warm countries as South America and Arabia. There horses run wild and are always in large companies or herds.

You know how thick the fur is on the cat. You can see how fine it is, and how thickly the hairs stand together, if you blow on it so as to separate the hairs. With this warm coat on her, she does not mind the cold much. You see her often in cold weather, out doors, with her feet gathered up under her to keep them warm. The monkey with his thin hair could not do so. He has to be kept in a warm place during winter. The covering of birds, while it is such as to keep them warm, is very light. If it were not so, they could not fly as well as they do. Feathers are so light, that when we wish to speak of anything as being very light, we say it is as light as a feather. The down feathers on the breast of birds are especially light. The feathers of the wings are different. They are made strong, for the work of flying, and at the same time they are quite light.

Birds that go much into the water have an oil about their feathers, which keeps them from being soaked; for this reason, a duck, when it comes out of the water, is almost as dry as before it went in. But if a hen should go into the water in the same way, she would be wet through her feathers to her skin. She was not made to go into the water, and so has neither the oily feathers, nor the webbed feet, which are given to the duck.

Why is it that fishes have scales? It is because they need a smooth covering in order to get along easily in the water; a covering which is rough, or which would soak in water, would be bad for them. The scales, you know, lap

over one upon another; they make quite a firm coat, and at the same time do not hinder the bending motions of the fish. If the same covering was all in one, instead of being made up of many scales, it could not bend as easily as it now does in turning its course in the water. The scales are kept oiled, and this helps the fish to glide along swiftly. It is this that makes the fish so slippery, that it is difficult to hold it in its struggles when it is first taken out of the water.

I have told you in another chapter about the coverings of such animals as lobsters and crabs. There is one kind of crab called the hermit crab, that has no covering over his tail, as he has over the other part of his body. It is, therefore, very liable to be injured, unless it is guarded in some way. And how do you think he guards it? He just puts it into some shell that he finds, and then goes about dragging it after him. As he grows, the tail becomes too large for the shell, and as soon as he feels the shell beginning to pinch, he pulls his tail out, and goes in search of another shell. It is amusing to see him try one after another, till he finds one that fits well. Sometimes, two of these crabs come to the same shell, and then they have a fight about it; very foolish must a crab feel when he has driven another one off, and finds, after all, that the shell he has been fighting for does not fit his tail.

At the dedication of the Peabody Institute in Baltimore, the children of the Public Schools of that city assembled, twenty thousand in number, to pay respect to the munificent founder, George W. Peabody. When all had passed in review, and were massed in the vast space in and around the building, he delivered the following address:

When I arrived in Baltimore on Wednesday, my dear young friends, I did not expect to meet you thus, but finding by a visit from your School Commissioners' Board that such was your desire, I concluded to meet you, even should it be necessary to postpone my departure from Baltimore beyond the time originally fixed. And I take to myself no credit for doing so, for I assure you that my desire to see you is as strong as yours can possibly be to see me; and never have I seen a more beautiful sight than this vast collection of interesting children. The review of the finest army, with soldiers clothed in brilliant uniforms and attended by the most delightful strains of martial music, could never give me one-half the pleasure that it does to look upon you here, with your bright and happy faces; for the sight of such an army as I have spoken of would be

associated with thoughts of bloodshed and human suffering—of strife and violence; but I may well compare you, on the other hand, to an army of Peace; and your mission on earth is not to destroy your fellow-creatures, but to be a blessing to them, and your path, when you go out from these Public Schools, is to be marked not by ravages and desolation, but, I trust, by kindly words and actions, and by good will to all you meet.

With such an assemblage as this, therefore, I am glad to have my name associated, as I see that it is, by the badges worn by many of you; and I shall feel it to be a very great honor if the medals thus bearing my name shall continue, as I am informed they have heretofore done, to prove incentives to application, diligence, and good conduct, and I shall ever take a sincere interest in those to whom they are awarded.

There is another relation in which I look upon you, and that is as the future guardians of the Institute from which I speak to you, for in a few short years you will have left the places you now occupy, and, taking the positions of those now in active life, will have the care and enjoy the privileges of this Institution; and I hope most earnestly that it may be the means of all the good to you that was contemplated in its foundation, and that you on your part may see that it is carried on always with kind feeling and harmony. And so I trust, my dear young friends, that in passing by this edifice, young though you are now, you will feel, in looking upon it, not that it is one for grown-up men and women, and with which you have no concern, but that it is yours also that you will at no distant day have a right in it as your heritage, and so you will, even now, in your tender years, take an interest in it, and in all the things connected with it.

I have now but little advice to give you, for I am sure that your parents and your teachers have bestowed, and always will bestow, upon you the kindest and most earnest counsel. But, I would say, attend closely to your studies, and remember that your close attention to them is a thousand times more important to you than your teachers. Bear in mind that the time of your studies, though it may now appear long to you, is in reality very brief, and at a future day, when it is perhaps too late, you yourself will feel that it is so. Do not be ashamed to ask advice and take counsel from those older than yourselves; the time will come when you in your turn may advise those younger than you, and who will follow in your footsteps. Strive always to imitate the good example of others.

I am glad that your assemblage is in this most interesting place, for I hope that your future recollections of this occasion may be con-

nected with the thought of him whose statue crowns yonder beautiful monument—the illustrious Father of his country, and that you may be induced to take him more and more for your model, for he, pre-eminently great among men, was also great and good in his boyhood and youth. As time has passed, it has rendered eulogy of him as superfluous as if we were to praise the sun for its brightness, and it is as the most perfect example for imitation the world has seen that we must look upon the character of Washington. Remember, then, his youthful life, the instances—too familiar to need repeating by me—of his truthfulness, his self-denial, his integrity, his perseverance, his reverence for age, his affection for his parents and his fear of God. Finally, strive always to act as if the eye of your Heavenly Father were upon you, and if you do this, His countenance will always smile upon you. I fear, my young friends, this is the last time I shall ever speak to you. I therefore bid you farewell. God bless you all.

LOVE.

BY J. RUSSELL LOWELL.

True love is but an humble, low born thing,
And bath its food served up in earthen-ware;
It is a thing to walk with hand in hand,
Through the every-dayness of this work-day world,
Baring its tender feet to every roughness,
Yet letting not one heart-beat go astray
From Beauty's law of plainness and content:
A simple, fire-side thing, whose quiet smile
Can warm earth's poorest hovel to a home;
Which, when our autumn cometh, as it must,
And life in the chill wind shivers bare and leafless,
Shall still be blest with Indian-summer youth,
In bleak November, and with thankful heart,
Smile on its ample stores of garnered fruit,
As full of sunshine to our aged eyes
As when it nursed the blossoms of our spring.
Such is true love, which steals into the heart
With feet as silent as the lightsome dawn
That kisses smooth the rough brows of the dark,
And bath its will through blissful gentleness,—
Not like a rocket, which, with savage glare,
Whirrs suddenly up, then bursts and leaves the night
Painfully quivering on the dazed eyes;
A love that gives and takes, that seeth faults,
Not with flaw-seeking eyes, like needle points,
But, loving kindly, ever looks them down
With the overcoming faith of meek forgiveness;
A love that shall be new and fresh each hour,
As is the golden mystery of sunset,
Or the sweet coming of the evening star,
Alike, and yet most unlike, every day,
And seeming ever best and fairest now;
A love that doth not kneel for what it seeks,
But faces Truth and Beauty as their peer,
Showing its worthiness of noble thoughts
By a clear sense of inward nobleness,
A love that in its object findeth not
All grace and beauty, and enough to sate
Its thirst of blessing, but in all it sees of good
Found there, it sees but Heaven-granted types
Of good and beauty in the soul of man,
And traces in the simplest heart that beats,
A family-likeness to its chosen one,

That claims of it the rights of brotherhood.
 For Love is blind but with the fleshly eye,
 That so its inner sight may be more clear;
 And outward shows of beauty only so
 Are needful at the first, as is a hand
 To guide and to uphold an infant's steps:
 Great spirits need them not; their earnest look
 Pierces the body's mask of thin disguise,
 And beauty ever is to them revealed,
 Behind the unshapeliest, meanest lump of clay,
 With arms outstretched and eager face ablaze,
 Yearning to be but understood and loved.

THE LOSS OF THE STEAMSHIP "LONDON."

(BY ONE OF THE SURVIVORS)

(Concluded from page 664.)

After many weary hours of anxious looking we at last saw the sky in the east lighten up a little. We at first thought it to be daylight breaking, but it proved to be the moon rising. It was then about four o'clock. Daniels was now steering; he relieved King for about three hours; when of a sudden the lights of a distant ship were seen. We watched her intently for a short time, and discovered she was nearing us. Presently she was abreast of us, and only a short distance off. We dare not row towards her, the sea would not permit that. The order was then given for all to sing out at once, and lustily we obeyed; it must have sounded terrible to those on board the vessel—our voices above the roar of the sea and wind. We soon had the gratification of knowing that they had heard us, and were putting the vessel about to run for us. We could now see her—a small vessel of two masts. She ran across our bow, a short distance ahead of us. We could see her, but they could not see us. They were evidently looking for us, and we bellowed as loud as we could. We also tried to light matches, but they had got wet. We could see the ship run first to one side, then across to the other. Then a squall would come, and she would be hid from view; when it passed we would see her again, perhaps in another direction; on which there was another cheer and another cry. Presently we could see they had lost the run of us; and how tantalizing that was when we were within three minutes' row of her, and dare not deviate from our course. Now we could only see her occasionally through the gloom when we rose to the top of a wave. At last she was out of sight; all hopes of safety from her were now gone. It affected the spirits of all. We were beginning to suffer from cold, exposure, and thirst. The latter I felt the most; when baling, could scarcely resist the temptation of putting the dipper to my mouth. When we could see the vessel no more, we decided upon not going any faster than we could help, hoping to see her when daylight came in: which did happen at last—in hail and rain. Then the sun shone out for a few minutes; we scanned the horizon, but could see nothing. By the

sun we judged we were making the course that Captain Martin had given us, and had a strong idea that we were within forty miles of the French coast. It was just as well we did not know our actual position. When picked up an hour or two after, we were then 140 miles from land.

Again the cry was raised, "Ship in sight!" We could just see her off on the port-quarter, apparently making towards us. Presently we sighted another, more in our track, on the star-board bow, but at a great distance. We could only see the tops of the masts, like three fingers above the water. Hope revived again; we were in the track of vessels, and rejoiced to find there were some still floating.

On we went for half an hour, with occasional sunshine, then a shower and squall, the sea still rough, the same constant attention required always. Those on the lookout reported that the vessel was not getting any nearer to us. Some proposed to King, who was now steering, to put about to run for her. He strongly objected: saying the boat would surely swamp in going around; and then we had a good distance to row, nearly to windward, before reaching the vessel. The men by this time were getting impatient, and willing to risk a good deal to bring this boating trip to a termination. My only fear was that they would end it too abruptly in trying to reach a vessel. They were also getting irritable; there was not that friendly feeling as existed at first—would answer each other sharply. Of course this was owing to exposure and want: all were complaining of thirst. There were a left in the boat; we now got to eating them, and few raw vegetables that by chance had been found them a great relief. By this time, say 9 A. M. (Friday, 12th), a dispute arose; words were running pretty high as to the advisability of putting round to run for this vessel on the port-quarter. One who was holding the signal of distress (a shirt on an oar), said to King, at the rudder, "If you don't put her about, I will put this oar through the bottom." I was beginning to feel frightened. Of course every allowance must be made for a man under these trying circumstances. I myself do not entertain any ill feeling towards him whatever for his threat. Immediately somebody proposed that we should run for the vessel on our star-board bow, not so much with the hopes of reaching her, as to prevent the boat being put round. I seconded the proposition by saying that it was certainly the best plan; that if we should miss her, we would still be making our course good to land; that it was not more than forty miles off, and by keeping on we would sight it before night; that it was early in the day, and most likely we should see other vessels; that we were in the track of them, we having seen four already was proof. The proposition

was then put and carried in parliamentary style, though some of the language used might not be considered parliamentary. The oars were doubly manned, the course of the boat slightly altered. Soon everything was going pleasantly, and all seemed well satisfied with the new arrangement: all they wanted was to be going towards some vessel. The sun at that time was shining, and our little craft sped along bravely. She quite astonished the most sanguine,—everybody expressing great affection for her. The man on the lookout, the only one allowed to stand up, and who was also supporting the oar with the signal of distress, reported that we were nearing the ship. Still great caution was required to manage the boat. The vessel not being directly in our track, we of course had to make good a few points to the wind; and this is where the difficulty was. Whenever an opportunity offered, we would steer to windward of the vessel, knowing we could make leeway at any time. Whenever a crested wave was seen coming, then would be heard, "Look out, King, here is one;" when round would come the boat. We would turn tail and run with it until it had passed, when up she would come again to windward of the vessel. In the course of half-an-hour we were getting pretty near her. Soon we could see her hull, and when within half-a-mile of her, we were rejoiced to find that they had got sight of us, by their taking in some sails, and bearing away to run for us. We then intended to run up to windward, and come round under her lee. Just at that moment there was seen a terrific squall, with its high walls of white foam coming down fast upon us, as if to totally annihilate us just at the moment that succor was at hand. In a few minutes we would be up abreast of the vessel. But on came the gale. Of course we had to turn and run with it. By the next two or three minutes we found ourselves right down to leeward, and being carried fast away from the ship. Our great fear now was that we would be shut out from sight of each other. Many then sung out to King to put about, and some not to. He said, "She will certainly fill, if I do; and I will not; and don't you see them running for us." And so they were, and hallooing, and directing with their hands in the wildest state of excitement, which very much bothered us, and tended to increase our embarrassment. I suppose they were trying to make us understand to run on with the wind, and they would follow. After the first shock of the gale had passed, the boat was partly brought round, but in doing so we had a narrow escape from being swamped, as she shipped a heavy sea. In a few minutes we were running up to the stern of the vessel (a barque of about 400 tons), when a line was thrown to it with remarkable accuracy. It was

caught; soon a rope followed; and we were at last by the side of the barque. She had come round to the wind, was rolling very much, and we were thumping against her side by the main chains. All order now was broken through—each one grasping hold of anything he could lay hands on, and scrambling up, some assisted by those in the vessel. I saw directly before me two iron bolts by which the main rigging was secured; they looked very tempting; I sprang and caught hold of them; at that moment the boat was taken from under me by the roll of the vessel, and I was left hanging by my hands. I could see others on each side of me; in a moment up rose the sea and boat again lifting us up, when I caught another hold, and was soon on to the rail. All were out of the boat but one,—he had hurt himself the day before, and was not able to get up: a rope was got over, and he was drawn up. How thankful I felt to be once more in safety, and with a prospect of having plenty to eat and drink! The ship was Italian. We were kindly welcomed by the captain, who was serving out Geneva when I got aft. He was a fine jolly and burly old fellow, with a most benevolent countenance, and with his crew were doing their best to assist for our comfort; only we could not understand each other. It was now about 10 A. M., and we had been about twenty hours in the boat. In a short space of time we were all arrayed in warm dry clothing, and in possession of the captain's cabin; they soon got us warm tea and biscuit, and we saw preparations for something more substantial; some fowls were killed, which were served up in the evening in the shape of a stew. After the first meal was over, we then began to move about—to learn something of our preservers, and whereabouts we were. She was an Italian barque and crew of Genoa, bound from the Mediterranean, laden with wheat, to call at Cork for orders: her name was *Marianopolis*, Captain Gion Batta Cavassa. Her position this day at noon, N. lat. 45° 54', W. long. 7° 13', Greenwich meridian. She had experienced pretty heavy weather, and had been obliged some time previous to throw overboard some of her cargo, but at this time was safe, dry, and snug. We now felt very comfortable, and quite at home. We could talk freely, and began to realize more fully the dreadful catastrophe we had witnessed. It appeared more terrible to us now than at the time, or during the night, as our own safety then was very doubtful. In the afternoon I laid down and had a sleep, and a troubled sleep it was. I passed through all the horrors of another shipwreck. And for many nights after, and I may say many weeks after, I had to go through the same ordeal. At night, I can't say we went to bed: most of us lay down on the

wheat, which was loose in bulk, and covered ourselves with sails, and felt very comfortable: such a happy change from last night.

The next morning we found ourselves all very sore, particularly our hands. Having sat so long in one position, our knees and legs got stiff, and some could barely manage to crawl about. The weather was still boisterous. About noon we had quite an alarm. The rudder-head was carried away, and of course the vessel became unmanageable; the seas thumping against her sides most unmercifully. We had a carpenter in our party; and he and some of the others rendered the Italians great assistance. In the course of half-an-hour all was secure again. The day passed and another night came. Next morning (Sunday) we found the weather still unpleasant—wind unfavorable—with no prospect of getting to land that day. We were now getting uneasy, longing to see land again. The captain gave us to understand that he could not land us at Brest; but would go on to Falmouth, which was just as agreeable to us as the former place.

So another, the third night came, and we really hoped that we would get on to land to-morrow. When it came, which was now Monday, it was fine, with a fair wind. We were now in the English Channel. About 10 A. M., sighted land—the Scillys or Land's End. How rejoiced we were once more to behold it! We were now all alive and happy with the thoughts of being on shore at night. During the afternoon were anxiously looking out in hopes a pilot would be got to take us in. Evening came and none was to be seen. The wind increased, and we were in doubt if we would get in before night after all. The two Lizard lights bore nearly ahead of us, and we running towards land. About 10 P. M., the vessel was put about to stand off for the night, and by twelve o'clock the wind had increased to nearly a gale, blowing dead on shore. The captain with his crew on deck all the time, apparently very anxious; we could not communicate our fears, or learn anything of our state. They were continually singing out and directing; and we not understanding them, rather tended to increase our fears.

But our little barque held her own. Between three and four in the morning, she was put about to run slowly to the land. The day broke with a fog; soon it rose, and then was to be seen the land close by, and we running along, with Falmouth harbor fair before us. Three cheers for our captain! We ran in and dropped anchor. Shortly after, an agent or interpreter came on board. Our history was made known to him. When he returned to the shore he took three of us with him, including the chief engineer, who then made his report, and the news was soon telegraphed to London. I could scarcely believe my good fortune when looking

back to five or six days ago; then it appeared too much to expect—and now that I was commencing a new existence. On Wednesday night, on board the *London*, there seemed to be so little possibility of any ever being saved, much less me; and I so fully expected to meet death.

We had to remain on board a few hours until noon, when a steam-tug came alongside. The captain took us on shore, we said good-by to our Italian preservers, and with many cheers for them we parted. I need not carry the history of the adventure any further; but am pleased to add that when the facts were made known to the Board of Trade of London, a gold chronometer, with a suitable inscription, was awarded to Captain Cavassa for his noble and humane conduct towards us.

OLD AND NEW STYLE.

The ancients had various methods of computing time. The most enlightened determined the length of the year by the amount of time taken by the earth in its periodical passage around the sun, calling the period thus adopted as the unit of measure of time a solar year, and divided the year thus obtained into months according nearly with the orbital motion of the moon. A revolution of the earth on its axis has universally served as the basis of all measures of time, and it is the only measure of a day.

Twelve lunar months are not enough for the exact solar year, and thirteen are too many; 365 days are also too few, and 366 exceed the true year. These facts were noticed by Julius Cæsar, who, considering 365 days and 6 hours to be the true length of a year, corrected the error in the calendar somewhat by constituting every fourth year to consist of 366 days, and the intermediate years of 365 days each. The long or leap years, which had an intercalary day each, were always known by being exact multiples of four. This calendar has been generally designated as the Julian, and the mode of reckoning time by it is now called the old style.

As the Julian calendar made the year about eleven minutes too long, an error of ten days was produced in the calendar during the period that intervened between the time of the Council of Nice, in the year 325, and the time of Pope Gregory XIII., who was advanced to the papal chair in 1572. On this account Gregory undertook a reformation of the calendar, which he effected in 1582, and which was almost immediately adopted in countries where papacy prevailed. In order to obviate the error which had arisen, it was ordained that the year 1582 should consist of 355 days only, and that ten days, between the 4th and 15th of October, should be thrown out of the calendar

of that year; and also, to prevent further irregularity, that no year terminating a century should be bissextile, excepting each fourth of such years. Three days are thus retrenched in every four hundred years, because the lapse of eleven minutes for every year makes very nearly three days in that period; leaving an error of one day only in about 5200 years. The alteration caused by this reformation produced what is commonly called the Gregorian Calendar, and the mode of reckoning time called the Roman or new style.

It will assist the memory by observing that when a year ending with 00 is divisible by 400 without a remainder, it is leap year; and when there is a remainder, the year consists of 365 days only. All other years in the century divisible by 4 are likewise leap years, and consequently have two letters in the Dominical Tables, the first being for January and February, and the second for the other months of the year. All years which are not leap years begin and end with the same day of the week, and consequently each successive year commences one day later in the week, except leap year, when the difference is two days.

The new style of reckoning time was not adopted in Great Britain and its colonies until 1752, when the necessary correction, for obvious reasons, had increased one more day. From the time of the Gregorian reformation of the calendar, in 1582, to the year 1699, inclusive, the difference of style was ten days; but, as the year 1700 became a common year, instead of being a leap year, by a provision of new style, containing only 366 days by the old style, the difference became eleven days. In reducing this error, it became necessary to take eleven days from the calendar, which was effected by calling the 8d day of September the 14th. The difference of the number of days requisite in different centuries for reducing old style to new has been the cause of many mistakes, it not being noticed that the dates of events happening in different centuries require amounts of correction respective of the time of their occurrence. For example. The Pilgrim Fathers of New England selected Plymouth as their place of residence on Monday the 11th day of December, 1620, old style; which corresponds in new style with Monday, December 21, 1620, and not with December 22, as was erroneously adopted at Plymouth in 1765, at the first celebration of that event. This error arose by adopting the correction of eleven days, the proper correction for events occurring between the years 1699 and 1800, it not being considered that this event happened in the previous century, when ten days only were required.

The old age of a good man is the evening of a fine day, affording an opportunity of the most

serene and pure enjoyments. If clouds arise, they are generated from earth. The sun maintains a steady lustre, and, let it be observed with joy and thankfulness, its radiance wonderfully expands at the close of the day.—*Harri-son's Adversaria.*

DEATH OF A COLORED LAWYER.

Mr. John S. Rock, of Boston, died in that city on Monday, from consumption. Mr. Rock was a colored man, a perfect gentleman, a ripe scholar, and a consistent Christian. Three years since he was admitted to practice at the bar of the Supreme Court at Washington. He contributed several brief essays, which were published, on national affairs, in reference to the "prescribed race," in which was exhibited a high order of talent, both in the choice of language and the depth of reasoning powers. Mr. Rock married a daughter of the late John Bowers, of Philadelphia, and with his wife he removed to Boston. The climate there did not agree with her, and she fell a victim to consumption, and departed this life in March last. Mr. Rock's health also gave way from the same cause, and he was obliged to relinquish a large and growing practice. He had already made his mark as a lawyer, and justly won the esteem of that large class of intelligent people of Boston who have more regard for culture than color. In his intercourse with mankind he was ever courteous, and in his last hours, when about to enter the dark valley of the shadow of death, its gloom seemed to be dissipated by the never-failing light of Christianity, which had guided him through an eventful and a well-spent life.—*The Press.*

HENRY M. LAING, Treasurer,
No. 30 N. Third St.

Philada., 12th mo. 15th, 1866.

ITEMS.

The French troops commenced the evacuation of Rome on the 4th inst. On the 6th the officers of the French army of occupation took formal leave of the Pope at the Vatican.

The anticipated troubles consequent on the withdrawal of the French troops have not occurred. The city is tranquil. The idea that the Pope has an intention of leaving the city is universally abandoned.

The French Government has notified Secretary Seward that all the French troops will leave Mexico in the third month next.

The Government of Prussia is about to send an

voys to Vienna. Now that peace has come, there is a determination on the part of both Austria and Prussia to renew their commercial relations. Negotiations to that end will be immediately opened by the envoy.

A large delegation from the Northwest tribes of Indians are to be sent as a contribution from the United States to the Exposition. The Indian Bureau and Colonel Rowland, the Commissioner of the Northwestern States and Territories, have extended every facility in their collections. Henry C. Jarrett will take the management of the party. They will carry with them their various costumes, wigwams, war and agricultural implements, and will form the only contribution from the United States to the tenth group within the limits of the Exposition. They will leave New York about the 10th of Third month. The Imperial Commission has made the most urgent requests to our Government that there should be such a representation of our aborigines.

CONGRESS.—In the Senate, a memorial urging the expediency of employing a portion of the navy in surveying the bed of the Atlantic, with a view of laying telegraph cables between the United States and Europe, was referred. A memorial of silk manufacturers was presented, asking for a higher tariff on imported silks. The bill for the admission of Nebraska was reported, with a favorable recommendation, was discussed at length, and then was laid over. A bill for the admission of Colorado was introduced and referred. A resolution was referred providing for the publication of a volume containing the colonial charters and various State constitutions of each State of the United States, together with all amendments at any time in force, the whole to be arranged by States. The deficiency bill from the House was concurred in with the amendments. A report was made favoring the printing of the Land Commissioner's report in French, Swedish and German, for distribution at the Paris Exposition. The bill to regulate the franchise in the District of Columbia, giving the right of voting to all males over 21 years old, not convicted of crime, without distinction of color, except paupers, and persons under guardianship, and those who voluntarily left the District to aid the rebellion, was several times under discussion; various amendments were offered and rejected. The bill finally passed.

HOUSE.—The Committee of Ways and Means were instructed to inquire into the propriety of reducing or abolishing the internal revenue tax on manufactures. The bill to fix the times for the regular meeting of Congress, on the 4th day of 3d mo. in each year, was taken up and passed. A resolution was adopted instructing the Post Office Committee to inquire into the expediency of establishing a Southern overland mail from San Francisco to Memphis, Tennessee. A bill was introduced ordering the collection of the unpaid taxes in the insurrectionary districts, with the penalty and interest. Referred. A bill was introduced for the establishment of civil government in North Carolina, to enable it to resume its former relations as a State of the American Union. Referred to the Committee on Territories. A bill was introduced for the construction of a telegraph line from Washington to Boston, to be under the control of the Post Office Department. Another bill was introduced, for the construction of a Government telegraph from Washington to New York. Both were referred to the Post Office Committee. A bill was introduced providing territorial governments for the districts lately in rebellion. It confers suffrage without respect to color, and disfranchises those engaged in the rebellion. The Senate amend-

ments to the deficiency bill were concurred in. The Senate bill to regulate the elective franchise in the District of Columbia was passed—yeas 118, nays 46.

THE FREEDMEN.—Great suffering and destitution are said to prevail at Chattanooga. One negro was found who had no other clothing than the cape of an old overcoat wrapped about his loins, and a bed-ridden freedman was discovered lying under an old blanket, naked and helpless. In East Tennessee, Gen. Lewis, commissioner of the Bureau, reports the freedman as generally prosperous and living on terms of amity with their employers. Colored schools are rapidly increasing, and the freedmen are everywhere manifesting a craving desire for education.

The Georgia Legislature adjourned on the 14th instant. The sentiments of the members of both Houses were decidedly in favor of a territorial government rather than the acceptance of the constitutional amendment, or similar terms.

A FEMALE of experience desires a situation in a public or family school. Can give good reference. Address WM27 if
TEACHER, New Port, Delaware.

SPURGEON ON GEORGE FOX.—An address before Friends' Institute, in London, by C. H. Spurgeon. Price ten cents per copy, or \$5.00 per 100. Just published and for sale by

We are indebted to a friend in England for the following Address from a Baptist minister in London. Many interesting points are embraced in it, but we do not endorse all the views expressed.

"GEORGE FOX."

*An Address delivered to the Society of Friends, by
O. H. SPURGEON, in Devonshire House Meeting-house,
Bishopsgate Street, London, on Third-day Evening,
11 month 6th, 1866. Charles Gilpin, Esq., M. P.,
in the Chair.*

Friends,—When first it was in my heart to address you, I did not at all suppose that it would be in the form of a lecture. I thought it possible, if God so ordered it, that I might have spoken to you for about ten minutes or a quarter of an hour, upon a spiritual subject which for two or three years has pressed very heavily upon my mind. It seemed to me that you, esteemed Friends, were a picked body of men, peculiarly set apart to be the advocates of spiritual religion, that you had suffered long for it, that your history had been highly honorable to yourselves in years past, that you still loved the spirituality of godliness, and were not to be bewitched by the formalism of this age; but I thought that your testimony was hardly loud enough; that though it was clear as a bell, it was not shrill as a clarion; and I hoped also that if God should put it into your hearts to permit me to say a few earnest words to you, there might be young men amongst you who

might be stirred up to lift up their voice like a trumpet, to cry aloud and spare not, and to tell to this age its sins and iniquities.

This has not happened, but I have been asked to deliver a lecture instead, and the topic chosen is George Fox. Now, to lecture Friends upon George Fox is an extraordinary proposition, and I do not at present see that I was prudent in my choice. You must all of you know much more about that honored man than I could possibly tell you, and I can only say that if you do not you should, for his "Life" well repays the earnest student. It is a rich mine. Every page of it is precious as solid gold. Books now-a-days are hammered out, and you get but little metal in acres of leaf; but the "Journal" of George Fox contains ingots of gold, truths which require to be thought of month by month before you can get to the bottom of them. To talk to you about George Fox is bringing coals to Newcastle, and doing a work of supererogation, but nevertheless, as I am to do it—though it is not what I wanted to do—we must try to make a cross between what we wished and what is announced. We must have something like an address, and yet it must be a lecture; well then I should not wonder if it be most like a sermon after all. I have heard of a man, a Harp Alley sign painter, who was in the habit of painting red lions, and had painted so many red lions, that when one day an innkeeper asked him to paint an angel, he said, "Well, I will paint you an

angel, but it will be very much like a red lion." So, this "lecture," as it is to be called, will be very like a sermon, and yet not altogether very widely apart from an address or a lecture. I am amongst those who bear the name of "Friends." I have no doubt that you will honestly wear that title to night, and that I shall find you friends in listening to what I want to say. If I should find any fault with you, you will remember that you did not ask me to come here to flatter you, and I know you do not desire that I should do so. If I say anything that is wrong, you will put it down to my ignorance of the matter; but, at all events, you will not suspect me of unfriendliness, for I have no object in standing here to night but, in the fear of the Lord, to say some things which, by the Holy Spirit's power, may be useful to this audience, to your Society, and to the world.

I shall not be expected to-night to enter into the doctrinal opinions of George Fox. Many of you well know the opinions which I have set forth, and which I believe to be contained in God's Word; and you know also that these are very different from the theological teachings of George Fox. It would not be profitable to enter into controversy to night, nor are we at all in the frame of mind for it, and I shall not, therefore, introduce any discussion of the doctrinal teaching of George Fox. Indeed, doctrinal teaching does not appear to me to have been George Fox's forte. We have to look to his successors and his immediate disciples for a fuller and clearer laying down of the theological basis of your Society, than we find in Fox himself. I look upon George Fox rather as a practical than as a doctrinal man, and as experimentally carrying out in his own life the work of the Spirit of God rather than as being a creed-maker, or as fashioning formulæ or framing propositions to which any man might be required to subscribe. I suppose that Fox would object to your own creed. I have the notion that he would object to any creed, as a creed; and that even if he agreed to what was laid down, he would object to its being laid down at all; I think he would say, "No, these things may be true enough, but, lest by any means this creed should be used to bind another man's conscience, I will not agree to it; I believe it and receive it, but I will not subscribe to it, lest it should become, as all creeds do become in process of time, mere dead letters and instruments of tyranny."

Looking through George Fox's life, and viewing him as the great champion of purely spiritual worship, one is inclined to say, with William Penn, that his epitaph might well be, "Many sons have done virtuously, but thou excellest them all;" for though in his own age and in his own time there were many bright

stars, yet there were some points in which George Fox outshone them all. There were some particular truths which it was given to him to feel more intensely and to set forth more vehemently and constantly than any other man of his own time, or than any other man since his time, more especially the great truth that religion is of the spirit, that it is an inward thing, and is not to be judged, and weighed, and accounted of according to the externals of a man, but according to his inmost soul.

When George Fox appeared it was a singularly perilous age for true godliness, when a new band of witnesses must arise, or truth would be put to shame. Just as every year, early in the spring, you see the young buds appear, all green and vigorous, and then those young budlings swell until they burst into leaf and flower, but towards autumn begin to decay and fall, and other and younger buds follow them—so, very much has it been in the history of Christ's church in the world. There has blossomed in the church a body of spiritual men, full of vigor and freshness; these have endured a stern fight of afflictions, like the young buds in the early frosts of spring. They have borne it, they have grown under it, they have expanded, they have come to perfection, and there has been a delightful time of summer. But, alas! the decay of autumn has followed, and this vigor of godliness has declined, and another more spiritual band of men has followed them, pushed them off, and taken up their place. One band of men, fully spiritual, has for a time maintained the truth, but has then gradually declined through success; for so it is with human nature, that when we cease to be persecuted, when we get to feel that we are in easy circumstances, we lose the vigor of grace which we once possessed, and another and more faithful brotherhood takes our place. Perhaps it will always be so, and after one backsliding generation there will arise a more earnest people, and another, and yet another, until the end of the dispensation, so that God shall never lack a spiritual seed in the world, to keep alive vital godliness.

Now it so happened that the Peritans, who had been like the spring buds and had blossomed, were getting into the sere and yellow leaf; and the Independents, and Baptists, and other sects, who were at one time thoroughly and even remarkably spiritual, were growing worldly, political, and vainglorious; the evangelical professors had come to feel that they were numerous and powerful; they had an opportunity of grasping the carnal sword; they embraced that opportunity, and from that moment very many of them lost the spirituality for which they had been eminent. The danger was lest the evangelical sects should quietly

settle down in one State Church, make a scramble for the good things of the Ecclesiastical Establishment, and preach each one after its own fashion, in the numbness of death rather than in the power of life. It did not quite come to that, but it did seem as if it would do so. The very men who were once most vehement for liberty when they were down/rodden, were ready to put down others when they had the opportunity, and those who had vindicated the spirituality of Christ's religion were about to fall into formalism as soon as they had the opportunity of escaping from the galling yoke of oppression and persecution. At that very moment God sent into the world George Fox, who must have been the most troublesome of men to those good easy souls who counted upon a quiet season of sleep. They had said, "Soul, take thine ease; thou hast much goods laid up for many years." It was by the mouth of George Fox that God said to each one of them, "Thou fool!" Very soon declining professors found that another people would spring up to take their place, and that if they left the separated path and began to mingle with the world, and to war with carnal weapons, God would find another people who should stand alone and vindicate his truth against all comers. George Fox, it seems to me, was a blessing, not to you alone, but to the whole of Christendom. He was sent of God, not only with a view to this Society in after years, but to the Christian church at large of that time, and to the church of God in all times. I do believe that under God, directly and indirectly, perhaps more indirectly than directly, George Fox was the means of driving out from their nests those who were very willing to have feathered those nests well, and to have taken their rest. He stood up in the face of the Christian Church, and said to it, "No, thou shalt not do this! Thou shalt not conform thyself to the world; thou shalt not go into an unholy alliance with the State; there shall still be in the midst of thee a spiritual people who shall bear their protest that Christ's kingdom is not of this world, and that religion standeth not in forms and ceremonies, but is a matter connected with the inner man, and is the work of God's Spirit in the heart." You will judge, therefore, what my idea of Fox is when I have said that I look upon him as having been sent from our heavenly Father upon the important mission of saving the Christian church at a particular juncture, when, through having obtained the possession of State power, and being much exercised with the brawls of rival creeds and contentions upon outward ceremonies, the inward power was declining, and the church was likely to become absorbed into the world, or to set up a dead formalism which is neither acceptable to God nor serviceable to man.

Now, who was this man whom God thus raised up? I cannot pretend to go through his life; besides, you know it all; but if one might put a finger on one of the most beautiful events of his life, one would single out *his conversion*. He had a godly mother, but yet he needed conversion. He was an excellent lad, naturally disposed to everything that was serious, not at all given to the usual vanities of youth, not undutiful, not likely to run into vice or even into ordinary follies; and yet the truth was applicable to him, "Ye must be born again." He was not exactly the kind of child that we would wish all our children to be, for a little of the natural sportiveness of youth, when it is not associated with sin, makes the family hearth happy, and the prattle of childhood we would not restrain. George was a special child, a prophet in his youth, a Moses acceptable with God, and strangely enough, his parents thought to put him into the priesthood of the Church of England. As Moses' supposed parents would have made him king of Egypt, who was to be Egypt's greatest plague: so Fox's parents would fain have made him a helper of the Established Church, who was to help to tread it under foot. But notwithstanding the gentleness of his disposition and the excellence of his deportment, like our own children he needed conversion, and that conversion, in God's grace, came. He has given us a very interesting account of how the Lord met with him in his solitary walks and musings; how sometimes in a hollow tree, or in the open fields, God was pleased to reveal to him the disease of his nature, to direct him to the precious blood of Jesus, and to lead him to put his trust where I hope we are all resting, where we must rest if we would enter heaven, upon the finished work of our dear Redeemer. He was terribly depressed and cast down, just as most of God's children are when first they arise and go to their Father. He was bewildered, perplexed and afflicted by those from whom he expected light and comfort. He tried to trust where you and I once looked in vain for succor, namely, in an arm of flesh and in carnal confidences. He went to the supposed ministers of Christ, and found them to be miserable comforters. Some of them may have been real ministers of Christ, but they were either in a bad humor or were not skilled in dealing with disordered minds; at all events, they were not able to meet the peculiarly deep and solemn exercises of this singular young man, whose "verities" were as true as other men's oaths, and whose conscience was wounded by matters which were sport to less spiritual minds. He found one of these divines as hollow as an empty cask, and another told him to overcome his distress of mind by smoking tobacco and singing psalms. He obtained from a third what is most excellent ad-

vice to any young man who can afford it, the recommendation to get married; another bade him join the volunteers. "As he that poureth vinegar upon nitre, so is he that singeth songs to a sad heart." Poor remedies these for a distressed conscience! Alas for the physicians who prescribe tobacco smoke and bleeding as cures for a sin-sick soul! And yet what can the world do more for souls who are under the convincing power of God's Spirit. What remedies dost thou know of, poor blind world? Thou canst not open the eyes of thine own blind sons and daughters; how then canst thou lead the children of light in the way of peace? "One only hand, the pierced hand, can heal the sinner's woe." Fox, after going to one professor and another, inquiring as to this and that, at last found peace where we too found it, if we really have it, namely, from the love of the Lord Jesus.

(To be continued.)

Our life is but a passage to eternity; it ought therefore to be filled up with meditations on it and preparations for it. Who would not deny himself for a time that he may enjoy himself forever? Remember, you are at the door of eternity, and have better work to do than to trifle away time. Those hours which you spend in devotion, or in doing good, are the best of your time, and will have the sweetest influence on your last hour.

SELECTIONS FROM THE WRITINGS OF JOHN BARCLAY.

(Continued from page 663.)

To R. B.—*lt.*

Fifth Month 1st, 1818.

DEAR R.,—Bear with me, who am but a younger brother, if in a little of that love, which is ever ready to esteem another better than one's self, I should be bold to express to thee my opinion, that any contrivances to store and stock the memories of young persons with a literal knowledge respecting religious matters, cannot of themselves be productive of that true and living faith, which we as a people profess to seek an establishment in. I am in the full belief, that Scripture doctrines cannot be really, rightly, and savingly known and held by any, if they come not to have them written in their hearts; so that, though they may be ever so well initiated in something which looks like a perfect knowledge of these things,—though they may be able by the exertion of their natural understanding, and by dint of their memory, skilfully and readily to reply to those who may make inquiry of them,—though they may be wise as Apollos in the words of Scripture, and seem competent to explain and support our religious principles;—yet all this will avail nothing, if the wrong wisdom be uppermost in them, and sit as an angel of light,

and rule and reign in their hearts; while the babe, the seed, the very Truth in them, is crushed and crucified. I desire therefore, that I myself and all others might be engaged in patiently waiting upon the Lord in the silence and subjection of the fleshly wisdom; that so, that disposition which would be setting us upon manufacturing for ourselves something to believe in, or to profess a belief in, might be starved and tired out: thus should we in the Lord's own time, be led into a true and saving knowledge of those truths which are needful for us to understand. I well remember what Robert Barclay's experience was, as described in that part of his *Apology* which treats of worship. He says, that he did not come to receive the Truth, by strength of argument, or by a particular disquisition of each doctrine, and conviction of his understanding thereby; but by being secretly reached by the life: "for," says he, "when I came into the silent assemblies of God's people, I felt a secret power among them, which touched my heart; and as I gave way unto it, I found the evil weakening in me, and the good raised up: and so I became knit and united unto them, hungering more and more after the increase of this power and life, whereby I might feel myself perfectly redeemed. And indeed, this is the surest way to become a Christian; to whom afterwards the knowledge and understanding of principles will not be wanting, but will grow up so much as is needful, as the natural fruit of this good root; and such a knowledge will not be barren nor unfruitful. After this manner, we desire, therefore, all that come among us to be proselyted; knowing that though thousands should be convinced in their understandings of all the truths we maintain, yet if they were not sensible of this inward life, and their souls not changed from unrighteousness to righteousness, they could add nothing to us."

It seems a very truth with me that, though for good reasons we, as a people, account our children to be our members, yet no one can be rightly and truly our member, who comes into the fold by any other way than 'by the door, Christ Jesus; and that although we may do all for our dear youth which our wisdom is competent to do, in the way of religious instruction, yet nothing will supply the place of that earnest travail, that patient exercise of spirit on their account, which is indeed availing with our Heavenly Father, and which is much wanted among teachers and guardians amongst us. So that the line of our labor seems to me to be more in endeavoring to direct them to the fear of the Lord,—to engage them to self-examination,—to shew them the place of true waiting,—to point out to them where the Fountain is, where the treasure lies,—and to prevail with them to come, taste and see, the goodness

of the Lord, and what he hath in store for them that love and wait upon him.

Some may be disposed to lament over the little acquaintance, which young persons in our Society appear to have, with the reasons or grounds of our peculiar religious profession. No one, I am ready to think, laments it more than myself: but if such think to patch up a remedy by the adoption of those creeds, catechisms, and confessions of faith, which the worldly professors adopt, and have adopted (as I believe,) ever since the apostacy, and out of which Truth led our forefathers,—I lament this remedy, still more than the disease. Because, then we stand in danger of having a set of young formalists rise about us; whose heads are likely to be more filled with notions, than with that nothingness of self, which is as truly the introduction to all right knowledge on these subjects, as the other is a snare and stumbling-block in the way of it. I apprehend that the principal cause of the ignorance above adverted to of our religious principles, and of the reasons that may be rendered in support of them, is, not so much the want of having examined such books as have been written on these subjects, as of a serious seeking unto Him, “in whom are hid all the treasures of wisdom and knowledge;” who said, “Seek, and ye shall find,”—and whose promise of finding was, and is, only to the wrestling seed of Jacob, who, doing the will of the Father, know of the doctrine of the Son; and to whom it is given in the very hour of need, what they shall answer, and what they shall say in defence of the Truth.

It seems well for me, (though very sensible of my own state of childhood in religious growth,) here to state how I came to believe and receive the Truth, and the doctrines of it, as professed by us. When it pleased an unutterably merciful Power to pluck my feet out of the midst of mire and filth, and clearly to shew me what I was, and what I should be,—then there sprang in me living desires to know the way to the kingdom;—then it was that the enemy, as a transformed angel, took me into the wilderness of notional religion, and set me upon examining different systems of religious belief, in my own will, as well as upon judging of them by my own wisdom: and I compared doctrine with doctrine, text with text, and became, by diligent study, wise in notions, though truths in themselves; and the enemy made me strong in argument, and potent in Scripture. But how shall I speak of His goodness, who broke the net in which I was entangled, and delivered me from the snare; and who introduced me in measure into the saving knowledge of Himself, even that which is revealed, as in the cool of the day, by the still small voice. O! how plainly did I then see,

that all which I had learned, read, held, and believed in my own will, was to be given up; how clearly did I see, that all knowledge, faith, obedience, but that which the Father was pleased to beget and raise in me in his own season, was good for nothing, and must be cast out as salt that hath no savour—as manna not fit for present use. And though I have read many books, which treat of and support our principles, believing that they are very comfortable and confirming to him who hath come to the fountain-head, whilst his mind is turned inward in reading them, and also useful in satisfying the simple-hearted inquirer, whose simplicity the Lord regards, and of service in stopping the mouth of gainsayers; yet to this very day, I dare not sit down and study Friends' opinions and principles, as a science, but find myself constrained to wait upon the Lord day by day, that so, as much strength, as much knowledge, as much satisfaction in regard to religious matters, as is best for me in my religious condition, may be handed to me. And in truth, this is the surest way, saith my very soul, from daily experience; for things have never been cleared up to my certain satisfaction in such a wonderful manner, as since I have been under this discipline of the cross to all selfish wisdom. O! the sweetness of being under the tuition of Him, who verily teacheth as never man taught.

I am thy affectionate friend,

J. B.

[In a letter to another Friend upon the same subject, he writes:]

As to religious instruction, it consists, if I mistake not, in bringing up children in that nurture and admonition which is of the Lord, as saith the Scripture. Now, how can any bring up children in the Lord's nurture and admonition—in the Lord's ordering in his counsel, direction and teaching. I say how can this be rightly and effectually done, except the parent or teacher stand in *this counsel himself*, and abide himself under this best direction? how can he be instrumental to instruct, help, and lead forward, if he be himself out of this counsel,—if he be not under the ordering of that which is meek and lowly in the heart of that pure principle, which is said to lead into all truth, as it is heeded, waited on, and submitted unto, in its simple silent instructions? How needful it is for a master or a parent to be brought to see that that which is to be known of God is manifested in man; and that there is no really knowing the things of God, but by His light and Spirit in the heart,—as said an eminent minister and messenger of the gospel, George Fox,—“no knowing the Son, nor the Father, but by the revelation of the Holy Spirit; no knowing the Scriptures but by the same Holy Ghost, that moved the holy men to

give them forth; no calling Jesus, Lord, but by the Holy Ghost; no true wisdom, but from above; no true receiving it, but in the fear of the Lord; no true understanding of spiritual things, but what Christ gives; and no true love to God, but what he sheddeth abroad in the heart."

I firmly believe, that as the deficiency complained of in our children, chiefly arises from a want of true living Christian concern in the minds of parents and masters for their religious welfare, so they ought not to be put upon, or to put themselves upon any contrivances, which best wisdom does not lead them into, and control them in the use of; but they must come to that, which alone can quicken and raise up in them a living concern for the religious welfare of their charge; and they must yield *themselves as obedient children* to its teachings. Thus will they come to know something of an establishment in the Truth, and a growth in living experience and substantial knowledge of the principles and precepts of the gospel, which is the *power of God*. Thus furnished, thus fitted to take the charge of youth, under a sense of duty, and above all inferior views, the master will be a blessing to his little ones. He will want no catechism to instruct them in, no creed to examine them by; he will not think of making them give confession of their faith; but His watchful eye will be continually over them for good, his patient exercise will be great on their account, his prayers will go up acceptably for them, not as a matter of habit, but as it is put into his heart by His heavenly *Master*, who knows what he has need of before he asks. Opportunities will often occur of giving them counsel or reproof, of opening and explaining the Scriptures of Truth, of informing them respecting our religious testimonies and principles; but above all, of directing them to turn and keep their minds inward towards God,—shewing them the place of true waiting, the source of true wisdom, and both by precept and *example*,—as was conspicuous among our early Friends. O! here is the truly religious instruction; a bringing up young people in the fear of the Lord, and in His new covenant of life; wherein it is said, all are to be taught of Him,—all are to know Him from the least to the greatest: and here is a building up in the true faith, of which the Lord, not man, is the author and the finisher.

Thy affectionate Friend,
J. B.

1818, *Tenth Month*, 11th.—I have of late put but little to paper by way of remark, as to the state of my mind, not having felt much freedom this way; yet I may here acknowledge, that the same Power, that hath all along helped and sustained me, is not, nor has been, wanting in the needful hour; of which the Lord is the

best judge, and not I. My feeble cry is yet unto Him under all my discouragements and exercising seasons. The little lowly tender seed, which he had quickened, and in measure raised in me, doth still look unto its Parent for daily sustenance; His ear is ever open, unto the cry of His poor; and His eye of pity and compassion is still upon that birth which is of Him, to cherish and to care for it, and to provide all things needful. O! for the continuance of His Fatherly goodness, and for the renewed extension of His preserving arm of power around me; that so I may be restrained thereby from all hurt and harm through this vale of tears and temptations, and sustained by the same through all the depths of affliction, into which He may see it best for me to be plunged, for my purification and peace. My heart is much tendered and impressed, whilst writing these lines; for indeed, I am not able sufficiently to mention how good the Master is,—how worthy to be glorified, trusted in, obeyed, and loved, by all His servants and children.

(To be continued.)

For Friends' Intelligence.

"And he said unto me write, for these things are faithful and true."

Has not a voice that speaks as never man spake uttered a language like this, clear and plain, in the hearts of the talented, the learned, and the deeply experienced of our day? And why is it not listened to and obeyed? Why do not those scribes who have been instructed in the kingdom of heaven, bring from their treasures things new and old,—laying before the people illustrations of those eternal and unchangeable truths that are designed by God to shape the destinies of nations, and thus add a new link to the chain of experience brighter than aught that had gone before? As ages roll on, and as we yield to the calls of divine grace, will not the result be an increase of light from the most excellent glory, shining with effulgent brightness,—revealing the duties of men in this critical period of the nation's history, and the efficiency of a power omnipotent to save? It is high time to bring the candle from under the bed and bushel, and place it in its true position. Some may think such is the state of things that it will be of no use for *individuals* to try to effect a change. Let all such remember that if in the darkest night a traveller on the highway beholds but a glimmer from afar, and keeps his eye steadily fixed upon it, the nearer he verges towards it, the brighter it becomes; and at length, pursuing a direct course, he finds himself encircled with light in a safe place, with his difficulties all left behind him. Here may be comprehended a prophecy in Isaiah: "The light of the moon shall be as the light of the sun, and the light

of the sun sevenfold as the light of seven days." When the earth in her revolutions gets between the sun and the moon, an eclipse is inevitable,—so with our vain reasonings and questionings and endless endeavors to scan cause and effect. We become blind in our imagination, and bring a dense shadow between the soul and the eternal fountain of light and life.

God works by means, both in Church and State. Nations and societies are composed of individuals. Let none say, "Send by whom thou wilt send, but not by me: but rather say, here am I, send me," and go out willingly as ambassadors for the Prince of peace, with the language of *love* to the great family of mankind—"Be not overcome of evil, but overcome evil with good." S. H.

KEEP UP FAMILY TIES.

There is no respect in which our modern civilization is so wasteful as in failing to utilize family ties and connections. No one knows the wealth of experience that is utterly wasted by the separation in habits, feeling and society, of the aged from the young, and parents from children. The impatience of many young men to get away from home, and from the home circle, cuts *two ways*; it reflects on the parents for not having made the home life more attractive, and it still more augers ill for the future prospects of that impatient youth who longs to get away from the eye and from the heart of family ties and regard. It is still more dangerous for young women thus to long and to act against the counsels and wishes of the family head. No doubt it sometimes makes a youth strong to be thrown upon his own resources, and often outwardly both manly and successful; and where such steps are taken under the family and parental counsel, it is generally the best thing for giving self-dependence. But where there is already too much of that, it produces an impatience of control and immaturity that are certain to produce an after-weakness and crudity in the plans of life rarely recovered from, and which family counsels would have supplied. Comte, the great French philosopher, comes round to the Chinese idea, which is the most ancient, that the *family* is the center and essence of all civilization. Naturally, a youth should be a member of his own home circle till prepared to go out from it with the full parental blessings, to form the germ of a new and independent family. All the artificial arrangements of boarding, and especially of young men or young women leaving their homes and clubbing together without family ties and restraints, are dangerous and mischievous, because a deviation from the great laws of nature. They may and should be remedied in part as circumstances allow, but the closer to nature the nearer to right.

The company of one's own family is a thing that nothing can quite supply the place of. No doubt other company is good, too, at times. Even a lively and pretty cousin will make a young man spruce up and put on his best manners as a sister cannot. But for a constancy, a sister and the company of the home circle, where the character and habits of all are known, is safer and happier for a young man than any other. It saves from dissipation and bad but fascinating company—from extravagance in dress, which is now the ruin of thousands of both sexes. There is a purity, a moderation, and a character about the home circle that would save thousands of our smartest young men from lives of dissipation and early graves, of ruin and dishonor. Besides, it preserves the life of the old. Parents, whose children have gone from them, feel that they have nothing to live for. No society is like that of their own children; no interests bind them to life so much as watching for the prosperity of their family, and advising and blessing the plans of the young with the experience and assistance of aged wisdom and the weight of influence.

*The business experience of the aged brings with it a double security and honor to the young. It is a great thing to be the architect of one's own fortune. But it is a safer and still more estimable thing for a parent to feel that he has a wise son to inherit his wisdom and experience and property, and carry out his plans. A father's counsels, even where somewhat dogmatically given and pertinaciously old-fashioned, it is no disgrace to a son to submit to and respect; and few are willing to make sufficient sacrifices in youth fully to exhaust the utilities and design of family ties. The old fable of the *bundle of twigs* and their strength is seldom appreciated by young America.*

*In marriage this is remarkably the case. By all means let it be, first of all and above all; the union of two good hearts, by their own choice and love. Yet of the twenty young women which most young men feel in the course of experiences that they *could* make themselves happy with, that *one* that the parents already love by anticipation, and long for and counsel—that brothers and sisters will unite in giving the warmest welcome to as a member of the family circle—that is the *one* who will bring with her a dowry of blessings and good-will and respect and elevation that will make a man always proud of his wife, and happy in her, whatever may betide. In this sense, a perfect marriage is a new union of all ages.*

In religion itself, while each one must ever act with a supreme regard to conscience and to duty, yet it is a great advantage to have such views, plans and social worship as shall unite the whole family in one. Religious extremes tear families apart; but

that piety which binds all in love and charity—which restrains all cursing and swearing and bitterness of speech in old and young, and unites all in praises, prayer and effort—that *family religion* is the truest and most acceptable to the Author of our being.—*Ledger*.

FRIENDS' INTELLIGENCER

PHILADELPHIA, TWELFTH MONTH 29, 1866.

CIVIC DUTIES.—It was with surprise that we learned through a private communication from a valued friend, that he had accepted the Editorial upon "Public Morals," as giving encouragement to Friends to enter into "political strife." We regret that our concern for the welfare of the Government under which we live should be thus construed—it being very far from our design to advocate any measure at variance with the testimonies of truth, as held by the Society of Friends. We are aware that there are individuals who are conscientiously restrained from any political action. We would encourage such to an adherence to their own convictions in this, as in every other duty connected with life. Our concern, in view of our country's weal, embraced more particularly those who, in the liberty which the Truth gives, feel it *right* to endeavor to use their influence to uphold the principle of justice in the formation of the laws by which we as a nation are to be governed. This *should* not lead into party spirit, nor "*political strife*,"—neither need it make a man a *politician*, in the common acceptation of the term. Our faith rests in more effective means than the "war of words" indulged in by such as are actuated by an untempered zeal. Reference was made to the influence Friends were thought to possess, for the purpose of showing that they are in their measure, responsible for the right direction of this influence. If a good man can "shake the country for ten miles round," may we not suppose that a unity of purpose in the support of virtue and truth will have its effect upon the community in which we move? Verily do we believe we are responsible for the duties which devolve upon us as members of the human family; and if it be our earnest thought to "render unto Cæsar the things that are Cæsar's, and unto God the things that are His," we shall be able to discern what is

required in these special relations, and be favored to keep the mind rightly balanced.

We have an instance of this in the Founder of the State of Pennsylvania, who, by his wise legislation, was instrumental in introducing a code of laws remarkable not only for urbanity but for Christian liberty.

It may be urged that Wm. Penn was a man of uncommon mental powers; we grant it; but what would his rich natural gifts have availed him, had he not cultivated them and employed them in the service of the great Giver?

Should we have known him as the wise Statesman and earnest Christian Philosopher? We think not. Now, we cannot believe that the bestowal of the five or ten talents was limited to our revered Philanthropist, but that there are those in *our* day, who, were they equally submissive to the regenerating power of divine grace, and as willing to labor for the good of their fellow-men, would come forth as valiants in the great cause of human brotherhood; and through their agency there might be witnessed the dawning of the day when it could no longer be asserted that our Government is based upon the sword—for through the power of the Highest its "swords had been beaten into plowshares and its spears into pruning hooks."

JANNEY'S HISTORY OF FRIENDS.—The following prospectus announces the completion of this valuable history. Having had an opportunity to peruse portions of the manuscript, we are enabled to speak advisedly of its merits.

The publication of these volumes has been delayed on account of the great increase in the cost of paper, printing and binding since the first proposals were issued. This advance renders it impossible for the author to issue the remainder of the work at the price originally proposed without incurring pecuniary loss. It should be borne in mind that the increase in price is necessarily incident to the changes in the value of currency. We believe the subscribers will be willing to meet this increase, and concur in the view that the loss should be borne by the many, a fair advance being added on each volume, than that it should be sustained by the author, whose time and talents

have, for many years, been devoted to the cause of Friends' literature.

The importance of diffusing throughout our Society such information as is here collected and presented in an attractive form must be apparent to Friends generally. We commend the work to the notice of all, especially our young Friends, and to parents, who will find it an interesting and instructive history to offer to the perusal of their children.

A HISTORY OF THE RELIGIOUS SOCIETY OF FRIENDS, FROM ITS RISE TO THE YEAR 1828. Volumes III and IV. By SAMUEL M. JANNEY.

The third and fourth volumes of this work have been unavoidably delayed by causes connected with the late civil war. During the five years that have elapsed since the second volume was published, so many changes have taken place that it is deemed expedient to issue a new Prospectus.

The two volumes now proposed to be published contain the history of the Society from the year 1691 to 1828, embracing much original matter that has not appeared in any other history. *Biographical sketches are given of the most prominent members of the Society in Great Britain and America, with many instructive passages from their writings and interesting anecdotes.*

Among the subjects of deep interest treated of in these volumes are: *the perils and preservation of Friends during the Irish Rebellion of 1798; the course they pursued during the war of American Independence; their efforts to civilize the Indians and preserve peace with them; the rise and progress of their testimony against Slavery; their early labors in the cause of Temperance; the Separation in Ireland at the beginning of this century; and the Separation in America in 1827-8, with the causes that led to it, and the results that have followed.*

The cost of paper, printing and binding having greatly increased since the first prospectus was issued, it is found that the work cannot be published, *without considerable loss*, at the price originally intended. The price will be, therefore, \$2.00 per volume, bound in cloth; and \$2.25 per volume, bound in sheep, library style; but those subscribers under the first prospectus who have taken the first two volumes, will be furnished with the third and fourth volumes at \$2.00 each, bound in sheep.

The first two volumes can be obtained from the publisher or his agents, at \$2.00 each, sheep binding.

Agents are requested to return this prospectus as speedily as possible—as the work is now in press—with full list of names and residences of subscribers, to the author's publisher.

T. ELLWOOD ZELL,
Nos. 17 and 19 S. Sixth St., Phila.

DIED, on the 15th of Twelfth month, 1866, at the residence of her sister, E. J. Bacon, Philadelphia, of paralysis, ANN, widow of Hugh Roberts, aged 65 years, late of Moorestown, N. J.

—, on the 17th of Twelfth month, 1866, REBECCA WRIGHT, in her 78th year: a member of the Monthly Meeting of Friends of Philadelphia.

—, on the 31st of Tenth month, 1866, in Philadelphia, MORDECAI C. HAINES, in his 45th year.

—, on the of Ninth month, at her residence near West Chester, JANE R. PAXSON.

FRIENDS' FUEL ASSOCIATION FOR THE POOR.

During the winter of 1865-'66, this Association distributed nearly 96 tons of coal and 3½ cords of wood, on 266 applications, thus benefiting nearly 800 persons. Of these applicants, 114 were west of Thirteenth St., 95 were east of Thirteenth St. and south of Green, and 57 were east of Thirteenth St. and north of Green. 131 were Americans, 93 were Irish, 9 were German, 4 were French, 3 were English, and 28 whose nativity was not given; 9 were between 20 and 30, 46 were over 30, 38 over 40, 34 over 50, 41 over 60, 27 over 70, 10 over 80, 2 over 90, and 61 whose age was not entered on the books; 171 were white, 80 colored, and 15 whose complexion was not stated; 67 were married, 15 single, 156 widows, 2 widowers, and 26 not recorded.

In a large number of cases, sickness or infirmities of various kinds existed. J. M. T.

CIRCULAR.

DEAR FRIENDS: With the first month of the New Year will commence the second volume of "The Children's Friend."

In order to have this little work begin with other periodicals at the first of the year, we will issue for four consecutive months, two numbers—one of the old and one for the new year, at the expiration of which period the first volume will be complete.

The new volume will be mailed regularly to old subscribers, without we are notified that the subscription is to be discontinued, in which case the first volume only will be received. Still do we earnestly hope that all will feel such renewed interest in the cause, as to willingly give their continued support in this hour, thus adding strength and permanency to the work.

Nor would we have you satisfied with an individual subscription; but that all who have it in their power will constitute themselves agents, and forward to us new names for the new volume.

Friends, mention this in your monthly meetings; parents, encourage your children; little folks, encourage one another, and in a few months our additional labor will be rewarded by increased success.

We trust you will all be pleased with the new number in its enlarged size, numbering thirty-two pages (double the size announced in prospectus to first volume), and at the same time we would have you bear in mind that this has added largely to our labor and expense, and that only an increase in circulation can meet the demand.

Do not pass this appeal carelessly by, but act with that promptness of spirit that gives life to every good work.

Those in arrears we would be glad to hear from.

Back numbers of present volume will be furnished to new subscribers desiring the same.

Address, ESTHER K. SMEDLEY,
No. 13 South Church St., West Chester, Pa.
West Chester, 11th mo. 30th, 1866.

For Friends' Intelligencer. CHILDREN'S LITERATURE.

For many years past the want of a literature suitable for the children of Friends has been felt among us; a want which we acknowledge, and which, I am sorry to say, few of us make the effort to supply. Our interest seems like a flash of gunpowder, making a little heat and a little noise, but soon subsiding. In the meantime our children are supplied from other sources, and, wandering away from us, attach themselves where they happen to be attracted.

The literature for children is a mighty engine, and we must either use it ourselves, or allow others to do it for us; of one thing we may be sure—it will be used.

I am pretty certain of my ground when I say, "We have never yet had a literary periodical devoted to teaching the truth, as we believe it, to our children, which has paid its way." Our Society is a wealthy one, but appropriates nothing to such a purpose. Perhaps it is best not to do so, but surely a liberal patronage is needed to sustain any paper which will be agreeable and entertaining, truthful and instructive: and our papers have to creep cautiously along upon one-third of the subscriptions they ought

to have, or wreck their proprietors. Few people are aware of the cost of publishing—the illustrations alone requiring a great outlay, only to be met by *many* such small sums as are charged for one number; and most writers say, "It is more difficult to write for children than for grown people." Bearing this in mind, I wish Friends would remember that, in the Fifth month of 1866, a periodical called the "Children's Friend" was started at West Chester, the editress, a young woman of talent and energy, feeling within herself the ability to make an *attractive* paper, provided *sufficient means* were placed at her disposal to do so. Being solicited by some friends, encouraged by others, and seeing the apparent need of such a paper, she commenced it. She has more than performed her part of the bargain, for with *insufficient means* she has furnished a good periodical, her expenditure exceeding her income. This cannot continue; we ought not to allow it to continue. If we want a paper for ourselves, we must pay for it.

"The Young Folks" is sold for the same price; its hundred thousand subscribers represent a hundred and fifty thousand dollars, which can afford to pay for embellishments and attractions of a high order. "The Little Corporal," too, can spend its thousands for anything that is needed,—for writing, for pictures; while a new paper for children, published here in our own city, commences with ten thousand names on its subscription list. Our "Children's Friend" is starving along on less than eleven hundred, needing eighteen hundred to pay for itself, and an additional thousand for the services of the proprietor.

Can we not do something? Many of us might take half a dozen numbers, distributing them among other children than our own, or, we might send five or ten dollars to the editress towards the improvement of the paper, or towards reimbursing her for expenses incurred. At any rate, let us do something; we shall not soon have a fairer opportunity of assisting to *establish* a paper devoted to teaching our children the truth, as we believe it. R.

Overburden not thy memory to make so faithful a servant a slave. Remember Atlas was weary. Have as much reason as a camel to rise when thou hast thy full load. Memory, like a purse, if it be over full that it cannot shut, all will drop out of it. Take heed of a gluttonous curiosity to feed on many things, lest the greediness of the appetite of thy memory spoil the digestion thereof. Spoil not thy memory with thine own jealousy, nor make it bad by suspecting it. How canst thou find that true which thou wilt not trust? Marshal thy notions into a handsome method. One will carry twice more weight trussed and packed up in bundles, than

when it lies untowardly flapping about his shoulder.

ANNUAL REPORT OF THE LIBRARY ASSOCIATION OF FRIENDS OF PHILADELPHIA.

The *thirty first* year of the existence of "*The Library Association of Friends*" of this city having arrived, it again becomes the duty of the Committee of Management to make the usual report of the proceedings of the past year, as well as of the present condition of the Library.

Of their own labors and responsibilities as a committee they can adopt the language of a previous report, that "they have but little to say—the efforts made during former years, and the systematic arrangements growing out of those successful efforts, renders its supervision comparatively an easy as well as a pleasant task to all of them. They would not, however, be understood that it is not a subject of thought, and an object of watchful care with them. They feel that they occupy a responsible position, and that the well-being of the Library cannot be retained without a judicious and constant exercise of this watchfulness on the part of all concerned in its management, in which they believe they have the hearty co-operation of the Librarian.

"And they are of the opinion that these continued exertions have been appreciated by the visitors to the Library, a portion of whom, as has been reported in previous years, are not members of the Society of Friends, but who have been admitted *gratuitously* to equal privileges with them."

And yet, while acknowledging this appreciation, your Committee believe that, so quietly has this Association pursued the even tenor of its way, there are a number of our members who scarcely know of its existence, or if they do, they have not a correct idea of the *extent, variety and value* of the selection of books, that only await their call to be brought into still more active usefulness.

This city embraces several Monthly Meetings of Friends, two of which are probably the largest in the world; and, in our opinion, did the members of these consult their true interests and the interests of society, the shelves of our Library would literally groan under the weight of the volumes that would rapidly accumulate, and our room at all times be crowded with visitors. It will be borne in mind we have no endowment of any description, having heretofore been entirely dependent on the voluntary contributions of but comparatively a few individuals. Like every other commodity on sale, the prices of books are now exceedingly high, and as it is requisite to keep a balance on hand to meet current expenses, our additions to the library have of latter times necessarily been small.

And while we are gratified at being able to present with our limited means as encouraging an account of the use made of the Library as may be found below, we yet earnestly ask the attention of friends generally to the foregoing views, in the hope that the minds of some may be awakened to their importance, being satisfied that a corresponding increase in the amount of our donations will be one of the results.

The use of the Library during the past year has been as follows:—

During the *first* six months,—viz., from the Tenth month last to the Third month, both inclusive,—there were loaned to an aggregate of
762 Females, . . . 1778 books.
435 Males, . . . 1113 “

Making a total of *two thousand eight hundred and ninety-one* volumes loaned during that period.

During the last six months,—viz., from Fourth month 1st to Tenth month 1st, inclusive,—there were loaned to an aggregate of
658 Females, . . . 1541 books.
360 Males, . . . 885 “

Making a total of *two thousand four hundred and twenty-six* volumes loaned during that period; showing, when combined, that there have been loaned during the year, 3319 volumes on 1420 applications of females, 1998 “ 795 “ males, Or a circulation of *five thousand three hundred and seventeen* volumes during the past twelve months.

About *four hundred* individuals have made use of the Library during the past year, of which number about 270 were females and 130 males. About one-half of the entire number were minors, a large portion of whom are between the ages of ten and fifteen years. The Librarian reports that good order is invariably observed, and he is satisfied that many young persons are really improving the opportunity thus offered them for storing their minds with useful knowledge, and do not visit the Library merely for recreation and amusement.

The increase of the Library during the past year has been *one hundred and forty-three* volumes, comprising *one hundred and thirty-five* works, of which *twenty six* volumes were donations; making the whole number of books now in the Library, *six thousand two hundred and eighty-two*, classified as follows:—

Abridged and Juvenile, . . .	996
Scientific, . . .	758
Religious, . . .	1304
Voyages and Travels, . . .	648
History and Biography, . . .	1080
Miscellaneous, . . .	1496

Catalogues of which, completed up to the present time, can be procured of the Librarian.*

Friends' Social Lyceum, established during

the fall of 1863, continued its meetings under the auspices of the Committee of Management during the whole of last season, with, it is believed, increased pleasure and profit to all the participants.

In reference to the financial condition of the Library Association, the Treasurer's account, settled to the 10th inst., makes the following exhibit:—

RECEIPTS.

Balance on hand at last settlement, . . .	\$136 67
Received from subscriptions, . . .	292 50
“ “ fines, . . .	16 78
	<hr/> \$445 90

EXPENDITURES.

Cash paid for New Books, . . .	\$176 20
“ “ Rebinding Books, . . .	28 60
Librarian's salary, and assistance rendered Librarian, . . .	99 50
Insurance on Books, . . .	8 25
Incidental expenses, including Printing and distributing Annual Report, Notices, &c., . . .	39 49
Commissions for collecting Subscriptions, . . .	26 40
	<hr/> 378 44

Balance due the Association, . . . \$67 46

Our collector will ere long wait on our contributors, and will be glad to receive their increased subscriptions.

The Library is now open, as heretofore, on *Fourth* and *Seventh* day evenings, for the accommodation of Friends generally, and on *Seventh* day afternoons for the *exclusive accommodation of females*. Entrance from Fifteenth Street.

Extracted from the Minutes.

JACOB M. ELLIS, Clerk.

Philadelphia, Tenth month, 1866.

“HE GIVETH SONGS IN THE NIGHT.”

We praise Thee oft for hours of bliss,
For days of quiet rest;
But oh, how seldom do we feel
That pain and tears are best!

We praise Thee for the shining sun,
For kind and gladsome ways:
When shall we learn, O Lord, to sing
Through weary nights and days?

We praise Thee when our path is plain,
And smooth beneath our feet,
But fain would learn to welcome pain,
And call the bitter sweet.

When rises first the flush of hope,
Our hearts begin to sing;
But surely not for this alone,
Should we our gladness bring.

Are there no hours of conflict fierce,
No weary toils and pains,
No watchings and no bitterness,
That bring their blessed gains?

That bring their blessed gains full well,
 In truer faith and love,
 And patience sweet, and gentleness,
 From our dear Home above?
 Teach Thou our weak and wandering hearts
 Aright to read Thy way,—
 That Thou, with loving hand, dost trace
 Our history, every day.
 Then, every thorny crown of care,
 Worn well in patience now,
 Shall grow a glorious diadem,
 Upon the faithful brow:
 And every word of grief shall change,
 And wave a blessed flower,
 And lift its face beneath our feet,
 To bless us every hour.
 And Sorrow's face shall be unvail'd,
 And we at last shall see
 Her eyes are eyes of tenderness,
 Her speech but echoes Thee.

JOHN PAGE HOPPS.

JACQUES BALMAT.

We give a few lines of extract from a private letter, as an introduction to the subjoined narrative.

PARIS, NOV. 28, 1866.

One day last summer, while at Chamouni, we made an excursion to the glacier du Bosson, and while I was waiting for the return of the guides, who had taken the rest of our party across it, and were to conduct me home by another route, I saw, among other things offered for sale, the above narrative. I read it with interest, and the idea presented itself to me that it might be new to some of the readers of the *Intelligencer*. I have, therefore, translated it from the French, in which it was written, and offer it, if you should, on perusal, deem it worthy of a place. It was written in the simple language of a Swiss peasant, which I have endeavored to retain.

I. J. L.

A Biographical Notice of Jacques Balmat, Surnamed Mont Blanc. By MICHEL CARRIER.

PREFACE.

The following brief sketch of the adventurous life of the first guide who discovered, by himself, a passage to the summit of Mont Blanc, cannot be uninteresting to travellers, or to those who can remain at home in the quiet enjoyment of their health and property.

Those, however, who have visited this valley, and have been near its glaciers, and the mountains which they skirt, can better understand the intrepidity with which Balmat was inspired; particularly if he can carry his thoughts back to the period when the ascension was made.

Previous to 1741 no traveller had visited the valley of Chamouni; it was not even known at Geneva, other than as a place extremely wild, peopled by beings who were not less so, and bounded by frightful mountains, which rendered the access to it difficult and dangerous.

It is certain that after that time there was only a mule path from Sallanches to Chamouni, and the communication of the inhabitants with other districts very much limited; their education was almost nothing, as it was restricted to canonical subjects; at the same time their manners were mild and without rudeness.

Two English travellers, Messrs. Windham and Pocock, happily at that time dissipated all these unfortunate prejudices. Instead of the hostile reception which they expected from the inhabitants, they were received with courtesy, and all the formidable precautions which they had taken were found to be useless. It was not long before the constantly increasing influx of strangers, curious to explore those marvellous glaciers, and those sharp peaks, always covered with a thick cap of ice, reacted upon the lively and intelligent imagination of our mountaineers, so that the valley of Chamouni is too well known at this time to render a description necessary; and, besides, all description would be below the truth.

NOTICE.

Jacques Balmat was born in 1762, in the village of Pellarins, Commune of Chamouni. His family was one of the most wealthy of the land owners of the Canton, but notwithstanding that advantage, his education was at first only an elementary one. During his early youth, his time was occupied in cultivating his father's fields, and in searching after minerals, which were bought by travellers who came to visit the valley.

As he was endowed with a lively imagination and great courage, he was not long in acquiring a varied knowledge of natural history and domestic economy; he also rendered a signal service to the country by introducing into it the first Merino sheep.

The frequent journeys that he made as guide with Mr. Dolomieu, de Saussure and others, inspired him with such a passion for mountain passes, that from the age of 18 it was his cherished and almost only occupation.

Already the number of travellers was more than doubled; they no longer contented themselves, as their predecessors had done, with observing the mountains and the glaciers from their base; they wished to penetrate into their icy gorges, climb those rocks, those slopes of snow, and reach the summit of them. From that time our intrepid crystal searches became the first guides. Jacques Balmat passed very justly for being one of the most courageous and the most enterprising.

The ambition to distinguish himself by some remarkable exploit, suggested to him to attempt the ascension of Mont Blanc, which was then considered to be inaccessible. His courage was equal to that perilous enterprise.

With the force of determination which he

threw into all his projects, he drew up for himself a plan, calculated the chances and the dangers, measured his strength, and no longer hesitated to execute it.

Various attempts had already been made by several other guides to reach the same object, but without success; the absolute ignorance of the routes that are now taken, the fear that those vast frozen deserts inspired, above all that of passing the night among them, paralyzed the courage of the bravest. It was some years after the first successful expedition that the station on the rocks of the Grand Mulets was established, and that the guides knew how to protect themselves against the cold during the night, and against the reflection of the too brilliant sunlight during the day. The rapid exhaustion of strength which the explorers experienced, was caused chiefly by these two causes, and also by the bad choice of food. Balmat himself, as we shall soon see, was ignorant of these useful precautions. The first excursion that he made was concerted by him and Marie Coutell; they resolved to ascend the great glacier of Taoul, far above the Col du Geant, to endeavor to reach and to traverse the ridge of rocks and ice which separate it from the place called the corridor, and from there climb to the Rocher Rouge.

If they had been able to affect that much, they would have succeeded; no other obstacle was in their way; after having gone beyond the Col du Geant, they were obliged to try each step on the treacherous snow which covered immense crevices; the declivities became more and more steep; and at each step frightful gulfs and yawning chasms opened before them.

Arrived at last at the foot of the ridge, exhausted with fatigue, they found it quite inaccessible. After having run great risks, they were obliged to return.

In the month of August, 1784, Jacques Balmat, having made an excursion to the Cramont, believed that in ascending the glacier of Miage, situated on the southern side of Mont Blanc, it would be possible for him to climb the unbroken hills of snow, (which are seen from the Col de la Seigne,) by cutting steps in them, and to arrive that way at the summit; but those hills were found to be so steep, and so immeasurably high, that he was again obliged to abandon the idea. So much fatigue and so many dangers would have conquered any one but him; but he was not discouraged.

During the 2d of July, in the following year, he ventured alone to ascend the mountain of La Cote, on the summit of which he passed the night.

The next day, towards 10 o'clock, he reached the rocks of the Grand Mulets, which were not then yet named, advanced, sounding every inch of the way, as far as the small Plateau, passed

over then an enormous avalanche of blocks of ice, and had nearly reached the Grand Plateau, when an immense crevasse obstructed his progress.

The day was declining, and the prolonged and distant mutterings of thunder warned him that a storm was approaching, which forced him to return in haste, in order to regain his shelter before night.

The previous year (1788) Messrs. de Saussure and Bourrit, upon some hints given by some chamois hunters, had endeavored to scale the Arguille du Goûté, thinking by that passage to arrive on the Dome, and on Mont Blanc; but after much fatigue and danger, they did not succeed in reaching even the half of the height of that Arguille, and were obliged to descend to Bionnacey.

However, Balmat was not the only guide who ardently desired to make the first ascension of Mont Blanc; many others tried at different times, and by various passages, to arrive at the same end. The father of the author, and several others, concerted a plan together, while Jacques Balmat undertook, alone, his previous exploration.

Two of them who had made the first attempt with de Saussure and Bourrit, by Pierre Ronde and the Arguille du Goûté, were to ascend again in that direction, while the others ascended by the mountain de la Côte. They started simultaneously, and would, if it were possible, meet on the Dome.

Jacques Balmat had scarcely returned home from his fruitless attempt when he heard of the departure of the other guides. Not wishing that any one should supercede him, he immediately renewed his provisions, and set out to join them, which he effected at the entrance of the glacier, under the Grand Mulets.

The arrival of a competitor was not agreeable to the others, and, therefore, he received a rather cool reception. However, all four walked together as far as the Grand Plateau, which they happily reached in safety. The large crevasse which had stopped Balmat was crossed; from the Plateau there is little difficulty in going up to the Dome; the acclivity is gentle, and few crevasses. It was more than two hours after these guides had reached the appointed place of meeting before they saw their friends climbing the Arguille du Goûté, advancing slowly and with difficulty.

When they were all together they held a consultation; some said that the day was too far advanced to venture farther; others, that it was still possible to gain the ridge that joined the Dome to Mont Blanc, and to judge if, in following it, they would be able to reach the summit the same day; Jacques Balmat was of the latter opinion.

They accordingly started towards the ridge,

but scarcely had they gained it when they were obliged to acknowledge to themselves the impossibility of scaling it; besides, being covered with crevasses, its summit was so pointed that it would be impossible to obtain a foothold. Balmat, alone, persisted in going on, and in order to do so, he would be obliged to stride it. His companions, unable to dissuade him from undertaking the rash act, left him, and turned back towards Chamouni, where they arrived the next day.

After several vain efforts, Balmat, too, was forced to confess that he had attempted the impossible; but his descent was still more dangerous, as he could only come down backwards. After the retreat of his companions, he went back as far as the Grand Plateau, and resolved to pass the night there, in order to renew his researches the following day.

(To be concluded.)

THE SCIENTIFIC SHOEMAKER.

While it is eminently proper for contributors to the *Record* to pay a just tribute to the memory of those who have passed away from us in the possession of great moral worth or eminent abilities, it is equally appropriate to speak of the living, especially when the example is such as to induce a better state of society, or give encouragement to others in the pursuit of knowledge.

For these reasons we propose to give some of the circumstances attending the life of a modest and unassuming man, who is justly entitled to the name which he enjoys in the village where he resides—"The Scientific Shoemaker." His contributions to science, and especially to the science of Botany, have introduced him to the acquaintance of the most scientific men in New England, and few, if any, names are reckoned better authority in the department of Botany than that of CHARLES C. FROST, of Brattleboro, Vt. Middlebury and Dartmouth Colleges have each, in appreciation of his valuable contributions to science, conferred on him the honorable degree of Master of Arts, and the Boston Natural History Society has enrolled him on the list of Corresponding Members. His advantages for acquiring an education were quite limited, and his early attainments must have been quite incomplete, for at the age of 14, with the scanty information acquired at a common school, he was apprenticed to the shoemaking business, which he has ever since followed. He possessed an ardent love for study, and about the time of his apprenticeship obtained a copy of "Hutton's Mathematics," of which he became perfect master without the aid of a teacher. His thirst for knowledge turned his mind to the study of Astronomy, Philosophy, Geology and Mineralogy. He succeeded in acquiring a tolerable knowl-

edge of these sciences. His devotion to study and his close application to business, made sad inroads upon his health, and at the age of forty he found himself an invalid, with dyspepsia and its attendant evils closely fastened upon him, and rendering it impossible for him to attend to his business. After trying in vain to obtain the panacea that should restore him again to health, he visited an eminent physician in New York as the *dernier resort*. He called at the office of the physician, and while waiting till two or three, who had reached the place before him, were examined, he observed some house-plants in the window of the office, and to pass the time, stepped up to notice the various kinds of flowers upon them.

When his turn came, the physician, after instituting many inquiries, asked him if he was fond of flowers and had a knowledge of Botany, to which Mr. Frost replied that he had a fondness for any of the works of Nature, but knew but very little of Botany. Upon this the physician advised him to return home and make it a point to collect one flower a day during the ensuing spring and summer, and when collected he was to put it with its name into a book. He remarked, "Your health and strength will probably return to you in proportion to the distance you will be obliged to go to obtain the new flower, after you have gathered them awhile." He gave no medicine, and the above was the only prescription which he made.

Mr. Frost left the office greatly disappointed and mortified at the thought of going so far, and incurring so much expense for so simple, and, as it appeared to him, so worthless a prescription. At times he queried whether the man was not an impostor, but his reputation as a skilful practitioner was too well established to suffer a thought of this kind to remain long in his mind, nor could he believe that the physician intended it for a "sell;" therefore he determined to carry out fully the instructions which he had received.

He returned home, picked his first flower, named and pressed it, and felt no worse. He soon obtained an elementary work on Botany, and before the frost of winter came to cut down the remaining flowers, Mr. Frost had daily plucked his flower, given it its proper name and place, and what was more, he had, in a great measure, regained his health, and obtained a tolerable knowledge of Botany. With the return of spring, the benefits obtained the previous year prompted him to renew his investigations in the field, and he was surprised at the great number of plants that had previously escaped his observation. He soon found plants not described as indigenous to Vermont, and subsequently discovered those not described in any American work. This somewhat embar-

raised him, but when he had submitted the fact to his contemporaries, and they gave him credit for discovering new species, the inward satisfaction that ever glows in the heart of a naturalist when conscious of having contributed one new truth to science, awakened in his mind pleasant emotions, gave him strength, and made him more zealous in his search than before.

His examinations were not restricted to the field of ordinary Botany, but extended to the study of Mosses, Lichens and Fungi. He made collections of these, but when he attempted to determine their species, he found no American work that sufficiently described them to suit his purpose. In his studies he had seen reference made to foreign works, as, "Fries System a Mycologium," "Albertini and Schweinitz's Conspicuum Fungorum," "Achardus methodus quatuordecim delectos Lichenes," and others, and hoping to get new light from them, sent to Europe and procured some of those which he suspected might be of the greatest service to him. In due time the works arrived, when lo! they were all written in Latin! In order that they might become available to him he must first learn the Latin language. At the age of forty-five most men would have considered this too great a task to commence; but the desire to know the contents of those dearly-bought books was a sufficient incentive in this instance to induce the undertaking, which was soon so far accomplished as to enable him to pursue his studies in the Latin language. A knowledge of the Latin aided him so much that he soon commenced the study of Greek, and became sufficiently acquainted with it to understand generally the meaning of words derived from that language, especially the generic names found in scientific works.

As he continued his researches, he again felt the want of books for reference, and determined to send to Europe again for others, among which he wanted "Rabenhorst's Deutschland Kryptogamen Flora," and "Nees ab Esenbek Das System der Pilze und Schwämme"—and notwithstanding he feared the contents might not be in Latin or English, he ordered them. The books arrived written in the German language! Again he applied himself to the grammar of a new language, and again he was victorious and amply repaid for his mental efforts.

In collecting specimens of fungi, mosses and flowers, he came in contact with insects which arrested his attention, and after having studied their history in such works on entomology as he could find in this country, he again ordered foreign works, among which were "Serville's Orthopteres" and "Ehrenberg's Infusores," all of which were written in French!

This fact did not discourage the man, who during the past five years had found time, in

addition to carrying on an extensive boot and shoe business, to acquire a sufficient knowledge of the Latin and German to study text-books in those languages, hence he obtained a French dictionary and grammar, and at the age of fifty commenced the study of a new language of which he soon became master.

Since that time, during the past eight years, he has steadily pursued his studies, appropriating at least one hour each day to the pursuit of some scientific treatise, and as the legitimate result, he has become not only thoroughly informed in all the details of Botany, but conversant with nearly every other branch of natural history. He has made good collections of plants, mosses, fungi and insects, all of which are appropriately classified and named. In conversation with him one becomes greatly interested and encouraged by the recital of what he has done, and it was with hope that some might take courage from the example of this remarkable man, that we venture to bring his name before the public, and allude to some of the prominent circumstances of his eventful life.—*Prof. A. D. Hager, Vermont Record.*

The Treasurer of Friends' Association for the Aid and Elevation of the Freedmen has received the following amounts since last report:—

	\$215.00

HENRY M. LAING, Treasurer,
No. 30 N. Third St.

Philada., 12th mo. 22d, 1866.

ITEMS.

CONGRESS.—The Nebraska bill was several times under discussion in both houses, but final action was not taken. A resolution was offered in the Senate, but ordered to lie on the table and to be printed, stating that as many of the Southern States had refused to accept the amendment, that such a government be organized in those States which have refused the amendment or may hereafter refuse it, as may be found necessary for the preservation of peace and for the protection of society and the national authority. A bill was introduced and referred to punish kidnapping, which makes it a penal offence to induce negroes or any other persons to emigrate to any foreign country where they would be liable to be reduced to servitude. A resolution was presented directing the President to instruct the officers of the army in the South to prevent the infliction of corporal punishment on the freedmen for crimes, which was referred.

HOUSE.—A resolution was adopted directing the Committee on Foreign Affairs to inquire whether the mediation of the United States should not be tendered to restore peace in South America. A resolution was adopted for the appointment of a committee to investigate the case of the sale of a colored man into slavery in Maryland, by order of a court, and to report whether it is not in violation of the Constitution of the United States, and of the Civil Rights bill. The committee are also to inquire whether the President had taken any steps to en-

force the latter bill, and to prevent the outrage. A bill was introduced and referred, authorizing the establishment of additional national banks. A resolution was adopted for the appointment of a committee to frame a bill to organize free schools in the District of Columbia. The Senate amendments to the deficiency bill were concurred in. A resolution was adopted prohibiting disbursing officers of the Government from paying any account or claim against the Government in favor of any one who encouraged or in any way promoted or sustained the late rebellion, or to any one who was not known to be in favor of its suppression. A resolution was offered instructing the Committee on Territories to inquire into the expediency of authorizing the loyal citizens of the United States residing in districts heretofore in rebellion to form Constitutional State governments, but it was referred to the Reconstruction Committee.

THE FREEDMEN.—The following letter speaks of the rebuilding of the school-house recently burned at Herndon Station, in Fairfax County, Va. As a testimony to the efficiency of some of the efforts of Friends for the Freedmen, it will, no doubt, be interesting to many of our readers.

OFFICE Supt. OF FREEDMEN,
Vienna, Fairfax Co., Va., Dec. 11, 1866.

To the Corresponding Secretary of Friends' Association for the Aid and Elevation of the Freedmen.

Your kind letter of 6th December is just received, and the spirit that prompted it sincerely appreciated. In South Carolina, a year ago, I first learned to know and respect the efforts put forth by your Society in aid of the poor Freed-people; and when I came here, it afforded me much satisfaction to find that it was your Society that was doing so much for these poor people in Fairfax County. I have ever tried to, and shall always continue to render every aid in my power to secure the success of your efforts in behalf of the noble enterprise of elevating this much-persecuted class of "God's poor."

In reference to the burning of the school-house of Fanny E. Gause, I regretted it very much, for I had begun to hope that, even in that somewhat isolated locality, her quiet influence had broken down the prejudices of the enemy so far that she would not be annoyed. Yet, the deed was done, and our only alternative was to repair damages as quickly as possible. To do this, a new house has already been erected, and a report from there, just read, informs that they hope to complete it this week. I have supplied them with sufficient lumber to finish the building, and shall extend every aid in my power to enable the school to re-open next week.

Much praise is due to the efforts of Fanny Gause in encouraging the colored people to rebuild their house so quickly. Naturally slow, and unaccustomed to responsibility, these people require constant encouragement to enable them to overcome the many obstacles that come in their way. Fanny has done her duty well in this respect, and as a teacher, is unsurpassed by any in the country. Her school is a model of its kind, and would compare favorably with any school, North or South. In saying so much for her, I do not wish to be understood as disparaging any other teacher. They are all doing well, and the 291 pupils who attended during the month of November are improving as rapidly as any scholars do anywhere.

With thanks for your letter, and assurances that any aid I can render will be gladly extended at all times, I remain,

Your friend,
P. E. HIRN,
Supt. of Fairfax County.

SELECTIONS FROM THE WRITINGS OF JOHN BARCLAY.

(Continued from page 673.)

1818, *Tenth Month 15th*.—I thought I felt the tender mercies of the Most High renewedly extended at this time, to my great joy and refreshment; and that I could scarcely forbear thus taking notice or making mention of the same, from present feelings and impressions; which have not been self-kindled, but have arisen very sweetly and prevailed in my mind, during this season of retirement by my bedside: as also from the close language of a favored messenger of the Lord at a late meeting for worship, which has been sealed to me forcibly. From these concurrent testimonies, I am induced to believe, that the visitations, the tender calls, and merciful dealings, and withdrawals, and provings, and refinings, which I have experienced from time to time, ever since the Lord was pleased to awaken me out of the sleep of death, and to raise me out of the darkness of sin,—are mercifully intended to purify and to perfect his gracious work in me, and to bring about his design respecting me; which I believe to be, to raise me up a living instrument and a chosen vessel in his holy hand,—to show forth the glory of his name, (which is his power,) to the sons of men,—to exalt his eternal truth, and lead others, by prevailing with them, to submit themselves to this power revealed in them; that so they may live under its influence, know this eternal truth in and for themselves,

abide under its teachings, and come to witness an establishment therein, and to have an inheritance thereby in that, which death cannot destroy, nor corruption mar, nor sin defile, but which endureth forever! Amen!

1818, *Tenth Month 19th*.—O! the sweet influx of the Father's peace, of the Father's joy and comfort, with which he is pleased at times to refresh and revive the hearts of his humbled contrited ones,—those that are through his mercy prevailed upon, and through his heavenly help and strength enabled to count all things but as nothing, that they may be found in him, and to suffer for his name's sake the loss of all things! O! what a blessed evidence of his continued goodness have I been favored with this morning, during the short space of a few minutes, in my retirement to seek the lifting up of the light of his countenance, and to wait for the shedding abroad of his love in my heart. What encouragement does it afford me, to continue steadfastly looking unto Him, the author of all my blessings, the director of all my footsteps, the restorer of right paths to walk in. What assurance have I had renewed at this season, that I am (through his daily help and strength) in the way of his leadings; so that in a fresh feeling of his directing and protecting power being about me for my preservation on every hand, I may boldly say with the Psalmist,—"Though an host should encamp against me, mine heart shall not fear," the Lord being "my light and my salvation."

To ———.

Twelfth Month 21st, 1818.—I have often thought ——— to be what our early Friends would have called a "tender-spirited young man;" but O! how much must such go through, who have been made willing to come to the Master, in the full belief that he is the *Way*, the *Truth*, and the *Life*. The Master *looking* upon such, *loveth* them; yet must these give up their all, as and when he calls for all or any of their "great possessions." We read that Zion was to be redeemed with judgment; and with the spirit of judgment and of burning was her filth to be purged away. O! this fiery baptism! few of us know enough the necessity of it,—it is hard coming under it, it is hard keeping under it:—then, and not until then, do we really know the full import of these deep expressions,—“baptized into his death,”—“planted in the likeness of his death,”—“crucified with him,” “that I might, (as the apostle says) know Him, and the power of his resurrection, and the fellowship of his sufferings, being made conformable to his death.” There is, as thou knowest, a refiner's fire; where the things that are even the most precious, the most pure metal, the most fine gold, are to be put in, and to be again and again melted down and softened, and rendered susceptible of the impression that it is designed to receive: it must be passive as the clay; it cannot impress itself. No more can we as creatures *humble ourselves* (truly and acceptably and profitably) in or by our own will or way, or by the voluntary exertion of any parts or powers of our own; no,—we *must* not choose our own way of being good, neither do good according to our conceits and conceivings, else another thing is exalted in reality, than the principle and power of Truth. I have been often instructed very deeply by these expressions;—“but we have this *treasure* (that is, the Light shining in our hearts) in *earthen vessels*; that the *excellency* of the *power* may be of God, and not of us;”—“always bearing about in the body the dying of the Lord Jesus, that the life also of Jesus might be made manifest in our body.” I think Penington says, that we are but vessels, wherein the pure excellent oil may appear or disappear; and some one says, these vessels *must* be *emptied*, before they can be *cleansed* from any dirt or sediment, which they may have contracted whilst in use in this filthy world. I remember John Churchman wrote, that the vessels in the potter's house were to be set on the *shelf to dry*, after they had been formed on the wheel; and *then* to be baked in the fire. These things I write to thee, dear ———, as they occur; much more of this nature often passes through me, unsought and unstudied, in times of retirement, which are seasons of refreshment to me oftentimes; and in them, I think, I have learnt more effectually,

and been strengthened more availingly, than in any other way; and though speaking of ——— seemed at first the occasion of them, yet it is not for me to cast a stone; though from the very little experience which I have had of these things, I begin to see the necessity, and somewhat of the beauty of those deep baptisms, and desire greatly that dear ———, may bear me company in coming and keeping under them,—this being the true way of the cross. For a cross that bears any marks of being our own manufacture will never do, so at least I have been favored clearly to see; it is no cross at all in reality. The mind is a very active busy part; and if it be any time quickened into a sensibility and admiration of what is excellent, unless kept down in the true subjection by that which quickened it, it will speedily put itself forth and rush into such actions, or words, or thoughts, as it apprehends to be of a good tendency or nature, and is very ready to hope and believe that these things are required; forgetting that that which quickens in us the first spark of good, and raises up the least desire after it, the very same must preside over all our steppings, the last equally with the first stepping; the very same must strengthen us to choose the good and to follow it, which gives us ability to refuse and shun the evil. In this way self is cast out, and the principle and power of Truth alone exalted, and then the seed reigns and is over all, as G. F. says; for *that* is to govern, guide and go before, in this gospel day, and *that* is to lead; and when it stops we are to stop and stand still, and when it goes forward, we are to move with it and in it, as Israelites indeed.

1818, *Twelfth Month 27th.*—At this time it lay upon me to set up my Kbenzer, as decidedly as this perishable method with paper and ink, and this feeble representation by words, (which are at best but inadequate symbols) will allow of. My soul has been hitherto helped by the immediate handing forth of that power, wisdom, support, and indescribable consolation, which comes from the holy sanctuary of the Most High. My heart hath been sweetly engaged at seasons to praise, honor, and glorify Him, who lifteth up the poor out of the very dung-hill, setting them among princes; verily, He giveth power to the faint, “and to those that have no might, He increaseth strength.” And this is He, who was called the God of Abraham, and of Isaac, and of Jacob; and who continues to be to *all* His *living* Israel in this day, as He ever was in old time. For the devil is the god of the dead in trespasses and sins; but the Lord hath bruised his head by his seed, Christ Jesus, who hath purchased life for those that are willing to be made partakers thereof.

1818, *Twelfth Month 30th.*—O Lord! if

David thy servant did say of the love that prevailed between his fellow-servant Jonathan and himself, that it was "wonderful,"—if we may also say of those whom thou hast knit and bound up together with us in the fellowship of thy Gospel, that they are as nursing fathers and nursing mothers, as endeared brothers and sisters in thy Truth;—O Father Almighty! how shall we sufficiently commemorate thy loving-kindness towards us, thy poor creatures; whom thou hast been pleased to gather into the heavenly relationship, into the joyous fellowship, into the blessed flock of thy family, and hast deigned to acknowledge as thy children. I thought I felt the sceptre of thy paternal love stretched out, renewedly inviting me to partake of the blessing that maketh truly rich, and addeth no sorrow therewith,—inviting me to draw near, and to make my request unto thee, and to plead with thee in the power of thy love; into which thou hast gathered me, and by which thou mayest be prevailed with. I am emboldened to ask of thee at this season the continuance of thy holy help from time to time, under all the provings and afflictions and chastenings, which may in thy wisdom be allotted me. As all thy servants of old, even unto this day, have shared in the cup of bitterness, and partaken of the water of affliction, so O! Lord, may I also endure chastening, and partake of the evidence of sonship; remembering the language of thy servant, "If we suffer with Christ, we shall also reign with him." This accept and grant, if it please thee, O! my Father; who hast never yet denied that which thou hast put into my heart to offer unto thee in the prayer of faith; and if I need at any hour anything of thee, I know that thou hearest me and art with me, whilst I abide with thee, and am in submission to thy manifested will. To thee, therefore, I desire at this time afresh to commend and commit all that I have or am, and increasingly to become thy child.

1818, *Twelfth Month*.—Does the best qualification, even that which the true ministers have fresh from the fountain of all-sufficient wisdom and strength, even the aid and influence of the Holy Spirit, want any human help to bear it out, or to assist the true ministers in the discharge of their gifts? If human acquirements be of use, and helpful to those that have best help, or advantageous to the cause they espouse, then the want of it is a deficiency; that is, the instrument is not of that service that he might be, if he had learning. And therefore the apostles, if they had had a good education, would have been more extensively useful, especially among the rulers and great people. Why did not the apostle Paul, who had much learning, and "man's wisdom," use it in his preaching among the learned Corinthians? and why did he determine to lay it all

aside, and to know nothing among them, save Jesus Christ and him crucified? Why did Paul, in speaking of the things of God, speak them "not in the words which man's wisdom teacheth, but which the Holy Ghost teacheth,"—if his learning was beneficial to him as a preacher? Was not his learning one of those things, which before was "gain" to him, a profitable and advantageous thing, and which now he "counted loss for Christ? Why did our God choose foolish, weak, base, despised things, as his instruments, if wise, mighty, honorable ones would have been more extensively useful, as long as they were humble? Why did Paul come among those of Corinth "not with excellency of speech or of wisdom?" surely on this ground, would he have gained more converts to the Truth in that place?

1819, *First Month 29th*.—This may I say, and leave upon record, that though many almost indescribable temptations and presentations of evil have been permitted to come about me, sometimes like a mighty flood, so that in hours of extreme weakness and infirmity, I have been many and many a time ready to give up the fight of faith;—yet to this day, the Lord, strong and mighty, the Lord mighty in battle, has been pleased in his abundant compassion to encamp around me, and to give me songs of deliverance, songs of triumph and of praise. In his name will I set up my banner, who is a Rock of defence and sure refuge to my poor weary soul in all her afflictions, as there is a concern to flee unto, and abide in, and under the shadow of this mighty rock in a weary land. O! young man or young woman, to whom this may come,—my friend, my brother, my sister;—who art seeking the better country, and Him who is the way, and the guide; O! though thou be weary and heavy-laden,—take courage! O! there is a staff, a stay, and strength and succor with Him, and in Him, who hath gone before; and who leadeth on his little ones gently and sweetly, as they are able to follow. Take this as the counsel of one, who writes from a sure and living experience, and who hath indubitably known His name—(which is above every name,) to be a strong tower indeed. He will be with his, even to the end of the world.

(To be continued.)

We often think that a change of circumstances would make us happy. We imagine if this trial were removed, and that deficiency made up, we should be all right. Let us remember, when tempted to think thus, that what we want is not change of circumstances, but *victory over self*.

The duties of the *Law* were a burthen and a yoke; but those of the *Gospel* are privileges and advantages.—*Owen*.

"GEORGE FOX."

BY C. H. SPURGEON.

(Continued from page 676.)

There is one passage in his "Journal" which has been quoted thousands of times, but you will not object to hear it again, it deserves to be printed in letters of gold.

"But, as I had forsaken all the priests, so I left the separate preachers also, and those called the *most experienced people*; for I saw there was none among them all that could speak to my condition. And when all my hope in them and in all men was gone, so that I had nothing outwardly to help me, nor could tell what to do; then, oh then, I heard a voice which said, 'There is One, even Christ Jesus, that can speak to thy condition.' And when I heard it, my heart did leap for joy. Then the Lord did let me see why there was none upon the earth that could speak to my condition; namely, that I might give him all the glory. For all are concluded under sin, and shut up in unbelief as I had been; that Jesus Christ might have the pre-eminence, who enlightens and gives grace, and faith, and power. Thus when God doth work who shall let it? And this I know experimentally. My desires after the Lord grew stronger, and zeal in the pure knowledge of God and of Christ alone, without the help of any man, book or writing."

All true conversions are after that same fashion essentially and radically. All men do not pass through the same depths of sorrow in coming to Christ, but they all have to come to him empty-handed, feeling that "Cursed is he that trusteth in man, and maketh flesh his arm." There must be a stripping before there will be a clothing; there must be an emptying of self before there can be a filling with the Spirit's power, and George Fox found it so. Have we all been led in this right way? How like the finding peace in the case of Fox is to the way in which John Bunyan describes it in his "Pilgrim's Progress." There stands the poor burdened wretch who fain would go on the pilgrimage to the Celestial City, but finds it hard work to toil thither while bowed down with a load of sin. He sees before the eye of his mind the atoning sacrifice of Jesus, and as he looks to the cross, suddenly the strings which hold his burden to his shoulders begin to crack, and the burden rolls into the sepulchre so that he sees it no more. "Whereupon," writes Bunyan, "he gave three great leaps for joy, and went on his way singing." We have not forgotten those three great leaps which some of us gave in the day when Jesus took our sins away, when he became to us all our salvation and all our desire—Christ in us the hope of glory. It strikes me that George Fox would never have been the man he was, nor such an instrument in the hand of God for use-

fulness, if he had not been led about in the wilderness of self-despair, and made to see the dark chambers of imagery of his own natural heart. When our heavenly Captain means to use a sword, he passes it through a series of annealings to make the steel hard, so that it may not snap in the day of battle, and he passed George Fox through all these annealings in his inward conflicts. Why, how could he fear the face of man when he had feared the face of God, and been made to quake and tremble beneath his awful presence? He who has heard a lion roar will not shake at the voice of a sparrow, or the buzz of a fly. Why should he tremble at what man could do to him when he had felt the arrows of the Almighty sticking in his heart and drinking up the life-blood of his soul? and a man who has had dealings with Almighty God, and has been in the secret place of thunder, and heard God's wrath go forth against him, and then inwardly seen the tempest spend itself upon the person of the Saviour, such a man can look his fellow-creature in the face without trepidation. He has learned to fear God, and he has, therefore, nothing else to fear. Would Martin Luther have been so blazing a torch if he had not been thrust into the fire? If it had not been for that dark period when the monk was painfully climbing up and down Pilate's staircase, seeking rest, but finding none, would he have so plainly said, "By the works of the law there shall no flesh living be justified?" Can we imagine honest John Bunyan writing that noble allegory, the "Pilgrim's Progress," if it had not been for those years of soul distraction when he was looking to the broken cisterns of the creature, and learning to his sorrow that they held no water? Temptation, adversity and soul trouble are the training exercises for the heroes of the truth. Upon the wheel of soul conflict the vessel is fashioned for the Master's use.

After his conversion, George Fox took quite a separate path among the Christians of his age, and those who look at the time in which he lived cannot blame him, although sect-making and seclusion are not in themselves commendable. If every young man here to-night should set up as a separate religionist, I am not sure that he would deserve to be commended for it, for I find that those people who belong to no sect at all are each one a sect to himself, and in their unsectarian zeal they make sects by wholesale, and foolishly hope to create union by fomenting division. On the whole it is best for the present distress that each man should unite with those Christian people who appear to him to walk most according to the Scriptures, and have the most spiritual life; not separating ourselves for mere novelty, or love of singularity, lest we be found following

our own devices whilst we imagine that we are following the Spirit of God. However, supposing it to be your firm conviction that no man has a right to rule another in matters of conscience, and that you found all the sects more or less approving of legislative interference in religion, which would you unite with? Consistency makes you answer, "None at all." You would say, "No, if I unite with a Christian society I am, to some extent, accountable for what is done by that society, and I cannot share the responsibility of actions and opinions which lead to persecution." When Episcopalians clipped the ears of Puritans, what spiritual man would become an Episcopalian? When Presbyterians hated toleration, and turned the dungeon key on lovers of the Liturgy, how could those who hated oppression join with them?

Although our heart is with all those who love the Lord Jesus Christ in sincerity, yet if they do these naughty things we cannot unite with them. Moreover, George Fox's doctrinal views were such that he could scarcely have consorted with any then existing Christian denomination. Be those views right or wrong, he would have been a dishonest man to suppress them, and if he received them, as he believed he did, from God, if he had not held them and proclaimed them he would have been a traitor to his trust. If he could not be faithful in visible communion with others, what could he do but walk with God, and before men walk alone? George Fox had a very clear perception that Christ's kingdom could not be a worldly one, whereas many professors in his age coveted a worldly church. The smallest sects were against a national church, only because their church was not likely to be selected; but most professors held as a theory that if their church could be established it would be the most proper thing in the world, "A consummation devoutly to be wished." George Fox thought that a kingdom of this world could not be the kingdom of Christ, and that enforced support of ministers by State aid was only fit for hirelings and false prophets. I have sometimes said that there was an old superstition, that the royal hand would heal disease, but that the truth was far otherwise, for whenever the king puts his hand on the church of God it causes disease. Never has any more evil event happened to the church of God than when that baptized heathen, Constantine, pretended to be a Christian, and set up Christianity as a State Church. Upon this matter the whole spirit of Fox's teaching is decided and clear. Besides, Fox was a man with so many angles and corners that he was best alone, or with others who would recognize his gigantic spiritual proportions. He could not do as some people do, put his conscience into his pocket, and say

nothing about it. He had an awkward kind of conscience for that age, and it would be still more awkward in the present state of things. He would act straight-forwardly, his mind was devoid of that double-acting, rotatory machinery, which is found to be so useful now a-days, when men claim to be honest, and yet declare that black is white, and that white is black, and that it does not signify if both be blue, as long as they pay. Words, when they refer to religious truths, are in some quarters treated as if they were cards for men to shuffle, making them mean anything or nothing, as the case may require. Fox did not understand double meanings. He believed that words meant something, and when he used them he meant what he said, and said what he meant. His convictions were too deep to be trifled with, or concealed for the sake of a living. Hence, he was downright in the extreme, and never erred upon the side of flattery; it may be possible that he went too far in the direction of severity. I am very conscious that he would have chastened me pretty smartly as a "Chaffy Baptist," and probably I might not feel satisfied that I deserved all the bolts that he would be certain to launch at me; but what of that? Is it not better to be openly censured by an honest heart than to be in association with men whose approbation would be forfeited if you dared to be faithful to them? The separated walk of George Fox as a Christian, however accounted for, was fraught with blessing to this land.

Read his history through, and after being struck with his conversion, and wondering at the marvellous and gigantic strides with which he pursued the path of faith and conscience, you melt into sympathy with him when you consider his sufferings. There are some passages in his "Journal" which one ought not to read just before going to bed, because one would lie awake thinking of them, or else would dream about them. Readily may a tender mind wet the pillow with tears of grief, to think that man could so torture his fellow man under pretence of doing God service. He was frequently immured in dungeons where it would have been a detestable cruelty to have confined dogs. How many months he spent in prison we need not here tell; but you may count by years the period in which he was a prisoner of the Lord, and although, I doubt not, he found, as Rutherford did, that though man had put him in a prison that prison became a palace to him, yet the dungeons were loathsome to an inconceivable degree. Sometimes he was compelled to remain upright both day and night, because it was impossible to lie down, the filth being over the tops of his shoes, with no possibility of clearing it out, filth of the most abominable kind, and too foul to mention, being poured upon him from above, and coming

reeking into his nostrils from beneath. One can hardly tell what his sufferings must have been in the form of rheumatism and neuralgia. He was a life-long martyr. If any of us had to suffer for one week what he had to suffer for six months together, our bodily frames would bear most painful memorials of the strain. His pain of body must have been extreme; and yet with all that how little he says about it! As an eagle outsoars the clouds, so does he rise above the influence of his outward man. In his persecutions he stands before us as a true man, a complete man, one of the noblest types of manhood, a model of what gracious manhood may become. When falsely accused we find him declaring the gospel of Jesus Christ to his persecutors as boldly as though they were his friends. You cannot but love him. Even if he had preached false doctrine we must have sympathized with his sufferings, but teaching, as he did, some of the noblest of truths, what shall we say of him?

As for his labors, he shames us in the present day. The man was everywhere. He flew as swiftly as a seraph in obedience to his Lord. He preached the gospel in almost every town and every village, from Falmouth up to Aberdeen, and then crossed the Atlantic to preach to the settlers and the Indians in the land of the setting sun. When did he rest? Filthy prisons could not have yielded him ease, and yet a sojourn in jail was the only rest he had. He was a man all ablaze with the fire of zeal and the light of unselfishness. We all like a little recreation now and then, and need it, but he had it not. Who is there amongst us who has not had a fortnight at least at the sea-side this year, and felt we wanted it? But Fox had no fortnights, nor even minutes of rest. It was all work, work, work, from the day when he found himself saved till the day when he died in harness, and slept because his work was done, and his Master had said to him, "Friend, come up higher." Oh, that those who are engaged in the service of God would learn to emulate his industry! We frequently hear complaints about the hardness of the Christian service; but ought they ever to be raised? We get weary in preaching, perhaps, but if we preached oftener and more fervently we should not grow half so weary. I sometimes venture to tell those of my brethren who get exhausted by preaching twice a week, that that is enough to kill anybody; but that preaching ten or twelve times a week might be easier work. If the blacksmith should take his huge hammer and make horse shoes only once a week, his arm would tire, and he would never be able to get through with his work; but when he does it every day in the week, he is even able to make music upon the anvil. So when a man works constantly for God, he will be able to

work joyfully. We none of us know what we can do. The labor which appears hard to us to-day will be easy to-morrow, if we attempt it; then let us go on to something more, and when, by God's help, we have accomplished it, we will seek after something higher still, and never be satisfied until we have achieved all that holy love can produce from us. Loved as we have been by our Lord Jesus, and professing to be the possessors of a spiritual and secret life of divine origin, let none of us be idle; nay, even if old age and infirmity have overtaken us, let the little strength we have be used for him who loved us, and gave himself for us.

(To be continued.)

A Memorial of Plainfield Monthly Meeting of Friends, concerning our beloved friend JANE YOCUM, deceased.

We feel a solicitude to procure and give forth the following testimony, concerning our beloved friend Jane Yocum, wife of Samuel Yocum. She was born in Centre county, Pa., the 15th of 9th month, 1810. Her parents, Thomas and Jane Dewees, being exemplary members of the Society of Friends, gave her an education corresponding with their profession, which she ever esteemed a blessing. Yet being of a cheerful disposition, she found while young many things to captivate her mind and lead it from the path pointed out for her to follow; still, being favored with judicious parents, (to whom she often referred with gratitude), she was prevented from participating in gross evils, for which she rejoiced in after life. When she had care of her own household, though delicate in health, she found it to be a duty devolving upon her to be diligent in the attendance of meeting, and evinced by her solemn deportment therein, that this practice was felt to be more than a lifeless formality. Though this duty was often attended with difficulties, they being in humble circumstances, and the distance to meeting making it oftentimes inconvenient to attend, yet she seldom failed to do so, not unfrequently having to walk. As she was faithful in this duty, yielding to the manifestations of truth, she found it obligatory upon her to publicly invite others to the same obedience and trust in that Power, which had brought her through many trials, and caused her to administer unto others when sick or afflicted. She seemed much concerned to impress all with the great truth, that we have a useful sphere to fill in this life, whatever be the capacity, and to urge the necessity of giving up the whole heart to serve God, for by so doing each would be enabled to see the work assigned him; even if it were comparable to the widow's mite, or giving a cup of cold water in charity.

She was frequently found, much to her own physical discomfort, reaching forth her hand to

others when in much need of help herself; but feeling it to be a Christian duty, she would reply, when admonished by her friends, that the way was made easy. Hence when the call went forth for help, by night or by day, she was ever ready to extend the hand prompted by sympathy to the suffering of any denomination, for she was not biased by sectarianism; and thus imitated the good Samaritan. Those deeds of love will long be remembered by her friends who survive her. We do not wish anything like eulogizing our departed friend, or garnishing the sepulchre of the righteous; we do not desire her actions, excellent though they be, held up to view by way of ostentation, or mere honor to her memory. We believe that true respect to departed virtue is rendered by following the example of those who have struggled through the toils and trials of life unto the end, and soared triumphantly above the trying scenes of time. We believe *they* lament the worthy dead, who live as she desired. The leading solicitude of her mind, as was made manifest when standing before the people, was for them to choose the Lord for their portion, as she appeared to have taken the God of Jacob for the lot of her inheritance; which was evident while time lasted. She had been afflicted with disease for many years previous to her final dissolution, and for several weeks was racked with excruciating pain while frail nature was yielding to the constant pressure. All was borne with Christian fortitude, until relieved by death, which occurred on the 22d of 2d month, 1866, being in the 56th year of her age. She was interred in Friends' burying ground at Plainfield, on the 25th, after a solemn meeting which was largely attended.

The following is one of a series of letters kindly sent us by a friend for publication. They have not before appeared in print.

LETTER FROM LYDIA P. MOTT.

SKANEATELES, 1st month 26th, 1823.

Dear young friend,—I do indeed accept thy letter as a mark of the greatest confidence, both in my friendship for thee and in my observance of the secrecy thou enjoins, which I assure thee I shall keep inviolable, according to the golden precept of doing to others, even as we would that others should do unto us.

This law we ought to feel ourselves bound to observe religiously; and did we thus obey it, it would do away a great portion of suffering and unhappiness from the human family.

Be thou one of the number that from the acceptable season of youth shalt be found walking by it, bringing thy conduct daily to this simple, but divine test or rule. When honest with ourselves, how soon can we determine what we should do or leave undone as respects our fellow beings.

Simple and plain are all the injunctions of our Saviour, and easily discernible are the leadings of His Holy Spirit to the willing hearted. 'Tis only by inattention or disobedience that we become doubtful; hence that command, "Be not faithless, but believing;" and what greater encouragement could we ask or desire than that declaration from the lips of Truth, that "all things are possible to Him that believeth"—that is, all things that are required by our Heavenly Father. Seeing this is the case, and that every good thought, as well as every other good gift, cometh down from the Father of mercies, the strong desires thou sometimes art favored to feel are an evidence of Divine regard, and in their nature draw thy affections to the Author of all good; because what comes from Him leads to Him as the centre of all goodness. And when thou hast these precious feelings, it is then that thou offers up real prayer; for dost thou not remember what the Apostle saith? "The spirit maketh intercession for us with groanings that cannot be uttered, or formed into words." That thou shouldst feel an aversion to set times or formal prayers I do not wonder, for I believe they are of the class thou mentions.

Real prayer is the breathing desire of the soul, either in supplication or intercession, or thanksgiving and praise; and the soul must be brought into a state feeling one of these, or all of them, to be in a capacity for this solemn, awful exercise; and when this is the case, then they are the spontaneous effect, either in the silent language of thought, or when spoken audibly. As thou observes, it is impossible to be religious and not offer such prayer, as much as it is impossible to live without breathing. Still there are times of weakness to the mind, as well as to the body, when this breath of life, this inhaling and respiring of spirit, can scarcely be perceived. Nevertheless life exists, and oftentimes revives to greater strength and activity than before, through the kindness of the great Physician of value. And though seasons of desertion and incapacity for any evident acts of devotion may be in love and unerring wisdom dispensed, to wean thy affections and purify thy heart from its attachment to earthly things, and make thy desires more fervent after spiritual things, do not give way to doubting, but strive to hold fast the grain of faith and trust in a merciful God, that though He cause darkness, yet will He in His own time bring forth light as the noonday, and make thee "fruitful in the field of offering and joyful in His house of prayer."

Prayer, it is to be feared, is a subject little understood by many high professors; and I am almost induced to believe that the Holy Spirit is grieved by these performances as much as by things that appear openly irreligious; indeed I

tremble at the idea that they are frequently a solemn mockery of the Most High. The Lord's prophet formerly was sent to testify against those that draw nigh unto Him with their words, while their hearts were far from Him. These are the prayers that are an abomination, and such I do not believe thou hast attempted to offer. A state of deep silent abasement, my dear friend, is a safe state. Thou knowest who said, "Blessed are the poor in spirit;" wait on Him.

As to Hannah Moore's recommendation, I should only change the expression, and say, set apart certain hours for religious contemplation and reading of the Scriptures, and then thy hesitation will be removed; then at times true devotion will be kindled within thee and rise to its Author. We stand in need of forms of this kind, because we are apt to forget our truest interest, or rather to neglect it; and let time,—precious invaluable time—pass without improvement.

To-day is so like yesterday, it cheats. Moments, hours and days pass away if not summoned by some order, and leave no trace of Heaven. But to return to H. Moore. Her moral precepts are most excellent, and her estimate of female duties, female deportment, and, in short, of all parts of the female character, are just what I could wish thine to be; but we know as a zealous Episcopalian her creed was different from what our Society can approve in various particulars. Glean all the good from her writings, and charitably pass over the rest. She has shone with lustre in her sphere in this world; and I doubt not will shine as the stars forever and ever in the world to come. With the expression of my sincere interest in thy exercises I will close, and affectionately invite thee to continue a freedom which is by no means considered an intrusion by thy friend,

LYDIA P. MOTT.

FRIENDS' INTELLIGENCER

PHILADELPHIA, FIRST MONTH 5, 1867.

THE NEW YEAR.—We are upon the threshold of a period favorable for thought and retrospection. The old year, with its joys and sorrows, its realizations and disappointments, is numbered with the things *that were*. The glowing incidents or fatal errors which have been recorded upon its pages, can be recalled but through the agency of memory. Opportunities unimproved can be redeemed only by "suffering the time past to suffice," in which the duty of the hour has been neglected, and, by pressing forward, with an earnestness of purpose, in the work of "to-day," so that "the

tomorrow" may "take thought for the things of itself."

They who have been faithful in their vocation have, doubtless, garnered for themselves treasures of priceless value, and are among those who need fear no evil, for, as Mary of old, they have chosen "the good part that shall not be taken" from them. Among the failures of Hope, we number those created by the emancipation of millions of our fellow beings from physical bondage. As a nation, we have fallen far short of the fulfilment of the expectations indulged in, when, by a righteous decree, their chains were loosened and their "shackles fell." But for the generosity and perseverance of individuals and communities, the condition of this people would be, if possible, more pitiable than their former state of servitude. With gratitude we acknowledge the untiring efforts of many faithful workers in this cause; and would that we had more grounds for hoping with *expectation*, that ere the close of the present year the laws of the land will be so reformed in relation to the colored population, that they shall no longer be a disgrace to the statute-books of an enlightened age. Why should not philanthropy keep pace with the march of mind in other directions? We look with wonder and amazement upon the achievement of intellect as it girds the universe with its electric wire, and brings into daily intercourse countries widely separated both by land and by sea. Impressed with its magnitude, we adore the *great First Cause* by which man is thus endowed with wisdom and with power; and the mental ejaculation is, "wherewithal shall we come before the Lord," or, "what shall we render unto Him for all his benefits."

Turning our thoughts within the limits of our own religious organization, the changes most apparent consist in the removal of Friends upon whom we have looked as judges and counsellors. A number of these have been gathered to a higher life, and the void is sensibly felt, creating the desire that those who linger round the altar, and yet hesitate to lay upon it the offering required, may no longer delay, but be willing to heed the call, and to enter into the harvest-field and labor. Viewed from individual standpoints, the state of Society retains its chameleon hues. Its shadows

and its lights are in accordance with the mental atmosphere of the beholder. Hence, we find *Elijahs*, under a feeling of discouragement, seeking shelter in *caves*, and bemoaning the condition of Israel; while the hopeful discern in the "signs of the times" a promise of a more vigorous growth of the good seed, producing an increase of love to God and love to man.

We notice with encouragement that amid the variety of sentiment there is a general tendency to a charitableness which can accept the apostolic counsel—"Let each be fully persuaded in his own mind."

We are not among those who feel the mission of the Society of Friends has been fulfilled, and that it is passing away. With the eye of faith, we behold it buckling on the armor of righteousness, and advocating, with renewed energy, its fundamental principle, and the testimonies based upon it. If the concern of its members be to cherish and breathe around them the spirit of Christianity, their faith will be shown by their works, and through this instrumentality others may be brought to acknowledge the power of the "*inner light*," as believed in by George Fox and his coadjutors.

FISHING CREEK HALF-YEAR'S MEETING.—We learn from some friends who attended this meeting, the Youths' meeting on the following day, and the Monthly Meeting on the day previous, that, although owing to the extreme cold weather, the gatherings were not so large as usual, that they were interesting and instructive opportunities. A large number of those present were young people, and the fact that many came from a distance gave hope that the principles so highly valued by our predecessors are still prized by many of our members. The answering of the Queries which are to be forwarded to the next Philadelphia Yearly Meeting brought to notice several subjects which were impressively commented upon. The power of Love as a governing principle, both in families and schools, was forcibly presented.

In the advocacy of the testimony to a free gospel ministry, it was maintained that if our members could more fully appreciate the importance of individual responsibility, there would probably be a greater number who would

be willing to become the public expounders of our principles, and that in this way this important testimony might be more effectually borne than by speaking against a salaried ministry. These remarks were accompanied by an exhortation to dwell in the spirit of prayer, and in that state of dependence upon the Divine Being that would lead us to watch daily over our actions, and to recognize the truth that strength to do what is right can be gained from Him alone.

Parents were advised to remember that in the training of their children, absence of hurtful influences, unaccompanied by incentives to active virtue, would not make sturdy and noble men and women, and that in their teachings they must endeavor to encourage in their offspring that moral courage which would enable them in after life to stand up for the right and the true, regardless of the counter influences that might surround them.

MOVEMENTS OF TRAVELLING FRIENDS.—John J. Cornell has obtained a Minute from Rochester Monthly Meeting, New York, to visit Friends and others, as way may open, within the limits of Scipio Quarterly Meeting.

DIED, at his residence in Duaneburg, Schenectady Co., N. Y., on the 19th of Fifth month, 1866, Jos. H. Moore, in the 66th year of his age; a member of Duaneburg Monthly Meeting.

This much esteemed friend was a kind husband and father, and in his removal, not only his family, but the neighborhood, has lost a useful citizen, and the Society of Friends an exemplary member. He was not only a steady attender of meetings, but always in season. His disease being general debility, his suffering was not severe, yet he foresaw his time was short. This, however, did not alarm him, as he had made his calling and election sure; as was evidenced by such expressions as, "I see nothing in my way; all is joy and peace."

—, on the 2d of Ninth month, 1866, at his residence in Duaneburg, Enoch Hoag, in the 80th year of his age; a member of Duaneburg Mo. Meeting.

This aged Friend had experienced severe domestic afflictions, having survived all the members of his particular family. And from the decease of his second wife, not quite a year previous, he felt that he was left alone, and at times was inconsolable; but "as in life they were united, in death they were not far separated."

—, at his residence in Ballston, Saratoga Co., N. Y., on the 18th of Eleventh month, 1866, of typhoid pneumonia, Wm. P. Smith, in the 65th year of his age; a member of Saratoga Monthly Meeting.

He was strongly attached to the Society of Friends, and liberal in his religious views. Being eminently social in his nature, he mingled much in society, taking an active part in whatever would promote the general good. Although self-educated, he was a great advocate of a liberal education, and wherever

his lot was cast, endeavored to elevate the standard of moral and intellectual culture. Warm in his sympathies, the oppressed and afflicted of every class found in him a friend, often employing his pen in advocating the cause of philanthropy. He was an affectionate brother, a loving husband, an ever watchful yet indulgent parent, and a kind neighbor. And now we feel that we can do no less than bow in humble submission to the bereavement that has befallen us, trusting "our loss is his eternal gain."

E. H.

—, on the 19th of Twelfth month, '866, MARTHA WHARTON, widow of Ezra Wharton, formerly of Bucks County, Pa., aged 88 years and 7 months; a member of Short Creek Monthly Meeting, Ohio.

—, on 21st of Twelfth month, in Chester County, Pa., REBECCA M., wife of Joseph Lindsay, aged 53 years; a member of Green Street Monthly Meeting.

—, on 29th of Twelfth month, of pneumonia, MARY B., wife of George Craft; a member of Woodbury Monthly Meeting, N. J.

—, on 29th of Twelfth month, SARAH W., wife of Abraham Barker, and daughter of the late Wm. Wharton, aged 45 years; a member of Spruce Street Monthly Meeting.

The Annual Meeting of the Home for Aged and Infirm Colored Persons will be held at Liberty Hall, Lombard above Seventh, on Sixth-day evening next, First month 11th. Contributors and all others interested are invited.

THE MINUTES OF OHIO YEARLY MEETING.

It may seem out of time, but we make the following selections from the Extracts of Ohio Yearly Meeting. We would kindly suggest to Friends of the different Yearly Meetings to forward their "Extracts," in future, as early as practicable, that those who are interested in hearing from the different portions of the Society may have the opportunity of doing so in due season.

At Ohio Yearly Meeting of Friends, held at Mt. Pleasant, by adjournments, from the 27th of the 8th mo. to 30th of the same inclusive, 1866.

Reports were received from Short Creek, Stillwater and Salem Quarterly Meeting, constituting this; and on calling the names of the representatives therein, all were present except two, for the absence of whom a satisfactory reason was given.

Minutes were received and read from the following Friends, who are now in attendance with us, viz:

For Nathan Thomas, a minister from Prairie Grove Monthly Meeting, Iowa, held 9th of 6th mo., 1866. Endorsed by Prairie Grove Quarterly Meeting 11th of same month.

Samuel J. Levick, a minister from Richland Monthly Meeting, Pennsylvania, 3d day of 8th mo., 1866. Endorsed by Abington Quarterly Meeting 9th of same month.

Benjamin Tomlinson, a minister from Berry Monthly Meeting, dated 7th mo. 31st,

1866. Endorsed by Abington Quarterly Meeting 9th of 8th mo.

Bennet G. Walters, a minister in unity, from Prairie Grove Monthly Meeting, endorsed by Prairie Grove Quarterly Meeting, State of Iowa.

Jesse Underwood, an Elder from Centre Monthly Meeting, Centre County, Pa., 8th mo. 9th, 1866.

Joseph B. Wilson, an Elder from Young Street Monthly Meeting, Canada West, dated 16th of 8th mo., 1865.

Charles Tease, an Elder from Horsham Monthly Meeting, 1st of 8th mo., 1866.

Aaron Packer, an Elder from Green Plain Monthly Meeting, 15th of 8th mo., 1866.

Women's Meeting produced Minutes for the following Friends, who are in attendance:

Ann Packer, a minister from Green Plain Monthly Meeting, Clark County, Ohio, 15th of 8th mo., 1866.

Rebecca John, a minister from Roaring Creek Monthly Meeting, 6th mo. 13th, 1866.

Endorsed by Fishing Creek Half Yearly Meeting, Columbia Co., Pa., 21st of same month.

Lydia L. Garrett, a member from Goshen Monthly Meeting, Chester County, Pa., 7th mo. 25th, 1866.

Epistles were received from Baltimore, Indiana, New York, Philadelphia and Genesee Yearly Meetings, which were read, and the contents thereof were edifying and comforting to us. To essay an Epistle, if way opens, to send to each of those meetings, a committee was appointed.

The following reference was received from Salem Quarterly Meeting, which, after consideration, was left to a committee, to unite with a like committee of Women Friends, should they appoint one to take the subject under care, and report to a future sitting their sense and judgment thereon.

REFERENCE.

As the Yearly Meeting in 1852 and 1853 left the Monthly Meetings at liberty to disown some of their members who had left our Society (and set up other meetings,) without visiting or treating with them as is usual for our Society to do in disowning offenders, (by which some have been disowned.) and as the Society which they formed is believed to be extinct within the limits of our Yearly Meeting, and it is believed that some of those so disowned have a desire to be reinstated in our Society if we would hold out some encouragement to them: This meeting would suggest to the Quarterly Meeting the propriety of laying the subject before the Yearly Meeting for its deliberation, of leaving those so disowned at liberty to return to our Society and be acknowledged as members by attending our meetings and expressing a desire to be again united therewith without

being further treated with. With which the Women's Meeting concurs.

JONATHAN T. SHAW, *Clerk.*

George Cope, on behalf of the representatives, proposed the name of Joseph S. Hartley for Clerk, and Samuel S. Tomlinson for Assistant, who being severally considered, were united with and accordingly appointed for the ensuing year.

ANNUAL ANSWERS.

1st.—Freeport Monthly, preparative and meetings for worship (a branch of Short Creek Quarterly Meeting,) laid down, and the members thereof are attached to Short Creek Monthly Meeting; also, Sunbury preparative and meeting for worship (a branch of Stillwater Quarterly Meeting,) laid down, and the members thereof attached to Somerset preparative and particular meeting.

2.—Schools are encouraged, but there are none under the care of Friends.

The following reference was received from Salem Quarterly Meeting, viz.:

Salem Monthly Meeting proposes the subject of discontinuing to hold preparative meetings where there is but one constituting a Monthly Meeting; which claiming our attention, it was proposed by this meeting, and women's meeting united therewith, to defer the subject until next year for further consideration.

The following reference from Stillwater Quarterly Meeting was read, and the proposed change approved of by this meeting, viz.:

"Stillwater Monthly Meeting proposed that the Quarterly Meeting of Stillwater be held in the Eleventh month in each year at Richland, instead of Somerset, as at present; which is united with, and the change to take place accordingly, if approved by the Yearly Meeting."

Taken from the Minutes of Stillwater Quarterly Meeting of Friends, held at Somerset, 5th month 25th, 1866.

The Committee on Reference from Salem Quarterly Meeting made the following report, viz.:

To the Yearly Meeting now sitting:

We the Committee on the reference from Salem Quarterly Meeting, having met and duly considered the subject, unite in proposing that the order authorizing Monthly Meetings to disown members for certain offences, on minute, without treating with them, be rescinded, and all disabilities arising therefrom be removed; which we submit to the meeting.

Signed on behalf of the Committee,

JOHN D. YOCUM,
RUTH COPE.

Which claiming the attention of the meeting, was generally united with.

The Representative Committee produced a memorial for our deceased friend, Jane Yocum,

adopted by Plainfield Monthly and endorsed by Stillwater Quarterly Meeting. It was read and approved, and directed to be recorded and printed with the minutes of this meeting.

For the encouragement of the brethren who have not been with us to receive the glad tidings of joy that have been dispensed to us in this our Annual Assembly, we feel constrained to trace the remembrance of some of these seasons, that the consolation may extend to the watering of the whole heritage. In considering the state of society our minds have been brought into near sympathy and fellow feeling with each other, and with all wherever scattered, that we may be more and more concerned for the maintenance of those testimonies that our forefathers were called upon to bear. And we were feelingly reminded that there is no other way by which an advancement can be made in this great work, either individually or collectively, but by yielding obedience to the gentle teachings of the Spirit of truth. Hence there would arise a concern to meet with our brethren and sisters at our little meetings, that we might feel after that life and power that will centre us in the love of the Father and qualify for the discharge of the varied duties of life. And oh, the feelings that seemed to pervade the general mind that the time past in carelessness and indifference may suffice; that we may press forward with new life and energy to the rebuilding of the broken down walls of our Zion, that she may again arise and shake herself from the dust of the earth, even from every weakness and pollution, and put on her beautiful garments of humility and love. And beloved brethren the spirit says come and the bride says come, and all that will come may come, and partake of the waters of life freely; let us therefore be encouraged to open our hearts for its reception, for if we are only willing and obedient it will be unto us a well of living water, springing up unto everlasting life. And when we come into this state, all those noble testimonies that we as a people feel ourselves called upon to bear will be carried forward to the glory of God and the enlargement of his kingdom in the hearts of his obedient children. Then our tender offspring, whose perceptions are clear, but who are often turned aside by the weakness of parents, and others that are aged, will be constrained to attend our meetings and feel the overflowings of divine love to tender their hearts, and the powerful language of our example will be to them as stepping-stones to lead them to the kingdom of Christ.

Having been gathered during the several sittings of the meeting to feel a good measure of divine love to prevail, we conclude, to meet at Salem, at the usual time next year, if so permitted.

JOSEPH S. HARTLEY, *Clerk.*

Yearly Meeting for Ministers and Elders gathers the preceding 7th day at 10 o'clock. Meeting for Suffering or representative committee, 7th day, 3 o'clock, P. M. Public Meetings for worship on First and Fourth days, gather at 10 o'clock.

For Friends' Intelligencer.

FRIENDS AMONGST THE FREEDMEN.

NO. III.

Our Association, through its Education Committee, continues to be in the receipt of gratifying intelligence from its teachers, and the statistical condition of the schools for the present month may be thus summed up,—viz.:

Ten schools in Virginia—No. of Males, 166; No. of Females, 189. Total, 355. No. Reading, 185; No. Writing, 250; No. in Alphabet, 31. Between six and sixteen years of age, 294.

Five schools at Mt. Pleasant and St. Helena, S. C.—No. of Males, 180; No. of Females, 137. Total, 267. No. Reading, 201; No. Writing, 238; No. in Alphabet, 29. Between six and sixteen years of age, 192.

Attention is again called to the few in the alphabet; only *sixty* out of the entire *six hundred and twenty two*! and this, too, with *four hundred and eighty-eight* under sixteen years of age.

From the letters and reports of our teachers it would appear that they are all laboring with a will, and with the very best interests of their pupils at heart; and not only their pupils, but the welfare of others of the freedmen by whom they are surrounded oftentimes claim their attention and sympathy.

It may not be amiss to add a few items of information gleaned from their letters.

The school-house at Herndon Station, Fairfax Co., Va., where Francis E. Gause is located, has been burned down, it is supposed by incendiaries; but, nothing daunted, she is now going from house to house giving instruction in the best way she can; and the freedmen are at work vigorously in rebuilding. Our Association made application to the *Bureau* for assistance, which was cheerfully granted.

The school and church building at Lewinsville, which was partially destroyed by a mob some time since, has been repaired. The school reopened, and the teacher remarks, "Both teacher and pupils are glad to resume their duties." She also speaks of the discouragement they felt at first, from which, however, they have rallied, and that several persons had bought land near the church, in order to guard it and be handy to school.

Our teacher at Vienna reports having a little boy who learned the alphabet in *five days*, and after being a pupil only *nine days*, could spell *well* in three letters.

Several of the teachers have forwarded

specimens of penmanship of some of their pupils, not only creditable, but worthy of high admiration. One of the teachers informs that her contributions were all from children under eleven years of age; and another, who furnished two quite lengthy compositions on "War," written by pupils aged respectively *eleven* and *thirteen* years, informs that the youngest when she first came to school (after vacation, it is presumed) could not make an "A" on the slate.

The essays were entirely original, without even a suggestion from her. The elder of these two girls, having shown a decided talent for teaching, has been installed as an assistant, at a moderate compensation, while still remaining under instructions. In several of the schools this experiment is now being tried, with every prospect of entire success.

A number of the teachers have referred to the eagerness with which the pupils resumed their studies after the summer recess, and the remarkable fact that they have retained what they had previously learned.

One remarks, "I am often surprised how little the children forget while away from school; after vacation nearly every one was ready to commence *where he or she left off in the summer*," while another reports that all gave evidence of having been studious and attentive during the holidays.

Very interesting letters have also been received from our teachers in South Carolina. One of them narrates an instance of a pupil who did not know three letters about six weeks since, who can now read anywhere in the *Primer*, and she thinks in another week he will be fit for the class in the "*First Reader*." Also, that she has several other scholars who have done almost as well.

Another, in describing their great anxiety and untiring efforts to learn, states that one of them said to her, "Why I think so much about my lessons I cannot sleep nights—'pears like I want to come to school every minute. Oh! I do want to learn; you must tell me all my mistakes." And another, when success crowned his efforts to master the second case in *Subtraction*, looked the satisfaction he could not express, and said, "Please, ma'am, give me that same kind for two weeks straight along, so I may have him good and never forget him," &c.

With one exception (which was of short duration,) the health of our teachers, so far as we have been able to ascertain, has been good since their return, and they appear to be cheerful, happy and contented with their labors. Several of them have stated the fact that a number of the children are prevented from coming to school for want of sufficient clothing to protect them from the inclemency of the weather. Their wants in this respect have been temporarily

supplied so far as the Association then had the means, but as these must necessarily need constant renewal, and as the educational branch of the work is a heavy drain on its funds, which *must* be met, it is hoped Friends generally will respond to this appeal by an increase in the amount of their contributions. An erroneous idea has gained ground that little or no assistance is now needed in aid of the *physical* wants of the Freedmen. We have abundant evidence that this is not the fact. Although it may be true that the period of general intense suffering is over and past, it must be remembered they are still in a transition state and peculiarly subject to trials and discouragements, needing judicious helping hands, competent to discriminate between turning a deaf ear to suffering, and encouraging anything like dependence or pauperism.

A box of sundries has been sent to each one of our teachers, containing not only a supply of much needed clothing, but an assortment of toys for the children, and the acknowledgments of their reception tell us of the hearts made glad, both of old and young, upon the distribution of these opportune gifts. Warm expressions of gratitude also greet us from every quarter where our "circular letter" to the Freedmen has been sent. They frequently desire it to be read to them over and over again, and think it is "so kind to be remembered by their white friends."

J. M. E.

Philadelphia, Twelfth mo., 1866.

For Friends' Intelligencer.

REFLECTIONS FROM THE PORCH.

"The voice
Is but an instrument, on which the priest
May play what tune he pleases."

While in fair Eden's garden Adam dwelt,
Enjoying all the goodly heritage
Which God designed for man, the serpent crept,
With stealthy movement, into Paradise,
And, with its cunning wisdom, caused the fall;
The garden still remains, and fairest fruits
May yet be gathered from its genial soil—
Fruits of the Father's planting; and the call
Which Adam heard still vibrates in the soul
Of all who seek God's presence and his love.
The serpent, too, is there, and winds its way
Through shaded avenues and sunny walks;
With plausible deceit it offers fruit
That surely causes death; we take the gift,
And eating, loose our consciousness of life,
Who shall restore to us our primal strength?
Who bruise the serpent's head? who closely bind
The vanities of earth within the bounds
Of all restraining love, by power divine?
Where is the minister with sorrow bowed
To "blow the trumpet," "sanctify a fast,"
And "weep" between the altar and the porch—
A minister of life, whose constant cry
Is to the Lord of Hosts, "Thy people spare,"
"Thy heritage give not unto reproach?"
Isaiah, in his inspiration, saw
The Lord upon a throne, and lifted up;
He heard the song of a seraphic host,
Rejoicing in the glory of their God.

He cried, "Woe, woe, is me." I am undone;
I dwell with lips unclean; mine "eyes have seen"
The Lord of Hosts. Straightway a living coal,
From off God's holy altar, touched his lips,
And purged away his sin. He heard a call
For one to spread glad tidings on the earth,
And, hearing, meekly bowed before the Throne,
A willing messenger:—Lo! "I am here"—
And he was sent—a prophet from the Lord.
Where stand we now? what banner do we bear?
To show a true allegiance to the cause
For which the good have suffered in all time,
Our hands hang down dependant, and the ark
Moves onward, but alas! 'without our aid,
Unworthy children of devoted sires;
We seek the Spirit of eternal light,
And mingle thought with thought to make us one,
But do not find the sympathy we crave.
Excitement rules the day; the wrestling hour,
Wherein our loving duties should be learned,
Is fraught with projects human wisdom framed.
Lo! Christ is here, Lo! there,—bewildered oft
And unconvinced, the mind gropes darkly on.
Clouds gather overhead, and shadows fly
Across the pathway of redeeming love;
Voices return like echoes from a rock,
Leaving no trace of an impression there.
Unchastened fires are burning, and the call,
Though zealous, leads not to the narrow path.
The outer court applauds; the inner life
Is drooping unsustained—"A stone for bread."
Our walls are broken down, our gates unbinged,
Our towers of strength are falling in decay;
Shepherds have left the flock, and bleating lambs
Are straying from the fold. The mountain top
Is dry and barren, and the voice we hear
Oftimes is calling us to useless toil,—
Husks in abundance, but the promised seed
Lies deeply hidden from the searching eye.
Our welcomed charities, and tender care,
Bespeak us many friends; the world admires,
And, in its admiration, we forget
The source from which our blessings ever flow.
We have the world's reward: its smiling look
Repays us back with praises of its own.
Oh ye, who trust that God does still reveal
His presence in his children, ye that wait
To overcome the evil with the good,
Ye "children of the light and of the day,"
With fear and trembling seek the holy mount;
Tread not on sacred ground with shodden feet;
Gird not your lions with wisdom of the earth;
Cast up a highway, that the soul may pass
From days of labor to a home of rest;
Plant deeply in the soil both Truth and Love,
The seeds of promise to the faithful soul.
Ye may not see the growth; in goodly time
The branches from the trunk will widely spread
With sheltering boughs for all the birds of air,
And shaded lairs for beasts from every field.
Your spirits, soaring high, will seek the light,
The centre of all good, and finding there
The Author of its life, will sing his praise—
Then, in your silent musings, ye may feel
Refreshing waters gushing forth from springs
Of everlasting life; then ye may know
Of bread that feeds the hungry; then may find
A balm to soothe the weary. In the faith
Of God's disposing power you may live,
And in that faith your hope forever rest.

Philadelphia, 12th month, 1866.

Professing to be a Christian does not make us
to be one.

JACQUES BALMAT.

(Concluded from page 686.)

I must explain to those who may read these lines, and who have not made the ascension of Mont Blanc, what the Grand Plateau is. Let them imagine a slightly inclined plane of about five acres, situated 12,000 feet above the sea, swept by numerous avalanches of ice, over nearly its whole extent; exposed to the N. and N. E. winds; bounded on the other sides by immense mountains of ice and snow, where not a rock or even a stone could be found, as a seat or a shelter, but everywhere a deep snow, that the wind whirled in gusts around them, and where the thermometer marked 32 deg. on the hottest days of summer in the sun. This, then, is a picture of the Grand Plateau. It was there that, without coverings, and having nothing but his sacque and his stick, he resolved to pass the night.

When we reflect that this astonishing man was alone, in the midst of those vast unknown solitudes, having nothing but his courage wherewith to face such great dangers, with the certain conviction that in case of misfortune he could receive no human aid, we are struck dumb with surprise.

During the day, the over-excitement of the walk, the novelty of the localities, the hope of success, all made the time pass rapidly; but in the night, when overcome by fatigue, without sufficient provisions, his feet in the snow at a temperature of 14 degrees, and without sleeping, the hours appeared as ages; and, besides, the distant cracking of the glaciers, and the prolonged roaring of the avalanches, which interrupted the deathlike silence which reigned in those high and remote regions, were terrifying.

"At last," said Balmat, "the dawn appeared; it was time,—I was frozen. However, by dint of rubbing myself and practising ridiculous gymnastics, my limbs became limber, and I was able to resume my explorations. I thought I had seen, while I was descending to the Grand Plateau and about half way down, an extremely rapid declivity, but at the same time accessible, which would lead straight to the Rocher Rouge; I decided to climb it; arrived there, I found it so steep, and the snow so icy, that I could not maintain my position; however, by making holes with the iron point of my stick, I succeeded tolerably well in clinging to it; but I experienced an extreme degree of exhaustion and fatigue."

"It was neither an easy nor an enviable position to be suspended, as it were, on one leg, with the perspective of an abyss below me, and to be forced at the same time to cut those kind of steps. At last, after great perseverance, I gained the Rocher Rouge. Oh! I said to myself, I am nearly there, from here (to the summit I meant)

there is nothing now to hinder me; all is as smooth as a mirror,—no more steps to cut, no more impediments; but I was almost dead with hunger and fatigue, and numb with cold. It was late, I must descend, but this time with the certainty of again ascending the first fine weather, and of succeeding. When I reached my home I was almost blind, and after resting a short time, I laid down in the barn, where I slept for 48 hours."

This narration, which was made to the author and many other persons, is faithfully given word for word. The excursion was made on the 8th, 9th and 10th of July, 1786.

After several days of indispensable rest, Balmat resolved to re-ascend and to reach the summit of Mont Blanc by himself;—he was henceforth sure to succeed; but he said to himself, "If I leave there no signal that can be seen from Chamouni, who will believe me? It will not be the guides who have hitherto failed in the same enterprise; still less will it be those who do not know the mountain; they laugh at all attempts, and are well persuaded that no person will ever succeed in putting his foot on the snowy crest.

These decisions were just; he must either prove the fact, or pass for a jester; and to do it, was as difficult as necessary.

Any one can see, that a man by himself, and already burdened by his provisions and the indispensable change of clothing for such an expedition, could not carry to the top of Mont Blanc any object whatever that could be seen from Chamouni.

After a long deliberation he decided to communicate his discovery to Dr. Paccard, and associate him in his project.

The proposition was the more warmly received by Dr. Paccard, as he was himself a decided amateur in those kind of hazardous excursions.

Being at that time a learned physician, and a not less distinguished naturalist, he occupied himself in various researches in natural history, principally in botany and geology.

The high terrace of Mont Blanc would be then a marvellous spot from which to embrace in a single glance all the details of the structure of the high ridges which surrounded the giant of the Alps.

From the 1st of August, 1786, the weather appearing favorable, Dr. P. and Balmat made their preparations for the journey, hastily and secretly; secretly, I say, so that no one should participate, and also to avoid ridicule in case of failure.

It was necessary, however, to take some persons into their confidence, so as to watch their progress, and signalize their success, or, in case of accident, to send them help. Two persons only were chosen accordingly.

Paccard and Balmat started from Chamouni,

separately, on the 7th of Aug., 1786. They agreed to meet at the foot of the mountain de la Côte, beyond the last chalet, so that no one could guess their object, each one taking his provisions, reduced to the smallest possible compass, as if he was merely taking a walk.

That first day's journey was nearly free from danger, and brought them to the edge of the glacier, which skirts the mountain. Arrived there, they chose their resting place for the night, under the shelter of a large mass of rocks. The next morning, as soon as day dawned, they commenced crossing the glacier du Bosson, which at that place was full of crevasses; it required a considerable time to go around the largest, and to get over the others, before arriving at the foot of the Grand Mulets. After a short time of rest, they directed their steps towards the Dôme, describing in their march numerous zigzags; crossed the little Plateau and the avalanches of ice, without accident, and reached the Grand Plateau towards noon. From thence turning towards the south, they arrived at the foot of the steep snow-hill where Balmat had been obliged to cut steps in his former attempt. Although the surface of the snow was then softened by the sun, it took them full two hours to climb it and reach the Rocher Rouge. Until now the rarification of the air and fatigue alone had incommoded them; but here a very violent and cold wind from the N. W. overtook them and added to their discomfort. But it was impossible to stop; they must continue walking, or be frozen on the spot. From this point to the summit, although the declivity was not very steep, respiration became hurried and painful, which joined to the fatigue, and to the mortal cold which they endured, and the violence of the wind which greatly retarded their progress, rendered their position infinitely perilous. In spite of all these discouragements, their indomitable courage prevailed, and at 4 o'clock in the afternoon they attained the ridge of this colossus of the Alps.

Dr. Paccard and Balmat very often related the incidents of their expedition to their intimate friends: but they had no words to express the ecstasy with which they gazed upon the sublime and dizzying panorama which unrolled itself to their view, and not less, the satisfaction of being the first to enjoy it.

However, the lateness of the hour, and an intolerable temperature, soon forced them to tear themselves from that incomparable site, and beat a retreat. Their return the same day to their shelter of the day before was made in all haste, and very happily. It would be difficult, I believe, to express the satisfaction—the intoxication rather—of those two intrepid explorers during that first night. Henceforth their names will belong to history, and during their lives with what congratulations will they not be surrounded!

The next morning Dr. Paccard said to Balmat, "But I hear the singing of birds, and it is still night." "Then," said Balmat, "you cannot see, for the sun is up; a thick glare of bleary-eyedness has rendered you momentarily blind. It is the effect of the reflection of the sun upon the glittering snow; but once at Chamouni, you will be cured. You have but to apply cream or the foam of beer, and all will be well; meantime I will bathe you with water,—we will breakfast, and go on."

It was with infinite difficulty that Dr. P. succeeded in reaching the foot of the mountain of La Côte, on account of the deplorable state of his eyes; but after a few days of rest, and application of remedies, the inflammation subsided.

The two persons who were taken into the confidence of the explorers, acquitted themselves admirably. While the success of the travellers was uncertain, until they knew that they had overcome the obstacles hitherto considered to be insurmountable, they kept their secret profoundly; but as soon as they saw them on the Rocher Rouge, and knew that they would attain the summit, they called the attention of a number of persons to confirm, by the aid of a telescope, the victory gained over the mighty mountain by those two daring men.

The days that followed their happy return were very delightful; they were feted, congratulated, and admired by a crowd of people. After an interval of several days, Dr. Paccard drew up a narrative of their expedition. If he could not enrich it with a great number of remarks, it was not for the want of an extensive knowledge; the uncertainty of success, the suddenness of their departure, the short time that they could remain on the summit, and, more than all, the impossibility of carrying with them instruments of observation, were the cause of it.

It was reserved to the illustrious Mr. de Saussure, who made the ascension in August, 1787, to give to the learned world the interesting series of observations which the season permitted him to make there; and to him and to others who have described its mountains and its glaciers, the valley of Chamouni owes much of its celebrity. Their memory is dear to its inhabitants, and may these lines be a fresh tribute to them.

It would also be unjust to our compatriots not to offer our gratitude to them, who, by their fortunate discovery, attracted the attention of the learned to our village. From that time, Balmat was, as we may easily believe, the favorite guide. His time was exclusively occupied in long journeys, or in working on his farm; however, that was not his chosen employment.

He, as I have said, prosecuted with singular

determination any enterprise that he had once undertaken; he liked freedom in thought and action; he could not even accommodate himself to the forced restraint of the guide towards the traveller; he would often prefer to a certain gain the dangerous risks incurred in searching for minerals, and particularly mining.

Thus, for want of a sufficient knowledge of mineralogy and geology, he lost much precious time, ruined his fortunes, and finished by falling a victim to his delusions.

In September, 1834, believing, upon some vague information, that a vein of gold existed upon the side of one of the ridges which bounds the valley of Sixt, he immediately commenced searching for it; but when he arrived at the place indicated, he found it quite unapproachable. It would be necessary to pass over a frightful shaft of rock on a narrow cornice, sloping over a precipice of more than 400 feet deep.

The sight of the imminent danger he must encounter, checked him, and for the time he abandoned the idea. Some time after, having associated with him a chamois hunter as daring as himself, they two with the aid of some precautions, returned to the charge; and this time, in spite of the advice and entreaties of his companion, he would persist in going on alone. It was a fascination; he ventured upon the narrow ledge, made a few steps, and disappeared forever. His companion returned alone, distracted and in despair, in a condition bordering on insanity. No aid could reach the unfortunate Balmat; his death must have been instantaneous.

Imagine to yourself a fall of more than 400 feet to the bottom of a gulf piled with enormous rocks, and constantly swept by avalanches of ice, and you will have a faint idea of that horrible tomb.

At first the people of Chamouni were not told of all these facts; the hunter thought it better to conceal the truth, for fear of being obliged to answer before the court, although no suspicion could attach to him. Some shepherds of Sixt had seen the accident, although, for various reasons, they imposed on each other an absolute silence, the most powerful reason for which was the hope to discover themselves the precious mine.

It was therefore only by uncertain data that the son of Balmat could attempt any search; consequently it was fruitless.

Nineteen years had passed away without any one thinking of undertaking further search. The frightful description that had been given of the abyss at the bottom of which he lay, and the great danger that they must run, caused the bravest to shrink.

However, in 1853, the author and several experienced guides resolved, with the help

of the hunter, to make another attempt; but they were soon assured of their folly, and of the impossibility of success, and withdrew sorrowfully from the fatal place, convinced that it only now remained to his friends to dedicate these few lines to his memory. M. C.

The Treasurer of Friends' Association for the Aid and Elevation of the Freedmen has received the following amounts since last report:—

12th mo. 29, 1866. No. 30 Third St.

ITEMS.

THE INDIANS.—That the Indians are greatly sinned against as well as sinning, the testimony of Bishop Whipple, of Minnesota, abundantly proves. After unrivalled opportunities for observation among the 18,000 Indians in his diocese, he ascribes their demoralization greatly to their contact with the whites, and particularly to the government agents. He says that they are vicious and bad in proportion as they are familiar with the whites. The atrocities practised on them for years by government agents have tended to exasperate them, and have led to acts of cruelty and bloodshed. Though these Indian agents have a salary of but fifteen hundred dollars a year, the Bishop says they frequently retire at the end of four years, having amassed a fortune of fifty thousand dollars.—*Del. Co. Republican*.

SLAVERY NOT YET DEAD.—Four negroes, convicted of larceny and ordered to be sold by Judge Magruder, at Annapolis, were sold on the 22d ult. The first became his own purchaser for \$37.

Another man brought \$35, and two girls brought respectively \$22 and \$30 each.

There was an officer of the Freedmen's Bureau present of the sale, and it was thought the bidding would have been more spirited but for the fact that an impression seemed to prevail that the officer in question was about to interfere with the right of the purchasers, and relieve the negroes from the custody of those who bought.

A FEMALE of experience desires a situation in a public or family school. Can give good references. Address *wm227 tf* **TEACHER, New Port, Delaware.**

SPURGEON ON GEORGE FOX.—An address before Friends' Institute, in London, by C. H. Spurgeon. Price ten cents per copy, or \$5.00 per 100. Just published and for sale by *12ms tf* **HENRY LONGSTRECH.**

"JOSEPH FOULKE'S FRIENDS' ALMANACK" for 1867 now ready, by T. Ellwood Zell, Nos. 17 and 19 S. 6th St., Philada. Sent by mail free—either the large or pocket one—upon receipt of 10 cents. *1115 4t*

APPLE PARERS, Preserving Kettles, Bread Slicers, Clothes Sprinklers, (for ironing,) Patent Flat-Iron Holders, Knives and Saws Sharpeners, Expansion Brace Bits, Clutch Braces, (require neither fitting or notching of bits,) and a general variety of Hardware and Tools. For sale by **TRUMAN & SHAW, 929. No. 836 (Eight Thirty Five) Market St., below Ninth.**

CHESTERFIELD BOARDING SCHOOL FOR BOYS, situated on the Crosswicks Road, three miles from Bordentown, N. J. The Fifty-Third session of this Institution will commence on the 10th of 11th mo., 1866, and continue twenty weeks. Terms, &c. For further particulars address **HENRY W. RIDGWAY, 4766 23d 3267 pines pa la, Crosswicks P.O., Burlington Co., N. J.**

SELECTIONS FROM THE WRITINGS OF JOHN BARCLAY.

(Continued from page 691.)

To ———.

3d of Second Month, 1819.

DEAR ———, I have often believed that the blessing in store for those who hand "the cup of cold water," may not pass from thee and thine, as thou art yet concerned to struggle on in the narrow way. I desire to be thy companion therein, and an example in giving up faithfully to all that is set before me, whether in the line of doing, or of suffering; who am often sensible of *something* still blotting out and wiping away many a spot contracted through unwatchfulness. There is a very precious feeling that seems to prevail with me, whilst saying thus much; and I may add, that though nearly day by day bowed down and broken, under a view of the low state of things at home (in the heart) and abroad, and of many sacrifices and services for the cause which are called for at my hand; yet I may acknowledge the very windows of heaven have been opened, and showers of refreshing help and strength have descended, such as cannot be contained or expressed: so that the encouragement is great for me and thee and all, yet to struggle on; laying aside that which hinders. And I think I may safely say to thee, dear ———, there has already been received by me an equivalent to the hundred-fold,—houses, brethren, sisters with suffer-

ing; though I look for something still better in the end.

From thy affectionate friend,
J. B.

To ———.

1819, Fifth Month 4th.—I have sometimes remembered the language or sentiment of a tried servant, who by being resigned to the Divine will through the tribulations that were in wisdom handed, was enabled to comfort a brother in words like these:—"if we be but clean vessels, no matter how empty;" and I may add, "no matter how long on the shelf," and as one says, like "a pitcher placed upside down, on its mouth,"—to keep the dust out. The only danger I have found, when counted worthy, or clean enough to be set in this trying position, has been that of repining at the dispensation allotted, or not quietly seeking after acquiescence. If we were but willing to abide the operation of the Almighty hand, which would make all of us vessels fit for a place in his holy temple, and a service in the Lord's house; and were but enough sensible of the benefit of these turnings and overturnings, and of the blessing that they are to those that are patient enough to profit by them;—surely some of us that are now ready at seasons to give over struggling, and to think it is to no purpose endeavoring to hold out in faith and faithfulness any longer, (presuming the Lord hath forgotten us,) would rejoice that we are counted worthy to drink of the cup, and to be baptized with.

the baptism, which alone can purify and prepare for a seat in the heavenly kingdom. "It shall be given to those for whom it is prepared,"—"I go to prepare a place for you;"—and did He not go through suffering;—was He not said to be made perfect through the same; and shall we find a safer path than in His footsteps, "who endured the cross and despised the shame." Some of us in this day of great profession and performance have to be renewedly baptized into a deep sense of the state of things, both without and within; and to labour earnestly after the pure and unshackled arisings of the seed,—which is often very low, and burdened with much that seems to be favorable, but yet greatly oppresses. I desire for thee, dear J., that thou mayst not be without thy full appointed share of such conflict of spirit, and even apparent desertion of heavenly help and strength, as is best for thee; and that thou mayst have the grain of faith renewed day by day, the hidden manna, the secret sustenance which enables quietly to wait and patiently to hope, even through all things: so that if these dispensations should be in judgment or in mercy, thou mayst be favored through submission to rise above all that has stood in the way, steadily persevering in a course of humble, dependent, watchful, innocent conduct. I believe that marriage is often made a means of furthering the religious growth, and strengthening the mind in that which is good, as we look to the Lord in our proceedings, having him in our eye, above and before all idols. But few measures taken in life, perhaps, are so likely to entrap the unwary, as an injudicious engagement therein; it unsettles and uncentres the mind from the great first object, if much care be not exercised, and diligent watchfulness maintained.

To E. S.

1819, *Seventh Month 22d*.—The examination of religious tracts proposed to be printed is a weighty service. If it were only to judge of words, the consistency of the sense and meaning with the principles which we profess, as far as human wisdom can distinguish, this would be easy, and could be compassed by the spirit of a man: "but the things of God knoweth no man, but the Spirit of God;" so that man's spirit is unequal to it, but must be in subjection, with all the vain reasonings which he can muster up and contrive by the natural powers of his understanding, or by his acquired learning and erudition; and he must wait to feel that raised up in him, which is able rightly to discern and comprehend the precious, and to distinguish it from the vile. I believe a time may come, when the writings of many of our early members, who shone bright in their generation, may again rise into repute among us, and also among others; notwithstanding the unfashionable garb

in which many of these writings are clothed, so unsuitable (apparently) for these times. So that one would like to see the avenues kept open, and the channels clear, and the conduits clean; that whatever is to flow in the ordering of best Wisdom, may flow freely. As to what thou sayest of the fear of some, about the style of our early Friends' writings, I think this fear is a weakness, and proceeds from a sort of doubting in the mind about the writings themselves, and not merely about the language. I would ask these fearful ones, whether in reading a peculiarly interesting history or travel, the subject of it does not carry them above the style, so that almost any style, however prosy and dull, is overlooked; and this is the case tenfold more strongly with the humble seeking soul in religious matters, by whom the words are overlooked in the earnest desires after the substance. Those who are admirers of words, whether they be words printed or words preached, are very unlikely to be benefited really and truly by either, having gone from that which is beyond words, and which alone can make words effectual.

1819, *Sixth Month 5th*.—Great have been my temptations: yet abundantly manifest through all, have been the out-stretchings of the ancient and eternal arm of power: so that to this hour, it is alone through the Lord's eminent mercy and long-suffering, and by his preserving strength and help daily extended toward me, that I am yet alive in Him, and able to celebrate his name, and seek his face, and wait for the fresh arisings of his holy heavenly virtue; by which alone I can do any thing acceptably for his great and glorious cause in the earth, or be his dutiful and faithful son and servant.

1819, *Date uncertain*.—O! holy blessed Father! thy love shed abroad in the heart, thy sweet refreshing influence, can make up for all;—thy softening, healing balm makes us forget our wounds and weeping. O! how good thou art to those who still struggle after resignation and sigh after submission to thy holy will! Though they may fall many times, yet how is thy strength manifested for their recovery and relief, for the renovation of their faith and courage; so that all their transgressions are blotted out, and their unfaithfulness is wiped away. This is precious indeed—to feel access to the fountain set open for sin and iniquity; and thus to be brought nigh by the blood of the Lamb, and to feel its cleansing virtue.

The shortest and surest way to live with honor in the world, is to be in reality what we would appear to be; and if we observe, we shall find that all humane virtues increase and strengthen themselves by the practice and experience of them.

"GEORGE FOX."

BY C. H. SPURGEON.

(Continued from page 694.)

Nothing becomes George Fox more in his whole character than his perfect self-possession. Sometimes it was outwardly winter with George Fox, and sometimes it was summer, but it was all the same to him inwardly. I cannot detect him unbelievably depressed, I cannot find him unduly exalted. If he is bound in prison he does not despise a poor girl who is there detained for execution, but draws up a petition on her behalf, that her life may be spared, and when he visits Oliver Cromwell—let me say a right royal man, a true king—he is not at all abashed before the Protector, but speaks to him just as plainly as he speaks to the poor girl in the jail at Derby; he does not forget the little, or fear the great. When he writes to friend Charles the Second—who, by the bye, scarcely deserves so honorable a title—it is just in the self same bold but courteous style. There is not a grain of the fear of man about him. He is humble before God, but there is no affectation of humility in the presence of kings or princes. He never held men's persons in admiration because of advantage, but spoke to men as his fellow mortals, and as God's servant he was bold to tell them the Lord's mind concerning them.

The death of our friend was the noblest thing of all. Not far from this spot he finished his course. I have prayed many times—in fact it has grown to be almost a daily prayer with me—that I may be able to say when I finish my course what George Fox said, "I am clear, I am clear." Oh! it will be a special mercy for you, my brethren, in the eldership here, you who speak in God's name, if you shall be found clear at the last. Consider what God's truth is, and how we ought to handle it as God's truth, not as a matter to be trifled with or to be spoken without prayerful earnestness; and consider by whose power we profess to speak, namely, by the power of the Spirit of God. Do we always speak by that power? Are we always conscious that we are true to the motions of the Spirit within, and that we deliver ourselves as dying men to dying men? Are we not occasionally silent when we ought to speak, or do we not speak when we ought to be silent? May not sins of commission and sins of omission both accuse us? Oh! if we can say that we are clear we are happy indeed! But what a word—clear, clear of our children, clear of our friends, clear of our neighbors! Oh! above all, if we can say we are clear of the blood of this great city, this wonderful mass of human beings, placed here by God's providence close to our hand with the very intention that we should do our best to win them from destruction. If, looking at London, we could say, "I am clear,"

it would make us, throughout eternity, praise the grace of God which has enabled us to be faithful. I do not think that George Fox spoke too strongly when he said, "I am clear." So far as he knew the truth I cannot see that he could have given his testimony to it more boldly, or more distinctly. He adopted every mode which ingenuity could devise to arouse a slumbering nation, and better still, he also followed after the better wisdom which comes from the Spirit of God. As far as he knew it I believe he delivered every jot of God's counsel, and that in all respects he was faithful to his conscience, so that he could say, knowing that God was hearing him, "I am clear."

It would not be right, perhaps, to close this mere sketch of George Fox's life without saying that I do not think that his career is at present understood by the outside world. Generally when lecturing upon his life I go into the details because they are not known by the outside world, and the man's history is garbled. I would like to think every man honest, but I really cannot think that Macaulay was honest in what he wrote as he did about George Fox. I fear that he slandered him. I am afraid he had a prejudice against Quakers in general, and against George Fox in particular; like Sydney Smith, who wanted to roast just one Quaker, only one, just for the satisfaction of the thing. The story which Macaulay tells of Fox giving as an authority for wearing his hat the fact that the three holy children were cast into the furnace with their hats on is not according to the fact of the case, but is a manifest perversion of the true story, in which Fox, instead of being ridiculous, might even claim to be eminently witty. The outside world supposes that George Fox was a wild, mad, scurrilous fellow in a suit of leather, who went about making disturbances in churches and abusing ministers, and, to say the truth, the outside world cannot make out how it is that you sober, quiet people could have sprung from him. They suppose that you are descended from him by a pedigree of contradiction. They cannot understand how he who "turned the world upside down" should have been the founder of such a serious, orderly, peaceful body of people as you are, so sober that there are none so sober on the face of the earth. But if they would really read the man's life—and you must make them do that, for it would do them good—I think they would say, "Well, though there are many eccentricities, yet this is the biography of a great man."

Speaking of eccentricities, the worst of them are easily understood when you know your man, and see the one idea which burned within him. Take for instance his walking through Lichfield crying, "Woe to the bloody city of Lichfield!" Now supposing a man wants to produce a certain effect upon a certain city, if he

selects the surest method of so doing is he therefore unwise? It is quite certain that everybody at that time heard of what Fox had done, but if he had merely preached a sermon in Lichfield the discourse might have gone down with the general current of his sermons, and we should have heard no more about it. His walking through the street was talked of everywhere, and if he wished it should be he certainly accomplished what he desired. If ministers now-a-days used justifiable means of making men hear their testimony they might certainly do worse. Propriety is sometimes to be disregarded when truth is to be manifested, and it is even better to break through rules of decorum than to leave men at ease in their sins. For my part, though I do not intend walking barefooted either through Lichfield or London, if I felt that good might be done thereby, or that the Lord bade me do it, I hope I should have grace to set out to-night upon the errand. Everybody would laugh, but what would it matter if conscience did but approve? Now Fox's conscience did approve; need I say more? It was an age in which people were somewhat fanatical in religion. Fox was very much more sober than many of the religionists of the period, and he by no means endorsed all that was done even by his own professed followers. We dare not lay at the door of our Master, the Lord Jesus, all the things that his followers may happen to do, and we cannot, therefore, charge to George Fox all the eccentricities and wildnesses which were to be seen in some of his immediate followers. Though he was one of the best of men, he was but a man-at the best. There must be some flaw somewhere in mortal characters, but Fox came very much nearer to perfection than the most of his critics; and it is safe to say that Fox knew better what he ought to do than we who live two hundred years after him.

I did not mean to have said so much upon this part of the subject, but now I beg your attention while I speak upon some of the legacies which Fox left to succeeding ages. He did not leave so much in gold and silver as I suppose most of my brethren around me are likely to leave to their descendants. I should suppose that his wealth in this world was exceedingly small. When Mr. John Wesley was asked how much plate he had, he answered that he had one silver spoon with him and one at Bristol, and that was all, and while there were so many poor people in the world he should not increase the stock. George Fox, I should think, did not even come up to that, but he bequeathed to us in his last will and testament more than as if he had given us the mines of Peru, for he has left to the Christian church in the clearest and most unmistakable utterances a testimony for the spirituality of true religion. It is wonder-

ful how full the testimony is. If you were to read through the lives of all the eminent saints, I believe you would come to the conclusion that of all others George Fox is the most distinct upon the one point, that "God is a Spirit, and they that worship him must worship him in spirit and in truth." I delight to hear him talking about the "steeple-houses." Quite right, George Fox! That is what they are, and nothing better! "A church!" said he; "did Christ shed his blood for the steeple-house, and purchase and sanctify the steeple-house with his blood? And seeing the church is Christ's bride and wife, and that he is the head of the church, dost thou think that the steeple-house is Christ's bride, and that he is the head of that old house?" Some of our Dissenting friends are coming to call their buildings for public worship "Churches," because a church meets in them. Why do not they call them "Suns," or "Moons," because the light shines in them? The title would be quite as appropriate. I fear that we shall go back to superstition by slow degrees through the misuse of terms; for though such misuse may appear to have but very little harm in it at first, yet there very soon comes to be mischief in it, and therefore it is as wise as it is right to be cautious from the very first. Buildings used for ecclesiastical worship were merely buildings and nothing more to this great Elijah. He often testified that the so-called churches were not one whit more consecrated than the moors and commons, and were more like Jeroboam's calves' houses than the true temples of God which are the bodies of his own people. He believed in no consecration flowing from prelates' hands. He had discovered long before the hymn was written, that

"Where'er we seek him he is found,
And every place is hallow'd ground."

This is a truth which the church needed to be taught then, and which the church needs to be taught still.

Fox had no sort of respect either for consecrated persons. Priests had no quarter at his hands. By a little imagination I think I hear George Fox addressing one of those "green and gilded" gentlemen of the Church of England who now-a-days dress themselves up to such a splendor of absurdity. The highly decorated creature would win small favor from the honest Friend; and if he proceeded to perform in his masshouse, George would be as plain with him as Elijah with the priests of Baal, and mock him with as grim a scorn as did the prophet when he said, "Ory aloud, for he is a god!" It would be worth any price to hear George Fox pour contempt upon the rubbishing paraphernalia of the modern Popery which is spreading around us. He had a very copious and forcible vocabulary when he came to talk of priests, and little

cared he to what sect they belonged; if they set up for priests he was very much at home in pulling them down. Fox believed that any man who preached the truth in the power of the Holy Spirit was God's minister, but he would not have it that a man was a minister merely because he was educated at Oxford or Cambridge, or any other University, and had obtained the family living, and had the hands of a bishop put upon his head. Although the ordained pretender may be recognized by the State, and give himself all the airs in the world, he is not God's minister for all that. Fox believed that the poorest person whom God moved to speak was God's voice to the people, but that the most learned and the best educated man who was a stranger to the new birth, and had never received the incorruptible seed which liveth and abideth for ever, was a mere impostor when he rose up to speak in the name of the Lord. Fox left us his testimony in this matter very clearly and unmistakably. Nay, so vallant is his testimony for spiritual religion that he tramples the outward form under the feet of the inward life in matters where others have not been clear; I allude to the use of verbal utterances in worship. He sat still for two hours while the people were expecting to hear him preach, and he did not give them a word, because he would banish them from words, and teach them to worship God in the spirit. Is it not the fault of many of us who do try as much as possible to preserve and cultivate the simplicity of worship, that we are so everlastingly talking? I find it a very blessed thing at the Tabernacle to say, "Now let us sit still for a few minutes." It is often the very best part of the meeting, when the soul can masticate and digest the truth; and if this were done oftener when we meet together for worship, if more frequently solemn silences were proclaimed, I believe the very best results would follow from it. It is as much formality for people to think that they cannot worship God without the voice of the preacher as it is for others to fancy that they cannot worship God without an altar and a priest. It is ceremonialism to imagine that we *must* sing, or pray or read in a certain order; or must sit still just so many minutes; how much better, while all things are done decently and in order, to conduct worship as the Divine Spirit may direct! The Spirit of God is free, and sometimes the best worship will be with words, but at other times the best worship will be without words. Fox tells us this very unmistakably.

Would that the spirituality of worship were known throughout England! Would that it were recognized in every place of worship, that we must worship God who is a Spirit, in spirit and in truth! Let it never be forgotten, my brethren, in your meetings; for it is to be

feared that even your peaceful silence may be regarded as if it were necessarily worship, whereas the silence of your meetings, without the Spirit, is no better than silence in your beds, nay, it is no better than talk and babble, unless the Spirit of God hold high communion with your souls. We must keep this in mind constantly. Preachers cannot preach about it too often, for the rising race need to be told of it incessantly. You who become members of Society by birthright must take especial care lest you imagine yourselves to be members of Christ's church because you happen to be members of Society. Do not conclude that you are necessarily children of God because you wear the garb and use the peculiarities of the Society. Alas! we know that it is one thing to talk about spiritual things, but quite another thing to feel them; one thing to make a profession of them, and even to live in outward correspondence with that profession to a degree, but quite another thing to have the inward and spiritual grace. The world, of course, turns away with a sneer, and says, "What do we care for this spiritual fanaticism?" and we can reply to the world, "Thou knowest nothing about it! How canst thou know it, for it is spiritually discerned." But you and I must see to it that every act of worship which we perform is done in the Spirit. We must pray in the Spirit, sing in the Spirit, and preach in the Spirit. When I have sometimes heard the clerk say, "Let us sing to the praise and glory of God," I have wondered whether it was not far more to the praise and glory of the organ or of the singing-pew; and when this is the case, what a mockery it is! Only that music is sweet in God's ear which comes from the heart, and only that praise is accepted which is the work of his Spirit in the soul. George Fox, dear friends, has bequeathed these principles to you. I pray you, guard them with your lives, and hand them down with undimmed lustre to your sons. Let nothing beguile you from your steadfastness in the spirituality of your worship, and press it upon others everywhere, wherever you have opportunity, that the Father seeketh such to worship him as worship him in spirit and in truth.

(To be continued.)

"He that soweth sparingly, shall reap also sparingly; and he that soweth bountifully, shall reap also bountifully."

What an incentive to holy living and increased spiritual attainments!

My soul, wouldst thou be a star shining high and bright in the firmament of glory?—wouldst thou receive the ten-talent recompense? Then be not weary. Gird on thine armor for fresh conquests. Be gaining daily some new victory over sin. Deny thyself. Be a willing cross-

bearer for thy Lord's sake. Do good to all men as thou hast opportunity; be patient under provocation, slow to wrath, resigned in trial. Let the world take knowledge of thee, that thou art wearing Christ's livery, and bearing Christ's spirit, and sharing Christ's cross. And when the reaping time comes, He who has promised that the cup of cold water shall not go unrecompensed, will not suffer thee to lose thy reward.

LETTER FROM LYDIA P. MOTT.

No. II.

First-day Evening.—Contrary to my usual practice, I went up to W. Willet's this afternoon, on account of their intending to set off to-morrow, and while there thy parents arrived, and I was a few minutes with them, which makes it late to commence a letter; yet I am unwilling thy father should return without a line, acknowledging the receipt of thy truly acceptable letter, which convinced me that nothing existed in thy bosom but love and good will, not only towards me, but others. May this ever be the temper of thy mind, and it assuredly will be if thou continues to desire a conformity to the Divine will; for, under the government of that, no evil surmisings can be indulged. "For what agreement hath light with darkness, or what concord is there between Christ and Belial." O my dear M. A., it is my heart's desire that thou mayst live so near the precious principle that thou may be preserved from joining with the opinions of others any further than there is a secret evidence of their rectitude given thee. "Try all things, prove all things, and then hold fast that which is good," though all men should revile. It is a blessed thing to pass through evil report, if we faint not, (and the everlasting arm is near to sustain,) for then do we know in whom our confidence is. And though sometimes things may be misrepresented, and we be censured, yet if we pursue the path of rectitude, we have nothing to fear. Oh, the blessed defence of the truth. What said the great master of those that were His, "Nothing shall be able to pluck them out of my Father's hand," and such were to be as little children. How sweet and how safe the path; pursue it with alacrity of heart, leave every thing that clogs and hinders, shake off every obstruction, that so thou may progress on thy heavenly journey, whither I am comforted in believing thou hast set thy face in sincerity.

I do not mistake thy expressions, or think that thou wishes me to esteem thee better than thou art; but I believe the hidden exercise of thy soul is after purity and acceptance with thy Master; and in this I desire to encourage thee. Look not out at others; be no one's copy. Irregularity has often been the means

of preservation. By this I do not mean a singularity of thy own creating. I mean that kind which sometimes is the effect of simple obedience; for it is no matter in what it is when once we choose for ourselves in opposition to manifested duty; we then say in reality, "We will not have this man to rule over us," and are in imminent danger of calling darkness light, and of becoming bewildered, not knowing the right hand from the left.

In patience possess thy soul, and the unfoldings of Divine Wisdom will be sure as fast as thou canst bear. Do not crave too much, and then the little that is given thee will be sweet—at times, peaceful poverty of spirit. What a consolation will attend the reading of some promise in the Scriptures, or some precept of Christ's. At times a few words will remain sealed on the mind. When this is the case, rest upon it, feed upon it, as the Israelites did upon the manna; gathering more would be like their attempts at collecting for two days at once—it was unfit for nourishment. So, too, in meeting; if an impression is made on thy mind, either through ministry or immediately, calmly settle thy thoughts without reaching after more, and its sweetness will nourish and strengthen thy faith. A word or two in this way will be as a heavenly manna, indeed; and, my dear young friend, let not the fear of being seen affected in meetings cause thee to lose the melting tenderness of Divine love. Remember that solemn injunction, "He that is ashamed of me before men," &c. Sometimes the fear of being discovered tends to unsettle and keep the mind agitated, when it would, otherwise, be filled with the incomes of that which is the diadem of our solemn assemblies; but no more. I desire, under the feeling which flows towards thee as I write, to commend thee wholly to that inexpressible word of Divine grace, which will teach thee 'all things, and rest thy affectionate friend,

THE POETRY OF THE BIBLE.

I have heard it said, time after time, to my regret, that "devotional poetry cannot please"—that no one who confines himself to this kind of writing ever soars to the highest realms of poetry. This may be so as a general rule, though I am inclined to doubt it; but surely it must be received, if received as a law at all, with limitations and exceptions. I cannot but think, that they who lay down this law, critics though they be, wise and learned, have either forgotten, or else have not duly appreciated the poetry of the Bible. Compared with the Psalms of David, and the Prophecies of Isaiah, the noblest flights of Milton and Shakspeare, beautiful and sublime as they are, sink into insignificance.

Read the Song of Moses, ere he bade his last sorrowful adieu to his people; observe the earnestness, the deep feeling with which he speaks, "Give ear, O ye Heavens, and I will speak, and hear, O Earth, the words of my mouth. My doctrines shall drop as the rain; my speech shall distil as the dew, as the small rain upon the tender herb, and as the showers upon the grass." And again: "For the Lord's portion is his people; Jacob is the lot of his inheritance. He found him in a desert land and in 'the waste howling wilderness; he led him about; he instructed him; he kept him as the apple of his eye. As an eagle stirreth up her nest, fluttereth over her young, spreadeth abroad her wings, taketh them and beareth them upon her wings, so the Lord alone did lead him, and there was no strange god with him."

Where is any song of triumph that surpasses in harmony and exultant joy the song of the prophetess, when she praised the Lord for the avenging of Israel, for the discomfiture of the mighty host of Canaanites on the plain of Megiddo, when thousands were slain and their dead bodies were swept away by that "ancient river, the river Kishon."

Can any elegy compare with that deeply touching lament of David over his beloved Jonathan—"Ye mountains of Gilboa, let there be no dew, neither let there be rain upon you, nor fields of offering; for there the shield of the mighty is vilely cast away—the shield of Saul, as though it had not been anointed with oil. How are the mighty fallen and the weapons of war perished." Or, his heart-broken moan over the erring, but beloved Absalom—"Oh! my son Absalom! my son, my son Absalom, would God I had died for thee, O Absalom, my son, my son!"

Where shall we find a more fitting illustration of the sublime than in the inspired words of the "sweet singer of Israel," especially in his description of the Almighty, "He bowed the Heavens also and came down, and darkness was under his feet,—he rode upon a cherub and did fly; yea, he did fly upon the wings of the wind; he made darkness his secret place; his pavilion about him were dark waters and thick clouds of the sky." Where any higher flight of real poetry than is found in the 104th Psalm, beginning with a description of the might and majesty of Him "who coverest himself with light as with a garment, who stretchest out the heavens like a curtain; who rebuketh the waters and they flee." He proceeds to show forth not only his mighty power, but also his beneficence, to all that his holy hands have created, in that he causeth the "grass to grow for the cattle," and the cedars of lofty Lebanon, where the "birds make their nests," the high hills which are a "refuge for wild goats, and

the rocks for the corries; he appointeth the moon for seasons, and the sun knoweth his going down." All these, together with man and the dwellers in the great deep—"all these wait upon Thee; thou openest thy hand, they are filled with good; thou hidest thy face, they are troubled; thou takest away their health, they die and return to the dust; thou sendest forth thy spirit, they are created,"—gracious words which can never grow old, words which have issued from many a lip as a song of praise and thanksgiving to God, for his mercy and goodness—words which many a tried and way-worn pilgrim has repeated, finding them a powerful cordial to sustain and strengthen, a balm to heal the heart's bleeding wounds.

Time and space will not suffice even to glance at the high finish, the beauty of the metaphors that pervade almost every line of the prophecies of Isaiah, or to delineate the pathos, the tender melancholy, that flows through the sorrowful lamentations of Jeremiah, who, bowed down with sorrow, wept "day and night for the slain of the daughters of his people."

Who that delights in the wonderful, can forget the visions that Ezekiel saw, when he sat among the captives by the river of Chebar, or those of Daniel, the "man greatly beloved," who in the visions of the night caught glimpses of the eternal world—things not lawful for him to reveal. If history rather than merely sacred song, the highest flights of poesy, please, where can we find an epic poem more fraught with instruction, more full of deep, unwearying interest, than the brief narratives of the lives of the patriarchs—their errors and their chastisements, their triumphs and their sorrows. Follow the wanderings of the chosen people of old, as they journey from the land of bondage, through the way of the Wilderness by the Red Sea, till their final establishment in the Land of Canaan; observe them under their judges and kings; go with them when, carried away captive, they sit weeping under the shadow of the willows, by the rivers of Babylon, and learn from their misfortunes that righteousness exalteth a nation, but iniquity is surely punished.

Would we receive instruction disguised under the veil of fancy? Read the parable of the rich man who took from his poor neighbor his "one ewe lamb;" or the inimitable one of the man who, journeying from Jerusalem to Jericho, fell among thieves. Could whole pages of forcible reasoning and learned observations show us so conclusively where we shall find our neighbor, and how we shall act towards him, as is here set forth so convincingly in a few simple words.

It has been recommended by the wise and learned, that he who would acquire an excellent style of writing should give his days and nights to Addison—that he should make himself familiar not only with our English classics,

but also with the Greek and Latin authors of antiquity. I would not undervalue these in the least, believing, as I do, that an intimate acquaintance with the beauties and excellencies of these old writers is necessary, if we would have the store-house of the mind thoroughly filled with rich treasures, so that we may bring forth therefrom "things both new and old;" but I would say, give a portion of your time to the study of the Holy Scriptures, for they contain not only the words of eternal life, but they stand, in my judgment, the most eminent examples to be found of the truly sublime and beautiful. Assuredly the most highly gifted sons of song—the bards who have most influenced for good their fellows—whose words have seemed full of prophetic inspiration, have lighted their lamps at the holy fires kindled so long ago on the altars of the prophets; have drank from the same fountain as they.

12th mo., 1866.

A. R. P.

FRIENDS' INTELLIGENCER.

PHILADELPHIA, FIRST MONTH 12, 1867.

THE INDUSTRIOUS POOR.—In view of the many benevolent efforts to relieve suffering, it may be deemed unnecessary to make an appeal for those upon whom the cold hand of penury is laid. But there is one class to which we would particularly cite attention. It is composed of those who have been thrown out of employment, and find it difficult to obtain work. Some of these are unwilling to be numbered with the habitual beggars who are found daily asking alms from door to door, and yet are suffering for the necessities of life. Owing to the high prices of fuel, food, and clothing, the little they earn is insufficient to save them from actual want. This call may seem more particularly to apply to cities than to country neighborhoods; but even in the latter, we have known instances where it would be equally appropriate. Wherever there is any considerable population, there is to be found the comfortable mansion and the squalid hut, each containing its portion of joy and sorrow, of happiness or misery. The affluent who are known by their generosity, no doubt, are importuned on every hand. May these not "grow weary of well-doing." If their alms be given in the spirit which would fain conceal from the left hand what the right doeth, the blessing of the poor will not only rest upon them, but shall not theirs be the sentence—"In-

asmuch as you have done it unto the least of these my brethren, ye have done it unto me."

MARRIED, on the 13th of Eleventh month, 1866, with the approbation of Baltimore Monthly Meeting, Dr. GEORGE F. CORSE to SARAH, daughter of James L. Sutton, all of Baltimore County.

DIED, in Fairfax Co., Virginia, on the 25th of Twelfth month, 1866, aged 29 years, MARIA L., wife of Charles Ballinger; a member of Alexandria Monthly and Woodlawn Particular Meetings.

—, on Second-day, 31st of Twelfth month, 1866, REBECCA JUSTICE, widow of Dr. Gove Mitchell, of Hatborough, Pa., in her 85th year.

—, on the 2d of First month, 1867, in Philadelphia, ALAN WOOD, son of John H. and Elizabeth Y. Cooper, aged 2 years, 1 month and 10 days.

—, on the 2d of First month, 1867, at the residence of her son-in-law, Oliver Wilson, of Philadelphia, ABIS GARDINER, aged 61 years.

—, on Sixth-day, 4th of First month, at Berkeley, N. J., LETTICE, relict of Jedediah Allen, in her 86th year; a member of Philadelphia Monthly Meeting.

The Association of Friends for the Aid and Elevation of the Freedmen meets at Green Street Meeting House, on Fourth-day evening, First month 16th, at 7½ o'clock. Friends interested are invited.

JACOB M. ELLIS, } Clerks.
ANNE COOPER, }

WANTED,

By the Association of Friends of New York for Relief of Freedmen, a teacher for a school in Maryland. Address,

JACOB CAPRON,
1172 Broadway, New York.

1st mo. 12, 1867—4f.

The following response to a box sent by two little children of this city, aged respectively five and seven, to the children of the freed people at St. Helena Island, S. C., will, we think, interest our young readers.

ST. HELENA 12th month 24, 1866.

My dear young Friends,—A happy Christmas for you all, and blessings on you for the kind, benevolent feeling that put it into your hearts to send greeting to our flock of sable ones here at St. Helena, and to gladden the spirits of these by your very pretty and useful gifts. Would that you could have seen the bright faces of our band of pupils to-day, as we gave them your Christmas presents; their eyes sparkled and their little hearts beat quick with a new joy. Ah; there are indeed true emotions underneath the dark skin; there is a world of real feeling within these shattered caskets, many of them all scarred and seared, and variously disfigured; and deep down in their souls there is an innate love for truth and right, for beauty and harmony, and an ever-controlling love and reverence for Jesus, even though their young lives were blighted under the cruel and unhallowed dispensation of slavery; yet, up through all the darkness and

mists, the inhumanity and degradation, spring the flowers of sympathy and love and tenderness, of justice and mercy. Their hearts are easily touched; soon the dew of feeling may be discovered in the eye, and the lip be seen to quiver, when an appeal is made to their higher natures, showing that they are not void of conscience, or lacking in the elements that combine to make true men and women—as their enemies would fain have us believe. Please accept their hearty thanks for your contribution. They are each and all most acceptable, and we want each one who added to the store, however small the gift, to feel in his or her heart that these little ones, who have so long been sufferers, send you their warm and earnest thanks, and with them a “God bless you,” for each one of you. May He keep you ever near Him, and always incline your hearts, as now, to remember the poor and the friendless. Oh, I wish you could have seen an old woman, (Aunt Charlotte,) one of the poorest of the poor, receive one of the nice warm dresses that came in that noble box to us from Philadelphia, packed and forwarded by a good, kind friend to the destitute, whose name may be familiar to you; she was too happy to tell half her joy. “Oh!” she said, “May the good Jesus bless you; hopes he may *allus* be good to you, and never forget you; me can’t tell how tankful I is for dis.” Her face told the story better than her lips possibly could. You cannot begin to know what a treat your nice candy was to them; some of them most likely had never known the taste before. Indeed all you sent was a rich offering to them. We know you have had peaceful slumbers and happy hearts, as rewards for the good deed, and our heavenly Father will bless you. Farewell. Lovingly, your friend,

P. H.

For Friends' Intelligence.

THE POET AND HIS HOME.

Most persons feel an interest in viewing the residences of those they esteem, and are interested in a sketch of the home life and its surroundings of those the world calls great. Imagination generally pictures that something of their character and leading traits are delineated in the house with its furniture, the grounds, the arrangement of trees and flowers, buildings and scenery.

William C. Bryant must always be esteemed by the Society of Friends for his faithful advocacy of universal freedom and his maintenance of the rights of man. We know that through most of his life he has been honorably connected with the literature and politics of our country, and the grace and beauty of his poetry, so full of the sweet and living influences of nature and truth, will always be admired. But the poet of nature shines out with as much lustre in the duties of private life, and amid

the scenes of his country home which his hands and taste have created.

The residence of Bryant is located on a handsome rising ground on the eastern shore of Hempstead Harbor, L. I. It enjoys a fine prospect of this romantic and picturesque bay, with Long Island Sound and parts of Westchester County and Connecticut in the distance. Vessels of all descriptions, either in the harbor or the sound, the great commercial thoroughfare with New York and the Eastern States, are nearly always in sight. The garden, sloping down to the water's edge, forms the western view; and the lawn on the southern front descends to a pretty sheet of water, to which Bryant has given the fanciful and tasteful name of Lake Cedarmere, and the village of Roslyn, about one mile distant, affords a series of landscapes which every person of taste will enjoy. This lake is quite an important feature of the place, not only as a highly ornamental portion of the grounds, but as a most useful appendage to the wants and comfort of the household. Twenty years ago it was an unsophisticated mill-pond, devoid of beauty, with a small dilapidated factory on its dam. Around its shores were a few straggling cedar trees and a few common-looking chestnuts. A large low white oak, with its brawny arms stretched out but a few feet from its roots, stood by the side of the pond. It was so unsightly that we expected the first thing in the way of improvement would be to cut it down. But Bryant knew better. The old mill is gone, and in its place a structure of artistic design has been built for another purpose. In it a powerful pump forces the water of the lake to a reservoir high up on a hill above the buildings, and, conveyed by pipes and hydrants, can be used in case of fire, furnishing water to the stock, irrigating the garden, and can even furnish an impromptu shower on the lawn, in a *dry spell*. The old fences that surrounded it and the old road have been removed, and the rough places made smooth; but the crooked paths have not been made straight; that would spoil their beauty, for in Flora's kingdom straight lines and geometric forms are ignored. Flowering bushes have been planted along the path by the dam, which is a favorite walk to a house recently built at the south end as a quiet summer home for some of his city friends. But pretty as is the lake, with its accompaniments of rustic bridge, trees and flowers, the picture would not be complete without some objects of animated nature. These are found in a flock of gentle, musk ducks that make it their home. They are family pets, and the poet loves to feed and caress them,—they are so innocent and docile when young. But ducks, though ever so gentle, will get into mischief, and they take an occasional stroll into his garden when strawberries

are ripe. But Bryant could not spare his berries, so he fenced them around with a wire fence, and the ducks had to be content with the sight only. Speaking of pets, we may mention that he has other pets than ducks. Near by is a small but fine piece of woods, and here, protected by Bryant's care, a respectable family of squirrels live and frisk about. He frequently walks in this wood to observe his friends the squirrels, and in the fall procures for them a large quantity of nuts, watching their gambols for hours as they come to his heap and carry the nuts to their storehouses.

The taste of the proprietor is to have but few specimens of each tree, flower and shrub, and they of the finest form and growth. Two or three fine large rhododendrons, a large flowering evergreen thorn, a Judas tree, yellow wood, double crimson hawthorn, and most of the hardy shrubs, trees and flowers that are desirable, are planted on the lawn or in the garden. In the garden we may see a plot of the finest tea, Bourbon and China roses, another of *Salvia splendens*, which, blooming through the season, makes the most brilliant display of all his flowers.

Bryant loves not box-edgings for his grounds, as the odor arising from the flowers is too agreeable to be polluted with the strong unpleasant smell of the box. The small iris, candy tuft, pinks and many other flowering perennials of low growth, make a much prettier border than the stiff, formal rows of box. A very fine azure-flowered clematis runs over a trellis which is covered in early summer with hundreds of flowers from two to three inches in diameter. Here is a bed of the dodecatheon, or American cowslip, with its reversed petals, and also a pulmonaria or lungwort, which some of his friends have sent him from the prairies of Illinois, where they grow wild. There is a freemasonry about the cultivators of fruit and flowers, and an interchange of experience and of new and choice specimens with each other, which is one of the pleasant things connected with their pursuit. Bryant is no exception; and while pointing to such a plant, or flowering bush, or fruit, received from some of his numerous friends, his spare specimens are bestowed freely upon those who wish them. A row of Cornelian cherry trees stands on the edge of a terrace, and a Downing mulberry, Chinese yam, filbert, pecan, and many other rare trees and plants, will be noticed there. A plain, cold grapery affords a good supply of black Hamburg, Chasselas and other varieties of grapes; but from his fondness for treating his friends, he must often have much the smallest share himself. We notice some very fine pear and plum trees by the garden walks, and they succeed very well under such good treatment. So much of Bryant's time has been employed in his business avocations as editor, and in literary pursuits, that

all this beauty is not his own work. He has been fortunate in enjoying the assistance of a person of taste and culture, who can appreciate his views, and stands more in the relation of a companion and friend than a gardener.

The mansion house was built about one hundred years ago by Richard Kirk. It is a two-story double house, with a wing for the kitchen, &c., and was considered at that time to be quite handsome and fashionable. The roof projected over the sides eight or ten feet, like the brim of a hat; and, by placing a row of pillars under the roof, a fine piazza is made, which being covered with trailing vines and creepers that hang in festoons from the pillars and roof, a delightful promenade and resting place is afforded to the inmates. Although the owner has beautified and improved nearly every portion of his premises, it is his pleasure to have the interior of his domicile retain its primitive appearance. The old-fashioned staircase in the hall, with its heavy rail and antique balustrades, the great panels over the mantles and around the room, which our forefathers thought a necessary decoration, remain the same. The Dutch tiles, of which the present generation are mostly ignorant, imported from Holland for the purpose, adorn the jambs of the fire place, and the Franklin stove throws out the cheerful blaze in the library as in days of yore. Those capacious chimney-closets, with folding doors, display on their shelves the mementos of his travels in foreign lands and souvenirs from his friends, while the paintings and engravings look as fresh and interesting, hanging in the plain old rooms, as if placed in marble hall on frescoed walls.

There is an air of utility, mingled with forms of beauty, in the poet's home. Simple in his habits and unassuming, he never seeks for display. He enjoys excellent health, which may be attributed to his industrious and temperate life. He rises early, and, after taking his usual exercise in the gymnasium, is prepared to sally forth, with basket on arm, to cull his fruits or flowers. Often he may be seen early in the day with knife or saw, attentively scanning the proportions of a tree, and soon, with an agility few of our young men could equal, climbs it, and removes the unnecessary branch, or thins the over-abundant fruit. Bryant cultivates a large number of the new and choice varieties of fruits, and enjoys, with the zest of an old pomologist, the tasting of their qualities and their proper treatment.

A public road passes near the eastern side of the house, thus separating it from the farm and farm buildings. To most persons this would be a great inconvenience; but the public enjoy it—it brings them nearer to him; and the beauties of his flowers, his inviting lawn, and pretty trees, shrubs and lake are theirs to enjoy also.

Unlike the country homes of many citizens, hidden in aristocratic seclusion far from public view, and surrounded by a thicket of trees and hedges, the improvements he has made, and the attractions of his well-kept grounds, must give the passer-by a newer impulse to go and make his home more comfortable and attractive. Although William C. Bryant has so long been an actor in the busy scenes of life, and has been often brought prominently before the public as poet and orator, yet he loves not notoriety. His ambition is not in the reception of public honors, neither does he enjoy public manifestations of applause. A few years since, travelling on some railroad of Western New York, he intended to stop at a certain town, and stay until the next day. A noted inhabitant of the place, hearing of his arrival, resolved to give so distinguished a person a public reception. He made the usual preparation of an escort, a large meeting, speech-making, &c. On Bryant finding what was contemplated, he immediately returned to the cars, and continued his journey, remarking, "They wanted to make a monkey show of me." His attachment to his domestic circle is strong, and well it might be, blessed as he has been with a congenial companion through most of his life. Bryant has been blessed with a quiet, happy home, but she, the sharer of his joys and his trials, is no longer there to enjoy life with him. Last summer the unassuming, humane and universally beloved Frances Bryant was laid in Roslyn cemetery. The funeral was characteristic of her husband. He felt that a quiet, unceremonious way of returning the mortal part to the earth best accorded with his feelings. Only a few near relatives and neighbors were requested to attend. Hundreds, perhaps thousands, would have been glad to testify their friendship for him, and many, as is too often the case, would have been attracted by the notoriety of the person; but he knew that no swelling throng or array of funeral pomp and parade could assuage the parting grief, or stay the flowing tear. Since her decease, he has spent most of the time at the old homestead in Massachusetts. He had recently purchased it, so that it might remain in the possession of the family, and has been engaged in repairing and improving it. We can imagine how pleasant it must be now, in his loneliness, to retire from busy life and wander among the scenes of his boyhood, and to visit the spots sacred to him from many pleasant memories. There, no doubt, many of the scenes of his early poems were laid; but Roslyn must have been the place where the "apple tree" was planted, and the woods and lake there are woven into many a stanza. A few weeks ago he sailed for Europe, in company with his daughter, intending to join his family and a daughter there.

Westbury, L. I., 12th mo., 1866. I. H.

TRUST IN GOD.

"Why standest Thou afar off, O Lord? Why hidest Thou Thyself in time of trouble?"—PSALM x. 1.

Lord, we know that Thou art near us,
Though Thou seem'st to hide Thy face,
And are sure that Thou dost hear us,
Though no answer we embrace.

Not one promise shall miscarry,
Not one blessing come too late,
Though the vision long may tarry,
Give us patience, Lord, to wait.

While withholding, Thou art giving
In Thine own appointed way,
And while waiting we're receiving
Blessings suited to our day.

Oh! the wondrous loving kindness!
Planning working out of sight!
Bearing with us in our blindness!
Out of darkness bringing light.

Weaving blessings out of trials;
Out of grief evolving bliss;
Answering prayer by wise denials,
When Thy children ask amiss.

And when faith shall end in vision,
And when prayer is lost in praise,
Then shall love in full fruition
Justify Thy secret ways.

CREWDSON.

WHAT I SAW IN THE WINDOW PANES.

Mountains, hills, and little vales,
Little ships with snow-white sails.

Pearly birds with wide-spread wings,
Pretty, airy, fairy things;

Queer landscape, curious sky,
High as the window was high.

Palaces that nothing cost,
Built by the king, Jack Frost.

STANLEY H. PARKER.

For the Children.

BEAUTY OF THE COVERINGS OF ANIMALS.

BY WORTHINGTON HOOKER.

There is great variety in the coverings of insects. In some the covering is like barnished armor. The variety of colors is exceedingly great, and in many they have a splendid brilliancy. Some of the smaller insects, which most persons never notice, are surpassingly beautiful when examined with the microscope. It is with them, in this respect, as it is with some of the smallest flowers. We know not how much beauty there is all around us, in the small things that God has created, till we take the microscope and look at them.

The butterflies are among the most beautiful of insects. Almost every variety of color is to be seen in them, and often many colors are seen together, arranged in the most beautiful manner. You cannot have any idea of the great variety of their beauty, unless you see some collection of them in cases in some museum.

You have often admired the beauty of different shells. These are the coverings of animals,

who lead a very quiet life in them, as I told you about the oyster. Very splendid are the colors often on the inside of these coverings, and sometimes on the outside also; and even when the outside is not at all handsome, when we get the shell from the water we often find that clearing off the outer coating with acid, or by rubbing, will show us beautiful colors. Then, too, by grinding the shell, in different parts of it different layers are seen of different hues.

The beauty of these coverings is of no use to the animals that live in them. They have no eyes to see it. For what, then, is it intended? It is for our gratification. The Creator strews beautiful things even on the bottom of the ocean for us. If the coverings or houses, as we may call them, of all the animals that live there, were as homely as that of the oyster, they would be as useful and comfortable for them as they are now, decked with their elegant colors. So far as they are concerned, the beauty is thrown away. But men gather the shells, and while they admire them, they see in the beauty, which the Creator lavishes even in the depths of the sea, the evidence of his abounding goodness.

The variety of beauty in the coverings of birds is very great. The various colors are arranged in their plumage in every variety of manner, and there are all shades of the colors, from the most brilliant to the most delicate.

Commonly the greatest display in the plumage of birds is in the delicate and downy feathers of the breast. In the peacock there is a great display of colors. The animal struts about, and, lifting its tail in the air, spreads it like a fan, and seems to be very foolishly proud of its beauty. Proud people generally have something disagreeable about them, and so it is with the peacock. Its voice is so harsh and screeching that no one wants it in his neighborhood.

Birds of Paradise, as they are called, are exceedingly beautiful. There are several kinds of them. I will give you an idea of its colors. Most of its body is a rich brown; the throat is a golden green; the head is yellow; the long downy feathers, that are abundant about the tail, are of a soft yellow color. This elegant bird is very careful to prevent the least speck of dirt from getting on its plumage; and when it sits on a branch of a tree, it always faces the wind, so that its feathers may not be ruffled.

There is, I think, in the humming birds more variety of color than in any other kind of birds. The colors are very brilliant, especially upon the delicate feathers of their breasts; and they are shaded in the most beautiful manner. I never saw a finer display of colors than I once saw in a collection of humming birds in a museum in Philadelphia. They are

of different shapes. They are alike only in their long slender bills; and when one sees a large collection of them, with all their varied forms and colors, he is struck with admiration and wonder.

Many of the furs of animals have much beauty; but there is no such great variety of color as there is in the plumage of birds. As you blow on a fine fur, and see how thickly its delicate fibres stand together, you admire its richness. Each fibre of it is in itself a beautiful thing.

We hardly know why it is that some animals that we dislike so much should have so much beauty. Worms and caterpillars are disgusting to us, and yet in many of them there is a great display of elegant colors. While writing this, I see one crawling along on my coat sleeve, with its numerous feet of curious shapes. Its color is a brilliant green. On its back stand up in a row three beautiful light yellow tufts. Behind these, on a dark stripe, are two flashy-looking round bunches, that are a most brilliant red. On its side bristle out white hairs in bundles. Its head is red, and from it extend forward dark colored, but very delicate feelers, in two bundles. I suppose they are feelers, because they are shaped like the feelers of the butterfly.

Now, why is it that so much beauty is given to such animals? It does not seem to be of any use. But this cannot be so, for God has a use for every thing that he makes. We are to remember that He can make a thing beautiful as easily as He can make it homely. And it is just this lesson, perhaps, that he means to teach us, when he clothes such creatures as worms and caterpillars in coverings of beautiful colors. It is different with us. We try to make beautiful only those things we prize much. There are some things that it would be a foolish waste of time for us to ornament. This is because we can do but little in making things beautiful. But there is no end to God's power in the creation of beauty. He can, by the word of His power, make just as many beautiful things as he pleases.

From "Self Help."

"As steady application to work is the healthiest training for every individual, so is it the best discipline of a State. Honorable industry travels the same road with duty; and Providence has closely linked both with happiness. 'The gods,' says the poet, 'have placed labor and toil on the way leading to the Elysian fields.' Certain it is, that no bread eaten by man is so sweet as that earned by his own labor, whether bodily or mentally. By labor the earth has been subdued, and man redeemed from barbarism; nor has a single step in civilization been made without it. Labor is not only a necessity and a

duty, but a blessing, only the idler feels it to be a curse. The duty of work is written on the thews and muscles of the limbs, the mechanism of the hand, the nerves and lobes of the brain.—the sum of whose healthy action is satisfaction and enjoyment. In the school of labor also is taught the best practical wisdom; nor is life of manual employment incompatible with high mental culture." Thus writes Mr. Smiles, in his new edition of "Self Help," a work which ought to be found in every working-class library; forming, as it does, a stirring record of the feats which have been accomplished by the exercise of indomitable perseverance and unfaltering earnestness. The lesson to be learned from the book is, that there is no position so obscure or station so lowly, but that a man can rise from them, if he so will it, to better things. Mr. Smiles gives several instances of this. "Among those who have given the greatest impulse to the sublime science of astronomy we find Copernicus, the son of a Polish baker; Kepler, the son of a German public house keeper, and himself *garçon de cabaret*; D'Alembert, a foundling picked up one winter's night on the steps of the church of St. Jean le Rond, at Paris, and brought up by the wife of a glazier; and Newton and Laplace, the one the son of a small freeholder near Grantham, the other the son of a poor peasant of Beaumont en Auge, near Honfleur. Notwithstanding their comparatively humble circumstances in early life, these distinguished men achieved a solid enduring reputation by the exercise of their genius, which all the wealth in the world could not have purchased. The very possession of wealth might, indeed, have proved an obstacle greater even than the slender means to which they were born; The father of Lagrange, the astronomer and mathematician, held the office of Treasurer of War at Turin; but having ruined himself by speculations, his family were reduced to poverty. To this circumstance Lagrange was in after life accustomed partly to attribute his own fame and happiness. 'Had I been rich,' said he, 'I should probably not have become a mathematician.'" Again, take the case of Mr. Heathcote, formerly M. P. for Tiverton, the late inventor of the bobbin net machine: "When a little over twenty-one years of age, Heathcote married, and went to Nottingham in search of work. He there found employment as a smith and 'setter-up' of hosiery and warp frames. He also continued to pursue the subject on which his mind had before been occupied, and labored to compass the contrivance of a twist traverse-net machine. He first studied the art of making the Buckingham or pillow-lace by hand, with the object of effecting the same motions by mechanical means. It was a long and laborious task, requiring the exercise of great perseverance and no little ingenuity. During this time his wife was

kept in almost as great anxiety as himself. She well knew of his struggles and difficulties; and she began to feel the pressure of poverty on her household; for while he was laboring at his invention he was under the necessity, occasionally, of laying aside the work that brought in the weekly wages. In years long after, when all difficulties had been successfully overcome, the conversation which took place between husband and wife, one Saturday evening, was vividly remembered: 'Well, John,' said the anxious wife, looking in her husband's face, 'will it work?' 'No, Anne,' was the sad answer; 'I have had to take it all in pieces again.' Though he could still speak hopefully and cheerfully, his poor wife could restrain her feelings no longer, but sat down and cried bitterly. She had, however, only a few more weeks to wait, for success, long labored for and richly deserved, came at last; and a proud and happy man was John Heathcote when he brought home the first narrow strip of bobbin net made by his machine, and placed it in the hand of his wife."

The true self helper is not deterred by failure.—As Mr. Smiles justly observes: "We learn wisdom from failure much more than success. We often discover what *will* do, by finding out what will not do; and probably he who never made a mistake, never made a discovery. It was the failure in the attempt to make a sucking pump act when the working bucket was more than thirty-three feet above the surface of the water to be raised, that led observant men to study the law of atmospheric pressure, and opened a new field of research to the genius of Galileo, Torricelli, and Boyle. John Hunter used to remark that the art of surgery would not advance until professional men had the courage to publish their failures as well as their successes. Watt, the engineer, said of all things most wanted in mechanical engineering was a history of failures. 'We want,' he said, 'a book of blots.' When Sir Humphrey Davy was once shown a dexterously manipulated experiment, he said, 'I thank God I was not made a dexterous manipulator; for the most important of my discoveries have been suggested to me by failures.' Another distinguished investigator in physical science has left it on record that, whenever in the course of his researches he encountered an apparently insurmountable obstacle, he generally found himself on the brink of some discovery." Concerning a well-known common error, Mr. Smiles tells us that "It has been a favorite fallacy with dunces in all times, that men of genius are unfitted for business, as well as that business occupations unfit men for the pursuits of genius. The unhappy youth who committed suicide a few years since because he had been 'born to be a man and condemned to be a grocer,' proved by the act that his soul was not equal even to the

dignity of grocery. For it is not the calling that degrades the man, but the man that degrades the calling. All work that brings honest gain is honorable, whether it be of hand or mind. The fingers may be soiled, yet the heart remain pure; for it is not material so much as moral dirt that defiles: greed far more than grime, and vice, than verdigris. The greatest have not disdained to labor honestly and usefully for a living, though at the same time aiming after higher things. Thales, the first of the seven sages, Solon, the second founder of Athens, and Hyperates, the mathematician, were all traders. Plato, called the Divine, by reason of the excellence of his wisdom, defrayed his travelling expenses in Egypt by the profits derived from the oil which he sold during his journey. Spinoza maintained himself by polishing glasses while he pursued his philosophical investigations. Linnæus, the great botanist, prosecuted his studies while hammering leather and making shoes."

CANDY ADULTERATIONS.

Our new health espionage is bringing to light some queer things. The common candies and confectioneries of commerce are not altogether toothsome nor wholesome, if recent investigations are to be believed.

The adulteration of sugar candies and spices is a trade largely and regularly carried on in this city. Instead of plaster, which till lately entered so largely into the manufacture of confectionery, in place of sugar, a new article has been discovered called *terra alba*, or white earth. It comes from Ireland, and costs by the barrel about 1½ cents per pound, while loaf sugar costs about 17 cents.

The bodies of candies, the coating of almonds and lozenges, are made from this earthy material. It is whiter than plaster, and is very much used in the adulteration of flour used in this market. A glue, paint and oil manufacturer of New York has sent round his annual circular, which I have seen, to the principal confectioners, calling attention to a fresh arrival of this white earth. I have seen an ounce of lozenges dissolved in water, in which two-thirds of an ounce was *terra alba*, and not a particle of sugar in the lot.

The common method of flavoring candies, almonds, sugar-plums, etc., is with deleterious substances. The pineapple flavor, the banana and the peach are made from fusel oils, which are very poisonous. Bitter almond flavor is made from prussic acid unadulterated. Pineapple flavor is obtained from rotten cheese, very rotten, and nitric acid.

Gum arabic for pure gum drops is costly. An article has been invented of the most beautiful appearance, that is used instead of the gum. It is very cheap and very poisonous. In pure

candy, cochineal is used to color red, and saffron for the yellow. But in the common candies poisonous coloring is put, the same that is used to color wines and liquors. One of the most common is "carlot," into which arsenic largely enters. A few grains of the substance will color a cask of wine. Liquorice drops for the "trade" are made of poor brown sugar, glue and lamp-black, flavored with liquorice. And for the Western trade much of this vile stuff is packed, and sent West to be put up in boxes to suit the market, of which from 75 to 90 per cent. is *terra alba*. This material enters largely into the common chocolates and spices. Much of the cream of tartar used for bread is made of *terra alba* and tartaric acid.—*Boston Journal*.

For Friends' Intelligencer.

The Forwarding Committee of Friends' Association for the Aid and Elevation of the Freedmen, report the following supplies forwarded since last report:

- No. 43, 1 box, Cornelia Hancock, Mt. Pleasant, S. C., containing trimmings, &c., for sewing school.
- 44, 1 box, Mary A. Taylor, Mt. Pleasant, S. C., containing 162 unmade garments.
- 45 and 46, 2 boxes, Sarah A. Steer, Waterford, Va., containing books, slates, &c.
- 47, 1 bbl., J. S. Griffing, Washington, D. C., containing 50 part-worn clothing.
- 48, 1 box, Sallie E. Lloyd, Woodlawn, Va., containing books, &c.
- 49, 1 box, Wm. Tate, Loudon Co., Va., containing books, &c.
- 50, 1 bale, Mary Still, Florida, containing part-worn clothing.
- 51, 1 box, four new schools, Fairfax Co., Va., containing books, slates, &c.
- 52, 1 package, Hettie K. Painter, Painter's P. O., Va., containing books, &c.
- 53, 1 trunk, Cornelia Hancock, Mt. Pleasant, S. C., containing 162 new garments, trimmings, &c.
- 54, 1 box, Philena Heald, St. Helena, S. C., containing 51 new garments.
- 55, 1 box, Philena Heald, cont'g part-worn cloth'g.
- 56, 1 " " " " blankets & trim'gs.
- 57, 1 " " " " books, seeds, &c.
- 58 and 59, 2 boxes, Philena Heald, cont'g sundries.
- 60, 1 box, Cornelia Hancock, Mt. Pleasant, S. C., containing 319 new garments, books, &c.
- 61, 1 bale, Katy E. Hall, Andrews Chapel, Va., containing 67 new garments, books, &c.
- 62, 1 bale, Hannah L. Shortledge, Big Falls, Va., containing 67 new garments.
- 63, 1 bale, Fanny E. Gause, Herndon Station, Va., containing 61 new garments.
- 64, 1 bale, Ella E. Way, Falls Church, Va., containing 66 new garments, books, &c.
- 65, 1 bbl., Mary K. Brosius, Vienna, containing 94 new garments and books.
- 66, 1 bbl., Mary McBride, Fairfax C. H., Va., containing 96 new garments.
- 67, 1 bbl., Martha Wright, Lewinsville, Va., containing 83 new garments.
- 68, 1 box, Caroline Thomas, Leesburg, Va., containing 134 new garments, books, &c.
- 69, 1 box, Sarah A. Steer, Waterford, Va., containing 88 new garments.
- 70, 1 box, Sallie E. Lloyd, Woodlawn, Va., containing 84 new garments.

- 71, 1 box, Cornelia Hancock, Mt. Pleasant, S. C., containing 200 old and new garments.
 72 and 73, 2 bbls., Capt. G. R. Chandler, Winchester, Va., containing 135 new and old garments.
 74, 1 bbl., Caroline Thomas, Leesburg, Va., containing old garments, books, &c.
 75, 1 bale, Jos. A. Dugdale, Iowa, containing 3 p. flannels.
 76, 1 box, Sarah M. E'y, St. Helena, S. C., containing 150 new and old garments.
 77, 1 box, Gen. John Ely, Louisville, Ky., containing 194 new garments.
 78, 79 and 80, 3 bbls., Mary A. Taylor, Mount Pleasant, S. C., cont'g clothing, books, &c.
 81, 1 bbl., Caroline Thomas, Leesburg, Va., containing 88 garments.
 82, 1 bbl., Sarah A. Steer, Waterford, Va., containing 87 garments.
 83, 1 bbl., Sallie E. Lloyd, Woodlawn, Va., containing 62 new garments.
 84, 1 bbl., Marie R. Mann, Washington, D. C., containing 60 part worn garments.
 85, 1 box, Mary McBride, Fairfax C. H., Va., containing 66 garments, and 15 pairs of shoes.
 86, 1 bbl., Fannie E. Gause, Herndon Station, Va., containing 51 new garments and 15 pair shoes.
 87, 1 bbl., E. Ella Way, Falls Church, Va., containing 46 new garments, and 15 pair of shoes.
 88, 1 bbl., Gayner Heacock, Beaufort, S. C., containing 90 unmade garments and 1 pair of pantaloons stuff.
 89, 1 package, Hettie K. Painter, Painter P. O., Va., containing books, &c.

HENRY M. LAING, Treasurer,
No. 30 N. Third St.

Phila. Twelfth month 31, 1866.

The Treasurer of Friends' Association for the Aid and Elevation of the Freedmen has received the following amounts since last report:—

From City Contributions.....	\$25.00
" Friends at Bristol, Pa.....	44.25
" Friends at Norristown, Pa.....	13.00
" Happy Retreat School, Norristown....	6.00
	<hr/> \$88.25

There has also been donations of clothing from Mullica Hill Relief Association, Happy Retreat School, Friends of Norristown, T. E. Chapman, Letitia Haines, J. M. Ellis, Rachel W. Moore, Friends of Hockessin, Mary A. Eisenbrey, Harriet E. Reading, Lukens Thomas, Lumberville, Pa., Granville Worrell, Wilmington, Del., and Margaret Bancroft.

HENRY M. LAING, Treasurer,
1st mo. 5, 1867. No. 30 Third St.

ITEMS.

THE CHICAGO LAKE TUNNEL.—An account of the recent successful completion of the great lake tunnel, which is to supply Chicago with pure water from the lake, two miles from the shore, gives these interesting facts and figures about the great work and the ceremonies attending the completing of it.

Dividing into two parties those who were privileged to be present at the finish entered the shafts simultaneously at each end, and rode to the thin partition of clay, 8200 feet from the shore, and 2,200 feet from the crib, under 32 feet of water and 31 feet of land, which divided Chicago from the pure water to which longing eyes had long been turning. The partition wall was then removed, the party shook

hands, and congratulations followed on all sides over the success of the work.

The first ground was broken in the construction of the tunnel on March 27, 1864. The shore shaft is of cast iron, nine feet diameter, and two and a quarter inches thick, in three sections, weighing 14 tons each, running to the bottom of the sand bed. The continuation of the shaft is of brick. The whole shaft is 87 feet deep, 11 feet from the bottom of the shaft, and 77 feet from the top, running straight for the crib, a distance of two miles and seven feet, at a rise of four feet at the crib end. The tunnel is a circle of brick of two layers lengthwise, making, with the cement, a wall of nine inches. It contains 2,600,000 brick, and 10,570 barrels of cement. The excavations meet, varying only 9½ inches—one of the greatest achievements of tunnel engineering on record—most tunnels of like character varying from two to four feet. A small tunnel will conduct the water to a distributing well, about 8 feet in diameter, from which it will be distributed to large wells, 32½ feet deep and 31 feet in diameter, from which it is distributed to the city. The necessity of two wells is that in case of accident to one the water can be shut off at the distributing well, and leave the other in operation while the work is being repaired. The large wells are 31 feet in diameter, to contain the foundation for the ponderous engines which distribute the water to the city. The full cost will be about \$425,000.—*The Cultivator and Country Gentleman.*

CONGRESS reassembled on the 3d inst. In the Senate a resolution was adopted, after debate, directing the Judiciary Committee to inquire if legislation on the constitutional amendment is necessary to prevent the sale of persons into slavery for a term of years as a punishment for crime. A resolution instructing the Military Committee to inquire if any legislation is necessary to prevent the enslavement of Indians or any system of peonage in the Territory of New Mexico, was adopted. The bill to repeal the President's amnesty power was taken up and discussed at length, in which the subject of the trial of Jefferson Davis was alluded to. The bill was then passed. The bill providing for restoring to States lately in insurrection their full political rights was taken up. The question was upon the adoption of the substitute, which was read, but no action was taken.

HOUSE.—The report of the special commissioner of the revenue, and a bill proposing a tariff as a substitute for the present customs laws, were received and referred to the Committee of Ways and Means. The Secretary of the Treasury was directed, by a resolution, to communicate the facts in his possession in regard to the loss of the steamer Evening Star, and also to institute an investigation into the cause of the loss of the steamer Commodore. A joint resolution was introduced and referred, providing for the establishment of four territorial governments in the so-called State of Texas. A resolution was referred, declaring that the House will not consent to the appropriation of any money to pay for property destroyed by the United States troops, while putting down the rebellion. The Committee of Ways and Means was instructed to inquire into the expediency of so arranging the tariff on imported coffee, sugar, &c., as to discriminate in favor of free labor and against that of slaves. The Secretary of the Treasury was directed to furnish information in regard to the cotton claims presented to the Department. The bill to restore political rights to States lately in rebellion was taken up and then laid over.

THE FREEDMEN.—The following are extracts from a report of O. O. Howard, of the Freedmen's Bureau,

to Edwin M. Stanton, Secretary of War. The report was sent to the Senate on the 4th inst.:

In Virginia the freedmen have decreased in number. The estimated population at this date is 500,000. In North Carolina it is estimated the population at this date is 360,000.

In South Carolina the number of freedmen has decreased, being estimated at 375,000. Georgia is estimated at 400,000. Florida has remained about the same as when the census of 1860 was taken, being 62,677. In Mississippi a census has been taken since the close of the war, showing a slight decrease; 320,000 is the present colored population of the State. In Louisiana no change is reported; the number is 350,000. In Texas, the assistant commissioner reports an increase; the colored population is estimated at 200,000.

In Missouri it is reported that the freedmen have left the State in large numbers for Kansas, Iowa, etc. It is estimated that the colored population has decreased to about 100,000. In Tennessee the assistant commissioner estimates an increase from 283,000, in 1860, to 300,000. The reports of all the assistant commissioners transmitted to this time had not been received when I made my report to Congress. The assistant commissioners of the States of Louisiana, Florida and Arkansas report an increased disposition on the part of the freedmen to take advantage of the homestead act, and the actual work accomplished up to October 1st is as follows:

In Louisiana forty-nine entries have been made, and one hundred and eighty-three persons settled on the public lands, representing over \$26,000 worth of personal property. Many more applications are made by persons who will move to these lands as soon as this year's work closes. In Arkansas many practical difficulties prevent the assistant commissioners from obtaining correct information of the location of public lands. Thirty families, comprising about one hundred and twenty-five persons, have entered lands and moved to them.

In Florida, more has been done than in either of the above mentioned States. It is probable that, after their release from this year's contracts, many will enter lands, notwithstanding the fact that they will be compelled to compete with their more wealthy neighbors.

The Assistant Commissioners generally favor the present contract system. The freedmen are reported as having in most cases faithfully performed their obligations. I am glad to be able to report that employers have as a general thing settled with the freedmen in accordance with the terms of their contracts, yet when any of them have failed to do so, the State laws have not in all cases afforded to the freedmen the proper remedies and protection.

I call special attention to the vagrant laws of the State of Maryland, Georgia, Mississippi, Louisiana, and Texas. The small time allowed after the expiration of one contract before a person must enter on another, to escape vagrancy, will occasion practical slavery.

The arrest of assembled persons as vagrants, upon information given by any party, his trial by a justice of the peace, and the sale of his invoices, at public outcry, for payment of the fine and costs, without limit as to time, whipping and working in chain-gangs, present some of the obnoxious features of these irregular laws.

Judge Magruder, of Md., has been cited before the Circuit Court of Baltimore, in obedience to a warrant charging him with a violation of the civil rights bill, in sentencing four colored persons to be sold to service upon conviction for larceny, thereby pre-

scribing a different punishment from that imposed upon white men. The case was postponed to the next term of the United States Circuit Court, which meets in that city in the 4th month next. Magruder gave bail in \$2,000 for his appearance at that time.

A HISTORY OF THE RELIGIOUS SOCIETY OF FRIENDS FROM ITS RISE TO THE YEAR 1828. Volumes III and IV. By SAMUEL M. JAMES.

The third and fourth volumes of this work have been unavoidably delayed by causes connected with the late civil war. During the five years that have elapsed since the second volume was published, so many changes have taken place that it is deemed expedient to issue a new Prospectus.

The two volumes now proposed to be published contain the history of the Society from the year 1691 to 1823, embracing much original matter that has not appeared in any other history. Biographical sketches are given of the most prominent members of the Society in Great Britain and America, with many instructive passages from their writings and interesting anecdotes.

Among the subjects of deep interest treated of in these volumes are: the perils and preservation of Friends during the Irish Rebellion of 1798; the course they pursued during the war of American Independence; their efforts to civilize the Indians and preserve peace with them; the rise and progress of their testimony against Slavery; their early labors in the cause of Temperance; the Separation in Ireland at the beginning of this century; and the Separation in America in 1827-8, with the causes that led to it, and the results that have followed.

The cost of paper, printing and binding having greatly increased since the first prospectus was issued, it is found that the work cannot be published, without considerable loss, at the price originally intended. The price will be, therefore, \$2.00 per volume, bound in cloth; and \$2.25 per volume, bound in sheep, library style, but these subscribers under the first prospectus who have taken the first two volumes, will be furnished with the third and fourth volumes at \$2.00 each, bound in sheep.

The first two volumes can be obtained from the publisher or his agents, at \$2.00 each, sheep binding.

Agents are requested to return this prospectus as speedily as possible—as the work is now in press—with full list of names and residences of subscribers, to the author's publisher.

T. ELLWOOD ZELL,

No. 17 and 19 S. Sixth St., Phila.

FRUIT AND FARM PRODUCE SOLD ON COMMISSION.

Consignments of all kinds of Berries, Peaches, Apples, Sweet Potatoes, Round Potatoes, Dried Fruit, Poultry, Eggs, Pork, Lard, Butter, Grain, Flour, &c., solicited and promptly attended to, by J. H. RIDGWAY,

112 & O. Office, No. 126 Delaware Av. Market, Philadelphia.

SAMUEL TOWNSEND & SON, Produce Commission Merchants, No. 62 Light Street, Baltimore, respectfully solicit consignments of Grain, Flour, Seeds, Butter, Eggs, Beans, Poultry, &c. Constantly in store and for sale, Clover, Timothy, Orchard Grass, and other Field Seeds. Also Bone Dust and other Fertilizers. Dried Fruits bought and sold. 721 tra.fo.

DOMESTIC DRY GOODS.—Always on hand, a large assortment of Domestic Dry Goods: Muslins of all kinds and of the best makes, both Bleached and Unbleached; Flannels of all grades White and Colored, Twilled and Plain; Calicoes, Ginghams, Cheeks, Shirtings and Drillings, Bleached and Brown Table Linens, Towelings by the piece and by the yard. Men's and Boys' wear, a well assorted stock. 721 tra.fo. 1639 Mark-t St., Philada.

THOS. M. SEEDS, HATTER, 41 N. 2d St. Always on hand, and made to order, a large assortment of Friends' Hats, as he makes a specialty of that part of the Hatter's business.

W. M. HENAOOCK, General Furnishing Undertaker, No. 18 North Ninth Street.—A general assortment of ready-made Coffins, and every requisite for Funerals furnished.

Being entrusted with the oversight of "Fair Hill" Burial Ground.—Funerals, and all other business connected with the ground, will be promptly attended to. 8466 120 tr

SPURGEON ON GEORGE FOX.—An address before Friends' Institute, in London, by G. H. Spurgeon. Price ten cents per copy, or \$5.00 per 100. Just published and for sale by 12mz tr HENRY LONGESTRE.

APPLE PARERS, Preserving Kettles, Bread Slicers, Clothes Sprinklers, (for ironing), Patent Flat-Iron Holders, Knife and Scissor Sharpeners, Expansion Brace Bits, Clutch Brace, (require neither filing or notching of bits), and a general variety of Hardware and Tools. For sale by TRUMAN & SNAW, 929. No. 838 (Eight Thirty Five) Market St., below Ninth.

CHESTERFIELD BOARDING SCHOOL FOR BOYS, situated on the Croswicks Road, three miles from Bordentown, N. J. The Fifty-Third session of this Institution will commence on the 19th of 11th mo., 1866, and continue twenty weeks. Terms \$24. For further particulars address HENRY W. SELECTIONS FROM THE WRITINGS OF JOHN BARCLAY.

(Continued from page 706.)

To SAMUEL ALEXANDER.

21st Tenth month, 1819.—I omitted to mention our Quarterly Meeting: it was held to satisfaction. It is lamentable to think how much harm is done, by the talkativeness that sometimes manifests itself after such very solemn occasions: and in Meetings for Discipline, there are those, who knowing much of the outward rules which Truth has led our Society to adopt, are not sufficiently careful to act in the life, in the liberty, in the sweetness, in the dignity of it; but suffer their mere adherence to rules, without subjection to the power in which they were set up, to mar at times the beauty, the benefit, and the glory of these meetings; which should be religious meetings, and would often be made meetings of worship, to those whose minds are rightly engaged. Surely the authority of these meetings is not the mere Book of Extracts; nor does their excellency consist in a mere mechanical compliance with what is there laid down; nor does much talking in favor of any point, prove that the sense of Truth is that way, though it may prove that the sense of the majority leans so.

To a FRIEND.

LONDON, Eleventh month 6th, 1819.

My dear love has often been as fresh and warm towards thee, amidst much sympathy and

solicitude on thy account as on my own; that we might both be preserved by the invisible, invincible power and principle of Truth, through our patient seeking after, waiting for, and following its pure and sure guide:—amidst earnest desires that this may be thy, (and also my) experience, it has not seemed unpleasant nor unexpected that little should hitherto have passed between us in this way, which true friends have found and do yet find to be but a feeble channel, though profitable and comforting, when the reader can discern and read the language of the heart of his friend.

It is a certain axiom, though a strange paradox to such as have not yet come to witness the truth of it in their own experience, that the true silence speaks louder than the best words. I sometimes think that I, for one, have enough to do to steer my own frail vessel in the stormy sea of life, with the aid afforded; being willing often to leave others to the like engagement for themselves. For one finds it a good thing to mind one's own business,—to endeavor to rule one's own little house well, in the first place; then will there be the better qualification to have charge over the house of the Lord: and this latter is a duty, which all will find, in some way or other, in due season to devolve upon them, if they are faithful, and as they, through obedience, come into a capacity for usefulness. The useless members are to be cut off,—nay, they drop off, as a withered bough

that receives not the sap of life. As soon as any have grown to the stature and strength for labor, they are undoubtedly put out to service, and earn their livelihood, even that which nourishes to life, and liveliness, and healthfulness, even the heavenly bread. And every son and daughter are to mind that portion of work, which is set them by their parent to do in his family; and they are to do nothing else, but to attend thereto cheerfully, handling the tools and implements that he supplies them with, and at the seasons of his appointment. To these diligent day-laborers, the times of refreshment indeed come, when it is seen to be needful,—in order that they faint not. But in the Lord's family, those that will not work, must not eat, nor sit at his table, nor have their penny of peace, nor the reward of "well done." The domestic economy here exercised, and the excellent discipline kept up, and the comely order, and beautiful harmony of all the true members of this spiritual house, I have seen and known to be wonderful in all its bearings and branches: but those that are not of it, cry out, "He is a hard master,"—and would exact the uttermost farthing. Yes, He is a hard master to the rebellious, and terrible will they find Him in the reckoning day; but very tender and pitiful is He found unto them, who are tender of his honor, even before that day; for they feel his unfailing mercy still blotting out and wiping away; and extending afresh his hand of help, to such as are willing to work out their own salvation with the true fear and trembling. That thou, my dear friend, by diligent and close attention to none other than the Shepherd's voice, and by a co-operation therewith, even a simple subjection to that which it makes manifest to be the duty of each day, mayest come to have this and much more verified with yet greater satisfaction to thee in thy measure, is often my desire. The way of the Lord's coming, is even as a refiner with fire, and a fuller with soap,—to melt, and to purify; and blessed are they that so receive him. Thus the house of Saul will become weaker and weaker, and that of David stronger and stronger; though the latter may be hunted, as the partridge on the mountains, for a long season, pursued yet escaping: and the seed of David to this day, have often to "abide in the wilderness in the strong-holds" and in the mountains, and are ready sometimes to say, "surely I shall one day fall by the hand of Saul." Oh, this is a sore conflict, yet a glorious and honorable warfare: and the victory is certain to all those that hold out unto the end in faith and faithfulness.

I fondly trust, my dear friend, that by this time many of thy soul's enemies, that have stalked their forty days like a Goliath, are laid low; and that many of thy doubts and fears, are in measure done away; that with renewed

vigor, courage, patience, and perseverance, thou art journeying onward, even with steady pace, and single eye; not moved by the "trial of cruel mockings," if that should be thy lot; nor yet dismayed by the many tribulations that are permitted to attend the path of the righteous. Yet I trust, that an equal if not a greater degree of care and caution will yet mark thy every movement and stepping, as thou goest along: I speak not of a silly slavish fear, which keeps some far behind the footsteps of Christ and of his companions; or of that weakness which would let the enfeebling reasoner prevail, to the hindering or even stopping of a vigorous healthy growth. Some have I known, who have suffered such an argument as this to nip their bud, and so to check its putting forth, in the due and appointed season, its natural blossoms and fruit,—saying, "others have professed great things, and have come to nothing; who am I, that I should pretend or presume so high? surely I shall disgrace the cause," &c. Such reasonings are, as we abide in the light, clearly manifested to be of the enemy, though greatly disguised; and he sometimes lays hold of good kind of people, who, with upright intentions for the best, and desiring our preservation from hurtful extremes, are induced by a mistaken and blinded judgment, to advise us against running risks (as they think,) by such a bold, firm, and decided conduct, as we apprehend is required at our hands. I have had to tread much alone; and I have found it safe, and conducive to my true growth, to look mainly, and in the first place, to that which is truly an infallible Teacher, and which leads out of all error and evil, into all truth and goodness; and after sometimes great delay, (not through wilfulness nor weariness, but an upright desire to be led by nothing but the true guide.) I have been made willing to resign myself to what has been cast up, I trust with something of that singleness of heart and simplicity, which the right thing does undoubtedly induce. Oh, the comfort and divine consolation, which such a procedure has drawn upon my poor soul, even in the midst of much trouble and suffering.

The truth does undoubtedly lead into a oneness in principle, and even in practice as to generals: yet in regard to particular sacrifices and services, very various are the allotments for each member of the church,—very different are the gifts and dispensations which are meted out to each, and the administrations of them also. Blessed are those who know and keep their several places in the body, always eyeing the Master, even the holy Head thereof. These shall not be unduly moved by the revolutions and convulsions, which may be permitted to arise, and to surprise the hypocrites, whether from within, or from without; these

abide in their habitation and safe shelter during the storms, nor are they supine and confident in the day of ease and of calm weather, but are prepared, nay are (if it be best) forewarned often of the judgments that may be impending or ready to be poured out upon the head of the disobedient.

Well, my dear friend, be valiant for the Lord and his precious Truth, while thou hast a day in mercy granted thee; joyfully and unreservedly yield thyself and *all that thou hast* unto his disposal. Keep to the *root* of righteousness; and as the divine sap of life is suffered to ascend, and to circulate in and through thy soul, thou shalt in due season be clothed, or be strengthened to put on the excellent fruits of righteousness, to the praise of Him who hath chosen and ordained us, that we should go and bring forth much fruit, and that our fruit should remain; and who is ready thoroughly to furnish us unto every good word and work required of us.

Farewell, and believe me to be thy affectionate friend,
J. B.

FALMOUTH, 17th of Twelfth month, 1819.

Dear —, My dear love is to thee, though from a low spot, which has more or less been my experience of late: but I can truly say, in the lowest seasons I have longed for nothing more than for preservation through all things; even though there should be but little going forward, or any vigorous growth in that which is good. Yet should I be content in this the Lord's will, who doeth all things well, could I find an assurance, that *finally* the eternal rest of the righteous might be mine; and that whilst buffeted and tempted here, no reproach might be reasonably thrown on the blessed Truth, through any unfaithfulness of mine. A degree of sweet calmness seems to arise, whilst writing to thee; in which I feel thee near to me, and myself still bound in a degree of tender love, and refreshing fellowship unto the faithful everywhere. At such seasons how strongly does the sentiment recur,—testimonies are nothing (comparatively,)—words are nothing—outward, perishable, changeable things are nothing;—but to know our sustenance, standing, strength and life, to be in the only unfailing source, and to feel that which is immortal, invincible and unchangeable to bear up our minds above the billows,—this is worth living for, and suffering for and dying for.

(To be continued.)

“Wherever classes are held apart by rivalry and selfishness, instead of being drawn together by the law of Love,—wherever there has not been established a kingdom of heaven, but only a kingdom of the world,—there exists the forces of inevitable collision.”

LETTER FROM LYDIA P. MOTT.

No. III.

Eleventh month 2d, 1825. -

My Dear M. H.—My silence has not proceeded from indifference to thy state. I have borne thee upon my mind, and thy affecting letter I received as a proof of that confidence which I trust has ever and always will continue to exist between us.

But what shall I say to thee. Though I was affected when I read thy description of thy feelings, it was not sorrow I felt; far from it; for why should I sorrow to see thee under the Lord's hand. It was sympathy and fellow feeling, not grief, and the language then arose, and still arises, “Let patience have its perfect work.” As thou becomes entirely as passive clay in the hands of the potter, nothing can go wrong; all will finally be well. But, as I once heard an experienced potter say, the preparation of the clay, when designed for any thing valuable, was no small labor. Every little pebble or even coarse sand or grit had to be removed, and then the process of mingling and tempering had to be gone through before the turning commenced, after which there is to be a season of drying, which is a proving time, which discovers every little defect or flaw; after all these, if the vessel prove to be good, there is to be the glazing and burning before it is fit for use.

Marvel not, then, shrink not from suffering, but be inwardly engaged as thou hast been to abide the turning of the Divine hand. Do not give way to the temptation of absenting thyself from meetings, neither judge any one, but be content to suffer. Thou art not alone in thy feelings, but hast those in every meeting who are united with thee in spirit, who suffer with the suffering seed.

Again, I say, let patience have its perfect work.

Thine, L. P. M.

Why are God's promises of peace and joy so great, and the believer's realization of them so comparatively little, but because we do not act rationally in the furtherance of our best desires? Perhaps while we are earnestly praying for the subjugation of some particular sin, we go needlessly to the scenes most likely to excite it; while we implore strength against the assaults of Satan, we go to meet him where we know his seat is. We ask more faith, and forthwith indulge in reading or conversation calculated to obscure the little that we have. We desire earnestly to grow in grace, and thence proceed to put ourselves under the most unfavorable influences, or deprive ourselves of the most ordinary means. We plant our vines on the cold side of the hill, and wonder that they yield us no rich juices; we scatter our corn upon the common field, and then wonder to find it trodden under foot; we

leave our fires unstirred and our lamps untrimmed, and complain that we sit in darkness, and derive no warmth.—*C. Fry.*

"GEORGE FOX."

BY O. H. SPURGEON.

(Continued from page 709.)

Furthermore, Fox has left us a very noble legacy in his teaching concerning *the sin of intolerance*. Intolerance was looked upon as a virtue in his day, and men persecuted each other for the glory of God. With a few noble exceptions, Fox alone, the sufferer, the patient one, who never had a hand to lift to strike his fellow man, but was always ready to pray for and to bless his persecutors, Fox almost alone taught the sin of intolerance. I have a notion that all denominations of Christians have, in their time, persecuted, except the Society of Friends and the Baptists, and it has been shrewdly hinted that we Baptists have never done so because we have never had the chance; but this is scarcely correct, for Roger Williams certainly had an opportunity in Rhode Island to have set up a Baptist state religion, but he spurned the thought. We have both of us a very clear history to look back upon with regard to that. Yet we may fall into intolerance insensibly, for the habit of only buying goods of those persons of our own faith (if such a habit still survives) is very like using the carnal arm. I do not know whether the cutting of a man's acquaintance sometimes, because he thinks rather differently from ourselves, has not in it the spirit of intolerance; and, mark you, it is the spirit of sin which we have to guard against even more carefully than the outward act of it, because when we countenance the spirit, the outward act is sure to follow. If there be a man who thinks wrongly, and is a heretic, and we cannot receive him into our families because of the mischief which might be wrought by his conversation, yet if it be in our power to do him good, we ought to do so none the less because we abhor the doctrines he preaches; we are to treat him all the more kindly because we abominate the things which he spreads abroad. We shall never win him by hard words. We shall never overcome him but by using spiritual weapons, and by these only shall we win the victory if the victory is to be won. I hope that throughout all England now we shall all desire to keep ourselves clear from persecuting our fellow Christians, and if there should remain some who would still seize goods for tithes and church-rates, well, ever so must they remain, I suppose, incorrigible sinners; but let us hope that the light may even reach those dark ivymantled belfries yet, and scare the souls of bigotry and religious tyranny out of their roosting-places. When will men understand that God loveth a cheerful giver, that he hates robbery

for burnt-offering, and will never receive upon his altar that which has been rent by force of arms from those who conscientiously refused to give it?

George Fox has left us a third great legacy, namely, his *testimony against the abomination of war*. When I first read George Fox's Life, I could think of nothing but Christ's Sermon on the Mount. It seemed to me that George Fox had been reading that so often that he himself was the incarnation of it, for his teaching is just a repetition of the Master's teaching there, just an expansion and explanation of the primary principles of Christianity. I am always glad to hear of a soldier being a Christian, I am always sorry to hear of a Christian being a soldier. Whenever I hear of a man who is in the profession of arms, being converted, I rejoice; but whenever I hear of a converted man taking up the profession of arms, I mourn. If there be anything clear in Scripture, it does seem to me that it is for a Christian to have nothing to do with carnal weapons, and how it is that the great mass of Christendom do not see this I cannot understand; surely it must be through the blinding influences of the society in which the Christian church is cast. But Fox's singularly clear mental vision could see that to buckle on the carnal sword was virtually to be disobedient to Christ. The Christian who enlists in the army of our earthly king forgets that they that take the sword shall perish with the sword, and that Jesus has said, "Resist not evil; but if any man smite thee on the one cheek, turn to him the other also." "My kingdom is not of this world, else would my servants fight." May the day come when war shall be regarded as the most atrocious of all crimes, and when for a Christian man, either directly or indirectly, to take part in it, shall be considered as an abjuration of his principles. The day may be far distant, but it shall come, when men shall learn war no more; a right view of the true character of war may hasten that happy era.

Another of Fox's great gifts to us was his testimony to the *sinfulness of oaths*. I think you, respected friends, are bound to continue to enlighten the Christian public upon this point, though I do not say that I think the Christian public deserve enlightenment upon it; for the Scripture is very plain and unmistakable. If the Lord Jesus intended to teach us the sinfulness of oaths, he could not have used stronger language than that which he has used, "I say unto you, Swear not at all; neither by heaven, for it is God's throne, nor by earth, for it is his footstool." The connection shows that this cannot refer to false swearing, but that it must refer to the ordinary swearing of men in courts of law. The Christian is positively forbidden to do so, and he who thus takes an oath, to that extent,

at least, forswears obedience to Christ; he does, in fact, say, "I prefer to do as the world bids me, rather than do as Christ bids me; because it happens to be an inconvenient thing for the world's courts for me to do as Christ would have me do, therefore will I let my Lord and Saviour be forgotten, lest my case should suffer damage."

You Friends have perfect liberty in this matter; and your fathers well earned it, for the persecution which this simple matter brought upon them was like the furnace heated seven times hotter. In the first days almost every Quaker had been in prison, and most frequently on this account. If somebody would put all my church members into prison I should be very sorry; but I am sure the result to them would be a most blessed one, if they suffered for conscience' sake; for nothing makes a man stronger than locking him up for a little while for Christ. You have earned liberty in this matter of oaths, as I have said; will you try to get it for us also? for there are some of us—and I hope there will be many more—who feel the same conscientious difficulties which you feel about it, and who could not and would not swear. Why should we be put to inconvenience on this account? Fox, in this respect, simply told us what Christ had told us before. Let us try to remind our fellow Christians of this very important matter.

If I do not tire you, I desire to add a little upon Fox's personal virtues, which God's Spirit wrought in him, as being the great necessity of the present age. Such a man as George Fox now-a-days would be, in some respects, a singular phenomenon. Being dead, men honor him; if he were alive, it would be another matter. Keep a bear in a cage and people will go and look at him; but if the same bear were roaming down Gracechurch Street, unmuzzled, I question whether we should all crowd upon the wood pavement to enjoy his company. So George Fox in heaven is all very well; but if he were to descend—well, there are some who would wish him back again. Have you never heard that once upon a time that Golden Rule—"Do to others as ye would that others should do to you"—broke loose, and chanced to wander into the Exchange; whereupon there was a great clamor raised against the intruder, and many cried out, "Here, beadle, here is the Golden Rule got out of church! Take him away; he has no business here!" If George Fox were here now to act out his principles in his own style in business, his simple honest habits would be quite out of joint with the modes of modern finance.

First, he had learned the noble habit of very plain speaking. I do not suppose that many beyond your Society will acquire the habit of using the "thee" and "thou" in conversation, but that practice was a significant part of a

very precious whole. It was a portion of a great moral principle, namely, the use of words in their proper signification, and not wresting them from their right etymological position. One admires that incident in Fox's journal where one of his persecutors says to him, "Mr. Fox, your obedient servant." "Beware of hypocrisy and of a rotten heart," replies Fox: "when was I ever thy master? and when wast thou ever my servant? Do servants put their masters in prison?" What a blow for poor compliments! Possibly you never had a writ, or a notice in a county court action, addressed to you and signed "your obedient, humble servant," but that is the style of things with the world. "Oh, you know," says somebody, "everybody knows what it means." If a man writes a letter full of abuse, he begins, "My dear sir." No matter how much animosity may be in a man's heart, he will be sure to address you as "my dear sir," and use the usual false compliments of the fashion. This might not be so bad, if it were not a part of the most terrible and crying mischief, which is apparent everywhere, of persons using words in a non-natural sense, or in a sense not generally allowed.

Many of the terms of business are so corrupted from their meaning that they convey a false idea to the common observer, even in such plain matters as numbers and quality; but the reply is, "Well, everybody knows what it means; it is the custom, you know, and therefore we may do it." I ask why is it the custom to speak in words which are not true? Every religion is thus tainted now. I do not know whether you will approve of what I am about to say, but I cannot refuse to say it. I feel that when a clergyman takes a child in his hands, sprinkles it, thanks God that it is regenerate, and teaches that child afterwards to say, "In my baptism, wherein I was made a member of Christ, a child of God, and an inheritor of the kingdom of heaven"—if that clergyman does not believe that that baptism made the child "a member of Christ, a child of God, and an inheritor of the kingdom of heaven," he is guilty of a dishonest utterance. It is a hard thing to say, but I cannot help saying it; the words are very distinct and plain. If he really is such a fool as to believe that those few drops of water have made the infant "a member of Christ, a child of God, and an inheritor of the kingdom of heaven," why then we cannot find fault with his so saying; but we must leave him there, and pray that he may be enlightened; but if, saying that, he really does not believe it, and in his preaching tells his people that they must be born again in quite another way than in that of baptism, then, brethren, I cannot say otherwise than that such a course of action is dishonest. "But nobody understands those words

as they stand," says some one. This, however, is not true, for we find a numerous body who boldly advocate Baptismal Regeneration, and quote these words as the foundation of their faith. The highest Tractarianism, defends itself by the plain and evident meaning of declarations which good evangelical Christian men have solemnly assented to. Now is this justifiable? Ought we not above all other things to be plain, simple and straight-forward in matters which concern the eternal interests of men's souls. What wonder is it if tricks played with language by the professed ministers of Christ leads on to trickery in the commercial world? The practice of cooking accounts, issuing fictitious reports, and creating imaginary capital, is but another phase of shiftiness in the use of terms, and there are some found to defend it upon the principle that everybody knows it's always done, and one is not to judge high financing by the same rule as small transactions.

The commercial morality of this nation to a fearful extent is corrupted. If I make any allusion to this melancholy fact, people say, "Ah! you do not understand business." Now, if business were a correct thing I think I could understand it, if it were conducted upon perfectly honest and straight-forward principles. I am not such a simpleton as not to be able to see when a thing is honest or dishonest; and if there be a mode of conducting business which is so intricate, shuffling, and complex that I cannot understand it, and that no other minister can understand, whether it is honest or not, then I say it is something which needs looking into, and requires alteration. When a common-sense Christian man cannot understand business, it is time that business should know that it has no business to be such business as it is. Should not a Christian man—I am sure the disciples of George Fox should—be transparent in his business transactions? He should be such a man that if any one should pop in and look at his accounts, he should have no need to look up his books because of improper entries. He ought never to manipulate accounts so as to confess, "Well, that is a very awkward piece of business; but if so and so turns up it will never be heard of, and we shall net a handsome sum, although, if another event occurs, we shall be shown up, and most men will call it a piece of roguery." Is it so, after all, that success makes a doubtful transaction right, and that failure makes it wrong? Really, friends, this will not do. This common fabrication of wealth out of mere paper, the making of affairs to appear as they are not, the conjuring and legerdemain by which capital is created, and shares thrust upon the public; this lying and stealing on a large scale—for that is the English of it—will undermine the position of England amongst the nations, unless something be done to stay

it. We had better go back to "thee" and "thou" with George Fox, and tell men that they are hypocrites and have rotten hearts, if we believe they have, rather than keep on complimenting each other, and uniting to maintain a fictitious state of society. The old Scotch proverb is, "Ca me and I'll ca thee." "Thou treat me as a man of wealth, and I will treat thee the same; and as we both are men of straw, we shall keep each other up." Thus holding hands together in a confederacy of untruthfulness they hope to be believed, and come to believe in themselves; but when the great Heart-searcher comes to deal with us, he will do so upon very plain and simple moral principles, and not at all in the fashion in which some men have dealt with their fellows. I thought it necessary to say this, and if it should be a cap to fit the head of anybody here, I hope he will wear it.

(To be continued.)

HUMAN WEAKNESS MIGHTY THROUGH GOD.

Nothing is more remarkable in the Bible than to see how God, as if to teach us to trust in nothing and none but himself, selects means that seem the worst fitted to accomplish his end. Does he choose an ambassador to Pharaoh? it is a man of a stammering tongue. Are the streams of Jericho to be sweetened? salt is cast into the spring. Are the eyes of the blind to be opened? they are rubbed with clay. Are the battlements of a city to be thrown down? the means employed is not the blast of a mine, but the breath of an empty trumpet. Is a rock to be riven? the lightning is left to sleep above and the earthquake with its throes to sleep below, and the instrument is one—a rod—much more likely to be shivered on a rock than to shiver it. Is the world to be converted by preaching, and won from sensual delights to a faith whose symbol is a cross, and whose crown is to be won among the fires of martyrdom? leaving schools and halls and colleges, God summons his preachers from the shores of Galilee. The helm of the Church is intrusted to hands that have never steered aught but a fishing boat; and by the mouth of one who had been its bloodiest persecutor, Christ pleads his cause before the philosophers at Athens and in the palaces of Rome. And when he choose the weak things of the world to confound the strong, and the foolish to confound the wise, what God meant to teach us was, that we are to look above the instruments to the great hand that moves them: and that, whether it was a giant or a devil that was to be conquered, the eyes of the body or of the soul that were to be opened, walls of stone, or what are stronger, walls of ignorance and sin, that were to be overthrown, men are but instruments in his hand—the meanest mighty with him, the mightiest mean without him.—*Dr. Guthrie.*

For Friends' Intelligence,

MISQUOTATIONS AND MISAPPLICATIONS OF SCRIPTURE.

As a treasury of the religious thought of man in the remotest periods of his history, the Scriptures must always be valuable. The light shed upon our relation to God, as a father, and upon human duty since the introduction of Christianity, has thrown into deep shadow many things recorded in the Old Testament; but we could no more dispense with this record than could a man who had attained a high degree of spiritual experience profitably dispense with the remembrance of his early and imperfect, perhaps erroneous, ideas of God and duty.

It is not necessary to suppose that the Scriptures have been *miraculously* preserved to us. Their preservation is simply a testimony to their great worth; just as gold and diamonds are preserved in preference to articles of less value. In what are called the Dark Ages, there were, no doubt, individuals scattered here and there in whose hearts the lamp of divine love and truth burned brightly, though its rays could penetrate but a little way into the darkness. Monasteries and convents were then the depositories of the precious volume, and we are, perhaps, mainly indebted for its preservation to that superstitious veneration for its letter, which, in more enlightened minds, would be sinful.

Truth is an ever-present inspirer, furnishing, in every age, the form of expression best adapted to convey its teachings to that age; so that there is no absolute necessity in preaching or prayer to use forms of expression adopted in the past; indeed the sliding too easily into these sometimes obscures the exercise, and is a temptation to utter words without life. Much of the language of Scripture, however, is so flowing, poetic and beautiful, and has become so much a part of our religious thought, that the thought and the language are apt to arise in the mind together. When this is spontaneous, and the passage correctly given, we recognize the gem in its old setting; but when texts are strung together inappropriately, or mangled in the quotation, some of the brilliant beauty of the truth is impaired.

Though an humble, earnest spirit in a minister is far before mere verbal accuracy, yet to refer to a recognized authority, (which is understood to be done when Scripture is quoted,) and then to misquote or misapply it, is not strictly just.

Most of the following examples of misquotation and misapplication have already appeared in print, but others are new. Some of these passages are so habitually misquoted as to induce the belief that we copy from each other, and do not sufficiently read for ourselves.

"As iron sharpeneth iron, so doth the coun-

tenance of a man his friend," should be, "Iron sharpeneth iron; so a man sharpeneth the countenance of his friend." Prov. xxvii. 17.

"So plain that he who runs may read." The text is, "Make it plain upon tables, that he may run that readeth it." Hab. ii. 2. A man cannot read while he is running, but he may read and then run, as the passage implies.

"Mighty through God to the pulling down of strongholds." 2 Cor. x. 4, has sometimes added to it, "of sin and Satan," which is not in the text.

"No man can redeem his brother, nor give to God a ransom for his soul," is not Scripture. It seems to be taken from Psalms xlix. 6, 7, 8, 9. "They that trust in their wealth, and boast themselves in the multitude of their riches; none of them can by any means redeem his brother, nor give to God a ransom for him; (for the redemption of their soul is precious, and it ceaseth forever,) that he should still live forever, and not see corruption."

"The shepherd of Israel, who sleepeth not by day, nor slumbereth by night," is incorrect; it stands, "Behold, he that keepeth Israel shall neither slumber nor sleep." Psalms cxxi. 4.

The word "Zion" is applied to the Church of Christ on earth; "Israel," also. There is but one Zion, or one Israel; therefore, "our Zion," as if there were many, is incorrect.

"Owe no man any thing but love," is an incorrect quotation of Rom. 13: 8; "Owe no man anything but to love one another."

"In the midst of life we are in death," is from the book of Common Prayer.

"The merciful man is merciful to his beast." The nearest approach to this is, "A righteous man regardeth the life of his beast." Prov. 12: 10.

"A nation shall be born in a day." There is no such prediction in the Bible. The only passage like it is, "Shall a nation be born at once?" Isaiah 66: 8.

"Choose the Lord for your portion, and the God of Jacob for the lot of your inheritance," is not Scripture. The 9th verse of the 32d chapter of Deuteronomy says, "For the Lord's portion is his people; Jacob is the lot of his inheritance."

"Strength in weakness, riches in poverty, and a present help in every needful time," is not found in the Bible. Neither is the expression, "Who was never foiled in battle."

"The zeal of thy house hath eaten thee up," has sometimes been used against those who were presumed to have manifested too much religious zeal. The pronoun "thee" should be "me." It is an appeal of David's to the most High; "The zeal of thy house hath eaten me up; and the reproaches of them that reproached thee are fallen on me." Psalms 69: 9.

"The will of man never wrought the righteousness of God," is not Scripture. The Apostle James says, "For the wrath of man worketh not the righteousness of God." James 1: 20.

The Apostle Paul is often quoted as saying, "I live by faith in the son of God." The expression is, "I live by the faith of the Son of God." Gal. 11: 20.

That precious text, "Come unto me all ye that labor and are heavy laden, and I will give you rest," (Matt. xi. 28,) is almost always misquoted thus: "Come unto me all ye that are weary and heavy laden," &c.

"Little children, love one another," is not in the Bible, but is taken from a tradition respecting John, called the divine.

It is often said that it required a *miracle* to convince the Apostle Peter that God is no respecter of persons; whereas, by reference to the 10th chapter of Acts, we shall find that it was a *vision*, that was made use of to convey to Peter's mind this important truth.

"Not to be wise above what is written," used to repress curiosity about hidden things, is not in the Scriptures.

"God tempers the wind to the shorn lamb," is a line of Sterne's. The nearest approach to it in Scripture is, "He stayeth his rough wind in the day of the east wind." Isaiah 27: 8.

There is no such passage in the Bible as "Morning light and evening song."

"A Saviour, or I die, a Redeemer, or I perish forever," is from Augustine, one of the early Christians.

"That bourne from whence no traveller returns," is from Shakespeare.

Some preachers are in the habit of supplying words in Scripture texts, with the intention of making them more clear. This, besides being an implied depreciation of the understanding of their hearers, is calculated to nullify the effect which the bold, unqualified, unamplified style of the Sacred writings has in awakening and stimulating the intellect. David exclaims, in Psalms 84: 10, "A day in thy courts is better than a thousand." "Elsewhere" is often added, and spoils the contrast which is between *blissfulness* and *duration*.

In quoting from Matt. 25: 21, "Enter thou into the joy of thy Lord," the addition is generally made, "and into thy master's rest."

Prov. 10: 22. "The blessing of the Lord it maketh (truly) rich."

1 Cor. 11: 9. "Eye hath not seen, nor ear heard, neither have entered into the heart of man (to conceive) the (good) things which God hath prepared for them that love him."

Ecol. 9: 10. "Whatsoever thy hand findeth to do, do it with (all) thy might."

Matt. 25: 10. "And they that were ready, went in with him to the marriage" (chamber.)

Isa. 1: 25. "Thy dross and thy tin" (and thy reprobate silver.)

Psalms 46: 4. "Shall make glad the (whole) city of God."

"As the tree falls; so it lies; and as death leaves, so judgment finds," is not the text, which is thus: "If the tree fall toward the south, or toward the north, in the place where the tree falleth there it shall be." Ecol. xi. 3. This passage, so often used to enforce the doctrine of everlasting punishment, has no such application in the text. It is found in connection with an exhortation to liberality. The "clouds," which, when "full of rain," "empty themselves upon the earth," and the "tree," which, when it falls, removes not from the place where it fell, appear to be used as poetic figures.

"I beseech you, therefore, brethren, by the mercies of God, that ye present your bodies a living sacrifice, holy, acceptable unto God, which is your reasonable service." Rom. 12: 1. This passage is applied by Friends almost exclusively to the attendance of meetings, thereby missing the larger application meant by the Apostle, which is, that the whole man should be consecrated to the service of God by keeping the body pure and holy. S.

FRIENDS' INTELLIGENCER.

PHILADELPHIA, FIRST MONTH 19, 1867.

CHRISTIAN PROGRESS.—It has not been the policy of the Society of Friends, at any period of its existence, to resort to efforts to proselyte to sect.

The concern of its consistent and influential members has been, that the human family should be brought to comprehend the *great truths*, that the Lord is the teacher of His people, that a knowledge of Him is obtained through the medium of Christ,—the Word, which is also called Light—and that this "Light has appeared unto all men," and obedience to its teachings or manifestations is "*the way of life*."

The history of the severe persecutions which attended the promulgation of this doctrine two hundred years ago, is so familiar, that a reference to it may seem, to some, a proxy repetition of what they often hear. But, we feel, that in the liberty of conscience with which we are privileged, we are sometimes in danger of losing sight of the instrumentalities by which it was obtained.

We shrink, even in thought, from the loath-

some dungeons and noisome cells in which not only strong men, but feeble women, were incarcerated for years, enduring at the hands of their jailors innumerable insults and cruelties.

To one looking upon the present organization of Friends, and taking a casual view of its surroundings, it might seem that but little had been effected by the labors of these martyrs for truth.

The smallness of our numbers in comparison with many other religious sects, and the occasional relinquishment of their birthright by some of our young friends, are calculated to give the idea that there is a defect in the principle of our profession; and that we fail to prove the sufficiency of the *internal light*, for safe guidance and preservation, by the deficiencies apparent among us. By a closer scrutiny, there will be found other causes for the nonfulfilment of duties connected with the higher life. As was at first stated, Friends have not exerted their influence to gain members, but have felt restricted therefrom, and are also cautious in receiving voluntary applicants. In the absence of outward attractions, our religious assemblies are not generally so largely attended as some others, where the ceremonies of worship are in a more tangible form. There is nothing in a rightly-gathered Friends' meeting with which a wordly spirit can assimilate. The few broken sentences, uttered with fear and trembling, as in the presence of the great I AM, fail to meet the wants of those who are looking for "great things." And when gospel truths are more fully illustrated, and the multitude have been fed and impressed for the time, how many are like those of old, who felt that the teachings of the blessed Jesus were fraught with "hard sayings," that they could not bear them, "and went no more after him." Christianity is the same now as then—and the mind of man differs not, save as it expands under the influence of the *Light*, the sun of righteousness. It must, however, be gratifying to every sincere lover of truth, to notice the growing disposition in the various religious denominations, to award to the *Spirit* the pre-eminence it merits; and to so far recognize the fundamental principle of Quakerism, as no longer to believe that "it leads to bewilder, and dazzles to blind." Some of the most prominent men in what is

called the Evangelical Church, are propounding to their hearers questions like the following: "Are we turning knowledge into wisdom, and whether understanding more of the mysteries of life are we feeling more of its sacred law; and whether having left behind the priests, and the scribes, and the doctors, and the fathers, are we about our Father's business, and becoming wise to God?" Spurgeon, in his lecture on G. F., says: "George Fox, dear friends, has bequeathed these principles to you. I pray you guard them with your lives, and hand them down with undimmed lustre to your sons. Let nothing beguile you from your steadfastness in the spirituality of your worship, and press it upon others everywhere, whenever you have opportunity, that the Father seeketh such to worship Him as worship Him in spirit and in truth."

How far the faithful adherence of Friends to the doctrine of "salvation by Christ," inwardly revealed, has been instrumental in preparing the hearts of others to receive the manifestations of the Spirit, we may not know; but the testimony of Scripture is, "my word shall not return unto me void, but shall accomplish that which I please, and it shall prosper in the thing whereto I sent it."

DIED, in Easton, Washington Co., N. Y., on Seventh-day, the 29th of Twelfth month, 1866, of jaundice, REUBEN BAKER, aged nearly 72 years; a member of Easton Monthly Meeting. A little before the closing period he said, "Though I have made some misses, it has been my endeavor through life to do right; and it has always been uppermost with me; and for two or three weeks I have been as happy as I could wish to be;" and in a short time peacefully and gently breathed his last. He had for many years manifested a warm zeal for the oppressed, and exhorted others to observe temperance and moderation on all occasions. E.

—, on Sixth day, 21st of Twelfth month, 1866, near Centre, Clinton Co., Ohio, of consumption, CATY W., wife of Abram Allen, in the 67th year of her age. She had often expressed that there was nothing in her way, and we doubt not she has entered that rest which is prepared for the righteous. She had for many years taken a warm interest in the cause of the poor and oppressed African race, laboring with her might to liberate them from cruel bondage; and there is not a shadow of doubt but she is reaping a rich reward for this and every other good deed. E.

—, at his residence in Baltimore, on the morning of the 6th inst., NATHAN TYSON, in the 80th year of his age.

—, on the 12th of First month, 1867, ANNA CANBY, relict of David Smyth, in her 83d year; a member of Wilmington Monthly Meeting.

—, very suddenly, on the 7th of Third month, 1866, WILLIAM HUGHES; a member of Pipe Creek Monthly and Particular Meeting.

DIED, on the 8th of Twelfth month, 1866, near Greenwich, Cumberland Co., N. J., LYDIA BRADWAY, widow of the late Adna Bradley, in the 85th year of her age; an Elder of Greenwich Monthly Meeting.

—, on the 21st of Twelfth month, 1866, AMY HART, widow of the late Samuel Hart, in the 81st year of her age; a member of Buckingham Monthly Meeting, Pa.

Friends' Fuel Association for the Poor meets this (Seventh day) evening, 1st mo. 19th, at 7½ o'clock, at Race Street Meeting-house.

JOSEPH M. TRUMAN, Clerk.

WANTED,

By the Association of Friends of New York for Relief of Freedmen, a teacher for a school in Maryland. Address, JACOB CAPRON,

1172 Broadway, New York.

1st mo. 12, 1867—*tf.*

From an Editorial of the North American for the New Year, we extract the following brief sketch of the present position of Europe. It gives a glimpse of the *unrest* which seems to pervade all nations, of which we Americans have a full share. In the hopeful tone indulged by the Editor in relation to our Republic, we do not fully participate. The future is enveloped in a cloud, and in what way this shall be dispelled, or what it conceals, we are unable to determine. But true it is, that the more confidence there is reposed in that Power, which can still "divide the waters," or cause "the elements to melt with fervent heat," the more sure may we be of deliverance from our present perilous condition. EDS.

EIGHTEEN HUNDRED AND SIXTY-SEVEN.

A new year dates from to-day. It does not find the world at peace, and there is quite as much reason to suppose that it will be stormy as that it will be tranquil. England is disturbed by earnest demands for reform at home, while Ireland is in its usual state of unrest, and Canada is far from tranquil. France, balked by Prussia, forced from Italy, and disappointed in Mexico, threatens to renew those civil dissensions which there almost invariably follow defeat abroad. Neither Spain nor Portugal are in assured peace. Austria is suffering from as grave defeats as are recorded in all of her history, and Denmark from the loss of her richest territory. Prussia has suddenly risen to first-rate importance, and seems determined to consolidate and enlarge her acquisitions. The Greek and Catholic faiths are again at variance, Russia promising to support the former in a way which renders war quite possible. South America is experiencing the effects of a war which has involved the larger part of those nations by which it is divided, and Mexico is not cured of its chronic inquiet.

It is comfortable when we see the New Year dawn with such lights over the rest of the world, to reflect that the brunt of our own danger has passed, and that the disputes which now inflame the passions with us are secondary, and in their very nature overtures towards a more satisfactory state of things than we have ever enjoyed. The great sea which was provoked by so many years of preliminary agitation, and which roared so long, has not wholly subsided, but it is subsiding. Its existing tumult is wholly attributable to the fact that its margin is being walled in by lines which it can never again overpass. But one by one the impediments which lumbered our path are disappearing; courage is increasing behind facts which demonstrate that it can be rationally indulged, and with courage comes accomplishment. Efforts are already making in influential quarters to remove the crushing taxation which has restrained our manufactures, our commerce, our mines, our railways, our agriculture and every other form of industry, from the advance which they should have made; and though no result has yet been attained, there is something more than a hope that the current year will abolish the worst drags.

It must be conceded that 1867 does not find us with all of the prosperity which had been expected. It does not find the temper of the South so amiable as was to be desired. It does not find the material interests of the North as vigorous as they should have been. And yet we have not only paid the interest of our debt, but extinguished some part of the principal; have rebuilt old roads and plotted new; have inaugurated a line of Pacific steamships, from which the greatest advantages may be expected; have pushed forward the rails across a greater part of the continent; have enlarged our internal and foreign methods of communication, and exhibited a recuperative and progressive power which, considering the conditions under which it is developed, is not less singular and gratifying than any former achievement.

We have great hopes planted in the glad New Year whose advent we welcome to day—hopes for the improvement of the world, and especially for that considerable portion of it which our own country constitutes.

Look upon the *success and sweetness of thy duties* as very much depending upon the keeping of thy heart close to God in them. Well, then, when thou findest thy heart under the power of deadness and distraction, say to thy soul, "my praying times are the choicest parts, the golden spots of all my time. Could I but raise my heart to God I might now obtain such mercies as would be matter for a song to all eternity."—*Flavel.*

From Harper's Weekly.

THE LESSON OF JAMAICA.

The Jamaica question can not be too carefully studied by us at this time in this country. And we can imagine few more valuable books than a clear, brief and faithful history of that island since the emancipation. The great moral which is taught by that history, in the fragmentary form in which it is accessible, is the practical helplessness of an emancipated, servile class among those who have held them enslaved. Making all fair allowance for the climate, and for laziness, ignorance, dishonesty, and ease of subsistence upon the part of the emancipated class in Jamaica, it will hardly be denied by a student of its condition since 1838, that the chief difficulty of the situation is in the spirit of the old planter or slaveholding class.

The initiative belonged to them. Good sense should have taught them that their true interest lay in acquiescing heartily in emancipation, and making the best of it. They were to depend upon a class of laborers perfectly well known to them, but placed in a totally different position in respect of the tenure of labor. Those laborers were now freemen. They were to be treated as freemen. But also they were to be treated as new freemen, as men bewildered in a position to which they were unused. Too much was not to be expected of them. They were, first of all, to be taught confidence in the late master class. They were to be educated, protected, forborne. The duties and responsibilities thrown by emancipation upon the master class were indisputably very great; but they were to be faithfully fulfilled, or the whole island would sink into ruin. Nobody pretends that these duties ever were fulfilled, or that, as a class, the planters made any serious attempt to accept or even to understand the situation. The apprentice system failed. The negroes were utterly alienated. They took to the bush, and the great estates went to waste. Jamaica has languished, not on account of emancipation, for under Slavery it was steadily and rapidly declining, but from the haughty injustice of the master class.

The Eyre massacres of last year happily aroused the English conscience. The protest was tremendous. The Government were compelled to recall Eyre, and to send out a Commission of Inquiry. Eyre is now in England, where a strong effort will be made to bring him to trial for murder; and Sir Peter B. Grant is the new Governor—a man known for his protection of the natives of Bengal from the hard hand of European masters. In his speech upon assuming the Government, Sir Peter points out that there is no practical justice in the island for negroes in cases of more than ten pounds; and it has been found necessary, for the protection of the blacks, to reorganize a paid magis-

tracy in Jamaica. As a further illustration of the administration of justice there is the case of Gordon Ramsay. He was one of the leaders of the massacres of last year; and the evidence before the Grand Jury showed that when a man named Marshall, who was being flogged by Ramsay's order, either exclaimed, "O Lord!" in the agony of the punishment, or merely groaned, or ground his teeth, Ramsay said that it was sedition, ordered him to be taken down and hung; and he was hung. Three witnesses proved these facts. There was no question of them. But the Grand Jury of Planters refused to find a bill. And these are the things which Carlyle, and Tennyson, and Ruskin defend as manly, British, heroic and necessary.

It is the business of statesmanship to deal with human nature, not with abstract theories; and if any argument were wanting to demonstrate the imperative duty of the United States at present, to hold the freedmen firmly by the hand, and not to intrust them to those who hate them more than they love their own interest, it may be found in the story of Jamaica.

OUR MASTER.

BY JOHN G. WHITTIER.

Immortal Love, forever full,
Forever flowing free,
Forever shared, forever whole,
A never-ebbing sea!
Our outward lips confess the name
All other names above;
Love only knoweth whence it came,
And comprehendeth love.
Blow, winds of God, awake and blow
The mists of earth away!—
Shine out, O Light Divine, and show
How wide and far we stray!
Hush every lip, close every book,
The strife of tongues forbear;
Why forward reach or backward look
For love that clasps like air?
We may not climb the heavenly steep
To bring the Lord Christ down;
In vain we search the lowest deep
For him no depths can drown.
Nor holy bread, nor blood of grape,
The lineaments restore
Of him we know in outward shape,
And in the flesh no more.
He cometh not a king to reign;
The world's long hope is dim;
The weary centuries watch in vain
The clouds of heaven for him.
Death comes, life goes; the asking eye
And ear are answerless;
The grave is dumb, the hollow sky
Is sad with silentness.
The letter falls, and systems fall,
And every symbol wanes;
The Spirit over-brooding all
Eternal love remains.
And not for signs in heaven above,
Or earth below they look,
Who know with John his smile of love,
With Peter his rebuke.

In joy of inward peace, or sense
Of sorrow over sin,
He is his own best evidence,
His witness is within.

No fable old, nor mythic lore,
Nor dream of bards and seers,
No dead fact stranded on the shore
Of the oblivious years :

But warm, sweet, tender, even yet
A present help is he ;
And faith has still its Olivet,
And love its Galilee.

The healing of his seamless dress
Is by our beds of pain,
We touch him in life's throng and press
And we are whole again.

Through him the first fond prayers are said
Our lips of childhood frame,
The last low whispers of our dead
Are burdened with his name.

O Lord and Master of us all !
Whate'er our name or sign,
We own thy sway, we hear thy call,
We test our lives by thine.

Thou judgest us ; thy purity
Doth all our lusts condemn ;
The love that draws us nearer thee
Is hot with wrath to them.

Our thoughts lie open to thy sight ;
And, naked to thy glance,
Our secret sins are in the light
Of thy pure countenance.

Thy healing pains ; a keen distress
Thy tender light shines in ;
Thy sweetness is the bitterness,
Thy grace the pang of sin.

Yet, weak and blinded though we be,
Thou dost our service own ;
We bring our varied gifts to thee,
And thou rejectest none.

To thee our full humanity,
Its joys and pains belong.
The wrong of man to man on thee
Inflicts a deeper wrong.

Who hates hates thee, who loves becomes
Therein to thee allied ;
All sweet accords of hearts and homes
In thee are multiplied.

Deep strike thy roots, O heavenly Vine,
Within our earthly sod,
Most human and yet most divine,
The flower of man and God !

O Love ! O Life ! Our faith and sight
Thy presence maketh one :
As through transfigured clouds of white
We trace the noon-day sun.

So, to our mortal eyes subdued,
Flesh-veiled, but not concealed,
We know in thee the fatherhood
And heart of God revealed.

We faintly hear, we dimly see,
In differing phrase we pray ;
But, dim or clear, we own in thee
The Light, the Truth, the Way !

The homage that we render thee
Is still our Father's own ;
Nor jealous claim nor rivalry
Divide the Cross and Throne.

To do thy will is more than praise,
As words are less than deeds,
And simple trust can find thy ways
We miss with chart of creeds.

No pride of self thy service hath,
No place for me and mine ;
Our human strength is weakness, death
Our life, apart from thine.

Apart from thee all gain is loss,
All labor vainly done ;
The solemn shadow of thy Cross
Is better than the sun.

Alone, O Love ineffable !
Thy saving name is given ;
To turn aside from thee is hell,
To walk with thee is heaven !

How vain, secure in all thou art,
Our noisy championship !—
The sighing of the contrite heart
Is more than flattering lip.

Not thine the bigot's partial plea,
Nor thine the zealot's ban ;
Thou wilt spare a love of thee
Which ends in hate of man.

Our Friend, our Brother, and our Lord,
What may thy service be ?—
Nor name, nor form, nor ritual word,
But simply following thee.

We bring no ghastly holocaust,
We pile no graven stone ;
He serves thee best who loveth most
His brothers and thy own.

Thy litanies sweet offices
Of love and gratitude ;
Thy sacramental liturgies
The joy of doing good.

In vain shall waves of incense drift
The vaulted nave around,
In vain the minister turret lift
Its brazen weights of sound.

The heart must ring thy Christmas bells,
Thy inward altars raise ;
Its faith and hope thy canticles,
And its obedience praise !

—Independent.

FOSSIL VINES AND GRAPES.

At the last meeting of the Société Impériale et Central d'Horticulture in Paris, Dr. Thudichum, of St. Thomas's Hospital, London, made a report on the fossil vines and the wild vines of the Rhine valley. He exhibited to the society several specimens of vine leaves impressed upon coal, which had been taken from a mine in Hesse-Darmstadt. Other specimens contained great numbers of fossil grape husks and kernels. The learned Doctor stated that these deposits, lying underneath the basalt, were estimated to be above one hundred millions of years of age, and that these facts and the peculiar character of the wild vines of the Rhine completely contradicted the almost universal belief that the vine had come to us from Asia. He believed that the vine was indigenous to all countries where it prospered now, and invited horticulturists to make experiments with the seeds of wild vines, particularly those of France,

as they might thus obtain results of importance to horticulture.—*N. Y. Evening Post.*

TRY AGAIN.

Robert Gray had been writing at the parlor table, and his father sat in an easy-chair, reading a new book.

"I may just as well give up at once," said Robert, pushing aside his pen and paper, and seating himself on a low stool: "I never can write this exercise."

"Never can write this exercise," echoed his father, in such a sad tone that Robert could not help laughing. "How many times have you tried?"

"Just once, father."

"Robert," said his father, "I have been reading the life of a man who wrote more than a dozen volumes, though he was nearly blind, and sometimes took the trouble of re-writing a passage sixteen times before he thought it good print."

"What was his name, father?"

"William Hickling Prescott. Would you like to hear something about him?"

"Very much indeed," replied Robert, hoping to exchange the disagreeable exercise for a story. But his father was not going to reward idleness.

"Then, if you want the story, my boy, you must first finish your exercise, and when I see that it is well done, you shall hear about what I have been reading."

Half an hour of hard work accomplished what Robert had just said could never be done. Just then his two brothers came in from play, and Mr. Gray laid aside his book and began his true story:—

"William H. Prescott was born at Salem, New England, in 1796. His father was a lawyer. A bright, merry little boy William was, with an inquisitive mind and a good memory. Like most other children, he loved play far more than lessons. Not rough, noisy play, for he was not very strong; but quiet games, and, above all, story-books, or making long stories himself for the amusement of his companions. His father removed to Boston when William was twelve years old, and in three years more he entered Harvard College. One day, when he was leaving the dinner-room in the college, a lad accidentally struck him in the left eye with a piece of hard bread. There was no external injury, but the sight was gone for ever. We are not told that the young man who inflicted this sad blow ever came to say how sorry he was; but notwithstanding, Prescott forgave him heartily, and never even mentioned his name unkindly.

"For a short time Prescott continued his studies, but the strain on one eye was too severe, and bad inflammation set in. For many months

he sat patiently in a dark room, cheerfully bearing his sufferings, and very thankful to any one who would kindly read aloud to him. By degrees his eye so far recovered that he could venture into the open air, but he never again was able to use it much in reading or writing. The doctors thought travelling might benefit his health; and as he had relations living in the Azores, he went there for some months, and afterwards visited London, Paris, and Italy. On his return to America he decided not to become a lawyer, the profession he had been intended for before the injury to his eye. But as he found that real honest industry of some kind is necessary to happiness, he determined to begin study in earnest and try to write useful books. Much time had been lost on account of his temporary blindness. He was not ashamed, however, to learn simple things over again. So a great many hours every day were spent in reading and writing. Like most hard workers, he was an early riser, not however, from taste, but from duty."

"Father, may I ask you one question?" interrupted Robert.

"Surely, my son."

"How could Prescott read and write so much when he was nearly blind?"

"He always employed a man to read to him a certain number of hours, and by-and-by his own wife and children were delighted to be able to minister to his pleasure in the same way. Sometimes he read to himself for a few minutes at a time. I was going to tell you how he managed to write. A writing case has been invented for the blind. It is called a noctograph; which means to write at night. When closed, it looks like a great book, and, on being opened, several brass wires are seen stretched from side to side. Under these wires a black sheet of paper is placed, and beneath that a white one. The blind writer does not require to use ink, but guided by the horizontal lines, he makes the necessary letters on a black paper with a sharp pointed little instrument called a style, and the impressions go through to the white sheet, leaving marks like those of a lead pencil. This writing case was a great comfort to Prescott, and when he had written some sheets his secretary copied them out in a fair round hand.

"Just think what difficulties this blind historian had to overcome. After listening to hundreds of books, he had to think a great deal about what he had heard, and then compose in his mind the history he was going to write. All this took him a long time. He tried to do everything as well as possible, and spared no pains in making his books truthful and interesting. In many cases he went over his subject five or six times; in one, at least, sixteen. He spent ten years in writing his first great work,

'The History of Ferdinand and Isabella,' and even after it was finished he hesitated about publishing it. But from this time it appeared honors of all sorts poured on him. Great men in Europe and America wrote to congratulate the blind author, and encouraged him to begin another book.

"After six years more he published a history of the conquest of Mexico, and a year later commenced to write 'The History of Peru.' Failing health, however, warned him that rest was needed, and he was induced to take a second voyage to England.

"Very little rest was given to the author of 'Ferdinand and Isabella,' for, from the moment of his arrival on English ground, the great people of the land vied with each other in showing him hospitality. He was presented at the court of Queen Victoria, and had the honor of dining in her company. The late Earl of Carlisle was one of Prescott's warmest and strongest friends. But all this kindness did not make him proud. He was the same simple man he had ever been, the same true friend, the same loving son to his aged mother. Indeed, as men praised him he seemed to grow more humble and conscious of his own failings. He kept a private record of his faults, with the hope of being able, by the help of God, to overcome them. Every Sabbath he read over his private note-book, and after his death it was found with these words on the outside: 'to be burned.' This order was obeyed. When he returned from England he continued writing a new work he had begun, and, although increasing weakness prevented him from doing as much as in former years, he labored on at his usual employments until January 27th, 1859, when he died almost suddenly, leaving behind him a grand lesson on the power of patient perseverance.

"Now recollect, Robert, that whenever you are trying to do anything really worth doing, you must not give up until you have tried at least sixteen times, remembering the words of the wise man, 'The hand of the diligent shall bear rule: but the slothful shall be under tribute.'"—*Ex. Paper.*

LOST ARTS.

In regard to colors we are far behind the ancients. None of the colors in the Egyptian paintings of thousands of years ago are in the least faded, except green. The Tyrian purple of the entombed city of Pompeii is as fresh today as it was three thousand years ago. Some of the stucco, painted ages before the Christian era, broken up and mixed, revealed its original lustre. And yet we pity the ignorance of the Egyptian prince who was contemporaneous with Solomon and Cleopatra, at whose feet Cæsar laid the riches of his empire.

And in regard to metals. The edges of the

statues of the obelisks of Egypt, and of the ancient walls of Rome, are as sharp as if hewn yesterday. And the stones still remain so closely fitted, that their seams, laid with mortar, cannot be penetrated with the edge of a penknife. And their surface is exceedingly hard—so hard that when the French artists engraved two lines upon an obelisk brought from Egypt, they destroyed, in the tedious task, many of the best tools which could be manufactured. And yet these ancient monuments are traced all over with inscriptions placed upon them in older time.

This, with other facts of striking character, proves that they were far more skilled in metals than we are. Quite recently it is recorded that when an American vessel was on the shores of Africa, a son of that benighted region made, from an iron hoop, a knife superior to any on board of the vessel, and another made a sword of Damascus excellence from a piece of iron.

Fiction is very old. Scott had his counterparts two thousand years ago. A story is told of a warrior who had no time to wait for the proper forging of his weapon, but seized it red-hot, rode forward, and found, to his surprise, that the cold air had tempered his iron into an excellent steel weapon. The tempering of steel, therefore, which was new to us a century since, was old two thousand years ago.

Ventilation is deemed a very modern art, but this is not the fact, for apertures, unquestionably made for the purpose of ventilation, are found in the pyramid tombs of Egypt. Yes, thousands of years ago, the barbarous Pagans went so far as to ventilate their tombs, while we yet scarcely know how to ventilate our houses.—*The Moravian.*

THE ORIGIN OF BILLS OF EXCHANGE.

When the Jews were driven from Arabia, in their flight great numbers of them passed over to Spain, then in the possession of the Moors, by whom they were treated with great kindness. As no obstacle to improvement in learning or to promotion in rank was placed before them, the Jews, by their genius and attachment to the interests of the state, soon raised themselves to high civil offices about the persons of the caliphs, who respected them, their learning, wisdom, and virtue. They established the most celebrated schools then in the world, both for sacred and profane literature. The Talmud, which in Arabia had been the only book studied by the Hebrews, gave place to the Scriptures, together with the most elaborate treatises on the arts and sciences; in the knowledge of which they took precedence of every learned fraternity in Europe. In the fine arts they likewise made great proficiency. Several among them are celebrated to this day as astronomers, architects, jurists, historians, poets, painters, and physicians. But neither the learning nor loyalty of the Jew

availed them aught, when the crescent was supplanted by the red banners of the cross. On the defeat of the Saracens, Ferdinand and Isabella left them no choice between baptism and banishment; and, with the exception of five hundred, whom the extremes of age and poverty prevented from removing, all preferred the latter. As the period for their departure was limited to a fixed hour, after which those remaining were liable to suffer death in case they refused baptism, the condition of the Jews was the most lamentable that can well be imagined. But they were not suffered to remain in the peaceable enjoyment of the time allotted to them by the royal edict. The Christians fell on them in many places, and put them to death without regard to age, sex, or condition. Those of them who had escaped towards the sea previous to the breaking out of the disturbances in the interior of the country, were either pursued and butchered on the coast, or were drowned in great numbers through the treachery of those who supplied them with vessels. Few arrived safely in Italy; and even there were only sheltered from a fate such as they had fled from by a papal bull. It was on this memorable occasion that some Spanish Jew merchants contrived, by the invention of bills of exchange, to possess themselves in Italy of that wealth which they had no means of removing out of the dominions of Ferdinand. Of what immense utility that invention has since been to the mercantile world it is needless to inquire.

For Friends' Intelligencer.
REVIEW OF THE WEATHER, &c.
TWELFTH MONTH.

	1865.	1866.
Rain during some portion of the 24 hours,	5 days.	4 days.
Rain all or nearly all day,....	4 "	1 "
Snow, including very slight falls,.....	6 "	5 "
Cloudy, without storms,.....	7 "	4 "
Clear, as ordinarily accepted	9 "	17 "
	31 "	31 "
TEMPERATURE, RAIN, DEATHS, &c.	1865	1866.
Mean temperature of 12th month per Penna. Hospital,	37.39 deg.	33.61 deg.
Highest do. during month	62.50 "	61.50 "
Lowest do. do. do.	15.00 "	5.00 "
Rain during the month,.....	5.61 in.	3.46 in.
Deaths during the month, being for 5 current weeks for each year.....	1257	1228
Average of the mean temperature of 12th month for the past seventy-seven years	32.53 deg.	
Highest mean of do. during that entire period, 1848.....	45.00 "	
Lowest do. do. do.	1832 25.00 "	

COMPARISON OF RAIN.

	1865.	1866.
Totals for the first six mos. of each year.....	28.94 inch	22.27 inch
Totals for the last six mos..	27.30 "	22.77 "
Totals for entire year.....	56.24 inch	45.24 inch

Taking the weather for the entire month, it was unusually pleasant, though the 21st was a very, very cold day, the mercury descending to zero at Germantown in some very exposed situations. The first regular snow storm of the season occurred on the 11th, making very poor sleighing. It will be seen that just eleven inches less rain fell during the year 1866 than the preceding one.

The deaths during the year were in round numbers five hundred less than in 1865. Truly we have much to be thankful for.

J. M. E.

Philadelphia, First mo. 7, 1867.

The Treasurer of Friends' Association for the Aid and Elevation of the Freedmen has received the following amounts since last report:—

From City Contributions.....	\$50.00

ITEMS.

A large portion of that part of the Crystal Palace which has been used for the exhibition of tropical products, was burned on the morning of Twelfth month 31st, causing a loss of £300,000.

THE MONT CENIS RAILWAY.—Work is active on the temporary railway over Mont Cenis, intended to perform the service during the eight or nine years which must elapse before the tunnel can be made available. According to experiments made, the mountain between Saint Michael and Suza can be crossed in four hours, and the length of the line between these two stations being nearly eighty kilometres (fifty miles), it follows that the speed attained is twenty kilometres an hour. Each train will be able to take fifty passengers, but no more. The great quantity of snow which falls for six months of the year, and covers the sides of the mountain, makes it necessary that the railway, for a considerable portion of its length, should be protected by wood and iron sheds sufficiently strong to resist the force of avalanches.

CONGRESS.—In the Senate a resolution was adopted directing the Commissioner of Agriculture to prepare specimens of the cereal productions of each State and the Territories, and forward them to the Paris Exposition. A resolution was adopted instructing the Committee of Commerce to inquire into the expediency of prohibiting the sending of passenger vessels to sea after they have been in use a certain number of years. A bill was introduced to protect the rights of married women in the District of Columbia, which was referred. A message was received from the President, vetoing the bill conferring universal suffrage in the District of Columbia, which was read. A motion to postpone its consideration was lost, and the bill was finally passed, notwithstanding the veto, by a vote of 29 yeas to 10 nays. The Secretary of the Senate was

directed to transmit the District suffrage bill, as passed over the veto, to the Secretary of State. The bill for the admission of Nebraska, after being several times discussed, was passed with amendments. The bill for the admission of Colorado was also passed. The bill to amend the organic acts of the several Territories, by prohibiting the denial of civil or political rights on account of color, was passed.

HOUSE.—A resolution was offered declaring, as the imperative duty of Congress, the impeachment of Andrew Johnson, and to secure civil governments for the recent insurgent States by giving the right of franchise to loyal citizens without respect to color. The previous question was called upon its adoption, but it was referred to the Reconstruction Committee. A similar resolution, declaring the impeachment of the President the duty of Congress, was again offered. A resolution to lay it on the table was negatived, and it went over. The action of the Senate on the District suffrage bill was announced. The veto message was taken up, and on the motion to pass the bill the vote was—yeas 113, nays 38. So the veto was vetoed, and the Speaker announced that the bill had become a law. The resolution declaratory of the meaning of the amendment abolishing slavery was taken up and discussed. A substitute in the form of a bill was proposed, making it a penal offence for any one to offer any person for sale within the United States, or who shall make an order for such sale; which was accepted, and the bill was passed. The Senate amendments to the bills fixing the time for the meeting of Congress, and regulating the franchise in the Territories, were passed and go to the President. The bill for the admission of Nebraska was taken up, and an attempt made to pass it under the operation of the previous question, which did not succeed. The Committee of Ways and Means was instructed to inquire into the expediency of so amending the revenue law as to exempt from income tax incomes of \$1,000, and to tax all incomes above that 5 per cent. A resolution was adopted appointing a commission to purchase a site for a building for a post office and United States courts in the city of New York.

THE FREEDMEN.—The grand jury of Calvert Co., Md., have indicted a colored man, named John Lox, for harboring his own children. It appears that in 1865 it was sought, through the Orphan's Court, to get these children apprenticed from their father, who, however, satisfied the court of his ability to support them. On the strength of a former property in John's wife, Dr. James Duke shortly made a second attempt, which succeeded, in spite of the renewed protestation of the father. Lox then appealed to the Criminal Court of Baltimore, and Judge Bond ordered the children delivered to him. Upon this the suit first mentioned was based. Numerous cases like this have occurred in the same vicinity, and the conflict of authorities is very distressing. Indeed, Gen. C. H. Howard reports that it is estimated "there are six hundred cases of unjust apprenticing in Calvert, and almost as many in Anne Arundel."

General Wood reports a general improvement in the relations between employers and employed in Mississippi. The negroes are exposed to much hardship on account of the unfavorable crops, but are preparing to work vigorously during the coming year. The interest in education is growing among both whites and blacks.

Five thousand freedmen have been removed from the District of Columbia during the year, and still some 26,000 remain. The demand for help from the North is greater than the willing supply.—*Nation.*

A HISTORY OF THE RELIGIOUS SOCIETY OF FRIENDS, FROM ITS RISE TO THE YEAR 1828. Volumes III and IV. By SAMUEL M. JARNEY.

The third and fourth volumes of this work have been unavoidably delayed by causes connected with the late civil war. During the five years that have elapsed since the second volume was published, so many changes have taken place that it is deemed expedient to issue a new Prospectus.

The two volumes now proposed to be published contain the history of the Society from the year 1691 to 1828, embracing much original matter that has not appeared in any other history. *Biographical sketches are given of the most prominent members of the Society in Great Britain and America, with many instructive passages from their writings and interesting anecdotes.*

Among the subjects of deep interest treated of in these volumes are: *the perils and preservation of Friends during the Irish Rebellion of 1798; the course they pursued during the war of American Independence; their efforts to civilize the Indians and preserve peace with them; the rise and progress of their testimony against Slavery; their early labors in the cause of Temperance; the Separation in Ireland at the beginning of this century; and the Separation in America in 1827-8, with the causes that led to it, and the results that have followed.*

The cost of paper, printing and binding having greatly increased since the first prospectus was issued, it is found that the work cannot be published, without considerable loss, at the price originally intended. The price will be, therefore, \$2.00 per volume, bound in cloth; and \$3.25 per volume, bound in sheep, library style; but those subscribers under the first prospectus who have taken the first two volumes, will be furnished with the third and fourth volumes at \$2.00 each, bound in sheep.

The first two volumes can be obtained from the publisher or his agents, at \$2.00 each, sheep binding.

Agents are requested to return this prospectus as speedily as possible—as the work is now in press—with full list of names and residences of subscribers, to the author's publisher.

SELECTIONS FROM THE WRITINGS OF JOHN BARCLAY.

(Continued from page 720.)

[In a letter to a Friend, dated from Pool,
3d of Sixth Month, 1820, he writes:—]

I may say that I have never considered it my
place to maintain that station in the world, or
live in that mode of life in which I have
been brought up, however mortifying to poor
self, and contrary to the habits and views of
others. It was one of the earliest convictions
that settled on my mind, when brought under
serious impressions, that I must *come down* and
set an example of moderation and self-denial,
being content with such things as I have; so
that I have been most easy to decline even such
opportunities of advancing my condition, as
others, no doubt may, in many instances,
wisely and rightly seek for and improve.
Some again may throw themselves into exten-
sive channels of usefulness, by increasing their
outward means: I can only say, I am to do
good in another way, if my life be spared. I
have looked, with much solicitude, for best
guidance, in this matter: and the comfort and
peace with which, during my stay here, I have
been wonderfully favored, has been such, as to
enable me at times even to sing for joy. I have
also been greatly broken down, under a sense of
that hand, which is so eminently over me for
good, enabling me to look the greatest of my
difficulties, perplexities, and discouragements
in the face, as it were, with a degree of calm

confidence. My heart and life, and all that I
am and have, are to be surrendered up in such
a way, as may answer the Lord's holy will and
purpose concerning me. On this ground-work,
and on this principle, I have not hesitated
cheerfully to relinquish those views of outward
gain, and habits and station in life, to which my
education tended; but which I have clearly
seen are not exactly such as harmonize with the
Divine intention respecting me, and with that
sphere I should occupy. What I have ex-
pressed herein, is not the feeling of yesterday
or to-day, but gradually confirmed and rooted
in my mind, through much secret conflict, and
a long course of humbling exercises, and such
as some of my sympathizing friends have
been remarkably made sensible of from time to
time.

With much affection, I am thy Friend,
J. B.

To ———.

POOLS, 24th of Sixth month, 1820.

Oh, it is a sweet thing to get into calmness,
—to that spot where all our cares, fears, and
doubts are swallowed up. It is that which our
sickened souls often need as a cordial, to revive
and to recover us from the nausea of this
world's joys and cares. I often feel full occa-
sion to press after a further purification, from
that which yet hangs about me, and which my
spirit loathes: to be released from the bondage
is a great matter, even to come into a degree
of freedom from the workings of evil. I wish

many of our reformers, and some youthful ones especially, knew more of this great work; they would have shone brighter as vessels in the house of the Lord, had they gone through the seventh furnace; they would have taken a better polish, and the dust would not hang upon them, as it now lamentably does. To feel something good visiting us, is one thing;—but patiently to endure all the turnings of the holy Hand upon us, both in breaking down the old nature, and building up the new edifice on the sure foundation, is another matter. I fear too many amongst us content ourselves with knowing but very little of the latter operation; and even when that is partially begun, they are for taking down the scaffolding and boarding in front, in order to show others what is going on.

Since coming here, my mind is more thoroughly set at rest on some points than ever, especially as to the propriety of my not entering into business, a subject which used to harass me much; fearing sometimes, that by this conclusion, I had given occasion for the cause to be evil spoken of, and the testimony of Truth to be let down. Oh, the path is very narrow in many respects, which I have to tread in. I have had glimpses of it for several years; “the pride of life” must be laid low, however mortifying to the poor creature, as well as to those whose eyes are outward. Thou seest how much occasion there is for the help, the secret help, of those who can intercede for me, and sympathize with me; there is that which can preserve on every hand as hitherto it hath marvellously done; and as faithfulness is abode in and watchfulness with patience, who can doubt that the issue of all our movements will, through holy help, be for the honor, and tend to the promotion of the great cause?

[In the Tenth Month of this year, he was married to Georgiana Hill, daughter of Major Hill, of Kingsbridge, Devonshire:—she had joined the Society by conviction.]

1820, *Tenth month 28th*.—Seemed in this short illness to be brought near to the gates of death: many awful reflections arose. I longed exceedingly to become more meet to enter the celestial country: but seemed to myself to have come short of such a state. I have of late seen myself to have been very unwatchful; my zeal for God and devotedness to His cause, very greatly decayed. Oh, how often have my prayers been put up in sincerity to the Father of mercies, for His continued goodness to such an unworthy creature, and for His help against my potent enemy. But it seems as though all was to little or no purpose, and that my soul is sinking fast into the pit of supineness and forgetfulness. This is surely for want of more steady adherence to what is from time to time seen to be right, and required of me. Thus hath weakness crept over me, and great deceptions in

several respects. Oh, how have my idol and my earthly outward delights run away with my heart and affection, so that I forget or omit to lift up my soul as I ought to do, with fervency and frequency of application to the Lord, my Redeemer, who daily loadeth me with benefits. When shall I arise from this dust, in which I am involved? When shall I be aroused from this bed of ease and sluggishness in which I have been reclining: after all that I have seen and known of the Lord's dealings, is this declension to be the consequence? Surely, I had rather die than live, to forget my good God! I believe it would conduce to my comfort to be less fervent in outward though lawful affections, and to be more fervent in spirit; serving and loving my great Master more than any other object, seeking Him more earnestly morning by morning, and oftener than the day lifting up the heart to Him. Earthly blessings should not so occupy the mind, as to draw from the due attention to higher duties and more lasting pleasures.

[To a much valued friend he wrote:—]

PENZANCE, 13th of Third month, 1821.

Often have I thought on thee and thy endearing friendship, as commenced in days that are past, and strengthened in hours that are over and gone, though not soon to be erased; for to those winter-evening opportunities of comfort and favor I enjoyed with thee and others, may I not refer much of the benefit and instructive growth my soul received instrumentally, at that period of my pilgrimage, when it seemed to be a time of espousals, and when it might be said truly, “Thy time was the time of love.” In reverting to such seasons, I have often been sensible of many shortcomings, many wanderings, and much unwatchfulness: and I am sometimes ready to apply to myself the language respecting Israel, “Of old time, I have broken thy yoke, and burst thy bands; and thou saidst, I will not transgress;”—though some consoling hope attends, that the succeeding complaint of degeneracy does not altogether belong to me. To be bowed down under a sense of our infirmities, is profitable to the best, and safe at seasons for all; and whilst we may look upon these dispensations, as some small proof that we are not left without chastisement and fatherly correction, they turn out not unfrequently, to be the forerunners of further displays of mercy, and wholesome preparatives for usefulness and enlargement. We often mar the benefits that are in store for us, and the intended effects of our trials, by too great eagerness for deliverance.

We have great occasion to stay ourselves upon the holy Rock in the day of trial and affliction, having known favors beyond many,—the high hand made bare, and extended renewedly to deliver and protect. That we may attend with

vigilance to the fresh openings of duty in every respect, is my earnest desire, amidst a deep consciousness of much to deplore, as regards want of more steady adherence thereto.

I hear you are richly visited in the ministerial capacity. Oh, it is easy work to love them and their testimony from the very heart, and to be attracted by the sweet influence of that which they live in; but it is hard to labor in the desert for food and raiment, and to have no intermediate helping-hand, to cheer and to animate to constancy and endurance. Oh, the extent of that labor and daily exercise, which I feel needful for myself to be found in, lest my soul loose its hold!

Farewell,

J. B.

To SAMUEL ALEXANDER, of Needham.

CHELTEXHAM, 18th Seventh month, 1822.

We have had an account of the decease of our beloved and valued friend, Charles Parker, —my fellow-traveller, as I may call him, truly in more senses than one; having had, as thou mayst remember, the privilege of his company through Hampshire last autumn: it affected us considerably. Past events connected with him, dear and faithful man, were much revived in my own mind; and I thought much of him on the day of the burial. I bless the Giver of all good that I have sat under his ministry; and I remember that the tenor of it often was,—the shortness and vanity of earthly enjoyments and trials, the certainty and speed of death, and the goodness and grace that visits and would gather all unto God, the eternal excellency. My soul is profitably instructed whilst I write; and that may be the best use of my writing to thee, my dear, valued, and now ancient friend and brother, who hast so often helped me to think of these things; and who, I fully trust and believe, art looking for, and desiring at times the winding up of all things that are transitory and perishable. Oh, that we who are young, may so tread in the footsteps of the path of the just, that we may be prepared to fill up the vacated seats in the militant church of those who are gone before, and who have filled up their measure of enduring. As to my poor self, if anything may be said, it should be but a middling account,—as hitherto, for a long season past; often surrounded with fears and failings, sensible of short comings, and a pensioner on that forbearance and pity, which is not enough (I fear) regarded and remembered. Watchfulness unto that which is good, seems to me the great thing in the work: I am sensible we can thus only walk worthy of our vocation and privileges.

(To be continued.)

It has been the fault of all sects that they have been too anxious to define their religion. They have labored to circumscribe the infinite.

Christianity, as it exists in the mind of the true disciple, is not made up of fragments, of separate ideas, which he can express in detached propositions. It is a vast and ever unfolding whole, pervaded by one spirit, each precept and doctrine deriving its vitality from its union with all. When I see this generous, heavenly doctrine compressed and cramped in human creeds, I feel as I should were I to see screws and chains applied to the countenance and limbs of a noble fellow creature, deforming and destroying one of the most beautiful works of God.—*Channing*.

LETTER FROM LYDIA P. MOTT.

No. IV.

SKANEATELES, 5th month 11th, 1826.

Again and again have I read thy letter with feelings of interest, and at each time have come to the conclusion that the mighty arm is underneath, and that if thy mind continues to place thy trust there, all would be well, whether for life or death; and yet I earnestly desire thou may use every precaution and every remedy thy parents wish thee too; that if the great Head of the Church please they may be blest to thy restoration; that thou might bow thy neck to the yoke and become a burden bearer. He that raised Lazarus is undiminished in power. He that quickened the mind of Lady Guion, and enabled her to be a preacher of righteousness, both in word and act, is unchanged, and can strengthen thy weak frame and nerve both body and mind, if it is His will, and thou becomes as the passive clay. Do not look at the weakness or strength of others, for, as thou observes, the principle is unchanged, let professors do as they may. Lady Guion was a burning and a shining light in her day and among that people; indeed such an one now-a-days would put to the blush some of us who think we have seen far beyond Roman Catholics.

Like her, let us, I with thee, and thou with me, my beloved young friend, not cease striving till we obtain the victory, and know of a truth "that he that overcometh hath a right to the tree of life." It is no marvel that thou looks on the dark side of things sometimes; there is enough to cause thee to; but to dwell too much there disqualifies the mind for the performance of duty, and, of course, weakens instead of strengthening it. And even when we have missed it, and see it, and deplore it, it is unprofitable to keep accusing ourselves; rather let us, as soon as we are favored to see and feel our error, turn to Him who can wash away the stain, with full purpose of heart to do so no more, and then be careful to bring forth works meet for repentance.

How clear is the prophet Ezekiel on this head: "If the unrighteous man turn from his iniquity that he hath done, and do that which

is lawful and right, he shall save his soul alive; all his unrighteousness that he hath done shall not be remembered; but, in the righteousness he doeth he shall live," or words to this effect. How encouraging it is—how consonant with the language of Him who bore our weakness, and said to the erring one that was accused before Him, "Go and sin no more, thy sins be forgiven thee." The manifestation of evil is to lead us to shun it, and to choose the good. The language is, "Choose ye that which is good, and let your soul delight itself in fatness." Strong figurative language; but what so rich to the palate as the consolations of heavenly good to the devoted soul! Thou hast tasted and acknowledged it; pursue it, then, faithfully.

So fare thee well.

Thy friend,

L. P. M.

We have all felt, when looking above us into the atmosphere, that there was an infinity of space which we could not explore.

When I look into Mark's spirit, and see there the gems of an immortal life, I feel more deeply that an infinity lies hid beyond what I see. In the idea of duty, which springs up in every human heart, I discern a law more sacred and boundless than gravitation, which binds the soul to a more glorious universe than that to which attraction binds the body, and which is to endure though the laws of physical nature pass away. Every moral sentiment, every intellectual action, is to me a hint, a prophetic sign, of a spiritual power to be expanded forever; just as a faint ray from a distant star is significant of unimaginable splendor.

"GEORGE FOX."

BY C. H. SPURGEON.

(Continued from page 726.)

There is another respect in which we greatly need to return to the example of George Fox, to whom, with all due deference to your manners and customs, I would most surely take off my hat if I met him, and excuse myself by declaring, "George Fox, I must and will pay you more respect than I do most men, and I will for once even venture on a compliment that is distasteful to you, for I so honor your character." George Fox is to be admired for the sway which conscience had over him in little things. Take that hat matter as an instance. It is not a matter of wonderful consequence after all whether a man takes his hat off or keeps it on, excepting as it may be with him, as it was with Fox, a matter of conscience. If I believe it to be a matter of conscience and principle with me, I am not to ask questions as to how far I shall be obedient to the inward monitor, but must follow it at once in the smallest things, for if I get in the habit of vio-

lating conscience in small things I shall go on to something greater, and so on again till I have no conscience left, or only a conscience that is seared. A child may have an unfortunate propensity to steal some little thing, it may be only an apple; but still, if the parent shall wink at that fault, the child will grow up to be a thief. Your child may tell a story a little differently from the way in which it occurred, and if you do not correct it at once he may turn aside from the truth, till the habit of truth-speaking may be lost. So then, it is not the wearing of the hat or the cutting of the coat in itself that matters; it is not the importance of the thing itself intrinsically, but it involves the whole of obedience to the higher law, or wilful rebellion. If an action is right let it be done, if it be not right let it be avoided, however little or contemptible others may think the case to be. The sway of Fox's conscience is to be seen in the fact of his never inquiring what other people would think of him, but resting in the liberty of the divine presence. Many of us are always inquiring, "What will Mrs. Grundy say?" What will the world think? Hundreds of persons are more influenced by what others do than by any consideration of principle. The tyranny of so-called respectability is terrible. "You know we must keep up an appearance, we must be respectable; where are you if you get out of society?" Did it never strike such people that some of the most respectable people are not respected, and that many of those who are most truly respected, never were what society calls respectable. Better far to be worthy of respect than to be respectable. Thousands of fine ladies and gentlemen are respectable upon somebody else's money. We are told occasionally by poor people as a reason why they are not at our meetings, "Sir, I had not clothes that were fit to come in," and I frequently reply, "If your clothes are paid for they are fit to come in. Never be afraid of coming to worship with God's people whatever your dress may be." The popular fashion of keeping up one's respectability is doing great mischief in this age. It makes people spend more than they ought, and go to a great extent of extravagance when they might be quite as happy and far more useful with a far less expenditure. In fact, we are all spending at a great rate now-a-days compared with the ways of our fathers, and though you, respected friends, do not exceed, and I trust never will, in the fashionableness of your dress, yet you may be too lavish in households, and even the dress may cost as much, I suppose, in one color as in another, and what is given up in color may be taken back in richness of material. Even you may forget the simplicity which cares only for the approbation of God and courts no smile from man! "What will the world say?" Now, it is my firm belief that the question

never once entered George Fox's mind, as to what any body would say about him. "What does God think of me?" was his ruling thought. Am I acting according to the voice of God within my heart? If I am, the unclean may hiss at me, or thrust me into prison, or call me what they will, but it matters not, I shall rest in peace, because my conscience is void of offence; but if all men speak well of me, then shall it be woe unto me if the still small voice within shall tell me that I have not acted rightly in the sight of God. This sway of conscience will enable a man to be singular, when to be singular is to be right. It will give him the noble egotism of Athanasius when he said, "I, Athanasius, against the world." It will make him feel, "If the skies must be upheld by my doing wrong, let them fall; for even to avert the universal wreck, I would not degrade my spirit to unhallowed acts of which my Lord and Master would disapprove." Worthy Fox, thou wast as a brazen pillar, and an iron wall when conscience was concerned.

One of the grandest points in Fox, is his constant recognition of the existence, operation, and indwelling of God. Are we professing Christians sure that we are not infidels: are we certain about it? I am not so sure about many professors. What is God to most men but an abstraction? He is in heaven, and they look up after him, as though he were not here, as though he were not as much down as up. They speak of him as though he filled the heavens and were yonder, and then act as if there was a thick cloud between themselves and him. If there were no God they would not change their lives; they would live as they now do, actuated by the same motives and appetites. But to George Fox, "Our Father who is in heaven" was one near at hand, and the Holy Spirit was one who dwelt in him, and remained with him forever. He did not imagine that God was oblivious of his servants, but he expected that God would speak to him, commune with him, cheer him, guide him, comfort him, chide him, uphold him. He had inward communications from God, in the strength of which he went his way to suffer and to serve with all his heart, and soul, and strength. Do we live precisely in this way? You, venerable friends, who have for years lived in the light of God's countenance, have not even you sometimes to mourn that you do not always feel the presence of the Master, nor walk by the rule of his spirit within you? Shillitoe speaks of being like a cork upon the water, moved by the faintest motion of the Spirit; we are not always just so sensitive, I fear. We grow so great that we are rather like the Great Eastern, and need a huge wave of grace to move us, or otherwise we are insensible of the influence. We do not recognise the present power of God, but Fox did, and his

heart was like the leaf of a sensitive plant, conscious of every heavenly touch. Fearless of man, he yet quaked and trembled before the God of Israel. It would set all right in England, if, through divine grace, "Thou God seest me" were constantly before the eye of every man's mind.

Furthermore, and very briefly, we want in England just now much of Fox's *holy zeal against idolatry and formalism*. There is far more idolatry in England than we dream of. People speak very respectfully about superstitious objects. We have holy buildings and therefore, I suppose, holy mortar, holy stones, holy slates and panes of glass, then there are holy fountains, holy altars, and holy vestments, and all sorts of holy rubbish. Much horror is expressed if you say a word that is not deferential to these objects of superstition. You might almost as soon be excused for thieving as for speaking jocosely of a christening font. When a very sensible gentleman the other day said that when wine was mixed with water it was no longer wine, but negus, he stated but a simple matter of well known fact, but now he appears to be as frightened as though he had set the Thames on fire. He might have said it over and over again and have felt no fear, for it is the truth; wine and water is negus, everybody knows that, and it is as much negus when the priest holds it up in the chalice, as it would be should you drink it out of a tumbler. Wine is wine in one place as much as in another, and negus is negus in each case. If my friend takes that wine and uses it as a token to help him to remember the blood of the Lord Jesus, I am happy that he should derive any good from the symbol; but if he thinks that the wine itself can become the blood of the Lord Jesus, or that it conveys grace to him, then I will sorrowfully use any term of contempt which I can think of to express my horror of his idolatry. We are getting very tender of people's sensibilities now-a-days, so tender, that we let them live in sin and even go to hell without a warning; we are getting so wondrously mild and quiet that one would fancy that truth gave us no pleasure, and error caused us no pain. George Fox was weakened by no such wicked squeamishness. To him a steeple-house was a steeple-house, and nothing more. We must take care that we do not, by our amiable silence, countenance men in their superstitions. We must let them see that we worship God only, and that we have no reverence for their priests and their idols. Of course, if a man chooses to worship Mumbo Jumbo he has a perfect right to do so as far as religious liberty is concerned; but if we should speak deferentially of his idol, and show reverence to his observances, we shall be partakers in his sin, and have fellowship in his idolatry. The same is true of the per-

formances of Popery and Puseyism, they are to excite in us holy zeal and indignation.

One thing more which one admires in this great man's character is his *fearless reliance on the force of truth*. He states a truth boldly, and does not bolster it up with human authorities as though he felt it to be too weak to stand alone. He knew that truth springs fully armed from the mind of God, and is able to fight its own battles. He declared the truth not in gaudy periods draped with rhetorical embellishments, but he let it fall upon the conscience in its simplicity, believing that it would wake an echo there which if it did not bring the man to salvation, would at any rate leave him without excuse. When he had truth committed to his trust he did not cry, "I wish that this little stranger had been left at somebody else's door; I hardly know how I shall bring it up, it is such a poor weak little thing." He did not hide it for three months as the Hebrew mother did with her goodly child, or make for it a little anonymous pamphlet like an ark of bulrushes, into which he put it, and leave it to crocodiles or reviewers, but he owned the truth and was not ashamed to defend its cause. Truth was to him a fire-brand, which he hurled upon the standing corn of the Philistines; He knew that what God gave him to proclaim would win its own way. Certain ministers have got into the habit of always apologizing when they are about to speak. Should God's servants do this? When the ambassadors of the Western powers first resorted to the Court of his Celestial Majesty, the brother of the Sun and the cousin of the Moon, the Emperor of China, they were compelled to go down upon their hands and knees before his Celestial Splendor, till, as the story goes, a bluff English sailor refused the indignity in terms not at all fit for the present company, but quite sufficiently strong at any rate. He would not stoop, not he. The imperial brother of the Sun and cousin of the Moon might dispense with the ambassador's presence if he liked, but he would never go down on his hands and knees to him, and the Chinamen began to think that the English people must be a superior order of barbarians. When a Christian minister, feeling he has something to say, says it, and says it fearlessly, men begin to think there is something in it, but if he commences with apologies, as though he excused himself for uttering his message, his hearers say, "Well, the man has evidently something to say that he is ashamed of, and as he ought to know better than we do, we have no doubt it is a worthless message, and we will give no attention to it." It was never so with Fox. His cry is like that of Peter and John, "Silver and gold have I none, but such as I have give I thee: in the name of Jesus of Nazareth I speak." He had something better than gold and silver to give,

he had the truth of a spiritual religion to declare, and he tells them that it is at their peril that they reject it, and with tearful anxiety he beseeches them to lay hold upon it.

(To be concluded.)

In the commission of evil, fear no man so much as thy own self. Another is but one witness against thee; thou art a thousand. Another thou mayest avoid, but thyself thou canst not. Wickedness is its own punishment.

THE RICH AND THE POOR.

BY R. EDDY.

TEXT—"The rich and the poor meet together; the Lord is the Maker of them all."—PROVERBS. xxii. 2.

Every form of human society with which we are acquainted has in it two distinctly marked characters and conditions of life—the rich and the poor. In many things they present sharp contrasts: leisure, ease, luxury, the portion of the one; driving necessity, toil, pinching want, the master of the other. How wide apart they stand; extremes in society; yet, paradoxical though it may seem, how closely in many things they meet together on a common level! It is of their equality, rather than of their inequality that this discourse will treat, in the hope that the mutual relations of the two classes may be more readily discovered, and their wants and privileges may be more sincerely respected and guarded. They are equal in their birth. Helpless and dependent, they come into the world, the one having no advantage over the other in the necessities of care and protection. Nothing is weaker than a human babe. And whatever independence may be boasted in after years, the rich and the poor are alike at the mercy of others in these days of entire exemption from self-helpfulness.

And when, as intelligence dawns and the power to know, to retain, to classify and to use knowledge is awakened, then, too, the rich and the poor meet together in the conditions of acquiring that which is of mental use. The old adage is a word of wisdom to all learners: "There is no royal road to knowledge." All must run in one direction, subject to one law, who would obtain it. It is not contended that the rich and poor have the same choice of helps and instructors, although our constantly-improving systems of common-school instruction tend to an equality here, at least so far as *offers* of help are concerned, but that they are equal in this, that no outside help can take the place or do the work of personal attention, exertion and study. No money can buy wisdom, no system of instruction can impart knowledge until, by personal efforts, we master the system.

Again, the rich and poor are equal, by virtue of their birth, in the rights of human beings, the right to life, to liberty and to the pursuit

of happiness. They come into being by virtue of one common law; that law, the will of God, and not the creation of man. Distinctions of royal blood and of plebeian blood are wholly of human creation, against the assumptions of which, as history abundantly attests, God has frequently uttered most fearful protests.

Equality in the right to liberty is as real as it is in the right to life. It has the same foundation, man's common origin. On what ground shall I assert my right to liberty that is not also a valid ground for its claim by you, and by every human being? For what, except for crime, shall I deprive you of your liberty, that is not also a sufficient reason for your depriving me of my liberty?

They meet together, also, in the right to the pursuit of happiness. The possibilities of home; of protection in its blessings; of piety; the liberty to worship and serve God; of a voice in the construction and enforcement of the common law of defence and protection; of the use of all the faculties of body and mind—all these are included in the right to the pursuit of happiness. And all men—the rich and the poor—stand on an equality as to this right. Men are often deprived of, restricted, in the use of these rights. But that cannot destroy the right. If it does, then be consistent, and argue against the reality of God's law because men violate that law. Written on the sacred page, it is written also in the human conscience—a Divine reality, full of authority and truth, though the whole world lies in sin. And there, too, equally a reality, is the right of all men to life, liberty and happiness, though man-made caste, brutal selfishness and wicked tyranny may meanly seek to destroy it.

The rich and poor meet together in their temptations. There may seem to be a wide difference, and there is, in the complexion of the incitements to swerve from duty. But the equality consists in this, that each is tempted, and though assailed from widely different points, yet are they one in the fact that they are assailed, and that their honor is tried, and is in danger. "Give me," said Agur, "neither poverty nor riches. Feed me with food convenient for me, lest I be full and deny thee, and say, Who is the Lord! Or lest I be poor and steal, and take the name of my God in vain." Pride, haughtiness, the denial of God, are sins, to the commission of which the rich are tempted. Beyond all question, there is deference paid to wealth by the multitude. In the weakness of human nature it becomes a gratification to the rich to be noticed and honored, and from a complacent reception of this at the first, it is not difficult for him to reach the point where he demands it, and is angry and soured if it is not generally granted. He grows to fancy himself somewhat raised above his fellow men, and

to judge of those around him, not by their merits, but by the length and weight of their purse. From this pride come haughtiness and the meaner displays of selfishness; and at last, feeling that riches have made him independent of men, he fancies that he is also less dependent on God. To be worshipped by men is thought better than to worship God. To go with the multitude of fashion and be an indifferent listener to, or a hypocritical applauder of, sentiments and dogmas which are not believed, is esteemed better than to sit with the common people and be fed with that which satisfies the soul in the lowly temple. Such are the constant, powerful, alluring temptations of the rich. How many, alas! have fallen into the snare which these seductions set, making shipwreck of faith, and piercing themselves with many sorrows.

The poor have their trials. Perhaps we have too little appreciation of the moral influence of poverty. We know how a daily and constant destitution of physical comfort creates desperation that will prompt to the risk of any danger. And when a poor man has once fallen into crime, how difficult it is for him to stem the scorn and hate of men, and come up again to the position of honor and integrity! What wonder, then, that he comes to doubt his fellow-men; also to doubt the providence of God, and goes onward and downward, from bad to worse, till he stumbles into his grave?

There is, thank God, honest poverty. There is, also, noble, manly, generous wealth. Do not understand, me therefore, as laying anything to the charge of either the rich or the poor except this: The duty of coming at once to a consciousness that, though assailed from very different points, an assault of equal violence and persistence is made upon both; that the poor are not more tempted to the sin of stealing, of violence, of impurity of life, and of profanity than are the rich tempted to the sin of pride, haughtiness, and forgetfulness of God.

The rich and poor meet together in their necessities. These may be grouped thus: the growth and health of the body, the use of reason, the demands of justice and right, the repose of the soul in God. If the poor, on account of his deprivations and exposures, is liable to disease, no less is the rich made liable by his excesses and luxuries. If reason must be trained to grapple with and wield the vast resources of wealth, no less must it direct the economies of poverty. If the property of the one demands just laws and an enlightened public conscience, no less will the personal security and defence of the other appeal for the supremacy of that which is right and true. If the soul of the one demands such a faith in God as shall sustain and keep it when the woes come which wealth cannot avert, and the

shadow of death which no gold can shut out of our homes falls upon his hearthstone, no less does the stricken and oppressed spirit of the other cry out for the living God, and long to rest in unshaken confidence in a loving Father.

They meet together in their death. Alike unavailing the enticements of luxury and the anxieties of poverty to turn aside the dart of the destroyer. A narrow coffin, or a coarse winding sheet—and it matters not how costly the one, nor how frail the other—a small spot of earth in which we may go to decay, these are alike for all. The wicked cease from troubling and the weary are at rest, as they sleep together in the grave. Oh! pride and haughtiness, see here your end. Oh! struggling, doubting, fearful poverty, here is your goal!

They meet together in the world immortal. Nothing external to either, neither the estate, pomp, luxury of the one, nor the destitution and pinching want of the other, can attach to the spirit as it stands disembodied in the world above. Only that which inheres in character will go with us there. In the presence of God and before the tribunal of our own conscience, we shall stand stripped of all disguise. The rich man's pride will then be seen to have been his hindrance; the poor man's doubt and contempt will be acknowledged as his sin. Faith, hope, love, will be recognized as the only enduring riches, and rich and poor will be known only by their possession or lack of these.

This theme is dwelt upon in this opening service of the New Year to suggest to us this lesson, that we all have so much in common, we should all have respect for and interest in each other. We desire happiness. How shall we find it, but in seeking the good of others, respecting their rights, helping them in their difficulties, ministering to their real wants? Let not the rich despise the poor. Let not the poor envy the rich. "Bear ye one another's burdens, and so fulfil the law of love." —*The Press*.

FRIENDS' INTELLIGENCER.

PHILADELPHIA, FIRST MONTH 26, 1867.

The subject of funerals, as treated in the editorial of *Friends' Review* of the 12th inst., must, we think, be one of interest to all who are concerned for the maintenance of order and the promotion of Truth. The following remarks upon the teachings attendant upon the removal of loved ones from earth, and the causes by which the solemnity of the occasion is frequently interrupted, are just and appropriate.

"Solemn, indeed, are such assemblages, and it is proper that they should be conducted in quiet order with reverent humility, with the remembrance that

there is, and can be, nothing for flesh to glory in, and that we are standing upon the verge of an unseen eternal world, to which we are daily hastening, and the concerns of which are of unspeakable importance to us."

"We have for years felt a painful consciousness that, in many cases, the profitableness and the religious character of funerals are, to say the least, greatly diminished, in consequence of the inadequate accommodation for the guests who are thus brought together. A person widely known and greatly beloved is, let us suppose, to be buried from a house of limited dimensions; the apartments are small and distant from each other. This prevents the whole company from sitting together in serious sympathy; indeed it often occurs that large numbers are compelled to remain outside of the house, even in inclement weather. Consequent upon this is the habit of many, of coming irregularly, some not arriving till the time of departure, and the whole hour allotted to the solemnity is interrupted and unsettled. It not unfrequently occurs that, while the relatives sit by themselves in an upper room, indifferent conversation is kept up in other apartments, which is jarring to the feelings of those who desire that introversion of mind in which they might receive the lesson of the teaching event."

To obviate the difficulties enumerated, the editorial suggests that, in cases where the company is likely to be larger than the dwelling can accommodate, that funerals should meet at the meeting-house; and proposes that where burying grounds are located in the outskirts of cities that buildings should be erected for the accommodation of funerals. A concern similar to this has for years been felt among us.

In a number of instances in which funerals have met at the meeting-house at the corner of Fourth and Green Streets, in this city, the advantages have been apparent. The solemnity and quiet which have prevailed have been very satisfactory. In some country neighborhoods it is a common practice to assemble, on such occasions, at the meeting-house, instead of meeting at the residence of the deceased.

A few weeks since, at Plymouth, there were three coffins with their lifeless occupants in the meeting-house at one time. It was a very touching scene, and the large gathering of people present seemed deeply impressed with the solemnity of the occasion. We believe earnest desires were awakened to be found in the right occupancy of the precious gift of life, so that no vain regrets may cloud its closing hour; but that in the rendition of stewardship, there may be heard the welcome sentence, "Well done, good and faithful servant, enter thou into the joy of thy Lord."

Allusion is also made to the expense of car

riages, which is often "exceedingly onerous to persons in restricted circumstances; and in many instances a serious inconvenience to families whom death has left nearly destitute."

Another reason for the discontinuance of the practice of the company generally going to the ground is, that by doing so the feelings of solemnity which may have covered the mind are liable to be dissipated in many cases, by a disposition to enter into social conversation during a ride of several miles.

In connection with this part of the subject we feel we may with propriety bring into notice the example of our valued friend Joseph Warner, whose life was rendered eminent by sound judgment and strict integrity. He felt the matter to be of sufficient importance to leave a written request, that not more than one carriage should follow the hearse that bore his remains to the grave.

In an address of Green Street Monthly Meeting to its members, Friends are advised to consider the services at a funeral closed at the house, so that a needless expense of carriages may be avoided.

We hope that this view may obtain more generally than has yet been the case, as we believe it to be entirely consistent with the testimony to moderation which Friends should bear on all occasions.

We direct the kindly notice of Friends to the appeal of "Friends Association for the aid and elevation of the Freedmen," for "garden seeds" in order to supply a want which is seriously felt in the different places where teachers employed by the Association are located; and particular attention should be paid to the request to forward the seeds as soon as practicable, on account of the season being several weeks earlier than ours.

DIED, at Woodbury, N. J., on First-day, 13th of First month, 1867, AARON PARSONS, aged 88 years; a member of Woodbury Monthly Meeting.

—, on First month 16th, 1867, in Philadelphia, HARRIET J., infant daughter of Uriah B. and Harriet H. J. Kirk, aged 5 months.

—, on First month 17th, 1867, in Philadelphia, at the residence of her son, Julien Shoemaker, RACHEL SHOEMAKER, in her 71st year.

—, at her residence in Baltimore, on the 19th of Twelfth month, 1866, DIANA BROWN, youngest daughter of the late Uriah and Mary Brown, a member of Baltimore Monthly Meeting. If gentleness, unobtrusive benevolence and humility give evidence

of an humble follower of Jesus Christ, then we may safely hope she was one; and the patience, meekness and love, which accompanied her closing days, may, we trust, be accepted as a confirmation of the truth, that the crown of the faithful believer is quietness and assurance forever.

WANTED,

By the Association of Friends of New York for Relief of Freedmen, a teacher for a school in Maryland. Address, JACOB CAPRON,

1172 Broadway, New York.

1st mo. 12, 1867—tf.

SEEDS FOR FREEDMEN.

We make an appeal to our country Friends for all kinds of garden seeds suitable for small patches of ground. As the season South is several weeks in advance of ours, it is desirable that they should be forwarded as early as practicable to HENRY M. LAING, No. 30 N. Third St., Philadelphia.

By direction and on behalf of Friends' Association for the Aid and Elevation of the Freedmen.

JACOB M. ELLIS, Clerk.

A friend has kindly furnished us with the accompanying account of the *Meetings for Conversation and Reading the Discipline* recently held at Race St Meeting House, Philadelphia.

The Third meeting of the season was held on the 26th of Twelfth month last. The meeting was opened by reading a portion of the 10th chapter of Matthew, after which the Minutes of the previous meeting were read, and the consideration of our testimony concerning the ministry was resumed.

It was remarked that the Society of Friends was founded upon the most democratic principles; and that with the acknowledgement of the equal right of all to participate in the affairs of the church, came a corresponding responsibility to seek for a qualification to be useful to each other in all its services. If this were more the case, it is believed that a greater number of our members would feel called upon to express themselves in our religious meetings.

The query was put, whether "recommending" ministers, as it is called, by setting up a class, who come to be regarded as, in some sense, distinct from the body, has not a tendency to magnify the office, and to discourage thoughtful and serious minds from exercising their spiritual gifts to the edification of their Friends. On the other hand, the practice of accrediting those among us who by life and conversation are deemed worthy to stand for the cause and testimony, by suitable testimonials, was acknowledged to be a great strength to many of these, and to open the way for their labors to be profitably extended.

A friend who was with us from a distance gave an interesting sketch of the history of the human mind, in its efforts to rise above spiritual thralldom, till the time when George Fox called men to the spirituality of the Christian

Dispensation, and tracing his influence upon religious thought, showed that its effect has been to lead Protestant sects to regard their ordinances and forms of worship more and more as shadows and types of a higher spiritual communion.

After much interesting expression, showing various phases of thought and sentiment, the meeting closed with an impressive appeal to all to be faithful to every intimation of duty, thus seeking a qualification to raise the standard of truth in the several neighborhoods in which we may be situated.

1st month 9th, 1867.—The meeting was opened by reading a portion of Scripture from the 4th chapter of John, detailing the conversation of Jesus with the woman of Samaria; after which the proceedings of the previous meeting were read, and also that clause of our Discipline under the head of Meetings for Worship.

As the important subject of Divine Worship was one which had claimed the attention of every serious mind, it was thought preferable to hear the remarks which Friends might have to make in relation to it, rather than to read what has been written by our approved authors. Several friends gave their views of what constituted true Spiritual Worship; and while there was a general correspondence of opinion that the form adopted by Friends was the one best calculated to prepare the mind for communion with the Father of Spirits, the fact was adverted to that a considerable number of our meetings were on the decline. It was stated that many of our young people had become indifferent in the regular attendance of them, and this led to an inquiry into the cause, and also whether some means could not be adopted to render them more attractive. In many of these meetings there is no vocal ministry, and there does not appear to be that lively interest maintained by the members which would promote each other's spiritual welfare. The social element, which is so essential to be cultivated in a well-ordered religious community, is too often neglected, the members becoming isolated, and, therefore, selfish and indifferent. To remedy this apparent declension, it was thought that the Society should be doing more to interest the younger members—to bring them together on other occasions than religious meetings—to associate them in works of benevolence and of self-improvement. The education of the young under the guardianship of the Society was adverted to as a means of promoting its continuance and growth, and the great neglect of this important interest one of the chief causes of weakness. The strongest motive, however, for the attendance of our religious meetings must be found in the grateful sense of our obligations to the Giver of every good gift, and a desire to acknowledge this and to

realize that communion of Spirit which constitutes true worship. It is believed that many children to whom religious meetings are irksome, by being brought into the habit of attending them, will learn to understand their meaning, and, ultimately, to experience their advantages. This is especially the case if they see in those who are regular in their attendance a corresponding evidence of their love to their fellow-creatures—the badge of true discipleship.

The question how far we may, by an effort of the will, attain to the state of mind in which we can perform true worship, led to some expression. While some regard this solemn act as arising only from a special dispensation of Divine favor, the view was expressed that we should not neglect to cultivate our spiritual capacities in the earnest desire for the attainment of that communion of spirit which is promised to all earnest seekers.

This was the largest meeting of the kind yet held the present season; the discussions were participated in by a considerable number of those assembled, and an earnest feeling pervaded the proceedings.

A FREEDMAN'S SPEECH.

In a letter from Yorktown, Va., dated 12th month 15, 1866, Jacob H. Vining, superintendent of Friends' Freedman's schools, writes.

"I enclose the substance of a speech made by Bayley Wyat, a colored man, living near here. It was delivered at a mass meeting of colored freedman held in our large school-house. The meeting was called at the close of one held the preceding evening by the Freedman's Bureau on the subject of removing the camps. The former meeting was addressed by General Armstrong, Lieutenant Massey and myself, advising them to seek homes in the adjoining counties and elsewhere; the latter meeting was held to consider of and reply to our advice. I was present by special invitation, heard their deliberations, and felt that their arguments were unanswerable. I think I never heard more touching eloquence than that which characterized this simple speech."

BAYLEY WYAT'S SPEECH.

Taking notice of the address the gemmen gave us last night concerning leavin' the camps in which we are now settled, and thrown back to the adjoining counties where we came from, it seems that it had been told the gemmen that if we would go back to the counties we came from, we should be taken care of as well as in the place where we are now located. But we have full satisfaction, if we turns back to them counties or the lands we came from, under the present situation of the rebels and the unsettled situation of the United States, we shall be forebber made bewers of wood and drawers of water.

But when we looks back and sees our former state, when education was kept from us; and though

we was made like men by God as other men, we was kept in bondage—we made bricks without straw under old Pharo; and you all 'members de home house and de wife house, how de wife house was often eight or ten miles from de home house, and we would go there Saturday night expectin' to see de wife we had left and she would be gone?—sent down South, nebber to come back, and de little cabin shut up and desolate—den' we would fold our arms and cry, "O Lord, how long?" and dat was all we could say. And we was not able to own even our names, as men among other men. For this cause we now looks on our present situation, and we believes it is by de overrulin' providence of God, and not of men, that we enjoys freedom—that we are placed in this most pleasant situation.

And we first thanks God for this great blessin' we now has; second we thanks our friends from the North for the great sacrifice which dey have made for our benefection; and we feels so well satisfied that we has God on our side—that we has some friends that, through God's assistance, will intercede for us and assist us, yet wishes to be all the aid we can be to the United States as men.

And as to our dear friends, de Quakers to de North, we does consider dem our best earthly friends, for de great sacrifice dey has made and is making for us; we does tank dem most kindly; and as to de great North, for de sacrifice of treasures, of lives and of blood, we can now consider dem our affectionate friends, and we heartily tank dem.

We now, as a people, desires to be elevated, and we desires to do all we can to be educated, and we hope our friends will aid us all dey can.

As to our going back to the counties we came from and to de rebels again, we knows for de truth, by thousands of witnesses, the sight of the darkies who left the rebels in the time of war is now as a dose of pizen in their eyes, because we left the rebels and went to the Yankees.

We now feels unprotected against the rebels, and we feels unprotected wid dem; and though de rebels have and do scoff us for calling de North our friends, we hope we shall nebber lose our confidence in dem—I mean our friends in the North.

Oh, most respectable Friends of de North, please consider our interests; we feels sometimes as if our welfare in dis life depends on you.

I may state to all our friends, and to all our enemies, that we has a right to the land where we are now located. For why? I tell you. Our wives, our children, our husbands, has been sold over and over again to purchase the lands we now locate upon; for that reason we have a divine right to the land.

Den again, the United States, by deir officers, told us if we would leave the rebs and come to de Yankees and help de Government, we should have de land where dey put us as long as we live; and dey told us dat we should be see'd after and cared for by de Government, and placed in a position to become men among men. And the Government farder promised to protect us from de rebels as long as we lived, and we sacrificed all we had, and left the rebels and came to de Yankees. Some of us had some money to buy our freedom, and some of us had a house, and some of us had cattle with which we hoped sometimes to buy ourselves; but we left all depending on the promises of de Yankees.

Dey told us dese lands was 'fiscated from the rebs, who was fightin' de United States to keep us in slavery and destroy the Government. De Yankee officers say to us: "Now, dear friends, colored men, come and go with us; we will gain de victory, and

by the proclamation of the President you have your freedom, and you shall have the "fiscated lands." And now we feels disappointed dat dey has not kept deir promise. O, educated men! men of principle, men of honor, as we once considered you was! Now we don't seem to know what to consider, for de great confidence we had seems to be shaken, for now we has orders to leave these lands by the superintendent of the bureau. We was first ordered to pay rent, and we paid the rent; now we has orders to leave or have our log cabins torn down over our heads. Dey say, "De lands has been 'stored to de old owners, and dey must have it." And now where shall we go? Shall we go into the streets, or into the woods, or into the river? We has nowhere to go! and we now wants to know what we can do.

I is not here to ask de Government to help me nor my family. I has never asked any help from de Government nor from friends, and I never has received any. I has got a living by honest hard work since I came to the Yankees, and I has saved something besides. I owes no man anything; but my people cannot all do this. Dey has been bought and sold like horses; dey has been kept in ignorance; dey has been sold for lands, for horses, for carriages, and for everything their old masters had. I want some gemmen to tell me of one thing that our people hasn't been sold to buy for deir owners.

And den didn't we clear the lands and raise de crops of corn, ob cotton, ob tobacco, ob rice, ob sugar, ob everything? And den didn't dem large cities in de North grow up on de cotton and de sugars and de rice dat we made? Yes! I appeal to de South and to the North if I hasn't spoken de words of truth.

I say dey has grown rich and my people is poor. We lives in slab cabins, on ground for floor, and many of us has not food, and we goes ragged and most naked.

God heard our groans. He saw our afflictions, and he came down and delivered us; but anudder king is now risen—Anly Johnson! I will not call him king or President; he is not our friend; he has forgotten the afflictions of Joseph, if he ever knowed them, and we are now turned back to the old task-masters. Our cabins are threatened to be torned down over our heads if we do not go, and we must be drove about from place to place, and chased as hounds chase rabbits. And we must go; and I ask again where shall we go, and who shall we trust?

ON THE EDUCATION OF GIRLS.

Mr. Solly, F.R.S., F.R.C.S., Surg. St. Thomas's Hosp, Lond., says, speaking of the education of girls:—"As an old physiologist I wish to give my opinion. I am quite certain that there would be less illness amongst the upper classes if their brains were more regularly and systematically worked." Again, Dr. Aldis, of London, says:—"I am perfectly convinced, as the result of many years' practice, that whatever tends to develop the minds of women will have the best effect on their moral and physical as well as intellectual health." Dr. Hufeland, in a work edited by Dr. Erasmus Wilson, F.R.S., says:—"It was the first and unalterable destiny of man, that he should earn his bread by the sweat of his brow. He who eats without labor will never thrive. We shall find that no idler ever attained to a great age; and that those who

have been distinguished for their longevity were all men whose lives had been extremely active and laborious. But mental idleness is hurtful as well as bodily, because it produces languor. What do we remark in a man who is subject to languor? He begins to yawn; this already betrays that the passage of the blood through the lungs is interrupted. The power of the heart and vessels suffers of course, and becomes too torpid. If the evil continues longer, accumulations and stoppages of the blood take place. The organs of digestion acquire a tendency to weakness . . . all the functions are weakened and deranged. A state which disturbs the most important functions of the body, and which enfeebles the noblest powers, is a shortener of life. But I think I hear one ask, what is the best remedy for languor? It accompanies us to the ball, to the playhouse, the tea table, in our walks, In answer, there is only one, but not a very agreeable remedy for it, and that is, regular occupation." Again, to quote from Dr. Spencer Thompson: "How common is etiolation, or blanching, caused by town life; this, as Dr. James Johnson traces, is indicative, in the higher classes, of no avocation, in the middle and lower, of unhealthy avocation. No avocation and unhealthy avocation! the one with its ennui, its indulgences, and its excitements; the other with its over-work and anxieties, and its excitements." Dr. Leared, M. D., Oxon. and Lond., when speaking of the injury to the digestive organs caused by luxurious habits, writes thus:—"Idleness, and the want of a definite pursuit in life, must rank high in this class of causes." Unfortunately doctors are sometimes too busy, or too inconsiderate, to give the whole of this subject the careful investigation it deserves. They find a child feverish and excitable, and they say, Stop the lessons. But a little knowledge is a dangerous thing, and if these doctors knew more, they would find that various causes are capable of producing the same result. The strange and remarkable adventures of "Lydia Languish" may be the cause of a nervous fatigue, commonly supposed to be produced by the intensely exciting nature of French verbs or the history of England. Should the doctor, misled by the accounts given of the number of hours spent in work, prescribe absolute rest, the evil will of course be aggravated, for it is just as impossible for the brain of a child to remain inactive, as it is for any other part of its body. If a child be not occupied in healthy work, it will find some other. Exciting day-dreams and sensational novels will take the place of grammar and history; juvenile balls, of wholesome exercise.—*Fraser's Magazine*.

TRUTH challenges light; it is error that loves darkness and concealment.

FOR LITTLE CHILDREN.

"THOU GOD SEEST ME."

Through all the busy daylight,
Through all the quiet night,—
Whether the stars are in the sky,
Or the sun is shining bright—
In the nursery, in the parlor,
In the street, or on the stair,—
Though I may seem to be alone,
Yet God is always there.
He knows each word I mean to speak
Before the word is spoken;
He knows the thoughts within my heart,
Although I give no token.
Whatever I may do, wherever I may be,
Although I see Him not, yet He sees me.

SNOW BIRDS.

The tanager and oriole
Are birds of finest feather,
And their sweet songs delight the soul
In sunshine summer weather;
But they have flown away with hosts
Of other swift or slow birds,
And hither now from polar coasts
Fly flocks of merry snow birds.

The blackbird and the bobolink,
The pewee and the swallow,
From Winter's withering breath, too, shrink,
And Summer's foot-steps follow.
In the crisp meads and bleak, bare trees,
I find but few or no birds
Save those that love the chilly breeze,
The lightsome little snow birds.

The brooding wren her wooden house
Has long ago left lonely;
In many a home on wild-wood boughs
There nestle dry leaves only;
But Winter, who drives birds away,
Would on us vain bestow birds,
To soothe the rigor of his sway,—
So sends the twittering snow birds.

The robin's with us yet, I know,
The chickadee and blue bird,
And so, too, is the sable crow,
Through every change a true bird;
But Winter is no friend of theirs,
No good these rude airs blow birds,
They seem to think; and not one shares
The joyance of the snow birds.

When all the air is dark and drear,
And clouds o'er heaven are flying,
And wailing winds we, shivering, hear
The tempest prophesying;
Like jolly sprites, in garments gray,
Lo! sudden come and go birds;
We look around, and sigh, and say,
" 'Twill snow, for there are snow birds!"

'Tis true, they oft are harbingers
Of rough and stormy weather;
But joy, not grief, my spirit stirs,
To see them sport together.
Methinks they're for our solace sent,
And counsel, too, although birds,
For who on dark days teach content
So well as do the snow birds?

The snow, by many signs foretold,
Now fast, at last, is falling;
The lone lost winds, growing bitter cold,
With muffled voices calling.

Oh! how will now those revellers fare?
No ruth the frost imps show birds;
Vain fear! they for no shelter care,
The tiny stoic snow birds.

For they were cradled in the storm;
Their mates were icy breezes;
Their good gray coats will keep them warm,
Whatever round them freezes.
Ah! let us pray that one above,
As we are not below birds,
Will guard us with His heavenly love,
Ev'n as He guards the snow birds!

From the Economist.

SOUTH AMERICAN MEAT.

The question of meat supplies becomes so pressing, and the price of those which are accessible rises so rapidly, that we cannot wonder at the formation of more than one company to utilise the flesh of the South American cattle that have hitherto been slaughtered for their hides alone. A report has been made to the Foreign Office on three methods adopted by as many companies, and we propose to summarise these methods for our readers. Mr. Ford, the writer of the report, says that the superabundance of meat produced in the rich pasture lands watered by the River Plate and its tributaries is such that even now first-rate joints are sold at Buenos Ayres by the piece and not by weight, a leg of mutton costing 10d or 1s, and beef being comparatively cheaper. From the number of hides and the amount of wool exported last year, he calculates that there must be a stock of twenty-two million cattle and thirty-five million sheep in the countries bordering the River Plate, and of this stock about 12 per cent. is slaughtered yearly. If any use has been made of the meat it has been by the conversion of it into jerked beef or "charqué." Much of this is exported to Brazil and Havana, is the staple food of the negroes, and is a great favorite. But whether it was improperly prepared, or naturally distasteful to Europeans, the charqué that was sent to England was ill received, and all attempts to introduce it proved a failure. Mr. Ford understands that if it had been shipped in a wet state and well stowed it would have been perfectly sound on its arrival. He admits, however, that cheap and wholesome as it may be, its mode of preparation deprives it of much nutritive property. The meat is cut into thin slices, immersed in strong brine, and laid down in salt for two days; but one of the results of this is that the brine absorbs much nutriment, and by the time the salt has penetrated to the centre of the slice the outward parts are almost destroyed by excess of salting. The processes which have succeeded to this are those of Mr. John Morgan, Baron Liebig, and Messrs. Paris and Sloper, and each one in its way has proved more or less successful.

Mr. Morgan's process, which has been patent-

ed and is worked by a company, is based on forced infiltration and is extremely simple. It acts by the adoption of the circulatory system as a means for introducing brine into the tissues, and in this way it demands little labor and inexpensive machinery. "The animal, if a sheep, is killed by a blow on the head; if an ox, by the insertion of the point of a knife at the back of the head, which severs the spinal cord and causes instantaneous death. The chest is then sawn open, and kept so by a cross-piece of wood, and the heart is exposed. An incision is made in the right ventricle and another in the left, the blood being allowed to escape; when it has ceased flowing, a pipe with a stopcock is introduced into the incision in the left ventricle of the heart, and so into the aorta or great vessel leading through the body, and is there firmly retained. This pipe is connected by a gutta percha flexible tube to a barrel containing the fluid to be injected, which is composed of water and salt (one gallon of brine to the cwt) and a quarter to half a pound of nitre, carefully refined, and fixed at an altitude of from 18 to 20 feet. The briny fluid being let on rushes out at the right side of the heart, after traversing all the circulatory organs, clearing the vessels and capillaries, and preparing the body for the second stage, which is performed by closing the incision in the right side of the heart with a sliding forceps, and thereby rendering the circulatory system perfect, with the vessels free and ready to receive the preservative fluid. A few seconds suffice for the brine to infuse the whole body, when by cutting the ear or hoof of the animal, a stream of clear pure brine, untainted by a single particle of blood, will instantly be seen to flow." An ox can be preserved in ten minutes, and a sheep in less time, while by mixing phosphoric acid in the fluid to be injected, antiscorbutics can be added to the flesh, while the natural juices are retained. Operations were commenced in the month of May last year, and since then 500,000 lbs have been shipped to Liverpool, being sold at 4d a lb, and eagerly purchased. Still it is reckoned that at present this price is barely remunerative, owing to the heavy expenses attendant on the establishment of a new business. A suggestion has, however, been made by the local manager of having vessels fitted up for the express purpose of meat transport, so as to save the barrels which now form the heaviest item. If this is done, and the working placed on a sound basis, it is thought the present price will leave a fair profit.

Baron Liebig's process differs from that of Mr. Morgan, as the meat instead of being preserved whole is reduced to an essence. After the animal has been killed, the flesh is left to cool for twenty-four hours; it is then placed

round iron rollers with points inside, in which are turned by steam, and reduce the meat to a pulp. The pulp is thrown into a large vat of water and steamed for an hour. It is then passed into a trough shaped reservoir with a sieve at the bottom, and the gravy oozes through this into another vat, where the fat is drawn off. Now the pure gravy is put in open vats supplied with steam pipes and with bellows on the surface, which produce a blast so as to assist evaporation and prevent condensation. After six or eight hours of this process the stuff is passed into a filtering vat, out of which it emerges in the form of extract of meat, and is ready to be packed in tins. It partially hardens when cool, but is still in too fluid a state to be used except as stock. But as stock it has peculiar excellence: the bulk is small, which adapts it for military or naval use; and its purity and absence from grease fit it for hospitals or invalids. Its strength may be estimated from the fact that 33 lbs of meat form 1 lb of essence, and 1 lb of essence will make soup for 128 men. Eight small tins hold the concentrated alimentary matter of an entire ox, and will make more than 1,000 basins of good strong soup. A tin containing 1 lb of the essence can be sold for 12s. 6d. in London, and we may add from our own experience is sold for 18s.

The remaining process is that of Messrs. Paris and Sloper, by which the meat is to arrive in England in the exact condition of fresh killed butcher's meat, and at a price which would make an English butcher kill himself. The method adopted is the destruction of oxygen in the vessel where the meat is packed; all bone is extracted from the meat, but the fat is left. "From the tins in which it is placed the air is exhausted by means of water forced in at the bottom, which, when it reaches the top, is allowed to redescend and run off, and the vacuum thus left is filled from above by a certain gas, the composition of which is kept a profound secret. The two holes at top and bottom are carefully soldered down, and the meat is then ready for exportation. The only risk it runs is from leakage, the smallest opening in the tin case proving destructive, by allowing the gas to escape and the air to get in." Samples of beef thus preserved were taken out from England, and on being tasted by members of the Argentine Government were declared quite the same as freshly killed meat. A dinner was also given in London the other day with much the same result. And as this meat too is to be sold at 4d. to 5d. per lb, the effect of throwing open such a market to the English poor will be inappreciable. Each of the processes seem to have its peculiar advantages, each being addressed to one class more than another. Of course Baron Liebig's

process has its especial public, while the methods of Mr. Morgan and Messrs. Paris and Sloper are more fit for the general community. But the want of invalids and armies on the march is for something strong and portable, and with the existing scarcity of food it is not easy to provide what is comparatively a luxury, though to those who use it it is a necessity. Meat itself we fear threatens to become a luxury where it has been a necessity, and it will soon be impossible to keep up the proper supply of food for all classes, if even those who are in comfortable circumstances have to expect a deficiency. If the process of Messrs. Paris and Sloper succeeds there can be little doubt that some reduction in price may be forced upon our butchers. It has been shown that their gains must have been enormous ever since the outbreak of the cattle plague; and if wholesome, palatable meat can be brought into competition, they must choose between losing custom and abating their profits. Mr. Morgan's process will be of use to many who now have to forego meat from reluctance or inability to pay the price demanded. But corn beef would not drive butchers' meat out of the field, and while butchers' meat has an undisturbed monopoly we are necessarily in the hands of the butchers. We may look to the South American market as giving us a chance of rescue from our tradesmen, and as opening up a prospect of food for our poorer classes.

LINKS IN THE CHAIN.

The blast that drove the storm clouds across the heavens shook the oak, and the acorn cup, loosened from its fruit, fell on the pathway.

A cloud burst; a rain drop filled the acorn cup.

A robin wearied by the sultry heat of an autumn day, and troubled by the fury of the storm, hopped on the path when all was calm, and drank of the rain-drop. Refreshed and gladdened he flew to his accustomed place in the ivy that overhung the poet's window, and there he trilled his sweetest, happiest song.

The poet heard, and rising from his reverie, wrote a chant of graceful rejoicing. The chant went forth into the world, and entered the house of sorrow and uttered its heartstirring accents by the couch of sickness. The sorrowful were comforted, the sick were cheered.

Many voices praised the poet. He said: "The chant was inspired by the robin's song."

"I owe my song to the rain-drop," said the robin.

"I should have sunk into the earth, had not the acorn-cup received me," said the rain-drop.

"I had not been there to receive you, but for the angry blast," said the acorn cup.

And so they that were comforted praised the blast; but the blast replied, "Praise Him at

whose word the stormy wind ariseth, and who from darkness can bring light, making His mercies oftentimes to pass through unseen, unknown, and unsuspected channels, and bringing, in due time, by his way, the grateful chant from the angry storm cloud."

From The New York Evening Post.

PNEUMATIC RAILWAYS.

About fifty-four years ago a Mr. Medhurst, of England, proposed that a brick tunnel should be built, and applied to the conveyance of passengers at a speed only dreamed of before. Within the tunnel rails were to be laid, and on these rails a suitable vehicle was to travel. At the rear of the carriage a piston, so to speak, properly framed, would have been affixed. This piston would have nearly filled the tunnel. The carriage and piston thus provided and put in place within the tube, air was to be forced in behind by means of a large pumping apparatus. The pressure of the air, it was thought, would propel the carriage, with its load of passengers, at very high speed. Mr. Medhurst, unfortunately, lived before his time. It is easy to see, however, that his was no ordinary mind.

After Medhurst came Vallaire and Pinkus, who proposed certain alterations, the principal idea being the reduction of the size of the tube, the alteration of its position by placing it between the rails and below the floor, and the exhaustion of the air in front of the piston instead of its compression within the space behind; but this last had already been proposed by Medhurst, who seems to have left scarcely a point overlooked.

In the pneumatic dispatch we find on a small scale all that Medhurst proposed, and there can be no doubt, from the success which has already attended upon the labors of the company known by the same name, that the system can be extended to the conveyance of passengers without any practical difficulty whatever.

Mr. Rammel, the inventor of the pneumatic dispatch scheme, has erected at the London Crystal Palace a model line, the first on which regular passengers have been conveyed. The tube extends from the Sydenham entrance to the armory, near Penzance, a distance of about a quarter of a mile. It is, in fact, a simple brick tunnel, nine feet high and eight feet wide. A fan, twenty feet in diameter, is used to exhaust and force in the air. Perhaps it would be impossible to devise any other expedient so well calculated to answer the required purpose.

A very small part of the line, if any, is level, but it has a gradient of one in fifteen—an incline which no engineer would construct on an ordinary railway—and as it is not a level line, so it is not a straight one, for it has curves of eight chains radius, which are shorter than those found in existing railways. The entire distance,

six hundred yards, is traversed in about fifty seconds. The motion is easy and pleasant, and the ventilation ample, without being in any way excessive. All the mechanical arrangements are so obvious and so simple, that it is unnecessary to dwell upon them.

With a view to relieve Broadway from the excess of travel that encumbers it, Colonel M. O. Davidson, a civil engineer of repute, after visiting and examining the European works, has prepared plans, which have been submitted to the Senate Committee for the relief of Broadway.

In their general scope the plans contemplate the union of the cities of New York, Brooklyn and Jersey City, by a railway under and across the North and East rivers, in tubes sufficiently large to admit railway carriages of the ordinary size, and to be worked by pneumatic power, generated by stationary engines, erected at suitable points, operating upon the trains to be moved with an air pressure of from three to seven ounces per square inch. The lines uniting the three cities will form a junction near the City Hall, and may be extended northwardly by any convenient route to the Harlem river.

In case the works designed should be constructed, it will have the effect of uniting the whole system of southern and western railway traffic with that of the northern and eastern system, without unloading; it will at the same time provide for millions of passengers moving longitudinally upon the island.

The Treasurer of Friends' Association for the Aid and Elevation of the Freedmen has received the following amounts since last report:—

The decision of the United States Supreme Court in the test oath cases was announced on the 14th inst. The Court decided the test oath unconstitutional, being in the nature of punishment without trial, and in its character *ex-post facto* and as a bill of attainder. That as the statute imposes a punishment which may not have been imposed at the time the offence was committed, it is in its nature an *ex-post facto* law. The Missouri and Tennessee test oaths, so far as they apply to lawyers and clergymen, are declared inoperative; and the law of Congress applying the test oath to lawyers in the Supreme Court, is set aside.

In order to prevent the sale of freedmen into slavery for crime, as has been practiced in some of the Southern States, Congress has passed an act declaring that any Judge who shall be guilty of the offence, shall be punished to the limit of two years' imprisonment or \$1,000 fine.

CONGRESS—Senate.—The resolutions of the Legislature of Kentucky, rejecting the constitutional amendment, were laid before the Senate. The Senate passed the bill to admit Nebraska, as amended.

ed by the House. The bill to admit Colorado was also passed by the Senate as amended by the House. A resolution was adopted, looking to the suppression of the coolie trade.

HOUSE.—The legislative appropriation bill was taken up and passed with amendments. A petition was presented asking Congress to prohibit any persons addicted to the use of intoxicating liquors from holding office under the United States. The Committee on Indian Affairs was instructed to inquire promptly into the peonage slave trade in New Mexico and Colorado, and to report an act securing to every person within the nation liberty and equality before the law, without distinction of race or color. The Secretary of the Treasury was directed to furnish copies of the regulations adopted in reference to the export of American manufactures, and the allowance of drawbacks thereon. The bill for the admission of Nebraska was passed, but with an amendment making equal rights the condition of admission into the Union. The Colorado bill was passed with the same proviso. A resolution deprecating the coolie trade was passed.

THE FREEDMEN.—Gen. Howard and suite have been visiting the colored people of Columbia, S. C., and examining into their condition. A large assemblage of freedmen met in the African church, where they were addressed by the General. Among other things of which he spoke, in reference to the fact that inducements have been held out to the freed-people to emigrate to other states, he advised them to remain where they were, and to be industrious and abide by their contracts. He impressed upon them the importance of education, stating that throughout the Southern States there are now over 150,000 colored children being educated.

An officer of the Freedmen's Bureau, who has recently returned from a tour of inspection through Western Virginia, in his report to the Commissioner, speaks in flattering terms of the improved condition of the freedmen in that section, and predicts still greater progress in their development and education. There are fewer cases than formerly of proscription, injustice and cruelty, and the natural antipathy to the freed-people on account of their color is fast wearing away.

A Charleston, S. C., dispatch states that Gen. Ralph Ely has sailed from that port for New Smyrna, Florida, with 600 freed people, the first instalment of a colony of upward of 3,000 about to settle on Government lands located for them in that vicinity, under the Homestead Act of 5th mo. 20th, 1862. These people are in every way well prepared for colonization; being an orderly and industrious class, determined to show to the world that they are worthy of the freedom bestowed upon them by their country. Among them every mechanical trade is represented, and the heads of families are possessed of the means necessary to the cultivation of a crop.

SLAVERY IN BRAZIL.—Some time ago an association was formed, with committees in Paris and London, to promote the universal abolition of slavery. The first care of the committees was to send addresses to the Emperor of Brazil and the Queen of Spain, the sovereigns of the only two countries that still have slaves. That addressed to the former potentate has been answered by his Minister for Foreign Affairs. The reply states that the personal desire of the Emperor and the tendency of public opinion in Brazil are equally in favor of abolition, and says: "The emancipation of the slaves, a necessary consequence of the abolition of the slave-trade, is now only a question of form and of opportunity." The Minister promises that whenever

the unhappy circumstances, in which the country now is, shall permit, the Brazilian government will consider as an object of the highest importance "the realization of that which the spirit of Christianity has long demanded from the civilized world."

D. R. JAMES TRUMAN, DENTIST, has removed to No. 1221 Spruce Street. 1221.

A HISTORY OF THE RELIGIOUS SOCIETY OF FRIENDS, FROM ITS RISE TO THE YEAR 1828. Volumes III and IV. By SAMUEL M. JANNEY.

The third and fourth volumes of this work have been unavoidably delayed by causes connected with the late civil war. During the five years that have elapsed since the second volume was published, so many changes have taken place that it is deemed expedient to issue a new Prospectus.

The two volumes now proposed to be published contain the history of the Society from the year 1691 to 1828, embracing much original matter that has not appeared in any other history. *Biographical sketches are given of the most prominent members of the Society in Great Britain and America, with many instructive passages from their writings and interesting anecdotes.*

Among the subjects of deep interest treated of in these volumes are: *the perils and preservation of Friends during the Irish Rebellion of 1798; the course they pursued during the war of American Independence; their efforts to civilize the Indians and preserve peace with them; the rise and progress of their testimony against Slavery; their early labors in the cause of Temperance; the Separation in Ireland at the beginning of this century; and the Separation in America in 1827-8, with the causes that led to it, and the results that have followed.*

The cost of paper, printing and binding having greatly increased since the first prospectus was issued, it is found that the work cannot be published, *without considerable loss, at the price originally intended.* The price will be, therefore, \$2.00 per volume, bound in cloth; and \$2.25 per volume, bound in sheep, library style; but those subscribers under the first prospectus who have taken the first two volumes, will be furnished with the third and fourth volumes at \$2.00 each, bound in sheep.

The first two volumes can be obtained from the publisher or his agents, at \$2.00 each, sheep binding.

Agents are requested to return this prospectus as speedily as possible—as the work is now in press—with full list of names and residences of subscribers, to the author's publisher.

T. ELLWOOD ZELL, Nos. 17 and 19 S. Sixth St., Phila.

WANTED.—A Physician and Surgeon of experience, a Graduate of the University of Pennsylvania, wishes to purchase the practice of a Physician, in a Friends' neighborhood. Address 1194 tp. "D-croa," No. 144 N. Seventh St., Philada.

FRUIT AND FARM PRODUCE SOLD ON COMMISSION. Consignments of all kinds of Berries, Peaches, Apples, Sweet Potatoes, Round Potatoes, Dried Fruit, Poultry, Eggs, Pork, Lard, Butter, Grain, Flour, &c., solicited and promptly attended to by J. H. RIDGWAY, 112 I & O. Office, No. 125 Delaware Av. Market, Philada.

SAMUEL TOWNSEND & SON, Produce Commission Merchants, No. 62 Light Street, Baltimore. respectfully solicit consignments of Grain, Flour, Seeds, Butter, Eggs, Beans, Poultry, &c. Constantly in store and for sale, Clover, Timothy, Orchard Grass, and other Field Seeds. Also Bone Dust and other Fertilizers. Dried Fruits bought and sold. 721 tfaxn.

DOMESTIC DRY GOODS.—Always on hand, a large assortment of Domestic Dry Goods; Muslins of all kinds and of the best makes, both Bleached and Unbleached; Flannels of all grades White and Colored, Twilled and Plain; Calicoes, Ginghams, Check, Shirtings and Drillings, Bleached and Brown Table Linens, Towelings by the piece and by the yard. Men's and Boys' wear, a well assorted stock. EZEKIEL TYSON, 1638 Market St. Philada.

THOS. M. BEEDS, HATTER, 41 N. 2d St. Always on hand, and made to order, a large assortment of Friends' Hats, as he makes a specialty of that part of the Hattling business.

SURGEON ON GEORGE FOX.—An address before Friends' Institute, in London, by C. H. Spurgeon. Price ten cents per copy, or \$5.00 per 100. Just published and for sale by HENRY LONGSTAFFE. 12mz tf

APPLE PARERS, Preserving Kettles, Bread Slicers, Clothes Sprinklers, (for ironing,) Patent Flat-Iron Holders, Knife and Slicer Sharpeners, Expansion Brace Bits, Clutch Braces, (require neither fitting or notching of bits,) and a general variety of Hardware and Tools. For sale by TRUMAN & SHAW, 929. No. 888 (Eight Thirty Five) Market St., below Ninth.

CHESTERFIELD BOARDING SCHOOL FOR BOYS, situated on the Crosswicks Road, three miles from Bordentown, N. J. The Fifty-third session of this Institution will commence on the 19th of 11th mo., 1866, and continue twenty weeks. Terms \$24. For further particulars address HENRY W. RIDGWAY, 4766 63st 3367 pmzax pa in. Crosswicks P.O., Burlington Co., N. J.

SELECTIONS FROM THE WRITINGS OF JOHN BARCLAY.

(Continued from page 736.)

16th of Eighth month, 1823.—I resume this little book after a long interval, and one marked, as perhaps no other part of my life has hitherto been.* Oh, mighty is the Lord, and able to sustain;—able also to finish his own glorious work in us, either by allowing us a longer continuance here, or by taking us away to himself. The Lord be praised for all!—even in that dispensation which is still so bitter to nature; but through his own consolation and strength it is wonderfully made tolerable. Yea, life is pleasant; and this world or earth is his footstool,—a place He has glorified by his presence from age to age,—a place, where at all times, and in all the parts of it, we may see traces of his goodness to poor man, and tokens of what he will do in a better place for those that love and serve him. Come then, Oh, my soul, take thy blessed privilege on this earth, and serve him with a joyful, cheerful heart; for He reigneth over all, and nothing happens but by his gracious providence. All is limited, even the evil one; and all trials and troubles are restrained by his permission, and converted to the good of his chosen ones, his children. O! He has taken my dear companion into the rest he had prepared for her; I can bless his name, for I believe he will never leave me, until he has

consummated his glorious purpose and promise, in my heavenly translation to eternal joy and peace unspeakable. Now know I, that He, the Most High, is able to perfect that which concerneth me,—is able to do all things for me,—able to prepare me for his glory, and to support me in life and in death;—able also soon to cut short my day's work, to give me a release, and to make good a wonderful provision to those that shall come after me; turning *their* mourning into joy, as he has done *my* sorrow for my beloved earthly friend. Thus, and more also, will he do for them, and not forsake them. Though He is invisible, yet He manifests himself through his dear Son, even by the eternal Spirit; He is with his always, even to the end of the world; and his are those that choose him for their portion, falling in with his offers and visitations. Even the wicked he visits by his rebukes and judgments; and when they turn at his rebukes, he heals their backslidings, loving them freely.

I thought I received something like a summons to the eternal city two days ago; when it may be confirmed and accomplished I know not: but a great solemnity, and much sweetness have since prevailed in my mind; inso-much that it seems as if his wonderful power had effected a willingness to go or to stay, as He wills, who is the God of my life, and who can and does make life sweet; and who will also take away the bitterness of death itself, and no doubt will make up all, to those that remain, as

* The death of his wife occurred about this time.

he has done to me. Oh, that all may be faithful to him! He is wonderful in his dealings to the children of men, not only by what are called his providences, but also by his grace.

To E. J.

MARAZION, 15th of Eighth month, 1823.

My dear friend,—As a proof that I think of thee, as of many other beloved Friends, often, when it is well with me,—I take my pen at the present season; being reminded of our fellowship in years that are past, and wonderfully encouraged and confirmed as to the ground of it; also fully believing that our progress in the heavenly way, will not be suffered to be much impeded by any of those things which are permitted to try and discourage us. O! the ancient, mighty Hand of goodness is not shortened, is not withheld, in its gracious dealings and dispensations towards us; but is able to lift us above all the obstructions which may dismay,—is able to save to the uttermost,—can give the oil of joy for mourning, the garment of praise and salvation for the spirit of heaviness,—can do exceeding abundantly above all that the soul is capable of asking or thinking: and he will surely be our guide, even unto the end.

Thy kind letter, dear E., was no intrusion, but a comfort to me in my sore affliction. No one that has not witnessed such a time, can tell how welcome are even a few lines from a dear friend: though they may excite afresh the tear of affectionate sorrow, they serve again and again, to remind one of, and to refer one afresh to, that inexhaustible source of consolation and of joy eternal, which can make up to us, all we can suffer in our passing along through life.

I need not to thee enlarge on the bitterness of this bereaving blow: thou knowest a little of my long and heavy train of trials; how acute was my sense of sympathy for my beloved earthly friend, under every increase and variation of her sufferings. Well!—the great Disposer of all things has dealt very gently with us; he has cut the work short in righteousness and peace, as respects the better part; and has put a period to all sorrow, sickness, and sin as regards herself; giving her abundantly more than this world could afford, even in the utmost prosperity:—He has likewise bestowed on me such resignation and strength and faith in Himself, as I trust will carry me through, and enable me to lay down my head, as my dear G., in peace. Sometimes my assurance seems so strong and so clear that this will be the case, even that "*I shall go to her*," (2 Samuel xii. 20,) that every thing in life is rendered pleasant, and every duty no longer a burden; when I can bear in mind, that every event, every trial, all my occasions of sorrow, are not only "working for me" the "exceeding weight of

glory," but also, as it were, bringing me nearer to that blessed period.

When the mind is disposed to commune in this way, a letter seems to afford but little space for it. It is not however best for me to go into any of the circumstances of the closing scene, except to say, that I know not anything that then transpired but what seemed in my view, evidently ordered for good. Oh, I felt that which I never could have supposed myself capable of feeling, or fit to partake of,—so helped outwardly and inwardly, so equal to all emergencies and all duties,—directed in everything, as if no further token of Divine regard could be wanting. And Oh, how peaceful was the close, how clear and sensible was she to the last; though, dear soul, she had not many hours' notice of her release, nor had she anything to spare in the awful time, yet her expressions were all that could be wished.

I am ready to think, that nothing in life could have happened to me so strengthening, so helpful to the *better part*, as her removal; it carries with it an inexpressible weight of inducements, binding me afresh to holiness, and lifting me, as it were, upward towards the better country:—and what mighty evidence it affords, none can tell but those that pass through it;—one's own bosom friend, who has been as one's own soul, so graciously dealt with, so blessed in the passage, and so rewarded, even eternally!—I cannot declare these things, as I feel them; and I fear my broken way of expression is almost unintelligible.

How precious a thing it is, to feel the blessing of Divine regard extended towards us, strengthening to our day's work both of duty and of trial; Oh, I would not give up the sense I sometimes have of this, for any thing on earth; this is that which makes life and all things therein sweet to me, at a time, when otherwise all is indeed but vanity.

1823, *Ninth month 18th*.—The sweet incomes of Divine love to me this day were such as made me very contemplative, so as unusually to absorb my mind, especially whilst engaged in working in my garden. I betook myself to a retired walk on the sea-shore, to enjoy the goodness of the Lord more quietly: the outward beauty of the creation, and the calmness and harmony of all things around, seemed in sweet unison with the state of my soul. Oh, how I longed to be fully prepared for, and wholly made partaker of the joys of the blessed,—of them who *live* to the Lord, and *die* in the Lord! I have a hope that I am journeying forward to this state.

1823, *Tenth month 9th*.—My poor mind has been much under exercise since I left home, and more particularly on one account; apprehending some pretty strong drawings to stand up in a meeting and express a few words. This was

the case first at Truro, then at Falmouth Monthly Meeting, then in a degree at the Quarterly Meeting. But I trust it was not in disobedience that I forbore; many things seemed to stand in my way. I desire not to be expecting great things, but I long for clearness; and I believe I shall be favored with it. The consideration of many infirmities, and in some sense unfaithfulness, and want of fitness for the work, affects me often; but I long that it may not hinder the setting of my hand to what is laid upon me to do. I believe there is nothing to be done, unless through a simple surrender and submission. I can fully believe, that the Lord may call to some, who may have had no previous expectation of such a call to service; which indeed is by no means my case. One thing is worthy of commemoration,—that whereas I besought the Lord to be assured that such a thing was required at my hands, he gave me evidently some strong signs, in the frequent testimonies of his ministers from meeting to meeting; even very closely urging to faithfulness, so as almost literally to say,—“Thou art the man.” But though I could not gainsay, yet I did not feel, as though I had any very strong sense as to that being the right time: for this I am now thankful; for, when the constraint was laid upon me afterwards, not by man nor of man, I knew it to be of God, and beyond any man's appointment, but a great cross to my own nature, and under a sense of the Divine authority and presence. May the Lord God of salvation and of mercy be pleased to show me the path of peace and of joy; and may He lift up His countenance and light upon me, that I may see and do His will!

At several opportunities, in company with two dear Friends in the ministry, who were visiting this meeting, I had a distinct sense of what was to be the service, and what were the wants of the parties visited; especially was this the case in a public meeting held at Redruth. At one family visit in this neighborhood, I was sensible of the evident call and requiring of the Lord to utter a few words, in addition to what dropped from others, to the young people present, on this wise;—and then you will find fulfilled in your own experience this language, as it hath abundantly been in mine:—“Though I walk in the midst of trouble, thou wilt revive me; though I walk in darkness, Thou, O, Lord, wilt be a light unto me;—though I pass through the valley of the shadow of death, I will fear no evil.” The weight and sweetness that dwelt on my mind, after this surrender, cannot be set forth: Oh, how it rested on my spirit all the day, in an unutterable manner; I felt so comfortable, and at ease in my mind; Oh, it was a heavenly feeling, and nothing short of Him who is in heaven could give it! At Wadebridge, in the public meeting, I had to speak

to the people, and in a way remarkable to myself, for I felt *at home* in it, if I may so express myself. Self-possession seemed to be granted me, and self-abasement; just as though it was not I that had spoken, but my Father, which is in heaven. In this and other service hereafter mentioned, I had, (praise be to the Lord! who turns the hearts, and influences his own simple ones,) the countenance and encouragement of those, who, I believe, know the voice of the true shepherd from that of the stranger. This often humbles me greatly; for next to the answer of peace from God in my own bosom, what I have desired has often been the unity of the church and the love of the brethren.

I went into Devonshire, and on my return home, I had something to say in the next meeting I attended at Marazion: also at one Monthly Meeting held at Falmouth, on the true church: and again, in the chamber of a Friend, who had been long an invalid,—“Behold we count them happy which endure;” take, my sister, the prophets, who have spoken unto us in the name of the Lord, for an example of suffering affliction, and patience: thou hast heard of the patience of Job, and hast seen the end of the Lord, that he is very pitiful, and of tender mercy. Behold, we count them happy which endure. It is a blessed thing indeed, when flesh and heart fail, to know God to be the strength of our heart and our portion for ever. God shall redeem thy soul from the power of the grave, for he shall receive thee! Thus my Master, my tender Father and Teacher dealt with me; and now, what should I wait for, but the continuance of his mercy and his light to preserve and sustain me henceforth, even for ever.

I may add, that it was evident to me, that he who in simplicity surrenders any thing to the Lord, which, in any wise seems called for, will not lose his reward; but will find his way open and enlarge, his peace extend, and he will know more and more of the requirements and business of the Lord consigned to him; and the evidence and motions will often increase after the will is resigned. Wonderful is the Lord's goodness to me from time to time, beyond words! He filleth me with the finest of the wheat; and he revealeth unto me “the abundance of peace and truth.” O! how precious a season was our Quarterly Meeting (14th of First month, 1824,) held at Austle. Is there any thing too hard for the Lord? “Call unto me, and I will answer thee, and show thee great and mighty things which thou knowest not.

(To be continued.)

TRUTH MAKING ITS WAY.

“If we do not fret greatly about the slow progress of truth, we may rest assured that it will make its own way in the world. The

agencies are too various and powerful to give us any uneasiness about results. We have but to perform our parts as they come up, to abide in faith and trust, to co-operate actively with our wills and prayers, and what we would heartily see accomplished will be accomplished."

LETTER FROM LYDIA P. MOTT.

No V.

Second month 4th, 1830.

My dear M. A.—It was with feelings of the tenderest interest that I heard, by W. S. B., of thy present debilitated condition with the complaint in thy side.—(Here follows a description of a remedy—not of interest to the general reader. After which she continues as follows:)

If the poor body is low, and the prospect of being raised to actual life discouraging, do not dwell on the distrustful side of things as respects thy family; but with humble confidence commit all that is dear to thee to His almighty protection, who careth for the sparrow, and without whose knowledge not one can fall to the ground. He can restore when human skill fails; and if, in His unsearchable wisdom, He sees fit to receive thee unto Himself and leave thy H. to struggle still longer with the conflicts of life, He can strengthen him to discharge the double duty that will devolve on him with religious care and fidelity to thy wishes for thy precious offspring. And as to thyself, the early dedication thou experienced comforts my mind when thinking that I may never more behold thee. Were I at liberty to get to thee, it would afford me consolation as for a beloved child, for thou hast been dear to me; but, my young friend, submission to the will of our Heavenly Father becomes us in every situation. I shall, when contemplating thee in this state of suffering, strive for it myself; and earnestly desire that thou may, either in life or death, be enabled calmly to say, "Oh, Father, not my will but thine be done." Then all will be well.

Accept this expression of my continued sympathy, and let me only add, while life continues, be faithful.

Thine truly,
LYDIA P. MOTT.

THE BOOK OF PSALMS.

In our deepest degradation there remains something sacred, undefiled, the pledge and gift of our better nature; a germ of indestructible life, like the grains of wheat among the coverments of a mummy, surviving through three thousand years; which *may* be planted, and live and grow again.

It is this truth of human feeling which makes the Psalms, more than any other portion of the Old Testament, the link of union between dis-

tant ages. The historical books need a rich store of knowledge before they can be a modern book of life; but the Psalms are the records of individual experience.

Personal religion is the same in all ages. The depths of our humanity remain unruffled by the storms of ages which change the surface.—*F. W. Robertson.*

"GEORGE FOX."

BY C. H. SPURGEON.

(Concluded from page 742.)

I am going to conclude, but I desired to say to the Friends assembled here, and to all Friends in this kingdom, Beloved brethren and sisters in Christ Jesus—for that I trust we are—does not the present age greatly require *you*? It wants all Christians, but does it not specially need *you*? If you are or wish to be at all like George Fox, was there ever a period since his day in which the existence of the Quakers was more necessary than now? I think not; and this was why I wanted to have told you some time ago that I thought you stood upon a special vantage ground in the fight with Ritualism—this covert Popery that is coming back amongst us. When an opponent can say to you, "Physician, heal thyself," it weakens your position. But in the matter of Ritualism an opponent cannot say this to you, unless, indeed, as I have heard some wicked people say, you may become as ritualistic in the utter absence of form as others do with the excess of form. I do not know whether that is true or not, but if so, do not let it be the case any longer. As far as I can judge, however, I believe you to be clear of this sin. Well, then, are you not the very persons constantly and vehemently to speak against it? Is there not *need* that you should speak against it? What greater evil can there be than for the powers of darkness to bring back again the idolators of Rome? Is it not a most terrible sign of the times that the public taste is evidently running that way? The taste in dress is florid, the taste in decoration is florid too; and this, perhaps, to some extent, accounts for the craving for a florid religion. But, over and above this, there are the principles of priestcraft which are being intruded upon us. It is not so much the gaudy dresses, the crucifixes, the incense, that we have to complain of, as it is the doctrine that we are to confess our sins to man, and that this man has received by some mystic operation through a long succession of priests, power from God to forgive his fellow creature's sins. Is it not shocking that men should be found in what we call "this enlightened nineteenth century" who really believe priestly absolution, and that this belief is spreading, spreading so fast that whereas if ten years ago one had said that the High Church party would be the most vigorous

portion of the Church of England, people would have said, "It is false, it cannot be, you are a prophetic impostor, you know nothing about it;" yet it has really come to be so. If you read their weekly newspapers, and that which comes streaming from their press in such abundance, you will see that they really have great power, that they are men of energy, force, and skill. Somehow or other Satan does generally get good servants, and God's servants are but sorry ones. Satan's servants serve him well, but the servants of Christ are often half hearted. These men are zealous in their superstitions, and are pushing it right and left and carrying it to extremes. You have it within a door or two of this meeting-house, and you can see it for yourselves, in all its glory and in all its abomination, if you wish. Now, dear friends, should not all Christians bear their testimony against this? "Yes," you will say, "and we do so quietly in our meetings." Just so, dear friends, and may God help you still to bear it in that quiet manner, and to give effect to it by your lives. But is not something more wanted than this quiet mode of protest? Have you no responsibilities as a community? I know you will excuse my speaking so very personally to you. Have you not as a community, though small in numbers, unusual influence? This influence is felt in many ways. Who can deny that upon the political history of our country, Friends have stamped and are stamping their names indelibly? There are names among Friends which we shall always honor, and which are foremost in the page of history, both in relation to political matters and to matters of social and political economy. Some of you are getting famous in antiquarianism, and all sorts of literary fame are open to you. I hope, however, that this will never be your chief glory. I hope it will never be the chief ambition of this Society to be chief and foremost in politics and literature. I hope you will never drivel into mere politicians, for it is drivelling if you cease to make religion your main business; and I equally hope that you will not drivel into mere scholars, or mere antiquarians or meteorologists, for it is a fearful coming down to come to be any of these rather than to be first and foremost a servant of God. I know my friend in the chair* will say "Amen" to this, and that he feels that to serve God is the first and chief thing, and is the highest position of manhood. In addition to all this undoubted influence you have considerable wealth; you have a large amount of plant in the form of chapels—I beg pardon; I should have said "meeting-houses"—(that word "chapel" is a bad word; I wish we could get rid of it!)—you have a large body of highly-disciplined

Christian men; your young men, I should think, are, on the whole, better educated than the young men of any other class—and now, I ask you, is all this power, and wealth, and position, and influence, to be unused? It is used, I know, in a thousand excellent ways. Are you not foremost as philanthropists? Will not the negro always remember your names, and the freed man always recollect you in his prayers? But I claim for Christ, I claim for truth, I claim for the Spirit of God, this power which he has given you. Dear friends, you have among you honored men who preach the gospel of Christ, and testify to the truth which they have received, but should not more of you speak for Jesus? Will there not be more publishers of the gospel if the Spirit of God shall visit you with a revival, and come upon you as he did upon those of whom Joel prophesied, "And your sons and your daughters shall prophesy, your old men shall dream dreams, your young men shall see visions." Ought we not hopefully to desire this? I came here to ask you to help those of us who are trying to fight against Ritualism and idolatry, with your prayers and your sympathies. I do not ask you to agree with us in a great many things which we as conscientiously believe to be right as you do conscientiously believe them to be wrong. But do recollect us in your prayers, for we are fighting a common battle for spiritual religion. If there be young men here with talents which should be consecrated to God, if there should be Christian brethren here who have been getting money and using it well, but who have not wholly and thoroughly devoted it to the bearing of a testimony for Christ, I do pray you in the name of Him who died upon the cross, by whose blessed Spirit we have been brought to trust in Him, to consecrate yourselves to His service wholly and unreservedly. If this Society could be fully awakened to a consciousness of the position which it occupies, and of the danger of the present times, its smallness would, perhaps, prove to be its excellence, for sometimes a multitude God will not use, but saith, "The people be too many for me." If you be as Gideon's men that lapped you may be the means of defeating Midian's host. And what if this should lead to a discussion of doctrines which I hold dear, but which you reject? Why in this I should rejoice without fear. If my views or any man's views cannot bear the criticism of honest men, and comparison with God's word, let them go to the winds. It is not, however, controversy that I desire but spiritual revival. I only want to see you true to vital points. I do not want to see you in a state of slumber, for, though that may be very pleasant, it is not the position in which you ought to be as followers of George Fox. If Fox were here to-night he might not endorse

* C. Gilpin Esq., M. P.

all I have said; he might not go my lengths on some points, and he would go much further on others, but I am persuaded he would say to you, "Friends, now if ever testify for the Spirit's work! Testify for the spirituality of godliness! Bear witness against idolatry! Cry aloud and spare not! Lift up the standard against the foe whose incoming is like a flood!" If Popery comes back, will you bear the blame of it? But you must, my friends, you must bear a large share of it if you do not now testify openly and loudly. If you do not help those who love spiritual religion you will be highly culpable. There are some of our Christian friends who practise unscriptural ceremonies and therefore cannot speak out, for the reply would be, "you are yourselves in the mire," but we who have repudiated the least idea of sacramental efficacy can speak and must. We must "Awake, arise, or be forever fallen." It would be a great calamity for your Society to cease to be until its great fundamental principle is accepted by the whole church. There are some of your principles to which you need not testify just now, because they are generally received, and your testimony is acknowledged, but this principle of spirituality of worship needs to be testified by us over and over and over again. Luther said that when he preached the doctrine of justification by faith he felt as though he could take the book and knock it against the people's heads to make them see it. It were vain to do that, but this doctrine of the spirituality of worship needs to be iterated and reiterated, to be dinned into people's ears continually; and then unless the Holy Ghost puts it into their hearts they will only hear it with their ears, but not receive it in their souls. Friends, I pray you bear this testimony! I do not know in what way you can do it. It is not for me to prescribe to you, but I did feel it in my heart to say as much to you as I have said. In proclaiming the truth of a spiritual religion may God bless you and multiply you, and make you great upon the face of the earth. We will sympathize with you. Wherein we think you err we will sorrow; wherein we think you right we will rejoice. I heard a remark the other day made by a brother of the Wesleyan denomination, a most eminent minister, which is worthy to be written in letters of gold because of its spirit of love. When speaking of the very slight increase of his denomination, he said, "I have prayed to God often that if he would not be pleased to increase our Society because of our sins, or for any other cause, he would not suffer the whole Christian church to lose by it, but would be pleased to bless you Baptists instead, for so long as souls are saved my heart is glad." I said to him, "My dear brother, that is a truly Christian prayer." "Yes," he said,

"but we must not be surprised at it; it is what every Christian ought to be prepared to join in." If our own denomination does not increase, let us pray that other denominations may prosper the more abundantly so far as they hold the truth. I am sure, friends, that if God shall multiply you greatly with truly godly converts, there are thousands of the Lord's people who will be thankful for it, and will only feel that such an increase to your numbers will be an indication of the advance throughout England of true spiritual religion.

I thank you, brethren and sisters, for your kind attention. God bless you, according to his mercy in Christ Jesus.

To me the progress of society consists in nothing more than in bringing out the individual, in giving him a consciousness of his own being, and in quickening him to strengthen and elevate his own mind.

For Friends' Intelligencer.

SPRINGFIELD, ILL., First month, 1867.

Dear Friends:—I have now taken the *Intelligencer* for about eleven years, and lately I have been strongly impressed with the desire to write a few lines myself for the paper. Near and dear friends from whom I have long been separated have urged me to do so; but as my hand is feeble and my mind weak, my words must be few. Hoping that some word may prove a guide or stepping-stone to some other friend who may, like myself, be passing through life's journey away from the privileges of the assemblies of Friends, I address this letter to the readers of this paper. In a few days fourscore years of life will have passed; and I feel that the evening is drawing near, and whatever is left for me to do must be done quickly.

I removed to the West in 1835. I was a member of Rahway and Plainfield Quarterly and Monthly Meeting, and of the New York Yearly Meeting. After spending fourteen years in the West, without any privilege of meeting with Friends in worship, I returned to the East on a visit of a few months. The Friends seemed surprised that I had lived so long away from our Society, and yet so near to their principles.

But I have found Truth the same everywhere, whether on the lonely prairies of Illinois, or in the beloved assemblies of Friends where I sat long ago. And if we live near the fountain, we may enjoy the fresh, pure water, ever springing up to quench the thirst of the weary traveller.

I found myself still a member of Rahway Meeting, and enjoyed many pleasant reunions with Friends during the few months of my visit. I shall always cherish the memory of that visit as a green spot by the wayside in my journey of life.

In the spring of 1850, my husband was taken from me by death. Since that time I have

lived with my children. I may say that I have been greatly blessed in my family. I have seven children living, thirty-eight grandchildren, and two great-grandchildren. They are like olive branches clustering about me, making my pathway as smooth as may be to the river over which soon I must pass to the shores beyond. I may say with the poet in the child's hymn—

"All without my care or payment,
All my wants are well supplied."

I spent several years with my daughter in Bloomington, Illinois. While there I became acquainted with the Society of Friends in Benjaminville, near Bloomington. The Friends showed me many kind attentions, and I enjoyed several seasons of worship with them while I remained in Bloomington. The war brought changes which caused my daughter to remove to Springfield, Ill., where I am now living. My health is generally good in the summer season, and I am able to journey to St. Louis and to Jacksonville, where I have sons to visit. While travelling I often meet with Friends, and a sweet communion arises between us, which is refreshing to the spirit.

I have great reason to be thankful that my eyesight remains good, and that I can thus enjoy reading the *Intelligencer*, which has been a great comfort to me. I also take the *Children's Friend*, which I love to read to my little grandchildren, as they cluster about me.

A number of years ago, while in St. Louis, I attended a female prayer meeting. Just at the close of the meeting I was requested to lead their supplications, and as I had felt a very solemn covering, I did not refuse. The desire of my prayer was that the cloud of slavery might be removed from that city. I am thankful that God has spared my life to see the day when that cloud is lifted not only from that city, but from all of our beloved country. When the good tidings came, my son wrote to me, saying, "Dear mother, I know thou wilt rejoice with me that our State, like her sister States, has become free." And I did rejoice that my poor prayer had at last been answered, and it is now a daily pleasure to me to see the children of that oppressed people skipping gaily past my window to the free school which the good people of this city have provided for them. And now, having seen this great darkness pass away, I wait with patience till my Heavenly Father shall call me to Himself.

SARAH EDGAR.

The shortest and surest way to live with honor in the world, is to be in reality what we would appear to be; and if we observe, we shall find that all humane virtues increase and strengthen themselves by the practice and experience of them.

For Friends' Intelligencer.

A WORD FROM IOWA.

On the 18th of First month, with the thermometer below zero, two Friends visited the colored school in Mt. Pleasant, composed of fifty scholars, and made up of the children of the freed-people who have found their way into this State. The teacher is the son of the County Superintendent, a young man of talent, and very deeply interested in this class of our people. We were surprised at the astonishing progress of the pupils, and listened to their exercises in orthography, embracing some of the most difficult words in ordinary use. It was a rare thing for any one to misspell a word. Their reading was very fair, but in arithmetic and geography they exceeded our expectations. While great credit is due to the assiduity of the children, very much is also due to the care of the teacher, to use his own language, says, "I feel a pride in being able to say my school will compare well with the white schools of the county." Our county supports this school.

On the same day a visit was made to an old freedwoman who is now nearly one hundred years of age. She has been the mother of twenty children, and is a pious Christian. She still retains her faculties remarkably.

A part of the nice flannel sent to S. B. D.'s care from Friends in Philadelphia was given her, which she received with many expressions of gratitude, saying, "Surely de Lord sent it." She lives with her son-in-law David Johnson, known as "Uncle Davy." This poor man is only forty-seven years old, looking as if he might be threescore and ten. His fingers have nearly all been frozen off, and his limbs are distorted by rheumatism. We met him in the street with his horse and saw, returning from work. He had been sold to seven different masters while a slave in Northern Missouri. A number of benevolent persons have aided him in purchasing a little home. He, too, is a religiously-minded man.

The colored people here have all recently been in slavery, and are doing so well as to merit the kind regard even of some who were once prejudiced against them. A more grateful people for the favors received it is rare to find. Those who have recently come seem to have more means than such as arrived during the war.

J. A. D.

Prairie Grove, Iowa, 1st mo. 20, 1867.

Let our friendly visits be improved as opportunities of doing good to the souls of our friends. Shall we never learn the art of introducing and keeping up profitable discourse in our conversation with our friends, such as we may hear of with comfort in that day, when by our words we must be justified, and by our words condemned. For, perhaps, even of those whose re-

proach we fear, if we manage it with meekness and humility, we may be had in honor. Serious godliness will command respect. Let our friendly visits, therefore, be improved as opportunities of getting good to our own souls. By doing good we do indeed get good; our own lamp will burn the brighter for its lighting others. Think how little good we have done in the visits we have made and received! How few have been the better for us.—*M. Henry.*

FRIENDS' INTELLIGENCER.

PHILADELPHIA, SECOND MONTH 2, 1867.

REVIEW OF A REVIEW.—“Avoid foolish questions and genealogies, and contentions, and strivings about the law: for they are unprofitable and vain.”

It is not in a controversial spirit that we allude to the Editorial of a recent number of the “British Friend,” reviewing a letter which appears to have been written by one of our friends on this side of the Atlantic; but our attention was arrested by the following sentence:—

“Our belief in a return on the part of the Hicksites to a harmony with the original faith of the Society of Friends was drawn from their own organ, *The Intelligencer*. On no other ground than such a return would we have entertained the remotest idea of reunion.”

We know not from what the Editor has received the impression that there has been at any time a wavering of our faith in the all-sufficiency of divine grace, as it is suffered to operate, to redeem and cleanse the heart from every defilement. We are not aware of any action in our branch of the organization that will substantiate the implied charge of a departure from the Christian principle which characterized the Society in its infancy, or of having left the ground on which our early Friends became incorporated in a religious body.

That which was so strongly urged by them as the fundamental principle, and which brought upon them obloquy and derision, we still recognize, in a measure under the same ban, as the faith in which it is essential that Friends should unite.

With those who are made “one” by this spirit, minor differences are comparatively of little moment; but without this bond of union there can be no true fellowship. The Editor further remarks, that the writer of the

letter “does not state wherein the Orthodox Society has departed from the primitive faith.”

We think this point answered by himself, in the assertion that, “Inestimable as is the gift of Divine Grace in order to salvation, it is not all efficacious.” “The truth as to the scheme for man’s redemption must be received as a perfect whole. That scheme consists of two parts, an *outward* and an *inward* work; but the one must on no account be exalted at the expense of the other.”

If, as appears, the “outward work” here alluded to is designed to apply to the crucifixion of the blessed Jesus, we cannot find any such views promulgated by him, who “came to bear witness to the truth.”

• Had our forefathers thus held up the doctrine of the Atonement, as believed in by the various religious professors, with whom they were brought in contact, why the cry of infidelity and heresy by which these noble advocates of the “internal light” were assailed?

We fully believe that in the language employed by George Fox and his co-temporaries, in reference to “the Saviour,” while it is capable of a double interpretation, was used by these *spiritually-minded men* in a spiritual sense, else much that is written is inconsistent with itself. Whatever their sentiments may have been in reference to the outward sacrifice, in giving the spirit the pre-eminence, they were brought into divine harmony, and could rally under the banner unfurled by George Fox, upon which was inscribed, “Mind the Light.” In a letter of exhortation to his friends, in the latter part of his life, G. Fox says, “Stir up the gift of God in you, improve it, and do not sit down, Demas-like, and embrace this present world that will have an end, lest you become idolaters. Be valiant for God’s truth upon the earth, and spread it abroad in the daylight of Christ. You who have sought the kingdom of God and the righteousness thereof, and have received it, and preached it, which stands in righteousness, and peace, and joy in the Holy Ghost, as able ministers of the Spirit, *sow to the spirit, that of the spirit ye may reap life everlasting.*” Had G. F. considered that a faith in the “outward blood” as an atoning power was essential, how deficient was this admonition, as well as many others of similar import.

We often regret the occasional obscurity of expression in the writings of our early Friends; and a continuance of the practice leads in the present day to a confusion, which we think could be avoided if the matter was regarded with the attention it deserves. Familiarity with certain ambiguous phrases induces the habit of using them; and the mind being left to interpret them, does so in accordance with its own belief. Thus there is kept up an "uncertain sound" which is incompatible with the harmony and simplicity of Truth as professed by Friends.

We are disposed to believe an important point in the mission of Friends at this time is to disrobe the truth of some of the wrappings by which it is encumbered through the intellectuality of man, and present it in freshness and simplicity as it was inculcated by Jesus. Therefore, we would encourage those who speak, and those who write, to follow the example of the great Teacher in using language that all can understand. What can be more comprehensive and yet simple, than the truths as enunciated by him from the Mount! And what clearer than the declaration, that "who-soever heareth these sayings of mine and doeth them, I will liken him unto a wise man, who built his house upon a rock, &c."

DIED, on the 11th of First month, 1867, at his daughter's residence, Middletown, Delaware county, JOSEPH WEBSTER, Sr., in the 86th year of his age; a member of London Grove Monthly Meeting.

He was a person of unostentatious piety, and endeavored, throughout a long and checkered life, to follow the golden rule, of doing unto others as he would wish they should do to him. He was careful to avoid giving offence, and possessed a meek and quiet spirit, and would rather suffer an injury than resent a wrong. The loss of sight, incident to old age, he bore with Christian resignation. He passed quietly away, after a short illness, and we doubt not his spirit is at rest in the mansions of the just made perfect. G.

WANTED,

By the Association of Friends of New York for Relief of Freedmen, a teacher for a school in Maryland. Address,

JACOB CAPRON,

1172 Broadway, New York.

1st mo. 12, 1867—tf.

FRIENDS' SOCIAL LYCEUM.

An extemporaneous Lecture on Digestion was delivered by ANN PRESTON, M. D., on 1st mo. 15th.

Her remarks were prefaced by allusions to the great importance of the simple and frequent act of taking our daily food. Most of our great efforts have an ultimate tendency to the providing of ourselves and families with that which will nourish and support our physical being; and so strongly are we inclined in that direction, that those struggling for political preferment are sometimes called, familiarly, "The bread and butter brigade."

It has been said,—and not altogether inappropriately,—“All the ships of all the seas sail towards the human stomach.”

It may be somewhat humiliating to confess, but it is nevertheless true, that all the great activity of body and mind is dependent, in a measure, upon the food we eat, since from this source is derived the material to repair the waste of the muscles, the brain and the entire human system; and it is divinely ordained that the taking of food, as well as all other actions essential to life, should be so pleasant to us that there can rarely be a disregard of those demands. The difference in eating was alluded to: those denominated “good feeders” have a large vitality, and a broad base for the development of vigorous life, while persons whose manner of eating is more restricted and irregular, have generally a more feeble organism, and a smaller amount of animal and mental power. Preceding man were the lower forms of vegetables, appropriating and building up from inorganic matter substances and compounds to support *animal* life. Physiologists divide the articles of human food into *organic* and *inorganic* substances, which are called “proximate principles.” These are the building materials of the body. Water, salt, chloride of potassium, phosphate and carbonate of lime, phosphate and carbonate of soda, phosphate of potassa, iron, &c., are among them.

No living body is found without having in its composition these substances. Water forms three-fourths of the entire bulk, the other elements entering into its composition in a greater or less degree.

Organic substances are divided into two classes—nitrogenized and non-nitrogenized. The non nitrogenized substances, found in vegetables, are starch, sugar, fats and gums, all formed of oxygen, carbon and hydrogen, only. Albumen, of which we have a familiar example in the white of an egg, the gluten of wheat, the casein of milk, by the action of the stomach, are all reduced into the same substance,—*Albuminose*,—which enters largely into the composition of the blood. Three-fourths to four-fifths of the food taken is absorbed and passed into the blood.

The saliva, of which there are about 56 ounces secreted in twenty-four hours, is an active agent in the conversion of starch into sugar from its properties as a solvent. With the aid of mastication, it places the food in a condition for the action of the stomach.

The stomach contains an acid fluid known as the gastric juice, which contains muriatic acid, formed by the decomposition of chloride of sodium, and from other sources. There are about fourteen pounds of gastric juice secreted in twenty-four hours.

The work of digestion is quite rapid. In five minutes after eating, the contents of the stomach are sensibly diminished, and in four or five hours, in a healthy condition of the system, the contents are absorbed. The liver secretes the bile, which is poured into the alimentary canal, as is also the pancreatic fluid, which acts upon the starch, &c.

Persons having a great amount of mental labor to perform have, as a rule, less digestive power than those whose labors are merely mechanical; which is owing to the fact that in the former class the blood and nervous influence are distributed largely to the brain at the expense of the stomach.

The great variety of constitutions makes it impossible to establish any definite rule as to the amount or time of eating; animal instinct in this particular should be regarded. Regularity in eating is of great importance, and a disregard of this essential is very apt to produce indigestion.

The habit of taking the largest meal in the business portion of the day is not best for men of active and engrossing pursuits. After eating freely, mental and physical rest are very important as aids to digestion; as is also a cheerful disposition. Anything unpleasant or very exciting should be avoided at table, and if possible, pleasant, lively conversation might be engaged in profitably.

It has been a prevailing idea that eating before going to bed is unwholesome, and, as a general rule, it may be so; but there are times when it may be indulged in properly. After being engaged in conversation, or in study late in the evening, we often feel too hungry to

sleep; at such times light food in moderation would be useful.

The lecturer stated as her belief that the cause of much domestic unhappiness might be found in poor cooking, and expressed great sympathy for both man and wife in the troubles growing out of ignorance of this indispensable art, believing that the remedy for much of this trouble might be found in a system of education in scientific cooking. Prof. Blot's lectures on this subject were alluded to favorably, expressing, however, a fear that they were scarcely adapted to the wants and means of the general public. The application of scientific discoveries to the various domestic duties has done much for the happiness of the human family. Not least among the agencies which the mind of man has made subservient to his wants is fire, by means of which he may live in any or all climates, laying all nature under contribution for his support, &c.

For Friends' Intelligence.

FRIENDS AMONGST THE FREEDMEN.

NO. IV.

In the following summary of incidentals the compiler has not made an especial point of stating the precise condition of the schools under the care of Friends, but has aimed to show the practical workings of *all* our efforts for "the aid and elevation of the Freedmen."

CORNELIA HANCOCK, at Mt. Pleasant, S. C., remarks, "My scholars are at an interesting age; and looking back, and considering they have been in school only one year, their progress seems remarkable,—*only six being then able to read*, and the rest very imperfect spellers, and none of them able to tell how many 6 and 2 would make. Now, the first class can perform, mentally, examples as 12x15 and 27x5. Lower classes perform equally well in proportion." (In this statement it will be seen the teacher claims no allowance for the disadvantage of the long summer vacation.) Changing the subject, she continues, "We were enabled by the generosity of a friend to bring Christmas to about two hundred little children. We had a large tree, reaching from floor to ceiling loaded with gifts of every description. The children all assembled in one room around the tree and sang several pretty pieces, after which the work of distributing commenced, which to us was work, and to them was joy unspeakable."

CAROLINE TAYLOR, at the same place, gives a good account of her school; *all her scholars* not only read, but are in arithmetic, while their progress in other branches is entirely satisfactory.

MARY A. TAYLOR, at the same place, writes that she has 45 scholars, all of whom are between 6 and 16 years of age, and yet *they all read and write*. She, however, adds, "The at-

tendance has not been as good this month, on account of the cold weather; many of my pupils come from the country, *and have no shoes to wear!*"

MARY MCBRIDE, at Vienna, states that quite a number of her scholars walk several miles to school, and four of them *five miles*. She distributed the juvenile books sent out, awarding them for good conduct during the term. One of the colored men supplied her with a tree, which she trimmed with toys, &c. She further says, "I added another pound of candy, made 40 or 50 little bags, and filled them; I also had three cakes given me. The children were all invited to be present in the school room at half-past eleven on Christmas day, and they each had a piece of cake and a bag of candy handed them from a waiter, also some taken from the tree. They sung a Christmas carol, I made a short speech, and altogether we had quite a happy time."

SARAH A. STEEB, at Waterford, Va., writes, "I gave them holiday on Christmas day, and asked them how many would attend during the week, as I expected to have school. I was agreeably surprised to find every hand raised, and am glad to say they all came and that my school was larger than usual." She adds, "My school is more interesting now than at any time since I have been teaching;" and in reference to her colored assistant, says, I am more and more pleased with her, and think she will make a good teacher. I am doing all I can for her, and sometimes *give the first class into her hands.*"

"The *Circular letter* was received with real gratitude, many of them shedding tears while I read it—all sending love to the kind friends who are doing so much for them. I appointed the next First-day afternoon after I received it to read it to them. My school-room would not hold half who came to hear it, and I opened the door, so that those outside might hear. But this did not satisfy them, and they requested me to dismiss those *inside*, and let those *outside* come in and read it again. I did so, and even then some of the old women smuggled themselves in the second time to hear "*the beautiful words*" once more. I have read it a good many times since to some who cannot come to my home to hear it. The box of clothing is doing much good. I find a place for every thing sent.

MARY K. BROSIUS, (at Vienna,) in alluding to the little boy of five years of age, before reported as having learned his letters so rapidly, states, "He can now write very well on the slate, and can make all the figures and letters without a copy. This prodigy of a boy is always at the head of his class, above others who are much older than he, and who have been going to school longer than he has.

Some of the articles I have reserved for Christmas. I expect to have a tree in the parlor of the house where I board, and one of the neighbors who formerly despised "*nigger teachers*" (as she used to call us) has offered to bake me a cake. I also expect some from our superintendent, &c. I think if we were to stay here long enough, the people would all associate with us if we would with them. They appear afraid to have us for associates in their sensitiveness of what *others* will say. The "*Circular letter*" was received with many thanks to those who thus remembered them.

FRANCES E. GAUZE has again resumed her duties at Herndon Station, in the new house, replacing the one burned. She says, "I am so glad to get back to the the school-room again that I feel willing to put up with some inconveniences. It is built of green pine logs lined inside with boards, is 18 feet long and 15 wide." After some further description of the house, she continues: "The ground it stands upon was given to the Freedmen by one of our good Union men. His name is John Webster, formerly from New York State."

"The Freedmen were highly pleased with the '*Circular letter*.' One old woman remarked, 'She knew the people of the North were blessed good people.' The clothing sent has been distributed among thirteen families. One family was entirely destitute. I visited them in their home, which was a miserable hut, and seemed to be destitute of all the comforts of life; the children, five in number, were almost naked, a few old rags being all they had on them. I never beheld such poverty before, and I gave them each a new suit of clothes, for which they were very grateful indeed. They are coming to school now, since they have sufficient clothing to cover them."

MARTHA WRIGHT, at Lewansville, says, "I have two pupils whom I think would make good teachers in a few months. I think it would have done your hearts good, could you have seen the radiant faces of my pupils when they stepped forward and took from my hands the proffered Christmas presents. Many thanks for the clothing."

The reports from HANNAH SHORTLIDGE, CATHARINE E. HALL and ELIZA E. WAY, all show a continuation of their earnest effort in the good work.

From some cause not known to us, *three* of our schools have not been reported; but the *thirteen* we have heard from report an aggregate of 474 pupils, 410 of whom are between 6 and 16 years of age, and yet the astonishing fact is presented, that of the entire number *only eight* are in the alphabet, while eight of the schools have not a single pupil learning letters.

J. M. WOOD, (it is believed formerly of

Iowa,) now sojourning at *Woodlawn*, Va., writes us in the fulness of his heart, and he too speaks of our "Circular letter," having been present when it was read to a large meeting of "*Intelligent Freedmen*." He gives some interesting details of the impressions made, and remarks, "It would gladden the heart of every donor to see the earnestness manifested by this disenthralled people in availing themselves of the privileges thus secured them." Then follows a description of the scene at the distribution of the presents to the children, stating, "The gratitude beaming from their eyes spoke more to me than their tongues." He also speaks in high terms of our school (taught by *Sarah E. Lloyd*) and of the faithfulness as well as the "credible effort in the mechanical line" of the Freedmen in the erection of their building, most of the work having been done by themselves.

SUSAN H. CLARK, who has for several years been a faithful laborer in the good cause at *Fortress Monroe*, in a recent letter depicting the suffering among the Freedmen in that vicinity, states that the snow and rain that had prevailed there, combined with the want of shoes and sufficient clothing, had prevented them from procuring their former supply of faggots from the woods, and that some were absolutely compelled to remain in bed to keep warm.

Having no money, in consequence of the impossibility to procure work, she queries, "What are they to do?" and continues: "A young lady and myself visited a few families the first morning of the snow, and found *six families* who had no wood nor a morsel of meat in the house. In one was an old woman and her grandchild; in another, an old man 104 years of age, with his wife and daughter. We returned home and purchased a small load of wood for one-dollar, and I went around with the cart, and dropped one stick here, two at another place, three or four at a third, according to their need, until I had supplied *ten*. I also bought a dollar's worth of meal (35 pounds) and distributed it to *six families*: and so it is—if I should start out this morning, I should find many who had had no breakfast.

"Feeling that the *people* needed more personal attention, I made arrangements to be released from a portion of my school duties, and have been visiting them in their homes. Last week I paid *forty five* visits. What I mean by visits, is not to go into a cabin, ask a few questions and then pass on to the next, but to sit down with them and advise them how to get along, to read the Bible to them, to beseech them to turn from sin, &c. I never leave a house under ten minutes, and sometimes remain half an hour. I feel that much good is being done in this way by us all, for my companions also go as fre-

quently as they can. We have every encouragement to labor among them, for they receive us so thankfully, I feel as if I could spend my life among them, and that I am just where the Lord desired I should labor."

Her letter contains much more of interest, but want of space forbids the introduction of any thing more, as I fear I have already prolonged these sketches to an almost unwarrantable length. One more quotation, however. After some details as to their schools, she remarks, "I looked around the other night upon our school, and I thought what a glorious sight this is! Oh! that others could thus behold it."

Although not in our employ, she has been our almoner on other occasions, and the reading of her letter (which had only been addressed to a relative) before the association awakened such a lively interest that an appropriation of both money and clothing was promptly made for her distribution. Generous responses from individuals have also been received, all of which either have been or will be promptly forwarded.

Philad'a, 1st mo. 21, 1867. J. M. E.

From the Cultivator and Country Gentleman.

POOR.

What I poor you say; why, save you, friend,
I've more than half the world can show;
Such wealth as mine you cannot boast,
Such bliss as mine you cannot know.
I've more than keenest head can sum,
Could ever dream of night or day;
I've treasures hid from sordid hoards,
No cunning thief can take away.

My riches never bring distrust
Between me and my fellow-men;
No evil passion stirs my breast,
To yield me hate for hate again;
But pleasure, peace and joy they bring;
They soothe the my cares, they make me glad,
They give delights I cannot name,
And buy me comfort when I'm sad.

Come here and open wide your eyes;
You see earth's glory at my feet,
You see the sky above my head,
The sunshine on my garden seat;
You see the love that lights my home,
The children round my cottage door—
The birds, the bees, the grass and flowers,
And you have dared to call me poor.

Come here and open wide your ears,
And hark the music morning makes,
When from the hills and from the woods
Her high and holy anthem breaks.
Come here and catch the grand old songs,
That nature sings me evermore—
The whisperings of a thousand things,
And tell me, tell me, am I poor?

Not rich is he, though wider far
His acres stretch than eye can roll,
Who has no sunshine in his mind,
No wealth of beauty in his soul.
Not poor is he, though never known
His name in hall or city mart,
Who smiles content beneath his load,
With God and Nature in his heart.

—*Matthias Barr.*

FLOWER-DE-LUCE.

Beautiful lily, dwelling by still rivers,
 Or solitary mere,
 Or where the sluggish meadow-brook delivers
 Its waters to the weir!

Thou laughest at the mill, the whirr and worry
 Of spindle and of loom,
 And the great wheel that toils amid the hurry
 And rushing of the flume.

Born to the purple, born to joy and pleasure,
 Thou dost not toil nor spin,
 But makest glad and radiant with thy presence
 The meadow and the lin.

The wind blows, and uplifts thy drooping banner,
 And round thee throng and run
 The rushes, the green yeomen of thy manor,
 The outlaws of the sun.

The burnished dragon-fly is thine attendant,
 And tilts against the field,
 And down the listed sunbeam rides resplendent
 With steel-blue mail and shield.

Thou art the Iris, fair among the fairest,
 Who, armed with golden rod
 And winged with the celestial azure, bearest
 The message of some God.

Thou art the Muse, who, far from crowded cities,
 Hauntest the sylvan streams,
 Playing on pipes of reed the artless ditties
 That come to us as dreams.

O flower-de-luce, bloom on, and let the river
 Linger to kiss thy feet!

O flower of song, bloom on, and make forever
 The world more fair and sweet
 —H. W. Longfellow.

"It is hard to believe the sin we do our own. One lays the blame on circumstances; another, on those who tempted; a third, on Adam, Satan, or his own nature, as if it were not himself. The fathers have eaten a sour grape, and the children's teeth are set on edge! Perilous to refer the evil in us to any source out of and beyond ourselves. In this way penitence becomes impossible—petitious."

For the Children.

HOW MAN IS SUPERIOR TO ANIMALS.

BY WORTHINGTON HOOKER.

You see, by what I have told you, that man can do with his hands a great variety of things that animals cannot do. It has been said, therefore, by some that the hand is the great thing that makes man superior to animals. But this is not true. Of what use would the hand be, if there was not a mind in the head, that knew how to use it? Suppose that your cat had a hand instead of a paw, could she write with it? No; the mind in her brain does not know enough for this. And so there are a great many other things that we do with our hands, which the cat would not know enough to do with hands, if she had them.

So, then, it is not the hand merely that makes you superior to a cat, but it is the mind,

that uses the hand. Your mind knows more than her mind does, and wants to do more things than her mind ever dreams of. Your mind therefore needs such an instrument as the hand, to do these things with, while a paw answers very well for a cat.

God gives to every animal just such machinery as its mind can use. If it knows a good deal, that is, if it has a good deal of mind, he gives it a good deal of machinery; but, if it has but little mind, he gives it but little machinery; for if he gave it much, it would not know how to work it. An oyster, as I have told you, knows but little as it lies covered up in its shell. It knows how to do only a few things, and so it has but little machinery. A dog or a cat knows a great deal more than an oyster, and therefore it has paws, claws, teeth, &c., as machinery for its mind to use. And as your mind knows so much more than that of a dog or a cat, it has that wonderful machine, the hand, to do what it knows how to do.

The mind of man knows so much that it will contrive, when there are no hands, to use other things in place of them. I once saw a man who had no hands write and do various other things very well with his toes. You know we generally use the right hand most, making the left hand rather the helpmate of the right. But, when the right hand is lost in any way, the mind sets the left hand to work, to learn to do as the lost one did. I once had to cut off the right arm of a very bright little girl. But her busy mind did not stop working because it had lost the best part of its machinery. In less than a fortnight, I saw her sewing with the left hand, fastening her work with a pin, instead of holding it as she used to do.

There is some other machinery, besides the hands, that you have, which animals have not. It is the machinery that is in the face. A dog, when he is pleased, looks up at you and wags his tail; but he cannot laugh or even smile, neither can he frown. Why? Because there is none of the smiling, and laughing, and frowning machinery there. And so it is with other animals.

The variety of work that this machinery of expression does in the face of man is very great, as you can see, if you watch the varied expressions of countenance in persons engaged in animated conversation. But there is very little variety of expression in the face of an animal. Now why is it that they have not the same muscles of expression that we have? It is for the same reason that they have not hands. The mind of man has a great many more thoughts and feelings than the mind of an animal has. It needs, therefore, more machinery to express these thoughts and feelings. The wagging of a dog's tail answers very well to express his simple feeling of pleasure; but you

have so many different pleasant thoughts and feelings that you need the varied play of the muscles of the face to express them.

But some animals have certain muscles of expression in the face that we have not. They are the snarling muscles, as they are called. They draw up the upper lip on each side of the mouth in such a way as to show the long tearing teeth. Now the reason we have no such muscles is, that we ought never to have snarling feelings. I have seen both men and children look very badly when they were angry; but they would have looked a great deal worse, if they had snarling machinery in their faces, as wolves, and cats and dogs have in theirs.

There is some machinery that animals have, just as we do, which they cannot use to do as many things as we can, because they do not know how. I will give you an example, and then you will see what I mean. Did you ever think why it is that animals cannot talk? It is not because they have not the machinery for talking. Many of them have tongues, teeth, lips, &c. These are the things that we use to talk with, and yet, though they have them, and have a voice that comes out from their throats as ours does, they cannot talk. Why is this? It is because they do not know how to use these parts in talking, though they do know how to use them in other things, as eating. The cow knows how to use her teeth, and lips, and tongue in eating; but if she had a mind like yours, she would use them in talking, and would not merely low.

The parrot, you know, does know how to talk after a fashion. This particular faculty is given to it, though it is rather a stupid bird about other things. And after all, its talking is a very awkward imitation of the speech of man; it only says what it hears people say, and that in a very bungling manner.

Though man has more machinery and can do more things than any other animal, there are some things that some animals can do better than he can. Man can climb, but he cannot do it as well as a cat or a monkey. He can swim, but not as well as a fish. The frog and the grasshoppers are better jumpers. The horse and the dog can run faster than he can. He cannot see as far as some birds. He has but two eyes, but the fly has thousands of eyes, so that it can see in all directions at once. He cannot smell as well as the dog, who can follow the track of his master, by the scent left in his footsteps. He can mimic different sounds, but the mocking bird can beat him at this.

But, besides all this, there are some things done by some animals that man cannot do at all. He cannot fly like the birds and insects. He cannot go to roost like the birds. He cannot walk along on the wall over his head, as the fly does, with the suckers on its feet.

Each animal is fitted to do just those things that it needs to do. For example, the monkey needs to climb to get his living, and the Creator has therefore made him so that he can climb very easily. For this purpose, instead of having two hands and two feet, as we have, he has four things, shaped somewhat like hands, with which he can grasp the limbs of trees. I might give you other examples, but you can find many in the chapters on "what animals use for hands,"—"the tools of animals," and their instruments of defense and attack.

ASSURANCE.—"Knowing in yourselves," saith the Apostle, "that ye have in heaven a better and more enduring substance." So our translation renders it; but in the original it is "Know that in yourselves you have a better and a more enduring substance in heaven;" those that are assured of the truth of their own graces have a heaven in themselves; a better and more enduring substance in themselves; such discoveries of God and sweet peace and tranquility of soul; such overflowing joys of the Holy Ghost that heaven itself is never able to bestow other kind of happiness than this is, though there they shall have it in further degree and measure.

SHEPHERD STOCKINGS AND THEIR KNITTERS.

There is perhaps no community that gives such indications of industry among the female population as Shetland. The knitting-needles and the worsted are continually in their hands, and seem to form part and parcel of the woman herself. If you take a walk towards Tingwall, you will meet or pass dozens of women going for or returning with peats from the hill, all busy knitting—one a stocking, another a stout shawl or cravat. The finer articles—scarfs, veils, and lace shawls, which are often exquisitely fine—cannot be worked in this off-hand way, and are reserved for leisure hours at home. The "keyshie"—a straw basket, like a large inverted beehive—may be full or empty, but you never fail to find the busy fingers. This carrying of peats is an almost daily task, and you sometimes see a woman with strongly-marked features and large frame, who, from constant exposure to sunshine and shower, and rendered gaunt and wiry by hard work, recalls Sir Walter Scott's description of "Norna of Fitful Head." The poorer classes generally wear no shoes, but "rivlins," a kind of sandal made of untanned cowhide, or sometimes seal-skin, with the hair outside, and lashed to the foot with thongs. All the wool of the pure Shetland sheep is fine, but the finest grows under the neck, and is never shorn off, but "roosed"—that is, gently pulled. It is said that an ounce of wool can by skill be spun into upwards of 1,000 yards of three-ply thread. Stockings can be knitted of

such fineness as to be easily drawn through a finger-ring. The annual proceeds of the industry are said to be not less than £10,000. It is quite common for a servant, when making an engagement, to stipulate that she shall "have her hands to herself," meaning that all she can make by knitting is to go into her own pocket. The industry of the women is to be accounted for by the fact that by their knitting they supply themselves with dress, but especially with tea, of which they are intemperately fond. It is a perfectly ascertained fact, that the value of tea annually consumed in Shetland far exceeds the whole land rental—about £30,000. Very large quantities of eggs are sent south, bringing in, it is said, some thousands of pounds annually, a great portion of which finds its way into the teapot.—*Good Words.*

(N. Y. Correspondence of the Louisville Courier.)

HOW THE ATLANTIC CABLE IS WORKED.

The other day a telegrapher, who had looked into the matter, told me, in a few words, how the Atlantic cable is worked. I had read column after column in the papers in a vain effort to understand how it was done; and was astonished enough, I assure you, to see how simple a thing was the instrument which talks across the sea. Imagine a small needle—it weighs only three-seventeenths of a grain—set so that either end points to a powerful fixed magnet. Over this needle is a board in which is a small hole, above and behind which is a black board. One end of the needle, or rather magnet, is the positive, and the other a negative one.

The battery is taken off at one side of the ocean by the action of the magnets themselves when the operator at the other side is writing. The battery used at either end contains only three cups—a wonderfully small number when you know that it takes a thousand or more to work the various wires leading out of No. 145 Broadway, the head office here. The application of a current from the battery to the posi-

tive magnet at Valentia induces an attraction of the needle by the negative magnet at Heart's Content, or *vice versa*. The movement of the needle, however, is so very small that it could not be detected by the naked eye. A powerful magnifier, however, carries the reflection of the motion of the needle through the hole in the board above, and transfers it in an enlarged, and with the aid of light, an enlightened form, to the blackboard. The alphabet is similar to, though not exactly like, the "Morse," and a motion of the needle one way implies a dash, or the other way a dot; of course as many of each can be made use of as is desirable. The magnets being equally attractive, hold the needle stationary when no other influence is applied. And now for the reason why a small battery works the best. It is not that a large battery, as has been popularly supposed, would eat up the conducting wire, but that it would make the motion of the delicate needle too violent—to use a vulgar phrase, it would be perpetually "wabbling about." The small current used has no such effect.—*The Press.*

ITEMS.

The Emperor Napoleon has issued an important order. It directs that the address of the Chambers, in reply to the speech from the Throne, shall be discontinued; grants to the Legislative Body the right of questioning the Government; proposes that offences of the press be tried in the Correctional Courts; that the stamp duties be reduced, and that the right of the people to meet in public be limited only by those regulations necessary for the public safety. The decree concludes by declaring that these reforms will now crown the edifice of a State founded upon the national will.

The London *Times* states that the net earnings of the Anglo-American Telegraph Company have thus far exceeded the rate of twenty-five per cent. per annum, and that a dividend of ten per cent. "on account" will soon be paid out of the proceeds of the first six months business.

The Supreme Court of Alabama has decided the act of Congress, requiring a stamp upon State legal processes, to be unconstitutional. Chief-Justice Walker also decides that Alabama being *de facto* a government under the Confederacy, its personal representatives are protected from all loss on Confederate investment under an act of the Legislature. The Court was unanimous.

CONGRESS.—In the Senate, among other bills and resolutions, the following were passed or referred:—A bill supplementary to the act to prevent smuggling was introduced and referred to the Committee on Commerce. A bill amendatory of the homestead act was introduced and referred to the Committee on Public Lands. A bill amendatory of the postal laws was referred to the Committee on Post Offices and Post Roads. The Committee of Ways and Means was instructed to inquire into the expediency of abolishing in whole or in part the tonnage tax, and of adopting a system of differential duties favoring American ships, in order that they may have a share of the importation of foreign merchandise. A resolution was adopted ordering an inquiry into the facts attending the Fort Phil Kearney massacre. The

Tariff bill was several times under discussion. The House bill amending the habeas corpus act and regulating judicial proceedings in certain cases, was passed, and goes to the President. A communication was received from the Governor of West Virginia announcing that that State had ratified the constitutional amendment.

HOUSE.—A bill supplementary to the act to prevent and punish smuggling was passed. A resolution suspending the cancellation or retirement of legal-tender notes for two years was referred. A bill was introduced defining the powers of the Supreme Court, which provides that when that court is called upon to decide as to the validity of any law of the United States or the construction of a clause in the Constitution, the hearing must be had before a full bench of the court, and the decision of the court must be unanimous. A bill to regulate the sale of surplus gold in the Treasury was passed. A resolution was introduced to extend the provisions of the agricultural college act to Tennessee, which gave rise to some discussion. An amendment was agreed to providing that no one should hold the position of professor or teacher in the institution who held military or civil office under the rebel government or under the State governments, and in this shape the bill was passed. A bill was passed, appropriating \$9,500 as compensation for a building destroyed at Anansdale, Va., for military purposes. This is the first bill of the kind that has yet been passed.

THE FREEDMEN.—Communications from Texas represent that in the north-eastern counties of the State the freedmen are more oppressed and brutally treated than in the days of slavery. Says the report: "The lash is more cruelly administered than ever before;" the freedmen who have cultivated land and raised crops have been robbed of all the fruits of their toil. A member of the grand jury of Red River County was heard to say that they dared not indict these criminals known to them to be guilty. Outrages, from cold-blooded murders down, have occurred, and there is no one to whom the blacks can appeal for redress. A recent letter from Austin gives an account of the murder of two freedmen—one near Austin, and the other at Home Bend. The murderers were white men. A case is reported where a freedman at Prairie Lea was cruelly whipped for addressing a young man as "Tom," instead of "Master Thomas." Another was shot for refusing to lend his bottle of whiskey to two white men. The civil authorities will not take any steps to bring the offenders to justice. In Panola County there exists a gang of five or six white men who live by robbing the freedmen. The citizens themselves are afraid of them, and the civil authorities powerless, because witnesses dare not testify against them. The military commandant at Victoria having refused to assist the Freedmen's Bureau officers, General Griffin, the military commander of the State, has issued an order to the effect that all military officers must assist the Bureau in the contingencies provided for in the Bureau and Civil Rights acts. The only cheering news from the State relates to labor. Gen. Kiddoo, in a recent tour of observation, found the negroes actively making contracts for the ensuing crop. In spite of immigration, there is still a paucity of laborers.—*The Nation*.

A HISTORY OF THE RELIGIOUS SOCIETY OF FRIENDS, FROM ITS RISE TO THE YEAR 1823. Volumes III and IV. By SAMUEL M. JANNEY.

The third and fourth volumes of this work have been unavoidably delayed by causes connected with the late civil war. During the five years that have elapsed since the second volume was published, so many changes have taken place that it is deemed expedient to issue a new Prospectus.

The two volumes now proposed to be published contain the

history of the Society from the year 1691 to 1823, embracing much original matter that has not appeared in any other history. Biographical sketches are given of the most prominent members of the Society in Great Britain and America, with many instructive passages from their writings and interesting anecdotes.

Among the subjects of deep interest treated of in these volumes are: the perils and preservation of Friends during the Irish Rebellion of 1798; the course they pursued during the war of American Independence; their efforts to civilize the Indians and preserve peace with them; the rise and progress of their testimony against Slavery; their early labors in the cause of Temperance; the Separation in Ireland at the beginning of this century; and the Separation in America in 1821-3, with the causes that led to it, and the results that have followed.

The cost of paper, printing and binding having greatly increased since the first prospectus was issued, it is found that the work cannot be published, without considerable loss, at the price originally intended. The price will be, therefore, \$2.00 per volume, bound in cloth; and \$2.25 per volume, bound in sheep library style; but those subscribers under the first prospectus who have taken the first two volumes, will be furnished with the third and fourth volumes at \$2.00 each, bound in sheep.

The first two volumes can be obtained from the publisher or his agents, at \$2.00 each, sheep binding.

Agents are requested to return this prospectus as speedily as possible—as the work is now in press—with full list of names and residences of subscribers, to the author's publisher. Agents will be allowed one copy for every six copies sold by them, and they can be furnished with lists of their subscribers upon application to the Publisher.

SELECTIONS FROM THE WRITINGS OF JOHN BARCLAY.

(Continued from page 755.)

To ———,

MARAZION, 11th of Second month, 1824.

Dear ———, I have heard scarce a word respecting thee for a long time, but nevertheless I hold thee very precious before my view; and thy humble waiting and walking is often encouraging. I should be much pleased wast thou inclined, in the freedom of old friendship, to salute me by letter at any time; thou knowest not of what service it might prove to me, and be made instrumental to build me up in the most holy faith, as heretofore used to be the case, when we were nearer in the outward one to another, and at times, blessed in each other's society. I have a full persuasion, however varied our habits and however distance as to space may have operated, together with other circumstances, that we are under the special keeping of the heavenly Shepherd; who can feed, and lead, and cause to lie down, and will permit nothing to make afraid, or to scatter from his pasture of life and fold of eternal rest. "My Father is greater than all," and none shall pluck out of his hand those who keep near Him, and lean alone upon Him. For he restoreth the soul, and leadeth in the paths of righteousness for his name's sake. So that though we may have to walk through the valley of the shadow of death we need fear no evil,—He is with us, his rod and staff they comfort us.

And when he is pleased to anoint the head as with oil, does not our cup flow over; and are we not ready to cry out,—“Surely goodness and mercy shall follow me all the days of my life, and I will dwell in thy house forever?” This is, I believe, at times thy experience, as it is my own. Then for us the feeble ones, who may, under discouraging apprehensions of our own state, be walking fearfully along, as with our heads often hanging down very low, and who may be said, in some sense, to have answered the call of the Lord, (as in Joel,) “Turn ye even to me with all your heart, and with fasting, and with weeping, and with mourning,”—even to such the language will go forth,—“be glad and rejoice, for the Lord will do great things,”—“for the pastures of the wilderness do spring, the fig tree and the vine do yield their strength:—and ye shall eat in plenty, and be satisfied, and praise the name of the Lord your God, that hath dwelt wondrously with you: and my people shall never be ashamed.”

Truly in respect to these things that have happened unto me, they have turned to the furtherance of the work of His glory and grace, who doeth all things well; and up to this day, through heights and depths, my experience is consistent with the language, “The right hand of the Lord is exalted,—the right hand of the Lord doth valiantly;” for though he came grief, yet hath he compassion, such as will carry through all. The manifestations of Divine

goodness and wisdom, are indeed very great to the willing and attentive soul; and whilst there are seasons when we are not so sensible of them, others are vouchsafed, in which we *cannot* doubt or fear but that as we continue the diligent and patient followers of our crucified Master, we shall reign with him in a glorious eternity of peace and joy. My mind has been of late more or less, since the decease or release of my beloved G., set on its treasures in the heavens, which will never pass away; and I have been assured, that if I continue in faith to the end of my day, a place will be prepared for me; it seemed almost as if permitted by foretaste, to lay hold of eternal life. Such views are very awful, yet very sweet to me; so that whether they are premonitory, or only admonitory, they have the effect of quickening me in the duties of life, and of increasing my true enjoyment therein.—“Work whilst it is day;” for “this is not your rest.”

Believe me, with warmth of affection,

Thy friend, J. B.

1824, *Third month 22d*.—I desire when the hour of my departure draws nigh, to be clothed with faith towards God, and with resignation to commit my dear and only little one into his hands, who gave him to me:—leave thy fatherless children unto me;—“let their widows also trust in me,” “the Father of the fatherless.”

1824, *Fourth month 2d*.—I was this day inclined to believe, as I have been often of late, that the bereavement I have sustained in the loss of my tender partner, was intended in a peculiar manner for my good. I have been led to think, that as my dear wife was given to me at a time when I greatly wanted a help-meet; and as she was one of a noble and capacious mind, insured to trouble and difficulty, able to counsel and to assist me; so when the time for her was come, to show me how to pass through the dark valley, she fulfilled the Divine will in a wonderful degree, as I believe, by setting me an excellent example through Him who strengthened her, and who bore up her afflicted spirit through all that were permitted to assail. O! it is often wonderful to me, to think how suddenly at the last, she was summoned to take her leave of all that was near and dear in this life, and how this was accomplished; so that there seemed no agitation or disquietude, but a holy magnanimity, a deep and solemn reflecting on her condition, and a reverting to her only hope of glory. And now I am left, with the image of a dear devoted child of God, my soul's fellow, often brought before me; to show me how to lay down these shackles, how to put off this outward man, and to yield up my spirit to my God and her God!—How strongly has the uncertainty of my continuance in life been before me; and strong have been my hope and humble assurance, that mercy will compass

me about, and that the rest and portion of the righteous will be mine. I am ready to say, that those that come after me, will be helped, as I have been; at least in proportion as they follow the Lord's leadings: for this has truly been my inexpressible desire and comfort; and such will never be forsaken.

London, 1824, Fifth month 11th.—I have had many bright seasons, much assurance and earnest of a better state, as I have walked by the way, and as I have been on my bed. “In all their afflictions,” it is said, “he was afflicted; and the angel of his presence saved them.” This language has been fulfilled towards me, and towards my dear deceased partner; and those that come after me will find, to their unspeakable support and consolation, that the same Divine Being is rich toward all that call upon him: if faithful, “this God will be their God for ever and ever; he will be their guide even unto death.”

To——.

RUSSELL SQUARE, 21st of Sixth month, 1824.

My Dear Friend.—It is pleasant to salute thee thus, and to remember thee from time to time, as a brother and companion in the heavenly way and warfare, striving together with me for an increase of strength and wisdom, to enable us to stand steadfast, immovable, and abounding in the work appointed us. I trust, that as the circumstance of trial and distress, which were on this very day last year consummated in the release of my dear wife, and of which my mind feels often keenly sensible, were all turned to an unspeakable account and benefit, especially with regard to myself; so the precarious delicate state of my own health for some time past, has operated and does continue to operate advantageously on the better part; and although in this visit to London, I may have been deprived of many seasons and showers of Divine good, there has been no want of the care and safe guidance of that invisible hand of Him, whose visitations uphold or preserve the spirit, and whose comforts delight the soul.

1824, *Seventh month 16th*.—So far recovered (from illness in London) as to go to C——. The Lord Almighty was eminently near me, by support and help in the needful hour, and through days and nights of tedious ailing and irritation; my situation often caused many tears in my retirement, but the Lord was near and comforted me, and helped me to gratitude as well as acquiescence: my tears were often turned into tears of joy. Much have I thought in my distresses of that sweet answer of my dear partner, which she quickly and smilingly gave me, when in great depression, observing a sparrow on the house top, opposite to her window, I said, “Like a sparrow alone on the house-top;” she replied, “Not one of them forgotten before God:” O! I find it so to my un-

unspeakable consolation in low seasons. And I think, since my trials and bereavement, that more of the consolations of Christ are poured into my soul, than used to be the case. Many have been the blessings shed on me abundantly in this tedious, though short confinement. May the Lord have the honor and praise, not only now, but for evermore!

17th.—Went out to ride with —; a sweet day! What a change from my sick room and sofa and the smoky city, to the extensive prospects on the Downs, and richness of nature's verdure. Was engaged in conversation with —: I feel an interest in young invalids. O! that the ends of Providence may be answered in them, and in me also; then all will be well. O! these light afflictions;—what a moment do they last, when compared with the rich eternal recompense, reserved for those that commit the keeping of their souls in patient well doing unto a faithful Creator.

18th.—First day; at Croydon meetings.—I had a sweet night of pouring forth of the heart unto the Most High. "I will cry unto God Most High, unto God that performeth all things for me!" Floods of tears,—tears of joy,—because the Lord God sees me, and hath mercy on me. I had reference to my forlorn state, and to the circumstance of my late afflictive bereavement; and I had a wonderful evidence that the Lord would be all in all to me, as he had been to my beloved partner.

1824, *Seventh month 25th.*—First day. Went to Gracechurch Street meeting, and had my mouth opened by the Lord. O! the peace—the rich flow of it in my bosom, at dear P. B.'s, after dinner; the Lord was with me: melting sweetness came over me in again giving up to express these and other words, "This God is our God for ever and ever, he will be our guide even unto death."

(To be continued.)

God can, indeed, supply the place of *means*, and, in particular cases, He *does* so; acts independent of them, to teach us to trust in Him, in the dearth of them. But, ordinarily, it is otherwise. If the Ethiopian eunuch is to be instructed in the gospel, Philip must be miraculously directed to him, to open to him its glad tidings. If Cornelius is to receive the same blessings, an angel shall instruct him *where* to find a teacher: but not a ray of light does he receive, except through God's appointed ordinance,—the foolishness of *human* preaching, saving them that believe. Look to it, then, that you undervalue not these outward ministrations; but look to it, also, that you do not trust in them. As surely as you do, G d will dry them up to you, and make you feel what wretched vanities are the best ministrations of man, without His Spirit accompanying them. Learn to live above the creature.—*Good.*

LETTER FROM LYDIA P. MOTT.

No VI.

SKENEATELES, Fourth month 27th, 1833.

To M. A. F.—Thy short letter, my dear M. A., was cordial to my feelings. It was an indisputable evidence that the affection I cherish for thee was—yes, is—reciprocated; and may we neither of us suffer any thing past, present, or yet to come, to interrupt the precious sense of it, though long silence intervene from causes over which we have no control. That which we suffer to enter our thoughts may dispossess us of friendship, while externals never can; for if misrepresented to each other, so long as we repel the charge on the faith of our own constancy, the breath of envy or calumny assails in vain.

I feel so well assured that we love each other disinterestedly, that though I regret we can have so little intercourse, no fear or distrust mingles with the regret. The foundation of our friendship was deeper, I trust, than to be affected by the casualties of life. It partook of that against which evil cannot prevail; for pure love ever did and ever will resist evil, and cannot be lost or broken without our voluntary consent. This is a consolation. Had thy H. located himself in some place just on our ordinary track to and from the South Meeting-house, it is probable I should have tarried many a night under your snug roof, and enjoyed that free, social intercourse which is one of the solaces of human life; not but what I should willingly turn aside to where you now reside, did it depend solely on my choice, but in the manner in which we frequently come and go others must decide. However, I keep hoping on that it may be different, and that more frequent opportunities for visiting each other may occur; for as Seneca justly observes, we receive comfort even at a distance from those we love; but then it is light and faint, whereas presence and conversation touches us to the quick; but then we are not to number our friends by the visits that are made us, nor to confound the decencies of ceremony with the offices of united affections. He says also, somewhere else, "Of all felicities the most charming is that of a firm and gentle friendship. It sweetens all our cares, dispels our sorrows, and counsels us in all difficulties." This is the permanent bond between thee and thy H., and knowing this, has an insensible effect, I doubt not, to check that exertion which I should probably make to overcome obstacles which prevent my seeing thee. Did I not believe this to be the case,—that is, did I imagine thee lonely or unfriended, I should feel bound to press through difficulties I now yield to. Another more powerful consideration has been my firm belief that thou enjoyest communion pure with Him whom thou sought to know and serve when our friendship

commenced, leaving my mind free from solicitude on this great point, the surest and only immutable source of true happiness. Ah! my dear M., continue to resign thyself to His all-wise disposal, and He will be mouth and wisdom in all cases, even in the minutest,—in the government of thy children and household as well as in rarer or greater occurrences,—being strength in weakness and ever a present helper. What an unspeakable mercy, leading us to exclaim with David, "Lord, what is man that thou art mindful of him!" All that is wanting on our part is a listening, watchful frame of mind, to hearken and hear, for the word remains nigh in the heart and in the mouth, now as much as at any distant period of time, "Jesus Christ, the same yesterday, to-day and forever. I perceive Friends are passing to meeting, so must close. Remember me affectionately to H., and often send a line to thy old friend,

L. P. M.

May we continually pray for an understanding heart,—a heart renewed in divine knowledge by the Spirit of God,—that we may discern between the polar truths of the gospel, and the doubtful inductions of unassisted human reason upon them.

ELIJAH.

BY F. W. ROBERTSON.

"But he himself went on a day's journey into the wilderness, and came and sat down under a juniper-tree, and said, It is enough; now, O Lord, take away my life; for I am not better than my fathers."—1 KINGS xix. 4.

It has been observed of the holy men of Scripture, that their most signal failures took place in those points of character for which they were remarkable in excellence. . . . On the reception of Jezebel's message, Elijah flies for his life; toils on the whole day; sits down under a juniper tree, faint, hungry and travel-worn, the gale of an oriental evening, damp and heavy with languid sweetness, breathing on his face. The prophet and the man give way. He longs to die; you cannot mistake the presence of causes in part purely physical. We are fearfully and wonderfully made. Of that constitution, which, in our ignorance, we call union of soul and body, we know little respecting what is cause and what effect. We would fain believe that the mind has power over the body; but it is just as true that the body rules the mind.

Causes apparently the most trivial—a heated room, want of exercise, a sunless day, a northern aspect—will make all the difference between happiness and unhappiness, between faith and doubt, between courage and indecision. To our fancy there is something humiliating in being thus at the mercy of our animal organism. We would fain find nobler causes for our

emotions. We talk of the hiding of God's countenance, and the fiery darts of Satan. But the picture given here is true. The body is the channel of our noblest emotions, as well as our sublimest sorrows. Two practical results follow: First, instead of vilifying the body, complaining that our nobler part is chained down to a base partner, it is worth recollecting that the body, too, is the gift of God in its way Divine—"the temple of the Holy Ghost;" and that to keep the body in temperance, soberness and chastity, to guard it from pernicious influence, and to obey the laws of health, are just as much religious as they are moral duties; just as much obligatory on the Christian as they are on a member of a Sanitary Committee. Next, there are persons melancholy by constitution, in whom the tendency is incurable; you cannot exorcise the phantom of despondency. But it is something to know that it is a phantom, and not to treat it as a reality—something taught by Elijah's history, if we only learn from it to be patient, and wait humbly the time and good pleasure of God.

2. Want of sympathy. "I, even I, only am left."

Lay the stress on *only*. The loneliness of his position was shocking to Elijah. Surprising this; for Elijah wanted no sympathy in a far harder trial on Mount Carmel. It was in a tone of triumph that he proclaimed that he was the single, solitary prophet of the Lord, while Baal's prophets were four hundred and fifty men. Observe, however, the difference. There was in that case an opposition which could be grappled with; here, nothing against which mere manhood was availing. The excitement was passed—the chivalrous look of the thing gone. To die as a martyr—yes, that were easy, in grand failure; but to die as a felon—to be hunted, caught, taken back to an ignominious death—flesh and blood recoiled from that. And Elijah began to feel that popularity is not love. The world will support you when you have constrained its votes by a manifestation of power, and shrink from you when power and greatness are no longer on your side.

"I, even I, only am left." This trial is most distinctly realized by men of Elijah's stamp, and placed under Elijah's circumstances. It is the penalty paid by superior mental and moral qualities that such men must make up their minds to live without sympathy. Their feelings will be misunderstood, and their projects uncomprehended. They must be content to live alone.

What greater minds like Elijah's have felt intensely all we have felt in our own degree. Not one of us but what has felt his heart aching for want of sympathy. We have had our lonely hours, our days of disappointment, and our moments of hopelessness—times when our

highest feelings have been misunderstood, and our purest met with ridicule.

Days when our heavy secret was lying unshared, like ice upon the heart. And then the spirit gives way; we have wished that all were over, and that we could lie down tired, and rest, like the children, from life; that the hour was come when we could put down the extinguisher on the lamp, and feel the last grand rush of darkness on the spirit.

Now, the final cause of this capacity for depression, the reasons for which it is granted us, is that it may make God necessary. In such moments it is felt that sympathy beyond human is needful. Alone, the world against him, Elijah turns to God. "It is enough; now, O Lord."

3. Want of occupation.

As long as Elijah had a prophet's work to do, severe as that work was, all went on healthily; but his occupation was gone. To-morrow and the day after, what has he left on earth to do? The misery of having nothing to do proceeds from causes voluntary or involuntary in their nature. Multitudes of our race, by circumstances over which they have no control, in single life or widowhood—in straitened circumstances—are compelled to endure lonely days, and still more lonely nights and evenings. They, who have felt the hours hang so heavy, can comprehend part of Elijah's sadness.

This misery, however, is sometimes voluntarily incurred. In artificial civilization certain persons exempt themselves from the necessity of work. They eat the bread which has been procured by the sweat of the brow of others; they skim the surface of the thought which has been ploughed by the sweat of the brain of others. They are reckoned the favored ones of fortune, and envied. Are they blessed? The law of life is, In the sweat of thy brow thou shalt eat bread. No man can evade that law with impunity. Like all God's laws, it is its own executioner. It has strange penalties annexed to it. Would you know them? Go to the park, or the esplanade, or the solitude, after the night of dissipation, and read the penalties of being useless in the sad, jaded, listless countenances,—nay in the very trifles which must be contrived to create excitement artificially. Yet these very eyes could, dull as they are, beam with intelligence; on many of those brows is stamped the mark of possible nobility. The fact is, that the capacity of *ennui* is one of the signatures of man's immortality. It is his very greatness which makes inaction misery.

If God had made us only to be insects, with no nobler care incumbent on us than the preservation of our lives, or the pursuit of happiness, we might be content to flutter from sweetness to sweetness, and from bud to flower. But if men with souls live only to eat and drink, and

be amused, is it any wonder if life be darkened with despondency?

4. Disappointment in the expectation of success.

On Carmel, the great object for which Elijah had lived, seemed on the point of being realized. Baal's prophets were slain; Jehovah acknowledged with one voice; false worship put down. Elijah's life-aim, the transformation of Israel into a kingdom of God, was all but accomplished. In a single day all this bright picture was annihilated.

Man is to desire success, but success rarely comes.

The wisest has written upon life its sad epitaph—"All is vanity," that is, nothingness.

The tradesman sees the noble fortune for which he lived, every coin of which is the representative of so much time and labor spent, squandered by a spendthrift son. The purest statesmen find themselves at last neglected and rewarded by defeat. Almost never can a man look back on life and say that its anticipations have been realized. For the most part life is disappointment, and the moments in which this is keenly realized are moments like this of Elijah's.

II. God's treatment of it.

1. First, he recruited his servant's exhausted strength. Read the history. Miraculous meals are given,—then Elijah sleeps, wakes and eats; on the strength of that, goes forty days' journey. In other words, like a wise physician, God administers food, rest and exercise; and then, and not till then, proceeds to expostulate, for, before, Elijah's mind was unfit for reasoning. . . .

2. Next, Jehovah calmed his stormy mind by the healing influences of Nature. He commanded the hurricane to sweep the sky, and the earthquake to shake the ground. He lighted up the heavens till they were one mass of fire. All this expressed and reflected Elijah's feelings. The mode in which nature soothes us is by finding meeter and nobler utterance for our feelings than we can find in words—by expressing and exalting them. In expression there is relief. Elijah's spirit rose with the spirit of the storm. Stern, wild defiance, strange joy, all, by turns, were imaged there. Observe, "God was not in the wind," nor in the fire, nor in the earthquake. It was Elijah's stormy self reflected in the moods of the tempest, and giving them their character.

Then came a calmer hour. Elijah rose in reverence, felt tenderer sensations in his bosom. He opened his heart to gentler influences, till, at last, out of the manifold voices of Nature, there seemed to speak, not the stormy passions of the man, but the "still small voice" of the harmony and the peace of God.

There are some spirits which must go through a discipline analogous to that sustained by

Elijah. The storm-struggle must precede the still small voice. There are minds which must be convulsed with doubt before they can repose in faith. There are hearts which must be broken with disappointment before they can rise into hope. There are dispositions, which, like Job, must have all things taken from them before they can find all things again in God.

Blessed is the man who, when the tempest has spent its fury, recognizes his Father's voice in its undertone, and bares his head and bows his knee, as Elijah did. To such spirits, generally those of a stern, rugged cast, it seems as if God had said: "In the still sunshine and ordinary ways of life you cannot meet Me; but, like Job, in the desolation of the tempest you shall see My Form, and hear My Voice, and know that your Redeemer liveth."

3. Besides, God made him feel the earnestness of life.

What doest thou here, Elijah? Life is for doing: a prophet's life for nobler doing,—and the prophet was not doing, but moaning.

Such a voice repeats itself to all of us, rousing us from our lethargy, or our despondency, or our protracted leisure, "What doest thou here?"—here in this short life. There is work to be done; evil put down—God's church purified—good men encouraged—doubting men directed—a country saved—time going—life a dream—eternity long—one chance, and but one forever. What doest thou here?

Then he went on further, "Arise, go on thy way." That speaks to us: on thy way. Be up and doing—fill up every hour, leaving no crevice, nor craving for a remorse or a repentance to creep through afterwards. Let not the mind brood on self; save it from speculation, from those stagnant moments in which the awful teachings of the spirit grope into the unfathomable unknown, and the heart torments itself with questions which are insoluble, except to an active life. For the awful future becomes intelligible only in the light of a felt and active present. Go, return on thy way if thou art desponding,—on thy way, health of spirit will return.

4. He completed the cure by the assurance of victory. "Yet have I left me seven thousand in Israel who have not bowed the knee to Baal." So, then, Elijah's life had been no failure after all. Seven thousand at least in Israel had been braced and encouraged by his example, and silently blessed him, perhaps, for the courage which they felt. In God's world, for those that are in earnest there is no failure. No work truly done, no word earnestly spoken, no sacrifice freely made, was ever made in vain. Never did the cup of cold water given for Christ's sake lose its reward.

Distinguish, therefore, between the Real and the Apparent. Elijah's apparent was in the

shouts of Mount Carmel: his real success was in the unostentatious, unsurmised obedience of the seven thousand who had taken his God for their God.

A lesson for all. For teachers who lay their heads down at night sickening over their thankless task. Remember the power of indirect influences; those which distil from a life, not from a sudden, brilliant effort. The former never fail; the latter, often.

There is good done of which we can never predicate the when or where. Not in the flushing of a pupil's cheek, or the glistening of an attentive eye; not in the shining results of an examination does your real success lie. It lies in that invisible influence on character which He alone can read who counted the seven thousand nameless ones in Israel.

One who had experienced a change of fortune said: "When I was rich, I possessed God in all things; and now I possess all things in God." Contentment depends more on the disposition of the mind than on the circumstances of our life.

Extracts from the Minutes of the Meetings for Reading and Conversation, held at Race St. Meeting house, Philadelphia.

First mo. 23d, 1867.—The minutes of the preceding meeting having been read, a chapter from a work entitled, "The Testimonies of Truth on the Subject of Worship," and the following extract from the writings of Isaac Pennington upon the same subject, were read:—

"For the Lord requireth of his people not only to worship him apart, but to meet together to worship him, in the seasons, and according to the drawings of his spirit; and they that are taught of him, dare not forsake the assembling of themselves together, as the manner of some is; but watch against the temptations and snares, which the enemy lays to deceive them therefrom, and to disturb their sense by, that they might not feel the drawings of the Father thereunto.

"And this is the manner of their worship. They are to wait upon the Lord, to meet in the silence of flesh, and to watch for the stirrings of his life, and the breakings forth of his power amongst them. And in the breakings forth of that power, they may pray, speak, exhort, rebuke, sing or mourn, &c., according as the Spirit teaches, requires, and gives utterance. But if the Spirit do not require to speak, and give to utter, then every one is to sit still in his place, (in his heavenly place, I mean,) feeling his own measure, feeding thereupon, receiving therefrom (into his spirit) what the Lord giveth. Now in this is edifying, pure edifying, precious edifying; his soul who thus waits is hereby particularly edified by the spirit of the Lord at every meeting. And then, also, there is the life of the whole felt in every vessel that is turned to its measure; inasmuch as the warmth of life in each vessel doth not only warm the particular, but they are like a heap of fresh and living coals, warming one another, inasmuch as a great strength, freshness and vigor of life flows into all. And if any be burthened, tempted, buffeted by

Satan, bowed down, overborne, languishing, afflicted, distressed, &c., the estate of such is felt in spirit, and secret cries, or open (as the Lord pleaseth) ascend up to the Lord for them; and they many times find ease and relief, in a few words spoken, or without words, if it be the season of their help and relief with the Lord. For absolutely silent meetings (wherein there is a resolution not to speak) we know not; but we wait on the Lord, either to feel him in words, or in silence of spirit without words, as he pleaseth. And that which we aim at, and are instructed to by the Spirit of the Lord as to silent meetings, is that the flesh in every one be kept silent, and that there be no building up, but in the spirit and power of the Lord.

"Now there are several states of people: some feel little of the Lord's presence, but feel temptations and thoughts, with many wanderings and roving of mind. These are not yet acquainted with the power, or at least know not its dominion, but rather feel dominion of the evil over the good in them. And this is a sore travelling and mournful state, and meetings to such as these (many times) may seem to themselves rather for the worse than for the better. Yet even these, turning, as much as may be, from such things, and cleaving (or at least in truth of heart-desiring to cleave) to that which disliketh or witnesseth against them, have acceptance with the Lord herein; and continuing to wait in this trouble and distress, (keeping close to meetings in fear and subjection to the Lord who requireth it, though with little appearing benefit,) do reap an hidden benefit at present, and shall reap a more clear and manifest benefit afterwards, as, the Lord wasteth and weareth out that in them, wherein the darkness hath its strength. Now to evidence that the Lord doth require these silent meetings, or meetings after this manner silent, it may thus appear.

"God is to be worshipped in spirit, in his own power and life, and this is at his own disposal. His church is a gathering in the Spirit. If any man speak there, he must speak as the oracle of God, as the vessel out of which God speaketh; as the trumpet out of which he gives the sound. Therefore there is to be a waiting in silence, till the Spirit of the Lord move to speak, and also give words to speak. For a man is not to speak his own words, or in his own wisdom or time; but the Spirit's words, in the Spirit's wisdom and time, which is when he moves and gives to speak. And seeing the Spirit inwardly nourisheth, when he giveth not to speak words, the inward sense and nourishment is to be waited for, and received as it was given when there are no words. Yea, the ministry of the Spirit and life is more close and immediate when without words, than when with words, as has been often felt, and is faithfully testified to by many witnesses. Eye hath not seen nor ear heard, neither hath entered into the heart of man, how and what things God reveals to his children by his Spirit, when they wait upon him in his pure fear, and worship and converse with him in Spirit; for then the fountain of the great deep is unsealed, and the everlasting springs surely give up the pure and living water."

The practice of early Friends, of occasionally singing hymns in their meetings for worship, as alluded to in the above extract was commented upon by a Friend, who informed us that it was not in concert, but as an individual act, which becoming distasteful to some Friends, led to difficulties in one of the meetings in the north of England.

The ground of objection to the singing of

hymns in concert was stated as being founded in the varying state of the minds of those participating: whilst some could truly utter the sentiments contained in them, others must compromise truth, by professions which are not altered in character, by the fact of their being clothed in sweet sounds.

A Friend adverted to the decadence in the Society in many neighborhoods, and to the fact that it does not increase in numbers, as other sects increase, as a proof that it needs some measures by which greater interest and zeal can be infused into the organization, and the young, especially, brought forward to participate in its concerns.

The following measures were proposed as likely to tend to this end:—1st, the addition to the usual First-day Meetings, of a second meeting occurring at the close of the regular Meeting for worship, with a short recess intervening. This second meeting to be devoted to suitable reading and conversation upon Moral and Religious subjects, conducted under the care of judicious Friends, but without excluding any of the members from participation.

2d.—The holding of Monthly Meetings on First-day as second meetings instead of in the middle of the week.

3d.—The introduction of libraries in connection with all the Friends' Meetings, which shall be open for the distribution of books at the time of the second meetings.

4th.—The establishment of First-day schools, on every First-day afternoon, for the inculcation of moral and religious truth unconnected with sectarian theology—this measure to be studied and systematized to meet the wants of the society, especially in the country, reference being had to the good of the teachers and pupils.

5th.—The abolition of the present separation of the sexes in meetings for worship, that all of one family might sit together and be influenced by the immediate company and sympathy of each other.

The consideration of these propositions occupied much of the remaining portion of the meeting. With most of them unity was expressed, and many views were presented calculated to encourage such an effort to awaken renewed interest among those portions of our Society which seem to be on the decline. It was acknowledged that such measures could not be adopted without much examination, throughout the whole Society; and could only be made practicable by being first tried in single instances where Friends were favorably disposed toward them and favorably situated for the experiment.

The subject of instituting a correspondence with Friends of other places, engaged in similar meetings with those we are now holding, being introduced, was deferred for further consideration at an adjourned meeting to be held

next Fourth-day evening, at which time the general subjects which had engaged the attention of this meeting will be resumed.

1st mo. 31st, 1867.—An adjourned meeting, which was opened by reading the minutes of the last meeting, introducing the several propositions made at that time with reference to increasing the interest in our Society among its younger members.

Practical objections to the propositions to hold Monthly Meetings on First-day, at the close of meetings for worship, were presented by several Friends. It was said that in this city the domestic arrangements of many families would be interfered with by the delay which would be occasioned by a long sitting in the middle of the day, whilst in the country, the fact that most Monthly Meetings are composed of several preparative meetings, would quite forbid connecting them with any one meeting for worship held at the same time as the other. The small attendance of our own Monthly Meetings was remarked upon as occasioned in some degree by the unavoidable engagements of members whose time is not at their own disposal, but partly by the lukewarmness of members who allow comparatively trivial concerns to take the place of this imperative duty. Such were encouraged to more faithfulness, and assured that they would find the concerns of Society claiming the attention of these Executive meetings full of interest and instruction.

The idea of a second meeting following the meetings for worship on First-day morning, was further considered, and whatever may be the action of monthly meetings in establishing these, it was thought a benefit would arise from encouraging a social feeling which would lead those assembled to cordial greetings and expressions of interest in each other before parting. A suggestion of this kind in our own meeting had already been publicly made and had led to happy effects.

There was a general concurrence of view in relation to libraries being established in all our meetings, and opened for the delivery of books on First-day mornings; this measure would not only prove of advantage, by diffusing knowledge and literary taste in Friends' neighborhoods, but it is believed, would increase the attendance of meetings, and lead to a higher appreciation of the advantages of our organization.

Encouraging views were held out in regard to the wide diffusion of those principles which, in past time, especially distinguished the Society of Friends. The acknowledgment of the Great Central Doctrine of the Divine light in the soul as the source of spiritual knowledge and growth by the leading minds in nearly all sects of Christians is cause of encouragement to hold fast the profession of our faith without wavering.

An epistle prepared by a Friend, designed to be forwarded to the several meetings being held for like objects with these, was read, and upon consideration referred to the committee for revision, to be forwarded as way opens. Then adjourned.

FRIENDS' INTELLIGENCER.

PHILADELPHIA, SECOND MONTH 9, 1867.

LIFE'S VOYAGE.—Above the disturbed elements we hear the encouraging voice, "Peace, be still." As we have looked, we have perceived the Master was in the ship, and through divine agency, as in days of yore, the winds and the waves are calmed. We, therefore, ask that our faith may be perfect, in order that we may be prepared at the word of command to steer our course in the direction assigned by the great Pilot.

Thus will the polar star be kept in view. If darkness crosses our pathway, we shall cast anchor and await the lifting of the clouds, the dawning of the day-star. This is the blessed privilege of the Christian mariner;—he is not sent out without rudder or compass; and an unerring helmsman is furnished every craft that sails upon Time's tempestuous sea.

Shall we, then, unmindful of this inestimable favor, suffer our faith to fail amid the tempest? Though the winds blow and the surges roar, let us keep the ear open to hear what the Protector of our bark shall say unto us; and if each one be found at his post with a ready hand and willing heart, the haven of Desire will be reached. Whether our voyage is marked with prosperity or adversity, it will be unto us "according to our faith."

JANNEY'S HISTORY OF FRIENDS.—We have been requested to announce to those acting or desiring to act as Agents for S. M. Janney's History of Friends, that they will be allowed the same commission on the forthcoming volumes of the History (3 and 4) as well as upon additional orders for the first two volumes, as was previously allowed,—viz., one volume for each six volumes sold. Former agents can be supplied with list of names of their subscribers upon application to the Publisher.

DIED, on the 22d of First month, 1867, in Philadelphia, Pa., THEODORE MYERS, son of Job and Caroline Kirby, aged 6 years.

DIED, near Westfield, on the 31st of Twelfth mo., 1866, after a short and severe illness, **WILLIS S.**, son of Wm. and Abigail Evans, aged nearly 14 years. Being sensible he could not recover, he bade his parents, brothers and sisters farewell, taking each by the hand; and to the doctor said, "Thee has done all thee can. I would love to live longer; but if my time has come, I am willing to go. I hope we shall all meet again;" expressing, several times, "Heavenly Father take me."

—, of consumption, on the 29th of Twelfth month, 1866, at the residence of his mother, in Henry Co., Iowa, **OLIVER T. VANSVOO**, in the 21st year of his age; a member of Prairie Grove Mo. Meeting. He bore his severe illness with patience and humility, and expressed a strong desire to be prepared for an entrance into the holy kingdom.

—, on the 25th of First month, 1867, near Swedesboro. N. J., **ANNA O.**, wife of John Atkinson; a member of Pilesgrove Monthly Meeting, N. J.

—, on the 27th of First month, 1867, **HARRIS ANN B.**, wife of George Watson, in the 38th year of her age; a member of Green Str. Monthly Meeting.

—, suddenly, of apoplexy, on the evening of 1st month 31, 1867, **JULIA**, wife of Joseph S. Longshore, M. D., of Philadelphia.

—, on the 31st of First month, 1867, at Bristol, Pa., **ROBERT C. BEATTY**, in the 67th year of his age.

—, on Second-day morning, the 28th ult., **REBECCA KNIGHT**, in the 78th year of her age; a member of Spruce Street Monthly Meeting.

On First day evening she retired to bed as usual, and soon after the dawn of another day her ransomed spirit left its earthly tabernacle. Her faithful attendant, before leaving her for the night, inquired if she wanted anything. She replied, "I feel very comfortable. I wish every one in the world was as comfortable as I am. I fear that we are not sufficiently thankful for our blessings."

Her departure has created a void not only in her own family circle, but among her friends. To the poor and offcast her thoughtfulness and kindness were manifested by numerous acts of charity.

At meeting her feeble voice was occasionally heard in commemorating the goodness and mercy of her Heavenly Father. Her spirit on these and other occasions seemed clothed with humility and love.

A Stated Meeting of the Committee of Management of the Library Association of Friends will be held in the Library Room on Fourth-day evening next, the 13th inst., at 8 o'clock.

JACOB M. ELLIS, Clerk.

WANTED,

By the Association of Friends of New York for Relief of Freedmen, a teacher for a school in Maryland. Address,

JACOB CAPRON,

1172 Broadway, New York.

1st mo. 12, 1867—tf.

THE ORPHAN ASYLUM IN NEW ORLEANS.

In response to the Appeal published in the *Intelligencer* and *Review* for an Orphan Asylum near New Orleans, La., the sum of \$230, from donors residing in sixteen different States, has been received.

Louisa De Martin, Superintendent of the Asylum, is now at the North soliciting donations. Seventy-seven orphans are already under her care, quartered temporarily in the Military Hospital, New Orleans.

The time has been extended to Third month 1st to secure the \$10,000 alluded to in the appeal, which, with a donation of \$10,000 from Freedmen's Bureau,

through Gen. Howard, and \$1000 collected by L. De Martin from colored soldiers, making the sum of \$21,000, is now on deposit in bank in New Orleans. Three thousand dollars additional have been raised, leaving a balance of \$6000 required to complete the amount,—viz., \$30,000.

Contributions will be received as heretofore by
CHARLES T. BUNTING,
116 E. Twelfth St., N. Y.

EXTRACT.

BY CHANNING.

I fear the spirit of science, at the present day, is too often a degradation rather than the true culture of the soul. It is the bowing down of the heaven-born spirit before unthinking mechanism. It seeks knowledge rather for animal, transitory purposes, than for the nutriment of the imperishable, inward life; and yet the worshippers of science pity or condemn the poor, because denied this means of cultivation. Unhappy poor! shut out from libraries, laboratories and learned institutes! In view of this world's wisdom, it avails you nothing that your own nature, manifested in your own and other souls, that God's word and works, that the ocean, earth and sky are laid open to you; that you may acquaint yourselves with the divine perfections, with the character of Christ, with the duties of life, with the virtues, the generous sacrifices, and the beautiful and holy emotions, which are a revelation and pledge of heaven. All these are nothing, do not lift you to the rank of cultivated men, because the mysteries of the telescope and microscope, of the air-pump and crucible, are not revealed to you! I would they were revealed to you. I believe the time is coming when Christian benevolence will delight in spreading all truth and all refinements through all ranks of society. But meanwhile be not discouraged. One ray of moral and religious truth is worth all the wisdom of the schools. One lesson from Christ will carry you higher than years of study under those who are too enlightened to follow this celestial guide.

"Christ sometimes comes to the redeemed soul as rain upon the fleece, in calm and sweet serenity. Their hearts are too full for analyzing their feelings; but there is a sense of silent unutterable happiness—an absorbing overflow of tranquil joy, which disdains the feeble expression of the tongue. There hope seems to seize upon His strengthening hand, and faith to gaze upon His inspiring eye, and love to bury its face in His bosom, and humble sorrow to sit at His feet and weep. True, the vision soon dies away, and leaves us to the drearier duties of the day, its burden and heat; but the dew of the morning will lie upon that Christian's soul, long after the bright cloud that dropped it hath faded away."

For the Children.

THE CLAM'S FOOT.

What a droll idea, a clam has a foot! Yes, it is strange to one who has never closely observed these shell-fish; and they have hearts, lungs, liver, mouth, and many other parts needful to all animal life. We will take a look at the oyster first, and perhaps will find many curious things about him we have little thought of. We will notice in the oyster, clam, muscle and scallop a fringe on the outer edge resembling lips. Between these lips are the gills or lungs, for oysters have blood, though it is not red, and of course they must breathe air like we do in order to purify their blood. These lungs are made up of innumerable delicate vessels, that, like the human lungs, expose a very extensive surface to the influence of the air. You know the water contains air enough in it for all cold-blooded animals, but not enough for whales and porpoises. They have to come to the surface for a supply. We find little blood-vessels running through these gills, or lungs, and they unite into two arteries, and pour the purified blood into the heart. The heart is near the strong muscle that holds the shells together, is of a dark purple color, and has two apartments by which the blood is received and expelled through the body. We see a dark mass in the centre very finely grained and compact; that is the liver. Sometimes it is of a chocolate color in the clam; muscle and scallop is nearly black; and the bile is poured into the stomach for the necessary preparation of the food to sustain life. But we will want to know how this fish, imbedded in its hard shell, can eat. What does it live on? There are myriads of insects, or forms of life, much too small for us to perceive without the aid of the microscope, floating and enjoying life in the waters of the sea. These are the oyster's and clam's food. In the fringes or mouths, are placed little hair-like fingers, that are continually moving in such a manner that these minute animals are thrown into his mouth.

But now we turn to our subject—the clam's foot. The oyster does not require a foot, but the clam, razor and some other kinds do. They do not walk, it is true, but they dig, and sometimes pretty fast. It is said the razor will sink into the sand faster than any one can follow; and we believe it, for we have chased several without success. But where is the foot? It is that part which you think too tough to eat, and often throw away. The clam opens its shell, and if placed on the side, extends its spade, as we might call it, and works away backward and forward, scooping a hole for itself, until it gradually slips down with the back upwards, and thus continues until it covers itself as deeply as it wishes. The soft

clam buries itself much deeper, and probably the shell helps it in digging, too. The muscle uses its foot to weave those strong fibres by which it clings so firmly to the rocks and to one another.

Some kinds of shell-fish bore holes in the solid rock with their foot, which is harder than the clam's, and covered with a scale. Some of the cockle tribe use the foot to jump with, by bending it over underneath, then by a sudden spring it jumps quite easily along on the bottom of the sea. If clams and other shell-fish had not some provision of this kind they would be carried far away from their proper home by the currents; and when young, if they could not hide in the sand or mud, the fishes would soon eat them up. As it is, the drum-fish and sheepshead often root over the bars and flats for them like hogs turning up a pasture, and grind them up in their powerful mills. Some young person, perhaps, wants to know if these creatures have eyes and ears. There is something in the scallop resembling eyes, those round highly-colored spots on the edge of the mantle that shine so prettily in the dark. As they move about a little eyesight may be useful, but clams and oysters do not require any. They have a sense of feeling, a low order of nerves, which you will perceive transparent and like a worm, by which some of them, especially the soft clam and the razor, can detect when any one approaches, and withdraw into their holes for safety. Their mantle or lip deposits a little carbonate of lime and cement around the edge of the shell whenever they want a larger building, and after it hardens they add another layer, which makes the ridges and markings we see in shells. The soft clam has a long, flexible neck, which they can extend to one or more inches in length; this neck has two passages acting like siphons. Inside these tubes are the same hair-like threads that are continually in motion, drawing the water down to the mouth, and after the nutriment is extracted and passed to the stomach, it, together with the waste matter of the body, is forced up the other tube. The water is continually changing, giving a supply of fresh air and fresh food.

We would recommend those among the young who love to see the wondrous beauty of the least of nature's forms, to examine the hinge of these shells. See how that dark substance is placed like an elastic band at the hinge, which, when the animal dies, throws open the shell. While living, the great muscle counteracts its expansive force, and only allows it to spring open when necessary. We advise that before you eat another oyster or clam you should look at its construction, and see for yourselves.

Hempstead, L. I.

I. HICKS.

"LET US PRAY."

When dark the road, and sore the foot,
And desolate the way,
We have a Light, a Strength, a Guide,—
Oremus, "Let us pray."

Prayer is a culture of the soul
That turns to wheat our tares;
Prayer is a begging angel whom
We shelter unawares.

Prayer is a wisdom which the wise
To babes have oft resign'd;
But He who bade us seek, be sure
He meant that we should find.

A small hand feeling in the night,
A natural gasp for air,
A half-articulate aim at speech—
To want to pray is Prayer.

What though our language halts? The halt
Have also walk'd with God:
They lean upon his arm, and find
A staff even in his rod.

The song of Moses is a song
That long through Heaven has rung,
And yet the prayer of Moses came
From one of stammering tongue.

"Unask'd He gives," dost thou object?
Yet ask Him not the less,
For even a blessing blessing needs
To make it blessedness.

"Unask'd He gives;" 'tis very true,
His bounty is so great;
Yet no man ever got from God,
But he had more to get.

"But what if we should ask amiss,
As one who knew has taught?"
There's no man asks so much amiss
As he that asks for naught.

He gives or He withholds in love,—
In this one truth we rest:
God does the best; 'tis only man
That does it for the best.

"What will be, will be:" yea, but that
Is not a theme for thee;
The one important point is this,—
What wilt thou to be?

Wilt thou be made? was never asked
Of any living soul;
The only question put to man
Is, Wilt thou be made whole?

"But how is it so great a boon
Through simple prayer we meet?"
We know not how, we only know
That this is His receipt.

Sufficient that He tells us so,
Whose word we cannot doubt;
Sufficient surely that we see
It somehow brought about.

"He knows thy wants without thine aid,
He sees the thing thou art:"
He does, and knows our greatest want
Is an obeying heart.

He could have made the marriage wine
At Cana with a word;
The water that the guests brought in
Was nothing to the Lord.

But what He needs not, He requires,
And should the guests decline,
He leaves them with their emptiness,
And makes no water wine.

Then, when He bids thee fill the pots,
Go fill them to the brim,—
Not fearing lest ye ask too much,
Exhaust, or weary Him.

J. B. M.

—*People's Magazine*.

From the N. Y. Evening Post.

THE AMAZON.

The opening of the Amazon, the San Francisco, and the Tocantines, the most eastern affluents of the Amazon, to the flags of all nations, by a decree of the Brazilian government, is a very important event. Do our readers comprehend what is meant by the opening of the Amazon? Some may have a vague idea of an immense inland water system, having its source in the loftiest mountains of South America, and flowing through the largest valley of our globe down to that ocean which laves our own shores and the maritime countries of Europe. But no definite idea is thus obtained of the real grandeur of the area, or wealth of the resources, of the region now first thrown open to the commerce of all the world.

It is by comparison alone that we can appreciate the valley of the Amazon. The area of the valley of the Mississippi is 1,200,000 square miles, while that of the Amazon is more than 2,500,000 square miles. The valley of the Amazon is equal to the whole area of the United States, except the States of California and Oregon, and Washington territory. Some of our readers may better comprehend the vastness of this fertile tropical region if we say that, subtracting Russia, all Europe has but 1,687,626 square miles.

The importance of the opening of such a fluvial system as that of the Amazon and its tributaries does not concern Brazil alone. We have spoken of the valley of the Amazon in its entirety, but no less than four of the largest of the South American states are to a great extent watered by navigable tributaries of the Amazon. Venezuela is connected with the Amazonian waters by the canal of the Cassiquari, which is the link between the Orinoco and the Rio Negro, and many of the products of this South American republic are shipped in the port of Manaos, or the Barra of the Rio Negro. One half of the states of Colombia are drained by the Ica, or Putamayo, the Japura, and the western branches of the Rio Negro. More than three-fourths of Ecuador belongs to the Amazon slopes; two-thirds of Peru is irrigated by large rivers, many of them navigable, which are the most important western tributaries of the Amazon; while one-half of Bolivia, so rich in gold and silver, has no other convenient route to the

outside world than through the Maderia—an affluent of the Amazon, which in its whole length is 2,200 miles long. Add one half of Brazil and the borders of the Guianas, and we have the wide region whose natural wealth will find a market and reach the civilized world by way of the Amazon and its branches.

The vegetable and mineral resources of this vast region include those of every clime from Greenland to India—from the glaciers and the wheat growing regions of the Andes, to the palm groves and sugar plantations of the lower Amazon; and they are far greater than the world has guessed. All that tropical forests produce, and all that tropical cultivation can produce, is found here. But these resources are undeveloped. In the Brazilian part of the valley there are but two hundred thousand inhabitants—counting in the Indians. It is as though a smaller population than that of Brooklyn were scattered over the whole area of the United States between the Rocky Mountains and the Atlantic. The jealousy of the old Portuguese has kept the Amazon Valley an almost unbroken forest for two centuries. The spirit of Portugal governed, until recently, the policy of Brazil. Our protectionist friends would have found their paradise in Brazil while the sceptre of Portugal governed there. A new spirit, however, has stirred young Brazil. Common sense and enlightened statesmanship have begun to remove the burdens that have weighed down the young empire. The first great drawback was slavery; but its strength was broken in 1850 by the abolition of the slave trade; the next was the monopolistic tendency, taxing foreign imports so heavily that the people were deprived of many articles necessary to their advancement in comfort and wealth. The third hindrance was a seacoast greater than that of the United States, with so small a Brazilian mercantile marine that the exchange of the products of Northern and Southern Brazil, absolutely necessary to the welfare of the nation, was virtually prohibited by the fewness of vessels, the dearth of freights, and the prohibition to foreign vessels of the coastwise trade.

Young Brazil, headed by the progressive Emperor Don Pedro II., who is a most worthy leader, last year abrogated this monopoly, and now American, English, Dutch and other vessels may take their cargoes of flour or manufactures to a northern port of Brazil, thence carry a Brazilian freight to Rio de Janeiro, and there take on a cargo of coffee for home, thus making three carrying profits in a single voyage, to the great advantage of the Brazilian people.

The last great barrier to the material development of Brazil has been removed by the recent opening to all nations of the greatest inland navigation in the world. The results may not be great for a few years, for it will require time

to thoroughly open to commerce a region so long sealed against it; but here is a beginning on a right principle. Brazil is now contending on the La Plata for the free navigation of the great southern fluvial system of South America, guaranteed in solemn treaties by the father of the present Dictator of Paraguay, but rudely closed by the present ruler, Lopez. This is the real cause of the Paraguayan war—a war which has been more misrepresented than any struggle of modern times except our own.

That there will be an immediate rush of steamers and emigrants to the Amazon we do not anticipate. Indeed, it is not desirable to be in a hurry. The only line of steamboats, while not a monopoly, is heavily subsidized by the Brazilian government. The land has not yet been surveyed, and Brazil does not know squatter sovereignty. It is to be hoped, however, that the government will immediately put into market the rich sugar, coffee, tobacco, rice and cacao (chocolate) producing lands of the lower Amazon, which have been so happily described by Professor Agassiz.

The river San Francisco is an immense stream, running through a most fertile cotton and coffee-growing valley, down to the ocean, about midway between the northern and southern bounds of the empire; but with the exception of the first fifty miles from the ocean it is not navigable for four hundred miles on account of the rapids and waterfalls. In this region is the cataract of Paulo Affonso, the Niagara of Brazil. Above these falls there is steamboat navigation for nearly eight hundred miles. The recent decree opens the river only as far as Penedo, fifty miles from the Atlantic.

Our government has long taken an intelligent interest in the region now thrown open to commerce. It sent Lieutenant Herndon and Gibbon to explore the Amazon and its tributaries, from Peru and Bolivia to the Atlantic. Their exploration, before its results were published, drew forth the famous "Atlantic Slopes and Water Sheds of the Amazon," by Lieutenant Maury, which did more than anything else to make Brazilians suspect and fear the United States—because force and filibusterism were openly threatened against Brazil if she did not open the Amazon, a river over which she has as complete control as the English have of the St. Lawrence. Furthermore, we can, upon good authority, state a fact not generally known, that both Lieutenant Maury and Henry A. Wise contemplated the colonizing of slaves in the valley of the Amazon. This fact was known at Rio de Janeiro, and a respectable American merchant of that city, when on a visit to the United States, in 1851, was consulted by them. He warned them against any such attempt, as the Brazilian government had resolved that not another slave should touch the soil of Brazil,

and that Brazilian slavery should gradually be destroyed. There is now no longer any fear of us in Brazil, and this recent act of the Emperor is one which will be the beginning of the introduction of a freer and more enlightened labor system, which in another century will transform the great valley into a beautiful region of cultivation and civilization.

THE LUCIFER MATCH.

About twenty years ago chemistry abolished the tinder-box, and the burnt rag that made the tinder went to make paper. Slowly did the invention spread. The use of the match is now so established that machines are invented to prepare the splints. In New York, one match manufactory annually cuts up a large raft of timber for matches. The English matches are generally square, and thus thirty thousand splints are cut in a minute. The American matches are round, and the process of shaping being more elaborate, four thousand and five hundred splints are cut in a minute. We will follow a bundle of eighteen hundred of thin splints, each four inches long, through its conversion into three thousand six hundred matches.

Without being separated, each end of the bundle is first dipped into sulphur. When dry, the splints, adhering to each other by means of the sulphur, must be parted by what is called dusting. A boy, sitting on the floor with a bundle before him, strikes the matches with a kind of mallet on the dipped ends till they become thoroughly loosened. They have now to be plunged into a preparation of phosphorus or chlorate of potash, according to the quality of the match. The phosphorus produces the pale, noiseless fire, the chlorate of potash the sharp, crackling illumination. After this application of the more inflammable substance, the matches are separated, and dried in racks. Thoroughly dried, they are gathered up again into bundles of the same quantity, and are taken to the boys who cut them, for the reader will have observed that the bundles have been dipped at each end. There are few things more remarkable in manufactures than the extraordinary rapidity of this cutting process and that which is connected with it. The boy stands before a bench, the bundle on his right hand, a pile of empty boxes on his left. The matches are to be cut, and the empty boxes filled by this boy. A bundle is opened; he seizes a portion, knowing by long habit the required number with sufficient exactness; puts them rapidly into a sort of frame, knocks the ends evenly together, confines them with a strap which he tightens with his foot and cuts them in two parts with a knife on a hinge, which he brings down with

a strong leverage. The halves lie projecting over each end of the frame; he grasps the left portion and thrusts it into a half open box, which slides into an outer case, and he repeats the process with the matches on his right hand. This series of movements is performed with a rapidity almost unexampled; for in this way, two hundred thousand matches are cut, and two thousand boxes filled in a day by one boy.—*Press*

ACHIEVEMENTS OF THE STEAM-ENGINE.

The mighty steam engine—whether we view it in its individual grandeur or in its universal dominion over all inferior machinery—must ever be the great autocrat of the mechanical world. How wide are its provinces—how extensive its fields of enterprise—how numerous its subjects, and how diversified their aims! Over the ocean and the estuary, across the inland sea and the mountain lake, along the sinuous river and the placid stream, it passes in majestic sweep like the vapor-tailed comet athwart the planetary domains, dispensing blessings in its course, and gifts yet unrecognized by the recipients of its bounty. The merchant and the traveller, the merchant and the voluntary exile, the philanthropist and the ambassador of Heaven, are borne with speed and safety to the scene of their respective labors. Man meets man, interchanging the works of their hands or the produce of the soil. Antipodes, who have hitherto been planted with foot opposite to foot, now stand in parallel intercourse and craniological proximity. The white man and the black, the serf and the freeman, the liberated slave and his repentant master, commune on each other's sufferings and aspirations, and prepare for that reign of peace which is gradually evolving from the mysterious cloud that now overhangs the nations. Nor are its labors less marvellous and less benevolent within the more limited range of our daily interests and observation. Here it stands at the mine head, disemboweling the earth of its treasures—there delivering it from its superfluous waters, or depriving it of its deleterious or explosive atmosphere. Here it has fixed its abode in the factory, giving life and motion to the various combinations of art which prepare for our use the necessities and luxuries of life—there it takes its locomotive flight along our pathways of iron, shortening time and space, and uniting in one brotherhood the most distant and dis severed members of the commonwealth. Wherever, indeed, its throne is reared, it exercises a beneficial sovereignty, feeding and clothing man, subjugating the material world to his use, and summoning all his intellectual powers to make new demands upon his liberality, and draw new prizes from its treasure-house.—*Smiles.*

WATER THAT WILL NOT DROWN.

All travellers, writes a correspondent, have mentioned with astonishment the peculiar buoyancy of the water of the Great Salt Lake, and it is truly surprising. No danger of shipwreck need ever cross the mind of those who navigate the lake, for it would be simply impossible for them to sink if thrown overboard. With my hands clasped together under my head, and my feet crossed, I floated on the surface of the lake with at least one-third of my body above the water. Upon a warm summer day there would not be the slightest difficulty in going to sleep upon the lake and allowing yourself to be blown about as the wind permitted; only one would need an umbrella to keep off the rays of the sun.

It has been stated that three buckets of this water will yield one bucket of solid salt, but inasmuch as water will not hold above twenty-five per cent. of saline matter in solution, and if more be added it is instantly deposited upon the bottom; this estimate is, of course, too large. On inquiring of the Mormons engaged in procuring salt, they unanimously stated that for every five buckets of water they obtained one bucket of salt, which gives the proportion as no less than twenty per cent. No visitor to the lake should omit the bath; the sensation in the water is most luxurious, and leads one to think himself floating in the air. On the way back to the city it will be as well for the bather to stop at the superb sulphur baths just outside the town, and remove the incrustations which will have formed upon him, by a plunge into the fine swimming bath, whose only objections are its peculiar odor and its great heat, which requires a large admixture of cold water.—*Methodist*.

SPURGEON'S LECTURE ON "CANDLES."

A Liverpool paper says: As a very great amount of curiosity is manifested with respect to the lecture which the most celebrated preacher of the age will deliver to-morrow in the Philharmonic Hall, it may be interesting to lay before our readers a complete synopsis of that remarkable address, which has attracted so much attention in London and other parts.

The importance of the candle as an illustration is proved by many references to holy Scripture. This being done, the lecturer proceeds to show of what things the candle may be said to be emblematic.

1. Seven candles of different lengths illustrate the seven stages of human life, teach our mortality and bid us "work while it is called to-day."

2. Candle-box full of candles represents many churches which are of no service to the age. As the candles are of no practical use till lighted, so churches are useless till heavenly fire lights them.

3. A number of fine wax candles not lighted, looking down with disdain upon a poor rush-light which is lighted, and thereby doing more than all its fine neighbors.

4. An unlit candle, which, placed in candlesticks of all sorts, yet gives no light in any one of them, shows how men may lay the blame of their uselessness upon the position of life in which they are placed.

5. Trying to light a candle with an extinguisher upon it, well sets forth the ill effects of prejudice in preventing the reception of the truth.

6. A dark lantern represents those who do not benefit others, because they keep their light to themselves.

7. A candle protected by the wind in a lantern clear and bright, pictures the watchful providence of God over his creatures.

8. Represents a lantern with a pane out, showing thereby that men who trust to their own strength have an opening through which the wind of temptation can blow and extinguish their light.

9. A dirty, battered lantern, its filthiness rendered conspicuous by the light within, is an emblem of professed Christians, whose faults are noticed the more because of their profession.

10. Is a lantern with cracks in it, through which the light gleams brightly, illustrating the fact that very great gifts are often given to those who have very weak, frail bodies.

11. Candle under a bushel.

12. Candle under a bandbox through which the flame burns its way, an emblem of the Christian's grace coming forth stronger in times of persecution.

13. One candle lighting another illustrates God's method of instrumentality.

14. A small taper lighting a great candle shows how humble individuals are able often to influence greater, as John Owen blessed by an unknown country preacher.

15. A candle blown out while an attempt is being made to light another shows how acts of indiscreet zeal are often checked.

16. The night light, which portrays those kind and generous women who do good to the sick and visit the homes of the poor.

17. A noble wax candle, over which a sheet of tin is held and made black by smoke, but being held by the side, acts as a reflector to increase its brightness, shows that we should not be constantly striving to pry out our neighbors' faults, but rather acting as reflectors to increase their splendor.

18. A candle of great thickness with a small wick is an emblem of a man with great talents and little zeal.

19. A thief in a candle is like a besetting sin.

20. A sputtering candle is like a sour-tempered, crotchety man.

21. A candle in a common guard illustrates the need of watchfulness.

22. Snuffers—speak of the need to take away our "superfluity of naughtiness."

23. Small piece of candle on the "save-all" shows how we should use all our talent for God.

24. Burning the candle at both ends sets forth the profligate's folly.

25. Steel filings dropped upon the flame of a candle produce sparklets; so afflictions are often made the means of a grander display of grace.

26. Two candles of different heights; the shorter one behind the longer casts a shadow; by putting the shorter candle in front you get the light of both. This shows they of high degree should recognize the aid of the most lowly.

27. Light inside a lantern inscribed with the words "Take a light," illustrates that those who have knowledge ought to communicate it.

28. A chandelier holding a variety of lights of various colors and sizes, illustrates the unity of the church in the midst of diversity.

These are the principal points on which the reverend gentlemen founds his very brilliant and powerful lecture. Such a variety of topics will form a subject of great interest.—*Exchange.*

For Friends' Intelligencer.

REVIEW OF THE WEATHER, &c.

FIRST MONTH.

	1866.	1867.
Rain during some portion of the 24 hours,	3 days.	1 day.
Rain all or nearly all day,...	0 "	0 "
Snow, including very slight falls,	8 "	15 "
Cloudy, without storms,	8 "	5 "
Clear, as ordinarily accepted	12 "	10 "

TEMPERATURE, RAIN, DEATHS, &c.

	1866.	1867.
Mean temperature of 1st month per Penna. Hospital.	39.31 deg.	25.89 deg.
Highest do. during month	53.00 "	40.50 "
Lowest do. do. do.	9.50 "	9.00 "
Rain during the month,	3.14 in.	1.70 in.
Deaths during the month, being for 4 current weeks for each year,	1055	1228

Average of the mean temperature of 1st month for the past seventy-eight years	31.17 deg.
Highest mean of do. during that entire period, 1790,	44.00 "
Lowest do. do. do. 1857	22.37 "

COMPARISON OF RAIN.

	1866.	1867.
First month	3.14 inch	1.70 inch.

In reference to the temperature of the month just closed, it will be seen that it was more than five degrees lower than the average for the past 78 years, which, while it constituted a very cold month, did not equal in severity that of 1857. Snow has abounded very plentifully in almost every section of the United States, and ice dealers have certainly reaped a very plentiful harvest. In reply to a query as to the recent prevalence of west and northwest winds, Dr. Conrad, of the Pennsylvania Hospital, has kindly furnished us the following information, viz:

Eighty-three observations of winds have given:

57	west winds.
21	east winds.
5	north winds.

It has been some years since we have had the opportunity of making a record like the following, clipped from one of our periodicals of yesterday:

"THE DELAWARE.—The river in front of the city is pretty well choked up with ice. A channel is kept open between here and Camden, and the ferry boats make their trips with great difficulty. Above Vine street the river is completely closed, and during several days past trips have been made in sleds to the Jersey shore. Below the Navy-yard there is a long stretch of solid ice, and people are engaged in sliding, skating and sleighing. The City Ice Boat is hard at work daily, and manages to keep a passage way open for steamers."

The Treasurer of Friends' Association for the Aid and Elevation of the Freedmen has received the following amounts since last report:—

From City Contributions,	\$500.00
" Stephen Moscher, West Liberty, Iowa	5.00
" Friends of Hershham Prep. Meeting,	50.00
" Freedmen's Aid Society of Yardleyville, Pa.,	33.46

\$588.46

Also Donations of Clothing from Friends of Wrightstown, Pa., Wrightstown Sewing Circle, Mullica Hill Aid Association, N. J.

HENRY M. LAING, Treasurer,
2d mo. 2, 1867. No. 30 Third St.

ITEMS.

The Supreme Court of Alabama, in a recent act, declares the acts done under the authority of the State during the rebellion to be valid.

Gov. Wells, of Louisiana, in the forthcoming message to the Legislature, recommends the ratification of the amendment to the Constitution.

The Legislature of Nevada ratified the amendment to the Constitution on the 22d ult.

CONGRESS.—In the Senate, the bill to abolish peonage in the Territories was reported from the Military Committee. The bill to compel publishers or authors to send a copy of every copyrighted work to the Congressional Library was passed. The bill to punish counterfeiting or tampering with the Government currency and bonds was passed. The tariff bill was passed. A message was received from the President, vetoing the Colorado bill. The Secretary of the Interior was requested to furnish information upon the condition of the Indians in Dakota Territory, at the time of the outbreak of 1862, and whether they have since had supplies issued to them. The resolution calling upon the Secretary of the Treasury as to the expediency of a reciprocated treaty with the Sandwich Islands was adopted. The Judiciary Committee reported the bill establishing a bureau of edu-

cation, for the purpose of collecting such statistics as will show the condition and progress of education in the several States and Territories. The vetoes of the Nebraska and of the Colorado bills were read and ordered to be printed. The bill to punish certain crimes against the currency was considered and amended, and then sent back to the House. A resolution was adopted calling on the President for copies of any correspondence that may have taken place between the Department of State and foreign ministers upon the policy of the Administration.

HOUSE.—Various bills were presented, which were read by title and referred to appropriate committees. Among them was one to amend the District suffrage bill by abolishing all disqualifications from voting on account of sex, and another directing all legal processes from United States courts to be issued in the name of the people of the United States; another to repeal the section of the act authorizing the Secretary of the Treasury to retire four million dollars of legal-tender notes per month. Another was presented of similar import, making it unlawful for the Secretary of the Treasury to withdraw or cancel any legal-tender currency except mutilated notes. The bill to reorganize the Indian Department, which transfers its control to the War Department, was passed. The Secretary of the Interior was requested to furnish information relative to the late massacre of United States troops at Fort Phil Kearney, and the causes that produced the same, and what has led to the present condition of our relations with the Indian tribes. Communications were received from the Secretary of the State in reference to the attempted compromise of certain lawsuits instituted against the agents of the rebel government at Liverpool, England, and another saying that no official information had been received in regard to the action of the Papal Government prohibiting the meeting of Protestants for religious purposes in Rome. A resolution was adopted, as a question of privilege, setting forth that the bill to deprive the President of his amnesty powers, and that to regulate the elective franchise in the Territories, had been passed and sent to the President; that he had not signed them nor returned them with his objections; that under the Constitution they had become laws; and calling on the Secretary of State for information why they had not been published as laws.

The Legislature of Maryland passed an act abolishing that article in the code which permitted the sale of negroes into slavery for crime. Hereafter no distinction will be made between white and black criminals.

An official letter from Florida says the Indians of the Everglades are determined to keep the negroes in their tribe as slaves, denying that white men's laws are applicable to them on the subject of slavery. The negroes claim their liberty, and have appealed to the military for assistance. It is feared there will be trouble regarding the matter.

THE FREEDMEN.—J. W. Alvord, the general superintendent of schools for the Bureau, in a recent report, gives some items of interest concerning the number of schools, teachers, and pupils. There are 998 day and 358 Sabbath-schools officially reported, and 140 day and 96 Sabbath schools not regularly reported. The number of teachers is 1,868, of whom 981 are colored; of pupils who attend only one school, viz., either day or Sabbath, 94,121. 302 schools are sustained wholly by freed people, and 244 in part. 260 school buildings are also owned by them. 10,419 pupils paid \$10,109 30 for tuition during the month, out of \$36,638 10, the total expense of the schools during the month.

A HISTORY OF THE RELIGIOUS SOCIETY OF FRIENDS FROM ITS RISE TO THE YEAR 1828. Volumes III and IV. By SAMUEL M. JANNEY.

The third and fourth volumes of this work have been unavoidably delayed by causes connected with the late civil war. During the five years that have elapsed since the second volume was published, so many changes have taken place that it is deemed expedient to issue a new Prospectus.

The two volumes now proposed to be published contain the history of the Society from the year 1691 to 1828, embracing much original matter that has not appeared in any other history. Biographical sketches are given of the most prominent members of the Society in Great Britain and America, with many instructive passages from their writings and interesting anecdotes.

Among the subjects of deep interest treated of in these volumes are: the perils and preservation of Friends during the Irish Rebellion of 1798; the course they pursued during the war of American Independence; their efforts to civilize the Indians and preserve peace with them; the rise and progress of their testimony against Slavery; their early labors in the cause of Temperance; the Separation in Ireland at the beginning of this century; and the Separation in America in 1827-8, with the causes that led to it, and the results that have followed.

The cost of paper, printing and binding having greatly increased since the first prospectus was issued, it is found that the work cannot be published, without considerable loss, at the price originally intended. The price will be, therefore, \$2.00 per volume, bound in cloth; and \$2.25 per volume, bound in sheep, library style; but those subscribers under the first prospectus who have taken the first two volumes, will be furnished with the third and fourth volumes at \$2.00 each, bound in sheep.

The first two volumes can be obtained from the publisher or his agents, at \$2.00 each, sheep binding.

Agents are requested to return this prospectus as speedily as possible—as the work is now in press—with full list of names and residences of subscribers, to the author's publisher. Agents will be allowed one copy for every six copies sold by them, and they can be furnished with lists of their subscribers upon application to the Publisher,

SELECTIONS FROM THE WRITINGS OF JOHN BARCLAY.

(Continued from page 771.)

[In the autumn of this year, 1824, he visited
Malvern for the benefit of his health.]

1824, *Ninth month 9th*.—At Worcester
Meeting. The Lord gave me some service in
a private way these two days, though at L—
I was much shut up. There is cause to remem-
ber, how my mind was opened and enlivened at
this time, in a feeling of the good Hand that
had been over me, in days that were long
passed; and how I was enabled to recount to
others the mercies that had been granted, and
many deliverances which the right hand of the
Most High had wrought for me. Surely He is
ever worthy to be honored and served!

In meeting this day, my poor soul was con-
strained, in the powerful feeling of gospel love,
to manifest, by a public exhortation and testi-
mony, my allegiance to my God: it was not in
very few words. The peace that flowed was
very precious; my soul would have been con-
tent to praise Him the Giver in secret, had this
been all that was required. But no,—I must
bow down before the Lord, which I was enabled
to do in much resignedness, and holy fear; crav-
ing earnestly the continued favor and preser-
vation of the Almighty, on behalf of the visited
ones;—with much which I now forget; though
the savour of the precious life vouchsafed re-
mains freshly with me. Thus did my visit close

in this part of the heritage, to my humble admi-
ration at the goodness of the Lord.

1824, *Twelfth month 20th*.—This day, as dur-
ing many others of late, the gospel light has risen
in me with much and indescribable strength;
so that my poor vessel has seemed too full to con-
tain, and I have been ready to pray, that the
oil might be stayed. I have thought much of
the language uttered by a worthy ancient,—
'The Spirit that now rules in me, shall yet
break forth in thousands.' I have fully seen and
been assured, that the gospel day shall rise
higher and higher upon the faithful; and with
regard to my poor soul, that the Lord, whom I
am concerned to serve and trust in, will carry
me through, even to the end. The Lord be
magnified, and He only;—whether by life or
death.

To J. F. M.

MARAZION, 24th of First month, 1825.

My beloved friend.—The hearing of your late
bereavement has affected my heart, but to hear
that you are, or have been, supported in calm-
ness, is no surprise. Nor do I think to add
anything to this gift and qualification,—a re-
signedness to do and suffer whatever is, in the
ordering of the Divine will, meted out as your
lot in life. But as we may be animated and
comforted by the mutual faith one of another,
it seemed as though it would be so to me, to ad-
dress thee at this time, even in the love of our
common Father; who brought us acquainted
with each other, and who knit us together in

His blessed fellowship, and hath preserved us in the Truth to this day, so that we are members one of another. I am persuaded, that nothing shall be permitted to shake our faith, or separate us from his love, as we continue to be concerned to cleave to it, in the heights as in the depths; but that in the end we shall be more than conquerors through Him, who gave himself for us, and is very tender of us. And though we are appointed unto such afflictions, there is a time when the eye of the soul can see in these, far more of the compassions that fail not, and of the gentle leadings of the Shepherd of Israel, than in seasons of prosperity and ease. It is in these afflictions, that we see how in love and in pity He redeems, bearing the lambs as ever in His bosom; so that under a sense of these things, we are constrained, like the prophet, to "make mention of the loving-kindnesses of the Lord and His praises, according to all that the Lord hath bestowed on us, and His great goodness." (Isaiah lxii. 7.) Dearly beloved, what a fine thing it is to be able to look beyond all outward things, and to feel that our rest is not in this frail passing scene, but that we are bound for a glorious state, and are continually wrestling for an advancement in the way which leads to it: none of the tribulations we meet with, can then move us away from the joyful hope set before us, nor deprive us of that, upon which alone we can place our hearts. This is the language and experience of the faithful in all ages, and what is taught the least scholar in the school of Christ. And though there may be many, many seasons, when we cannot sensibly get at this measure of experience; yet the lowest, smallest grain of true faith, that was ever yet permitted or dispensed to the upright, brings with it a sufficient "evidence of things not seen," to support and preserve from condemnation and despair.

Many, no doubt, continue to be thy discouragements, independent of this late source of trial; O! dear brother, be animated,—put on strength in the name of the Most High God; who is surely with thee, and will help thee in every hour of need, and enable thee to rise over all that would keep thee down,—over all that would oppress his own precious life in thee. There is work for such as thou art, up and down in the earth, and in this part, too, where there is much seed sown, and in ground prepared for its reception. I hope you and others often strengthen one another's hands in the Lord, and in his work and service; for the time is but short, at the longest; and it is good to work while the day lasts, and to glorify the great Name in the way of his own leadings; on which his blessing abundantly rests as ever! Ah! what can we render unto, or do for Him, who hath done so much for us! With my dear love, from thy old and true friend,

J. B.

To ———.

MARAZION, 8th of Second month, 1825.

Dear tried souls,—Cast down, but yet not forsaken, nor forgotten, but rather highly favored, and under the peculiar care and preservation of the Shepherd of the flock,—my soul salutes you. O! think you in any hour of deep plunging, that a hair of your head, (figuratively speaking,) shall be singed in the fiery furnace,—or that they are not all numbered,—or that your tears are not treasured up in His bottle—put into His book,—that they do not come up continually before Him as a memorial! Surely His wonderful, unsearchable purposes and wisdom, shall be all duly accomplished; and his dealings will be found to have been in loving-kindness, in tenderest mercy. Be then animated afresh to commit all into his hands, to resign yourselves again and again most unreservedly; retaining nothing but the desire to do and to be what He would have you, and to suffer all that He has or may permit, or purpose for you to pass through. O! then, with what invincible meekness and patience and long-suffering will you be endued; then nothing will be impossible to you, all things will be made sweet; your goings forth be even *prepared* like the morning, and all the way cast up clear before you; and abundance of peace will be your crown and portion forever. But do I only say this; do you not know it at times; and are not his promises steadfast, and his covenant sure? Will he forsake those that seek to serve and to please him, or forget the cry of the afflicted and the bowed down soul?—"I am the Lord; I change not; therefore ye sons of Jacob are not consumed." Whatever may be the turnings or overturnings of His holy hand, may He have all the glory of your entire dedication; and then no heights nor depths will be able to separate you, or to shake your faith; nor will you in any hour rest unduly by the way in any attainments, but aspire after the further manifestations of His holy will and power: that so you may prove a blessing to many upon His earth, while ripening and brightening for a better world. I know not whether we may meet, yea or nay, in this state of being; if not, be it so: but let us struggle on, let us be willing to endure all things. Be valiant in suffering; it is far beyond all service, to be made willing to partake of deaths oft, as a great Apostle; and to be conformed to the image of the dear Son—the Lamb that was slain, to suffer with him, that we may be clothed and crowned with his glory.

J. B.

To E. H.

TRURO, 25th of Second month, 1825.

Dearly beloved friend.—Thou hast named several precious instruments and vessels, that seem about to be made use of up and down, and

the mention of their names and prospects did me good; who am, through wonderful dealing, more and more knit and tied to the good cause, and united to those who are endeavoring to walk with their Master, and to serve him. It will then be no surprisal to thee to hear, that (as I have apprehended) a weighty matter, in the shape of a gospel errand, has been pread before me, and now seems fast ripening. O! the sweetness and even the blessedness, which have from time to time attended my poor mind, as there has been an endeavor after pure passiveness under this prospect: so that indeed I am ready to say, let come what will, should it please Infinite Wisdom to take me into his rest; or his work into his own hands, so as altogether to release me from his requiring, I have no will in it. I know it has been abundantly good for me to yield to these impressions, and to have been exercised and proved this way hitherto; and as to the future, I am wholly at his disposal, to be, to do, or to suffer, whatever may be prepared for me. In conversing with my dear sister one day on the subject, I was induced to say, that if a small part of this engagement, namely, to visit the meetings of this county, might be taken first, and way should open for me therein, it would be a great comfort to me: and in allusion to my present situation, as not being acknowledged a minister, I said, we must not look for signs and wonders, it is at least a weakness to do so; yet, that if anything might turn out like encouragement to me at our ensuing Monthly Meeting it would be a favor. "Show me a token for good, and let thy work appear unto thy servant,"—was my secret breathing at the first meeting; and after that was concluded, the women Friends being desired to stay, dear A. T. was led to lay before Friends her desire to sit with the several meetings of this Quarterly Meeting: and when I was looking for something further, she said, that if any Friend in the station of minister or elder should feel his mind drawn to accompany her, it would be quite satisfactory to her. Thus I was induced to expose myself by saying, that though not standing in the acknowledged or appointed stations alluded to, this thing had been before me, &c.; leaving it wholly to Friends to do what they thought best about it. So here I am on my way to the Eastern Monthly Meeting, hitherto helped, and henceforth longing to trust more and more my Master. Truly I cannot tell whether my life may be spared to accomplish what is before me, or whether the cone r. may not be wholly removed from me. In health, I am just *above water*; exceedingly delicate, but ailing little, liable any day to have my health utterly broken up. But I am not anxious, longing only to be prepared and ready to give in my account with joy, whenever called upon. It is often a glorious

time with me, dear E——, and if it were not for this prospect of a little labor of love, I should be ready to take what I have received, as an earnest of an early departure for a better country; and it may be so notwithstanding. Well, whatever may be in store for us, O! let us give up fully to honor and magnify the adorable Name, by life or by death, by suffering or rejoicing; for we know it to be as ointment poured forth, and we have been anointed with it, and it teacheth us of all things,—even the everlasting Truth.

In the love of it, I dearly bid you farewell.

J. B.

[It was in the Fourth month of this year 1825, that he was acknowledged a Minister by the Monthly Meeting of the ~~West~~ Division of Cornwall, and obtained a certificate for visiting the Eastern counties.]

(To be continued.)

"It is one sign of the tendency of human, nature to goodness, that it grows good under a thousand bad influences."

LETTER FROM LYDIA P. MOTT.

No. VII.

Ledyard, Third month 19, 1837.

My dear M. A.—It remains to be a truth that Divine Love speaks the same language in every quickened soul, and its uniting tendency is unchangeable. It was a portion of this precious feeling which gave the enjoyment to our late visit the animating tendency, which was mutual, I fully believe.

Such visits, divested of all ceremony and formality, are truly as brooks by the way, and it is our privilege as Christians to seek and to enjoy them whenever the duties of our individual states allow us sufficient leisure. From various causes, the number that I have shared of latter time has been few, yet it is cause for thankfulness that the capacity for their enjoyment has not been diminished by the privation; but I still feel my heart to glow with tenderness when permitted to be a partaker.

The only criterion which our pure and holy Head ever gave us to estimate each other by was Love. "By this, shall all men know (without distinction of Jew or gentile,) that ye are my disciples if ye have love one unto another; and whenever we feel it to predominate in us we are witnesses of its infallibility. Oh, how it avoids all unkind decisions in the conduct of others, and palliates, as far as truth will allow, all the faults and failings of those we have intercourse with. It is truly the balm of life. Continue, my beloved young friend, as I believe thou hast for many years endeavored to do, to square thy conduct by its pure and gentle dictates; so shalt thou continue to possess the friendship and goodwill of those connected with thee, and the

rich inheritance of heavenly peace of mind superadded.

We do certainly view party spirit alike : it is more and more odious to me every year of my life, and never worse than in the language or conduct of religious professors ; and most sorrowful and disgraceful is the record of abomination on both sides of our mutilated Society. The idea is cheering that it is wearing off, and a better spirit gradually spreading. In this, as in everything else, individual example must be the medium, and each one must take care of one. When the language of the heart is, "What shall this man do?" the secret answer will ever be understood, "What is that to thee? follow thou me," if we attend to the monitions of Truth.. Yet, how often we catch ourselves judging what others ought to do or leave undone. Well, wherein ~~we~~ have done wrong, let us do so no more, but leaving what is past press forward to greater degrees of goodness, keeping the mark for the prize of the high calling of God in view through all the vicissitudes and trials that may be our portion.

With continued affection I will say,
Farewell for this time. L. P. M.

AN EXPERIENCE.

In the forty-fifth year of his age John Churchman was drawn to visit Friends in Great Britain, Ireland and Holland, a visit which occupied him for four and a half years. He thus speaks of the preparation for this service. "I felt such an inward silence for about two or three weeks, that I thought I had done with the world, and also any further services in the church, and the preparing hint was brought to my mind, with thankfulness that I had endeavored in a good degree to practice it ; and one day walking alone, I felt myself so inwardly weak and feeble, that I stood still, and by the reverence that covered my mind, I knew that the hand of the Lord was on me, and his presence round about ; the earth was silent, and all flesh brought into stillness, and light went forth with brightness and shone on Great Britain, Ireland and Holland, and my mind felt the drawing cords of that love which is stronger than death, which made me say Lord ! go before and strengthen me, and I will follow whithersoever thou leadest. I had seen this journey near fifteen years in a very plain manner, and at times, for ten years, thought the concern so strong upon me that I must lay it before my friends for their advice ; but was secretly restrained, being made to believe that an exercise of that sort would ripen best to be kept quiet in my own heart, to know the right time, by no means desiring to run without being sent. To see a thing is not a commission to do that thing ; the time when, and the judgment to know the acceptable time, are the gifts of God."

For Friends' Intelligencer.

"FEED MY LAMBS."

One of the most solemn injunctions of Christ, given forth with peculiar emphasis, and requiring obedience as a proof of love, was that addressed to Peter, whom He had just fed, miraculously, with his own hand, "Feed my lambs." "Feed my sheep." "Feed my sheep." The intense earnestness of his desire that all who know his grace, whether in large measure or small, should be fed with the bread of life, was so touchingly signified that that servant, at least, was not likely to forget the exhortation. But how has it been with us? Have we not forgotten the lambs? Have we not left them to come to the trough with the sheep and get what they could? perhaps furnishing them with only hard, dry corn, which their tender teeth and stomachs were not able to dispose of, or with old mouldy hay, which their delicate senses loathed? and if their dams gave no milk, have left them to perish, or seek their own way to nature's fountain?

The inquiry properly arises, who are the lambs of Christ, and in what way ought we to feed them? He probably did not mean all children, but all who are born into his heavenly kingdom, at whatever age. But although many are converted after maturity, it seems more natural and practicable for the germ of the new life to be implanted in childhood ; as young trees are more easy to engraft than old ones. Therefore, in a healthful condition of the Church, it might be expected that most of Christ's lambs would be found among the children of his people. In what way, then, ought these to be fed and cared for? It is evidently left to our rational discretion, under the necessary guidance of divine wisdom, to determine this question, adapting means to the end as experience proves best. That we are to be bound by tradition or precedent in such matters, is no more reasonable than that we should not eat with forks because our ancestors had none, and should not print books because the ancients wrote them.

If every Christian family were what it should be, a constant school of morals and religion, there would be no need of any other, except the common mingling of society. This seems to be the natural order, and schoolmasters, like the law and priesthood, are designed to make up for the defects of society and families. The same is true of secular education. With society as it should be, the one great business of heads of families would be to educate their offspring, and by so doing advance and confirm their own attainments. But because of ignorance, infirmity and the excesses of a disordered state, it is found expedient to provide public means for education, and nearly all avail themselves of the advantages thus offered ; and can any one

doubt that in a community where common schools are maintained, education is far in advance of that where it is entrusted to parents or occasional friendly aid?

Now in what respects will the analogy fail between a right secular and a right religious education? Is it that, in the latter, having to do with spirit and character, there cannot be the same uniformity and certainty, while all efforts must prove useless unless prompted by the Divine Spirit? and that as "the wind bloweth where it listeth," the action of those governed by the Spirit may not be sufficiently regular to maintain the order requisite for a school of instruction? But is not this either to impeach the spirit of order, or else to confess ourselves unable to walk by our own rule so as to accomplish a much needed object? If we are unable by the principle of immediate revelation properly to educate children unto the Lord, we may do worse, by idly maintaining an impracticable standard, than do those who set about the work with inferior claims. But such is not the Spirit of the loving God, who, having created all things, adapts himself to the wants of all, not requiring children to be fed with wine and strong meat, and laying a foundation of knowledge and bringing forth certain degrees of attainment before He establishes lights in the firmament to rule over the day and over the night. That word which is "sharper than a two edged sword (cutting not one way but both ways) piercing even to the dividing asunder of soul and spirit, of the joints and marrow," is capable of distinguishing between the foundation and roof of the temple, and also where one principle joins with another principle in such manner as to bend to the requirements of the entire united system. Moreover it distinguishes between a mere rule, which is nothing but a bone and the vital inward substance which preserves it, and which it is to preserve. And as God, although a pure Spirit, accommodated Himself, through many ages, to the wants of our rude and childish race, it is not likely that He now leads his servants to neglect the orderly training of the young, and filling their minds with knowledge necessary for the Spirit to operate upon to bring forth its own likeness. That which embarrasses is not the Spirit of wisdom, but the want of it in its fulness. It is the want of that breadth and true Christian philosophy which enabled Paul with a pure conscience to become "all things to all men, if by any means he might save some." There is in him none of that narrowness which will let men and children drown for fear of soiling our ecclesiastical garments. To the true follower of Him who did not consider it breaking the law to save life, neither meat nor raiment appears of little value except when weighed against souls, and then they are vanity. But true wisdom is

equal to all the manifold necessities of our being.

Therefore if experience prove that religion is more likely to take root and flourish in minds early and habitually directed toward it, and educated to a knowledge of its general truths, precepts and requirements, it must be a very grave error to omit such training and instruction. And if it further prove that, like secular education, this work is generally neglected if left to home efforts, and that it can be greatly forwarded and extended by collecting children together under the care of spiritually minded teachers, then such method should be adopted, and whatever rule or tradition stands opposed should be modified or cast away. The Society of Friends has adopted a regular order of proceedings for their meetings of business, and repeats various "queries" and "advices" with the same regularity that a churchman reads his "service," adopted, as they suppose, under the impulse of the living Spirit. Why could they not organize religious schools for children under a proper system, and exercise sufficient liberty to teach them the great truths of the gospel, with lessons and reading from the Scriptures, interesting them with questions and explanations, and stories of pious persons and children, and, as they are enabled by Divine grace, inspiring them with religious convictions and feeling, ministering love with knowledge, and so gather in and feed the tender lambs over which the good Shepherd is daily watching? Is there anything impracticable or unspiritual in such a work? So far from this, it is a crying necessity of the church and of many members who feel anxious to attest their love to the Lord by such a congenial work, while they are not yet qualified for feeding his sheep. Many, through such preparatory discipline, might in due course be called to a higher office, and so the church would receive accessions of wisdom and strength by the experience and exercise of its members, and grow healthy in the right work of bearing children to the Lord. His love would then be increased toward her, his visits become more frequent, and, instead of lamentation and mourning, "the time of the singing of birds would come, and the voice of the turtle be heard in our land;" "the fig tree would again put forth her green figs, and the vines with the tender grapes give a good smell."

Another important consideration urging the establishment of religious schools is the bringing in of children of irreligious parents. No other method seems so feasible for reaching this unfortunate class, who are the proper objects of the church's pity and care. "I was hungry and ye gave me meat, thirsty and ye gave me drink, naked and ye clothed me, a stranger and ye took me in." How can we better manifest our love to Christ than by descend-

ing as He did from our seats of enjoyment and praise to mingle with the poor and destitute, and teach them the way of eternal life? The highways and hedges still overflow with their unhappy tenants, some of whom, if rightly constrained, might come in to fill the seats left vacant by those who sell their birthright for a mess of pottage. But perseverance is necessary to accomplish such a work, and some degree of regularity and system seems to be required to train thought and preserve attention. When a field is to be ploughed, we do not strike in here and there, but proceed in order, turning furrow after furrow; and likewise, in planting, some kinds of seed may be sown broadcast, but others require to be planted systematically and cultivated with diligence, and then, after a season, they become strong enough to flourish without the plow and hoe.

There seems to be imminent danger that the Society of Friends will prove inefficient in "doing the work of an evangelist," through want of freedom and adaptability to the requirement of the work. Having adopted the elevated rule that a Christian, in laboring for the Lord, should always be clothed in the pure robes of the Spirit, and having perhaps too narrowly defined the manner of the garments which the Spirit imposes, instead of leaving that for the Lord himself to prescribe, who has adorned nature with every beautiful variety, they seem rather too much confined in their movements to do the rude work of the pioneer and farmer. They choose rather to be tradesmen, improving on that which others have produced, or, as is too often the case, they come to be capitalists, whose main business is to keep what their fathers earned. But such was not He who called his disciples to be fishers of men and laborers in his vineyard, and shepherds, whose duty it is to feed both sheep and lambs, and to search through the highways and by-ways of the world to save that which is lost. His walk was among the ignorant and poor, and he ate with publicans, and healed the sick, the lame and the blind. He also took children in his arms and blessed them, and said, "of such is the kingdom of Heaven."

The Spirit of the Lord is the Spirit of unbounded love and goodness, of wisdom and sound understanding; and when a man is impelled and guided by these Divine principles he is moved by the Spirit of the Lord, which, in the more perfect day of grace, is not as a pillar of cloud or of fire, to lead us as by the hand, but having removed within the veil, it shines inwardly, warming the heart with love, and illuminating the understanding to see what is requisite for the building and adorning of the Lord's house.

"Children are an heritage of the Lord, and the fruit of the womb is his reward." What shall we say, then, when any branch of the church

ceases to rear children? Is it not that she does not feed and care for them as the Lord requires? She may hedge them from the world with evergreens or with thorns, but unless she give them milk or water to drink, and bread that is pleasant to eat, as often as their delicate and active appetites crave nourishment and joy, they will soon be all missing from the fold.

First mo., 1867.

EDWARD RYDER.

A GOOD TEST.

Let us never delude ourselves with the idea that any amount of talk about religion, or, as the phrase is, "making a great work" about even its doctrines or practices—or making great sacrifices of time, labor, or money for some "religious causes"—or having a name for being "very strict," or "very particular," or "very conscientious"—*necessarily* proves that we have any real religion. There may be fasting without repentance: the words of prayer without its spirit;—much given, and much done, for our sect, party, or church, yet nothing done for God; proselytism and bringing persons to ourselves, yet no bringing of them to God; the idolatry of a religious system with practical atheism. Christ tells us what true religion is. "This is eternal life, to know thee the only true and living God, and Jesus Christ whom thou hast sent."

Hear what the Apostle Paul says:—"Though I speak with the tongue of men and of angels, and have not love, I am become as sounding brass, or a tinkling cymbal. And though I have the gift of prophecy, and understand all mysteries, and all knowledge; and though I have all faith, so that I could remove mountains, and have not love, I am nothing. And though I bestow all my goods to feed the poor, and though I give my body to be burned, and have not charity, it profiteth me nothing. Love suffereth long, and is kind; love envieth not; love vaunteth not itself, is not puffed up, doth not behave itself unseemly, seeketh not her own, is not easily provoked, thinketh no evil; rejoiceth not in iniquity, but rejoiceth in the truth; beareth all things, believeth all things, hopeth all things, endureth all things.

Let this be the test of the reality of religion in ourselves and others,—love with its fruits. There are many means, many instrumentalities, to impart religion to the soul, but there is only one religion. There are things innumerable which help us to it, but this is the thing itself.

On the other hand, let us beware of calling men Pharisees, who are strict in the performances of what are styled religious duties. Very likely the world would now call such a man as the Apostle Paul a Pharisee, merely because he was separated from the world, and condemned the world while he wept over the world; because he was one with Christ in holiness and love.—*Norman McLeod.*

TRIBES OF THE FAR WEST.

The warlike feuds between the Indians and the settlers in the Far West, will probably lead to the extermination of the aborigines who now, in part, occupy one-third of the Union, unless some humane and peaceful means are devised to prevent it. The motives that impel these pioneers to occupy the lands of the natives, are as aggressive and cruel as were those of the Spaniards, which led to the conquest of large and populous states, and the ultimate extinction of entire tribes. It was a lust for gold then, and is lust for it now, that then and now excites the committing of some of the most horrid acts of history. But it is so common for selfish men to justify their own acts, however cruel, that it is not a matter of surprise that the pioneers appeal to government for cruel and decisive measures; though it is probable more Indians have been already slain in the contest than whites. Criminations have been more than balanced by recriminations. But, as the red men have no rights which their enemies consider they are bound to respect, an Indian homicide is justified, while the murder of a white man by an Indian, under the influence of revenge and foreboding fear, is commented on as an awful atrocity.

The Society of Friends, and many other humane people, believe that the rights of the Indians are as inalienable, and sacred, and dear to them, as those of other persons. They once had a possessory claim to all America; and if men can have natural and inalienable rights under their Creator, the Indians had, and still have, to all lands here which they have not sold or relinquished. Their title is as just as ours. If we deny and deride their claim, the time may come when ours may in like manner be denied and derided; for justice is strictly retributive, and the measures we mete to others will in return be meted to us.

The city of Washington, though not the local may be regarded as the vital centre of the Union. If with radii of 100, 200, 500 and 1000 miles, arcs of circles be drawn from that centre, they will pass through so many zones of civilization which are in some degree distinct from each other, and made so by climate, outward pursuits and education. Here, upon this more remote arc, the whites frequently meet with Indians. Here, also, we more frequently meet with white men from the remote West, who, so far as I have heard, join in the war cry of removal or extermination of all the red race.

Can nothing be done to prevent it? Does not an appeal come to us as a Christian people for the red man's deliverance? They are a peculiar people. They do not beg for mercy;

nevertheless they will be grateful in the future for our regard. Their only apparent safety is in their removal to some territory made inviolably their own by the Government. The Indian, almost untamably wild, can only be brought into the status of civilization by the force of necessity. Though more attached to their plan of subsistence, there are superior men among them who can influence them for good as well as evil.

The rapid formation of new States and Territories precludes the future prospect of any unoccupied domains; hence, aid to them cannot long be delayed. Deliberation is slow. Mercy may be swift. One of those tribes, the Nez Percés, is said to be unoffending and peaceful. Not all of the others are warlike or predatory. It is estimated that, out of the Indian Territory, there are from forty to fifty thousand Indians within the Union and west of the Mississippi.

The Indian removal policy of the government, adopted many years ago for the tribes east of the great river, has actually proved to be a measure of good for them, as the territory which they now exclusively own, govern and occupy, will show.

The following statement with reference to their condition is compiled from "Historical Collections of the Great West."

The Choctaws, residing in the southern part of the territory, number about 20,000, including 600 blacks and 200 whites. They have fine farms, well stocked and improved. They have mills, cotton-gins, looms, &c. They have a written constitution and an annual assembly.

The Chickasaws, in compact with the Choctaws, number 5500, and are wealthy. They apply \$10,000 annually for education.

The Cherokees number 22,000, including 900 blacks; their mode of life and improvement is similar to the Choctaws. They have a school fund of \$200,000.

The Creek's have 22,500, including 1,600 Seminoles and 400 blacks, in a condition similar to the others.

The Senecas and Shawnees number about 500; they are in a good degree civilized, living in comfortable houses, and speaking the English language.

There are a dozen other emigrated tribes, severally few in number, who are partially enlightened, and receive annuities from the Government. Besides these there are about 22,000 who are natives of the territory, and still in a degraded condition. These statistics show, by example, that the plan of collecting widely scattered tribes into compact communities, and making it necessary for them to adopt modes of life that lead to, and require education, is a good one, and the only feasible mode yet pursued.

It seems to be providential, that among the white people there have always been true advocates for the best interests of the Indian; among these some Friends have been prominent; and it will be strange that if in this trying hour no means are used to avert a conquest as cruel as that of the Spaniards in Peru. Though the evil portent will at first be seen on the outer circles of civilization, the strong and deeper pulses of humanity will be felt nearer the centre of vitality.

There it must be, or a near wave of time will engulf "a whole peculiar people."

Prophetstown, Ill., 1867.

FRIENDS' INTELLIGENCER.

PHILADELPHIA, SECOND MONTH 16, 1867.

REGULATIONS FOR PARDONS.—We have read with much interest the resolutions of our new Governor in relation to Pardons. They will be found in another column of this paper.

It is a fact well known to every one familiar with the subject of criminal jurisprudence, that the pardoning power vested in the Executive of the State is liable to great abuse. Many persons who conscientiously and earnestly desire the proper administration of justice have felt that the judges and jurors, with all the paraphernalia of a court, were in some instances a mere mockery, and did not subserve the ends for which they were wisely designed. The object of penal justice in the State of Pennsylvania is defined to be, first, the protection of society, and secondly, the reformation of the individual. Neither of these purposes can be fulfilled if the intercession of friends, and often gross misrepresentations of existing circumstances, should so influence the Governor's benevolent feelings, or bias his judgment, as to induce him by his official act to annul the verdict of an impartial jury and the decision of an enlightened judge. In some European countries, violators of law may become the victims of an unfounded prejudice of an autocrat, but in our more favored land of republican principles and Christian philanthropy, an alleged crime is submitted to a jury of twelve men, chosen from among the people, who hear all the evidence adduced, and on their *affidavit* render a verdict in accordance with the facts. The Judge's course is then clearly defined by law, and a maximum or minimum sentence is pro-

nounced, according to the greater or less turpitude of the offence.

In view of these considerations, we cordially endorse the regulations set forth by Governor Geary; and feel a confidence that they will tend to the prevention of crime by the certainty of adequate penalty. We are told by persons who have been long familiar with penal establishments, that a prisoner seldom comes within the walls who does not confidently expect his time to be abridged by a pardon, which his friends, and often his attorney, promise to procure for him. By this means his mind during most of the time of his incarceration is kept in a tumult of excitement in the prospect of a release from captivity.

This state of mental inquietude is very unfavorable to moral or religious impressions; and the efforts of those who visit him with sincere desires for his best welfare are rendered futile, and he is thrown again upon society unannealed and unconverted.

We would remind our friends that we approach the termination of the current volume of the *Intelligencer*. The commencement of a new year will be a favorable time for those who are disposed to promote the circulation of the paper, to send us additional names as subscribers.

MARRIED, on the 10th of First mo., 1867, according to the order of the religious Society of Friends, at the residence of the bride's father, JOSEPH A. ROBINSON to MARGARETTA C. BALLINGER, both members of Pilesgrove Monthly Meeting, N. J.

DIED, on the 25th of Twelfth month, 1866, in Hoo-sick, N. Y., ELIZABETH, wife of Caleb Nichols, aged nearly 78 years; a member and elder of Troy Monthly Meeting.

She was deprived of the use of her limbs for nearly two years, which affliction she bore with much patience and resignation, saying, "Will not the judge of all the earth do right?" She manifested a continued concern that the little meeting, which she had attended for about 60 years, might be kept up.

—, in Baltimore, on the 29th of Eleventh month 1866, DEBORAH, widow of the late Wm. Robinson, in the 64th year of her age; a member of Baltimore Monthly Meeting.

—, on the 15th of 1st month, 1867, near Easton, Md., HANNAH, wife of Joseph T. Bartlett, and daughter of the late Wm. E. Bartlett, of Baltimore, in the 31st year of her age; a member of Third Haven Monthly Meeting.

—, near Troy, New York, on the 29th of Eleventh month, 1866, GERRY, wife of Theodorus Dusenbury, in the 74th year of her age; a member of Troy Monthly Meeting.

Seldom has it been our lot to record the death of one more truly beloved by all. The poor of all

classes found a sympathizing and never-failing friend, and one ever ready to minister to their necessities, and we doubt not the blessing of them that were ready to perish has come upon her. Her death, though unexpected to her family, appeared not to be to her, and she passed calmly and quietly away, as the setting of a summer sun. To her death had no terrors.

DIED, on the 2d of Eleventh month, 1866, at the residence of Samuel P. Thomas, Sandy Spring, Md., MARY BROOKS, in the 92d year of her age.

She was a consistent member of our Society. She was eminently useful, both in the religious and social walks of life, and an excellent neighbor. In her younger days, when able to look after the temporal wants of those around her, none appealed to her in vain for any assistance in her power to give. She had many trials, all of which she bore with true Christian meekness and fortitude, and each seemed to purify her spirit more. She lost, by death, her husband and all her children, save one, and about eleven months before her close, she was called upon to bear the trial of parting with a loved sister, with whom she had lived for twelve years. After the death of this sister, she longed to follow her, and was in a constant state of waiting for the summons, to rest. Often, when retiring for the night, she would say, "If it was her good Father's will, she would like the summons to come before morning." During the night of the 19th of Sixth month, she was attacked with paralysis, from which she never recovered, though lingering nearly five months, and often suffering much. May her sufferings be sanctified to the good of many.

—, in Bertie, Welland Co., Canada West, on Second-day, the 21st of First month, 1867, CATHARINE, wife of Henry Zaritz, aged nearly 73 years; a member of Black Creek Preparative Meeting, and an elder of Pelham Monthly Meeting for many years.

—, on the 28th of First month, 1867, at the residence of John Cooper, Camden, N. J., ANN FREEMAN, in her 70th year; a member of Haddonfield Monthly Meeting.

—, on the 8th of Second month, 1867, at Germantown, FREDERICK E., infant son of Edwin T. and Margaret L. Schoenberger, aged 17 months.

—, in Philadelphia, on the evening of the 8th of Second month, 1867, ELLWOOD W., eldest son of Jonathan and Mary Ann Thomas, of Torresdale, Pa., in his 19th year; a member of Byberry Monthly Meeting, Pa.

—, suddenly, on the 9th inst., SAMUEL KIRK, a member of Byberry Monthly Meeting.

Friends' Fuel Association for the Poor meets this (Seventh-day) evening, 2d mo. 16th, at 8 o'clock.

JOSEPH M. TRUMAN, Clerk.

The Association of Friends for the Aid and Elevation of the Freedmen will meet at Race Street Meeting-House, on Fourth-day evening, Second month 20th, at 7½ o'clock.

JACOB M. ELLIS, } Clerks.
ANNE COOPER, }

TWO GOOD QUALITIES.—Frugality is good if liberality be joined with it. The first is leaving off superfluous expenses; the last is bestowing them to the benefit of others that need. The first without the last begins covetousness; the last without the first begins prodigality. Both make an excellent temper. Happy the place where they are found.—*William Penn.*

For Friends' Intelligencer.

FRIENDS' SOCIAL LYCEUM.

At a regular meeting of Friends' Social Lyceum, held, pursuant to adjournment, 1st mo. 22d, 1867.

In the absence of the President, Charles A. Dixon was called to the chair, and directed the reading of the minutes of last meeting, which were unanimously adopted.

Jos. Wharton, the lecturer of the evening, was then introduced, who delivered an instructive lecture on "Mines and Mining," describing the character and formation of mineral deposits, and the various methods used to bring their products from the secret recesses of the earth, and make them available for the use of mankind.

The mineral wealth is deposited chiefly in the fissures of rocks lying deep in the earth; these fissures are mainly, or approximately, vertical in their position. The deposits having been in most instances apparently injected from below. It not unfrequently happens that the ores are found in what are technically termed "pockets," the main characteristics of which are their irregularities of size and shape.

The minerals taken from these deposits are salts of metals, and also sulphides, formerly called sulphurets, which are converted, near the surface, into silicates, carbonates, &c.

In the simpler forms of mining, having found the "deposit," a shaft is sunk, similar in size and appearance to an ordinary well; the ore, or coal, as the case may be, is passed to the surface by means of windlass and buckets.

In mines of a more extensive character the shaft is sunk directly into the "vein," following closely its "dip," or inclination, taking care to have the "level" so arranged as to allow the removal of the products with the most ease. In mines of any considerable magnitude the accumulation of water is an evil that must be guarded against.

Drainage is accomplished in part by means of an "adit," but to rid a deep mine of water, effectually, it is necessary to resort to pumping.

There is more trouble experienced from the accumulation of water in limestone countries than in any others, owing to the frequent presence of large cavities in that particular formation.

The mammoth cave of Kentucky is a familiar though greatly exaggerated example of the holes or cavities found in limestone rocks.

It is sometimes necessary to exhaust an entire valley of several miles in area before the work of mining can progress satisfactorily. All the water not carried off by drainage must be exhausted by the pump. The introduction of steam, as the motive power of pumps, first applied by Newcomen, opened a new era in the history of mining in England; previous to that

time many mines had been abandoned in consequence of the inability of hand pumps to keep the supply of water sufficiently exhausted to allow the work of extracting the mineral deposits to go on. The different kinds of engines were described at some length, and illustrations given of the power of different engines in the various services.

The entrances to the mines are sometimes of great length, one which he had visited being nearly two miles long, which is about the length of an entrance to a mine now being worked near Mauch Chunk.

The work necessary to the proper opening of a mine, such as sinking the shaft, and indeed all the labor required to reach the deposit, is called "*dead work*."

In large mines ventilation becomes a matter of the greatest importance, and many ingenious contrivances have been devised to render it certain. The bad air found in these subterranean chambers is of two kinds; the most common is carbonic acid gas, which is of frequent occurrence in limestone regions, and from its weight being greater than that of the atmosphere, is always found in the bottom of the shafts. "*Fire-damp*," which is found in coal mines, is produced by a slow distillation, forming hydro-carbons, which, upon being mixed with the atmosphere and ignited, form a compound which is violently explosive.

The combustion of these gases is prevented by the use of the "*safety lamp*." By means of a fine wire gauze surrounding the blaze of the lamp, the outside air is kept from contact with the flame, and workmen may labor in the "*fire-damp*" with comparative safety. Ventilation is secured by having an "*air shaft*" which is divided into two parts, vertically called the "*up-cast*" and the "*down-cast*." The motion of the air not being naturally induced, it is assisted in its ascent and descent by various appliances.

Frequently a chimney is erected over the "*up-cast*," and by means of the draft thus induced the heated and vitiated air is caused to pass upwards, while pure air is forced downwards by means of large fans. A steam jet is sometimes introduced into the up-cast to facilitate the upward passage of foul air.

The means of entrance to and exit from the mines was described at some length.

Formerly the miners climbed to and from their work on ladders descending in sections of from 30 to 60 feet; but besides consuming so much time, this practice was found to be so wearisome to the men as to have been generally discontinued. Another contrivance was called the "*cage*;" it consisted of a platform suspended by iron bars, and let down by means of the winding engine.

The loss of life and injury to tools and ma-

terials, resulting from the breaking of these bars, has been so great as to warrant the disuse of this method.

The descent into mines is now accomplished by means of what is called a "*man engine*," which the lecturer explained and illustrated by means of various diagrams on the blackboard.

Some account was given of the different means of loosening the ore or coal.

When it is necessary to use gunpowder as an agent for breaking the rocks containing the deposits, the "*blasts*" are put in with special reference to the courses of the mineral veins, so as to detach the largest quantity of material. In Norway and Sweden fire has been much used for loosening the ores, as by the expansion induced by heat great fragments of rock are separated from the main line of deposit. Some account of the crushing and preparing of ore and coal for transportation and market was then given, but as the machinery used was explained largely by figures on the blackboard, it is impossible to give any accurate report of it.

After a few minutes of social intercourse, the Secretary read an essay entitled, "*Misunderstanding*," which was contributed by one of the members appointed for the purpose at a previous meeting.

An interesting communication was then read from the "*T-eddyffrin Literary Society*," giving some account of their proceedings, and expressing a wish that the correspondence between us might be renewed.

On motion of Edward Parrish, it was resolved that the Secretary's report of the lectures delivered before the Lyceum be furnished for publication in "*Friends' Intelligencer*."

Extracted from the minutes of Friends' Lyceum, 1st mo. 22d, 1867.

NATH. E. JANNEY, Secretary.

For the Children.

GOD BLESS YOU, MY LITTLE FELLOW.

A crippled beggar was striving to pick up some old clothes that had been thrown from a window, when a crowd of rude boys gathered about him, mimicking his awkward movements, and hooting at his helplessness and rags. Presently a noble little fellow came up, and, pushing through the crowd, helped the poor crippled man to pick up his gifts, and placed them in a bundle. Then slipping a piece of silver into his hands, he was running away, when a voice far above him said, "*Little boy with a straw hat, look up*." A lady leaning from an upper window, said earnestly, "*God bless you, my little fellow; God will bless you for that*." As he walked along he thought how glad he had made his own heart by doing good. He thought of the poor beggar's grateful look, of the lady's smile, and her approval; and last, and better than all, he could almost hear his heavenly

Father whispering. "Blessed are the merciful, for they shall obtain mercy."—Little reader, when you have an opportunity of doing good, and feel tempted to neglect it, remember the little "boy with the straw hat."

From The Press.

REGULATIONS FOR PARDONS.

HARRISBURG, Feb. 1.—The following regulations concerning the issue of pardons have just been issued by Governor Geary:

First. No pardon will be granted until notice of the application therefor shall have been given by publication once a week for two consecutive weeks in a newspaper printed in the county in which the conviction was had.

Second. No pardon will be granted unless notice of application shall have been given to the judge who tried the cause, to the district attorney, or to the attorney who prosecuted; proof of which notice shall be furnished this department.

Third. All applications for pardon must have with them the following papers written in a clear and distinct hand:

1. A certified copy of the whole record, including docket entries, minutes of court, copy of indictment, pleas, and all other papers on file in the court relating to the case.

2. A full statement of the reasons upon which the application is based, setting forth all the facts; the notes of evidence taken on trial; letters from responsible persons in the community where the crime was committed; a recommendation from the jurors who sat on the trial, and if any of them refuse to recommend a pardon, reasons given for such refusal; letter from the district attorney or counsel who tried the case, and a letter from the judge setting forth his views upon the subject of the application.

Fourth. Recommendations for pardon for unexpired terms of sentence must have a copy of the whole record as before required. Also copy of commitment; petition from prisoner setting forth reasons, and statement from warden and inspectors of prison.

Fifth. No personal application will be permitted.

Sixth. All of the above papers, when submitted, must be accompanied by a printed copy of same in pamphlet form, twelve copies of which at least must be sent to this department. If the parties are too poor the paper book need not be printed.

Seventh. As these rules are intended to subserve the administration of justice, they will be strictly enforced, and relaxed only when good reasons shall be furnished for so doing.

JOHN W. GEARY.

EXECUTIVE CHAMBER, HARRISBURG, Jan. 31, 1867.

"Give, and it shall be given unto you."

TRIP LIGHTLY.

Trip lightly over trouble,
Trip lightly over wrong,
We only make grief double
By dwelling on it long.
Why clasp woe's hand so tightly?
Why sigh o'er blossoms dead?
Why cling to forms unsightly?
Why not seek joy instead?

Trip lightly over sorrow;
Though all the day be dark,
The sun may shine to-morrow,
And gaily sing the lark;
Fair hopes have not departed,
Though roses may have fled;
Then, never be down-hearted,
But look for joy instead.

Trip lightly over sadness,
Stand not to rail at doom;
We've pearls to string of gladness,
On this side of the tomb:
Whilst stars are nightly shining,
And the Heaven is overhead,
Encourage not repining,
But look for joy instead.

—National Anti-Slavery Standard.

MY FIELD.

I will not wrong thee, O To-day,
With idle longing for To-morrow;
But patient plough my field, and sow
The seed of faith in every furrow.

Enough for me the loving light
That melts the clouds' repellent edges;
The still unfolding, bud by bud,
Of God's most sweet and holy pledges.

I breathe His breath; my life is His;
The hand he nerves knows no defrauding,—
The Lord will make this joyless waste
Wave with the wheat of His rewarding.

Of His rewarding! Yes; and yet
Not mine a single blade or kernel;
The seed is His; the quickening His;
The care, unchanging and eternal.

His, too, the harvest song shall be,
When He who blest the barren furrow
Shall thrust His shining sickle in,
And reap my little field To-morrow.

—Harriet McEwen.

INTENSITY OF THE COAL TAR COLORS.

The intensity of the color of the new dyes produced from coal tar is very remarkable. In the late London Exhibition, Perkin, the inventor of the aniline purple, displayed a cylinder of mauve paste, so small as to be easily carried under his arm which was estimated as sufficient to color 100 miles of calico. The tar required for its production was derived from 2,000 tons of coal.

A grain of one of the salts of magenta will give a pure red color to a million grains of water; and a rose pink hue to ten million grains, and even when dissolved in fifty million times its weight of water a white screen behind a vessel containing a part of it will render its presence

perceptible. One grain of this dye will thus impart a distinct shade to 800 gallons of water!

F. Field, in a recent lecture before the Royal Institution in England, related a striking incident showing this wonderful coloring power as to have occurred a few years ago, on one of the passages of the Great Eastern from Liverpool to New York, when a hurricane swept over the Atlantic, rendering the mighty vessel powerless amid the mightier sea. After one terrific night it was observed that far around the vessel the waves seemed tinged as though with blood, faint and diluted in the distance, but deep and crimson in the immediate vicinity, while after every roll of the giant ship gushed forth anew a deep ensanguined flood. When the storm had somewhat subsided, and search was made for the origin of this startling phenomenon, it was discovered that a tremendous billow had staved in part of the hold, and at the same time shattered some vessels containing magenta in a most concentrated form, which sweeping over hatches and through port holes, had thus crimsoned the invading waves.

From the People's Magazine.

NATURAL SOUNDS.

We sometimes speak of "perfect silence," "profound silence," and we liken the sudden cessation of noise and clamor to the "stillness of death"—without reflecting on what these terms signify, or whether the thing, or the nothing they represent be at all known to us, familiarly as we use such expressions. In truth, silence utter and complete is a very rare thing indeed, and it is difficult to say where it is found, unless it be in the brain of the deaf mute who has his world outside of the "realm of sound." We do not get silence in the deep gloom of the forest, though there may be the repose of utter solitude; that is rather a change from one region of sound to another; in summer the leaves lift up their voices, the insect millions fill the air with a chorus so faint during the livelong day, as to be hardly recognizable save by its absence when the night comes—to say nothing of the songs of birds which from time to time burst on the stillness; and in winter, even though "horror wide extends her desolate domain," it is not a horror of utter silence—the dead leaves are heard to rustle, the bare branches to moan and gnash their teeth, while ten thousand minute crepitations tell of the changes going on upon the surfaces of things around through the contraction of bark and fibre in consequence of the cold. We do not get it out in the midnight solitudes of heath or prairie, or in the lonely churchyard. The poet's idea, "Stars silent above us—graves silent beneath," may apply to the stars and the graves, but not to the pool that reflects the stars or the grass that fringes the lips of the grave, both of

which will respond to the whisper of the night-wind in whispers of their own—"making night vocal to an ear attuned." For our own part we are free to confess, that notwithstanding some attempts in that direction, we have never been able to get into the actual presence of silence perfect and absolute.

Seeing that such is the case, what a wonderfully kind and beneficent arrangement of Providence it is that the sounds we hear are what they are, so bountifully fitted to our perceptions as to impart satisfaction and pleasure to us, and that of an enduring kind which for the most part never falls upon the senses. This provision is one of the wonders of creation. All the sounds of Nature are sounds, so to speak, that *weur well*. When the winds lift up their voices, do they not strike upon the ear like the greetings of old friends, and is not every note they breathe full of the associations of things foregone and past which it is worth while to have thus recalled? Think of the voice of waters, the leaping of the ocean waves when "the floods clap their hands"—the seaward swirl of the running river as it sings along between the green banks—the glad ripple of wind-ruffled lake or mountain tarn—the shout of the torrent as it leaps along among the lichen-clad boulders—the grand roar of the cataract as it thunders from the steep. How thoroughly do all these sounds tell each its peculiar tale! how freshly do they appeal to the senses every time we hear them, with feelings and suggestions that are ever new and refuse to grow old! Who would wish to change them for sounds, however exquisite, produced by art or man's device? For, please to note, no sounds of voice or instrument, artificially produced, will wear half as well, or a hundredth part as well as do the accompaniments to which Nature has set her own melodies. The poet tells us of the brook "which all night long singeth a quiet tune," and the figure is pretty and touching enough. But how happy for us that it is only a figure! Just imagine it to be a fact! Suppose yourself living in a cottage on the banks of a brook that all night long was singing, for instance, "We're all a-noddin"; that's a quiet tune—or "The Last Rose of Summer"; that's more quiet still. How long do you think you could stand it? You know very well that you could not sit out a twelve hours' concert at St. James's Hall, even were all the talent of Europe assembled to charm you; what would you do with a single tune grinding eternally in your ears? Of a truth, whatever the tune might be, you would come to the conclusion, ere long, that it was the identical one the cow died of, and that it would kill you too unless you got out of hearing; and away you would run accordingly.

No; with all due regard to poets and musicians, Nature never plays tunes; if she did she

would only worry and weary us, whereas her gentle design is to soothe us to rest or to invigorate us for work. As already stated, her sounds are everywhere; everything animate or inanimate has a voice, and things we call dead speak to one another. "The cataracts blow their trumpets from the steep;" the sedges in the pool talk and gossip together in the quiet evening hours; deep calleth unto deep, and amid the mad and yeasty waves "we hear old Triton wind his wreathed horn." Her gamut extends through a tremendous scale, from the topmost treble of the shrilly gnat to the deep diapason of the bellowing thunder; and she has the wonderful knack of making sweet harmonies out of the sourest materials, softening them by distance or modifying them by artful combinations. Then she arranges her concerts with the kindest regard for her auditors, putting the rougher performers in the background, and the sweetest and best in the front. Thus the boom of the bittern, the plaint of the stork, the hoarse cry of the carrion crow, and the caw of the rook, reach us from afar, shorn by distance of their harshness; while the thrush and the blackbird pipe joyously in our orchards, the linnet and goldfinch build in our gardens, the nightingale sends his song into our open windows as we lie and listen to him by starlight, and the merry cricket chirps in our chimney-corners till the whole house rings with his jollity.

It is no great cause for wonder that all the sounds of Nature have not yet been traced to their source. If any one by way of experiment will betake himself to some lonely spot far from any human dwelling—say in the afternoon of a summer's day—and try to account for all the sounds he hears, even in a spot where he can hear the fewest, he may chance to find himself puzzled beyond his utmost skill. Travellers have been thus puzzled in a most inexplicable manner, and have tried in vain, with all their science and all their knowledge of natural phenomena, to solve the difficulty the strange sounds presented. There is a sound familiar to dwellers on the sea coast, which is occasionally heard towards nightfall and for an hour after sunset, and which fishermen call the "sough." It is neither the noise of the wind, nor of the waves, nor of the breakers on the shore—at least it seems conclusively not to be either of these, because all three of these can be heard and distinctly recognized simultaneously with the moaning of the "sough." We have ourselves heard it several times on certain parts of the coast, and have also listened for it at the same season of the year on other parts, and failed to detect it. Seafaring men seem to care nothing about it, and it is vain to ask them for any explanation. It does not seem to come from the offing, but rather from the windings of

the shore, and from the quarter from which the wind is blowing. What can it be? Perhaps the following story, upon which we chanced the other day in a volume of extracts, may throw some light on the subject. One fine Sunday morning an American clipper was making all sail for port, running with a side wind on a track parallel with a part of the coast then a hundred miles distant. The men were assembled on deck enjoying the beautiful weather, when suddenly they all started and looked at each other with amazement as the sound of church-going bells burst upon the ear. For several minutes the familiar peal continued, louder or fainter as the vessel rose or fell on the bounding billows, while the crew stood motionless as if spell-bound. The skipper, a thoughtful man, after listening for a time with the rest, went to the helm and slowly altered the vessel's course. As she rounded a little seaward, the sweet sounds stopped as suddenly as they had come: he then put her back on the old tack, when the bells began to peal again, he repeating the experiment several times to satisfy himself of the facts of the case. The reader has probably guessed what the facts were. Although the village where the bells were ringing was a hundred miles off, and under ordinary circumstances such sounds would never travel so great a distance, yet under the circumstances then existing the fact was clear enough that they did so travel. The wind which bore the sounds blew in a stiff breeze off the land; the large concavity of the broad bellying mainsail caught the musical vibrations, and, by reflecting them back as it were in a focus upon the deck, rendered them audible. This was the skipper's explanation of the phenomenon, the truth of which he had tested by altering the vessel's course. Now here, it appears to us, is a key to the mysterious sounds of the "sough" as it moans along the autumnal shore at nightfall. We have only to imagine, in place of the village church bells, a storm or gale of wind raging at the distance of some hundred or more miles, much too far off to be heard under ordinary circumstances, and, in place of the bellying mainsail, such a conformation of the coast and circling cliffs as shall serve the same purpose, by catching and concentrating the exhausted undulations of sound, and thus rendering them audible. We believe that this may be the right solution of the mystery; at any rate it points to a reason why the "sough" is frequently heard on some parts of our coast and never on other parts.

Concerning the strange and inexplicable sounds heard by travellers in various parts of the world, there have been from time to time many interesting reports. Amongst the most curious of these are perhaps the accounts met with in the narrative of Australian explorers

Mr. Wood is not the only witness. Stuart mentions that one morning, when in the interior, among the red sandhills of the inhospitable desert, he was startled by hearing a loud, clear, reverberating explosion, like the booming of artillery. These noises, which have been frequently observed in sandy districts, seem to come with an explosive echo from the sandhills, and reverberate for a considerable time amongst the surrounding mountains. Sounds of a like kind have alarmed most of the Australian explorers. Captain Stuart, who followed the course of the Darling River in 1828, describes an extraordinary sound which about three in the afternoon, on a day in the month of February of that year, astonished himself and party. "The day," he says, "had been remarkably fine, not a cloud was there in the heavens, nor a breath of air to be felt. On a sudden we heard what seemed to be the report of a gun fired at the distance of between five and six miles. It was not the hollow sound of an earthy explosion, or the sharp, cracking noise of falling timber, but in every way resembled a discharge of a heavy piece of ordnance. On this all the men agreed, but no one was certain whence the sound proceeded. Both Mr. Hume and myself, however, thought it came from the north-west. I immediately sent one of the men up a tree, but he could observe nothing unusual. The country around him appeared to be equally flat on all sides, and to be thickly wooded. Whatever occasioned the report, it made a strong impression on all of us, and to this day the singularity of such a sound in such a situation is a matter of mystery to me."

If travellers are alarmed abroad by sounds they cannot explain, dwellers at home are no less alarmed at times by sounds perfectly natural in themselves, but which are often made formidable by fear and superstitious dread. We have known a series of grueful groans which made a whole family miserable for a month to proceed from the vibration of a strip of leather and baize nailed on a door to keep the draught away. Wailing and sobbing noises are often heard in old houses from defects which a few nails and a glue pot would remedy. New houses, fresh from the hands of the builder, will indulge in the strangest noises for months together; and if they happen to be full of new furniture there is no telling when one could reckon on domestic quiet. As you lie in bed you hear a crack here, a bang there, creaking above, and a groaning below; and if you choose you may shiver with apprehension at each fresh demonstration; but you may be wiser if you call to mind that all woodwork when new is liable to shrink, and that the shrinking will often announce itself by a detonating noise. You don't hear such noises in the day because they are stilled by other

noises, but the silence of night gives them a startling effect. It is far otherwise with sounds to which we are accustomed, but of these we do not here speak.

The little spark of joy that shines in the Christian's cup, is an earnest of those everlasting delights which shall be theirs when all sorrow shall flee away: and those sips of comfort are but the foretastes of that river of everlasting pleasures at God's right hand.

Association of Friends of Philadelphia and its Vicinity for the Aid and Elevation of the Freedmen. Forwarding Committee's Report for First Month, 1867:—

- No. 90, 1 bbl., Mary K. Brosius, Vienna, Va., containing 50 new garments, books, &c.
 91, 1 box, Sarah M. Ely, Beaufort, S. C., containing 300 part-worn garments.
 92, 1 box, containing sundries.
 93 and 94, 2 bbls., containing bread for sick.
 95, 1 bbl., Eliza Heacock, Washington, D. C., containing 75 part-worn garments.
 96, 1 bbl., General John Ely, Louisville, Ky., containing 71 new garments.
 97, 1 bale, H. Leonard, Maryland, containing 26 part-worn garments.
 98, 1 box, Cornelia Hancock, Mt. Pleasant, S. C., containing books, seeds, trimmings, &c.
 99, 1 box, Deborah K. Smith, Green Springs, Va., containing books, slates, &c.
 100, 1 bbl., " 71 new garments, shoes, &c.
 101, 1 box, Susan H. Clark, Fortress Monroe, Va., containing 125 new garments.
 102, 1 bbl., containing 120 part-worn garments, shoes, &c.
 Total, 13 packages, containing about 1000 garments, seeds, books, shoes, trimmings, &c.
 HENRY M. LAING, Treasurer.
 No. 30 N. Third St.
 Phila., Second month 2d. 1867.

Twenty-Second Annual Report of the Northern Association of the City and County of Philadelphia for the Relief and Employment of Poor Women.

Feeling it due to those who have so generously aided us in behalf of the suffering poor, that they should know what disposition has been made of the means entrusted to our care; and under a belief that our labors have been blessed, and many a heart has been gladdened by the employment we have given, when other means of support have failed them, we again present our Annual Report.

Quilting, Wrappers, Plain Sewing of every description, Carpet Rags, &c., have been promptly attended to under the superintendence of efficient Matrons.

We have given employment to thirty-eight

women at the Institution, and furnished seven (some of whom were colored) with work, who were unable to leave their homes.

Since last report there have been

Garments made,	789
Skirts Quilted,	80
Bedquilts "	64
Comfortables Quilted	69
Crib Quilts	3
Sofa "	5
Garments Repaired,	41
Wool and Cotton Carded,	31 lbs.
Carpet rags cut and sewed,	104 "

86 Garments were distributed to the women during the winter.

We have to mourn the death of our esteemed friend Joseph D. Brown, who in his lifetime had always contributed liberally to the funds of the Association, and whose large means and kind sympathies had been devoted to the relief of the suffering poor of all classes, and who particularly remembered the destitute and unfortunate amongst our colored population.

From him we gratefully acknowledge a bequest of two thousand dollars, which has been duly paid by his executors to our Treasurer.

We tender our sincere thanks to our friends who have so freely responded to our previous appeals, and hope that they will continue with willing hearts and helping hands to aid us in our benevolent work. We believe that to encourage honest industry by furnishing it with suitable occupation is one of the best means of relieving the necessities of the poor.

It is with sincere sorrow that we record the death of our esteemed friend Hettie W. Chapman, who for a long time filled the situation of Secretary of the Acting Committee, and was one of our most interested and efficient members. She died 3d mo. 31st, 1866.

TREASURER'S REPORT.

THE NORTHERN ASSOCIATION, &c., in account with
ELIZABETH E. ALLEN, Treasurer, from 4th mo. 1st,
1865, to 4th mo. 1st, 1866.

	<u>\$281.00</u>

HENRY M. LAING, Treasurer,
2d mo. 9, 1867. No. 30 Third St.

ITEMS.

George W. Peabody, impressed with the importance of the educational needs of the population of the South and Southwestern States, has donated one million of dollars in cash and about one million one hundred thousand dollars in bonds of the State of Mississippi, to be appropriated to that purpose. He directs that it "shall be distributed among the entire population without other distinction than their need and the opportunities of usefulness to them."

CONGRESS.—In the Senate the Committee of Ways and Means were instructed to report the tariff bill as amended by the Senate, so as to exhibit the rates of the tariff of 1861 with those proposed by the amended House bill. The correspondence of the State Department with Brazil, in reference to the death of President Lincoln, was presented. A despatch was read announcing the passage by the House of Representatives of Tennessee of the bill for negro suffrage in that State. The House amendments to the act for the prevention of smuggling were agreed to. The House joint resolution forbidding the infliction of corporeal punishment in the late rebel States was reported with an amendment making it the duty of officers of the army, the navy, and the Freedmen's Bureau to see that the act is carried out. A bill was introduced for the encouragement of trade by direct importations. It provides that goods may be imported, and the duties paid at the place of destination instead of the port of arrival. The legislative, executive, and judicial appropriation bill was called up, and some discussion arose upon the paragraph appropriating fifty thousand dollars for temporary clerks in the Treasury Department. It was finally adopted. The bill for the admission of Nebraska was taken up and passed over the President's veto—yeas 31, nays 9.

HOUSE.—The resolution adopted in the Pennsylvania House of Representatives, in favor of full and complete protection by the Government, and of equal political rights to all loyal persons, was presented, and referred to the Committee on Reconstruction. The Indian appropriation bill came up, and was, after debate, recommitted to the Committee on Appropriations, with certain restrictions. A message from the President was presented, transmitting a report from the Secretary of State as to the States now represented in Congress which have ratified the constitutional amendment. The bill providing for the appointment of additional commissioners to the Paris Exposition, providing regulations for the board of commissioners, and making additional appropriations for the expenses, was reported with an amendment from the Committee on Foreign Relations. A joint resolution was passed extending for two years longer the use of Government vessels for quarantine purposes in New York harbor. The bill for the more efficient government of the insurrectionary States was then taken up, which provoked a long and angry

discussion. A bill was introduced to prohibit the transportation from foreign countries to the United States of prisoners convicted or charged with crime, and prescribing punishment therefor. The bill for the admission of Nebraska was passed over the veto by a vote of 120 yeas to 44 nays, and Nebraska thus becomes a State of the Union.

The State Legislature of Mississippi has unanimously rejected the Constitutional Amendment.

The House of Representatives of Alabama has passed a bill to establish a system of public schools for blacks and whites alike, except that the schools for each shall be separate in each school district.

The lower branch of the Kansas Legislature has passed a joint resolution to amend the State Constitution by striking out the word "white."

THE FREEDMEN.—The assistant commissioner of the Freedmen's Bureau at Raleigh, N. C., states that the more than ordinary severity of the cold season, together with the diminished call for labor, has caused much destitution among the freed-people of that state. This scarcity of employment and prevailing destitution has led many of them to embrace opportunities to contract with responsible parties to go to Texas, Mississippi, Arkansas and Tennessee; and some time ago orders came to break up the settlements along the coast as rapidly as possible, without injury to the freedmen located there. The population of Roanoke Island has been reduced one-half since Ninth month last, 150 persons having left in the Twelfth month, and more will follow as soon as transportation can be obtained.

The assistant commissioner of the Freedmen's Bureau for the State of Mississippi reports that the demand for labor is so great that freedmen are being brought from other States to Mississippi, where they contract for from \$10 to \$15 a month, with rations, quarters, and medical attendance. The freedmen show no spirit of idleness, and the planters are anxious to secure laborers. School matters are progressing finely, and a growing interest in education is manifested. The laws against their carrying firearms and owning real estate are, however, fruitful sources of dissatisfaction among them.

KENNETT SQUARE ACADEMY, for young men and boys, and *Kennett Square Female Seminary*. Two separate Boarding Schools, under the same management; have had during the winter 151 pupils. The Seminary's next session of sixteen weeks will open Third month 5th, 1867. Whole expenses, including Academy Lectures, Languages and Drawing, &c. This is a rare opportunity for teachers. The Principal's Normal Class at present includes one-third of the school. For circulars apply to S. C. Shortlidge, Sidney Pusey, or Emma Bowman.

The Academy begins a session of thirteen weeks Third month 20th. Terms, \$1.75 per week. Particular attention to Reading, Penmanship and Spelling. Prof. J. G. Moon, of Philadelphia, will continue his Lectures on Chemistry and Astronomy before the School. No extra for Latin, Greek, French, or Drawing. Book-keeping, and Spencerian Penmanship, by a Commercial College graduate.

Kennett borough has two daily trains to Philadelphia, stage line to Wilmington, Del., express and telegraph office, &c., &c., affording to students the conveniences of larger towns, without their objectionable features.

Apply to Swithin O. Shortlidge, A. B. (Harvard University), Principal, Kennett Square, Chester Co., Pa.

MUTUAL FIRE INSURANCE COMPANY OF PHILADELPHIA. Office, No. 5 S. 5th St. Assets, \$184,210.89. Charter perpetual. Mutual system exclusively.

216 1 and 10, if

A HISTORY OF THE RELIGIOUS SOCIETY OF FRIENDS FROM ITS RISE TO THE YEAR 1825. Volumes III and IV. By SAMUEL M. JANNEY.

The third and fourth volumes of this work have been unavoidably delayed by causes connected with the late civil war. During the five years that have elapsed since the second volume was published, so many changes have taken place that it is deemed expedient to issue a new Prospectus.

The two volumes now proposed to be published contain the history of the Society from the year 1661 to 1825, embracing much original matter that has not appeared in any other history. *Biographical sketches are given of the most prominent members of the Society in Great Britain and America, with many instructive passages from their writings and interesting anecdotes.*

Among the subjects of deep interest treated of in these volumes are: *the perils and preservation of Friends during the Irish Rebellion of 1798; the course they pursued during the war of American Independence; their efforts to civilize the Indians and preserve peace with them; the rise and progress of their testimony against Slavery; their early labors in the cause of Temperance; the Separation in Ireland at the beginning of this century; and the Separation in America in 1827-8, with the causes that led to it, and the results that have followed.*

The cost of paper, printing and binding having greatly increased since the first prospectus was issued, it is found that the work cannot be published, *without considerable loss, at the price originally intended.* The price will be, therefore, \$2.00 per volume, bound in cloth; and \$2.25 per volume, bound in sheep, library style; but those subscribers under the first prospectus who have taken the first two volumes, will be furnished with the third and fourth volumes at \$2.00 each, bound in sheep.

The first two volumes can be obtained from the publisher or his agents, at \$2.00 each, sheep binding.

Agents are requested to return this prospectus as speedily as possible—as the work is now in press—with full list of names and residences of subscribers, to the author's publisher. Agents will be allowed one copy for every six copies sold by them, and they can be furnished with lists of their subscribers upon application to the Publisher,

SELECTIONS FROM THE WRITINGS OF JOHN BARCLAY.

(Continued from page 787.)

To L. A. B.

BRADFORD, 29th of Fourth month, 1825.

My dear Lydia,—When we think what unworthy creatures we are, even at the best, and how goodness and mercy follow us, sustaining us under our trials, and turning them all to our good, we have surely great occasion to lay hold of hope, to take fresh courage, to put on strength, and be armed with patience, cheerful submission, and full assurance of faith for the time to come. My mind seems equal to very little beyond my more immediate calling; and when not so engaged, it feels as poor, weak, and empty, as ever I have known to be the case. O! what a comfort from time to time to feel the Lord with me, strengthening me, and prospering his work in my hands, again and again, to my humbling admiration at the power of his might, the excellency of his loving-kindness and his grace. It has more than once struck me forcibly, that if this work be of the Lord, and I be engaged in it according to his will, some that have been concerned to strengthen my weak hands, will participate in the division of the spoil, that is, in the earnest of the reward of the faithful. These who have given the cup of cold water, have done what they could; and what they have done in simplicity, on behalf of the poor servant, it is esteemed as done to the

Master himself; though they may be ready to say, "When saw we thee in prison?" &c.

To L. A. B.

Second of Fifth month, 1825.—Having been helped to get over another mountain in the attendance of this meeting yesterday, and having been favored to wrestle and struggle with the powers of darkness, and to suffer with a suffering seed in this desolate region, my heart feels comparatively light, hoping that I stand acquitted of the blood of some, and that through deep suffering,—yea, wading of spirit, the good cause has been espoused in some sort, however feebly, and the way of life set forth; in abundant condescension, I was favored to get along safely, without, I trust, stumbling; though truly it was hard work. O! the lethargy, the lifeless, lukewarm condition of many: no hunger or thirst, no sense of eternal things, no relish for heavenly goodness; and such as are otherwise, sunk into a low, discouraged, dying state. Yet even here, the spark of Divine love is not wholly extinct and taken away; but the Lord is waiting to be gracious, his repentings kindled together, and his pleading voice to be heard, "Why will ye die?" I conclude, if it be his good pleasure, that this place be favored with those professing the pure spiritual way of Truth, there will yet be preserved a hidden remnant, who will not be utterly given over, nor give over the pure Truth to utter reproach; but in their measure, or according to the light

received, will glorify, however imperfectly the great Name!

Thou wilt feel tenderly for me; but I have been helped, so that I can say, the Lord has been sufficient for me in this great time of need and stress upon my mind and feelings. I know not, in the retrospect and amidst all the reflections that have been brought before me, that there has been any other than a peaceful satisfaction respecting the past, mixed with much occasion for gratitude, in considering how bountifully and wonderfully I have been dealt with, led about and instructed, kept from utterly perishing, amply provided for and sustained hitherto; favored also with ability at times to trust that all will be well with me and mine, so long as we continue to seek and serve so good a Master, who will never try us above our strength, nor afflict us willingly. At ———, I called on a Friend, and had a refreshing little opportunity of handing encouragement to himself and wife; heavenly goodness seemed near us. O! the work is very weighty, and the trials thereof are many; but the Lord is sufficient, as he is trusted in. I have not an anxious thought about you at home; I know who will watch over you, and help you every way: only let not the tempter discourage you; for it is the Master that says, "Fear not little flock;"—"Be of good cheer;"—"Be strong," yea, be strong.

Thy very affectionate brother,

J. B.

To P. H. Guiney.

Sixth month, 1825.—After a considerable space of intervening time, I take my pen to salute thee, though scarce knowing in what circumstances this may find thee. If the best of us are but in the land of the living, partakers of life invisible and divine, how much have we to be thankful for,—how much to answer for! Whenever I address thee, my dear cousin, in this way, the slender tenure we each have of all things here below, seems to recur to my thoughts; with earnest desires that my own state of mind and conduct, may increasingly be moulded to the image of the heavenly Pattern, and so be prepared to meet Him at His coming: who cometh in one sense as a thief in the night. But seldom have I known the evidences of Divine peace and favor so veiled from me, I think, as at times since publicly engaged in this awful line of the ministry. To thee, I need not expand my views by much expression hereon; no doubt, thou hast known for many years, the dealings of inscrutable Wisdom, and in the discipline of heavenly love and mercy, in strippings, in tossings, in wadings of the poor spirit; nor will it surprise thee, should I say, that sometimes it is so with me, that I seem pressed out of measure, so as to despair of even

the outward life, as well as that which is described as being "hid with Christ in God." Marvellous goodness however hath provided all things well for me outwardly and inwardly, especially during my deeply proving prospects and journey; I have, as I suppose thou hast heard, taken meetings in Devon, Dorset, and Hants, on my way to the Yearly Meeting, and being likely to take the remaining ones in those counties with one or two in Surrey, as I return, after attending the six London Monthly Meetings. This last is to me in prospect crucifying, beyond what I can express, especially as I have believed it best to go single-handed.

Tenth of Sixth month, 1825.—At night under great anguish of spirit, I wrote as follows, my heart being turned towards the Lord:

O! God, most holy, and almighty, all wise and gracious,—regard me with thy pitying eye; spare me, help me, save in this depth of need, which thou only knowest, is beyond words. O! deliver and preserve me to the end, through all that which may in thy wisdom be permitted. Haste thee to help me, O! my God—my all! O! let not my cruel enemy devour me; let not thy Truth be dishonored by me; O! conduct me safely, and if it be best, speedily to my everlasting rest with thee and with thy Son. Amen! Amen!

To L. A. B.

15th of Sixth month, 1825.—On the 7th, I attended Devonshire House Monthly Meeting, and on the 8th that of Gracechurch Street; in both which I had to declare the excellency of that spiritual dispensation committed to us. O! what arduous work it is to minister, where the attention and desire of those present is very outward after words. The extent of my wadings and exercises no one knows but the great Master; they have been various and abundant indeed, since the Yearly Meeting; the discouragements of the day I have never seen so deeply before, though I am not blind to the encouraging features: O! how short are we of what the Lord would do for us as a people, were we only simple, sincere, plain, humble enough! If we go on but as we do, I fear, notwithstanding all that is stirring, we shall as a Society be weaker than we now are.

On First-day evening, after due deliberation, (which indeed had been going on in my mind many days, being much exhausted in powers, both of body and mind,) I concluded it best to suspend all further proceeding, with regard to visiting meetings in this city. As my mind settled under this act of resignation, I was confirmed in its being of the Lord's ordering, and of his abundant mercy; who trieth not any beyond what he sees good, and whose service is a reasonable service. I wish greatly to be preserved on all hands, and in all things from hurt.

ing the good cause, which is dearer to me than my life. I am very feeble, and obliged to use the sofa very much, taking frequent nourishment, &c. I propose going with my brother to Bognor, in the hope of being better able (after ten days there) to undertake the journey home. I desire for thee as for myself, that endeavoring to live in Christian faith and simplicity, we may have our minds deeply centered and set upon nothing short of the pnering and Divine will in all things; then nothing that can happen to us will any way move us, but all will work together for our good, and for the honor of the great name. Thou must be sensible that this turn in my course, though by no means one previously calculated upon, was no great surprise to me; the wonder was, that I should be enabled to go through any part of the prospect set before me on quitting home, indeed that I was strengthened to entertain it at all, considering my weakly condition.—Give my love to Friends.—I am a poor creature, but I trust not out of the reach of the infinite compassion of the Shepherd of Israel. Farewell!

CARSHALTON, 20th of Sixth month, 1825.

My dear ———, I may state to thee, that on Sixth day and Seventh day week, my powers of body and mind were so exhausted and enfeebled, as clearly to excuse me, in my judgment, from any further proceedings in my engagement for the present. I saw I had no hard master, nor unreasonable service,—that He knew what had been given up and undergone for his pure name's sake; and, were it called for, that I was ready to give up my natural life, rather than shrink from suffering or from shame. Deep indeed have been the conflicts and the baptisms,—crucifying, yea, mortifying have been the often silent labors of my soul before Him, on account and on behalf of this people, and especially in this great city, since coming to it:—whether I may ever complete what was presented to my mind, as a religious obligation, I know not; but I am very comfortable in the entire relinquishment of that part which respects London.

(To be continued.)

"Oh, it is sad," says a holy man, "to think how many precious opportunities I have lost, how many sweet motions and admonitions of the Spirit I have passed over unfruitfully, and made the Lord to speak in vain. In the secret influences of His Spirit, the Lord hath called upon me, but my worldly thoughts did still lodge within me, and there was no place within my heart for such calls of God." Surely there is a way of enjoying God even in our worldly employments. God would never have put them upon us to our loss. Enoch walked with God, but did not retire and separate himself from the things of this life. We need not lose our vision by our employments, if the fault were not our own.—*Flavel*.

EXTRACT.

Nothing can be more false than the popular theory that ameliorated outward condition is the panacea for the evils of society. The gospel principle begins from within and works outwards. The world's principle begins with the outward condition, and expects to influence inwardly. To expect that by changing the world without, in order to suit the world within, by taking away all difficulties, and removing all temptations, instead of hardening the man within against the force of outward temptation,—to adapt the lot to the man, instead of moulding the spirit to the lot—is to reverse the gospel method of procedure. Nevertheless, even that favorite speculation of theorists, that perfect circumstances will produce perfect character, contains a truth. Circumstances of outward condition are not the sole efficient in the production of character, but they are efficient which must not be ignored.

Favorable condition will not produce excellence, but the want of it often hinders excellence. It is true that vice leads to poverty,—all the moralizers tell us that,—but it is also true that poverty leads to vice.—*Robertson*.

For Friends' Intelligence.

MULLICA HILL, First month 19th, 1827.

Our Friends, Elizabeth T. Andrews and Mary Atkinson, have been very acceptably engaged visiting the families of Friends and others composing Woolwich Preparative Meeting. They have had fifty-eight family sittings, beside making several other calls, all during very inclement and tempestuous weather, yet the Master's presence and providence were pre-eminently known and felt to go with and preserve them, oftentimes spreading its benign influence over the minds of those who accompanied them, as well as those who were visited, producing many opportunities, we trust, not soon to be forgotten.

Though favored to get through amid storms and snow banks, yet when the labor was accomplished, the roads were so blocked that they were delayed from returning to their homes and families until labor and perseverance opened the way.

This is written for the encouragement of others who may have a like concern or intimation of duty, that they may be stimulated to faithfulness, and the reward will be sure and the pay ample.

"One great principle, which we should lay down as immovably true, is that if a good work cannot be carried on by the calm, self-controlled benevolent spirit of Christianity, then the time for doing it has not come. God asks not the aid of our vices. He can overrule them for good, but they are not the chosen instruments of human happiness."

LETTER FROM LYDIA P. MOTT.

No. VIII.

My dear M. A. has, I fear, by this time, come to the conclusion that her last letter forwarded to Ohio has been quite neglected, and was written in vain; but so far from such a decision being correct, I can assure her the very circumstance of its remaining unanswered, for so many months has caused it to be more frequently remembered than if it had been acknowledged immediately. Many times have its feeling contents been remembered, and the silent language of the heart they touched has been with corresponding affection and sympathy with the unavailing wish that it could reach thine ear. After letting the first opportunity pass unimproved, no other has presented. In this, as in many other instances, I am frequently reminded of one of Lady Guion's spiritual remarks, "that we have a divine moment for every right purpose, if we will but seek for it and occupy it; but when this is unimproved it never can be recalled. We may substitute another, perhaps, and make it do at some rate." How often, in the experience of thy poor old friend, has this divine moment been suffered to escape irretrievably? Gone forever, and the work of that precious moment left undone forever! Sighs nor tears avail when the opportunity is lost. The rising wish is as I write, O that my beloved M. A. may never know sighs or tears so heavy as some such are.

Why have my thoughts thus strayed? When I took the pen I only felt as though I must tell thee that I continued to remember thee amid all my journeyings, whether in Ohio, over the Alleghanies, by the majestic Delaware, or meandering Schuylkill, through the gloomy tunnels of Pennsylvania, or in her whirling cars, my heart, untrammelled, often turns to thee.

Various scenes have been worthy of description for their novelty to me, or their sublimity. Those on the narrows of the Juniata river are of the latter kind, where stupendous mountains of granite rise on the one hand hundreds of feet above one's head; while within a few feet on the other the majestic stream rolls its confined waters, threatening the traveller, should his horse or wheels deviate from the solitary path, which, for miles together, is uninhabited. The pulpits rocks, too, are lofty natural monuments, rising in huge masses, which seem, some of them, ready to totter over from their slender bases, and crush the passer by. Their forms are grotesque and heights surprising, bespeaking some convulsion which has separated them from their original mass. When I came on, all nature was as it were awakening from the death-like sleep of winter, and the progressive opening beauties of spring revived me from day to day. My strength increased, and I found myself able to attend the

Yearly Meeting of Philadelphia very comfortably. It proved interesting and encouraging. The barrier of prejudice gave way, and the obnoxious subject of slavery was spoken on without rebuke, and a joint committee of men and women Friends appointed to take measures for the more general education of the blacks, and the moral elevation of the free people of color. There was what I have labored for many years to promote, a more general expression of sentiments from members of different ages when subjects of interest were before the meeting, and evidently a disposition manifested by the mothers in society to permit the free expression of views, which led to progressive results. This I rejoiced in both here and in the Yearly Meeting of New York, though in the latter there was a strong current against measures calculated to lead to abolition principles; so much so that what was done was done out of meeting, by forming an association of men and women Friends to consider the great question of the rights of the colored race, and devise ways and means for their moral improvement, and for the manufacture of free cotton goods to a far greater extent than has heretofore been accomplished.

Inspire thy rising progeny, my dear friend, with an abhorrence of slavery, and with the tenderest feelings for the poor slave, on the pure principle of immutable justice, and the corresponding injunction of the Holy Jesus, "Whatsoever ye would that men should do unto you," &c. Ah, my precious, this is one of the many themes to dwell on with thy children. Ever remember that oral instruction, especially that of an affectionate mother, makes the most enduring impressions on the plastic mind of an intelligent child. Use, then, or rather I would say continue to use, this powerful engine for good; seek opportunities to converse with them freely, giving them an evidence thou wishes them to fully express their little thoughts without embarrassment. By questions now and then start an enquiry what they think about some simple subject, and thus accustom them to find pleasure in conversing gradually on themes which but for this method would lie dormant. The twilight was wont to be a favorite hour with my dear ones for this exercise; and for family retirement and silent waiting, it is generally favorable, the bustle of the day being over.

To have had thee to share my enjoyments would have added much to them, for intellectual pleasures are doubled by being participated in by kindred spirits, and thine, my beloved M. A., has long been such to thy unchanged, though far separated friend, L. P. M.

Wesley says, "we are every moment *pleasing* or *displeasing* to God."

PUBLIC GAMBLING.

The above title is given to a discourse delivered before the Trinity Methodist Episcopal Society, on the 27th of last month, by the Pastor, B. H. Nadal, and reported in the *Evening Telegraph* of the following day. The just rebuke given to the late Crosby Opera House Lottery and all other species of gambling is presented in so forcible a manner that we are glad to furnish our readers with large extracts from it:

What is Gambling? It is playing for money, or other stake, whether the game be one of skill or purely of chance. Is such playing honest or dishonest? There are several ways of parting with property recognized among men as honest, namely, by gift, by sale or exchange, and by bequest. A gift or bequest may be procured through fraud or deceit, and dishonesty may be practised in buying or selling. But, in themselves considered, giving and buying and selling are fair and proper transactions. Gambling is something entirely different from both giving and buying and selling. It is not giving; so far is the loser in the game from a benevolent intention towards the winner, that he regards him as his antagonist, and engages in the game for the avowed purpose of stripping the said antagonist and enriching himself. It is not a matter of purchase and sale, for the winner gives nothing, and proposes to give nothing, in exchange for the stake he carries off. A gift blesses both him that gives and him that takes. But in the acquisition of money by gambling the case is quite different. The winner cannot say, "I bought it," or "I earned it," or "It was given to me;" he says, "*I won it.*" And that means that he gave no equivalent for it; that he from whom he took it parted with it most unwillingly, and so far from giving it, characterized it as "lost."

But the question is whether or not gambling is honest. We do not deny that a bet may be fairly made and fairly carried out, nor that a game of cards may be fairly played, even where a regular gambler is one of the players. That is, there may be no fraud used by either party in the bet or game; but is there not a question lying back of the mere manner in which gambling may be done? The real question is, Whether gambling is not dishonest, even when fairly done? We think it is. The most that can be said for the right of the winner to keep the money won, is that the loser went into the game fully aware of the chances, and would himself have kept the stakes had he been successful. But this is only saying that the two parties in the game agreed beforehand to the chances of the game; and that the loss of the loser was, in a sense, voluntary. Mere agreement, however, cannot make wrong right. Two men agree to fight a

duel, and one is killed; will we say it is all right because the seconds examined the weapons, and regulated the whole affair according to the rules of honor? Do the rules of honor, however punctiliously guarded and observed, take from the soul of the survivor the guilt of murder, or from the soul of the dead man the guilt of suicide? Is not the guilt enhanced by the very fact of the cool, deliberate agreement of the parties to "set their lives upon a throw?" All Christian civilization answers, "Certainly."

Now will not this logic apply equally well to gambling? Why not? Have we any more right to injure a man with his consent in his property than in his person? It is clear that however the parties gambling may consent to the rules of the game, the gambler's gains are dishonestly gotten. They are neither earned, nor secured by other equivalent; they are not *given* to him, and the fact that by the rules of the game it was agreed that either should take the other's money if he could, only makes the wrong the greater by providing that it was deliberate.

We may be told that the equivalent rendered by the successful gambler to his victim is the *chance* to become winner. But whatever else this may be, it is certainly not an equivalent. An equivalent is that which a man *receives* for his money, and the loser receives nothing for his. By the very terms of the game, the loser agrees to part with his money without an equivalent, and the winner to take it without making a return. That is the meaning of having a chance. It is to agree to be injured ourselves, or to injure another. Indeed, each one, knowing that he may be either winner or loser, consents both to injure and to be injured. The *chance*, therefore, so far from being the loser's equivalent, is a direct violation of the law which demands an equivalent. Indeed, it is only *chance*, so far as the two players are concerned: as it respects the law which requires us not to injure our neighbor, it is no chance at all. Whichever wins, justice is violated and robbery is committed.

But we come to-night to inquire whether there are not other forms of gambling rife among us which we vainly labor to whitewash into respectability. If wealthy and respectable people breed fine horses and cultivate their speed with more care than they train their children, and then match them against other horses on the race-course for large sums of money, are they not gambling?

Are they not doing boldly, in the face of the world, what others of less note are doing in concealment? When we have "gift concerts," at which hundreds of people are gathered together under the thin disguise of some trifling performance, for the purpose of participating in a lottery, are we not gambling just as really as if we sat down at cards and played for large heaps of currency? To such questions there

can be but one honest answer, and that is, that the lottery, the gift enterprise, the horse-race, the raffle, are all forms of gambling, all games of chance, in which money or property is risked. So numerous are the gift enterprises becoming, and so do they threaten to damage public morals, that even the secular press, slow as it usually is to attack fashionable vice, is beginning to resist.

But perhaps we had better select as an illustration the most recent and notable instances of this form of gambling—we refer, of course, to the great Crosby Opera House Lottery. For lottery it was, nothing more nor less. The tickets and prizes were drawn in the usual way, and the drawing was as much a game of chance as if cards or dice had been used. The case of this famous lottery seems to be this:—A certain Mr. Crosby, heretofore unknown, but famous now for the rest of the century, had run himself hopelessly in debt in building an opera house in the city of Chicago. Some of his ingenious friends suggested the formation of an art association, which shall add some three hundred pictures to the luckless opera house, and establish a lottery, of which the house and pictures shall be the prizes. The scheme was that there should be 210,000 tickets at \$5 apiece, and 302 prizes. The opera house they valued at \$600,000, and the pictures were supposed to be worth \$100,000, making \$700,000, nominally, to be contested for by 210,000 ticket-holders, bringing the lottery men, if all sold, \$1,050,000. But 25,000 tickets remained unsold.

According to members of the press with whom I have talked, the account stands about thus, namely:—The Opera House is worth about \$300,000, instead of twice that; the pictures, \$100,000; the expense of advertising, etc., amounts to about \$200,000, making the outlay by the projector of the lottery, \$600,000. The amount of money received, if the tickets had all been sold, would have been \$1,050,000; which would have left in the purse of Mr. Crosby \$450,000. But 25,000 of the tickets remained unsold, and therefore were so many chances for Mr. Crosby to draw from his own lottery. The whole receipts from the lottery therefore, instead of \$1,050,000, would be only \$925,000, from which deducting the six hundred thousand for Opera House, pictures and expenses, of advertising, we have a clear profit from the affair, for the projector, of \$325,000. But still further, each ticket-holder has only one chance in every 666 to draw a prize, while Mr. Crosby with 25,000 tickets left on his hands, had about one chance in every nine, and actually did draw about \$40,000 worth of the prizes. Philadelphia bought over 27,000 tickets, expending for them well on to \$140,000. She drew 16 prizes, losing at the

estimated value of the pictures drawn, about a \$100,000, a sum half sufficient for the endowment of a respectable college, quite enough to erect 50 neat residences for the poor; enough to furnish for the destitute 16,660 tons of coal; or to build at least ten missionary chapels and Sunday Schools.

We need hardly call attention to the *folly* of such unequal gaming. And it is altogether astounding that any sane person would be willing to play at such a game, a game in which only one ticket in every six hundred and sixty-six could win, in which there could only be three hundred winners in a population of 210,000 ticket holders; a population about equal to that of Boston or Chicago. Why the chance was poorer in Mr. Crosby's lottery than it would be in any den in this city. In the light of cool, quiet after-thought, and the results of the drawing, it looks as though no one would have given such a wild scheme a moment's consideration. And yet the whole country was tossed into a tempest of excitement about it. The people saw it in every paper, and talked themselves out of their reason respecting it; and to such a pitch did the *furor* rise that this city, the "Quaker City," proverbial for steadiness, sent at least one reporter all the way to Chicago to report the drawing as it proceeded.

And such was the excitement among our ticket holders that when the magic messages, reporting the names of the fortunate persons, began to arrive, the newspaper office to which they were sent was thronged to excess, and the street in front was literally crowded, so that there was no getting out or in.

We do not forget that the great lottery in question had the sanction of respectable names in all the great cities. These, no doubt, insured fairness in the drawing; and it is to be feared that they also communicated to the affair a gloss of gentility that served to blind many a thoughtless person to the wrong involved. But we must not forget that sin has frequently been respectable. There were respectable people connected with the legalized lotteries of fifty years ago. Lotteries have been organized for the building of churches. Washington's Monument in Baltimore was built by means of a lottery authorized by a legislature. But no amount of respectable patronage or favor, and no amount of human legislation, can convert sin into virtue, or make of a lottery anything better than gambling.

This very respectability is an additional objection to such schemes as Crosby's lottery. When respectable men so far forget themselves as to give their influence to a system of gambling which sweeps over the breadth of the whole country, it shows that the bonds of pub

lie opinion on moral questions are in danger of being loosened. The respectable men who give their public sanction to lotteries have either lost all sense of their wrong, or they think the public conscience is weakened on the subject and that they are in no danger of being called to account.

And this latter, we fear is the true state of the case. The spirit of gambling seems to have taken possession of the public mind as with the power and rage of madness. It careers over the country and the world like a destructive tornado. It looks as though it would tear up the even foundations of right and wrong, and obliterate, or at least cover up with flying rubbish, the very sense of honesty between man and man. Why, if it comes to be settled that a gambling operation is a legitimate method of alienating property, then why not, in time, any other method of robbery? Look abroad! See the gambling in the so called highest circles both here and in Europe. Think of Baden-Baden, with its gambling princes and millionaires, where dice and cards rest not, day nor night!

Remember Saratoga, formerly a happy and innocent resort for the sick and weary, now a place at which gambling holds perpetual carnival, where even women play deep and bet with all the boldness of men, shamming husbands and brothers, and converting themselves from ladies into disgusting, swaggering Amazons. Here, too, within two or three years, has come the horse-race, bringing its exciting blight of betting and bluster and bravado in the place of the general quiet which was formerly so noteworthy a feature of the place. Of all the forms of gambling, horse-racing seems most nearly allied to coarseness and vulgarity. The race implies the jockey, and at the mention of that word the refined intellect begins to shrink.

One of the great evils likely to result from this vast flood-tide of gambling is the repeal of the laws by which most of the States had suppressed lotteries. Indeed, this Crosby scheme has already shown that our lottery laws are a dead letter on our statute books. The law of Pennsylvania, as we understand it, forbids lotteries in the State, and makes it a punishable offense to offer a ticket for sale, or to advertise a lottery in the newspapers. And yet, how many papers here have been filled with advertisements of this great "gift enterprise." The authorities knew that a change of name did not alter the thing one iota.

If this rush of the world towards gambling is not soon checked, there is no telling where it will end. Let all, and especially the young, according to the proverb, "beware of beginnings." "Behold how great a matter a little fire kindleth." No one suddenly becomes to

tally corrupt. Dallying with vice, mitigating it, apologizing for it, always precede the embrace of it, and the little vices, so called, are embraced first. No one suddenly becomes what is called a blackleg. The beginning of such a character lies far back, perhaps in the boy's winning of toys, or, if in mature life, perhaps in Church fairs, in social card parties, or, "art gift enterprises." First the hook with a bait, and the bait gilded and scented with the tinsel and cologne of respectability and fashion, and then the naked hook in due time becomes itself a charm.

We do not pretend to judge them any Christians in and out of the ministry, who may have had tickets in the late lottery; we deal with principles and actions; God is the judge of all the earth. But against the wrong we must cry out all the more earnestly, the more numerously and respectably it is patronized. Again we say, avoid beginnings! Refuse to do even a doubtful thing. Always give virtue the benefit of your doubts. Surely there are safe ways enough open, both of pleasure and business, in which we may go. Let us be resolved that, instead of being mere drift on the tide of gambling now rolling through the land, we will do our best to stem it and throw it back.

In fine, let the authorities of this country, let the rulers of this State and city, consider calmly and afresh, to what they are pledged by *their solemn oath of office!* Let them put a stop to gaming, whether by the churches, by art associations, or in the city "hells," whether veiled or naked. Let the Church wash her hands of all participation in any and every form of gambling, under whatever pretense and for whatever purpose.

And, Christian brother, when tempted to take a near cut to riches, remember the hill to which Bunyan's pilgrim came when he had crossed "the plain of ease." It was the "hill lucre," a filthy hill, with a silver mine in it, into which many fell and perished. One Demas, "who loved this present world," stood on the hill and called to Christian to turn aside. Let Christian's answer be yours. "No," said the honest pilgrim, "I know you, Gehazi was your greatgrandfather and Judas your father; and you have trod in their steps; it is but a devilish prank that thou usest. Thy father was hanged for a traitor, and thou deservest no better reward."

Let us live in the constant contemplation of the glory of Christ, and virtue will proceed from Him to repair all our decays, to renew a right spirit within us, and to cause us to abound in all duties of obedience. This way of producing these effects, flesh and blood will not reveal; it looks like washing in Jordan to cure a leprosy;

but the life of faith is a mystery known only unto them in whom it is.—*Owen.*

FRIENDS' INTELLIGENCER.

PHILADELPHIA, SECOND MONTH 23, 1867.

We would remind our friends that we approach the termination of the current volume of the *Intelligencer*. The commencement of a new year will be a favorable time for those who are disposed to promote the circulation of the paper, to send us additional names as subscribers.

CAR-TRAVEL—INTEMPERANCE.—We notice with satisfaction the action of the Senate of the State of Pennsylvania in reference to the discrimination of color by railroad corporations, and trust that the prohibition which has for a long time been persisted in by the different railroad companies of this city will very soon cease to exist, and that to the colored man will be awarded the same privileges enjoyed by his white neighbor. Too long has the unwarrantable prejudice against color been indulged, and we hail with pleasure the dawning of a brighter day for this injured class of our fellow citizens.

The subject of the city passenger cars running on the first day of the week also claims our interest. There has been so much said in favor of it in public and private, that it seems scarcely worth while for us to reiterate the advantages which we believe might be derived therefrom in both a religious and moral point of view. We hope the efforts to remove all legal obstructions to this laudable movement will be successful, and that the liberty of conscience recognized by the constitution of the State of Pennsylvania will be respected.

We are unable to see the consistency of a determined opposition to this measure on the ground of a "desecration of the Sabbath" by those who are not, apparently, making a correspondent effort to suppress the gross evils which meet the eye at every turn, under the cover of the licensed grog-shop. The alarming increase of intemperance in our midst demands the serious consideration of the philanthropic portion of the community—to see what means can be devised by which the unrighteous traffic of spirituous liquors can be checked, and the offenders be brought to realize the enormity of

the evil of selling to their fellow men that which they know has the effect to cloud the noble gift of reason, and thereby subject them to the probable commission of crimes, the extent of which will be proportioned by the passions which are thus unduly excited. The crowded condition of both the State and County prisons, renders it impossible to carry out the system of separate confinement, and a very sad part of this state of things is, that by far the greater portion of the inmates are young men. We are credibly informed that, since the commencement of the war, more than two thirds, probably three-fourths, of the commitments have been of young men under twenty-five years of age. The agent for the county prison, in his report recently published, says truly, that the terrible evils of intemperance are only partially seen in the statistics of our prisons and almshouses and in the records of the press. We make the following extract from this report:—

"Could even a faint conception of the miseries intemperance has entailed be impressed upon the mind of the community, the horror awakened by the disclosure would lead to measures for its overthrow in some degree commensurate with its magnitude. In the city of Philadelphia alone, no fewer than forty four thousand one hundred and sixty-nine arrests were made by the police force during the past year, and the records show that of these arrests, three-fourths were cases of disorder arising solely from the use of intoxicating liquors. To estimate merely the *pecuniary* cost of intemperance to our city, we must add to the sums paid annually for the support of courts, and officers of justice, and of our prisons and almshouses, the untold sums which have been lost to the pursuits of business, by the crimes, disease and death of the thousands who have been withdrawn from their proper avocations, and have become a prey to strong drink. The most alarming feature of the evil seems to be in its power of propagation. The number of rum shops which have sprung into existence during the past twelve months is incredible. It has been estimated by those amply competent to know that there are as many tippling houses in Philadelphia at this time as there are public lamp-posts in the streets. In a single district in this city the number of Inspectors appointed by Government, at a salary in each case of five dollars per day, for the supervision of the manufacture of whiskey alone, is more than four hundred; and even that number has been found insufficient to keep pace with the amount produced of this single stimulant.

There was paid into the State Treasury last

year for the licenses of rum shops by Philadelphia, one hundred and sixty-six thousand three hundred and eighty four dollars. This sum, for the privilege of establishing so many pest-houses, to fix, like moral plague spots and festering sores, upon the surface of our otherwise beautiful city."

We think that this report speaks for itself, and should awaken earnest thought as to what can be done to arrest the enormous evils of which it treats.

MARRIED, on the 31st of First month, 1867, in accordance with the order of the religious Society of Friends, with the approbation of Solebury Monthly Meeting, E. WATSON FELL, son of Joseph and Harriet Fell, and LIZZIE, daughter of John E. and Martha Kenderdine, all of Bucks Co., Pa.

—, on Fourth-day evening, Tenth mo. 10th, 1866, according to the order of the Society of Friends, and at the residence of the bride's father, Wm. Lloyd, JOSEPH SLACK to ESTHER LLOYD, both of Lower Makefield, Pa.

—, at the same place, on the 30th of First mo., 1867, according to the order of the Society of Friends, FURMAN L. MULFORD, of Millville, N. J., to ANNA LLOYD, of Lower Makefield, Pa.

—, on the 7th inst., according to the order of Friends, at the residence of the bride's grand-parents, Thomas and Ann J. Paxson, ROBERT HOWELL BROWN, of Burlington Co., N. J., son of John Brown, to MARY B. PAXSON, daughter of Albert S. Paxson, of Buckingham, Bucks Co., Pa.

DIED, suddenly, on Fourth-day morning, 13th inst., at the residence of his brother, in Philadelphia, JOHN R. LIVEZEY, an estimable young man, in the 25th year of his age, son of Thomas and Rachel R. Livezey; all members of Plymouth Monthly Meeting, Pa.

—, on the 5th of Second month, 1867, CHAS. F. JENKINS, of Gwynedd, Montgomery Co., Pa., in his 74th year.

—, in Baltimore, on the 11th of Second month, 1867, JAMES DIXON, JR., aged 28 years, son of James and Mary Ann B. Dixon, of Talbot Co., Md.

—, on the 15th of Second month, 1867, HOWARD, son of Thomas H. and Sallie G. Saunders, aged 7 months; members of Green Street Monthly Meeting.

—, near Waynesville, Warren county, Ohio, on the 1st of Twelfth month, 1866, MARY GAUSE, widow of the late Samuel Gause, aged nearly 86 years; an esteemed member and for many years an elder of Miami Monthly Meeting.

She moved from R-dstone, Penna., in 1814, and settled near Waynesville, Ohio.

—, at his residence, in Elk township, Chester county, Pa., on the 29th of Tenth month, 1866, RICHARD SNOWELL, an elder and member of Little Elk Meeting, in the 77th year of his age.

In the departure of this beloved Friend, the community in which he lived has lost one of its most esteemed members, his family a fond and indulgent parent, and society one of its faithful standard bearers. Quiet and unobtrusive in his demeanor, he pursued the even tenor of his way, practically carrying out in all his movements the precepts of the devoted Christian. He was ever diligent in the attendance of meetings, when health permitted, and for months has been known to attend his own little

meeting, in the middle of the week, *alone*. The travelling friend ever met a cordial welcome at his hospitable home, and many there are who will remember the precious seasons enjoyed under his roof. A few days before his decease two ministering Friends lodged at his residence, and in their parting interview expressed their belief that his day's work was nearly done, and the feeling was that his sun was about to set in the western horizon, without a cloud to obscure its brightness.

That sorrow for sin which keeps the soul from looking toward the mercy seat, and which keeps Christ and the soul asunder, is a sinful sorrow.

Extracts from the minutes of the Meetings for Reading and Conversation, held at Race St. Meeting-house, Philadelphia.

(Continued from page 776.)

2d mo. 13th, 1867.—A large number of Friends were in attendance, and after the reading of the minutes of last meeting, an essay was presented by one of our members, entitled "Conversational meetings—their original design, and present aspect contrasted." The views held forth in this essay were such as tend to discourage the discussion of proposed reforms and changes in the practice or discipline of our Society, or the expression of views not in accordance with the general tenor of the teachings of Friends. The author considers the tendency of our Conversational Meetings as unfavorable to the best interests of the Society, and is especially opposed to some of the measures which have been suggested. In reply to his strictures, several Friends remarked that freedom of expression was necessary to bring out the views of our younger and least experienced members, and to open the way for correcting errors of judgment arising from want of information or from one sided and partial thinking.

The subject selected for this evening being "Moderation and Temperance," the ancient and modern rules of discipline bearing on the subject were read, showing the gradual growth of this testimony from the year 1706 to 1841. While at one time it was the practice of Friends to aid each other in procuring whiskey or rum to promote the gathering of the harvest, the evils of the practice became so apparent that the use of distilled spirits was first advised against—then discouraged—and finally the habitual use was made an offence against the Discipline.

In 1841, our Yearly Meeting directed that Friends should be tenderly advised to abstain from renting their property, or furnishing any materials, whereby our testimony against spirituous liquors as a drink will be violated. Notwithstanding the gradual growth of this concern in the Society, it must be admitted there is still great need for renewed attention to it, not only as individuals, but as a body—not only to keep *ourselves* from the defilement of strong

drink, but to strengthen the good resolves of others. The alarming spread of taverns, drinking-saloons and restaurants, where temptations to indulgence in this vice are held out, should, it was urged, be checked by legislation, and the influence of our Society should be exerted with law-makers to impose restrictions upon this destructive branch of business. The view was also held up that the sources of intemperance are not in the licensing of taverns, so much as in the neglect of those safeguards in the individual which are calculated to restrain undue desires, and to persevere in the path of temperance and of virtue. As parents, friends, or neighbors, whatever sphere of life we may move in, we should take care that our example and precept tend to strengthen the good resolves of those with whom we come in contact.

We should inculcate the virtue of total abstinence. Intemperance is generally the result of small beginnings; it grows insidiously, undermining the physical and moral health, till it blights the happiness of home, and brings ruin and degradation in its train. The practice of handing wine as an act of hospitality, or at public entertainments, was strongly condemned, as leading many to the first acts of imprudent indulgence, and calculated to remove the wholesome dread of the intoxicating draught in which our children are or ought to be educated. The demoralizing influence of the late war is seen in an increase of intemperance, and Friends were urged to be vigilant and active in sustaining and advancing the temperance cause in which many of our ancestors were pioneers.

For Friends' Intelligencer.

FRIENDS' PUBLICATION ASSOCIATION.

The want of an organization amongst Friends, for the publication of books, calculated to promote a knowledge of our principles and testimonies, and to furnish suitable reading matter for our children, has been felt by many Friends, and has been the subject from time to time of several articles in the *Intelligencer*.

Believing the time to have arrived when some effort might be made to form such an association, a number of Friends met together at Race Street Monthly Meeting room, on Sixth-day afternoon, the 15th inst., to consider the subject.

After a free interchange of sentiment, it was the united judgment of those present that an association should be formed. The meeting adjourned to Sixth-day afternoon next, Third month 1st, at 3 o'clock, at the same place.

Friends interested in this concern are invited to attend.

Joy and comfort are those dainties that God doth not every day feast his people with, every day is not a harvest day nor a summer's day.

ANOTHER EXAMPLE OF WISE LIBERALITY.

The following letter, which explains itself, breathes such a spirit of generous philanthropy that we think it worthy of preservation in the *Intelligencer*. It is addressed to fifteen prominent citizens of the Northern and Southern States, who are selected as the trustees to carry out the well-conceived designs of the donor, and who have already met and accepted the responsible position assigned them. We would that all those intrusted by Providence with riches far beyond their needs could feel themselves stewards, bound to use them wisely for the benefit of others, and to promote the great civilizing and Christianizing agencies, which are needing pecuniary aid.

GENTLEMEN: I beg to address you on a subject which occupied my mind long before I left England, and in regard to one at least of you—the Hon. Mr. Winthrop, the distinguished and valued friend to whom I am so much indebted for cordial sympathy, careful consideration, and wise counsel in this matter—will remember that I consulted him immediately upon my arrival in May last. I refer to the educational needs of those portions of our beloved country which have suffered from the destructive ravages and the not less disastrous consequences of civil war. With my advancing years my attachment to my native land has but become more devoted. My hope and faith in its successful and glorious future have grown brighter and stronger, and now, looking forward beyond my stay on earth, as may be permitted to one who has passed the limit of three score and ten years, I see our country, united and prosperous, emerging from the clouds which still surround her, taking a higher rank among the nations, and becoming richer and more powerful than ever before.

But to make her prosperity more than superficial, her moral and intellectual development should keep pace with her material growth, and in those portions of our nation to which I have referred the urgent and pressing physical needs of an almost impoverished people must for some years preclude them from making, by unaided effort, such advances in education and such progress in the diffusion of knowledge among all classes as every lover of his country must earnestly desire.

I feel most deeply, therefore, that it is the duty and privilege of the more favored and wealthy portions of our nation to assist those who are less fortunate; and with the wish to discharge, as far as I may be able, my own responsibility in this matter, as well as to gratify my desire to aid those by whom I am bound by so many ties of attachment and regard, I give to you, gentlemen, most of whom have been my

personal and especial friends, the sum of \$1,000,000, to be by you, and your successors, held in trust, and the income thereof used and applied in your discretion, for the promotion and encouragement of intellectual, moral and industrial education among the young of the more destitute portions of the Southern and Southwestern States of our Union—my purpose being that the benefit intended shall be distributed among the entire population, without other distinction than their need and the opportunities of usefulness to them.

Besides the income thus devised, I give to you permission to use from the principal sum, within the next two years, an amount not exceeding forty per cent.

In addition to this gift, I place in your hands bonds of the State of Mississippi, issued to the Planter's Bank, and commonly known as "Planter's Bank Bonds," amounting, with the interest, to about \$1,100,000, the amount realized by you, from which is to be added to and used for the purposes of this trust.

These bonds were originally issued in payment for stock in that bank, held by the State, and amounting in all to over \$2,000,000. For many years the State received large dividends from that bank, over and above the interest on these bonds. The State paid the interest without interruption until 1840, since which no interest has been paid, except a payment of about \$100,000, which was found in the treasury applicable to the payment of the coupons, and paid by a mandamus of the Supreme Court. The validity of these bonds has never been questioned, and they must not be confounded with another issue of bonds made by the State to the Union Bank, the recognition of which has been a subject of controversy with a portion of the population of Mississippi.

Various acts of the Legislature, viz., of February 28, 1842; February 23, 1844; February 16, 1846; February 28, 1846; March 4, 1848; and the highest judicial tribunal of the State has confirmed their validity, and I have no doubt that at an early day such legislation will be had as to make these bonds available in increasing the usefulness of the present trust. Mississippi, though now depressed, is rich in agricultural resources, and cannot long disregard the moral obligation resting upon her to make provision for their payment.

In confirmation of what I have said, in regard to the legislative and judicial action concerning the State bonds issued to the Planter's Bank, I herewith place in your hands the document marked A. The details and organization of the trust I leave with you, only requesting that Mr. Winthrop may be chairman, and Governor Fish and Bishop Mollvaine, vice chairmen of your body; and I give to you power to make all necessary by-laws and regulations; to

obtain an act of incorporation if any shall be found expedient, to provide for the expenses of the trustees, or of any agents appointed by them, and generally to do all such acts as may be necessary for carrying out the provisions of the trust.

All vacancies arising in number by death, resignation or otherwise shall be filled by your election so soon as conveniently may be, and having in view an equality of representation so far as regards the Northern and Southern States. I furthermore give to you this power, in case two thirds of the trustees shall, at any time after the lapse of thirty years, deem it expedient to close this trust, and of the funds which at that time shall be in the hands of yourselves and your successors, to distribute not less than two-thirds among such educational purposes as they may determine in the States for whose benefit the income is now appointed to be used.

The remainder may be distributed by the trustees for education or literary purposes whenever they may deem it expedient.

In making this gift, I am aware that the fund derived from it can but aid the States which I wish to benefit in their own exertions to diffuse the blessings of education and morality; but if this endowment shall encourage those now anxious for the light of knowledge, and stimulate to new efforts the many good and noble men who cherish the high purpose of placing our great country foremost, not only in power, but in the intelligence and virtue of her citizens, it will have accomplished all that I desire.

With reverent recognition of the need of the blessing of Almighty God upon this gift, and with the fervent prayer that under his guidance your counsels may be directed for the highest good of present and future generations in our beloved country, I am, gentlemen, with great respect,

Your humble servant,
GEORGE PEABODY.

LITTLE LUCY.

A sweet little child, about two years old,
Was sitting by "Aunty" counting her gold.
Counting her treasures so slow and true,
"Two, free, seven tugar-plums—red, white, and blue."

One went to her mouth—such a satisfied look
Beamed now from her face as another she took.
"Please give it to aunty, she'll sing Happy Land;"
And the sugar-plum dropped from her little fat hand.
"Please give aunty more?" Another one fell,
And so on; and yet baby thought it was well,
Until only two of all she possessed
Remained in her hand, and now for the test.
"Give aunty another?" She held it up high,
As much as to say, "'Tis hard, but I'll try;"
And the little plum dropt 'mong a handful more
Of as priceless jewels as ever queen wore.

One only remained. All trembling we stood—
Would our darling do more than we ever could?

"Give aunty another?" came tender and low,
For aunty's eyes dimmed, tears blinded them so.
The little one gazed on the treasure so dear
With a sad, longing look, a sob, and a tear;
'Twas but for a moment—a smile and a kiss
Never sealed costly offering more precious than this.

For Friends' Intelligencer.

THE SHADOWS.

*Suggested by the exhortation of a Friend not to abide
among the shadows.*

Oh! the joyous golden sunshine,
How it brightens every scene,
Beautifies the lordly mansion
And the cottage on the green.

How the wavelets gleam and sparkle,
As they catch the sun's bright ray;
How the forests bring their offerings
To the glorious King of Day.

But where brightest beams the sunlight,
There the shadows deepest lie—
Who would not their presence welcome
When the Summer sun is high.

Lo! the desert dry and barren
Shows no peaceful mossy glade,
Save where gush the cooling fountains
'Neath the palm-tree's grateful shade.

Only where the shadows linger
Do the freshest mosses spring—
As if hiding desolation,
To the time-worn towers cling.

Where the shadows longest linger
Tempering the sun's fierce glare,
There the grass is greenest, softest—
Fairest flowers blossom there.

So upon the heart the shadows,
Like a benediction fall—
Humbling, purifying, fitting
Us to rise at Sorrow's call.

In the dewy nooks abiding
We our strength shall soon renew,
For the Right again to battle,
And the Cross to bear anew.

Of the many priceless blessings
Coming from the Father's hand,
None more precious than the shadows
In a "dry and weary land."

1st mo., 1867.

A. R. P.

The last number of the *Christian Examiner*, under the head of "The Atlantic Telegraph," contains some remarks on the reception given to Cyrus W. Field by the *New York Journal of Commerce*, from which the following is extracted:

In all ages, the *multitudes* have been objects of peculiar and mysterious interest to men, and strictly so in proportion to the capacity and insight of those who have contemplated them. But this interest has been of very different and widely contrasted kinds. Always intense, it has commonly been painful and alarming. For ages, men in general were regarded hardly as

more than finer animals, capable of a superior mischief; creatures that were either to be intimidated or tamed, as their rulers chanced to be better supplied with force or with guile. The only expedient of governors was to turn the passions of one multitude against the passions of another, or one passion of the same multitude against another passion of its own. Thus natural ferocity was converted into the art of war; jealousy and envy, into pride of country and hatred of rival powers; sloth and apathy, to the account of those willing to substitute their own thinking and their own energy for that of the masses, and make them the tools of their ambition.

Thus multitudes have awed, crushed, and restrained each other, for the benefit of the few, who made themselves exceptional to the mass. Any self-directing power, any intelligent sense of community, any essential worth and goodness in men as men, any right of the race as a race to possess, enjoy and govern the world, did not enter into the head of antiquity, if we except a few theoretical philosophers. Accordingly, the very name of the people was a reproach and an alarm. *Oi πολλοι*, the many, was a monster, either a stupid and loathsome, or a ferocious and fearful one, as climate and age affected him. Our most opprobrious appellation—the *mob*—is altogether too dignified a word for the ideas associated with the mass of human creatures before our Saviour's day; and, indeed, out of the narrow circle of his true disciples long after. *Hordes*, *hives*, *herds*, the spawn of the teeming swamps, the litter of the rank fens,—these terms expressed the prevailing sense of the commonness, the miserable origin, the hopeless character, the alarming increase, of their own kind. "Mob" is a word of much less contemptible import. It suggests the existence of some slight concert and design, hides a struggling sense of political aspirations, and hints the possibility of good neighborhood and peaceful relations between an existing civil order and itself. From "scum" and "herd" and "horde" to "mob," from "mob" to "mass," from "the masses" to "the people," from "the people" to "the race," from "race" to "brotherhood," we have a regular ascending series of terms, recording the historic progress of the multitudes as plainly as the geological strata do the history of the earth's advance to a habitable condition. And it is easy to gauge the social and Christian status of any community, by observing the ordinary and spontaneous use of the terms in which the multitude is spoken of, and in which it speaks of itself.

The great peculiarity of ante Christian days was this: the multitudes were despaired of, and therefore both feared and despised. They were, it is true, courted by the ambitious, flattered by the cunning, but still feared and despised at

once by the upper classes. All that we recognize in these days as philanthropy,—a feeling and principle based upon a conviction that the condition of the masses is the fruit of unhappy and discouraging circumstances, which may be removed or relieved, with a certainty of improving their condition and character,—this was unknown. It was not that the intelligent and superior classes in those days were less well-disposed, more selfish or cruel, than we are. But the *relative proportion* of the civilized and the uncivilized, the educated and the uneducated, the rich and the poor, was so much less favorable to hope, that the problems then offered to the wise and good were totally different from ours, and utterly appalling. It was inconceivable then that men everywhere could become educated, civilized, and sensible of the advantages of morality. The very fact of the unknown geography, the imperfect navigation, the slow and difficult intercourse, of ancient times, fostered continual fears of possible eruptions of barbarians,—first realized, indeed, in the destruction of the Roman empire, but always operating to prevent any generous hope of the common elevation of the race. The absence of any general commerce, with a total ignorance of the very name of political economy, rendered precarious supplies of food a proper ground of jealousy and dread,—a fear which is one of the most active and steady causes of hostility and division among men. Nations could not afford to be at peace with their rivals in the corn markets; it was a matter of life and death who had possession of the fertile fields: and so war, jealousy and hatred seemed a necessary, and even a justifiable and statesmanlike policy in the conduct of public affairs, and the relation of states with each other.

When our Saviour appeared, his most affecting and characteristic quality was the new feeling with which he regarded the *multitude*. Objects of lively interest were the multitude, indeed, to the princes and rulers of those days. Herod did not dare, until lust and wine had driven him beyond reason, to behead John; for he feared the people. The chief priests and scribes did not dare to lay hands on Jesus till they were backed by the Roman governor, for the same reason, that they *feared* the people, who had instinctively felt that they had found a friend in our Saviour. But it was not *fear*, but *compassion*, an entirely different kind of interest, that Christ was to manifest towards them. For, in the language of St Matthew, "when he saw the multitudes, he was moved with compassion on them, because they fainted, and were scattered abroad, as sheep having no shepherd."

The grounds of our Saviour's compassion are, it is worthy of notice, the very grounds of the fear entertained towards the people by his predecessors and contemporaries. Because they

fainted with hunger, were maddened with unsatisfied appetite, and driven to reckless and ferocious ways,—this, which moved the dread of them, and an ever-watchful and armed resistance to their gatherings and their demands, was the first spring of our Saviour's compassion for them. True, he who could multiply the loaves and fishes miraculously for its relief had less to fear from the rage of hunger than the commissaries of mere human princes. But Christ distinctly recognized *want* as the first cause of compassion for the people. This was their first, great misfortune, overshadowing all others, causing their degradation, and making them dangerous to themselves and others. He had to feed even before he could instruct them; to become the maker of their bread before he could be the Saviour of their souls. A solemn and most tardily recognized truth was here divinely affirmed. The physical and material degradation of the world has been the first and chief cause of its moral and spiritual destitution. The science of supporting great bodies of people upon this planet in any other than a predatory, uncertain, and clashing way, has been one of very slow and difficult progress. But distinctly to recognize *destitution*, not as the curse of God upon those on whom it fell, but as the providential stimulus to effort, and the divine incentive to compassion; to regard it as a problem capable of solution, or worth the profoundest intellectual and moral sacrifices to fathom it,—was left to our Saviour. It was the mightiest step in human progress when the *faintness* of the people gained the compassion, in place of the dread and fear, of the great leader of the civilization of Christendom. To see and allow that men were made wicked, dangerous, and hopeless mainly by their *wants*; that thus they were shut up to criminality, kept base and fierce by the necessity of their condition; to pity them for this calamity; still more, to look upon it as one which it was the duty and privilege of the fortunate, the instructed, and the rich to relieve or remove,—this was the longest stride on, the highest step up, which the gospel made, politically considered.

(To be continued.)

THE DWELLINGS OF THE POOR.

Oh! if those who rule the destinies of nations would but remember how hard it is for the very poor to have engendered in their hearts that love of home from which all domestic virtues spring when they live in dense and squalid masses, where social decency is lost, or never found; if they would but turn aside from the wide thoroughfares and great houses, and strive to improve the wretched dwellings in by-ways where only poverty may walk—many low roofs would point more truly to the sky, than the loftiest steeple that now rears proudly up from the midst of guilt and crime, and horrible disease,

to mock them by its contrast. In hollow voices from workhouse, hospital and gaol, this truth is preached from day to day, and has been proclaimed for years. It is no light matter—no outcry from the working vulgar—no mere question of the people's health and comforts, that may be whistled down on Wednesday nights. In love of home, the love of country has its rise, and who are the truer patriots or the better in time of need—those who venerate the land, owning its wood, and stream, and earth, and all that they produce? or those who love their country, boasting not a foot of ground in all its wide domain?—*Charles Dickens.*

FOR THE CHILDREN.

SQUIRRELS.

NORTH HEMPSTEAD, L. I., 1st mo. 14th, 1867.

We confess to a great partiality for the squirrels. They are not plenty on Long Island, therefore we can charge no account of mischief against them, but enjoy their gambols and watch their sprightly movements with pleasure. Who does not love to see the pretty striped ground squirrel racing along the fences, now stopping at a corner to take a peep at us, and again skipping along the fence rails towards his cosy home. "Look there! see! see him!" cry the children as they first spy the little fellow; and "Oh! look! there is a grey squirrel, too, running across the road just ahead of us; and see how easily he climbs up that tree, and now he is looking down at us. Oh, how I wish I had him nice and tame at home!" They are often tamed, and make very interesting pets for the boys.

A neighbor of ours had a nice tame one that would mount on his lap when at table and patiently wait there for his breakfast. He would also perch on his shoulder while milking the cows, and received, when this was done, a dish of warm milk, of which squirrel was very fond. If we examine the squirrel we will find they have long fingers like toes, armed with sharp claws, in order to maintain their hold on the branches. Their bones are light, and resemble the bones of birds, which, we know, are many of them hollow, so as to combine strength with very little weight. We recollect, when young, peeping into a hole in a tree in the woods, and seeing a dozen large soft black eyes looking up at us so innocently, and almost beseeching us to be let alone. Stepping back a few steps to motion for one of our companions to come, out came a party of flying squirrels and scampered up the tree, and away they flew to other trees, which they ran up and sailed away to others until lost to view. We were bewildered at the sight, for we had heard of flying squirrels before, but had no idea what nimble fellows they were.

Some kinds of squirrels are said to trespass

on the crops of corn, and steal large quantities for winter's use; but we have never heard of those just mentioned doing any damage. The skin of the flying squirrel is continued out between the front and hind legs to their toes. It is very thin, and when they wish to go to another tree they climb nearly to the top and make a spring, aiming at a tree within the right distance: spreading out their legs, the skin acts like a parachute, and assists in holding them up, until they strike low down on the tree. It is a pretty sight to see them sailing down to one tree, and then running up another. They are found in India, Siberia and America. Who has not seen and admired the little ground squirrel, which the boys like to call "Chipmuck." And who could be so cruel as to kill the innocent sprightly fellow? We will tell you what the naturalist Audubon found in their burrows on opening them in January, when the ground was covered with snow five inches deep. He found the entrance nicely stopped from the inside, so as to keep out the cold. It was a long winding gallery, descending at first almost perpendicularly three feet. It then continued winding once or twice, rising a little nearer the surface until it had advanced about eight feet, when he came to a large nest made of oak leaves and dried grass. There lay snugly covered three chip squirrels. They appeared benumbed and sluggish, but were ready to bite when taken in the hand. But what do you think he found a little further on, nicely stowed away in their galleries? About two quarts of buckwheat, and wheat, a quart of hazel nuts, nearly a peck of acorns, a little Indian corn, and a few grass seeds. I hope no one will change their opinion of the harmlessness of the chipmuck, if they did have a little grain stored away, for probably they found it out in the fields where it had been carelessly scattered. We don't believe they are thieves by any means. Have you ever seen them carry away to their homes the nuts under the hickory trees? You should watch them. They have very large cheeks, and always take four nuts into their mouths if they can get them. But the hickory nut has a little point standing out at the blossom end. Chip knows these ends will not be comfortable in his cheek-pouches, so he nips them off ere he stows them away with his fore-paws.

Once the black squirrels were numerous, but the grey squirrel being stronger drives him out, and no doubt, in time, like our Indian tribes, they will be numbered no more in our forests.

Its skin is valuable, and is made into ornamental furs. Neither it nor the red squirrel are natives here. They are pretty chatty little fellows, but farmers say they are too helpful in assisting them in gathering their corn crops, often to such an extent that, with dog and gun,

they have to make war on them in self-defence. To watch a little party of squirrels, unless they are made familiar, like those in the Boston Common, or the pets of W. C. Bryant's, is amusing, but not very easily accomplished. They whisk about so adroitly, never missing their hold on the limbs, appearing to use their long, fan-like tails like Blondin uses his balancing pole, to keep the equilibrium. Especially is it interesting to see them in autumn lay in their winter supply. The tree squirrel hides its nuts and grain away in all sorts of curious sly places. Sometimes it scratches away the leaves and deposits the treasures in a hole in the ground; and it is said their memory is so good they can go in the winter, when the ground is covered with its snowy mantle, and find the exact spot where the nuts were placed. Squirrels know better than to carry to their granary any defective articles. A worm-eaten nut, or an empty shell, is not found among their stores.

I. H.

The Treasurer of Friends' Association for the Aid and Elevation of the Freedmen has received the following amounts since last report:—

From City Contributions.....	\$100.00
" M. E. Cooper, Cincinnati, Ohio,.....	25.00
" T. H. B.,.....	20.00
" S. F. C.,.....	5.00
" Mrs. J. P. Crozer, Delaware Co., Pa.,.....	25.00
" Emma Crozer, " " ".....	25.00
" Redwood F. Warner,.....	25.00

\$225.00

Also a valuable donation of a barrel of seeds from Shakers of Mt. Lebanon, N. Y. Clothing from R. W. Moore, a "Friend," and a large box of clothing from Friends of Sadsbury, Pa.

HENRY M. LAING, Treasurer,

2d mo. 16, 1867. No. 30 Third St.

SYNOPSIS OF A

LECTURE ON LIGHT,

FOR THE BENEFIT OF THE

BETHANY MISSION FOR COLORED CHILDREN

To be delivered at the Alexander Presbyterian Church, N. E. corner of Nineteenth and Green Streets, 2d Month 25th, 1867, (Monday evening, February 25th), at 8 o'clock,

BY PROF. ALBERT R. LEEDS, A.M.

THE NATURE OF LIGHT.

Analogy between Light and Sound. *Experiments:* Stationary Wave. Vibrating line.

SOURCES OF LIGHT.

Experiments: Burning of Magnesium, etc. The three cones of the candle flame cast their own image upon a screen. Intense heat made to produce Light. The Lime Light. Shadow of a Flame. Translucent Gold.

REFLECTION AND REFRACTION OF LIGHT.

Optical Illusions. Correction of Lenses. Spherical Aberration. These principles applied to the construction of the Magic Lantern. *Experiments:* The cut and displaced grating. The lantern employed with the Lime Light to project a series of beautiful Photographs, etc., upon the screen.

Admission, 50 cents, To Scholars, 25 cents..

Tickets can be obtained at Hufnagel's Drug Store,

S. W. corner of 19th and Green Streets; Cooper's Dry Good Store, 1901 Market Street; Friends' Book Store, 109 North Tenth Street; Slackhouse's Drug Store, S. E. corner of 8th and Green Streets; T. B. Pugh's Book Store, 607 Chestnut Street; and at Edward Parrish's Drug Store, 800 Arch Street.

ITEMS.

CONGRESS.—In the Senate official information was given of the ratification of the constitutional amendment by the Ohio and New York Legislatures. The bill amendatory of the postal laws was recalled from the House, amended and passed. The passage by the House of the bill for the establishment of civil government in Louisiana, and the passage by the House of the bill to provide for the more efficient government of rebel States, were announced, but went over. A bill to punish the larceny of any articles of Government property by a fine of \$5,000, or imprisonment of not less than one year, or more than ten years, or both, was passed. A resolution was offered instructing the Judiciary Committee to inquire into the expediency of amending the Constitution so as to limit the service as President to one term, to abolish the office of Vice President, and to provide for the election of President by popular vote. The bankrupt bill, which had been previously rejected, was called up, amended and passed; also, the joint resolution permitting the withdrawal of alcohol from bond for scientific purposes without payment of tax; the bill for the funding of the compound interest notes; and the bill to authorize the acceptance of League Island as a naval depot. From the Judiciary Committee was reported the bill providing that persons held upon meane process or execution issued from United States courts shall be entitled to discharge in the same way as if arrested upon similar process of the State courts in the same district. The Reconstruction bill, for the more efficient government of the rebel States, was passed after considerable discussion. The House amendments to the act to prevent smuggling were concurred in. A committee of conference was appointed on the bankrupt bill. A joint resolution was introduced for the payment of claims of loyal Choc-taw and Chickasaw Indians who had been driven from their homes by the rebels.

HOUSE.—Under the usual call a large number of bills and resolutions were introduced, passed to a second reading, and referred. Among them was one to promote the interests of American commerce and ship-building; another declaring that the Government of the United States in the prosecution of the Alabama claims should use the same dispatch and emphasis which characterized the demand of the British Government in the Mason and Slidell affair; a bill for the removal of the Indian tribes from the State of Wisconsin. A bill to amend the internal revenue laws was presented. It practically exempts incomes to the amount of fifteen hundred dollars from taxation; over that amount a uniform rate of five per cent. is to be charged. The committee appointed to investigate the New Orleans riots, presented the report of the majority, and a minority report. Accompanying the report of a majority is a bill for the re-establishment of civil government in the State of Louisiana. The bill finally passed. A resolution was adopted instructing the Committee of Ways and Means, in view of the existing depression of the interests of the commercial marine of the United States, to inquire into the expediency of amending the tariff act by a provision to the effect that all goods imported on American vessels shall be allowed a rebate of ten per cent. on the duties im-

posed by said act. The bill reported from the Reconstruction Committee, for the establishment of a military government in the South, was, after much discussion, passed. The Senate amendments to the bankrupt bill were then taken up and non-concurred in. The Secretary of State was directed to inform the House what States now represented in Congress have ratified the constitutional amendment. The Secretary of the Senate announced the passage by that body of the act for the more efficient government of the rebel States. The bill was debated, but the vote had not been taken when our paper went to press.

THE CONSTITUTIONAL AMENDMENT.—The Legislature of Wisconsin has ratified the Constitutional Amendment. It has also been ratified by the upper branch of the Rhode Island Legislature. The lower branches of the Legislatures of Delaware and Louisiana have rejected it.

Thus far the Amendment has been ratified by nineteen states, as follows: Connecticut, Illinois, Indiana, Kansas, Maine, Michigan, Minnesota, Missouri, Nevada, New Hampshire, New Jersey, New York, Ohio, Oregon, Rhode Island, Tennessee, Vermont, West Virginia and Wisconsin. It has been rejected by thirteen states, as follows: Alabama, Arkansas, Delaware, Georgia, Florida, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, South Carolina, Texas and Virginia.

In the Delaware Legislature, a bill allowing negroes to testify, and making their punishment for crime the same as that for whites, has been defeated by a strict party vote.

THE FREEDMEN.—The City Council of Baltimore has appropriated \$20,000 to the colored schools of that city.

Both Houses of the Tennessee Legislature have passed a bill giving suffrage to the negroes.

Both Houses of the Missouri Legislature are agreed in proposing such an amendment of the State constitution as shall do away with distinctions of color.

The bestowal of suffrage on the colored citizens of the District, and the evident determination of Congress to secure them in the exercise of the right, have wrought some marvellous changes in Georgetown and Washington. Officials who recently were conspicuous in devising means to evade the several acts of Congress compelling education to be provided for blacks as for whites, since both were taxed for school purposes, now calculate nervously their chances at the next election, and reveal an admirable solicitude for the intelligence of their constituents.

KENNETT SQUARE ACADEMY, for young men and boys, and *Kennett Square Female Seminary*. Two separate Boarding Schools, under the same management; have had during the winter 151 pupils. The Seminary's next session of sixteen weeks will open Third month 5th, 1867. Whole expense, including Academy Lectures, Languages and Drawing, \$84. This is a rare opportunity for teachers. The Principal's Normal Class at present includes one third of the school. For circulars apply to S. C. Shortridge, Sidney Pacey, or Emma Bowman.

The Academy begins a session of thirteen weeks Third month 20th. Terms, \$1.75 per week. Particular attention to Reading, Penmanship and Spelling. Prof. J. G. Moore, of Philadelphia, will continue his Lectures on Chemistry and Astronomy before the School. No extra for Latin, Greek, French, or Drawing. Book-keeping, and sponcorian Penmanship, by a Commercial College graduate.

Kennett borough has two daily trains to Philadelphia, stage line to Wilmington, Del. express and telegraph office, &c., &c., affording to students the conveniences of larger towns, without their objectionable features.

Apply to Swithin C. Shortridge, A. B. (Harvard University), Principal, Kennett Square, Chester Co., Pa. 216 tfawin.

WANTED.—A Boy in a Store; one having some knowledge of the House-Furnishing business preferred. Address Friend, at this office, with reference. 1tp.

A HISTORY OF THE RELIGIOUS SOCIETY OF FRIENDS FROM ITS RISE TO THE YEAR 1828. Volumes III and IV. By SAMUEL M. JANNEY.

The third and fourth volumes of this work have been unavoidably delayed by causes connected with the late civil war. During the five years that have elapsed since the second volume was published, so many changes have taken place that it is deemed expedient to issue a new Prospectus.

The two volumes now proposed to be published contain the history of the Society from the year 1691 to 1828, embracing much original matter that has not appeared in any other history. *Biographical sketches are given of the most prominent members of the Society in Great Britain and America, with many instructive passages from their writings and interesting anecdotes.*

Among the subjects of deep interest treated of in these volumes are: *the perils and preservation of Friends during the Irish Rebellion of 1798; the course they pursued during the war of American Independence; their efforts to civilize the Indians and preserve peace with them; the rise and progress of their testimony against Slavery; their early labors in the cause of Temperance; the Separation in Ireland at the beginning of this century; and the Separation in America in 1827-8, with the causes that led to it, and the results that have followed.*

The cost of paper, printing and binding having greatly increased since the first prospectus was issued, it is found that the work cannot be published, *without considerable loss*, at the price originally intended. The price will be, therefore, \$2.00 per volume, bound in cloth; and \$2.25 per volume, bound in sheep library style; but those subscribers under the first prospectus who have taken the first two volumes, will be furnished with the third and fourth volumes at \$2.00 each, bound in sheep.

The first two volumes can be obtained from the publisher or his agents, at \$2.00 each, sheep binding.

Agents are requested to return this prospectus as speedily as possible—as the work is now in press—with full list of names and residences of subscribers, to the author's publisher. Agents will be allowed one copy for every six copies sold by them, and they can be furnished with lists of their subscribers upon application to the Publisher,

T. ELLWOOD ZEIS, 112 tfawin. Nos. 17 and 19 S. Sixth St., Phila.

BOOKS for sale at Office of Friends' Intelligencer, No. 144 North Seventh Street.—A very few copies Job Scott's works, \$6.00. Journal of John Comly, at Office \$2.00; by mail, \$3.40. Journal of John Woolman, \$1.00 a \$1.20. Journal of Hugh Judge, \$1.00 a \$1.20. Janney's Life of Wm. Penn, 2d ed. oct., \$2.50 a \$2.75. Janney's Life of Geo. Fox, \$2.25 a \$2.50. Discipline of Philadelphia Yearly Meeting, 75c. a 90c. Friends' Miscellany, 11 vols., \$5.00 a \$9.75. Isaac Pennington, \$5.00 a 6.00. Thos. Story, \$1.00 a 1.25. SELECTIONS FROM THE WRITINGS OF JOHN BARCLAY.

—(Continued from page 808.)

To L. A. B.

Boenon, 24th of Sixth month, 1825.

I am favored indeed in being able to say, how greatly the change of air, and the suspension of mental exercises have revived me. Truly, I felt both in mind and body, failing beyond the usual vicissitudes or ups and downs that attend. It was a great convulsion to my faith, though relieving to my poor frame, to have to resign what had been received as clear duty; and I trust, that if in any wise there was occasion for me at that crisis to remember Jonah's case, when he was angry, because his Master's will declared through him was reversed, the feeling was nothing worse than a jealousy for the honor of the great name, and the high vocation professed by me, lest the Truth should suffer, or any cause of offence be given. I am altogether in the hands of One, who can see if I have gone down to Joppa, and paid the fare to Tarshish. It is an awful thing in this day, as ever it was in any other, to take the name of the Most High into our lips, and to declare his commands; but if so, how awful is the situation of those who reject these messages,—who do not, like "that great city" of old, "cry mightily," and turn from their evil ways. O! the longer I was in that great city, the more was I baptized, (as I thought,) into a sense of that which is wanting, in an especial manner in our favored Society; until the bur-

den became more than I could sustain: and yet for a time I could not see any way rightly to get from under it. When we consider what must be, and ever is, the condition of those who follow not the Lamb in the leadings of his pure light, and that it is said of them that love the world, and the things of it, that the love of the Father is *not in them*,—that the friendship of the world is enmity against Him,—with many other such truths;—what shall we think the fair profession of many is worth, in the sight of the Searcher of hearts. How glorious a thing, to be daily growing in grace, daily receiving heavenly bread, daily partaking of the Divine blessing, and in *that*, moving and acting towards others in our several duties. It is wonderful to me, how my constitution seems in so short a time to have rallied.

To a Friend.

Boenon, SUSSEX, 30th Sixth Month, 1825.

My beloved Friend.—What a wonderful course have believers to tread in;—how led about, and in all things instructed,—how wonderfully and wisely dealt with! What a process it takes to purify us from self, and completely to redeem. Nothing less than an infinite Hand can do it for us,—both as to mercy, wisdom and power, and that continually exerted on our behalf. O! I feel these things more than ever I did, and feel that I am yet but a child in the experience of them; because that which is attained, is as nothing compared with the fullness that is set before us. I trust we are companions in this

posed by said act. The bill reported from the Reconstruction Committee, for the establishment of a military government in the South, was, after much discussion, passed. The Senate amendments to the bankrupt bill were then taken up and non-concurred in. The Secretary of State was directed to inform the House what States now represented in Congress have ratified the constitutional amendment. The Secretary of the Senate announced the passage by that body of the act for the more efficient government of the rebel States. The bill was debated, but the vote had not been taken when our paper went to press.

THE CONSTITUTIONAL AMENDMENT.—The Legislature of Wisconsin has ratified the Constitutional Amendment. It has also been ratified by the upper branch of the Rhode Island Legislature. The lower branches of the Legislatures of Delaware and Louisiana have rejected it.

Thus far the Amendment has been ratified by nineteen states, as follows: Connecticut, Illinois, Indiana, Kansas, Maine, Michigan, Minnesota, Missouri, Nevada, New Hampshire, New Jersey, New York, Ohio, Oregon, Rhode Island, Tennessee, Vermont, West Virginia and Wisconsin. It has been rejected by thirteen states, as follows: Alabama, Arkansas, Delaware, Georgia, Florida, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, South Carolina, Texas and Virginia.

In the Delaware Legislature, a bill allowing negroes to testify, and making their punishment for crime the same as that for whites, has been defeated by a strict party vote.

THE FREEDMEN.—The City Council of Baltimore has appropriated \$20,000 to the colored schools of that city.

Both Houses of the Tennessee Legislature have passed a bill giving suffrage to the negroes.

Both Houses of the Missouri Legislature are agreed in proposing such an amendment of the State constitution as shall do away with distinctions of color.

The bestowal of suffrage on the colored citizens of the District, and the evident determination of Congress to secure them in the exercise of the right, have wrought some marvellous changes in Georgetown and Washington. Officials who recently were conspicuous in devising means to evade the several acts of Congress compelling education to be provided for blacks as for whites, since both were taxed for school purposes, now calculate nervously their chances at the next election, and reveal an admirable solicitude for the intelligence of their constituents.

KENNETT SQUARE ACADEMY, for young men and boys, and *Kennett Square Female Seminary*. Two separate Boarding Schools, under the same management; have had during the winter 161 pupils. The Seminary's next session of sixteen weeks will open Third month 5th, 1867. Whole expense, including Academy Lectures, Languages and Drawing, \$64. This is a rare opportunity for teachers. The Principal's Normal Class at present includes one third of the school. For circulars apply to S. C. Shortridge, Sidney Pusey, or Emma Bowman.

The Academy begins a session of thirteen weeks Third month 20th. Terms, \$4.75 per week. Particular attention to Reading, Penmanship and Spelling. Prof. J. G. Moore, of Philadelphia, will continue his Lectures on Chemistry and Astronomy before the School. No extra for Latin, Greek, French, or Drawing, Book-keeping, and Spencerian Penmanship, by a Commercial College graduate.

Kennett borough has two daily trains to Philadelphia, stage line to Wilmington, Del., express and telegraph office, &c., &c., affording to students the conveniences of larger towns, without their objectionable features.

Apply to Swithin C. Shortridge, A. B. (Harvard University), Principal, Kennett Square, Chester Co., Pa. 216 tfawin.

WANTED.—A Boy in a Store; one having some knowledge of the House-Furnishing business preferred. Address Friend, at this office, with reference.

A HISTORY OF THE RELIGIOUS SOCIETY OF FRIENDS FROM ITS RISE TO THE YEAR 1828. Volumes III and IV. By SAMUEL M. JANNEY.

The third and fourth volumes of this work have been unavoidably delayed by causes connected with the late civil war. During the five years that have elapsed since the second volume was published, so many changes have taken place that it is deemed expedient to issue a new Prospectus.

The two volumes now proposed to be published contain the history of the Society from the year 1661 to 1828, embracing much original matter that has not appeared in any other history. *Biographical sketches are given of the most prominent members of the Society in Great Britain and America, with many instructive passages from their writings and interesting anecdotes.*

Among the subjects of deep interest treated of in these volumes are: *the perils and preservation of Friends during the Irish Rebellion of 1798; the course they pursued during the war of American Independence; their efforts to civilize the Indians and preserve peace with them; the rise and progress of their testimony against Slavery; their early labors in the cause of Temperance; the Separation in Ireland at the beginning of this century; and the Separation in America in 1827-8, with the causes that led to it, and the results that have followed.*

The cost of paper, printing and binding having greatly increased since the first prospectus was issued, it is found that the work cannot be published, *without considerable loss*, at the price originally intended. The price will be, therefore, \$2.00 per volume, bound in cloth; and \$2.25 per volume, bound in sheep, library style; but those subscribers under the first prospectus who have taken the first two volumes, will be furnished with the third and fourth volumes at \$2.00 each, bound in sheep.

The first two volumes can be obtained from the publisher or his agents, at \$2.00 each, sheep binding.

Agents are requested to return this prospectus as speedily as possible—as the work is now in press—with full list of names and residences of subscribers, to the author's publisher. Agents will be allowed one copy for every six copies sold by them, and they can be furnished with lists of their subscribers upon application to the Publisher.

SELECTIONS FROM THE WRITINGS OF JOHN BARCLAY.

(Continued from page 508.)

To L. A. B.

Boston, 24th of Sixth month, 1825.

I am favored indeed in being able to say, how
greatly the change of air, and the suspension of
mental exercises have revived me. Truly, I felt
both in mind and body, failing beyond the usual
vicissitudes or ups and downs that attend. It
was a great convulsion to my faith, though reliev-
ing to my poor frame, to have to resign what had

been become more than I could sustain: and yet
for a time I could not see any way rightly to
get from under it. When we consider what
must be, and ever is, the condition of those who
follow not the Lamb in the leadings of his pure
light, and that it is said of them that love the
world, and the things of it, that the love of the
Father is not in them,—that the friendship of
the world is enmity against Him,—with many
other such truths;—what shall we think the fair
profession of many is worth, in the sight of the
Searcher of hearts. How glorious a thing, to

path, wherein we are through many tribulations and chastenings, and even apparent desertion and death, taught that we are poor creatures, able of ourselves to do nothing, neither to keep ourselves alive in a spiritual sense. O! it is hard work to endure patiently all that is needful for this purpose, and to accept all the painful operations of the Holy and High One for our good: yet there is no safety for us, but in submitting thus to what may be called the death of the cross; and "if we be dead with *Him*, we believe that we shall also live with him; if we suffer we shall reign with him." I continue to feel peace of mind in the step taken or concluded on, when under thy roof. What a shelter, dear friends, it felt to me to be with you; I wish often to be with you in spirit, and to partake of that which refreshes you, and which animates to hold on to steadfastness. My situation since I left you, has been one calculated to discourage; but I trust the Lord is my stay, though little evidence seems extended of that sensible support which poor nature looks for. It has been a sifting, searching time with me; the being thus suspended, shall I say thrown on my back, and my purposes turned aside, causes much scrutiny; but I cannot find that I have misused the way,—nay, the language presents, "It was well it was in thy heart;" yet as regards the future, I am earnest for clearness, though remembering that we are to "be careful for nothing." Alton Quarterly and Monthly Meetings are to be on the Fifth and Sixth days next week; in being at these, I may see further what is best. My health is certainly better for being here, the bracing sea air has been very beneficial; but while this is the case, every day shows me proofs of my exceeding delicate state. A religious meeting costs me much travail, much wrestling of spirit; so does going about among Friends occasion much suffering and watching, though often with a cheerful countenance. If we are but kept simple, humble, patient, resigned to do or suffer, nothing can harm us, nor will a hair of our heads be singed or fall to the ground; all that can happen to us will only turn to our benefit, and not one of our sacrifices but will accomplish that for which it is designed by Him, who worketh in us and for us.

1825, *Ninth Month 15th*.—I got well home, with a peaceful mind, empty and low enough, though not so as to be insensible of the powerful hand that had been over me for good, and over all things else, to make them good to me. In the midst of much bitter conflict, which has since been in wisdom dispensed, it is a favor to have nothing to look back upon greatly to grieve or condemn the poor tried spirit, ready as it has been to halt, and to drink in discouragement; and in the feeling of it, one is ready to exclaim, how wonderful is the preservation and condescension handed to the poor instrument,

when it has thus given up all for the name of the Lord!—and yet, on the other hand, what weakness in any of the Lord's people can be greater than that which such feel; so that every day and every way they would err and fall, and do evil, were it not that an omnipotent power was ever near, to uphold, to prevent and to restore!

The Monthly Meeting soon occurring, I returned my certificate to my own satisfaction, and I believe that of my Friends.

1825, *Tenth Month*.—Low times often: but out of the depths did I cry, and He made these "depths of the sea a way;"—He led me through them as on dry ground, and shewed me His wonders in them: so that I have been enabled to pass on, leaving them behind, yea, leaving every thing past and to come in his hands, who can do all things for me.

New duties, new and arduous paths not cast up, no mark, no trace, no footing, but just in His footsteps, who putteth forth and goeth before. O! for a free, simple, entire throwing myself into His care and keeping and disposal in all things, now and evermore! for no one else can deliver or preserve, or carry through, or enable to glorify Him, or bring about things, that so they shall all redound to His praise.

[In the Third Month, 1826, he quitted his residence at Marazion, and in the Fifth Month following, he again entered into the married state, and settled at Alton, in Hampshire.]

1826, *Sixth Month 22nd*.—I have at times been almost ready to conclude it a vain thing, to attempt in this way to commemorate the innumerable blessings and mercies from day to day, from week to week, from month to month, which have been heaped upon me; and yet pure desires, I trust are at times known to arise, that others may be induced to come, taste and see, how good the Lord is,—how wonderful are his dealings to the poorest, most unworthy of His creatures. Words cannot set forth what He is, and will ever remain to be, towards those that trust in Him, and hope in His mercy; and who still endeavor, through all that may happen to them,—through all weaknesses, repulses, temptations, and exercises, to strive with a true heart to serve the God of their lives. O! what hath he wrought for me, more than in past times,—if possible, more than in years that have long passed over! My removal out of Cornwall, my settlement in this allotment (Alton,) my many, many comforts, a beloved and loving partner given me in the place of her, that has been safely landed from this sea of troubles! how shall my soul ever repeat all that God hath wrought for me in these matters? Yea, how hath he preserved my goings out and my comings in, my up-rising and my down-sitting; so that notwithstanding the many haltings, stumblings, slippery and exceedingly difficult places,

the Lord, hath in good measure been my confidence, and kept my foot from being taken, and my life from being smitten to the ground by the enemy. O! he hath made for me a way, where I could see none; He hath made that to be possible,—yea, brought it to pass, which seemed impossible,—yea, brought me safely through; so that I can indeed yet praise him for his goodness.

To E. S.

ALTON, Fifth Month, 1826.

My Dear Friend.—To say that my soul doth tenderly and deeply sympathize with thee under thy sore bereavement, is saying little at such a time as this; and yet well knowing how wonderfully the Divine compassions are extended in such an hour, I cannot be anxious that my pen should be made helpful to thee. It is indeed a season when "the powers of the world to come" and the "heavenly gift" are to be tasted and deeply drunk of; for whatever be the nature of man's extremity, it is then the Lord is most inclined to draw near, and manifest the excellency of his never-failing arm; inviting, nay, urging the sons of men to take refuge under his healing wing. My belief is firm, that it is not only possible but easy, through submission to this inward operation and aid, for the soul to be raised above the outward, and settled in a holy calm, where it can bless, and praise, and magnify through all, the name of Him, who doeth all things well, and nothing in vain. It will no doubt be thy concern, as it is our duty, to dwell on the various blessings connected with this painful dispensation; that thy dear wife should have reached her home, is one that strikes me forcibly. But there is much of tenderness and gentleness in the Lord's severest dealings, and in those which seem darkest or bitterest. We know not the end or meaning of many designs, but they are developed by and by, even to our own astonishment and satisfaction. Yet in respect to these, and all other indirect alleviations or abatements to the acuteness of feeling, it may be said, at least for a time, in the language of Jeremiah, "When I would (thus) comfort myself against sorrow, my heart is faint in me."

Thy dear little eldest child will often, I trust, beguile away a heavy hour of musings and of mourning, and take thee from too selfish an indulgence in what has been termed, 'the luxury of grief,'—help thee also to cast an eye on the future, rather than to dwell too much or unduly on the past,—and lift thy tried spirit out of the unprofitable depths of sorrow; and her little prattle may sound like a call—'lead me to follow her thou mournest.'

O! what a spur to diligence, to increased care in all the allotment of duty, does such a loss as thou hast sustained, if rightly borne, bring with it. If thus I have been favored to see "the end of the Lord,—that he is very pitiful

and of tender mercy," and that "blessed are the dead who die in him,"—what shall I render, and how shall I live, and what shall I not endure for the sake of "so great salvation," so excellent a Saviour. Truly, dear E., I look for something out of all this; for the Lord hath done great things for thee, as for *her*, thy precious partner; and I cannot but think, thou mayst lift up thy head in hope, and go on in the strength of the Lord. For though many be and must be our remaining tribulations, before it be said to us, "Thy warfare is accomplished;" yet while our dependence and surrender of soul is maintained in even a small degree of simplicity, He whom we serve will never leave nor forsake us, nor fail to make good all that He hath promised.

May the consolation of God be abundant with thee; and may nothing of this transitory world, whether heights or depths, come between him and thee, to deprive thee of the richness and fulness of his blessing, yet poured on them that mourn.

My dear love attends thee. May we abound in grace, and every good fruit, even by abiding in the vine, being often purged as fruit-bearing branches, and chastened as dear children.

Farewell. I remain thy affectionate friend,
J. B.

(To be continued.)

EXTRACT.

It is common to speak of the house of public worship as a holy place; but it has no exclusive sanctity. The holiest spot on earth is that where the soul breathes its purest vows, and forms or executes its noblest purposes; and on this ground, were I to seek the holiest spot in your city, I should not go to your splendid sanctuaries, but to closets of private prayer. Perhaps the "Holy of Holies" among you is some dark, narrow room, from which most of us would shrink, as unfit for human habitation; but, God dwells there. He hears there music more grateful than the swell of all your organs; sees there a beauty, such as nature, in her robes of Spring, does not unfold; for there He meets, and sees, and hears the humblest, most thankful, most trustful worshipper; sees the sorest trials serenely borne, the deepest injuries forgiven; sees toils and sacrifices cheerfully sustained, and death approached, through a lonely illness, with a triumphant faith. The consecration, which such virtues shed over the obscurest spot, is not and cannot be communicated by any of those outward rites by which our splendid structures are dedicated to God.—*Channing.*

"Since the religious faculties of the poor and half educated cannot investigate historical and literary questions, *therefore* these questions cannot constitute an essential part of religion."

The following address to the Members of Concord Quarterly Meeting, by John Jackson, is deemed worthy to be reprinted; it has been sent to us for that purpose.

ADDRESS.

When we contemplate the goodness and mercy of the Most High, and our own dependant condition, we are led to believe that Divine worship is a duty we owe to Him, as the obligation of a rational creature to an All-wise Creator. And although a variety of forms have been adopted by the religious world, none perhaps is better adapted to the performance thereof, than our practice of waiting upon God in silence; and none perhaps more in accordance with the testimony of Jesus, that "God is a spirit, and they that worship him must worship him in spirit and in truth."

However simple this kind of worship may be in itself, it is to be feared, it is too little understood by a large portion of the professors of religion. This *silence* is not merely a cessation from words, it is an inward watchfulness, wherein the thoughts, feelings, and affections of the soul become so centered within itself, as to leave it free from the influence of external excitement, and brought into a condition to commune with its divine Original. Here is ample room for the exercise of every spiritual faculty; the soul is brought to a clear sense of its condition, desires are raised after heavenly good, and as a living fountain, continually aspires to the attainment of an endless life. Here we can understand a testimony delivered by the lip of truth, "Whosoever drinketh of the water that I shall give him, shall never thirst, but the water that I shall give him, shall be in him, a well of water springing up into everlasting life."

If in our religious meetings we are engaged to promote this kind of silence, a preparation would be experienced, to worship God in "newness of life." We should feel the quickening virtue of the life of Christ rising into dominion in our souls—that spiritual food which is prepared for its sustenance in this probationary state. And, however this may be overlooked or neglected, it remains to be the transcendent glory of the Gospel dispensation—this we should desire to attain unto in all our approaches to God, whether it be in retirement, or in an assembly met for public worship. As we are engaged to come to Christ, the "true anointing," access will be opened unto him through the power of an operative faith, bringing the mind under the holy influences of Divine love; and by this medium we become initiated into membership with the true church, answerably to the Apostolic testimony, "By one spirit all are baptized into one body."

When our faithful predecessors were called out of the powerless forms and ceremonies of

their time, they were drawn together in the bonds of Gospel fellowship, where they were often livingly baptized under the influence of the holy spirit, bringing them into the silence of all flesh. Hence arose our peculiar form of worship, in the practice of which they encountered many severe persecutions, oftentimes being dragged from their places of worship—torn from their families—cast into prison, and exposed to the cruelty of wicked men. But neither ridicule, persecution, the deprivation of the comforts of life, nor all the cruelty inflicted by a spirit of intolerance, could lessen their adherence to the principles they had espoused—weakened their confidence in an arm of power that was underneath to support them, or abate their zeal in the performance of what they not only considered, a reasonable service, but because they believed it to be a practice authorized by Christ and his immediate followers.

Here they enjoyed the consolations of the gospel in Christian communion, and being brought into the power and life of Christ, could realize the truth of his declaration, "Where two or three are gathered together in my name, there am I in the midst of them."

Let us contrast our present situation with theirs, and properly estimate those privileges, which through their faithfulness, we are now permitted to enjoy without molestation or disturbance.

When we look around us, we cannot number the blessings, both spiritual and temporal, which have been bestowed upon us. And do not these things call for renewed exertions on our part, and for greater degrees of dedication in the cause of truth?

Why should any of us, amidst the accumulated favors of a bountiful Creator, relinquish the practice of assembling ourselves together, that we may bear a public testimony of our love to Him, by waiting upon Him in solemn, reverential silence? Shall the prosperous condition of our temporal callings, prevent us from the performance of this great duty? Would it not be more consistent with the favors we enjoy, as well as with the religious principles we profess, to manifest our gratitude, by devoting a portion of our time in so reasonable a manner?

If, as we believe, our religious testimonies are founded in the truth, as it is in Jesus, and if practically adhered to, would promote the harmony of mankind, and augment the sum of human happiness, does it not become a matter of importance to us, that we labor for the promotion of this great end; and that we do not weaken our hands or lessen our ability to do good to our fellow men, by our unfaithfulness in the discharge of our duty to our heavenly father. The good seed has been sown, and let us not suffer the "cares of this world or the deceitfulness of riches" to retard its precious

growth; rather let it be cultivated, that it may bring forth much fruit, to the praise of the great and good husbandman.

May we then, dear friends, continue faithful in the attendance of all our religious meetings, both for worship and discipline, and when there assembled, seek for the life of Christ, as it is manifested in the secret of the heart; and as we keep on the ground of watchfulness and humility, we shall be qualified to support this testimony for the truth in uprightness, and thus be able to hold out this language to others: Come and have fellowship with us, because our fellowship is with the Father, and the Son, and one with another in him. Then there would be a godly concern with parents to encourage their tender offspring in the performance of this duty, to instruct their infant minds in the precepts of the gospel, and in the language of their lives, hold out the invitation to follow them, as they follow Christ.

And may you, my young friends, be concerned to keep upon the watch, and guard against every thing that would in any wise draw your minds from the path of self-denial and the cross. Exposed as you are to the snares and temptations of a world that lieth in vanity, in danger of being led astray by its deceitful flatteries, my mind has been impressed with a fervent desire for your establishment upon the true foundation. When we look back upon the past, and contemplate the removal of many who have stood as bright and shining lights in our religious society, now removed from their labors in the militant church to be united with the church triumphant in Heaven, are we not led to reflect upon the query, "Your fathers, where are they, and the prophets, do they live forever? The youth of our society hold a responsible station—on them will devolve the support of our righteous testimonies.

How important then that they should be faithful to the dignified trust committed to their charge; that they may become the instruments through which our principles and the simple habits of our fathers may spread and increase, and be conveyed to succeeding generations.

Do not plead for this selfish indulgence or that carnal gratification, as seeing no harm in it; abstractly considered they may be indifferent, but alas! they often become the snares in which the feet of the unguarded are entangled, and drawn down to the chambers of death. The enemy of our peace begins with plausible temptations, in things which to the inexperienced mind appear of small concern—little by little we yield ourselves to the delusive persuasions of the vain world, till at last we are betrayed into a false shame of godly conversation and a breach of those simple habits, into which the truth leads its faithful followers, and has placed as an exterior hedge of preservation about them.

As we yield to small temptations, we find less ability to resist greater when they are presented, and thus we are drawn off from the simplicity of our profession, to amalgamate with the world, in language, in dress, and in its corrupt customs and associations. The natural tendency of which will be to darken and entangle the mind, by alienating it from the life of God—betraying it into a disobedience of the inward law, in which too many have thrown off the salutary restraints of religious discipline, and unhappily have trampled under foot by example, the guardian care and precepts of pious parents, and by a mistaken indulgence in the gratifications of the carnal mind, have multiplied their sorrows, instead of becoming the support and consolation of their declining years.

O how important that we should attend to an injunction given by the apostle, "Abstain from all appearance of evil;" let us not be ashamed of the cross of Christ, but be willing to choose the independent ground taken by one formerly, let others do as they will, "but as for me and my house we will serve the Lord." Such a course would enable us to escape the snares of the world, and as we become daily concerned to live in obedience to the "law of the spirit of life in Christ Jesus," we should be set free from the "law of sin and death," and thus be qualified to answer the end of our being, by shewing forth the praises of Him, who hath called us out of darkness to be made living witnesses of his "marvellous light."

Finally, dear friends, may we be engaged in the faithful support of all our religious testimonies, that the work of our day may be advanced in proportion to the light we have received, and the ability which is furnished us. Then, may we not confidently hope, that Zion will shake herself from the dust of the earth, and in her and with her will arise, "Judges as at the first, and counsellors as at the beginning."

JOHN JACKSON.

Darby, 2d mo., 1837.

THE PROVIDENCE OF GOD EXEMPLIFIED.

It was a cold and bleak evening; the snow, driven by the furious north wind, was piled into broad and deep banks along the street. Few dared or were willing to venture out. It was a night the poor will not soon forget. In a miserable and shattered tenement, somewhat remote from any other habitation, there resided an aged widow, all alone, and yet not alone. During the weary day, in her excessive weakness, she had been unable to step beyond her door stone, or to communicate her wants to any friend. Her last morsel of bread had been long since consumed, and none heeded her destitution. She sat at evening by her small fire, half famished with hunger, from exhaustion unable to sleep, preparing to meet that dreadful fate from which she

knew not how she should be spared. She had prayed that morning in full faith, "Give me this day my daily bread;" but the shadows of evening had descended upon her, and her faithful prayer had not been answered. While such thoughts were passing through her weary mind, she heard the door suddenly open, and as suddenly shut again, and found deposited in her entry by an unknown hand, a basket crowded with those articles of comfortable food, which had all the sweetness of manna to her. What were her feelings that night, God only knows; but they were such as arise up to Him, the Great Deliverer and Provider, from ten thousand hearts every day. Many days elapsed before the widow learned through what messenger God had sent to her that timely aid. It was at the impulse of a little child, who, on that dismal night seated at the cheerful fireside of her home, was led to express the generous wish, that the poor widow, whom she had sometimes visited, could have some of her numerous comforts and good cheer. The parents followed out the benevolent suggestion, and a servant was soon dispatched to her mean abode with a plentiful supply. What a beautiful glimpse of a chain of causes, all fastened at the throne of God. An angel, with noiseless wing came down, and stirred the peaceful breast of a pure-hearted child, and with no pomp or circumstance of outward miracle, the widow's prayer was answered.—*Sudbury Leaflets.*

"The Church of God is that living body of men who are called by Him out of the world, not to be inventors of a new social system, but to exhibit in the world, by word and life,—chiefly by life—what humanity is, was, and will be, in the idea of God."

TRUE ECONOMY.

Among the golden maxims of Edmund Burke is the following: "*Parsimony is not economy.*" Expense and great expense may be an essential part in true economy, which is a distributive virtue, and consists not in saying, but in selection. Parsimony requires no providence, no sagacity, no powers of combination, no comparison, no judgment. Mere instinct, and that not an instinct of the noblest kind, may produce this false economy in perfection. The other economy has larger views. It demands a discriminating judgment, and a firm, sagacious mind."

As avarice is the meanest and most belittling passion which can rule the mind, so it is ever inflicting discomfort, and loss, and penury upon its victims. How little has that man got who has money only! How utterly bereft is his beggarly life of all that renders life precious and noble! He who thinks only of getting and saving, and forms no plans to use well what he

has gotten, is truly an object of pity. Too sordid for joy, and too covetous for contentment, he becomes miserable just in proportion as he grows parsimonious.

A prudent economy, on the other hand, *saves* to spend. It boards to distribute. It denies an ear to the clamor of small and selfish desires only that it may listen to the calls of reason and duty. It considers the useful, the necessary and the good, and provides as best it may for them all.

There is, however, a parsimony which is seen in connection with the utmost extravagance. They who spend money on themselves only, and who rarely think even of any claims outside the sphere of their personal indulgences, become parsimonious the moment economy solicits them to share in promoting the common good of society. They cannot "afford" to part with money for such purposes, "Their expenses are so heavy," "The calls are so many," "They cannot be all the while giving," "They will think of it," and so they become rigid misers while engaged in the practice of the greatest extravagance in dress, living, amusements, and all the fancies and follies of the fashionable world. Parsimony, then, is of two kinds, but either kind is sure and positive loss to its devotee.

In this connection the question arises whether there can be any such thing as a true economy which does not involve to some extent the notion of self denial? Men who never part with their money for good objects until they have more than they know what to do with, can practice no economy in the act of giving.—*Christian Intelligencer.*

REFLECTIONS.

There comes a time when we can no longer stand in the same relations that we have stood in. Youth fades; the eye grows dim; the ear waxes dull; the foot becomes slower, and the hand less nimble. As when they take down a tent, one cord lacks after another, and one peg after another is drawn out of the ground, and all are but premonitory symptoms of its collapse and fall; so one and another sign of age, as they come upon us, are but so many testimonies that this material tabernacle is being taken down. If we have gained honors, the time is coming speedily when we must lay them aside; for honors never go to funerals with the men who wore them. If we have pleasures, the time will come when they will run thinner and slower and will be less remunerative; and they will stop just at the period when most we need them. When age begins to dawn, and our companions have passed away, and we are left solitary and alone; when our health breaks down, and our buoyancy of spirit ceases; when our faces are set toward the grave, and we are marching thither, what can riches do for us? what can all the acclamation of the world do for the man that is dying?

There is many a man that has worked all his life to heap up pleasures, and that stands shivering, and shuddering, and saying, "I can not bear to die and leave them all." But die and leave them all you will. No man that has undertaken to make himself happy by seeking anything in this world has succeeded. No such man can be happy. But he that has lived for love, purity, duty, heaven, and immortality will be happy under all circumstances. When sickness comes to him, Christ the Comforter comes with it. When sorrows come, then the bow of promise comes. And when death itself comes, what is it but the hand of God sent to take him home? Dying is vacation and joy and happiness. He only is happy, who knows how to be one with Christ, to suffer with him, and to live with him here for that joy and peace that he gives. As the body decays, as its powers fade away, as our earthly honors recede, our heavenly treasures should appear.

"When we think that every house might be cheered by intelligence, disinterestedness, and refinement, and then remember in how many houses the higher powers and affections of human nature are buried as in tombs, what a darkness gathers over society."

CARE OF THE POOR.

Christianity is most humanizing in its influence. It teaches the doctrine of the brotherhood of man, and enforces by the most sacred sanctions the duty of loving our neighbor. Whenever it wins the mastery of the soul, it stirs the benevolent impulses into activity. It is by the humanities which the Christian religion develops that our civilization contrasts so favorably, in its social aspects, with barbarism.

In one of his discourses Robert Hall makes eloquent allusion to the fact that the boasted civilizations of the classic world made no provision for the relief of the suffering poor. In cultured Athens and in Imperial Rome asylums for the destitute and hospitals for the sick did not exist. It is only where Christianity exerts its beneficent sway that vast sums of money are expended to protect and nurture and save the children who suffer from orphanage and crime, to shelter and comfort those whom age has rendered helpless, to mitigate the sufferings of the diseased and to heal their maladies. It is a significant fact, too, and one which does great honor to Christianity, that the humanitarian enterprises of the age derive their inspiration and support mainly from the Church.

The greatest benefactor of humanity the world has ever seen was Jesus. In him philanthropy found its truest and highest embodiment. Though lofty and pure in his nature, he descended to the lowest walks of poverty, that he might thereby kindle hope in the heart of the forsaken,

soothe the anguish of the sick and dying, console the sorrowing, and relieve the hungry. He so thoroughly identified himself with the poor of this world as to leave them as a charge to his followers with the assurance that their helpful ministries to the suffering would be accepted and rewarded as though done to himself. With the example of such a leader ever before them, and with his precepts as their guide, it is not strange that Christians are compassionate to the poor. In conformity to this example and to these precepts lies indeed one of the great tests of Christian character. "Whoso hath this world's goods and seeth his brother have need, and shutteth up his bowels of compassion from him, how dwelleth the love of God in him?"

The blasts of winter are greatly heightened in severity by unwarmed apartments and insufficient clothing and food. In every city, and in most of our smaller towns, little ones, who are innocent of the guilt of a father's idleness and intemperance, will cry from cold and hunger while the winter's storms are abroad. Though this is a land of abundance, there are multitudes who suffer for lack of bread. In the South the destitution threatens to be fearful. The unrepaired wastes of the war, and the great destruction caused by the army worm to this year's cotton crop, will subject both whites and blacks to serious suffering. In this direction there will be abundant opportunity during the winter to fulfil the divine injunction, "If thine enemy hunger feed him, if he thirst give him drink."

In most of our town and city churches there are Christian widows, who, bereft of their earthly protectors, battle in silence with adversity. Others, because of broken health or advanced age, are exposed to the severities of the winter. How would a kind visit, accompanied with becoming tokens of friendly sympathy from the more prosperous, relieve the dreariness of their lot!

What an opportunity for those to whom God has given means, to gather a rich harvest of heart happiness, for truly "it is more blessed to give than to receive!"

Christians should not wait for the Church in its organized benevolence to distribute to the necessities of the poor, but should employ their personal ministries in relieving the wretchedness around them. They will secure thereby more fully to themselves the rewards of their beneficence, while they will do a greater good to those to whom they minister. They will also conform more perfectly to the Divine Exemplar who "went about doing good." Like him they should scatter blessings upon all the needy, "upon the evil as well as the good."

The entire object of true education is to make people not merely *do* the right things, but *enjoy* the right things—not merely industrious, but

to love industry—not merely learned, but to love knowledge—not merely pure, but to love purity—not merely just, but to hunger and thirst after justice.—*Ruskin.*

FRIENDS' INTELLIGENCER.

PHILADELPHIA, THIRD MONTH 2, 1867.

We would remind our friends that we approach the termination of the current volume of the *Intelligencer*. The commencement of a new year will be a favorable time for those who are disposed to promote the circulation of the paper, to send us additional names as subscribers.

THE COLORED CHILDREN OF OUR CITY.—It has been our practice for some time to notice the movements of Friends travelling in the ministry, as such information is furnished us, and we believe this course has given satisfaction to Friends in different neighborhoods. Our prefix points to a service out of our own Church, which is being prosecuted by our Friend Deborah F. Wharton, with the concurrence of Spruce Street Monthly Meeting. We were glad to hear of this concern. Several interesting opportunities have been had in the different schools and meeting-houses, belonging to the colored people, and also in the Refuge for Colored Children. A satisfactory meeting was held at the latter place on last First-day afternoon. The children, of whom there were about 225, were remarkably quiet and attentive, and appeared to understand what was said to them. The gratification they manifested at being kindly noticed, gave evidence of good feeling, and we trust that their present *refuge* may prove an asylum in which there may be found an influence that will counteract the evil effects of their former habits. Many of them have been taken from homes degraded by drunken parents; others have been rescued from the street, as wanderers on the public highway, with no friendly hand to lead them onward.

Two little boys, one nine and the other eleven years old, received recently, were taken up for stealing a watch. Their mother, they said, had taught them to steal, and in that way they had mainly maintained her. We would encourage Friends who feel an interest in this

class of the community to visit them in this comfortable home. It would, no doubt, be an encouragement, not only to the children, but to those who have them in charge, and who need a friendly word to cheer them in their arduous labor.

"Select Historical Memoirs of the Religious Society of Friends, commonly called Quakers, being a succinct account of their character and course during the 17th and 18th centuries. By WILLIAM HODGSON. Second edition, 12mo. pp. 431."

We have received from J. B. Lippincott and Co. a copy of this work. Many of our readers will remember that in the first edition, published in 1844, there was a chapter in which the religious reputation of a large body of Friends was assailed. This circumstance, of course, prevented what was otherwise a valuable compilation from circulating to any extent among the members of our branch of the Society. In the present edition, the author has wisely, as we think, omitted that chapter. At the close of the volume, he informs that he leaves to the "pen of future history the delineation of the important events connected with the two great manifestations of defection from the faith of our forefathers, which have occurred in our own day."

After these remarks, we can say that we have read the 45 chapters of the book with interest. The author has drawn his material from many sources, some of which are not easily accessible. He has given us a faithful portrait of many of the ancient worthies, with collateral circumstances, which make the work a valuable addition to a Friend's library.

We are not prepared to adopt all his literal statement of doctrinal views contained in the third chapter, but, *as a whole*, we can recommend the work as a useful and well-timed addition to our religious literature.

We would call attention to the advertisement on our last page, of the prospectus of "The Friends' Examiner," the first number of which has just been issued in London. When we receive a copy from the publisher, we shall probably give it a more extended notice.

MARRIED, on Fourth-day, the 10th of First month, 1867, at Falls Meeting, Bucks Co., Pa., BENJAMIN HAMTON BURGESS to MARY P. CORNELL BOOTH, of Lower Makefield Township.

DIED, on the 27th of Eleventh month, 1866, in London Grove, ANNIE S., wife of Elias Hicks, in the 44th year of her age.

"Blessed are the dead which die in the Lord, that they may rest from their labors, and their works do follow them." That this was the happy experience of our dear friend there is no room to doubt. Through the months of extreme physical suffering which preceded her death, words of counsel and encouragement flowed almost as a perpetual stream to those who were privileged to be with her; while for herself she gave the comforting assurance there was nothing in her way, and was favored to speak of her approaching dissolution with perfect calmness—yes, even joy; saying she felt there was no darkness in the "valley of the shadow of death."

—, on the 26th of First month, 1867, in Prophetstown, Ill., of typhoid fever, ESTHER ANN BROWN, daughter of Thomas and Elizabeth T. Brown, of West Liberty, Iowa, in the 19th year of her age.

—, on the 24th of First month, 1867, at her residence in Julietstown, Burlington Co., N. J., HANNAH COX, widow of the late Joseph Cox, in the 77th year of her age; a minister belonging to Upper Springfield Monthly Meeting. She met the stern messenger with trimmed lamp and entire resignation. Her mild, cheerful disposition enabled her to dispel clouds and tinge the surroundings with sunshine.

—, on the 5th of First month, 1867, in Moreland Township, Philadelphia Co., UREX BONNER, in the 84th year of her age; a useful member of Byberry Monthly Meeting, Pa.

—, on the 4th of Second month, 1867, at his residence in Springboro', Ohio, JONAH D. THOMAS, in the 78th year of his age.

—, on the morning of Second month 12th, at his residence near Mt. Holly, N. J., SAMUEL BULLOCK, in the 62d year of his age.

—, on the 22d of Second month, MARY S., wife of Arthur Miller, and daughter of Sarah P. and the late Silas D. Edison, in her 27th year.

—, on the 24th of Second month, of scarlet fever, LAURA, daughter of Chas. S. and Mary J. Ridgway, of West Philadelphia, aged 10 years.

NOTICE.

All persons having friends or relatives interred in the graveyard belonging to the Society of Friends at Concord, Delaware Co., Pa., are notified that they will have until the 1st of Fifth month next to mark the places of said interment in accordance with the Discipline of said Society, as after that time the yard will be levelled and graded.

By order of the Meeting.

JOHN D. PEIRCE,

2d mo. 18, 1867.

Committee.

TEACHER WANTED.

A female teacher wanted, to take charge of a Friends' School at Waynesville, Ohio. A Friend that can come well recommended will apply through Post-Office, Box No. 43.

Friends' Fuel Association for the Poor will meet this (Seventh-day) evening, at 8 o'clock, at Race St. Monthly Meeting Room.

Friends' Association for the Aid and Elevation of the Freedmen will meet at Race St. Meeting-House on Fourth-day evening, Third month 6th, at 7 o'clock.

J. M. ELLIS,

ANNE COOPER,

} Clerks.

For Friends' Intelligencer.

FRIENDS AMONGST THE FREEDMEN.

NO. V.

Encouraging letters and reports from our teachers continue to be received, from which the following summary has been compiled:

SCHOOLS IN VIRGINIA.

SARAH A. STEER, at Waterford, writes: "My room is so small I had to send ten of my little ones home ye-terday. The box and barrel of clothing will supply the most needy. I received the package of *circular letters*, and have distributed some of them. *They are highly prized by all.* I am quite proud of my classes in grammar and philosophy, and think they understand these branches right well, as far as they have gone. I have one afternoon in the week devoted to *sewing*, and notice considerable improvement from time to time in this useful branch of learning."

CATHARINE E. HALL, at Andrew's Chapel, has a school of 25 pupils, and although she says, "My school is doing very well," in view of the small number, she adds, "Some nights I retire feeling much discouraged, desiring a larger field of labor; but I sleep it off, and return to my duties in the morning with renewed interest."

SARAH E. LLOYD, at Woodlawn. This school increased last month from *fifty* to *eighty* pupils, and though with the first named number in the Twelfth month she had four in the alphabet, she now has none, with this increase of *thirty*. She also informs that some Friends have opened an evening school for the purpose of teaching penmanship, in which the pupils are making rapid improvement. She forwarded an admirable specimen from one of her own pupils, written after only eleven days instruction.

MARTHA WRIGHT, at Lewansville, says: "I have one little boy, not seven years old, who can read well in the *third* reader. I have an interesting school now, and am glad I did not leave the field of labor, as I at first decided after the school house was broken open. Although I have 38 pupils, my school would be much larger, if I had some clothing for little boys."

MARY McBRIDE, at Fairfax Court House, reports "two pupils removed by death. The attendance has been lessened by sickness. At the time of writing very many were ill. Every pupil has been sick, though, of course, not all at any one time." With all these disadvantages she reports 54 pupils, *all of whom* can spell, 36 can read, 29 write, and none in the alphabet.

HANNAH SHORTLIDGE, at Big Falls, after an absence of some time, writes: "I had 23 sable faces ready to welcome me the first morning

after my return. I wish thee could see my school. My pupils all study hard, and are getting along so nicely. I have five married men, all of whom have large families. Great anxiety is manifested to have the school kept up. There are but few colored families in this immediate neighborhood, but all their children are in attendance. Several boys who live at a distance have been trying to get board with some of the farmers until spring, so they, also, can attend.

CAROLINE THOMAS, at Leesburg, reports her school having increased last month, and that the conduct and progress of the pupils is *very good*. She has now 57 names on the roll, of whom 39 can read and 40 write.

FRANCES E. GAUZE, at Herndon Station, speaks very cheerfully of having resumed her duties in the new school-house, (replacing the one burned.) adding: "We have raised sufficient money amongst the Freedmen to defray all expenses, and feel as though we had struggled for independence; and now stand victorious in the contest." As evidence of the unusual severity of the weather, she also mentions there having been good sleighing for the entire month.

MARY K. BROSIUS, at Vienna, is much encouraged with her school, although she says: "The house is so small I have almost to *stack* them, not having the heart to turn them away. I have hopes, however, of having a larger one in a month or two. When I came here in the Third month last, but few of my pupils knew even their letters; now they are good spellers and readers, and there are not more than one or two of those who commenced then but what I believe to be able to go through the entire spelling book, and not miss more than half a dozen words of the spelling."

In addition to the bright little boy spoken of in a previous number, she mentions a little girl not yet five years old, who, though it was very hard for her to learn the alphabet, is now spelling in three syllables, and can spell every word correctly, as far as she has gone; while her aptness in writing is still more remarkable, as "she writes down on her slate all her spelling lessons. The weather has been excessively cold—in one instance the mercury descending *three degrees below zero!*"

ELIZA E. WAY, at Falls' Church, has a school of 73 pupils, with *only one* in the alphabet. She has also experienced the disadvantages of the recent very cold weather, being obliged to close her school during a large portion of the month, stating, "It was impossible to keep warm in the school room."

DEBORAH K. SMITH, at Gum Springs. This is a new location for a school, opened about the first of Second month with every prospect of success, and will number the elev-

enth school under our care in Fairfax and Loudon Counties, Va.

SOUTH CAROLINA SCHOOLS.

MARY A. TAYLOR, at Mount Pleasant, writes: "My little ones are getting along so nicely I think I shall not style my school the *primary department* much longer. I shall soon have been with them a year, (less our long vacation,) and in that time twelve have advanced from the alphabet to the second reader; a number are reading in the first, and I have a nice class in definitions. They also promise to be good spellers—many of them will spell out long words without the book. It is amusing to see how they will copy every thing put upon the blackboard. Two little boys cried the other day when school was over, because they wanted to stay and make writing and sums.

CORNELIA HANCOCK, at the same place, commenced at the same time, and states that her school "is essentially the same as when she began. Nothing but absolute necessity will tempt them to leave their school, and some that are hired out are now making a bargain that they shall have time to attend, and they seem to get along very well with both occupations. The neighborhood is much more healthy than it was this time last year."

CAROLINE TAYLOR, also located at the same place, has 32 pupils, all of whom read and write. Her school has decreased some, "in consequence of the removal of several families contracting on plantations too remote for the children to continue attending school." She is, however, in no wise discouraged, but works hopefully into the future.

PHILENA HEALD and SARAH M. ELY, at St. Helena, S. C., have flourishing schools, the combined number being 88, of whom 75 can read, while of the whole number only two are in the alphabet. One of these teachers thus speaks of the pupils: "They come to school since the holidays renewed and refreshed for the work; some of them have cotton to gin, but they say, if possible, they will not miss one day of school. They work late and early, and a number of them come several miles." She also adds: "We have had very cold weather here, colder than I had ever dreamed of its being in the Sunny South."

The aggregate condition of the fifteen schools noted above may be summed up as follows, viz:—

Ten schools in Virginia—No. of Males, 257; No. of Females, 238. Total, 495. No. Reading, 394; No. Writing, 396; No. in Alphabet, 19. Between six and sixteen years of age, 330.

Five schools in South Carolina—No. of Males, 87; No. of Females, 115. Total, 202. No. Reading, 189; No. Writing, 190; No. in Alphabet, 2. Between six and sixteen years of age, 165.

The attention of the reader is called to the large number of children in proportion to the whole, and to the small number in the alphabet.

The Association itself has not been idle during the past few weeks. It has forwarded thirteen packages to various places, containing about one thousand garments, shoes, boots, &c., these packages being either barrels or good sized boxes. It has contributed fifty dollars towards finishing a school-house nearly completed; *twenty dollars* in addition to a large quantity of clothing sent to Fortress Monroe; *two hundred and fifty* in aid of "The Orphan's Home of New Orleans," besides smaller donations of books, &c. It has also memorialized our State Legislature on the subject of the exclusion of people of color from our public conveyances, &c. It also directed the Secretary to appeal to one or more of the Shaker settlements for seeds for distribution amongst the Freedmen. That at Mount Lebanon, in New York State, was addressed, which met with a prompt and cheerful response in the shape of a valuable donation of *twenty-one hundred packages* of assorted garden seeds, well adapted to small patches of ground, in the distribution of which no time has been lost.

These meetings are full of interest; in fact, *increasingly* so; and it is often matter of regret that more of our Friends do not meet with us to share the "good things" that are so frequently in store for those who *do* assemble. In one of these it was suggested that the following minute, recently adopted as embodying the *then* existing feeling, should also be published, viz: "Letters and reports from a number of our teachers were read, showing a considerable increase in the number of pupils since the commencement of the year. Some of these letters detailed remarkable instances of progress, and a portion of them were accompanied with specimens of penmanship, which claimed the attention, and elicited the admiration of the meeting."

"In the free expression of the hopes and fears, the partial discouragements, and the bright anticipations which mark these letters, we have abundant evidence that these, our faithful missionaries, are fully alive to the importance of the cause they have espoused, and are earnestly striving to fulfil their respective duties. The meeting was unusually large, and from the lively interest taken in its proceedings, it is believed Friends separated, strengthened and encouraged to renewed perseverance in their labors."

Philadelphia, 2d month, 1867. J. M. E.

He who adopts a just thought, participates in the merit that originated it.

FRIEND JOSEPH.

BY LYDIA MARIA CHILD.

The Society of Friends, called Quakers, are so much separated from the world in general by the peculiarity of some of their customs, that few are aware how largely the world has been indebted to them for its moral progress. The Puritans are mentioned a hundred times where the Quakers are mentioned once as pioneer martyrs in the cause of human freedom. Doubtless we owe an immense debt of gratitude to the Puritans, those valiant soldiers of the Lord; but the Quakers have always been more interesting to me, on account of their superior reliance on purely moral influence. When William Penn was threatened with imprisonment if he continued to carry his principles into practice, he replied, "Well, friend, thy *strength* shall never equal my *patience*;" and these words concisely express the difference between the two classes of heroes. The Puritan hewed his way to freedom with the battle axe; the Quaker quietly took his stand, and said, "This rock shall fly from its firm base as soon as I." To my thinking, that moral heroism is superior to battle-axe courage. Government found it the most unmanageable thing they ever had to deal with. One of these moral heroes remained in prison fourteen years rather than pay sixpence; simply because the payment of the sixpence involved a violation of his principles. Of course, nothing could be done with such men, except to modify the laws to suit their consciences; and after many ineffectual efforts to coerce them, this was finally done. The mace and the sword were lowered in their presence, and they were allowed to go straight forward on their peaceful mission, without let or hindrance.

The Puritans contended mainly for theological opinions and forms of church government. Bravely they encountered suffering and death to maintain freedom of opinion; and for this we owe them reverence and gratitude, as pioneers and benefactors of the human race. But the early Quakers manifested so little interest in theological doctrines that it has been a subject of much controversy whether George Fox and William Penn did or did not believe in the Trinity, and other commonly received doctrines. Their mission was to maintain the superiority of moral principles over legal forms and established customs. They refused to fight, or to pay military taxes, because they believed it was at variance with the precepts of the gospel. More than half a century before any temperance societies were formed, they allowed no person to be a member of their Society who either distilled intoxicating liquors or sold them. Many years before abolition societies were formed, they established a rule that none of their members should sell a human
